Gracious God, our Loving Father, the Senate has been through a very stressful period, and the days ahead promise no relief. Help the Senators and their staffs to realize that one can suffer serious consequences from emotional and mental stress even when unaware of the stressful situation. Grant to the Senators and their staffs the wisdom to find a few minutes daily to relax—to be still—to listen to the silence—to contemplate. Especially we pray for our leaders who are under such great pressure to get things done before the August recess. Help them to lean on Thee and be receptive to Thy grace and strength. Remind all who bear the pressures of office to take seriously their responsibility to themselves to keep physically and emotionally fit. In His name Who said, "Come unto Me, ye who labor and are heavy laden, and I will give you rest." Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The distinguished majority leader is recognized.

SCHEDULE

Mr. DOLE. Mr. President, under the standing order, the leaders have 10 minutes each, to be followed by special orders for Senators DANFORTH, HEINZ, PACKWOOD, GORTON, PROXMIRE, DIXON, and MURKOWSKI.

I ask unanimous consent that the special order for Senator PRESSLER be vitiated.

The PRESIDING OFFICER (Mr. TRIBLE). Without objection, it is so ordered.

Mr. DOLE. Following that, there will be routine morning business, not to extend beyond 12 noon, with statements therein limited to 5 minutes each.

It will then be the intention of the majority leader to proceed to any Legislative or Executive Calendar items which have been cleared for action, possibly starting with Calendar No. 179, S. 1078, the FTC authorization bill.

I expect rollcall votes throughout the day, and it will be a fairly late session this evening.

As I indicated—I do not want anybody to be misled—there is no certainty that there will not be a session tomorrow. In fact, I think the odds are now tilted the other way. There is a chance that we will have the supplemental appropriations bill conference report before us sometime tomorrow; and if we are unable to make progress on a number of legislative matters, they will be dealt with tomorrow. We had a lot of gaps yesterday afternoon, when not much was happening. So I hope we can move rather quickly on the FTC authorization bill, and that it will be completed in fairly short order.

Then, if we can work out a couple of details, the compact of free association bill would probably be the next item to be called up. In addition, we have a couple of other veterans bills, that we can take care of in the wrap-up.

I am advised that there are 52 bills on the calendar, and some probably want to stay there. But we would like to clean up as many of those as possible between now and next week.

It will also be my intention, if there is a Friday session, to at least discuss farm legislation. We will try to take that up early next week, in one way or another, because if somebody wants to block action on the farm bill, I think we should know who the persons may be on the Senate floor, because it is rather important to many farmers that we act before the recess.

I will make a unanimous-consent request that the Senate Agriculture Committee be permitted to meet during the session of the Senate this afternoon. I will not do that now because the distinguished minority leader is not on the floor. It is very important that we be permitted to meet. If we are not going to be permitted to meet, then it is important that we know who does not want us to meet, so that we can advise the farmers of our States that we are being held up because of someone on either side of the aisle who does not want the farm bill to come before the Senate until after the recess, which is a little late for wheat farmers in Oklahoma, Kansas, the Dakotas, Colorado, Texas, and a few other areas.

Mr. President, I reserve the remainder of my time.

RESERVATION OF TIME OF MINORITY LEADER

Mr. DOLE. Mr. President, I ask unanimous consent to reserve the time of the minority leader, Senator BYRD, for his use later during the day.

The PRESIDING OFFICER. Without objection, it is so ordered.

S. 1404—RESPONSE TO JAPANESE TRADE PRACTICES

Mr. DANFORTH. Mr. President, before the Senator yields the floor, may I ask the majority leader a question?

Mr. DOLE. I yield.

Mr. DANFORTH. I wonder if the majority leader can tell me whether he has plans to call up S. 1404, the bill requiring the President to respond to unfair trade practices of Japan.

This bill is fashioned after a resolution that was passed by the Senate last spring by a vote of 92 to 0. The bill, itself was reported by the Finance Committee on a vote of 12 to 4. I would think that we could pass it in fairly short order if we could call it up.

The bill deals with the whole problem of the unfortunate trade situation we are in, particularly with respect to Japan. Some of us have been trying to get it moved forward, and I know that several Senators have morning business time reserved to discuss the bill today.

Before we get into morning business, I wonder if we could be informed as to the intent of the majority leader with respect to S. 1404.

Mr. DOLE. As the chairman of the Trade Subcommittee knows, we would be very happy to take it up today. It could be passed in 30 minutes, it seems to me. The vote was 92 to 0 on the resolution, so there cannot be much controversy about where the other 8 will be on the bill. That will be 92 to 8 if all the others are opposed. It is a fairly substantial margin. I would guess that it would be 100 to 0 if every Member were present.

I believe I share the concerns not only of the distinguished Senator from Missouri [Mr. DANFORTH] but also the chairman of the Finance Committee, the Senator from Oregon [Mr. PACKWOOD], when I say that we do not want to load it up with a lot of other amendments that may be classified as trade amendments at this time.

As I understand it, the Senator from Missouri is conducting hearings on the textile bill. There will be two more

hearings. The chairman, Senator PACKWOOD, has indicated as recently as yesterday that he would then have a markup on that bill.

So I hope that my colleagues on both sides who are concerned about textiles or shoes or other items will let us proceed with the Japanese trade bill and do it today or, if not, do it tomorrow. We will continue to press for that. It is bipartisan. It is not a partisan matter, so I hope we might have a bipartisan request to move forward with that bill if not today or tomorrow, then on Monday.

Mr. DANFORTH. I appreciate the majority leader's assurances. I fully understand the problem of trade bills becoming Christmas trees. They do tend to become that.

The time agreement which has been circulated on this bill would restrict any amendments to those dealing with the subject of the bill itself—namely, Japan-United States trade.

So it would not open up the door to a textile bill or a shoe bill or a steel bill, some of which might be worthy bills, some less than worthy bills.

But I do not think that S. 1404 should be a matter of great controversy; and it is a bipartisan effort.

I know we have been working with Senator CHILES, Senator BAUCUS, and Senator BOREN who have suggested some changes in the bill and they plan to offer amendments and those amendments would probably be acceptable. I think they would improve the bill so it remains truly a bipartisan effort. It has been a bipartisan effort all along and I would encourage the majority leader to press ahead in his efforts to get S. 1404 to the floor.

Mr. DOLE. I also add I do not believe the administration is excited by the legislation, but I have not heard any explicit indication that we should not proceed with the legislation.

The bill will be particularly helpful since a number of us will be visiting Japan in the latter part of August. It seems to me it will be very helpful in our discussions to inform the Japanese of the fact that this bill did pass by a wide margin in the U.S. Senate and it is getting to the point that something will happen unless there is very quickly some voluntary measures adopted that will have a real impact on our trade imbalance.

Mr. DANFORTH. I thank the majority leader.

RECOGNITION OF SENATOR DANFORTH

The PRESIDING OFFICER. Under the previous order, the Senator from Missouri [Mr. DANFORTH] is recognized for not to exceed 15 minutes.

S. 1404—RESPONSE TO JAPANESE TRADE PRACTICES

Mr. DANFORTH. Mr. President, several Senators have requested time in morning business dealing with the subject on which I had the colloquy with the majority leader, namely, S. 1404, and the more general problem of our trade difficulties with Japan.

S. 1404 is patterned after a sense-of-the-Congress resolution which was passed unanimously on the floor of the Senate last March. The vote was 92 to 0.

The bill, which has some more teeth in it than the sense-of-the-Congress resolution, was reported out of the Finance Committee by a vote of 12 to 4. It is not a bill which should evoke too much controversy.

I think it is a very timely bill. What it does is direct the President to eliminate unfair trade practices of Japan or offset those trade practices on a specific time schedule.

The bill in its present form, and there may be some changes in it when it reaches the floor, says that at the very least we should offset unfair trade practices to the extent that the U.S. market has been further opened to Japan by the lifting of voluntary restraints of Japanese automobiles coming into this market.

Mr. President, when S. 1404 comes to the floor of the Senate I would call Senators' attention to the very excellent report of the Finance Committee which has been filed on the bill. It is an excellent report because it not only spells out that the legislation is based on existing trade law, based on Section 301 of the Trade Act of 1974, but also because the committee report spells out in some detail specific unfair trade practices which are being utilized by Japan. Oftentimes people from Japan when they are discussing trade problems with the United States say to us "Be more specific, give us some concrete examples." The committee report does give concrete examples and I commend it to the Members of the Senate.

Mr. President, it seems to me that the enactment of this legislation is timely because I think that Congress now has to assert more initiative in the area of trade, and I say that with some reluctance. I do not think that Congress is very good at implementing day-in/day-out tactics on international trade. We are good at setting general policy. We are good at passing general legislation but not in actually implementing what we pass.

But I think that there are two situations that clearly compel Congress to take a more active role.

The first is that I reluctantly report that the position of Japan is basically more of the same, in spite of a lot of newspaper publicity and a lot of comment about new market opening efforts on the part of the Government of Japan.

I think that Prime Minister Nakasone means well in this regard, but I really believe that what we are going to see is a rerun of what we have seen for the last 5 or 6 years. With great fanfare the Japanese have announced that they are going to undertake what they call an "action program" to remove various barriers to imports from other countries. They call it an action program. It differs I think only in name from previous efforts which were called not action programs but "packages."

Since 1981 or 1982 some seven packages have been unveiled by Japan which purport to open access to the Japanese market. These packages have reduced some specific trade barriers. But when a country wants to keep out the products of another country then any number of specific barriers that are removed just lead to replacement by an infinite number of additional barriers. The real question is the will of Japan. It is not the removal of particular problems for a time but the overall program of Japan that has to be changed. The overall policy of Japan has to be changed.

If a trade package, for example, were to remove 100 particular barriers to trade infinity minus 100 is still infinity and that has been the problem. If the country has the will to keep out the products of another country, it can find a way to exercise that will. That is what Japan has been doing.

I was on a taping of a television program last night with Mr. Saburo Okita who is the former Foreign Minister of Japan, a very distinguished citizen of the country, and he has been designated by Prime Minister Nakasone to be the principal adviser to the Nakasone government on trade policy. It was said that Mr. Okita is a man who understand the problem and generally wants to open up the Japanese market, and yet on that program the position he took was just more of the same. The position he took on that program was that basically while there are some trade barriers which should be removed, the problem is America's problem, that the value of the dollar is too high or that our products are not of an appropriate quality to enter the Japanese market.

Mr. President, if the problem is America's problem it is also a problem of every other country in the world because no country can export freely to Japan. I am concerned that if they are taking the position that they are doing things that are basically right and that we are wrong, then we are never going to get these barriers removed.

I think the second reason, Mr. President, why it is appropriate for Congress to act is the extreme passivity of

51-059 O-86-16 (Pt. 15)

the administration in dealing with our trade problems.

For example, Clayton Yeutter, who is our new U.S. Trade Representative, has written a letter strongly opposing S. 1404.

In that letter, he says the following:

> Our disastrous experience during the 1930's, after passage of the Smoot-Hawley Tariff Act of 1930, shows that protectionist legislation is not the answer to trade problems.

Now, Mr. President, I submit that that sentence has been put on a word processor in the administration and the key is stuck, because every piece of legislation that I can think of is described by the administration as being "a return to Smoot-Hawley and protectionist."

For example, the telecommunications trade bill is described by the administration as a return to Smoot-Hawley and protectionist legislation. The desire for shoe relief is described by some people in the administration as a protectionist proposal and a return to Smoot-Hawley. Everything is described as protectionist and a return to Smoot-Hawley by the administration.

But Mr. President, S. 1404 is not a protectionist bill. S. 1404 says simply enforce the law, enforce the law against unfair trade practices.

Section 301 of the 1974 Trade Act was put in the law for the purpose of providing the possibility of retaliation against unfair trade practices. The law should be enforced and that is what S. 1404 says.

Mr. President, if the law is never enforced negotiations are going to lead to nothing other than more negotiations. Negotiations are never going to lead to action if there is not a credible threat of retaliation. This administration and previous administrations have never utilized section 301 of the Trade Act to retaliate against Japan. We have never retaliated, never retaliated, against Japan for unfair trade practices.

So I believe that the next package or action program to be unveiled by Japan is going to be more of the same. I think negotiations are going to lead to nothing more than more negotiations because I think that the administration has no credibility in dealing with Japan because no threat of retaliation is credible, no retaliation is ever used.

Mr. President, I am told that the majority leader has had some problems clearing S. 1404 in the Senate. I have urged him and he has indicated that he would renew his efforts to try to clear that bill to bring it to the floor, hopefully this week, if not this week, next week. I do think time is of the essence. It is a bipartisan effort. I urge all Senators to work with the majority leader so that this bill could be presented to the Senate for action.

RECOGNITION OF SENATOR HEINZ

The PRESIDING OFFICER. Under the previous order, the Senator from Pennsylvania, Mr. HEINZ, is now recognized for not to exceed 15 minutes.

Mr. HEINZ. Mr. President, I thank the Chair for his recognition and I commend my friend and colleague from Missouri, Senator DANFORTH, for laying out the case quite eloquently for bringing S. 1404 before the Senate at the earliest possible moment.

It would be well worth the time of everybody in this country to take 5 minutes to look at and digest one chart that appears on page 3 of the committee report. That chart analyzes trade flows between Japan and its trading partners between the period 1979 and 1983. If you look at the boxes that describe U.S. trade with Japan, you find, not surprisingly, that U.S. exports to Japan have over that 4-year period not increased very much. They have gone from about $8.2 billion to $11.6 billion, a rather modest increase over a 4-year period.

Japanese exports to the United States, however, have gone up by nearly $17 billion from $25.7 billion to $42 billion, a huge increase over that same period.

You might say, as some people have said, "Well, Americans simply don't know how to do business in Japan. The Japanese do know how to do business here."

You might say, "The U.S. dollar has been much too strong. The yen is too weak. We ought to do something about the dollar, and if we did many of those problems, if not most of those problems, would disappear." And people do say that.

Others say, "Well, maybe the United States just doesn't have the technology, doesn't have the products, doesn't have anything that anybody in Japan wants." That argument has been made more than once, let me assure you. And so you can continue to rationalize the absolutely staggering pattern where we cannot export much to Japan and Japan can export to the United States just about anything it wants to export.

Where the chart gets interesting is when you look at all the other trading blocs in the world, which are conveniently divided into three groups: First, the European Community; second, the less developed countries; and third, a category, a catchall, known as "others." You find, if you look carefully at the chart, that the country that has had, notwithstanding the fact that our currency is strong and the currency of most of these other countries is weak, the greatest success, so to speak, in exporting to Japan is, lo and behold, the United States, which allegedly does not know how to sell anything, does not have any products, and has a strong dollar. And you find, not surprisingly, that Japanese exports to these other trading blocs are booming, but that the European Community, the Koreas, the Taiwans, all the other countries who also are quite successful in exporting here, cannot export into Japan.

Now, we do better, perhaps, because we do try harder, because we do talk a lot about Japan. We may not be much, but we talk a lot. We are a close friend and ally of Japan. We spend a lot of money each year to protect them. We deploy our fleet in significant force in the Far East because we are friends with Japan and because they spend so little on defense. And what we see here, I suspect, in the ability of the U.S. exporters to get fractionally more into Japan than all the others, is the result of that kind of relationship.

But the bottom line is that Japan does not let anybody in very much, even us. Indeed they hardly let anybody in at all. Japan's second largest trading partner is Korea. It is right next to Japan. The Korean currency is weak vis-a-vis the yen. The yen is strong vis-a-vis the Korean currency; yet Korea has exactly the same trading pattern with Japan as most countries, including us. They cannot export much to Japan but Japan can export a lot and does export a lot to Korea.

So, S. 1404 is Japan-specific because we believe that the record clearly shows both on our own behalf and on behalf of all the other countries that are trying to penetrate the Japanese market that Japan is the most protectionist nation in the world.

Why should we be here on the Senate floor trying to get more attention to this issue? Do we not have an executive branch that is supposed to pay attention? Certainly we do. But over the last 4 years we have had six agreements negotiated with Japan. They have been hailed as either good or breakthrough agreements, and the result of them, at least as far as we can see, is marginal improvements in individual sectors, and the bottom line is a huge, growing trade deficit with Japan.

S. 1404 really says it is time to recognize that words simply are not enough. We tried negotiations four times—a seventh or eight is now underway. And at the rate we are going, we will be negotiating sectorally until the cows come home, but by that time I think our trade deficit will be even larger and, if you will excuse the mixed metaphor, the horse will be well out of the barn when those cows come home.

It seems to me, Mr. President, that the longer we postpone telling the administration to take appropriate retaliatory action with the goal of achieving genuine market opening initiatives by Japan, the longer we delay, postpone, or fool around, the more the Japanese conclude that their policy is a successful policy, that there is no

need for them to change it, and that their politicians who, after all, are like politicians everywhere, will see absolutely no reason to bring about change.

Some of us in this body as politicians occasionally are criticized because we take a "get tough" attitude toward opening other markets—in this case, Japan. Maybe the reason our politicians have to do something is that the barriers erected to trade are erected by other politicians in other countries. That is not a remarkable statement but apparently a fact usually overlooked by a lot of observers.

So I think action is a prerequisite for making any progress with the Japanese.

As to the merits of S. 1404, I think it is a good bill. It was reported by a bipartisan majority of the Finance Committee, 12 to 4, as I recollect. It was not a partisan issue of debate. Republicans and Democrats supported it. It responded to carefully constructed hearings. The facts presented in those hearings are well reflected in the report. In short, we have a bill. Of course, some of us might like to change it in some way. There are some people who would seek to weaken it, and some who would seek to strengthen it. But it is a bill which, on its merits, should be considered and, in my judgment, passed just as quickly as possible by the U.S. Senate.

I mention this because there has been, as the Senator from Missouri referred to in his remarks, some delay in obtaining clearance to bring this bill to the floor under a unanimous-consent agreement which would allow all Japanese-related amendments to the bill to be in order but would foreclose the bill becoming a Christmas tree for everything else under the Sun. I think it would be a grave setback in our trade policy with Japan, such as it is, for the Senate to send the message to Japan that we were so little concerned about the huge trade deficit we have with Japan, we were so little concerned about the barriers to exports against us and others erected by Japan and maintained by Japan, that we were so laissez-faire in our attitude toward protectionism by others generally that the Senate was prepared, when it came to doing something meaningful about the issue, simply to do nothing.

If the Senate begins to send that message, if the legislation is precluded from prompt floor consideration, we will be cutting the ground out from under our negotiators; we will be preventing ourselves from taking up a legitimate, meaningful issue on the floor of the Senate; we will be undercutting bipartisan support for the beginnings of a trade policy, and we will be making a big mistake.

It is my hope, therefore, Mr. President, that our colleagues will assist us in bringing this bill to the floor just as quickly as possible. I do not know at this point enough about why it is difficult to obtain the unanimous-consent agreement that we need. I am certain that there are other opportunities for people who want a vehicle, whether it is for Senator DANFORTH's telecommunications legislation or somebody's textile legislation or other trade-related measures; I am certain there will be plenty of other opportunities for those elements of legislation to be considered.

In my best judgment, since we want to send the strongest possible message to Japan, it would be a grave mistake to clutter this legislation which is Japan specific with other measures that are not. That could only confuse the issue. That can only dilute attention. That can only confuse all the people who are looking and waiting to find out whether this country is indeed serious about pursuing and prosecuting a trade policy.

Let me take a moment to make one last comment about the need for a trade policy. Many of us have had plenty of practice over the years being critical of a variety of administrations—this one, the previous one of President Carter, and others—for their lack of any comprehensive, consistent trade policy. The reason that we get critical is that trade policy, when you really define it, means this: It means sticking up for the United States, American economic interests in a world where other people are sticking up for their national economic interests. And if we do not promote this country's economic interests in the interest of a free and fair market, other people will successfully promote their own selfish interests, and you will get pretty much what we have gotten; namely, on the part of virtually all our trading partners, protectionism and rising walls of nontariff barriers that keep everybody else out. Whether you look at the Common Market and the Common Agricultural Policy, whether you look at the piracy of intellectual property rights, whether you look at the performance requirements on services, whether you look at the sophisticated means of the Japanese and others who follow their model by employing a series of phony requirements and tests to keep not just us but other people out of their markets, the fact is that there has been a rising tide of protectionism abroad for far too long. The water is getting deeper. The United States is, at best, an island. If the water gets much higher, we are all going to drown in this sea of protectionism, which we do not want, which we did not start, but which we better do something about.

If we do not defend the free market system by fighting protectionism, whether it is in Japan or anyplace else, there are going to be two consequences, one or the other of which we will face.

The first consequence is that we will no longer be a trading power. We will be accepting everybody's imports but nobody will be accepting our exports.

That is probably, in the final analysis, not where the politicians of this country could let this country come out. The people of this country would not stand for that policy, a one-way street.

Yet, if we do not fight the protectionism of other countries, what is the alternative?

Well, the alternative is probably to do what all the other countries are doing to themselves, which is more and more government involvement in their industries.

I come from the State of Pennsylvania, which has suffered, long before the dollar became strong, from subsidized and dumped foreign steel coming into the United States. The industry has won over 100 cases before the International Trade Commission proving that point beyond any doubt. Why? Because the steel industries of virtually every other country of the world, including a significant part of non-Socialist Canada, all of Great Britain, and so forth, are owned by foreign governments which have deep pockets. The result is that we have seen a steady erosion of our ability to survive, let alone compete.

We have seen, in the so-called Chrysler legislation of some years ago, the political response to an industry that cannot compete on existing terms. What we saw was essentially the partial Government takeover of Chrysler Corp. That is what that legislation did. That is, in a sense, the beginning of nationalizing or Government financial support for troubled industries. The road that it leads us down is long, and it leads to a swamp. What that swamp is, is the end of free enterprise, the American enterprise system, initiative, all the things that we think are extremely important to retain as part of our value system as Americans.

So when we battle against protectionism abroad, what I really think we are battling for is not just the discipline of the market system but for the American enterprise system that has been so much to so many people in this country, which has produced the highest level of opportunities, the highest level of employment, the highest level of productivity of any nation on Earth, and which has allowed us to preserve not only our own freedom but the freedom and human rights of so many other democracies around the globe at times when we have been called upon to do so.

That is what I think we are really talking about here. I hope, therefore, Mr. President, that we could bring our

legislation to the floor, do it promptly, vote the legislation up or down, and get to the business of moving this country ahead.

Mr. President, I yield back the remainder of my time.

Mr. DANFORTH. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

RECOGNITION OF SENATOR MURKOWSKI

The PRESIDING OFFICER. Under the previous order, the Senator from Alaska [Mr. MURKOWSKI] is recognized for not to exceed 15 minutes.

Mr. MURKOWSKI. I thank the Chair.

UNITED STATES-JAPAN SERVICES TRADE

Mr. President, on July 18, 1985, the Foreign Relations Committee's Subcommittee on East Asian Affairs held hearings on the subject of United States-Japan services trade. The purpose of the hearing was to determine whether unfair trading practices identified by the Senate Committee on Finance in its report to accompany S. 1404 had spilled into the services area from the merchandise trade. The hearing was limited to one aspect of the United States-Japan services trade. That is in the area of transportation—not transportation of people, but transprotation of goods—between the United States and Japan.

It is interesting to note that we found clear evidence of a pattern of unfair trade practices identified by the Senate Finance Committee, certainly in the manufacturing area. I wish to present the Chair with some examples which appeared in the testimony of a rather respected academic group and private-sector witnesses, as well.

As an example, Northwest Airlines, which is the largest U.S. carrier, serving Japan in many access cities in the United States, including New York, Chicago, Seattle, Los Angeles, and others, was denied access to the Japan Air Lines reservation computer system in Japan, although Japan Air Lines, commonly known as JAL, has had complete and favorable access to all the U.S. airline reservation computer systems. So it is obvious, Mr. President, that Japan Air Lines has the benefit of utilizing our domestic internal airline reservation computer system. This is not available to U.S. carriers in Japan.

The second example was the Japanese Government's tobacco and salt monopoly, which is a Government agency that has denied the U.S. shipping companies the opportunity to ship U.S. leaf tobacco to Japan on grounds that our service was somewhat unreliable during most of the relevant period. One shipping company anxious to enter the trade, Sealand, was owned by the R.J. Reynolds Tobacco Co., one of the largest U.S. corporations. Sealand operates extensive around-the-world service, and to suggest that they are somehow unreliable or inexperienced, of course, is hypocricy.

Another reference was made to the entrance of Nippon Cargo Airlines into the U.S. market and the cooperation agreement signed with Japan airlines raising disturbing parallels to the target industrial structure problems noted in the Senate Finance Committee report.

It is interesting to note the organizational ownership of Nippon Cargo Airlines. It is owned by virtually every major trading company in Japan. Ownership rests with insurance companies, financial institutions that have taken equity in the ownership, and many of the major producers of products that are exported from Japan to the United States. It would be impossible to reproduce such organizational ownership in the United States simply because of prohibitions under our antitrust laws.

The Japanese Government has prevented U.S. shipping companies from offering traditional freight forwarding, trading and warehouse services in Japan, although Japanese shipping companies are not only permitted to do so in the United States but actually engage in such trade.

It is interesting to note that the automobile export business, where currently somewhere in the area of 2, 2 million automobiles being produced in Japan are exported to the United States, everyone was transported on a ship owned or controlled by Japanese interests. At the same time we learned again of the great importance of service trade in the U.S. economy. The Department of Commerce estimated that in 1984 services accounted for about 68 percent of the U.S. gross national product, 57 percent if Government is excluded, and 95 percent of all new jobs created since 1970 were in the service sector.

However, while the United States is the largest trader of services, our longtime surplus is declining. Between 1981 and 1984, U.S. exports of services increased about 5 percent, but imports increased 28 percent. Spokesmen for the maritime unions, AFL-CIO, spoke at our hearing as to the seriousness of the trade problem. It was indicated by one union leader:

> If Congress cannot do something and the administration cannot do something about our lost market share throughout the world, then I believe the workers of America are going to do something.

Mr. President, I would like to think that Congress can do something. We must consider the serious trade legislation before us. When we do, it is my intention to offer amendments to include service trade in the list of significant matters that must be corrected. I will ask my colleagues to join me in addressing the effort to redress the service trade imbalance.

Mr. President, the task before us is significant. I think it fair to say that a vast majority of my colleagues do not support the concept of protectionism. There has been a sense-of-the-Senate resolution offered by this body some months ago, and on a vote, if my recollection is correct, of 92 to nothing the Senate expressed its frustration with the lack of response from Japan toward the trade imbalance.

I should like to cite briefly the trade imbalance. Two years ago the trade imbalance between the United States and Japan was about $21 billion. Last year that trade imbalance had moved up to about $36 billion. And this year it is estimated that the trade imbalance with Japan alone will be about $50 billion. That means there is 50 billion dollars' worth of goods produced in Japan and sold in the United States than U.S. goods sold to Japan.

That is significant in itself, but we have always enjoyed a surplus in the service accounts, and the service accounts constitute a number of trade matters: insurance, billings between our countries as a consequence of services provided, banking, exchange notes, transportation services of all kinds. The United States has always enjoyed a surplus in the service accounts. Last year it was somewhere in the area of $2 billion.

For the first time we have seen the service accounts turn around from a surplus to the United States to a surplus imbalance. It went from about a $2 billion surplus last year to a deficit of about $1.3 billion this year. Japan is selling us more services than we are selling them.

We look upon ourselves as a nation in transition, transition from traditional smokestack industries, producer of raw materials, to a nation of technology where we sell services throughout the world. We have seen our employment base diversify as we move into the service industry, but make no mistake about it; Japan is moving away from their smokestack industries into the service industries and already they have surpassed us on the trade account basis.

Mr. President, it is not my intention to be critical of Japan in the sense of some of the comments that have appeared in the media that were bashing the Japanese. What is a consideration is the reality that Japan must open its markets to the United States. All we ask for, Mr. President, is equity. We ask that the Japanese markets are open to U.S. business in the same manner as our markets are open to them.

Automobiles is an interesting reflection. Japan currently has no restrictions on automobiles exported into that country from the United States,

but the realities are that after an extended period of protecting the Japanese automobile market, we would be foolish to encourage an American automobile manufacturer to go over and establish itself in Japan where there are seven or eight organizations that are well-financed, that serve the market, that make adequate cars. Where you go in as a loss leader, it would be a poor investment as a consequence. We are not doing that. However, it is rather interesting to reflect that Chevrolets exported into Japan cost roughly $27,000 to $32,000, so while the market is open, some of the customs restrictions and requirements simply make it prohibitive.

So my point, Mr. President, is a very simple one. We want equity in trade.

I do not support the protectionist legislation as a whole that is pending before this body, but what I do support is an examination of 8 or 10 specific markets that we feel are closed in Japan, which we would identify, and say, "Japan, you must open these markets. We will give you a reasonable period of time, 6 months or a year, and if you do not open these 10 markets, we are going to identify 6 or 10 markets in the United States that are open to you and indicate that we intend to close them over a period of time."

Again, Mr. President, it is a matter of equity. Look at the automobiles, as an example, and I will come back to that—2.2 million automobiles produced in Japan are coming into this country every year. They are carried on a Japanese vessel or a vessel controlled by a Japanese steamship company.

We have attempted to break into this market; we have not been encouraged. We have one shipping line that has automobile carriers. There has been no encouragement to do that.

Mr. President, our unions and our shipping companies are willing to go to Japan and contract for automobile carriers to be built in Japan, if they can negotiate the contract with a sufficient term to allow them to amortize their investment. So far, they have not met with any encouragement or any success.

I had an opportunity earlier this year, on one of my visits to Japan, to discuss this matter with Prime Minister Nakasone. I am convinced that the Prime Minister is very concerned about the trade imbalance, very concerned about what Congress may do with regard to protectionist legislation. But it is the Japanese business community and the Japanese lower-level government groups that have been working with the private sector since reconstruction which are not about to reduce their exports to the United States. They are not about to buy more from the United States. These ideas are foreign to them. Frankly, I am very disappointed in Japan's private sector in responding to the concerns of the United States.

To get back to the automobile matter: Under a United Nations' informal trade agreement, there is a practice whereby 40 percent of the production is carried in vessels of the country of consumption, 40 percent carried in vessels of the country originating the product, and 20 percent carried under flags of convenience.

Mr. President, I intend to conduct further hearings, and we will have a hearing next Wednesday.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. MURKOWSKI. Mr. President, I ask unanimous consent that I may conclude my statement with just a general termination and notice to my colleagues of a hearing next week.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MURKOWSKI. I thank the Chair. I appreciate the opportunity to speak on this subject.

It will be my intent, in the matter of morning business, to have a continuation of statements relative to the loss of market share, the strong dollar, the trade deficit, the service accounts, the fact that we have become a debtor nation, the significance of foreign investment in the United States, the financing of our U.S. debt, and a number of other things that I think are pertinent to the condition of our country and the growing concern I have over the continuing deficit as it affects our inability to recapture our market share overseas.

I thank my colleagues for allowing me additional time.

Mr. GRASSLEY. Mr. President, clearly, the time has come for us to take stock of where we stand on our international trade policies for this country and where we want to go. What is puzzling to me is why this body cannot agree to a time agreement on S. 1404 to address a serious problem on the existence of a complicated and deeprooted lack of access to the Japanese market.

In 1984, our trade deficit with Japan reached the unprecedented level of $37 billion. This year, it is expected to be closer to $50 billion and growing. Failure to deal with this problem can only exacerbate the unmistakable signs in the United States of a developing crisis of confidence in the system.

Mr. President, let no one believe that passage of this legislation will alone solve our trade imbalances. It does, however, go a long way in getting us back on track. We cannot afford to do less than this, unless we are willing to see hundreds of thousands of jobs lost, along with the undermining of the entire range of bilateral relations.

I regret that we have come to this point. I would have preferred to have had an enforceable trade policy in existence, or at least been able to negotiate our differences with the Japanese in a more amicable manner. Unfortunately, it appears we are beyond either of these two conditions, and for Members of this body to further hold up legislation which address a major trade problem head on would be incomprehensible to me.

Mr. President, we have had a great deal of rhetoric about our trade deficit on the floor of the Senate and in the committees. The time has come for us to do a little less talking and do a little more in the way of enacting responsible legislation to put teeth into our trade laws. We can either be a part of the problem or a part of the solution. There are two basic questions we must ask ourselves: The first is, "How do we respond to inequities in our system?" The second is, "If we don't protect our industries, whether commercial, industrial, or agricultural from unfair competition in world trade, who will look out for American interest?"

It should not be our intentions to erect barriers to trade in the United States, but rather to tear down barriers by our foreign trading partners to American commerce. I believe S. 1404 does exactly that! It is not protectionist legislation, and no one should construe it as such. Mr. President, I see no reason to further delay bringing this bill to the floor for consideration.

THE TRADE CRISIS

Mr. BENTSEN. Mr. President, I am frequently asked by my constituents to compare our economy at the same stage last year and today. In mid-1984, the economy was robust. Unemployment was falling steadily to 7.8 percent in April, to 7.5 percent in May, and 7.2 percent in June 1984. Industrial production was rising steadily. The industrial production index of the Federal Reserve System, for example, hit 162 in April, 163 in May, and 166 in July. Productivity was rising handsomely, as well. In the first quarter of 1984, it rose 2.9 percent, and rose another 5.5 percent in the second quarter.

In short, at this time last year, our economy was healthy. Unemployment was falling—production was rising.

Since then, the bottom has fallen out. Unemployment has moved sideways and sits today at the same 7.3 percent we saw 1 year ago. Industrial production is scarcely higher now than it was last summer. And productivity has fallen in two of the last three quarters, to sit at a lower level today than last summer, as well. Real GNP growth has slowed to a scant 1-percent rate since January—compared to a 5.9-percent rate in 1984.

The economy has hit a stone wall. We have been behaving over the last year as though an anchor was increas-

ingly slowing our progress. And we face increasingly stormy weather ahead.

When my constituents ask why the economy has ground to a near halt, I point to our foreign trade account. In the last three quarters, domestic demand has continued to rise at a handsome 5-percent rate or greater. Yet, each month, half or more of that domestic demand has been deflected abroad, spent on foreign goods, not U.S. goods. So, while domestic demand has remained robust, domestic production and GNP has been wallowing sideways. A critical portion of rising domestic demand has gone aboard, creating jobs and producing income for foreign workers, and not here at home.

This diversion of American income abroad has affected economic sectors differently. The service sector, for example, does not compete directly with foreign products and so continues to benefit from robust domestic demand. In fact, over 2 million service sector jobs have been created in the last year. The U.S. manufacturing sector, on the other hand, does compete directly with foreign products. That sector has borne the brunt of the diversion of domestic demand abroad. My constituents asked why American manufacturers are losing sales to foreign producers. There are two major reasons. First, the runaway budget deficits have lured billions of foreign dollars here seeking our high interest rates. These inflows pushed the dollar up far beyond its equilibrium value on foreign exchange markets, and artificially cheapened imported goods. The second reason is more straightforward. American firms have increasingly faced illegal trade barriers across the world, trade barriers which hobble U.S. exports even when they are the cheapest and best available.

These two factors have dramatically affected U.S. and world trade patterns since 1980. Trade, measured by import statistics, has declined in real terms. That grim situation primarily reflects the weak world economy and the growing use of illegal trade barriers. In fact, I believe the United States is just about the only major market still largely open to the free flow of imports and exports. That has made our economy target No. 1 for nations seeking to increase exports and keep the income and jobs thereby produced by not increasing imports at the same time. U.S. imports, for example, have increased $84 billion since 1980, even though the volume of world imports have declined. Because of our free and open markets and trade barriers abroad, imports have gushed ashore while U.S. exports have stagnated. That has meant lost jobs—as many as 3 million jobs transferred abroad—and a diminished ability to compete in world markets.

TRADE DETERIORATION

These trends are reflected most clearly in our sagging merchandise trade balance. Back in 1980, our trade gap was a negative $36 billion; we imported $36 billion more than we exported. By 1984, that gap had soared threefold to $123 billion. And administration officials have projected a deficit this year of as much as $160 billion. All of this increased trade deficit has been in manufactured goods. In fact, we imported $96 billion more manufactured products last year than in 1980—an amount roughly comparable to the deterioration in our trade balance.

So our manufacturing sector has borne the brunt of our deteriorating international trade position and our deteriorating international trade position is the cause of our economic slowdown. With economic growth of only 1 percent occurring since January, our economy is firmly mired in what economists call a growth recession. We are not in a recession yet. But, economic growth has slowed to the point where relatively few jobs on balance are being created.

As I noted earlier, the service sector continues to grow and to produce jobs, although most are relatively low-wage jobs. In contrast, employment in our hard-hit manufacturing sector has declined every month since last January. In fact, there are 1.7 million fewer manufacturing jobs today than in 1979. Without an improvement in our manufacturing sector, it is possible that job creation will slow to the point where unemployment begins rising later this year. I hope that doesn't occur. And the Federal Reserve Board of Governors is certainly doing everything it can to boost the money supply and prevent a further downturn.

REGAINING ECONOMIC GROWTH

There are two steps beyond an expansionary monetary policy which our Government must take to restore economic health. Both steps involve buttressing our manufacturing sector and improving our trade balance. First, the budget deficits must be reined in to permit interest rates to fall. At the same time, a much more aggressive effort must be taken to lower foreign trade barriers.

The world has become increasingly dominated by nations who export and not import. Economic historians call such behavior "mercantilism." I call it "begger-thy-neighbor." It essentially is designed to transfer jobs, income and wealth from their trading partners to the mercantilists. It isn't responsible behavior nor does it promote economic well-being or rising standards of living in all nations. Indeed, it directly contradicts the benefits to all nations of a free and open trading system. It violates the fundamental precepts of free trade. And it is a practice which this Nation has permitted to increase by leaps and bounds in recent years to our distinct and growing disadvantage. The administration, frankly, has stood idly by without a trade policy while mercantilism has spread like wildfire from Japan to its emulators—nations like Korea and Taiwan—hoping to grow at others' expense. Their efforts to make trade a one-way street stand in sharp contrast to nations like Hong Kong, which carries on a vigorous free trade. Other nations have been quick to call these one-way traders to account. Their exports to Europe, for example, increasingly encounter the sorts of hurdles they themselves have thrown up. Indeed, as I said earlier, the United States has been the major recipient of the world's growth in imports in recent years. Japan, for example, has increased its exports by $25 billion since 1980. Fully 80 percent or $20 billion of that export growth has gone to the United States.

A TRADE POLICY

I see two reasons why the United States must adopt an aggressive international trade policy.

First, there is a fundamental need for fairness in trade. Nations which don't play by free trade rules should be brought to account and encouraged to play by those rules. After World War II, we established the General Agreement on Tariff and Trade [GATT]. It was designed to establish a multinational framework and mechanism for the reduction of trade barriers and the promotion of free trade. GATT is a toothless tiger, no longer able to do the job. It needs reform badly. For one thing, its provisions only apply to a scant 5 percent of world trade, according to members of the President's Commission on Industrial Competitiveness. So, GATT must be reformed and expanded to move the world back again towards free trade. And steps by this country, including my recently introduced trade legislation designed to encourage free trade, promote that effort.

The second reason to move the world away from mercantilism is that it distorts growth patterns at the expense of free trading nations. In other words, nations which maintain free and open markets at great expense do not receive the benefits of growth which accrued to their competitor nations running large export surpluses. Let me explain. Serving both protected domestic markets and foreign markets, mercantilist exporters achieve economies of scale in production and marketing which typically result in rising profits and expanded corporate cash-flows. These markets, profits and cash-flows come at the expense of foreign competitors who don't have comparable protective markets in their own economies. Put simply, Japanese semiconductor firms, for example, disproportionately profit from Japanese nontariff barriers against U.S. semi-

conductors. That extra margin enables Japanese firms to undertake research and development and to purchase state-of-the-art production hardware which American firms may well be denied due to their limited export sales and profits. In future years those advantages multiply, enabling foreign firms to increase their productivity and reduce unit labor costs more efficiently than hamstrung American firms. And such advantages, once gained, will almost surely never be relinquished. So foreign trade barriers post a threat not only in terms of fairness but in terms of America's long-term competitiveness.

Table I indicates American industries which have lost their international trade advantage since 1980. The list is extensive, including semiconductors, telephone equipment and electric machinery. And I ask unanimous consent for this table to appear at this point in my remarks.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

TABLE I.—U.S. INDUSTRIES LOSING INTERNATIONAL TRADE ADVANTAGE

[In millions of dollars]

Product	Balance of trade		
	1980	1984	1985 [1]
Semiconductors	140	[2] (2,200)	(3,240)
Electronic components	470	(2,700)	(3,800)
Photography equipment including photocopying	700	(300)	(500)
General aviation aircraft	200	(420)	.....
Shipbuilding/repair	370	(185)	(50)
Confectionary products	60	(74)	(100)
Textiles	450	(2,200)	.....
Leather goods	55	(90)	.....
Household appliances	230	(1,100)	(1,365)
Telephone equipment	140	(450)	(1,700)
Musical instruments	50	(220)	.....
Tool and dies	50	(20)	(60)
Computer controlled machinery centers [3]	6	(150)	.....
Robots [4]	5	(0)	.....
Electrical machinery	2,200	(3,900)	.....

Source: "1985 U.S. Industrial Outlook, Department of Commerce."

Mr. BENTSEN. This table vividly indicates the competitive threat proposed by international trade barriers and the bloated dollar. The industries in this table include high technology, consumer durable and even food production. One thing share in common is tough foreign competition by firms which have become increasingly more efficient in recent years. These industries are on the cutting edge of the competitiveness challenge facing our Nation. It is a challenge most easily understood in terms of the need to maintain a well-run, comprehensive industrial base—a prerequisite for any great economic power. And it is a challenge which directly affected our ability in the future to increase per capita incomes and our standard of living through high levels of productivity growth. Many other factors affect competitiveness, but productivity is perhaps the most important single variable. And in the last 4 years, even including the recovery 1983 and 1984 years, U.S. productivity growth has lagged growth abroad. We are losing the competitive challenge, and we will continue to slip behind our international competitors until we deal with our trade gap.

The legislation I introduced last Wednesday, S. 1449, the Trade Emergency and Export Promotion Act, is designed to move the world back onto the path of free trade. It puts the most egregious mercantilists on alert that the United States will no longer be a trade patsy. We want them to play by the free trade rules just as we do. Nor are we willing any longer to have our long-run competitiveness challenged and eroded, with the risks they carry for the American standard of living in the future.

American competitiveness is the challenge. Regaining a balanced and growing trade system is key to meeting that challenge. It's time to talk softly and begin to reassert our Nation's interest and the world's interest in expanding world trade based on free trade, not managed trade.

UNITED STATES-JAPAN TRADE RELATIONS

Mr. BAUCUS. Mr. President, I was glad to hear the majority leader say he wanted to bring up the Finance Committee Japanese trade bill before the August recess.

As I, the Senator from Missouri, the Senator from Texas, and our colleagues have said frequently, Congress must act on trade policy because the administration has failed to act. This administration has no international trade policy. I say that not to denigrate Ambassador Yeutter—I respect him greatly and I fully expect he will fight aggressively for U.S. interests. Nevertheless, the vacuum exists, and Congress will step in to fill the void.

Congress must also act because it appears that in the face of executive branch passivity, congressional action is necessary to convince the Japanese Government and Japanese businessmen that failure to increase imports will result in retaliation.

We walk a fine line here. We all wish to avoid a trade war. Shrinking the world's markets will not benefit either the United States or Japan—or any other country. At the same time we are unwilling to exempt Japan from the obligations of its position in the world economy.

Japan must accept the responsibilities as well as the benefits of its position as the second largest economic power in the free world. It cannot engage in one-way trade.

I believe it is absolutely critical that Japan increase its imports. I have spoken on this before. Last year I spoke frequently about Japan's barriers to beef imports. Along with the STR I leaned hard on the Japanese about this and we were able to make some small progress.

This year I have spoken—both here and in Japan—about the barriers to forest products. Currently the United States and Japan are engaged in something called MOSS negotiations—negotiations on Japanese barriers to products in four sectors. The forest products negotiations are not going well. The Japanese must understand that three out of four won't do. We expect progress on forest products.

Further, we expect serious market opening. By that I do not mean just formal statements. I mean actual increased imports.

That is why, Mr. President, I along with my colleagues supported S. 1404. That is why I have been working with Senator CHILES and Senator BOREN on an amendment to S. 1404 that would make clear to the Japanese that the action we want is more sales to Japan not fewer exports from Japan. I was glad to hear the Senator from Missouri say he believed our amendment would improve S. 1404.

In conclusion, Mr. President, let me say that our trade problems will require many solutions. We must reduce our budget deficit. We must act to bring down the value of the dollar. But the fact that we bear some of the blame does not—and must not—absolve other countries of their responsibilities. We expect Japan to accept our products. We expect the administration to fight for our interests abroad.

RECOGNITION OF SENATOR GORTON

The PRESIDING OFFICER. Under the previous order, the Senator from Washington [Mr. GORTON] is recognized for not to exceed 15 minutes.

Mr. GORTON. Mr. President, first, I thank the Senator from Wisconsin for deferring to me at this time.

THE HIGHWAY BEAUTIFICATION ACT OF 1985

Mr. GORTON. Mr. President, in the words of William F. Buckley, Jr., "Billboards are an act of aggression against the American landscape." In 1965 the Congress enacted the Highway Beautification Act to rescue the landscape, at least along the Federal highways, from this aggression. Twenty years later, however, we are unable to celebrate the act's success. To the contrary, its results have been exactly the opposite of its original intention. It is riddled with loopholes that allow billboards all along the Federal highways, in rural as well as urban areas. And it prevents our States and local commu-

nities from enforcing their own standards of scenic beauty.

My colleagues and I today are introducing the Highway Beautification Act of 1985. Its purpose is to return to the goals of the 1965 law. We want to protect the enormous investment the taxpayers have made in the Federal highways, by protecting America's scenic beauty along those highways.

The 1965 act required that States enact laws controlling outdoor advertising along the Federal highways. In general, it banned billboards in rural areas and allowed them in urban—commercial or industrial—areas. The States had to pay compensation to billboard and landowners for signs removed under the act, but the law left State and local governments free to impose stricter standards, and free to use the traditional zoning mechanism of amortization rather than cash payments to compensate billboard owners in urban areas.

The act therefore created three classes of billboards: Legal signs, which are exempted from Federal control, and include landmark, real estate signs, and those in commercial or industrial areas—zoned or unzoned; nonconforming signs, which were legal before the act, but now must be removed; and illegal signs, which are erected in areas in which signs are banned. States must pay compensation to remove nonconforming signs, of which the Federal Government must pay 75 percent. No compensation is required for illegal signs.

In 1978 the billboard lobby promoted—successfully—an amendment requiring compensation whenever a nonconforming billboard is removed from the interstate and Federal primary highways under any State or local land use control, environmental, or zoning law. This unprecedented extension of Federal control over local zoning laws was extremely effective in providing a windfall to the billboard industry—it added 259 million dollars' worth of signs to the group requiring compensation—and in preventing communities like Bellevue, WA, and Montgomery County, MD, from removing billboards along the Federal highways crisscrossing their communities.

Two recent Government reports, one by the General Accounting Office and one by the Department of Transportation's Inspector General, document the failure of the Highway Beautification Act of 1965. We have spent over $200 million in taxpayers' money and removed 115,000 billboards. Yet 120,000 nonconforming billboards remain to be removed: More than half, after 20 years. Congress, wisely, is no longer authorizing or appropriating money for this program, and when the small reserve disappears, the Federal Scenic Beauty Program will grind to a halt, freezing standing billboards, despite 20 years' notice that they should be removed.

Is the answer to appropriate more money? The Federal Highway Administration estimates that the cost to the Federal Treasury of removing all currently nonconforming signs is approximately $750 million. Any program of this size would be irresponsible in light of the huge Federal deficit. This program, however, is worse than irresponsible. The inspector general's and GAO reports make it clear that, despite the sign removal that has occurred, in States without stricter laws, the Highway Beautification Act has resulted in little aesthetic improvement.

There are several reasons for this. First, and most importantly, there is an enormous loophole in the act which allows billboards in unzoned commercial or industrial areas. At best, this means a cluster of billboards can stand around a country store or gas station. At worst, billboards are erected around sham commercial buildings—shacks, or a single gas pump standing in a field. This provision results in billboards along stretches of Federal highways in the otherwise beautiful countryside, directly contrary to the spirit of the Beautification Act. According to the GAO, billboard owners put up 4,712 signs in these rural loophole areas in 1983. That is twice as many billboards as the Government paid to remove in the same year.

There are other reasons why the law is ineffective. Many States remove only those billboards volunteered by the industry, which naturally offers its least profitable signs, and uses the Federal dollars gained to build new billboards, sometimes just down the road. Often billboards, although paid for, are not removed, sometimes for years. Some States make no effort to remove even illegal signs, and the Federal Highway Administration's less-than-zealous enforcement of the law poses no threat to those States' highway funds. And, to add insult to injury, billboard owners cut down thousands of dollars' worth of trees and landscaping along the Federal rights-of-way to make their billboards more visible.

The bill we are introducing today is designed to plug the loopholes and fix the defects; to make the Highway Beautification Program work. The bill:

Bans new billboards along the Federal highways in urban areas. Combined with the existing ban in rural areas, this will at least stop the visual pollution from getting worse;

Prohibits tree cutting on the State right-of-way to make signs more visible, except for official signs;'

Closes the rural loophole, which allows signs in unzoned commercial and industrial areas, and provides a 5-year amortization period for these newly nonconforming signs; and

Eliminates all requirements of Federal compensation for billboard removal or relocation. This leaves the States free to use compensation or amortization for existing, nonconforming signs.

Our bill also strengthens the enforcement provision by removing the Secretary of Transportation's discretion to waive penalties, and it requires an annual report of compliance. This annual report will also document the development of standard directional signs for the benefit of roadside businesses. The 1965 act, as amended, encourages the development of standard signs with business logos. These attractive signs inform travelers of the location of roadside businesses, and are being used in Washington, Virginia, Vermont, and other States concerned about scenic beauty and concerned about serving the traveling public. We strongly endorse this system of standard signs with business logos, and intend the reporting requirement to spur the Secretary into action in promoting this system.

Our bill is a comprehensive approach to reforming the Highway Beautification Program. There may yet be problems we need to address, such as the prevalence of phony zoning, that is, commercial zoning in rural areas solely to allow billboards; and the use of legitimate exceptions to the law for directional signs or real estate signs to harbor advertising billboards. I look forward to early hearings on this bill which will clarify the problems in the law. The Highway Beautification Act is complex, and our approach in these amendments is necessarily a flexibile one.

There have been several excellent articles on the failure of the Highway Beautification Act, and I ask unanimous consent that two of them be printed in the RECORD following my statement, together with the bill, followed by a section-by-section analysis.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. GORTON. Mr. President, America spends hundreds of millions of dollars every year to set aside natural and scenic areas that protect our wildlife, our prairies, our forests, and other natural wonders. Our architects and builders create some of the world's most magnificent cities. We clean up water and air pollution and control noise. But we have largely ignored the visual pollution that constantly degrades our lives and jars our senses. The Highway Beautification Act of 1985 will curb the visual pollution of billboards along the Federal highways in our cities and towns, and will eradicate billboards along the Federal highways in the American countryside. It is an aggressive approach, but one that is needed, to counter this "act of

aggression against the American landscape."

EXHIBIT 1

[From the Washington Post, Jan. 9, 1985]

LADY BIRD'S LEGACY LANGUISHES—BILLBOARDS REPORTED BLOSSOMING DESPITE 1965 SIGN-CONTROL ACT

(By Douglas B. Feaver)

The story is that Lady Bird Johnson didn't like the view when she looked out her automobile window and saw a forest of billboards and junkyards. Her interest in improving the vista provided the top-level impetus for the Highway Beautification Act of 1965.

Twenty years later, the General Accounting Office said in a report, part of the program has fallen on hard times, a victim of money shortages, bureaucratic indifference and a 1978 amendment, backed by the billboard industry, that made it more difficult to get the signs down.

The GAO report, officially released today by Senate Environment and Public Works Committee Chairman Robert T. Stafford (R-Vt.), is buttressed by a recent report by the Transportation Department's inspector general, Joseph P. Welsch. He looked at sign-removal programs in the Southeast and said that the "Outdoor Advertising Control Program had not significantly improved the aesthetic quality or the recreational value of the region's primary and interstate highways."

In many states, according to the two reports, more signs are going up than are coming down, the states aren't enforcing the law and the Federal Highway Administration (FHWA) isn't encouraging them to do so, and federal funds to back the program have disappeared.

Furthermore, Welsch reported, an FHWA policy permits sign owners to clear trees and other vegetation in the rights of way along federally supported highways. "If vegetation control was not permitted," Welsch noted, "many nonconforming signs would become obscured from highway view and acquisition would not be necessary." He strongly recommended that the policy be rescinded.

"Nonconforming" and "acquisition" are key words to understanding the federal program. A nonconforming sign is one that was legal when the law was written, but is no more. An illegal sign was and is illegal.

To get a nonconforming sign off the roadside, the state government first must buy it, and technically, it can use federal money to pay 75 percent of the cost. An illegal sign can be removed at any time and does not qualify for reimbursement.

The 1978 amendment extended the requirement for compensation to signs in towns and cities along federally supported highways. Those signs previously had been subject to local zoning laws, which meant nonconforming signs could be removed after a period. In many jurisdiction—Montgomery County was one—tough sign-control laws were having some effect. After the amendment was passed, those laws were preempted.

Congressional enthusiasm for the program declined to the point in fiscal 1984 that no money was appropriated for sign removal. At present, the GAO said, the FHWA estimates there are about 120,000 nonconforming signs across the country that would cost $427 million in federal funds to remove.

Even if the program had money, it doesn't work that well. The GAO found three signs in one Louisiana highway district that were still standing more than two years after being purchased by the state.

Welsch reported that under the present program, sign owners have been able to volunteeer signs for sale and have "received income that could be used to erect new signs."

Under the 1965 law, the transportation secretary is authorized to withhold 10 percent of federal highway aid from any state that has not established an effective sign-control program. South Dakota lost some federal highway money in 1977—the only time such a sanction has been imposed for any reason.

In June 1983, the FHWA recommended new legislation to limit the federal program to rural interstate routes, which would thus restore local zoning laws. It also recommended the elimination of mandatory compensation to sign owners and other actions. Eighteen months later, that proposal resides somewhere in the transportation secretary's review process.

Federal Highway Administrator R.A. Barnhart said yesterday; "I think the program needs some drastic revision. I think that it's more imperative that we do what we can to improve safety on the highway and to save lives more than to worry about whether someone's aesthetic sense is offended by a billboard."

Someone whose aesthetic sense is offended is Georgian Charles Floyd, president of a small group called the Coalition for Scenic Beauty. Floyd, who for years has demanded that the law be enforced, said yesterday that the current law is "not meeting any of its original objectives, to prevent the spread of blight along our highways and to eliminate existing blight."

He is lobbying for legislation that would, among other things, prohibit new signs along highways and "the outrageous practice of cutting trees" to make signs easily visible.

[From Newsweek, Dec. 10, 1984]

HIGHWAYS ARE STILL BUY WAYS

Like it or not, the highway billboard has its place in American folklore and literature. Kids on cross-country trips once delighted in the onrushing lines of Burma Shave doggerel as their parents' hearts sank at the miles remaining to Harolds Club in Reno. In F. Scott Fitzgerald's "The Great Gatsby," crazed car dealer George Wilson identifies the painted eyes of Doctor T. J. Eckleburg, whose retinas are a yard high, with the eyes of God. But a present-day George Wilson might not even notice them among all the other clutter. For every 10 miles of highway there are 14 billboards competing with the scenery—and the other cars on the road—for motorists' attention.

Back in 1956, at the time of Lady Bird Johnson's well-publicized campaign to clean up the countryside, Congress passed the Highway Beautification Act, which required states to remove all billboards within 660 feet of federal highways in noncommercial areas and provided for compensation to billboard and land owners. As of last year, some 587,000 had been removed, and the construction of at least as many new ones had been prevented. But any celebrations marking the law's 20th anniversary next year are likely to be thrown by the billboard industry. There are still some 500,000 free-standing signs on federal highways alone, and the government appears to have lost interest in enforcing the law. The General Accounting Office will soon release a report denouncing the number of illegal billboards still standing, the cutting of trees on the public right of way to render billboards more visible and the Department of Transportation's lax enforcement.

"That law was of absolutely no use," says Marion Fuller Brown of York, Maine, a founding member of the Coalition for Scenic Beauty, a Washington-based conservation group. "It has so many loopholes it became an umbrella to put up more billboards." Indeed, it was supported by the industry's lobbying group, the Outdoor Advertising Association of America. The law implicitly allowed billboards more than 660 feet from federal highways, and advertisers consequently took to building "jumbos"—monster billboards whose average size is about 2,000 square feet—beyond the 660-foot limit. It also permitted billboards in commercial and industrial zones: some counties and states obligingly rezoned rural areas; Wyoming simply classified as commercial all strips adjoining highways in rural areas.

VALUE

The section of the law most favorable to advertisers is that requiring compensation to owners for billboards that are removed. "All we're seeking, really, is to be treated the same as any other legitimate business," says Rob Schmerler of the Houston office of Foster and Kleiser, owner of signs in 12 metropolitan areas. "If you're taking our business, give us the fair value of it." Opponents of billboards say firms are adequately compensated by "amortization": writing off the anticipated losses on taxes over several years before the signs are removed. But a 1978 amendment, pushed by the billboard lobby, requires cash compensation (25 percent paid by the state and 75 percent by the U.S. government) for signs removed under state and local ordinances as well. And Congress has been reluctant to appropriate money: at the 1983 rate of funding, the last billboard covered by the Highway Beautification Act wouldn't come down for another 2,000 years.

Some states haven't been willing to wait. Oregon, Washington, Alaska, Maine and Vermont have nearly eliminated billboards through state legislation; Hawaii outlawed them in 1926. Others, including Virginia and Iowa, have state-maintained systems of uniform signs for restaurants and gas stations. Conservationists are cautiously heartened by the example of Houston, which the Coalition for Scenic Beauty calls the billboard capital of the United States and which local architect and anti-billboard activist Ralph Anderson Jr. says is getting a reputation as "the armpit of Texas." A 1980 sign ordinance set limits on size and proximity, ordered billboards removed from scenic drives and forbade the construction of new ones within the city limits. Anything still goes in unincorporated suburban areas, but the number of billboards in the city has dropped from about 7,000 in 1983 to 5,400. In 1983 the state legislature passed an industry-sponsored bill requiring cash compensation from cities to billboard owners, but it was vetoed—at the urging of Houston Mayor Kathy Whitmire and Dallas Mayor Starke Taylor—by Gov. Mark White, who believed Houston's six-year amortization period was compensation aplenty.

FAILURE

But elsewhere billboards are in little danger: in Florida and Georgia there are actually more now than in 1965. In 1982 the Sierra Club filed a suit charging the Federal

Highway Administration and the Department of Transportation with failure to enforce the Highway Beautification Act in South Carolina, which a club attorney calls "one of the worst states" in terms of visual pollution. A U.S. district court decided in 1983 that a private group can't bring suit to make the government enforce a law; the decision was appealed, and a ruling is expected in the next couple of months.

"The business is stronger today than ever before," says Jean Smith, head of Baltimore's Eastern Outdoor Advertising Co. She has every reason to think so. The billboard lobby, say congressional staffers, is one of the five most effective on Capitol Hill. Environmentalism, especially with an antibusiness taint, is unfashionable in the Reagan era. And it may be hard to arouse a public not only inured to having a quarter of prime-time television usurped by commercials but willing to be used as walking signboards by the makers of T shirts and designer jeans. In 1984, it's not Big Brother but Doctor T.J. Eckleburg who's watching.

S. 1494

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Highway Beautification Act of 1985".

SEC. 2. (a) Section 131 of title 23, United States Code, is amended—

(1) by striking out the last sentence of subsection (b),

(2) by striking out "Subject to compliance with subsection (g) of this section for the payment of just compensation, nothing" in subsection (k) and inserting in lieu thereof "Nothing",

(3) by striking out "or as to unzoned commercial or industrial areas in which signs, displays, and devices may be erected and maintained under subsection (d) of this section," in subsection (1),

(4) by striking out subsections (g), (m), (n), (o), and (p) and redesignating subsections (h), (i), (j), (k), (l), and (q) as subsections (g), (h), (i), (j), (k), and (l), and

(5) by adding at the end thereof the following new subsection:

"(m) By no later than January 15 of each year, the Secretary shall submit to the Congress a detailed, annual report on the extent to which each of the States is complying with the requirements of this section. Such report shall include an analysis of the efforts of the Secretary to promote the use of the signs, displays, and devices providing specific information in the interest of the traveling public in each State which are allowed under subsections (f) and (l).".

(b) Subsections (d) and (e) of section 131 of title 23, United States Code, are amended to read as follows:

"(d) For purposes of this section, a State shall be treated as failing to provide effective control of the erection and maintenance of outdoor advertising signs, displays, and devices if the State allows vegetation located on any land on which the State (or any political subdivision of the State) owns a right-of-way for any highway on the Interstate system or the primary system to be cut, altered, or removed for the purpose of improving the visibility of any outdoor advertising sign, display, or device which—

"(1) does not conform to the requirements of this section, but which is not required to be removed by reason of subsection (e), or

"(2) is described in clause (2), (3), (4), or (5) of subsection (c).

"(e) Notwithstanding subsection (c), for purposes of this section, effective control of the erection and maintenance of outdoor advertising signs, displays, and devices does not require—

"(1) the removal before July 25, 1990, of any sign, display, or device which—

"(A) is lawfully in existence on July 25, 1985, and

"(B) is located in an unzoned commercial or industrial area, or

"(2) the removal of any sign, display, or device which—

"(A) is lawfully in existence on July 25, 1985, and

"(3) is located in an area zoned industrial or commercial.".

SEC. 3. The amendments made by this Act shall apply with respect to each State after the close of the first regular session of the legislature of such State that occurs after the date of enactment of this Act.

SECTION-BY-SECTION ANALYSIS OF THE HIGHWAY BEAUTIFICATION ACT OF 1985

Sec. 2(a)(1) removes the Secretary of Transportation's discretion to suspend the penalty for nonconformance with the Act.

Sec. 2(a)(2) permits the states to have stricter sign laws without a federal requirement of cash compensation for removal of nonconforming signs. State or local laws for compensation or amortization would apply.

Sec. 2(a)(3) is a conforming amendment which removes the loophole in the current law permitting signs in rural areas (unzoned commercial or industrial areas).

Sec. 2(a)(4) strikes all sections of the Act requiring federal compensation for the removal of nonconforming billboards. Retains bonus payment provision.

Sec. 2(a)(5) adds a new subsection requiring an annual report on state compliance with the Act, including information on the extent to which states are developing standard signs for roadside businesses.

Sec. 2(b) eliminates subsection (d) in the current law, which permits signs in both zoned and unzoned commercial or industrial areas. In effect, bans new signs in these areas.

Adds a new subsection (d) which prohibits destruction of vegetation on highway rights-of-way except in front of official signs.

Substitutes a new subsection (e)(1) which provides a five-year amortization period for signs in unzoned commercial or industrial areas made nonconforming by this bill. After five years, signs must come down.

Substitutes a new subsection (e)(2) which allows signs standing in areas zoned commercial or industrial on the date of introduction to remain standing.

Section 3 provides that the law goes into effect in each state after the end of the first regular session of the state legislature after the date of enactment.

● Mr. CHAFEE. Mr. President, I am pleased to join Senator GORTON in sponsoring this legislation to revive the motivating spirit behind the Highway Beautification Act of 1965.

As anyone who uses Federal interstate and primary roadways knows, that act has failed to accomplish the goal set forth in its title. Miles and miles of our highways continue to be cluttered with billboards that assault the vision and block the landscape. Beautification may have been the intent of the 1965 act, but over the years its many loopholes have allowed the construction of thousands of huge, unsightly billboards.

Ironically, the first Highway Beautification Act has almost halted the fight to end the pollution of our highways by new billboards. Despite the $203 million the Federal Government has spent on outdoor advertising control since 1965, the billboard industry continues to add new signs—18,000 in 1983 alone. Currently the law requires that these companies receive compensation for signs removed, according to a formula by which the Federal Government must pay three quarters of the total amount. Since appropriations for this purpose have dwindled in the last few years, State governments attempting to clean up the scenery along their roadways have been stymied.

The legislation we are introducing today addresses this and other problems of the 1965 act by giving new strength to highway beautification laws. It bans construction of new billboards on Federal-aid highways and returns control of existing billboards to the States. The Federal cash-compensation requirement is eliminated under this act, allowing the beautification efforts of State governments to move forward.

To further protect the scenic beauty of our roadways, this bill prohibits the cutting of trees to increase the visibility of billboards. Currently legal under Federal law, this practice has destroyed thousands of trees in a number of States, and clearly demonstrates that the priorities of outdoor advertising control have been subverted in favor of the visual degradation of our highways.

In response to the General Accounting Office recommendations that the Department of Transportation establish stronger policy enforcement, this act also requires the Secretary to report to Congress on an annual basis as to how the States are complying with the act. It also calls for the Secretary to encourage the use of alternatives to billboards, such as official information signs bearings the logos or the names of businesses located on or near highways.

The latter type of signs have proven very successful in States that have taken the lead in highway beautification, and I believe strongly that it is time for the rest of the Nation to follow their example. Advertising has intruded upon the scenic beauty of America's highways for too long. It is time to put teeth into the ideal of highway beautification. This act will do just that and I urge my colleagues to join me in supporting it.●

RECOGNITION OF SENATOR PROXMIRE

The PRESIDING OFFICER. Under the previous order, the Senator from Wisconsin [Mr. PROXMIRE] is recognized for not to exceed 15 minutes.

WHY SCIENTIST QUIT $1,000 PER DAY JOB IN STAR WARS AND CALLS IT IMPOSSIBLE

Mr. PROXMIRE. Mr. President, on July 11 a computer scientist resigned from a $1,000-a-day job—that is $1,000, not $500, but a $1,000-a-day job—on a "panel on computing in support of battle management" for the administration's strategic defense initiative, or star wars. The scientist is Prof. David Parnas, a U.S. citizen who teaches at the University of Victoria in British Columbia. Professor Parnas provided reasons for his resignation that should give very considerable pause to Congress in response to requests to provide additional multibillion-dollar funding for star wars.

Why did this expert walk away from this $1,000-a-day job? The reason goes right to the heart of the problem with the star wars antimissile defense. Professor Parnas argues that it will never be possible to provide a realistic test of the vast array of computers that would connect and direct the many sensors, the aiming, the guiding devices, and the battle management stations. These would have to work, and work perfectly, the first time in order to provide protection.

In Parnas' letter of resignation, he wrote, "Because of the extreme demands on the system and our inability to test it, we will never be able to believe, with any confidence, that we have succeeded."

First, Mr. President, let us dwell for a long minute on that contention. Obviously Parnas is dead right. We never can test star wars in anything approaching the task of finding and knocking out thousands of incoming nuclear missiles. So as Parnas says we cannot ever believe with any confidence that we have succeeded. He's right. Then he concluded with a short sentence that should shock Members of the Congress prepared to appropriate billions on this project—and I quote: "Most of the money spent will be wasted." Let me repeat that, Mr. President: This computer expert has quit, walked away from this thousand dollar a day job because in his expert view, "Most of the money spent will be wasted."

What Professor Parnas was especially concerned about was one relatively limited phase of the star wars technology but a phase quintessential to the success of the star wars program, that is, the computer technology. Ironically, it is in the computer technology where the frontiers of knowledge have been already most vigorously advanced and especially by the United States.

For more than 10 years virtually 100 percent of American industrial plants that employ 500 or more employees have been using mainframe computers. The computer technology has advanced spectacularly. And Professor Parnas is obviously one of its outstanding experts. This is precisely why the Defense Department hired him for $1,000 a day as a consultant. In a story on July 12, New York Times reporter Charles Mohr quotes Com. James Offutt, an official with the strategic defense office, as conceding that it is "probably true" that current techniques of writing computer programs would not be reliable. Offutt said this is why they hired people like Professor Parnas at skyhigh pay.

Mr. President, this is like a college deciding they want a mile runner who can run the mile not in the present world record time of about 3 minutes and 47 seconds. They want milers who can run a 2-minute mile. So they pay the best track coaches in the world to tell them how to train an athlete who can run the 100-yard dash in 5 seconds, the mile in 2 minutes and pole vault 35 feet. One of the top coaches is honest enough to say: "You can take your huge consulting fees and stuff it. We can't train people to run twice as fast and jump twice as high." The college official might respond like Commander Offutt and say, "Sure it's tough but this is just why we hired you experts and paid you such huge amounts. So forget about this impossible stuff and tell us how to do it."

In his letter to Commander Offutt, Professor Parnas responded to President Reagan's request to work toward making nuclear weapons obsolete and impotent. He wrote, "I believe it is our duty, as scientists and engineers to reply that we have no technological magic that will accomplish that."

Is Professor Parnas perhaps an ideologue? Could his objection be based on some kind of opposition to a nuclear arms race in space? No way. Charles Mohr reports in the New York Times that Professor Parnas worked full time at the Office of Naval Research from 1980–82. He helped develop the battle computer program for the A–7 fighter-bomber and other Navy systems. And he specifically said that his objections were not ideological. He said he had "no objections to weapons development in general."

Mr. President, I ask unanimous consent that the article to which I referred by Charles Mohr in the July 12 New York Times headlined: "Scientist Quits Antimissile Panel, Saying Task Is Impossible" be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

SCIENTIST QUITS ANTIMISSILE PANEL, SAYING TASK IS IMPOSSIBLE

(By Charles Mohr)

WASHINGTON, July 11—A computer scientists has resigned from an advisory panel on antimissile defense, asserting that it will never be possible to program a vast complex of battle management computers reliably or to assume they will work when confronted with a salvo of nuclear missiles.

The scientist, David L. Parnas, a professor at the University of Victoria in Victoria, British Columbia, who is a consultant to the Office of Naval Research in Washington, was one of nine scientists asked by the Strategic Defense Initiative Office to serve at $1,000 a day on the "panel on computing in support of battle management."

Professor Parnas, an American citizen with secret military clearances, said in a letter of resignation June 28 and in 17 pages of accompanying memorandums that it would never be possible to test realistically the large array of computers that would link and control a system of sensors, antimissile weapons, guidance and aiming devices, and battle management stations.

Nor, he protested, would it be possible to follow orthodox computer program-writing practices in which errors and "bugs" are detected and eliminated in prolonged everyday use.

MONEY SPENT WILL BE WASTED

"Because of the extreme demands on the system and our inability to test it, we will never be able to believe, with any confidence, that we have succeeded," he wrote. "Most of the money spent will be wasted."

Comdr. James H. Offutt of the Navy, an official with the strategic defense office, said in an interview Wednesday that it was "probably true" that what he called current techniques of writing computer programs would not be reliable, but he added that Professor Parnas and others had been asked to explore new methods to "unlock" workable procedures.

"That is what S.D.I. is all about—it is a research program," said Commander Offutt, who is deputy director for battle management, command, control and communications. He said the goal was a "realistic testing program" and said he was convinced that this could be done through computer simulation of possible events.

In his letter to Commander Offutt, Professor Parnas took note of President Reagan's 1983 request to the scientists to work toward making nuclear weapons obsolete and impotent.

NO TECHNOLOGICAL MAGIC

"I believe," Professor Parnas said, "that it is our duty, as scientists and engineers, to reply that we have no technological magic that will accomplish that. The President and the public should know that."

Professor Parnas, who worked full time at the Office of Naval Research from 1980 to 1982 and helped develop the battle computer program for the A-7 fighter-bomber and other Navy systems, said that his objections were not ideological and that he had no "objections to weapons development in general."

The professor, who grew up in New York City and previously taught at the University of North Carolina, remains a consultant to the Navy. In a telephone interview Tuesday, he said he reached his conclusions about the program, widely known as a "Star Wars" plan, after attending the first meeting of the experts panel and after pondering the scientific dimensions of the antimissile problem.

The strategic defense office is hoping to spend $33 billion over six years for research and testing on components of an antimissile defense, although Congress cut $400 million from the request last year and is likely to cut at least $700 million this year. Work has only begun on a design of a defense.

Computers and the programs, or software, that control them are a vital element in any

defense. They would be used to help space-based sensors detect and count a hostile missile launching, sort decoys from warheads, calculate trajectories and track targets, aim directed energy or high-speed projectile weapons, assess hits and misses and re-aim weapons and for other tasks.

In his memorandums, the professor put forth detailed explanations of his doubts. He argued that large-scale programs like that envisioned for the program only become reliable through modifications based on realistic use.

He dismissed as unrealistic the idea that program-writing computers, artificial intelligence or mathematical simulation could solve the problem.

Some other scientists have recently expressed public doubts that large-scale programs free of fatal flaws can be written. Herbert Lin, a research fellow at the Massachusetts Institute of Technology, said this month that the basic lesson was that "no program works right the first time."

Professor Parnas wrote that he was sure other experts would disagree with him. But he said many regard the program as "a pot of gold" for research funds or an interesting challenge.

MYTH OF THE DAY: THAT DEFENSE SECRETARY WEINBERGER IS A HAWK

Mr. PROXMIRE. Mr. President, my myth-of-the-day today is that the Secretary of Defense, Caspar Weinberger, is a hawk. The fact: He is not. Caspar Weinberger is a dove.

This Senator has frequently disagreed with Secretary Weinberger over procurement policy. I think he is dead wrong in calling for the MX, the B-1-B, the new nerve gas, the additional aircraft carriers, and the fabulously expensive Star Wars Program. The endless and frequently controversial Weinberger shopping list for bigger and more devastating nuclear and conventional weapons has given the impression that the Secretary of Defense is itching for a fight. To the credit of the Secretary of Defense the opposite is true.

This Secretary has been a vigorous and consistent advocate of an ever bigger and more costly Defense Establishment. But he has been very reluctant—far more reluctant than the Secretary of State, for example, to try to send that military force into action to settle international disputes anywhere any time. Secretary Weinberger has his own convictions on how to build a strong American military powerhouse. I agree with this objective. I agree also with the principle animating that objective, that is, that we must negotiate arms control agreements with the Soviet Union from a position of strength. But I disagree with the Secretary in what constitutes a strong military force. Much of the vast array of procurement the Secretary fights for is redundant, wasteful or obsolete.

The Secretary seems to go along with whatever his generals and admirals in the three services feel might bolster their forces. He has been a pushover and a patsy for defense contractors.

But contradicting these serious weaknesses and far more important is the fact that he has favored caution, prudence and great reluctance in committing this country's massive power to combat. For this he deserves our gratitude. The one significant and regrettable exception was in Grenada.

In his constant insistence that this immensely powerful country with its awesome military power avoid combat, the Secretary's behavior reflects another myth: that our military commanders generally favor military action and intervention. Exactly the contrary is true. The fact is that the foremost advocates in this country of arms control and a peaceful world are our ablest and most distinguished military leaders. Many of them cannot speak out fully until they have retired. But again and again, this Senator has been impressed with how frequently the leaders of peace initiatives are former military commanders.

Why is this? Perhaps it is because these men know and know in grim detail the appalling and total destructive capacity of modern military weapons. Sure they have military training and military experience but they are also human beings and they understand better than most of us the terrible human consequence of modern war.

NATIONAL CPR AWARENESS WEEK

Mr. PROXMIRE. Mr. President, today I am introducing a joint resolution to designate the week of August 25 through 31, 1985 as "National CPR Awareness Week." This week would provide a significant boost to the CPR training program in the United States.

As the leading cause of death in the United States, heart attacks pose one of the greatest national health problems. As many as 1.5 million people will suffer a heart attack in 1985, and of these, almost half will die. Cardiopulmonary resuscitation, a simple first aid procedure, could prevent many of these deaths, but tragically, many people do not know how to perform it. With the success that CPR has had in saving lives that would otherwise have been lost due to heart attacks, it is of vital importance to maximize public participation in CPR training.

National CPR Awareness Week is an ideal way to increase public recognition of the importance of CPR training and to encourage people to sign up for CPR training. The media campaign highlighting the week will draw greatly needed attention to the importance of CPR.

Mr. President, I ask unanimous consent that the resolution be printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 175

Whereas heart attacks are the leading cause of death in the United States;

Whereas as many as 1,500,000 Americans may be stricken by a heart attack during 1985;

Whereas cardio-pulmonary resuscitation, commonly referred to as CPR, is a first aid procedure which significantly reduces the incidence of sudden death due to a heart attack; and

Whereas the death rate due to heart attacks would be reduced if more Americans received training in CPR: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week of August 25, 1985, through August 31, 1985, is designated as "National CPR Awareness Week", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe such week with appropriate programs and activities.

TERROR IN EAST TIMOR

Mr. PROXMIRE. Mr. President, Amnesty International has released an indepth report on human rights violations in East Timor.

For those who follow the sad situation in East Timor, the report brings up to date the 10-year history of violence and extermination on the island. According to the report, Indonesian forces have systematically tortured and killed residents of the former Portuguese colony since the Indonesian invasion in 1975.

The book details allegation of killing of hundreds of civilians, the disappearance of prisoners, the torture of prisoners taken into custody, and the imprisonment of people without charge from 1975 through 1984.

The report claims there is new evidence of beatings, electric shocks, burning with lighted cigarettes, and sexual abuse—including the rape of women prisoners.

This is the first time that Amnesty International has written such an indepth report on East Timor, but it is not the first time that Amnesty has reported on the situation. In the past, Indonesia claimed that the situation on the island was normal, but each time Amnesty investigated they found new evidence of abuse.

It's hard to know the actual extent of the terror because the Indonesian authorities do not permit outsiders on the island, raising the inference that Indonesia does not want outsiders to see the brutal treatment of the predominantly Roman Catholic population.

Mr. President, it has been 10 long years of terror for East Timorians, and it has been 36 long years since the Genocide Convention was brought before the Senate.

It is easy to ignore the continuing brutality on a small island on the other side of the world. Over the past 36 years, it has also proved easy to ignore our responsibility to end this and all other forms of genocide.

Amnesty International has asked Congress to hold hearings on the tragedy in East Timor and the State Department to review Amnesty's data on the violence there.

Mr. President, ratification of the Genocide Convention would permit us to do more than simply discuss the brutality in East Timor. It would enable us to act to stop this terror.

RECOGNITION OF SENATOR DIXON

The PRESIDING OFFICER. Under the previous order, the Senator from Illinois [Mr. DIXON], is recognized for not to exceed 15 minutes.

Mr. DIXON. I thank the Chair.

THE STATE MINIMUM RETURN ACT OF 1985

Mr. DIXON. Mr. President, I rise today to reintroduce the State Minimum Return Act of 1985, along with my colleagues Senators PROXMIRE, GRASSLEY, LEVIN, and RIEGLE. This act will correct imbalances in the amount of Federal spending that certain States receive in return for the tax dollar they send to Washington

Although this bill contains complex language and provisions, I want to assure my colleagues and the taxpayers of the United States, at the outset, that the bill does not require any increases in spending. Rather, the bill reallocates funds among States within existing spending limits, so as not to increase the deficit.

This bill addresses a very important issue which has caused real hardship in my State of Illinois, and in many other States, principally in the Midwest and Northeast. In 1983, Illinois rceived only 75 cents in Federal spending for each tax dollar it sent to the Federal Government. For the past 30 years, this ratio has been similarly low. Losing a quarter on every dollar is not a good deal to begin with. But when you think in terms of the Federal budget, Illinois and other States are sending billions of dollars to Washington every year that they never see again.

Many of these disadvantaged States were among those that suffered most during the recent recession. They can least afford to lose billions of dollars right now. Government policy should not make a bad situation worse. Rather, it should lend a hand to States whose economies have needed the most help in the recent past.

The bill I am introducing will adjust Federal spending in the categories of Government contracts and grant programs. Contracts and grants accounted for $275 billion of the Federal budget in fiscal 1984, and are the chief sources of imbalances among States. These spending categories help stimulate economic growth, creating jobs and spurring private investment. Grants and contracts cause a "ripple effect" in the economy of a community. The award of a government contract not only creates jobs in the company in which the work is performed. It also increases business and creates jobs in local companies supplying goods to the contractor.

Grant programs that will be eligible for this 10-percent adjustment include those administered by the Departments of Interior, Transportation, Agriculture—except farm income supports—the Environmental Protection Agency, and the U.S. Army Corps of Engineers. These are the grants that create jobs and economic growth in States and communities.

For grant programs that require an income test to determine eligibility for assistance, such as Aid to Families with Dependent Children, this bill will require an increase of 1 percent per year in the share of each eligible State. This increase will ease the fiscal burdens on the State governments of eligible States, which share the cost of these programs; let me add that the bill requires that benefit levels for needy individuals in all States may not be reduced as a result of a shift in the Federal share of these program funds among States.

Disadvantaged States will also receive additional moneys in the area of Federal contracts. With respect to competitive procurements and noncompetitive procurements, the head of each Federal agency will be required to award a contract to a firm that will do the work in a disadvantaged State if it submits a bid from a firm that would do the work elsewhere. This means that if a metal cabinet for a Government office or a rubber fuel line for an Air Force plane can be made in Illinois more cheaply, or at the same price, than it can be made in a State that gets more than its fair share of spending from the Federal Government, that cabinet or fuel line is going to be made in Illinois by workers and businesses in Illinois.

What is being suggested here is a reallocation of Federal moneys among the States, rather than the creation of a new Government spending program. In addition, in order not to penalize the needy and other citizens who currently receive direct Government benefits in all States, the bill will not affect payments to individuals by the Federal Government. Such programs as Social Security, food stamps, supplemental security income, Pell grants, low-income housing assistance, veterans assistance, black lung disability, guaranteed student loan interest subsidies, retirement payments for railroad workers, and Federal workers' compensation, retirement, and disability, and employee life and health insurance will not be affected by the bill.

The State Minimum Return Act is an attempt to develop the comprehensive approach we need to end what amounts to a multibillion dollar penalty being paid each year by Illinois and many other States. By any measure, there is every reason that these States should be getting back their fair share of the Federal budget.

I urge my colleagues to join me in this effort to help these disadvantaged States get back a fair share of their tax dollars.

I ask unanimous consent that a summary of the bill, and the bill itself be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE STATE MINIMUM RETURN ACT OF 1985—SUMMARY

The State Minimum Return Act reallocates spending to states that send more money in taxes to the Federal government than they receive in Federal spending.

States that receive an amount of total Federal spending that is less than 90 percent of the amount they pay out in Federal taxes will receive additional funds in the spending categories of grants-in-aid and procurement contracts.

States that receive an amount of Federal spending that is between 90 percent and 100 percent of the amount they pay out in Federal taxes will receive additional funds in the spending categories of procurement contracts.

A state's eligibility will be determined by the Office of Management and Budget, in consultation with the Census Bureau regarding Federal expenditures and the Treasury regarding tax revenues.

All spending categories are included for the purpose of determining eligibility, including subsidies given for water and power programs through Government corporations.

The bill requires that each state must receive an amount of Federal spending that is at least 90 percent of the amount of the state's tax payments by Fiscal 1990.

To meet this requirement, the bill stipulates that each eligible state must receive an annual increase of 10 percent in its share of the national total in the categories of procurement contracts and/or grants-in-aid. This 10 percent increase applies only to those grants that are not allocated based on income tests for individuals. Such grants that are eligible for the 10 percent reallocation include those administered by the Departments of Transportation, Interior, Agriculture (except farm income supports), the Environmental Protection Agency, and the U.S. Army Corps of Engineers.

For grant programs that require an income test, eligible states will receive an annual increase of 1 percent in their share of the national total.

No state shall incur an annual reduction of more than 10 percent in its share of contracts and eligible grants, or an annual reduction of more than 1 percent in its share of income-based grants.

Procurement contracts will be reallocated to firms in eligible states if two conditions are met: (1) if the firm submits a bid that is lower or equivalent to a bid of a firm in an ineligible state, and (2) if the firm will perform the bulk of the contract in an eligible state.

In the event that sufficient contracts are not reallocated each year, the head of the contracting agency that has not met the requirement will have to report to OMB before awarding any contract to a firm in an ineligible state in the following year the reasons why that contract was not awarded to a firm in an eligible state.

The bill requires that the Secretary of the Treasury conduct a study of the impact of Federal spending, tax, and fiscal policies on state economies and the economic growth rate of states and regions.

S. 1496

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "State Minimum Return Act of 1985".

STATEMENT OF POLICY

SEC. 2. It is the purpose of this Act to provide, within existing budgetary limits, authority to reallocate the distribution of certain Federal spending to various States in order to ensure by the end of fiscal year 1990 that each State receive in each fiscal year an amount of Federal expenditures equal to a minimum of 90 percent of the Federal tax burden attributable to such State for such fiscal year.

DEFINITIONS

SEC. 3. As used in this Act—

(1) The term "Director" means the Director of the Office of Management and Budget.

(2) The term "Federal agency" means any agency defined in section 551(1) of title 5, United States Code.

(3) The term "State" means each of the several States and the District of Columbia.

(4) The term "historic share" means the average percentage share of Federal expenditures received by any State during the most recent three fiscal years.

(5) The term "Federal expenditures" means all outlays by the Federal Government as defined in section 3 (1) of the Congressional Budget and Impoundment Control Act of 1974 (2 U.S.C. 622 (1)).

(6) The term "Federal tax revenues" means all revenues collected pursuant to the Internal Revenue Code of 1954.

(7) The term "need-based program" means any program which results in direct payment to individuals and which involves an income test to help determine the eligibility of an individual for assistance under such program.

DESIGNATION OF ELIGIBLE STATES

SEC. 4. (a) Any State shall be eligible for a positive reallocation of Federal expenditures described in section 5 and received by such State under section 7(a), if such State, for any fiscal year, has a Federal expenditure to Federal tax ratio which is less than 90 percent.

(b) Any State shall be eligible for a positive reallocation of Federal expenditures described in section 5 and received by such State under paragraph (1) of section 7(a), if such State, for any fiscal year, has a Federal expenditure to Federal tax ratio which is less than 100 percent but greater than or equal to 90 percent.

(c) During each fiscal year, the Director after consultation with the Secretary of the Treasury and the Director of the Census Bureau, shall determine the eligibility of any State under this section using the most recent fiscal year data and estimated data available concerning Federal tax revenues and Federal expenditures attributable to such State. The Secretary of the Treasury shall determine the attribution of Federal tax revenues to each State after consultation with the Comptroller General of the United States.

(d) For purposes of determining the eligibility of any State under subsection (c), any water or power program in which the Federal Government, through Government corporations, provides water or power to any State at less than market price shall be taken into account in computing such State's Federal expenditure to Federal tax ratio by characterizing as an imputed Federal expenditure the difference between the market price and the program's actual price of providing such water or power to such State.

DESIGNATION OF REALLOCABLE FEDERAL EXPENDITURES

SEC. 5. All Federal expenditures in any fiscal year shall be subject to reallocation to ensure the objective described in section 2 with respect to eligible States designated under section 4, except for such expenditures with respect to the following:

(1) Water and power programs which are described in section 4(d).

(2) Compensation and allowances of officers and employees of the Federal Government.

(3) Maintenance of Federal Government buildings and installations.

(4) Offsetting receipts.

(5) Programs for which the Federal Government assumes the total cost and in which a direct payment is made to a recipient other than a governmental unit. Such programs include:

(A) Social Security, including disability, retirement, survivors insurance, unemployment compensation, and Medicare, including hospital and supplementary medical insurance;

(B) Supplemental Security Income;

(C) Food Stamps;

(D) Black Lung Disability;

(E) National Guaranteed Student Loan Interest Subsidies;

(F) Pell grants;

(G) lower income housing assistance;

(H) social insurance payments for railroad workers;

(I) railroad retirement;

(J) excess earned income tax credits;

(K) veterans assistance, including pensions, service connected disability, nonservice connected disability, educational assistance, dependency payments, and pensions for spouses and surviving dependents;

(L) Federal workers' compensation;

(M) Federal retirement and disability;

(N) Federal employee life and health insurance; and

(O) farm income support programs.

REALLOCATION AUTHORITY

SEC. 6. (a) Notwithstanding any other provision of law, during any fiscal year the head of each Federal agency shall, after consultation with the Director, make such reallocations of expenditures described in section 5 to eligible States designated under section 4 as are necessary to ensure the objective described in section 2.

(b) Notwithstanding any other provision of law and to the extent necessary in the administration of this Act, the head of each Federal agency shall waive any administrative provision with respect to allocation, allotments, reservations, priorities, or planning and application requirements (other than audit requirements) for the expenditures reallocated under this Act.

(c) The head of each Federal agency having responsibilities under this Act is authorized and directed to cooperate with the Director in the administration of the provisions of this Act.

REALLOCATION MECHANISMS

SEC. 7. (a) Notwithstanding any other provision of law, for purposes of this Act, during any fiscal year reallocations of expenditures required by section 6 shall be accomplished in the following manner:

(1)(A) With respect to procurement contracts, and beginning in fiscal year 1988 subcontracts in excess of $25,000, the head of each Federal agency shall—

(i) identify qualified firms in eligible States designated under section 4 and disseminate any information to such firms necessary to increase participation by such firms in the bidding for such contracts and subcontracts,

(ii) in order to ensure the objective described in section 2, increase the national share of such contracts and subcontracts for each eligible State designated under section 4(a) by 10 percent each fiscal year, and

(iii) thirty days after the end of each fiscal year, report to the Director regarding progress made during such fiscal year to increase the share of such contracts and subcontracts for such eligible States, including the percentage increase achieved under clause (ii) and if the goal described in clause (ii) is not attained, the reasons therefor.

Within ninety days after the end of each fiscal year, the Director shall review, evaluate, and report to the Congress as to the progress made during such fiscal year to increase the share of procurement contracts and subcontracts the preponderance of the value of which has been performed in such eligible States.

(B) With respect to each fiscal year, if any Federal agency does not attain the goal described in subparagraph (A)(ii), then during the subsequent fiscal year such agency shall report to the Director prior to the awarding of any contract or subcontract described in subparagraph (A) to any firm in an ineligible State the reasons such contract or subcontract was not awarded to any firm in an eligible State.

(C) In the case of any competitive procurement contract or subcontract, the head of the contracting Federal agency shall award such contract or subcontract to the lowest bid from a qualified firm that will perform the preponderance of the value of the work in an eligible State designated under section 4 if the bid for such contract or subcontract is lower or equivalent to any bid from any qualified firm that will perform the preponderance of the value of the work in an ineligible State.

(D) In the case of any noncompetitive procurement contract or subcontract, the head of each Federal agency shall identify and award such contract or subcontract to a qualified firm that will perform the preponderance of the value of the work in an eligible State designated under section 4 and that complete such contract or subcontract at a lower or equivalent price as any qualified firm that will perform the preponderance of the value of the work in an ineligible State.

(E) For purposes of this paragraph, in the case of any procurement contract or subcontract, any firm shall be qualified if—

(i) such firm has met the elements of responsibility provided for in section 8(b)(7) of the Small Business Act as determined by the head of the contracting Federal agency to be necesary to complete the contract or subcontract in a timely and satisfactory manner, and

(ii) with respect to any prequalification requirement, such firm has been notified in writing of all standards which a prospective contractor must satisfy in order to become qualified, and upon request, is provided a prompt opportunity to demonstrate the ability of such firm to meet such specified standards.

(F) In order to reallocate expenditures with respect to subcontracts as required by subparagraph (A), each Federal agency shall collect necessary data to identify such subcontracts beginning in fiscal year 1987.

(2)(A) With respect to need-based programs, any eligible State designated under secton 4(a) shall receive 101 percent of such State's historic share with respect to such programs.

(B) With respect to all other expenditures described in section 5, including all grants administered by the Department of Transportation, the Department of the Interior, the Department of Agriculture, the Environmental Protection Agency, and the United States Army Corps of Engineers, and funds provided under general revenue sharing, any eligible State designated under section 4(a) shall receive 110 percent of such State's historic share with respect to such expenditures.

(b)(1) Except as provided in paragraph (2), no reallocation shall be made under this section with respect to expenditures for any program to any State in any fiscal year which results in a reduction of 10 percent or more of the amount of such expenditures to such State.

(2) No reallocation shall be made under subsection (a)(2)(A) with respect to expenditures for any need-based program to any State in any fiscal year which results in a reduction of 1 percent or more of the amount of expenditures to such State for any such program.

(c) No reallocation shall be made under the provisions of this Act which will result in any Federal expenditure to Federal tax ratio of any State being reduced below 90 percent.

(d) With respect to any need-based program eligible for reallocation under subsection (a)(2)(A), notwithstanding any reallocation of such program funds that may be mandated under this section, no State or eligible governmental unit may reduce program benefits to the ultimate beneficiaries of such program or change such program's eligibility requirements because of such reallocation of funds.

AMENDMENTS

SEC. 8. No provision of law shall explicitly or implicitly amend the provisions of this Act unless such provision specifically refers to this Act.

EXTENSION OF FEDERAL FUNDS REPORT ACT

SEC. 9. Subsection (a) of section 8 of the Consolidated Federal Funds Report Act of 1982 (31 U.S.C. 6102 note) is amended by striking out "and 1985" and inserting in lieu thereof "1985, 1986, 1987, 1988, 1989, and 1990".

STUDY

SEC. 10. (a) The Secretary of the Treasury or a delegate of the Secretary shall conduct a study on the impact of Federal spending, tax policy, and fiscal policy on State economies and the economic growth rate of States and regions of the United States.

(b) The report of the study required by subsection (a) shall be submitted to Congress not later than December 31, 1985.

EFFECTIVE DATE

SEC. 11. The provisions of this Act shall take effect for fiscal years beginning after the date of the enactment of this Act.

Mr. DIXON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. TRIBLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. PRESSLER). Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business.

ANOTHER POINT OF VIEW ON TRADE

Mr. DENTON. Mr. President, over the past several months the Senate has focused considerable attention on our rising trade deficit and the revelation that, for the first time since 1914, the United States has become a net debtor nation. Congressional analyses of the causes for the alarming trade trends have identified a number of problems and advocated certain solutions.

During the recent debate on the foreign aid authorization bill, S. 960, some Senators argued that the administration should intervene aggressively in the exchange markets to weaken the dollar relative to other major currencies. The problem for which that solution was proposed was the apparent overvaluation of the dollar.

Other legislative initiatives have sought to boost the lending authority of the Export-Import Bank in order to provide more competitive financing for U.S. exporters, to reform our trade laws to get at unfair foreign competition, and to criticize and retaliate against some of our trading partners for allegedly blocking American access to their home markets.

Discussion of the American trade deficit has tended, however, to argue—at any given time—only one cause of the problem to the exclusion of all others. Writing in a recent Los Angeles Times article, Senator SYMMS cautioned against such an approach to discussing or solving our trade deficit problem. My distinguished colleague from Idaho particularly points out the dangers of focusing solely on exchange rates and corresponding pressures to intervene in exchange markets.

Mr. President, I ask unanimous consent that the column by Senator SYMMS be printed in the RECORD. I urge my colleagues to consider the Senator's sound observations.

There being no objection, the column was ordered to be printed in the RECORD, as follows:

[From the Los Angeles Times]

HOW CAN U.S. REDUCE HUGE TRADE IMBALANCE: NEED FAIR RULES, NOT JUST WEAKER DOLLAR

(By Steve Symms)

America requires a competitive economy both at home and abroad if it is to remain strong. But the U.S. trade deficit is increasing at a rapid rate; last year it was more than $123 billion, and some analysts say it could reach $160 billion by year's end.

At the same time, the dollar is strengthening against other currencies, exacerbating the trade deficit by continuing to make foreign goods cheaper for Americans to buy and American goods more expensive for foreigners to buy.

Should we conclude that our trade imbalance is the direct result of an overvalued dollar that must, according to conventional logic, be devalued in order to enhance America's competitiveness? I do not believe so.

After all, the super-weak British pound has not helped to improve the competitiveness of England's economy. And, despite the present worries, previous U.S. administrations—both Democratic and Republican—have long recognized that Europe, Japan and a growing number of developing countries pose major competitive challenges to the United States, regardless of whether we have a strong or weak dollar.

Indeed, compared with the exchange rate 15 years ago (when America enjoyed a modest balance-of-payments surplus), today's dollar is actually "weaker" than it was then.

A weak currency is clearly not the answer to the trade deficit problem.

Yet, some analysts continue to think it is, insisting that U.S. trade deficits are $60 billion to $70 billion higher than they would otherwise be with a more realistically valued—or cheaper—dollar.

The inevitable policy conclusion of this reasoning is that the U.S. government, acting alone or in concert with its trade partners, should intervene on the foreign exchange markets on a massive scale to bring down the value of the dollar.

Despite sensational headlines that the dollar is overvalued by as much as 70%, recent testimony before the House and Senate Joint Economic Committee indicates a more modest level of about 30%. Using the 30% figure, perhaps $40 billion to $50 billion of our present deficit is directly tied to the strong dollar.

A more critical question to ask is whether the price of any goods is automatically the dominant consideration in determining international competitiveness. That is certainly the case for advocates of a "weaker" dollar. But price is only one—and in many instances not even the significant—determinant of why goods from one country are preferred over those of another.

It is short-sighted, therefore, to argue that by driving down the dollar, America will be able to significantly reduce its trade deficit.

SHIFTING PREFERENCES

A better approach is to recognize that America's long-term competitive problems stem from a multitude of factors changes in the exchange rate, shifting consumer preferences throughout the world, recessionary conditions in a number of countries and the emergence of unfair trade practices that distort the working of the international marketplace.

Consider the impact of those last two factors on U.S. trade competitiveness:

On the one hand, the U.S. market has been flooded with goods from recession-wracked Third World and European countries that have—thanks to a strong dollar—begun to export their way to economic recovery. And, as they recover, we can expect corresponding jumps in U.S. export sales.

On the other hand, there has been a disturbing growth in unfair trade practices, which has cut into U.S. export sales throughout the world. A good example is Japan's present system of "non-tariff" barriers that continues to discriminate against some of America's most competitive export industries, including new (telecommunications) and traditional (agriculture) sectors by setting up obstacles to U.S. exports to Japan. Another example involves European Economic Community agriculture export subsidies, which have also cut into traditional U.S.-dominated export markets.

In order to significantly improve our competitive position, I advocate prompt Administration and congressional action in four areas:

A new round of trade negotiations should be negotiated in order to combat the kinds of unfair practices that shackle private enterprise and hurt consumers both at home and abroad.

Support should be continued for free market, enterprise-oriented approaches that provide the best guarantee for increasing investment and productivity and expanded U.S. export markets abroad.

Private sector investment in competitive research and development activities should be encouraged so that U.S.-made products are not only state-of-the-art but also truly attractive to foreign markets, regardless of the dollar's value.

Major reductions—if not total elimination—of the federal deficit should be achieved over the next three years in order to foster gradual reductions in long-term U.S. interest rates, which, in part, have attracted the foreign investment capital that has contributed to the rising strength of the dollar.

If we are successful in obtaining meaningful action on these four points, I am confident that the so-called "dollar problem" behind the trade deficit will take care of itself, without requiring intervention on the foreign exchange markets.

Thus, in domino fashion, the rising trade deficit should automatically begin to fall, but in a reasonable manner that enables the United States to continue along the path of robust, non-inflationary growth.

GREAT FRIENDSHIP RUN

Mr. FORD. Mr. President, today marked the end of a long distance run and the beginning of a stronger bond between the United States and the People's Republic of China.

Mr. Stan Cottrell, formerly of Hart County in Kentucky, along with three runners from China, just arrived in Washington, DC, after running from San Francisco. Along the way, they ran through 14 States and hundreds of communities across America.

This run is a continuation of a 2,125 mile great friendship run through China in 1984 by Mr. Cottrell. Mr. Cottrell has stated that in the U.S. run his two objectives were to introduce the Chinese athletes to the "real America" and to "strengthen the bonds between the People's Republic of China and the United States" as they crossed our great country together.

Mr. Cottrell, age 42, is a graduate of Western Kentucky University, and the father of three children. He has received numerous honors for his athletic feats. I understand that today he is receiving an award from the President's Council on Health and Physical Fitness.

Mr. President, I should like to congratulate Mr. Cottrell in this endeavor to break down the barriers between our two countries and to achieve friendship with the people of the People's Republic of China.

We in Kentucky are proud of our former citizen, and would like to take this opportunity to thank him for his great act of humanitarianism in this great friendship run.

CONSOLIDATED FAMILY FARMS

Mr. PRESSLER. Mr. President, last year at this time I chaired a hearing in the Senate Small Business Family Farm Subcommittee on the implications of a plan proposed by a group of Chicago investors known as Consolidated Family Farms. The plan would have originally traded depository units between limited partners and farmers for title of the farmer's land. Farm groups and others were virtually unanimous in their opposition to this plan. The CFF group revised their prospectus and filed with the Securities and Exchange Commission on February 25, 1985. Several changes were made in the prospectus, but the basic problems with the plan were not addressed. CFF is now a corporation and would issue shares instead of depository units. But unfortunately, these changes are not enough to ensure that farmers' rights will be protected.

Theoretically, this plan would enable debt-stricken farmers to increase their cash-flow—allowing them to continue to farm. During the hearing and in further research, this statement became surrounded by numerous questions.

Because of misleading statements made by the group and the plan's failure to adequately protect farmers' rights, I have written the SEC, urging them to postpone approval of the CFF registration until these issues are resolved. I ask unanimous consent that the text of my letter to the SEC be included in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE, COMMITTEE ON COMMERCE, SCIENCE, AND TRANSPORTATION,

Washington, DC, July 22, 1985.

Mr. JOHN S.R. SHAD,
Chairman, Securities and Exchange Commission, Washington, DC.

DEAR MR. SHAD: As you may know, I have been concerned about the progress of the Consolidated Family Farms (CFF) issue. A year ago, I chaired a hearing of the Senate Small Business Family Farm Subcommittee on the plan sponsored by CFF of Chicago. This organization filed a registration with your office on June 28, 1984 and refiled on February 25, 1985. The second prospectus included changes that were recommended during the hearing to protect farmers' rights. After reviewing this revised prospectus, my conclusion is that the rights of farmers participating in this venture still would not be adequately protected under this agreement. Some of these problems are listed below.

The securities that would be traded involve a high degree of risk. At this point in time, no public market exists for the common stock and it is possible that no such market will exist at any time in the future. In addition, if an over-the-counter market should develop, it is likely that the company will not have a large number of stockholders and consequently, trading would be sporadic and limited.

The plan still illustrates how CFF will provide administrative, leasing, and property management services, but will inject little capital into this venture. The revised prospectus states that almost all of the financing will be funded by the farmers participating in this project. Farmers would be required to make up-front payments to CFF for appraisal and operating costs, even though there is no guarantee they will be selected to participate in the program. This should be viewed with suspicion.

Once the exchange has taken place, the farmer would have to pay cash rent in order to continue farming. In the event of a crop failure, no allowance is made for any type of extension of rental payment, with the lease being subject to termination if the rent payment is not made within 20 days. The harsh default provision is especially serious because farmers can only raise capital through the sale of shares. With no market available, the results could be devastating. However, even if there was not a natural disaster, the plan still fails to provide any method to liquidate existing debt.

After this simple exchange of farmers' land for paper certificates, the holder of existing mortgages would be asked to accept these shares in CFF in lieu of their security on the land. This is highly unlikely to happen. A number of other problem areas exist and some are outlined in a letter I received from Jeffrey Southard, Deputy Attorney General in the State of Kansas. I am attaching a copy of this letter.

These are just a few of the problems that still remain in the CFF plan. With these points in mind, I urge you to disapprove the registration of Consolidated Family Farms until the rights of farmers, creditors and other investors are protected under the plan.

Unfortunately, agriculture in the United States in suffering through some difficult times, and some farmers will try anything to

hold onto their farms and their way of life. For this reason, some farmers might agree to such an arrangement without understanding all of the details of such a program. Most farmers do not have and cannot afford an attorney who could warn them about the possible disadvantages of such a venture. Thus, it is important for the government to take the lead in clarifying the risks involved.

I hope you will carefully consider all these factors before any SEC ruling is made on the Consolidated Family Farms registration.

Thank you for your cooperation in this important matter. If you have any questions or if I can be of assistance to you, please don't hesitate to contact me.

Sincerely,

LARRY PRESSLER,
U.S. Senator.

STATE OF KANSAS,
OFFICE OF THE ATTORNEY GENERAL,
Topeka, KS, June 6, 1985.

Re: Consolidated Family Farms.

Hon. LARRY PRESSLER,
U.S. Senate, Committee on Small Business, Russell Senate Office Building, Washington, DC.

DEAR SENATOR PRESSLER: This letter is in response to your earlier communication of April 4, 1985, regarding Consolidated Family Farms. In your letter, you requested that I examine the revised prospectus which was issued following the subcommittee hearings last summer which you chaired that examined the company's practices. Due to the press of our legal matters, I have been unable to prepare a response to you until now. However, in reviewing the revised prospectus, I wish to restate a number of concerns which I believe still exist.

An examination of the revised prospectus indicates that a number of changes have in fact been made since last summer. Consolidated Family Farms is no longer a series of interlocking partnerships, but instead has converted to an actual corporation. This has the effect of legally eliminating the company from operation in a number of States which have corporate farming laws such as Kansas, Nebraska, Iowa, Missouri, South Dakota, North Dakota, Minnesota, and Wisconsin. Additionally, for whatever reason, the company has determined not to go into other mid-western states such as Oklahoma, Texas and Montana. This has the practical effect of eliminating the majority of the primary agricultural states in this country, and raises questions at the outset regarding the viability of the entire enterprise.

Other statements made in the revised prospectus cast further doubt on the intent behind the corporation's offer. The prospectus at one point states that the company is interested primarily in acquiring income-producing property which is debt free, a goal which, given current market conditions, indicates either an incredible naivete or a lack of good faith. While the company will consider property subject to mortgage if the payments and expenses do not result in a negative cash flow, even this apparent concession eliminates a good percentage of the farm land in the United States, where heavy debt is the general rule rather than the exception.

Further, the prospectus indicates that operators of farms leased from the company will very probably be unable to qualify for governmental subsidy or entitlement programs. While these programs are not the life blood of many farms in the midwest, they at the very least are an important part of maintaining an adequate cash flow, and even the most efficient and profitable farmers would be hard pressed to relinquish such a source of funds. Since it is the more marginal farmers who are likely to be attracted to this kind of program, this casts further doubt on the ability of Consolidated Family Farms to actually provide anything of benefit to farmers.

Even where the new prospectus contains additional material or changes, such changes or material do not go to the underlying problems which were expressed earlier. For example, it was noted last summer that individuals wishing to participate in the program were required to make up-front payments of appraisal fees, which were then placed in escrow and which provided the company with a source of operating capital. While the escrow feature has been removed, the individual farmer is still liable to pay all the costs of having his property appraised (pages 24-25), which is still an indication that the promoters of this company intend to put as little of their own money as possible into the venture, leaving the individual farmers to bear the brunt of the initial expenses. In short, farmers are being asked to pay for the privilege of relinquishing title to their own land.

A review of the revised prospectus with the original document indicates that the plan proposed by Consolidated Family Farms still has the following problems:

1. The plan continues to require a farmer to relinquish his land in return for getting paper certificates, for which there is no market, and then having to pay cash rent in order to continue farming. In the event of a bad crop year, no allowance is made for any type of extension of rental payment, with a lease being subject to termination if a rent payment is not made within 20 days. This harsh default provision negates the new sections which appear to allow "family farms" to have more freedom to operate. With no source of raising capital but through the sale of the shares, a farmer would appear to be cut off from any means of raising funds to pay such cash rent in the event of a crop failure.

2. The plan continues to fail to provide any method to liquidate existing debt, which as I mentioned above is a reality in almost every parcel of farmland located in this country. Without an injection of capital by the promoters, holders of existing mortgages would be asked to accept shares in CFF in lieu of their security on the land, a prospect which is so remote as to be beyond any reasonable possibility of occurring.

3. The prospectus still emphasizes that a management company will be utilized to provide administrative, leasing, and property management services. As was emphasized in my earlier testimony, this has the effect of skimming off money which is generated by the labor of farmers for services of a questionable nature.

4. The plan is still basically flawed in that it allows ownership of agricultural land with virtually no injection of capital on the part of the persons behind Consolidated Family Farms. As I noted in my previous testimony, farmers would be effectively transformed into 20th century sharecroppers, who would pay a cash rent to farm what was previously their own land. As long as this feature of the plan remains, it must be viewed with the utmost suspicion.

Again, I apologize for the delay in transmitting my remarks to you. Should the subcommittee wish to schedule additional hearings, I would be happy to appear and expound upon the above concerns.

Very truly yours,

ROBERT T. STEPHAN,
Attorney General.
JEFFREY S. SOUTHARD,
Deputy Attorney General.

Mr. PRESSLER. Mr. President, I urge my Senate colleagues to review the Consolidated Family Farms plan and to join me in requesting that their registration not be approved until farmers' rights are adequately protected under any such agreement.

GRAND HAVEN'S FIRST CITIZEN

Mr. RIEGLE. Mr. President, I rise today to pay tribute to a dedicated and hardworking public servant—Marjorie Boon, mayor of Grand Haven, MI. Mayor Boon has dedicated the majority of her adult life to improving the quality of life for all of Grand Haven's citizens and the fruits of her efforts are apparent.

Under her direction, Grand Haven—also known as the "Coast Guard City"—has blossomed. The city's rejuvenated waterfront has become the hallmark for other Great Lakes communities. Mayor Boon has been instrumental in providing assistance to the congressional delegation in our recent victorious fight to keep Coast Guard service on the Great Lakes. In fact, even the Coast Guard recognized her outstanding efforts by awarding her the 1984 "U.S. Coast Guard Distinguished Public Citizen Award" and inviting her to inaugurate the new Coast Guard vessel, the *Escanaba III* this August in Rhode Island.

In addition, the priority she has placed on improving her city's economic climate has led to a strengthened industrial base and more jobs for local residents. The city of Grand Haven has prospered under her able and caring leadership.

Mayor Boon's Grand Haven roots run deep. Her tenure as mayor began in November 1981 and followed 8 years of service on the city council. In addition, Mayor Boon taught in the Grand Haven public school system for 15 years, served as the president of the Tri-Cities League of Women Voters between 1967-69 and has been the recipient of numerous public awards and commendations.

Mr. President, the weekend of August 3-4 is the annual Grand Haven Coast Guard Festival. I can think of no more fitting occasion to pause and pay tribute to an outstanding woman.

THE NINTH COAST GUARD DISTRICT AND MICHIGAN

Mr. RIEGLE. Mr. President, on August 3, 1985, I will attend the Coast Guard Festival in Grand Haven, MI. This event, which coincides with the 195th anniversary of the Coast Guard,

is held annually and honors the tremendous contribution that the Coast Guard makes to the community of Grand Haven and to the entire Great Lakes.

Most people around the Nation have no idea of the size or breadth of the Great Lakes, and hence would not believe that the U.S. Coast Guard is as active and vital to commercial and recreational interests as in any other coastal range. I believe that most Americans would be surprised to learn that the Great Lakes shoreline is 9,400 miles long, with the U.S. portion more than 4,500 miles. This is more territory for the Coast Guard to cover than the Atlantic and gulf coasts combined. Michigan's coastline is 3,200 miles in length which is more than any other State except Alaska. And finally, there are more than 700,000 boats registered in Michigan alone, as well as an active commercial maritime industry, so in all ways the Great Lakes is a seacoast and the challenges facing the Coast Guard are the same as in any other area.

Many thousands of people around the Great Lakes owe their lives to the vigilance and dedication of the Ninth Coast Guard District. Last year, alone, there were more than 4,000 cases and more than 8,000 people assisted by the Coast Guard. Of these one-fourth of the cases and almost one-half of those helped were in Michigan waters. Clearly, the value of this service, which is performed by the Coast Guard under sometimes impossible conditions and at great personal risk by the ninth district personnel, cannot be calculated.

Beyond the search and rescue functions, the ninth district is responsible for aids to navigation and for icebreaking operations. Both of these activities are vital to the commercial shipping lanes which connect the Great Lakes with the world. In addition, critical pollution control functions are performed by the Coast Guard, a fact that is not generally known but which is most important in our common effort to protect the lakes from environmental threats.

Mr. President, for all of this, and for so much more, the people of Michigan and the entire Great Lakes region owe the men and women of the Ninth Coast Guard District their thanks and gratitude. The Great Lakes, which provide all of us beauty, recreation and commercial opportunities are much safer for all of us due to the never ending efforts of the Coast Guard. So, on this day of celebration we should all take a moment to acknowledge what you have done for us, and what you will continue to do to keep these lakes great.

FURTHER INFORMATION ON THE EFFECTS OF PCP

Mrs. HAWKINS. Mr. President, I did not think it was possible to hear anything more grotesque than the things I have already heard about the effects of the drug PCP. But an article which recently appeared in the Washington Post's health section brings new, even more horrifying, revelations to light. To provide an idea of the kind of verifiable information it contains, this article is entitled, "PCP Users Don't Feel Pain When Their Bones Break."

This is how the author, the chief psychologist in the Department of Psychiatry at the District of Columbia General Hospital, begins his remarkable article:

> His mother threatened to sue me. She did not want her son to go to St. Elizabeth's. However, this was the second time in two weeks that he attempted to set the house on fire and assault his family. Now all he would do was remain quiet or sit up in bed staring into space. He had a history of using PCP.

Dr. Brown, the article's author, indicates in this hard-hitting statement of the effects of this manmade drug, that "more than any other substance of abuse, PCP adversely and irreversibly affects our youth." The doctor states that PCP has created an entire new kind of public menace and a whole new population of mentally disturbed individuals. This is due in part to the fact that PCP is easy to make and cheap to buy, but it is also due to the fact that PCP can cause irreversible brain damage. In fact, it is estimated that more than 50 percent of admissions to psychiatric emergency rooms in New York, Los Angeles, Boston, and the District of Columbia are due to the effects of PCP.

This statistic alone attests to the uniqueness of this drug. The difference between PCP and other drugs starts with its history. Phencyclidine was originally developed as a surgical anesthetic; however, after being used for a short time, it was observed that patients recovering from surgery where this narcotic was used displayed bizarre, psychotic behavior. Subsequently, the drug was banned, and now is obtainable only by buying what is manufactured in clandestine laboratories with no control over the ingredients. This makes a substance with unpredictable results even more dangerous.

It is recognized that PCP greatly reduces or eliminates awareness of physical pain and recent memory, and it increases strength. As a result, it has become common to hear of patients who break out of handcuffs or leather restraints, suffering broken bones and serious cuts in the process—all the while totally oblivious to the pain. Additionally, these persons generally do not remember the events that caused the injuries.

PCP can be smoked with marijuana. It can also be ingested by smoking it with tobacco; by mixing and snorting it with cocaine; by swallowing it with alcohol in its liquid form; or by injecting it with heroin. When it is taken in the more extreme forms, for example, injection, it is almost impossible to predict whether the drug will act as stimulant, as a depressant, or as a hallucinogen. Even a one-time use of PCP can trigger an underlying psychiatric problem, or cause irreversible destructive or self-destructive behavior. The doctor gives us two rather common examples of such behavior: Jumping off a building or gouging out eyes.

Another unique feature of this narcotic is that rather than being metabolized or excreted like cocaine, heroin, or marijuana, PCP is absorbed in body and brain fat tissue, where it accumulates. These fat deposits serve as sources of continued PCP toxicity, creating symptoms ranging from recurring psychotic episodes, to those of brain injury. The latter includes: Speech is slow and slurred; certain words become difficult to pronounce; and abilities to concentrate, organize, and think in abstraction become impaired. These symptoms endure for an indefinite period of time after use of the drug is discontinued. One of the most dangerous aspects of abuse of this drug is that discontinued use does not assure that psychotic symptoms will end, or not recur.

Dr. Brown relates another anecdote involving a PCP user:

> A doctor recently requested that handcuffs be taken off a patient who had injured himself as a result of being on PCP. He seemed to be calm, and the officer unlocked the handcuffs. A few seconds later, he attacked the doctor, and with the handcuffs, beat the officer who was trying to restrain him. It took eight men to subdue him. The patient suffered broken ribs but did not feel any pain and did not remember what happened. The officer required surgery.

Mr. President, more medical care is required with PCP abuse than with any other illicit narcotic because use of the drug results in respiratory and cardiovascular disfunctions, seizures, and convulsions. Also, there are many accidents, and self-inflicted injuries. Suicide has become a common problem in chronic PCP users.

What more needs to be said to inform potential PCP users of the incredible danger of even an initial use of this drug? Despite the copious dissemination of information such as what is contained in this article, young minds and young bodies are continuing to be maimed and destroyed through use of this drug. As chairman of both the Senate Subcommittee on Children, Family, Drugs and Alcoholism, and the Senate Drug Enforcement Caucus, I will continue to do all I can to provide for enhanced preven-

tion and education efforts directed at killing the demand for PCP.

DEATH OF MARY ANN DUBS

Mr. DOLE. Mr. President, it is with sadness that I inform the Senate of the death of Mary Ann Dubs, a Foreign Service Officer who served at the American Embassy in Mexico and a former member of the staff of the Office of the Secretary of the Senate.

Mary Ann, who lived in Washington, was the wife of the late Adolph Dubs, the U.S. Ambassador to Afghanistan who was assassinated by terrorist kidnapers in 1976.

She was born in Jackson Township, PA. After graduating from Wilkes College, Mary Ann came to Washington and took a position in the Public Affairs Office of the Department of State. In 1971, she became a member of the staff of the Office of Senate Parliamentarian. In 1972, she joined the staff of the Senate Daily Digest as assistant editor and became editor in 1979.

In 1980, Mary Ann was commissioned in the Foreign Service. Her assignments included Mexico, where she was administrative officer of the U.S. Embassy. She was a founder of the Afghan Relief Committee of Washington and for this work she was honored by the Government of Pakistan.

I am sure that I speak for the entire Senate in expressing sincere condolences to her family and many friends.

ANTI-APARTHEID ACTION ACT OF 1985

Mr. KENNEDY. Mr. President, 2 weeks ago today, on July 11, the Senate passed legislation imposing economic sanctions against South Africa. That legislation passed this body by a vote of 80 to 12. In the course of the debate, there was an effort to delay the legislation with protracted debate, and cloture was invoked by an overwhelming vote of 80 to 8.

Since that legislation passed, the violence in South Africa had escalated and the repression has deepened. The President of South Africa has proclaimed a state of emergency, which has resulted in hundreds of arrests throughout the country.

At least one democratic government has reacted swiftly to the escalation of violence in South Africa. The Republic of France, which aided the American patriots during our revolution, has responded to the struggle for liberation by the black population in South Africa.

The French Ambassador is being recalled from South Africa, no new investent will be permitted by French firms in South Africa, and France has requested an urgent meeting of the United Nations Security Council to condemn the state of emergency proclaimed in South Africa.

And what about the United States? What about our effort to align the United States of America with those who seek to end apartheid?

The administration has deplored the violence in South Africa, but done nothing more. The Senate has not even appointed conferees to meet with the House to resolve the differences in our two versions of the Anti-Apartheid Act.

I know that other conferences are going forward on the foreign aid bill, or the State Department authorization bill, and on Micronesia. But not one of those bills has the importance or the urgency of the South African legislation.

Yet we still have not—here in the Senate—even appointed our conferees.

People are being arrested and are being killed by the hundreds in South Africa, and the U.S. Senate is twiddling its fingers. We must act, and we must act swiftly, or once again, the United States of America will be identified with the wrong side in the struggle in South Africa.

The Anti-Apartheid Act is the most pressing moral issue that confronts us today—and we are silent. The time has come to break that silence to take strong and visible action to express this Nation's opposition to apartheid and the continuing repression in South Africa.

History will judge us harshly if, in the face of such oppression we do nothing; if, in the face of such injustice, we proceed with business as usual.

I was proud to be able to work closely with the majority leader and the chairman of the Senate Foreign Relations Committee in passing the South African legislation 2 weeks ago. I hope that we will be able to work together again—now—to break the current silence and end our current inaction.

I urge the Senate to break the deadlock and end the delay. It is time to stand up for peace and for justice in South Africa.

Therefore, Mr. President, on behalf of Senator WEICKER and myself, I move that the Chair lay before the Senate the message from the House of Representatives on H.R. 1460, the Anti-Apartheid Act of 1985.

The PRESIDING OFFICER. The question is on the motion.

Mr. DOLE. Mr. President, I have discussed this matter with the distinguished Senator from Massachusetts and the distinguished Senator from Connecticut.

I must confess that I was unaware that conferees had not been appointed. So far as I knew, they were working. But I am now prepared to move that the Senate insist on its amendment and agree to the conference requested by the House and that the conferees be appointed on the part of the Senate.

I would expect the conferees to meet in good faith and try to resolve the differences in the two bills. It may not be possible.

I have been assured that that is the procedure that will be followed. Otherwise, the only recourse the leader has, since it is a leadership prerogative, would be to table the motion. But I hope that, with that assurance, the conferees will be appointed in the next few minutes.

It is my expectation that when you have conferees, they meet. They try to work it out. If they cannot, they cannot; but at least I think the Senate and those who supported this bill, the so-called compromise, have a right to expect it.

Mr. KENNEDY. Mr. President, do I correctly understand the statement of the majority leader to be that with the appointment of the conferees, it is his expectation that they will meet prior to the recess and that there will be a conference report before the recess? I understand that the majority leader is not a conferee, and all he can do is give his best judgment and expectation of the outcome.

The Senator from Connecticut and I believe that there are no complex issues to be resolved between the two bodies with respect to the legislation. The conference should not be difficult if the conferees have the will.

Am I correct in my understanding of what the majority leader has said: That the conferees will be appointed now, that it is his expectation that they will meet before the recess, and that it is his hope that there will be some result in the conference and that a conference report will be available for us before we recess?

Mr. DOLE. Let me indicate again that I am not a conferee. I am not certain who would chair this conference, whether it would be the House or the Senate. It may be a very simple conference and it may not, because there is a vast difference between the Senate and the House bills. But I hope there would be an effort to resolve this issue. If it can be done before the recess, that is fine with the leader.

One problem we have is that there are about 8 or 10 conferences going on right now, and everybody is trying to get everything done by the end of next week, before the August recess.

I cannot speak for the Chairman of the Senate Foreign Relations Committee, but I will be happy to consult with him and urge him to go to conference quickly and see if the issues can be resolved.

Mr. CRANSTON. Mr. President, will the Senator yield?

Mr. KENNEDY. I yield.

Mr. CRANSTON. Mr. President, I am delighted that the Senator from

Massachusetts is continuing the effort, as he would, on apartheid. He is very strong in all that has happened on that front, and is very effective.

I have just come from the conference on foreign aid, where I brought up the matter of South Africa, and we have a commitment from Chairman LUGAR and from Chairman FASCELL on the House side that there will be a conference next week on the apartheid legislation, that conferees will be appointed now, and that time will be set for that meeting next week.

I hope, as does the Senator from Massachusetts, that we will be able to resolve all the issues and get that bill done and join France—I wish we had been the leader—but at least join France in taking action against apartheid. There is no guarantee that we can get final action next week. I will do my best as a conferee. We will at least have the opportunity to come to grips with the issue then.

Mr. KENNEDY addressed the Chair.

The PRESIDING OFFICER (Mr. DENTON). The Senator from Massachusetts.

Mr. KENNEDY. Mr. President, the motion I made is a motion which, by tradition, is reserved for the majority leader. This issue is of such enormous importance that I felt it was a matter of moral imperative that this unusual procedure be invoked.

I respect the good faith of the majority leader in appointing the conferees and his desire that there be a conference report by the time we adjourn.

There is a simple procedure by which the Senate could have been asked to accept the House bill and send it directly to the President, and that was the route I had intended to follow this afternoon if we were denied the right to send the bill to conference. There is a sense of immediacy on this issue, and those of us who support this legislation intend to do all we can to see that it is sent to the President before the recess.

So I am grateful for the assurances that have been given by the majority leader, and I therefore withdraw my motion.

ANTIAPARTHEID ACTION ACT OF 1985

Mr. DOLE. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on H.R. 1460.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House disagree to the amendment of the Senate to the bill (H.R. 1460) entitled "An Act to express the opposition of the United States to the system of apartheid in South Africa, and for other purposes," and ask a conference with the Senate on the disagreeing votes of the two Houses thereon.

Ordered, That the following are appointed as Conferees.

From the Committee on Foreign Affairs, for consideration of all provisions except section 17 of the Senate amendment, and modifications thereof committed to conference: Mr. Fascell, Mr. Solarz, Mr. Bonker, Mr. Wolpe, Mr. Crockett, Mr. Dymally, Mr. Berman, Mr. Weiss, Mr. Garcia, Mr. Broomfield, Mr. Siljander, Mr. Dornan of California, Mr. DeWine, and Mr. Burton of Indiana.

From the Commmittee on Banking, Finance and Urban Affairs, for consideration solely of section 3, 4, 5, 14(6), and 14(7) of the House bill, and sections 8, 15, and 17 of the Senate amendment and modifications thereof committed to conference: Mr. St Germain, Mr. Gonzalez, Mr. Annunzio, Mr. Mitchell, Mr. Neal, Mr. Barnard, Mr. Morrison of Connecticut, Mr. Wylie, Mr. McKinney, Mr. Leach of Iowa, and Mr. Hiler.

Mr. DOLE. I am going to state the motion and then I will yield to the Senator from Connecticut before it is acted on if that is satisfactory.

Mr. WEICKER. All right.

Mr. DOLE. I move that the Senate insist on its amendment and agree to the conference requested by the House of Representatives and the Chair be authorized to appoint conferees on the part of the Senate.

Before the conferees are appointed, I yield to the Senator from Connecticut.

Mr. WEICKER. I thank the distinguished majority leader and thank him for assisting in this cause.

Mr. President, I point out to my colleagues that this is not some philosophical or academic exercise. What is involved here is the attempt to set into motion forces of moderation before the forces of intemperance plunge South Africa into a bloodbath and no parliamentary maneuvers, no back and forth between the White House and the Senate and the Senate and the House of Representatives can substitute for this Nation making a clearcut statement in furtherance of the ideals that we espouse as a nation and in furtherance of the lives of the blacks in South Africa.

I thank my distinguished colleague from Massachusetts for not letting the issue go away because it will not. We can all cross our fingers and hope. We can all wish that it were going to go away. But it is not.

The body count climbs. The flames leap higher. The tragedy ever escalates.

The time has come for the leadership of this Nation, at least as embodied in the Senate, to stand up and make the position of the Nation known.

It is not just the blacks in South Africa. It is the oppressed all over the world. If democracy will not stand up and make that statement with respect to South Africa, then they look to other philosophies and other forms of government.

So I thank the majority leader and my good friend from Massachusetts, Senator KENNEDY, and my good friend, Senator CRANSTON, from California, for persisting on this issue.

Again, I would hope that not only are the conferees appointed, not only do the conferees meet, but before these two bodies adjourn next week, that bill is on its way to the White House for signature by the President of the United States and then, indeed, the leadership as embodied by the President, Senators, and Representatives alike will have spoken for the United States of America on the subject of apartheid and on behalf of those who suffer and die daily in the nation of South Africa.

Mr. CRANSTON. Mr. President, will the Senator yield?

Mr. WEICKER. I yield.

Mr. CRANSTON. I strongly endorse the remarks of the Senator from Connecticut who has been such an effective leader in this cause from the very beginning and he will be a leader in it until it is over.

Mr. WEICKER. I thank the Senator.

Mr. FORD. Mr. President, this side of the aisle certainly endorses and approves the motion by the majority leader and support his position without objection.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Kansas.

The motion was agreed to, and the Presiding Officer [Mr. DENTON] appointed Mr. LUGAR, Mr. HELMS, Mr. MATHIAS, Mrs. KASSEBAUM, Mr. GARN, Mr. HEINZ, Mr. PELL, Mr. SARBANES, Mr. CRANSTON, Mr. PROXMIRE, and for section 15, in lieu of Mr. CRANSTON, Mr. KENNEDY, conferees on the part of the Senate.

OUR ACID RAIN PROBLEM CONSTANTLY INCREASING

Mr. PELL. Mr. President, I recently read an excellent article which described acid rain accurately as "a constantly increasing problem" and detailed the effect acid rain has had on some of Rhode Island's inland waters.

This article by Kenneth E. Borst, a chemistry professor at Rhode Island College, appeared in Watershed, a newsletter published by the Wood-Pawcatuck Watershed Association in Rhode Island.

In his article, Professor Borst notes that "of the 38 sources sampled once a month during the past 14 months, 30 were in the 3 low-quality categories of acidified, critical, and endangered."

He notes, in addition, that even one of the "best" ponds in Rhode Island, Upper Rochambeau in Lincoln, may be very sensitive to acid rain because of a very low capacity to buffer the acid introduced by rainfall.

Professor Borst concludes that the cost of adjustments in water treat-

ment may be "staggering—far more than what the power companies claim it will cost them to decrease emissions."

This article relays a clear message from the natural world around us that we must act quickly.

Early this year, I joined with the senior Senator from Minnesota [Mr. DURENBERGER] in introducing the State and Local River Conservation Act to help develop and implement management strategies for rivers.

Also earlier this year, I joined with the junior Senator from Maine [Mr. MITCHELL] in introducing legislation to require a 10-million-ton reduction of the pollutants linked to acid rain within 10 years.

And earlier this month, I joined with the senior Senator from New Hampshire [Mr. HUMPHREY] and the junior Senator from Massachusetts [Mr. KERRY] in introducing legislation that would eliminate the use of "tall stacks" as a method of avoiding effective pollution control measures.

These three legislative initiatives may appear unrelated but they actually are closely linked. Unless we enact strong legislation like the latter two measures to effectively curb the pollutants linked to acid rain, we will have little to conserve in our acidified rivers and streams.

The evidence of this increasing danger is clear for all to see in thoughtful articles like the one written by Professor Borst.

I ask unanimous consent that his article be reprinted in the CONGRESSIONAL RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

MONITORING ACID RAIN

(By Kenneth E. Borst)

Acid rain is a constantly increasing problem that exists due to the presence of chemical pollutants in our atmosphere. Recent studies have produced evidence that the effects of this pollution are many and varied, ranging from the elimination of aquatic insects, fish, and vegetation, to the destruction of forests and limestone structures. This devastation is particularly high in our New England states, but it is severe in Sweden, Norway, and Western Europe as well.

Rain is "naturally" acid, if one accepts that an increase in the carbon dioxide (CO_2) content of the atmosphere is "natural," because that present concentration of CO_2 in our worldwide atmosphere is approximately 400 ppm (parts per million), up from approximately 320 ppm in 1960. The CO_2 combines with the water or water vapor in the atmosphere and produces showers of carbonic acid, H_2CO_3, that "normally" have a pH[1] of about 5.6. When the precipitation (rain) has a pH lower than 5.6, the term acid rain applies. Lower pH values in RI result from showers of sulfuric acid, sulfates, nitric acid, and nitrates, and are produced primarily by combustion of fossil fuels in power generating plants and steel mills in Ohio,[2] Indiana, Pennsylvania, Missouri, Kentucky, Illinois, and West Virginia. As a consequence of this pollution, the pH of rainfall in Rhode Island has been averaging about 4.2 for the past few years, with episodes of 3.5 (1982) and 3.4 (1983). A pH of 4.2 indicates an acidity that is 25 times greater than "normal" rainfall and 630 times greater than distilled and purified water. It is not encouraging to note that on April 2 of this year, in the midst of our current drought, a pH of 3.8 was recorded for a light shower.

A group of volunteers from the Narragansett Chapter of Trout Unlimited, an organization dedicated to the preservation of quality salmon and trout fishing in America, began a study of the effects of acid rain on some RI waters, with the first samples being taken in March, 1984, a study that was patterned after a similar project in Massachusetts. Lex Wiltrout of Coventry organized the samplers and sampling sites and the author organized the scientific study (pH, alkalinity, and buffer capacity). The lab work was done at Rhode Island College, the URI Soil Lab, and at Cal Chemical, an industrial lab in Conventry. Alkalinity and pH values lead to buffer (beta) values, values that indicate the rate at which the pH changes with increases in acid concentration. Paul Godfrey of the University of Massachusetts Water Quality Control Lab calls the buffering of streams "nature's Alka-Seltzer."

An examination of a water sample begins with a measurement of the initial pH and then a titration, a measure of the volume added, with sulfuric acid, H_2SO_4, to reach a pH of 4.5 and then a pH of 4.2, giving the EPA Alkalinity. The units of alkalinity are mg $CaCO_3$/L (milligrams calcium carbonate[3] equivalent per liter). The sample is then assigned to one of the following categories, listed in order of increasing quality.

Classification: Alkalinity (mg $CaCO_3$/L).

Acidified: Less than or equal to 0 and a pH lower than 5.0.

Critical: Greater than 0 and up to 2.

Endangered: Greater than 2 and up to 5.

Highly sensitive: Greater than 5 and up to 10.

Sensitive: Greater than 10 and up to 20.

Not sensitive: Greater than 20.

Buffer (beta) values are a bit more complicated to calculate, but they give the most reliable measure of how a stream, pond, or lake can survive an acid shower. A beta value of 0 (zero) mans that the sampled water is "dead," unable to prevent an increase in acidity from the acid rain. Of the 38 sources sampled once a month during the past 14 months, 30 were in the three low quality categories of acidified, critical, and endangered. What is more alarming is that even one of the "best" ponds, Upper Rochambeau, sited in Lincoln in a limestone area, has a poor beta value. Beta values of -10×10^{-5} and below are indications that the source is very sensitive to acid rain; it has a low capacity to buffer. The table below gives us an illustration of what our studies can show. The samples were taken on April 21, 1985. Aluminum concentrations are included because aluminum is suspect in some neurological diseases and it is in higher concentrations in sources that are subjected to acid rain and to the leaching process of the soil. Aluminum is not regulated at this time, but values above 0.1 are a cause for alarm.

TABLE 1

Source	pH	Alkalinity
Ponagansett River	4.98	−0.50
Brandy Brook	5.62	.8
Windsor Brook	5.85	.8
Upper Rochambeau	7.16	22.8
Wallum Lake	6.46	3.5
	beta ($X10^{-5}$)	Al (ppm)
Ponagansett River	0	.125
Brandy Brook	−3.11	.171
Windsor Brook	−2.80	.090
Upper Rochambeau	−14.1	
Wallum Lake	−3.06	.030

Before it flows into the Scituate Reservior, the Ponagansett River is joined by several poorly buffered streams, such as Windsor and Dolly Cole, and one wonders what adjustments in the process of water treatment will have to be made in the future. The cost might be staggering; far more than what the power companies claim it will cost them to decrease emissions. The members of Trout Unlimited already know what can happen to salmon and trout and most of that cost cannot be put in terms of dollars.

Mr. TRIBLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. KASTEN. Mr. President, I ask unanimous consent that the order for quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Morning business is closed.

FEDERAL TRADE COMMISSION ACT AMENDMENTS OF 1985

Mr. KASTEN. Mr. President, I ask unanimous consent that Senate bill 1078, a bill to amend the Federal Trade Commission Act, be brought before the Senate.

Mr. BYRD. Mr. President, reserving the right to object, and I shall not object to going to the bill, but I do have some problems with reference to the legislative veto, which problems will be explained as we go along.

I am not going to object to the bill. I do not think there is an objection to going to the bill on this side of the aisle. Therefore, I do not object.

Mr. FORD. Mr. President, reserving the right to object, and I shall not object, either, I have the same concerns as my distinguished Democratic leader has.

[1] $pH = -\log [H_3O+]$; "minus the logarithm of the hydronium ion concentration."

[2] Major polluters, in order of decreasing SO_2 emissions per year (1981).

[3] Limestone is a form of $CaCO_3$.

I want to say up front that I will not agree to a time certain as it relates to the provision whenever it is presented on the so-called legislative veto.

Everyone is trying to get a new form and trying to put all kinds of gimmicks in, and first thing you know the more gimmickry we put in the more trouble we get into. The harder we try to make it constitutional, the less effective it is going to be.

So, Mr. President, I just want to put myself on record that at the point of the bringing up of the so-called legislative veto, I will object to any time agreement. I thank the Chair and will not object to bringing up the bill.

Mr. LEVIN. Mr. President, reserving the right to object, I am wondering whether or not this has been cleared, the unanimous-consent agreement, with Senator GRASSLEY, because he had a desire to order the amendment. That was raised last night on the floor. I am wondering whether or not the floor manager can tell me whether or not the unanimous consent has been cleared with Senator GRASSLEY.

Mr. KASTEN. The Senator is aware of that fact. I had a personal conversation with him about 15 minutes ago that it was our intention to move to the Federal Trade Commission reauthorization bill at 12:30 this afternoon. The question as to after we move to the bill in what order amendments are considered or how the legislative veto question may be dealt with, worked out, whatever, is something that was not in any way agreed to last night. It was simply that last night we agreed that we would move to the Federal Trade Commission bill. The Senator from Iowa is aware of that fact.

Mr. LEVIN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. Does the Senator from Wisconsin yield for that purpose? The Senator from Wisconsin has the floor.

Mr. KASTEN. I have the floor. I would like to proceed to the bill.

Mr. LEVIN. I would like an opportunity for a moment to check with Senator GRASSLEY on what is happening.

Mr. KASTEN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. KASTEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Is there objection to the unanimous consent request? without objection, it is so ordered.

The bill will be stated by title.

The bill clerk read as follows:

A bill (S. 1078) to amend the Federal Trade Commission Act to provide authorization of appropriations, and for other purposes, which had been reported from the Committee on Commerce, Science, and Transportation, with an amendment.

The Senate proceeded to consider the bill (S. 1078) to amend the Federal Trade Commission Act to provide authorization of appropriations, and for other purposes, which had been reported from the Committee on Commerce, Science, and Transportation, with an amendment:

On page 11, line 17, strike out "institution' ", and insert "institution,' "

So as to make the bill read:

S. 1078

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Federal Trade Commission Act Amendments of 1985."

UNFAIR METHODS OF COMPETITION

SEC. 2. Section 5 of the Federal Trade Commission Act (15 U.S.C. 45) is amended by adding at the end thereof the following:

"(n) The Commission shall not have any authority to find a method of competition to be an unfair method of competition under subsection (a)(1) if, in any action under the Sherman Act, such methods of competition would be held to constitute State action.".

AGRICULTURAL COOPERATIVES

SEC. 3. The Federal Trade Commission Act (15 U.S.C. 41 et seq.) is amended by redesignating section 24 and section 25 as section 26 and section 27, respectively, and by inserting after section 23 the following new section:

"SEC. 24. (a) For purposes of this section, the term 'Capper-Volstead Act' means the Act entitled 'An Act to authorize association of producers of agricultural products', approved February 18, 1922 (7 U.S.C. 291 et seq.).

"(b) The Commission shall not have any authority to conduct any study, investigation, or prosecution of any agricultural cooperative for any conduct which, because of the provisions of the Capper-Volstead Act, is not a violation of any of the antitrust Acts or this Act.

"(c)(1) Before issuing a complaint under section 5 against any agricultural cooperative on the basis that such cooperative has violated any of the antitrust Acts or has used an unfair method of competition in or affecting commerce, the Commission shall—

"(A) provide the Secretary of Agriculture with a copy of the proposed complaint not less than fifteen days before the complaint is issued; and

"(B) consult with the Secretary of Agriculture regarding the possible applicability of the Capper-Volstead Act to the conduct of the cooperative.

"(2) The Commission shall not issue any such complaint unless—

"(A) it has considered any comments regarding such complaint which have been submitted by the Secretary of Agriculture under this subsection; and

"(B) it has reason to believe that the Capper-Volstead Act does not provide an exemption for the conduct which is the basis of such complaint.

"(3) If the Commission makes a modification to any such complaint after it has provided the Secretary of Agriculture with a copy of the complaint pursuant to (1)(A) of this subsection, the Commission shall not, with respect to such modification, be required to comply with the provisions of paragraphs (1) and (2) of this subsection unless such modification substantially expands the original basis for the issuance of the complaint.

"(4) The Secretary of Agriculture shall designate those officials and employees of the Department of Agriculture who may have access to documents or information received from the Commission under this subsection. Officials and employees of the Department of Agriculture shall be subject to the same requirements and penalties regarding confidentiality of such documents and information and disclosure of the existence of an investigation or consideration of a complaint as apply to officials and employees of the Commission.

"(5) Unless specifically authorized in writing by the Commission (or by any official or employee of the Commission designated by the Commission), no official or employee of the Department of Agriculture may request information relating to such complaint from any proposed respondent or any third party before the issuance of such compliant.

"(6) After any such complaint is issued, the Secretary of Agriculture may file with the Commission a written statement regarding the applicability of the Capper-Volstead Act to the action or method which is the basis of such complaint. The Commission shall include such statement in the record of the proceeding regarding such complaint.

"(7) No decision of the Commission to consult with the Secretary of Agriculture in accordance with the provisions of this subsection shall be construed to imply that the Commission has made a determination that it has reason to believe that any agricultural cooperative has violated or is violating any of the antitrust Acts or has used an unfair method of competition in or affecting commerce.

"(8) The provisions of this subsection shall not create any new basis for direct or collateral challenge to any complaint issued by the Commission.

"(d) The Commission shall not have any authority to conduct any study or investigation of any agricultural marketing orders."

COMPENSATION IN PROCEEDINGS

SEC. 4. (a) Section 18(h) of the Federal Trade Commission Act (15 U.S.C. 57a(h)) is repealed, and subsections (i), (j), and (k) of section 18 are redesignated as subsections (h), (i), and (j), respectively.

(b) Section 18(a)(1) of the Federal Trade Commission Act (15 U.S.C. 57a(a)(1)) is amended by striking "subsection (i)" and inserting in lieu thereof "subsection (h)".

KNOWING VIOLATIONS OF ORDERS

SEC. 5. (a) Section 5(m)(1)(B) of the Federal Trade Commission Act (15 U.S.C. 45(m)(1)(B) is amended by inserting ", other than a consent order," immediately after "order" the first time it appears therein.

(b) Section 5(m)(2) of the Federal Trade Commission Act (15 U.S.C. 45(m)(2) is amended by adding at the end thereof the following: "Upon request of any party to such an action against such defendant, the court shall also review the determination of law made by the Commission in the proceeding under subsection (b) that the act or practice which was the subject of such proceeding constituted an unfair or deceptive act or practice in violation of subsection (a).".

PREVALENCE OF UNLAWFUL ACTS OR PRACTICES

SEC. 6. Section 18(b) of the Federal Trade Commission Act (15 U.S.C. 57a(b)) is amend-

ed by adding at the end thereof the following:

"(3) The Commission shall issue a notice of proposed rulemaking pursuant to paragraph (1)(A) only where it has reason to believe that the unfair or deceptive acts or practices which are the subject of the proposed rulemaking are prevalent. The Commission shall make a determination that unfair or deceptive acts or practices are prevalent under this paragraph only if it has issued cease and desist orders regarding such acts or practices, or any information available to the Commission indicates a pattern of unfair or deceptive acts or practices.".

EFFECTIVE DATE OF ORDERS

SEC. 7. (a) Section 5(g)(2) of the Federal Trade Commission Act (15 U.S.C. 45(g)(2)) is amended to read as follows:

"(2) Upon the sixtieth day after such order is served, if a petition for review has been duly filed, except that any such order may be stayed, in whole or in part and subject to such conditions as may be appropriate, by—

"(A) the Commission:

"(B) an appropriate court of appeals of the United States, if (i) a petition for review of such order is pending in such court, and (ii) an application for such a stay was previously submitted to the Commission and the Commission, within the thirty-day period beginning on the date the application was received by the Commission, either denied the application or did not grant or deny the application; or

"(C) the Supreme Court, if an applicable petition for certiorari is pending; or".

(a) Section 5(g)(3) of the Federal Trade Commission Act (15 U.S.C. 45(g)(3)) is amended to read as follows:

"(3) For purposes of section 19(a)(2) and section 5(m)(1)(B), if a petition for review of the order of the Commission has been filed—

"(A) upon the expiration of the time allowed for filing a petition for certiorari, if the order of the Commission has been affirmed or the petition for review has been dismissed by the court of appeals and no petition for certiorari has been duly filed;

"(B) upon the denial of a petition for certiorari, if the order of the Commission has been affirmed or the petition for review has been dismissed by the court of appeals; or

"(C) upon the expiration of thirty days from the date of issuance of a mandate of the Supreme Court directing that the order of the Commission be affirmed or the petition for review be dismissed; or".

(c) Section 5(g)(4) of the Federal Trade Commission Act (15 U.S.C. 45(g)(4)) is amended to read as follows:

"(4) In the case of an order requiring a person, partnership, or corporation to divest itself of stock, other share capital, or assets, if a petition for review of such order of the Commission has been filed—

"(A) upon the expiration of the time allowed for filing a petition for certiorari, if the order of the Commission has been affirmed or the petition for review has been dismissed by the court of appeals and no petition for certiorari has been duly filed;

"(B) upon the denial of a petition for certiorari, if the order of the Commission has been affirmed or the petition for review has been dismissed by the court of appeals; or

"(C) upon the expiration of thirty days from the date of issuance of a mandate of the Supreme Court directing the order of the Commission be affirmed or the petition for review be dismissed.".

CIVIL INVESTIGATIVE DEMANDS

SEC. 8. (a) Section 20(a) of the Federal Trade Commission Act (15 U.S.C. 57b-1(a)) is amended—

(1) in paragraph (2), by striking "unfair or deceptive acts or practices in or affecting commerce (within the meaning of section 5(a)(1))" and inserting in lieu thereof "act or practice or method of competition declared unlawful by a law administered by the Commission";

(2) in paragraph (3), by striking "unfair or deceptive acts or practices in or affecting commerce (within the meaning of section 5(a)(1))" and inserting in lieu thereof "acts or practices or methods of competition declared unlawful by a law administered by the Commission"; and

(3) in paragraph (7), by striking "unfair or deceptive act or practice in or affecting commerce (within the meaning of section 5(a)(1))" and inserting in lieu thereof "act or practice or method of competition declared unlawful by a law administered by the Commission".

(b) Section 20(b) of the Federal Trade Commission Act (15 U.S.C. 57b-1(b)) is amended by striking "unfair or deceptive acts or practices in or affecting commerce (within the meaning of section 5(a)(1))" and inserting in lieu thereof "any act or practice or method of competition declared unlawful by a law administered by the Commission".

(c) Section 20(c)(1) of the Federal Trade Commission Act (15 U.S.C. 57b-1(c)) is amended by striking "unfair or deceptive acts or practices in or affecting commerce (within the meaning of section 5(a)(1))" and inserting in lieu thereof "any act or practice or method of competition declared unlawful by a law administered by the Commission".

DEFINITION OF UNFAIR ACT OR PRACTICES

SEC. 9. Section 5 of the Federal Trade Commission Act (15 U.S.C. 45), as amended by section 2 of this Act, is further amended by adding at the end thereof the following:

"(o) The Commission shall have no authority under this section or section 18 to declare unlawful an act or practice on the grounds that such act or practice is unfair unless the act or practice causes or is likely to cause substantial injury to consumers which is not reasonably avoidable by consumers themselves and not outweighted by countervailing benefits to consumers or to competition.".

TRADEMARKS

SEC. 10. The Federal Trade Commission Act (15 U.S.C. 41 et seq.) is amended by inserting after section 24, as added by section 3 of this Act, the following new section:

SEC. 25. The Commission shall not have any authority to take any action under section 14 of the Act entitled 'An Act to provide for the registration and protection of trademarks used in commerce, to carry out the provisions of certain international conventions, and for other purposes' (15 U.S.C. 1064), commonly referred to as the Lanham Act, with respect to the cancellation of the registration of any mark on the ground that such mark has become the common descriptive name of an article or substance.".

CREDIT UNIONS

SEC. 11. (a) Sections 5(a)(2), 6(a) and 6(b) of the Federal Trade Commission Act (15 U.S.C. 45(a)(2), 46(a) and 46(b)) are amended by inserting immediately after "section 18(f)(3)," the following: Federal credit unions described in section 18(f)(4),".

(b) The second proviso in section 6 of the Federal Trade Commission Act (15 U.S.C. 46) is amended—

(1) by inserting immediately after "section 18(f)(3)," the following: Federal credit unions described in section 18(f)(4),"; and

(2) by inserting immediately after "in business as a savings and loan institution," the following: ", in business as a Federal credit union,".

(c)(1) The second sentence of section 18(f)(1) of the the Federal Trade Commission Act (15 U.S.C. 57a(f)(1)) is amended by inserting immediately after "paragraph (3))" the following "and the National Credit Union Administration Board (with respect to Federal credit unions described in paragraph (4))".

(2) The last sentence of section 18(f)(1) of the Federal Trade Commission Act (15 U.S.C. 57a(f)(1)) is amended—

(A) by striking "either such" and inserting in lieu thereof "any such";

(B) by inserting "or Federal credit unions described in paragraph (4)," immediately after "paragraph (3)," each place it appears therein; and

(C) by inserting immediately after "with respect to banks" the following: ", savings and loan institutions or Federal credit unions".

(3) Section 18(f) of the Federal Trade Commission Act (15 U.S.C. 57a(f)) is amended by redesignating paragraphs (4), (5), and (6), respectively, and by inserting immediately after paragraph (3) the following:

"(4) Compliance with regulations under this subsection shall be enforced with respect to Federal credit unions under sections 120 and 206 of the Federal Credit Union Act (12 U.S.C. 1766 and 1786).".

COMMERCIAL ADVERTISING

SEC. 12. Section 18(h) of the Federal Trade Commission Act (15 U.S.C. 57a(h)), as so redesignated in section 4(a) of this Act, is amended by adding at the end thereof the following: "The Commission shall have no authority under this section to initiate any new rulemaking proceeding which is intended to or may result in the promulgation of any rule by the Commission which prohibits or otherwise regulates any commercial advertising on the basis of a determination by the Commission that such commercial advertising constitutes an unfair act or practice in or affecting commerce.".

REPORT

SEC. 13. (a) The Federal Trade Commission shall submit to the Committee on Commerce, Science, and Transportation of the Senate and to the Committee on Energy and Commerce of the House of Representatives the information specified in subsection (b) of this section every 6 months during each of the fiscal years 1986, 1987, and 1988. A report containing such information shall be submitted when the Commission submits its annual report to the Congress during each of such fiscal years, and such report may be included in the annual report. A separate report containing such information shall be submitted six months after the date of submission of any such annual report. Each such report shall contain such information for the period since the last submission under this section.

(b) Each report shall list and describe, with respect to instances in which resale price maintenance has been suspected or alleged—

(1) each complaint made, orally or in writing, to the offices of the Commission;

(2) each preliminary investigation opened or closed at the Commission;

(3) each formal investigation opened or closed at the Commission;

(4) each recommendation for the issuance of a complaint forwarded by the staff to the Commission;

(5) each complaint issued by the Commission pursuant to section 5 of the Federal Trade Commission Act (15 U.S.C. 45);

(6) each opinion and order entered by the Commission;

(7) each consent agreement accepted provisionally or finally by the Commission;

(8) each request for modification of an outstanding Commission order filed with the Commission;

(9) each recommendation by staff pertaining to a request for modification of an outstanding Commission order; and

(10) each disposition by the Commission of a request for modification of an outstanding Commission order.

Such report shall include the sum total of matters in each category specified in paragraphs (1) through (10) of this subsection, and copies of all such consent agreements and complaints executed by the Commission. Where a matter has been closed or terminated, the report shall include a statement of the reasons for that disposition. The description required under this subsection shall be as complete as possible but shall not reveal the identity of persons or companies complained about or those subject to investigation that have not otherwise been made public.

AUTHORIZATION OF APPROPRIATIONS

SEC. 14. Section 26 of the Federal Trade Commission Act, as so redesignated by section 3 of this Act, is amended—

(1) by striking "and" after "1981,", and

(2) by inserting immediately before the period at the end thereof the following: "; not to exceed $65,800,000 for the fiscal year ending September 30, 1986; not to exceed $66,800,000 for the fiscal year ending September 30, 1987; and not to exceed $67,800,000 for the fiscal year ending September 30, 1988, and such additional sums for the fiscal years ending September 30, 1987 and September 30, 1988, as may be necessary for increases in salary, pay, and other employee benefits as authorized by law".

BUILDING CONSOLIDATION

SEC. 15. Section 26 of the Federal Trade Commission Act, as so redesignated by section 3 of this Act and as amended by section 14 of this Act, is further amended by adding at the end thereof the following: "In addition, there is authorized to be appropriated during the fiscal years ending September 30, 1986, September 30, 1987, and September 30, 1988, a total amount not to exceed $3,811,000, to carry out the consolidation into not more than three buildings of the Headquarters Offices of the Commission in Washington, District of Columbia.".

EFFECTIVE DATE

SEC. 16. (a) Except as provided in subsections (b), (c), and (d) of this section, the provisions of this Act shall take effect on the date of enactment of this Act.

(b) The amendments made by sections 2, 7, and 9 of this Act shall apply only with respect to cease and desist orders issued under section 5 of the Federal Trade Commission Act (15 U.S.C. 45) or to rules promulgated under section 18 of the Federal Trade Commission Act (15 U.S.C. 57a), after the date of enactment of this Act. These amendments shall not be construed to affect in any manner a cease and desist order which was issued, or a rule which was promulgated, before the date of enactment of this Act. These amendments shall not be construed to affect in any manner a cease-and-desist order issued after the date of enactment of this Act, if such other was issued pursuant to remand from a court of appeals or the Supreme Court of an order issued by the Commission before the date of enactment of this Act.

(c) The provisions of section 24(c) of the Federal Trade Commission Act, as added by section 3 of this Act, shall apply only to complaints issued by the Federal Trade Commission under section 5 of the Federal Trade Commission Act (15 U.S.C 45) on or after the date of enactment of this Act.

(d) The amendments made by sections 6 and 12 of this Act shall apply only to rulemaking proceedings initiated after the date of enactment of this Act. These amendments shall not be construed to affect in any manner a rulemaking proceeding which was initiated before the date of enactment of this Act.

Mr. KASTEN addressed the Chair.

The PRESIDING OFFICER. The Senator from Wisconsin is recognized.

Mr. KASTEN. Mr. President, today I am pleased to bring before the Senate the Federal Trade Commissison Act Amendments of 1985. This measure, which provides a 3-year authorization for the agency and which makes important changes in the agency's authority and procedures, was reported unanimously by the Commerce Committee.

The FTC has an important function—to protect consumers from unfair methods of competition and unfair or deceptive acts or practices. Unfortunately, the last FTC authorization enacted into law was the FTC Improvements Act of 1980, which expired at the end of fiscal 1982. Since then, the FTC has been without a formal authorization, although the Commerce Committee has held numerous hearings and reported several bills to the full Senate.

This bill provides a 3-year authorization of appropriations for the Federal Trade Commission. It freezes funding for fiscal year 1986 at the level of current appropriations—$65.3 million, and it provides for modest increases for fiscal years 1987 and 1988 that are below the Senate Budget Committee marks for the agency.

In addition, this bill contains an authorization for a special appropriation of $3,811,000 for a one-time building consolidation of the headquarters of the FTC in Washington, DC. This consolidation initiative is supported by the GSA and OMB. It also was recommended by the Grace Commission.

S. 1714, the last FTC bill introduced prior to the bill before us today, was reported by the Commerce Committee in the 98th Congress but was not acted upon by the full Senate prior to adjournment. S. 1714 contained a number of important reforms in FTC authority and procedure that were adopted by the committee after extensive hearings in the 97th and 98th Congresses. These reforms addressed such issues as the scope of FTC authority with respect to agricultural cooperatives and the agency's treatment of unfair advertising. The reforms in S. 1714 also included a statutory definition of "unfair acts or practices," the requirement of a showing that challenged conduct is prevalent in an industry as a prerequisite for FTC rulemaking, repeal of the Commission's authority to compensate public participants in rulemaking, and codification of the so-called Braswell standard of review for knowing violation of FTC orders.

All the reforms of S. 1714 are included in the bill before us today—except for the so-called professions compromise language that prohibited the FTC from using its consumer protection authority to invalidate State laws prescribing training, education, or experience requirements for licensure, or the permissible tasks or duties that professionals may perform based on specialized training or education.

Objections to this professions language were an obstacle to floor action on S. 1714. However, at the Consumer Subcommittee hearing on the FTC authorization, earlier this year, the continued need for this provision was questioned. While there were different views expressed as to the meaning of the professions language and its impact on FTC authority, the view was expressed that this provision is no longer necessary in light of recent Supreme Court decisions clarifying the scope of the State action doctrine, and in light of the sensitivity of the FTC to the requirements of professional self-regulation and State concerns in this area.

As a consequence, the professions language has been removed from the bill. This change is supported by such groups as the American Medical Association and the American Bar Association, and it is our hope that we now can move ahead expeditiously to enact this reauthorization of the FTC.

This is a fair, balanced reform bill that embodies years of work by the Commerce Committee. Moreover, this legislation is essential to reaffirm congressional support for the agency and to restore order to the legislative process.

Mr. President, at this time I ask that the committee amendment be agreed to.

The PRESIDING OFFICER. Is there objection?

Without objection, the committee amendment is agreed to.

The committee amendment was agreed to.

Mr. KASTEN. Mr. President, at this time, I yield to the ranking member of the subcommittee for any statement that he may wish to present.

The PRESIDING OFFICER. The Senator from Kentucky.

Mr. FORD. Mr. President, I thank my distinguished colleague from Wis-

consin, the chairman of the Consumer Subcommittee.

Mr. President, I strongly urge the passage of this bill and enactment of a law to reauthorize the Federal Trade Commission [FTC]. S. 1078 would guide the Commission in its efforts to enforce safeguards for business competition as well as the rights of consumers. It would continue the direction to the FTC set out in the FTC Improvement Act of 1980, the last authorization to become law. In the words of Jeffrey Joseph representing the Chamber of Commerce at the April 29, 1985 FTC hearing:

> For several years, the business community and consumers have operated in a climate of uncertainty and confusion with respect to the jurisdiction of the FTC and the standards of behavior deemed appropriate by the FTC. Lack of FTC reauthorization for the past three years has led to confusion over more than just the definition of "unfair or deceptive acts or practices" or the status of FTC improvements which were enacted in 1980; it has created doubt as to the very role of the FTC . . . . Yet, without a FTC reauthorization, without a clarification of the Act, the confusion continues.

Mr. President, it is certaintly time to enact a law. All the issues before us have been debated and studied extensively.

Indeed, the genesis of the most important provisions of S. 1078 occurred over some years ago during the extensive oversight process by the Consumer Subcommittee in the late 1970's. In 1979 alone, the subcommittee held 9 days of oversight hearings which ultimately resulted in the FTC Improvements Act of 1980. As many of my colleagues will remember, that process involved no shortage of ideas, recommendations, and controversy. In those days, we saw the FTC take its broad statutory authority—enforcement and administrative authority under 27 separate acts since 1914—and push it above and beyond the limit. Congress had created the Commission, but the Commission was acting as though it was the lone public policymaker—a development which I thought to be contrary to congressional intent. From my perspective, the proper role for the FTC has always been, as an arm of Congress, to carry out the public policy objectives of that body and to be a strong law enforcement agency to benefit business and consumers.

The oversight hearings revealed the necessity for steps to be taken to put the agency back on the proper cause. The resulting law addressed various problem areas that were identified. Some of these important provisions, however, were tied to the expenditure of agency funds during the authorization period and expired in 1982. Since that time, the annual appropriations have extended these provisions. S. 1078 incorporates these provisions into organic statute.

One of these important provisions included in S. 1078 is the elimination of unfairness rulemaking authority. Under section 12, the FTC shall have no authority to initiate new rulemakings to regulate commercial advertising on the grounds such advertising is unfair. The limitation contained in this section is warranted because the constitutional protection accorded to nondeceptive commercial speech is threatened by the broad grant of unfairness jurisdiction contained in section 18 of the FTC Act. The unfairness standard applied on an industry-wide basis in rule-making proceedings under section 18 has no proper place in the regulation of commercial speech as the standard is too vague to avoid an unacceptable risk of abridging first amendment principles of free speech. The standard does not take into account the mandate that the least restrictive form of regulation must be used consistent with meeting the substantial governmental interest involved.

Moreover, the Commission's use of the unfairness standard has survived litigation in cases dealing with unfair methods of competition or unfair acts of practices, not advertising. Because the unfairness standard in section 18 goes beyond the elimination of misleading or deceptive commercial speech, it raises an unacceptable potential for conflict with first amendment principles.

During the oversight process in the late 1970's, the committee received a report on this issue. This report on FTC rulemaking of the special project of the Administrative Conference of the United States was mandated by the Magnuson-Moss Act and traced the development of the Commission's unfairness theories, which it described as "an extemely plastic, open-ended set of theories." It concluded that if the Commission remains free to frame such broad and novel theories to support its rules, then the procedural safeguards in the statute may not be an adequate substitute for substantive standards. Prof. Robert H. Bork of the Yale Law School, formerly Solicitor General of the United States, submitted a statement to the Consumer Subcommittee in which he endorsed the provision to eliminate the unfairness standard in advertising rulemaking and urged that, because of the important constitutional considerations involved, the unfairness standard be eliminated from section 5 adjudications as well. It is apparent, therefore, that this is an important reform measure supported by thoughtful and disinterested critics.

Another important provision, section 3 of the bill, would make permanent the provision in the 1980 Act which prohibited the Commission from any study or investigation of agricultural marketing orders or prosecution of agricultural cooperatives for conduct which the Copper-Volstead Act exempts from the antitrust laws. A procedure is provided to give the Secretary of Agriculture an opportunity to present views and comments on the applicability of the Copper-Volstead Act.

The 1980 Act clarified the FTC's authority to issue industry-wide trade rules. Section 6 of S. 1078 contains an important rulemaking reform requiring prevalence of unlawful acts and practices. This provision was included in the authorizing legislation that I introduced in 1979 and that passed the Senate. However the provision was later dropped in the House/Senate conference.

The section requires prevalence as a basis for initiating rulemaking proceedings. Under this new standard, the FTC should not initiate a rulemaking where only isolated and insignificant violations have occurred. Rulemaking is permissible only where there have been several cease-and-desist orders or other evidence of a pattern of unlawful conduct. The FTC, of course, retains its authority against an isolated violation.

The 1980 act set up important new procedures to require confidential treatment of commercial or financial information. It also required that all FTC law enforcement investigations in the consumer protection area be conducted pursuant to civil investigative demands procedures very similar to the procedures of the Department of Justice. This required the FTC to be more specific in its investigative demands and attempted to eliminate the issuance of overly broad subpenas. This provision has worked well since its 1980 inception to correct past problems. Section 8 of S. 1078 extends the civil investigative demand procedures to the FTC's antitrust investigations.

Section 9 of S. 1078 would add a new definition to define the FTC's authority over "unfair" acts or practices. After extensive analysis, the Commerce Committee adopted this approach.

The FTC has had authority since the Wheeler-Lea amendment to the FTC act in 1938 to protect consumers against unfair or deceptive acts or practices. The Congress had, through broad, ambiguous language, given five Commissioners the sweeping power to regulate anything they believed to be, in their discretion, unfair, but Congress became increasingly concerned in the 1970's about some FTC actions under this broad mandate. My distinguished colleague from Missouri, Senator DANFORTH and I wrote to request the FTC to develop a statutory definition of "unfair" to put boundaries around this term. The Senate Commerce Committee collected outside views on the issue, held extensive

hearings, and proposed statutory language to better clarify and define the term. This statutory language which is contained in S. 1078, was based on the Commission's December 1980 policy statement on unfairness. The committee also determined, through this process, to decline to further define the term "deceptive acts or practices," since case law had placed limits on the term which were deemed appropriately specific.

Mr. President, the attempt to enact a statutory definition of unfairness has been a slow, tedious approach of reasoned lawmaking. The Congress should more frequently engage in the process of more narrowly defining major statutes.

Section 13 of S. 1078 requires a periodic report on the Commission enforcement of the law against resale price maintenance. This provision was originally offered by my distinguished colleague, Senator LAUTENBERG, on the predecessor bill to S. 1078. The current prohibition on resale price maintenance, the fixing of retail prices by manufacturers, is intended to protect both consumers seeking law retail prices and retailers seeking the right to compete. Information provided by the report may serve as a basis for other appropriate legislative action.

Mr. President, I want to compliment my colleague, Senator KASTEN, for his oversight activities and his effort to bring this legislation before the Senate for its consideration and hope the process of vigorous congressional oversight of the FTC will continue. I urge the passage of S. 1078.

Mr. HOLLINGS. Mr. President, I rise in support of the Federal Trade Commission Reauthorization, and I urge my colleagues to join me in assuring its passage.

The last formal authorization of the FTC was the FTC Improvements Act of 1980. Prior to its passage, then chairman of the Consumer Subcommittee, Senator FORD, presided at many weeks of hearings on the controversial issues of the time.

Under the original FTC Act, the Commission seeks to prevent anticompetitive conduct through its authority over "unfair methods of competition," and protect consumers through its "unfair or deceptive acts or practices" authority. In 1975, Congress acted to provide the agency explicit authority and detailed new procedures for promulgating trade rules to prohibit "unfair or deceptive practices." And in 1980, out of dissatisfaction with the Commission's exercise of its section 18 consumer protection rulemaking authority, Congress redirected some of the agency's rulemaking and added additional rulemaking procedures.

The 1980 act expired in 1982, and since then the FTC has been operating without an authorization. Unfortunately, key provisions of the 1980 Act were tied to the time period of the authorization and expired with the authorization. However, through the appropriations process, my colleagues and I have been able to secure continuation of many of the important provisions of the act through fiscal year 1985. Soon we will again act in an effort to ensure continuation of these provisions in the appropriations bill. The House of Representatives will specifically exclude the continuation of these provisions. Without congressional action, those provisions would expire at the end of this current fiscal year. Certainly, such action through the appropriations process is not as desirable as legislative committee action. The legislative committee for the agency, the Committee on Commerce, Science, and Transportation, is the proper committee for such legislative actions and it is my hope that S. 1078 would become law.

It is now time for an expeditious reauthorization of the FTC. This agency has an extremely important mission to fulfill—the protection of consumers and businesses from unfair, deceptive, or anticompetitive practices.

I do, however, have misgivings about the Commission on several issues. I am concerned that it is no longer fulfilling its core mission as the cop on the beat protecting against deceptive practices. Historically, the FTC's mere existence has had a deterrent effect on practices which are iliegal under the antitrust laws, such as predatory pricing. I am concerned that this is no longer true. And I have been concerned that the Commission has used poor judgment in setting its enforcement priorities. For example, in the recent past, it maintained antitrust actions against our Nation's cities.

These, however, are issues which I believe aggressive congressional oversight should address. I believe that the authorization bill before the Senate today is important to our quest for consumer protection and healthy competition. I urge its approval.

Mr. KASTEN. Mr. President, first of all, I compliment the Senator from Kentucky, the ranking member of the Consumer Subcommittee. He has been chairman of this subcommittee and has had great experience with these issues.

I want to say that his experience with these issues has been tremendously helpful to me.

I also want to point out to the membership that the FTC authorization passed the Commerce Committee unanimously. I think that the fact that we did have a unanimous vote was due in large part to the hard work, the thoughtfulness, and the cooperation of the Senator from Kentucky. It would not have been this way without his work and without his cooperation. I thank him for his stong leadership and his assistance.

AMENDMENT NO. 542

Mr. KASTEN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Wisconsin [Mr. KASTEN] proposes an amendment numbered 542.

Mr. KASTEN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KASTEN. Mr. President, this amendment provides an effective, expeditious, and constitutionally sound legislative veto mechanism for review of rulemaking by the Federal Trade Commission and the Consumer Product Safety Commission.

I am a firm believer in the legislative veto as an essential element in our arsenal of weapons for regulatory reform. Along with congressional and executive branch oversight, legislative veto authority provides Congress with an important opportunity to ensure that an agency's exercise of its delegated legislative power is consistent with congressional intent. I believe that legislative veto is necessary in order to shift the real power of Government away from the bureaucracy and back to the elected Congress.

In the last 50 years, Congress has repeatedly empowered agencies to write rules and regulations having the force and effect of law. The powers delegated are often broad and ill defined. Such agency mandates have been followed by the gradual realization that congressional oversight alone is not adequate to ensure that agency rulemaking comports with Congress' intent.

To improve agency accountability and strengthen congressional oversight, Congress resorted to the legislative veto. Unfortunately, as my colleagues well know, the Supreme Court in Chadha and subsequent decisions concluded that these legislative veto mechanisms were unconstitutional because they altered the legal rights of persons outside the legislative branch without providing for passage of the veto resolution by both Houses of Congress and presentment to the President.

Mr. President, the legislative veto mechanism I am offering today satisfies these constitutional requirements because it provides for the use of a joint resolution of disapproval which must be approved by both Houses of Congress and presented to the President before it can take effect.

The procedures for congressional review and disapproval contained in my amendment are simple. A newly issued FTC or CPSC rule must be sub-

mitted to Congress. The rule becomes effective 90 days later unless a joint resolution of disapproval of the rule is enacted. Procedures for expedited consideration of such disapproval resolutions are also established by my bill. The appropriate House or Senate committee may be discharged from consideration of a joint resolution after 30 days through a privileged motion. The motion to consider a disapproval resolution on the floor of the House or Senate is also privileged and debate on the resolution itself is limited to 2 hours.

Mr. President, committees already conduct or should conduct oversight of regulatory agencies within their jurisdiction. The Senator from Kentucky referred to the work that he and I are doing in oversight hearings on the Federal Trade Commission and the Consumer Product Safety Commission. Passage of my legislative veto amendment strengthens this process with respect to the Federal Trade Commission and the CPSC. Both the House and Senate Commerce Committees will regularly and systematically receive all new FTC and CPSC regulations which are about to take effect. Regulations of particular concern can then be reviewed and, through the expedited procedure provided for in my amendment, Congress can act quickly and decisively to block those regulations it objects to before they take effect.

The executive branch has already recognized the need for systematic presentation of all agency rules in order to effectively oversee agency rulemaking activities. President Reagan's Executive Order No. 12291 requires agencies to submit all proposed and final rules to the Director of the Office of Management and Budget for review. Moreover, publication of these rules can be delayed while the rule is studied and problems are clarified. Surely, Congress can learn from the highly effective example and adopt a similar procedure for overseeing FTC and CPSC rules.

My legislative veto amendment will not create a substantial new workload for Congress because congressional action is not required before rules or regulations take effect. Instead, Congress need take up only those regulations that raise important policy issues or clearly run counter to the intent of Congress. This is the same selection procedure by which Congress chooses which bills it will consider among the thousands that are introduced each year. And let me suggest that some of the bills we do consider are not nearly as significant as some of the regulations we now ignore simply because they are labeled regulations.

Nor will my amendment affect in any way the appropriations process. While, at first blush, requiring the use of appropriations legislation to enforce every legislative veto of an FTC or CPSC rule may appear reasonable, my fear, Mr. President, is that it will result in needless duplication and could prolong debate regarding appropriations bills and continuing resolutions. Congress can ill afford such burdens at a time when we are repeatedly subject to criticism for ineffectiveness due to unnecessary delay.

Moreover, I am not alone in my concerns about linking the legislative veto to the appropriations process. In testimony submitted to the Consumer Subcommittee, the chairman of the Senate Appropriations Committee (Mr. HATFIELD), concluded that a link between appropriations legislation and veto resolutions would impose unwaranted restrictions on appropriations activities and would do nothing to further the interest of legislative veto.

While I share the concerns of those who support using the appropriations process to enforce the legislative veto, I believe that my measure is a more viable means to obtain a common goal.

Mr. President, unelected public officials continue to churn out an unending stream of Federal rules and regulations that are not subject to congressional scrutiny. Congress has created this regulatory monster by delegating authority to administrative agencies. Therefore, it is our duty to take on the further responsibility of reviewing agency actions.

By adding my legislative veto amendment to the FTC authorization bill, Congress will be taking an important step toward assuming that authority.

Mr President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. MCCONNELL). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. KASTEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KASTEN. Mr. President, I send a modification of my amendment to the desk.

The PRESIDING OFFICER. The amendment is so modified.

Mr. KASTEN subsequently said: Mr President, I wish to modify my amendment.

I say to the Senate that the modification, the technical change that we made on page 7 we now find should have been made also on page 14, page 22, and page 30. It is exactly the same technical change. It was my intention to modify all of those sections. I ask unanimous consent that my amendment be so modified.

The PRESIDING OFFICER. The Senator has the right to modify his amendment.

The amendment (No. 542), as modified and further modified, is as follows:

On page 16, insert the following immediately after line 2:

CONGRESSIONAL REVIEW OF RULES

SEC. 16. (a) The Federal Trade Commission Act (15 U.S.C. 41 et seq.) is amended by inserting after section 25, as added by section 10 of this Act, the following new section:

"SEC. 26. (a) For purposes of this section, the term—

"(1) 'appropriate committee' means either the Committee on Commerce, Science, and Transportation of the Senate or the Committee on Energy and Commerce of the House of Representatives, as the case may be;

"(2) 'joint resolution' means a joint resolution the matter after the resolving clause of which is as follows: 'That the Senate and the House of Representatives disapprove the rule entitled , transmitted to the Congress by the Federal Trade Commission on , 19 .', the blank spaces being filled with the appropriate title of the rule and the date of transmittal of the rule to the Congress, respectively; and

"(3) 'rule' means any rule promulgated by the Commission pursuant to this Act, other than any rule promulgated under section 18(a)(1)(A) of this Act and any interpretive or procedural rule.

"(b)(1) Except as provided in subsection (g)(1) of this section, on the day the Commission forwards to the Federal Register for publication a recommended rule, the Commission shall transmit a copy of such rule to the Secretary of the Senate and the Clerk of the House of Representatives. The Secretary of the Senate and the Clerk of the House of Representatives are authorized to receive a recommended rule under this subsection whether the appropriate House is in session, stands in adjournment or is in recess.

"(2) On the day on which the Secretary of the Senate and the Clerk of the House of Representatives receive a recommended rule, the Secretary and the Clerk shall transmit a copy of such rule to the appropriate committees.

"(c)(1) Notwithstanding any other provision of law, no recommended rule may become effective until the expiration of a period of ninety days after the date on which such rule is received by the Secretary of the Senate and the Clerk of the House of Representatives, except that such rule may not become effective under this paragraph if within such ninety-day period a joint resolution with respect to such rule has become law.

"(2) For purposes of this subsection—

"(A) the term 'days' means only days of continuous session of Congress;

"(B) continuity of session is broken only by an adjournment sine die at the end of a Congress; and

"(C) the days on which either House is not in session because of an adjournment or recess to a day certain shall be excluded in the computation of days of continuous session of Congress for the ninety-day period referred to in this subsection if the adjournment is for more than five days.

"(d) Notwithstanding any other provision of law, any rule subject to this section shall be considered a recommendation of the Commission to the Congress and shall have no force and effect as a rule unless such

rule has become effective in accordance with this section.

"(e) Whenever an appropriate committee reports a joint resolution pursuant to this section, the resolution shall be accompanied by a committee report specifying the reasons for the committee's action.

"(f) Congressional inaction on, or rejection of, any joint resolution shall not be deemed an expression of approval of the rule involved. The compliance of the Commission with the requirements of this section, including any determination by the Commission under this section, shall not be subject to judicial review of any kind.

"(g)(1) If a recommended rule of the Commission does not become effective because of an adjournment of Congress sine die before the expiration of the period specified in subsection (c)(1) of this section, the Commission may resubmit the recommended rule at the beginning of the next regular session of Congress. The ninety-day period specified in the first sentence of section (c)(1) shall begin on the date of such resubmission, and such rule may only become effective in accordance with this section. The Commission shall not be required to forward such rule to the Federal Register for publication, if such rule is identical to the rule transmitted during the previous session of Congress.

"(2) If a recommended rule of the Commission is disapproved under this section, the Commission may issue a recommended rule which relates to the same acts or practices as the disapproved rule. Such recommended rule—

"(A) shall be based upon—

"(i) the rulemaking record of the recommended rule disapproved by the Congress; or

"(ii) such rulemaking record and the record established in supplemental rulemaking proceedings conducted by the Commission, in accordance with section 553 of title 5, United States Code, in any case in which the Commission determines that it is necessary to supplement the existing rulemaking record; and

"(B) may reflect such changes as the Commission considers necessary or appropriate, including such changes as may be appropriate in light of congressional debate and consideration of the joint resolution with respect to the rule.

"(3) After issuing a recommended rule under this subsection, the Commission shall transmit such rule to the Secretary of the Senate and the Clerk of the House of Representatives, in accordance with subsection (b)(1) of this section, and such rule shall only become effective in accordance with this section.

"(h) The provisions of this subsection, subsection (a)(1) and (2), subsection (e), and subsections (i) through (1) of this section are enacted by Congress—

"(1) as an exercise of the rulemaking power of the Senate and the House of Representatives, respectively, and as such they are deemed a part of the rules of each House, respectively, but applicable only with respect to the procedure to be followed in that House in the case of joint resolutions, and they supersede other rules only to the extent that they are inconsistent therewith; and

"(2) with full recognition of the constitutional right of either House to change the rules (so far as relating to the procedure of that House) at any time, in the same manner and to the same extent as in the case of any other rule of that House.

"(i) Except as provided in subsection (1) of this section, joint resolutions shall, upon introduction or receipt from the other House of Congress, be immediately referred by the presiding officer of the Senate or the House of Representatives to the appropriate committee of the Senate or the House of Representatives, as the case may be.

"(j)(1)(A) Except as provided in subparagraph (B) of this paragraph, if the committee to which a joint resolution has been referred does not report such resolution within 30 days of continuous session of Congress after the date of transmittal to the Congress of the recommended rule to which such joint resolution relates, it shall be in order to move to discharge the committee from further consideration of such resolution.

"(B) If the committee to which a joint resolution transmitted from the other House has been referred does not report such resolution within 30 days after the date of transmittal of such resolution from the other House, it shall be in order to move to discharge such committee from further consideration of such resolution.

"(2) Any motion to discharge under paragraph (1) of this subsection must be supported in the House in writing by one-fifth of the Members, duly chosen and sworn, and in the Senate may be made by one Senator, and is highly privileged in the House and privileged in the Senate (except that it may not be made after a joint resolution has been reported with respect to the same rule); and debate thereon shall be limited to not more than one hour, the time to be divided in the House of Representatives equally between those favoring and those opposing the motion to discharge and to be divided in the Senate equally between, and controlled by, the majority leader and the minority leader, or their designees. An amendment to the motion is not in order.

"(k)(1) Except as provided in paragraphs (2) and (3) of this subsection, consideration of a joint resolution shall be in accord with the rules of the Senate and of the House of Representatives, respectively.

"(2) When a committee has reported or has been discharged from further consideration of a joint resolution, or when the companion joint resolution from the other House has been placed on the calendar of the first House, it shall be in order, notwithstanding the provisions of rule XXII of the Standing Rules of the Senate or any other rule of the Senate or the House of Representatives, at any time thereafter (even though a previous motion to the same effect has been disagreed to) to move to proceed to the immediate consideration of either such joint resolution. The motion is highly privileged in the House and privileged in the Senate and is not debatable. An amendment to the motion is not in order.

"(3) Debate on a joint resolution shall be limited to not more than two hours (except that when one House has debated the joint resolution of that House, the companion joint resolution of the other House shall not be debatable), which shall be divided in the House of Representatives equally between those favoring and those opposing the resolution and which shall be divided in the Senate equally between, and controlled by, the majority leader and the minority leader, or their designees. A motion further to limit debate is not in order. An amendment to, or motion to recommit, the joint resolution is not in order. A motion to reconsider shall be in order only on the day on which occurs the vote of adoption of the joint resolution, and shall not be debatable. Any other motions shall be decided without debate.

"(l) If a joint resolution has been ordered reported or discharged from the committee of the House to which it was referred, and that House receives a joint resolution with respect to the same rule from the other House, the resolution of disapproval of the other House shall be placed on the appropriate calendar of the first House. If, prior to the disposition of a joint resolution of one House, that House receives a joint resolution with respect to the same rule from the other House, the vote in the first House shall occur on the joint resolution of the other House.".

(b) Section 36 of the Consumer Product Safety Act (15 U.S.C. 2083) is amended to read as follows:

"CONGRESSIONAL REVIEW OF RULES

"SEC. 36. (a) For purposes of this section, the term—

"(1) 'appropriate committee' means either the Committee on Commerce, Science, and Transportation of the Senate or the Committee on Energy and Commerce of the House of Representatives, as the case may be;

"(2) 'joint resolution' means a joint resolution the matter after the resolving clause of which is as follows: 'That the Senate and the House of Representatives disapprove the rule entitled , transmitted to the Congress by the Consumer Product Safety Commission on , 19 .', the blank spaces being filled with the appropriate title of the rule and the date of transmittal of the rule to the Congress, respectively; and

"(3) 'rule' means any rule promulgated by the Commission pursuant to this Act.

"(b)(1) Except as provided in subsection (g)(1) of this section, on the day the Commission forwards to the Federal Register for publication a recommended rule, the Commission shall transmit a copy of such rule to the Secretary of the Senate and the Clerk of the House of Representatives. The Secretary of the Senate and the Clerk of the House of Representatives are authorized to receive a recommended rule under this subsection whether the appropriate House is in session, stands in adjournment or is in recess.

"(2) On the day on which the Secretary of the Senate and the Clerk of the House of Representatives receive a recommended rule, the Secretary and the Clerk shall transmit a copy of such rule to the appropriate committees.

"(c)(1) Notwithstanding any other provision of law, no recommended rule may become effective until the expiration of a period of ninety days after the date on which such rule is received by the Secretary of the Senate and the Clerk of the House of Representatives, except that such rule may not become effective under this paragraph if within such ninety-day period a joint resolution with respect to such rule has become law.

"(2) For purposes of this subsection—

"(A) the term 'days' means only days of continuous session of Congress;

"(B) continuity of session is broken only by an adjournment sine die at the end of a Congress; and

"(C) the days on which either House is not in session because of an adjournment or recess to a day certain shall be excluded in the computation of days of continuous session of Congress for the ninety-day period referred to in this subsection if the adjournment is for more than five days.

"(d) Notwithstanding any other provision of law, any rule subject to this section shall be considered a recommendation of the Commission to the Congress and shall have no force and effect as a rule unless such rule has become effective in accordance with this section.

"(e) Whenever an appropriate committee reports a joint resolution pursuant to this section, the resolution shall be accompanied by a committee report specifying the reasons for the committee's action.

"(f) Congressional inaction on, or rejection of, any joint resolution shall not be deemed an expression of approval of the rule involved. The compliance of the Commission with the requirements of this section, including any determination by the Commission under this section, shall not be subject to judicial review of any kind.

"(g)(1) If a recommended rule of the Commission does not become effective because of an adjournment of Congress sine die before the expiration of the period specified in subsection (c)(1) of this section, the Commission may resubmit the recommended rule at the beginning of the next regular session of Congress. The ninety-day period specified in the first sentence of subsection (c)(1) shall begin on the date of such resubmission, and such rule may only become effective in accordance with this section. The Commission shall not be required to forward such rule to the Federal Register for publication, if such rule is identical to the rule transmitted during the previous session of Congress.

"(2) If a recommended rule of the Commission is disapproved under this section, the Commission may issue a recommended rule which relates to the same acts or practices as the disapproved rule. Such recommended rule——

"(A) shall be based upon——

"(i) the rulemaking record of the recommended rule disapproved by the Congress; or

"(ii) such rulemaking record and the record established in supplemental rulemaking proceedings conducted by the Commission, in accordance with section 553 of title 5, United States Code, in any case in which the Commission determines that it is necessary to supplement the existing rulemaking record; and

"(B) may reflect such changes as the Commission considers necessary or appropriate, including such changes as may be appropriate in light of congressional debate and consideration of the joint resolution with respect to the rule.

"(3) After issuing a recommended rule under this subsection, the Commission shall transmit such rule to the Secretary of the Senate and the Clerk of the House of Representatives, in accordance with subsection (b)(1) of this section, and such rule shall only become effective in accordance with this section.

"(h) The provisions of this subsection, subsection (a)(1) and (2), subsection (e), and subsections (i) through (l) of this section are enacted by Congress—

"(1) an exercise of the rulemaking power of the Senate and the House of Representatives, respectively, and as such they are deemed a part of the rules of each House, respectively, but applicable only with respect to the procedure to be followed in that House in the case of joint resolutions, and they supersede other rules only to the extent that they are inconsistent therewith; and

"(2) with full recognition of the constitutional right of either House to change the rules (so far as relating to the procedures of that House) at any time, in the same manner and to the same extent as in the case of any other rule of that House.

"(i) Except as provided in subsection (1) of this section, joint resolutions shall, upon introduction or receipt from the other House of Congress, be immediately referred by the presiding officer of the Senate or the House of Representatives to the appropriate committee of the Senate or the House of Representatives, as the case may be.

"(j)(1)(A) Except as provided in subparagraph (B) of this paragraph, if the committee to which a joint resolution has been referred does not report such resolution within 30 days of continuous session of Congress after the date of transmittal to the Congress of the recommended rule to which such joint resolution relates, it shall be in order to move to discharge the committee from further consideration of such resolution.

"(B) If the committee to which a joint resolution transmitted from the other House has been referred does not report such resolution within 30 days after the date of transmittal of such resolution from the other House, it shall be in order to move to discharge such committee from further consideration of such resolution.

"(2) Any motion to discharge under paragraph (1) of this subsection must be supported in the House in writing by one-fifth of the Members, duly chosen and sworn, and in the Senate may be made by one Senator, and is highly privileged in the House and privileged in the Senate (except that it may not be made after a joint resolution has been reported with respect to the same rule); and debate thereon shall be limited to not more than one hour, the time to be divided in the House of Representative equally between those favoring and those opposing the motion to discharge and to be divided in the Senate equally between, and controlled by, the majority leader and the minority leader, or their designees. An amendment to the motion is not in order.

"(k)(1) Except as provided in paragraphs (2) and (3) of this subsection, consideration of a joint resolution shall be in accord with the rules of the Senate and of the House of Representatives, respectively.

"(2) When a committee has reported or has been discharged from further consideration of a joint resolution, or when the companion joint resolution from the other House has been placed on the calendar of the first House, it shall be in order, notwithstanding the provisions of rule XXII of the Standing Rules of the Senate or any other rule of the Senate or the House of Representatives, at any time thereafter (even though a previous motion to the same effect has been disagreed to) to move to proceed to the immediate consideration of either such joint resolution. The motion is highly privileged in the House and privileged in the Senate and is not debatable. An amendment to the motion is not in order.

"(3) Debate on a joint resolution shall be limited to not more than two hours (except that when one House has debated the joint resolution of that House, the companion joint resolution of the other House shall not be debatable), which shall be divided in the House of Representatives equally between those favoring and those opposing the resolution and which shall be divided in the Senate equally between, and controlled by, the majority leader and the minority leader, or their designees. A motion further to limit debate is not in order. An amendment to, or motion to recommit, the joint resolution is not in order. A motion to reconsider shall be in order only on the day on which occurs the vote of adoption of the joint resolution, and shall not be debatable. Any other motions shall be decided without debate.

"(l) If a joint resolution has been ordered reported or discharged from the committee of the House to which it was referred, and that House receives a joint resolution with respect to the same rule from the other House, the resolution of disapproval of the other House shall be placed on the appropriate calendar of the first House. If, prior to the disposition of a joint resolution of one House, that House receives a joint resolution with respect to the same rule from the other House, the vote in the first House shall occur on the joint resolution of the other House.".

(c) Section 17 of the Flammable Fabrics Act (15 U.S.C. 1204) is amended to read as follows:

"CONGRESSIONAL REVIEW OF REGULATIONS

"SEC. 17. (a) For purposes of this section, the term—

"(1) 'appropriate committee' means either the Committee on Commerce, Science, and Transportation of the Senate or the Committee on Energy and Commerce of the House of Representatives, as the case may be;

"(2) 'Commission' means the Consumer Product Safety Commission;

"(3) 'joint resolution' means a joint resolution the matter after the resolving clause of which is as follows: 'That the Senate and the House of Representatives disapprove the regulation entitled , transmitted to the Congress by the Consumer Product Safety Commission on , 19 .', the blank spaces being filled with the appropriate title of the regulation and the date of transmittal of the regulation to the Congress, respectively; and

"(4) 'regulation' means any regulation promulgated by the Commission under section 2(q)(1) or 3(e).

"(b)(1) Except as provided in subsection (g)(1) of this section, on the day the Commission forwards to the Federal Register for publication a recommended regulation, the Commission shall transmit a copy of such regulation to the Secretary of the Senate and the Clerk of the House of Representatives. The Secretary of the Senate and the Clerk of the House of Representatives are authorized to receive a recommended regulation under this subsection whether the appropriate House is in session, stands in adjournment or is in recess.

"(2) On the day on which the Secretary of the Senate and the Clerk of the House of Representatives receive a recommended regulation, the Secretary and the Clerk shall transmit a copy of such regulation to the appropriate committees.

"(c)(1) Notwithstanding any other provision of law, no recommended regulation may become effective until the expiration of a period of ninety days after the date on which such regulation is received by the Secretary of the Senate and Clerk of the House of Representatives, except that such regulation may not become effective under this paragraph if within such ninety-day period a joint resolution with respect to such regulation has become law.

"(2) For purposes of this subsection—

"(A) the term 'days' means only days of continuous session of Congress;

"(B) continuity of session is broken only by an adjournment sine die at the end of a Congress; and

"(C) the days on which either House is not in session because of an adjournment or recess to a day certain shall be excluded in the computation of days of continuous session of Congress for the ninety-day period referred to in this subsection if the adjournment is for more than five days.

"(d) Notwithstanding any other provision of law, any regulation subject to this section shall be considered a recommendation of the Commission to the Congress and shall have no force and effect as a regulation unless such regulation has become effective in accordance with this section.

"(e) Whenever an appropriate committee reports a joint resolution pursuant to this section, the resolution shall be accompanied by a committee report specifying the reasons for the committee's action.

"(f) Congressional inaction on, or rejection of, any joint resolution shall not be deemed an expression of approval of the regulation involved. The compliance of the Commission with the requirements of this section, including any determination by the Commission under this section, shall not be subject to judicial review of any kind.

"(g)(1) If a recommended regulation of the Commission does not become effective because of an adjournment of Congress sine die before the expiration of the period specified in subsection (c)(1) of this section, the Commission may resubmit the recommended regulation at the beginning of the next regular session of Congress. The ninety-day period specified in the first sentence of subsection (c)(1) shall begin on the date of such resubmission, and such regulation may only become effective in accordance with this section. The Commission shall not be required to forward such regulation to the Federal Register for publication, if such regulation is identical to the regulation transmitted during the previous session of Congress.

"(2) If a recommended regulation of the Commission is disapproved under this section, the Commission may issue a recommended regulation which relates to the same acts or practices as the disapproved regulation. Such recommended regulation—

"(A) shall be based upon—

"(i) the regulation-making record of the recommended regulation disapproved by the Congress; or

"(ii) such regulation-making record and the record established in supplemental regulation-making proceedings conducted by the Commission, in accordance with section 553 of title 5, United Stats Code, in any case in which the Commission determines that it is necessary to supplement the existing regulation-making record; and

"(B) may reflect such changes as the Commission considers necessary or appropriate, including such changes as may be appropriate in light of congressional debate and consideration of the joint resolution with respect to the regulation.

"(3) After issuing a recommended regulation under this subsection, the Commission shall transmit such regulation to the Secretary of the Senate and the Clerk of the House of Representatives, in accordance with subsection (b)(1) of this section, and such regulation shall only become effective in accordance with this section.

"(h) The provisions of this subsection, subsection (a) (1) and (3), subsection (e), and subsections (i) through (l) of this section are enacted by Congress—

"(1) as an exercise of the rulemaking power of the Senate and the House of Representatives, respectively, and as such they are deemed a part of the rules of each House, respectively, but applicable only with respect to the procedure to be followed in that House in the case of joint resolutions, and they supersede other rules only to the extent that they are inconsistent therewith; and

"(2) with full recognition of the constitutional right of either House to change the rules (so far as relating to the procedure of that House) at any time, in the same manner and to the same extent as in the case of any other rule of that House.

"(i) Except as provided in subsection (1) of this section, joint resolutions shall, upon introduction or receipt from the other House of Congress, be immediately referred by the presiding officer of the Senate or the House of Representatives to the appropriate committee of the Senate or the House of Representatives, as the case may be.

"(j)(1)(A) Except as provided in subparagraph (B) of this paragraph, if the committee to which a joint resolution has been referred does not report such resolution within 30 days of continuous session of Congress after the date of transmittal to the Congress of the recommended regulation to which such joint resolution relates, it shall be in order to move to discharge the committee from further consideration of such resolution.

"(B) If the committee to which a joint resolution transmitted from the other House has been referred does not report such resolution within 30 days after the date of transmittal of such resolution from the other House, it shall be in order to move to discharge such committee from further consideration of such resolution.

"(2) Any motion to discharge under paragraph (1) of this subsection must be supported in the House in writing by one-fifth of the members, duly chosen and sworn, and in the Senate may be made by one Senator, and is highly privileged in the House and privileged in the Senate (except that it may not be made after a joint resolution has been reported with respect to the same regulation); and debate thereon shall be limited to not more than one hour, the time to be divided in the House of Representatives equally between those favoring and those opposing the motion to discharge and to be divided in the Senate equally between, and controlled by, the majority leader and the minority leader, or their designees. An amendment to the motion is not in order

"(k)(1) Except as provided in paragraphs (2) and (3) of this subsection, consideration of a joint resolution shall be in accord with the rules of the Senate and of the House of Representatives, respectively.

"(2) When a committee has reported or has been discharged from further consideration of a joint resolution, or when the companion joint resolution from the other House has been placed on the calendar of the first House, it shall be in order, notwithstanding the provisions of rule XXII of the Standing Rules of the Senate or any other rule of the Senate or the House of Representatives, an any time thereafter (even though a previous motion to the same effect has been disagreed to) to move to proceed to the immediate consideration of either such joint resolution. The motion is highly privileged in the House and privileged in the Senate and is not debatable. An amendment to the motion is not in order.

"(3) Debate on a joint resolution shall be limited to not more than two hours (except that when one House has debated the joint resolution of that House, the companion joint resolution of the other House shall not be debatable), which shall be divided in the House of Representatives equally between those favoring and those opposing the resolution and which shall be divided in the Senate equally between, and controlled by, the majority leader and the minority leader, or their designees. A motion further to limit debate is not in order. An amendment to, or motion to recommit, the joint resolution is not in order. A motion to reconsider shall be in order only on the day on which occurs the vote of adoption of the joint resolution, and shall not be debatable. Any other motions shall be decided without debate.

"(1) If a joint resolution has been ordered reported or discharged from the committee of the House to which it was referred, and that House receives a joint resolution with respect to the same regulation from the other House, the resolution of disapproval of the other House shall be placed on the appropriate calendar of the first House. If, prior to the disposition of a joint resolution of one House, that House receives a joint resolution with respect to the same regulation from the other House, the vote in the first House shall occur on the joint resolution of the other House.".

(d) Section 21 of the Federal Hazardous Substances Act (15 U.S.C. 1276) is amended to read as follows:

"CONGRESSIONAL REVIEW OF REGULATIONS

"SEC. 21. (a) For purposes of this section, the term—

"(1) 'appropriate committee' means either the Committee on Commerce, Science, and Transportation of the Senate or the Committee on Energy and Commerce of the House of Representatives, as the case may be;

"(2) 'Commission' means the Consumer Product Safety Commission;

"(3) 'joint resolution' means a joint resolution the matter after the resolving clause of which is as follows: 'That the Senate and the House of Representatives disapprove the regulation entitled , transmitted to the Congress by the Consumer Product Safety Commission on , 19 .', the blank spaces being filled with the appropriate title of the regulations and the date of transmission of the regulation to the Congress, respectively; and

"(4) 'regulation' means any regulation promulgated by the Commission under section 2(q)(1) or 3(e); such term does not include any finding by the Secretary that a hazardous substance presents an imminent hazard to the public health under section 2(q)(1) or 3(e)(2).

"(b)(1) Except as provided in subsection (g)(1) of this section, on the day the Commission forward to the Federal Register for publication a recommended regulation, the Commission shall transmit a copy of such regulation to the Secretary of the Senate and the Clerk of the House of Representatives. The Secretary of the Senate and the Clerk of the House of Representatives are authorized to receive a recommended regulation under this subsection whether the appropriate House is in session, stands in adjournment or is in recess.

"(2) On the day on which the Secretary of the Senate and the Clerk of the House of Representatives receive a recommended regulation, the Secretary and the Clerk shall transmit a copy of such regulation to the appropriate committees.

"(c)(1) Notwithstanding any other provision of law, no recommended regulation may become effective until the expiration of a period of ninety days after the date on which such regulation is received by the Secretary of the Senate and the Clerk of the House of Representatives, except that such regulation may not become effective under this paragraph if within such ninety-day period a joint resolution with respect to such regulation has become law.

"(2) For purposes of this subsection—

"(A) the term 'days' means only days of continuous session of Congress;

"(B) continuity of session is broken only by an adjournment sine die at the end of a Congress; and

"(C) the days on which either House is not in session because of an adjournment or recess to a day certain shall be excluded in the computation of days of continuous session of Congress for the ninety-day period referred to in this subsection if the adjournment is for more than five days.

"(d) Notwithstanding any other provision of law, any regulation subject to this section shall be considered a recommendation of the Commission to the Congress and shall have no force and effect as a regulation unless such regulation has become effective in accordance with this section.

"(e) Whenever an appropriate committee reports a joint resolution pursuant to this section, the resolution shall be accompanied by a committee report specifying the reasons for the committee's action.

"(f) Congressional inaction on, or rejection of, any joint resolution shall not be deemed an expression of approval of the regulation involved. The compliance of the Commission with the requirements of this section, including any determination by the Commission under this section, shall not be subject to judicial review of any kind.

"(g)(1) If a recommended regulation of the Commission does not become effective because of an adjournment of Congress sine die before the expiration of the period specified in subsection (c)(1) of this section, the Commission may resubmit the recommended regulation at the beginning of the next regular session of Congress. The ninety-day period specified in the first sentence of subsection (c)(1) shall begin on the date of such resubmission, and such regulation may only become effective in accordance with this section. The Commission shall not be required to forward such regulation to the Federal Register for publication, if such regulation is identical to the regulation transmitted during the previous session of Congress.

"(2) If a recommended regulation of the Commission is disapproved under this section, the Commission may issue a recommended regulation which relates to the same acts or practices as the disapproved regulation. Such recommended regulation—

"(A) shall be based upon—

"(i) the regulation-making record of the recommended regulation disapproved by the Congress; or

"(ii) such regulation-making record and the record established in supplemental regulation-making proceedings conducted by the Commission, in accordance with section 553 of title 5, United States Code, in any case in which the Commission determines that it is necessary to supplement the existing regulation-making record; and

"(B) may reflect such changes as the Commission considers necessary or appropriate, including such changes as may be appropriate in light of congressional debate and consideration of the joint resolution with respect to the regulation.

"(3) After issuing a recommended regulation under this subsection, the Commission shall transmit such regulation to the Secretary of the Senate and the Clerk of the House of Representatives, in accordance with subsection (b)(1) of this section, and such regulation shall only become effective in accordance with this section.

"(h) The provisions of this subsection, subsections (a)(1) and (3), subsection (e), and subsections (i) through (l) of this section are enacted by Congress—

"(1) as an exercise of the rulemaking power of the Senate and the House of Representatives, respectively, and as such they are deemed a part of the rules of each House, respectively, but applicable only with respect to the procedure to be followed in that House in the case of joint resolutions, and they supersede other rules only to the extent that they are inconsistent therewith; and

"(2) with full recognition of the constitutional rights of either House to change the rules (so far as relating to the procedure of that House) at any time, in the same manner and to the same extent as in the case of any other rule of that House.

"(i) Except as provided in subsection (1) of this section, joint resolutions shall, upon introduction or receipt from the other House of Congress, be immediately referred by the presiding officer of the Senate or the House of Representatives to the appropriate committee of the Senate or the House of Representatives, as the case may be.

"(j)(1)(A) Except as provided in subparagraph (B) of this paragraph, if the committee to which a joint resolution has been referred does not report such resolution within 30 days of continuous session of Congress after the date of transmittal to the Congress of the recommended regulation to which such joint resolution relates, it shall be in order to move to discharge the committee from further consideration of such resolution.

"(B) If the committee to which a joint resolution transmitted from the other House has been referred does not report such resolution within 30 days after the date of transmittal of such resolution from the other House, it shall be in order to move to discharge such committee from further consideration of such resolution.

"(2) Any motion to discharge under paragraph (1) of this subsection must be supported in the House in writing by one-fifth of the Members, duly chosen and sworn, and in the Senate may be made by one Senator, and is highly privileged in the House and privileged in the Senate (except that it may not be made after a joint resolution has been reported with respect to the same regulation); and debate thereon shall be limited to not more than one hour, the time to be divided in the House of Representatives equally between those favoring and those opposing the motion to discharge and to be divided in the Senate equally between, and controlled by, the majority leader and the minority leader, or their designees. An amendment to the motion is not in order.

"(k)(1) Except as provided in paragraphs (2) and (3) of this subsection, consideration of a joint resolution shall be in accord with the rules of the Senate and of the House of Representatives, respectively.

"(2) When a committee has reported or has been discharged from further consideration of a joint resolution, or when the companion joint resolution from the other House has been placed on the calendar of the first House, it shall be in order, notwithstanding the provisions of rule XXII of the Standing Rules of the Senate or any other rule of the Senate or the House of Representatives, at any time thereafter (even though a previous motion to the same effect has been disagreed to) to move to proceed to the immediate consideration of either such joint resolution. The motion is highly privileged in the House and privileged in the Senate and is not debatable. An amendment to the motion is not in order.

"(3) Debate on a joint resolution shall be limited to not more than two hours (except that when one House has debated the joint resolution of that House, the companion joint resolution of the other House shall not be debatable), which shall be divided in the House of Representatives equally between those favoring and those opposing the resolution and which shall be divided in the Senate equally between, and controlled by, the majority leader and the minority leader, or their designees. A motion further to limit debate is not in order. An amendment to, or motion to recommit, the joint resolution is not in order. A motion to reconsider shall be in order only on the day on which occurs the vote of adoption of the joint resolution, and shall not be debatable. Any other motions shall be decided without debate.

"(l) If a joint resolution has been ordered reported or discharged from the committee of the House to which it was referred, and that House receives a joint resolution with respect to the same regulation from the other House, the resolution of disapproval of the other House shall be placed on the appropriate calendar of the first House. If, prior to the disposition of a joint resolution of one House, that House receives a joint resolution with respect to the same regulation from the other House, the vote in the first House shall occur on the joint resolution of the other House.".

Mr. KASTEN. For the benefit of the Senate, I simply suggest that the modification I have just made is a technical one, but I think it is an improvement. Senator LEVIN and Senator GRASSLEY worked with me in making this modification, and I thank them and appreciate their help.

The amendment is modified to add—and I will read the words. It is on page 7 of my amendment, "Any motion to discharge under paragraph one of this subsection must be supported in writing by," and we inserted the words "in the House in writing by one-fifth of the Members duly chosen and sworn" and then said, "and in the Senate may be made by one Senator."

Mr. President, this is simply the procedure under which the process will be expedited. This is a better description of the process which, in fact, we meant to have in place. I am also told that the Parliamentarian has reviewed this language and it is consistent with the House and the Senate procedures as they exist today.

Mr. FORD. Will the Senator from Wisconsin answer a question. Does this change the rules of the Senate in any way?

Mr. KASTEN. No, this does not change the rules of the Senate in any way.

Mr. FORD. Has the Parliamentarian agreed that it would not require a rules change?

Mr. KASTEN. It is my understanding in checking with staff that the Parliamentarian has agreed that this would not require any rules change in the procedures of the Senate.

Mr. FORD. Mr. President, I should like to make a parliamentary inquiry, if I may. Does this amendment, submitted by the distinguished Senator from Wisconsin, have any possibility of requiring a rules change of the Senate?

The PRESIDING OFFICER. It in effect sets up a special rule for the consideration of this specific item.

Mr. FORD. So it sets up a special rule for the Senate.

Now, a further parliamentary inquiry, Mr. President. When you set up a special rule, does that automatically make a rules change? Is there any additional vote required to carry out that special rule by the Senate? What are the procedures that are required by the Senate if you make a special rules change?

The PRESIDING OFFICER. Under the precedents of the Senate, unless this is an amendment to the Standing Rules of the Senate, it does not come under the special procedures required for a rules change.

Mr. FORD. I thank the Chair.

Mr. LEVIN. Mr. President, I am delighted that my friend from Wisconsin has offered a significant legislative veto amendment. It does not go quite as far as Senator GRASSLEY and I and a number of our cosponsors would like. Therefore, after the disposition of the Kasten amendment, assuming, of course, it is adopted, Senator GRASSLEY and I will be offering an amendment which would add some additional teeth to the legislative veto. We think it is important that this amendment be voted on first and hopefully approved. So I ask unanimous consent that I along with Senator GRASSLEY be added as cosponsors of the Kasten amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEVIN. Mr. President, back in 1980, on an FTC bill, we voted on a so-called Levin-Boren amendment. That amendment provided for legislative veto very similar to the one which is being offered today by Senator KASTEN and again which I and Senator GRASSLEY have now cosponsored. I know that other of cosponsors would like to cosponsor this amendment, but we will wait to hear word from them.

Senator BOREN, Senator DECONCINI, and others have been extremely supportive of the legislative veto. But back in February 1980, we had a vote on legislative veto on an FTC bill, and the vote was 87 yeas and 10 nays. So we have come a long way over a period of time, but essentially we have come back to where we started. Senator BOREN and I, back in 1980, offered to that FTC bill, as I have indicated, one amendment which is very similar indeed to the one before us, a two-House veto which must be in turn submitted to the President; in other words, a legislative veto by joint resolution. Eighty-seven Senators, an historic number for legislative veto in the Senate, supported that legislative veto amendment.

Mr. President, what is of extreme importance to us today is that the legislative veto which we adopted back in 1980 contained an expedited procedure for consideration of the joint resolution by the Congress, just the way the Kasten amendment before us contains an expedited procedure. There is nothing new about the Senate voting to expedite a vote on a joint resolution of disapproval of a regulation. There is nothing new about it. We have voted for that on a number of occasions—back in 1980, but we also voted on that on S. 1080 in 1982. So in 1980, we voted for an expedited procedure by a vote of 87 to 10, and in 1982, by unanimous vote of the Senate, we voted for an expedited procedure on legislative veto. There is nothing new—let me repeat, nothing new—about expedited procedure on a legislative veto. As a matter of fact, that is the heart of the legislative veto bill.

The Supreme Court told us, in Chadha, that we could not veto by one House. They said one House of Congress cannot veto a regulation. They told us that two Houses of Congress cannot veto a regulation unless the resolution of disapproval is submitted to the President. In other words, it must be a joint resolution of disapproval.

What is left, if we want to have legislative veto in fact, is that we have an expedited process, to be sure that if Congress, by majority vote wants to disappprove a regulation of the bureaucracy because it does not comply with the will of Congress, the majority of Congress will be able to act.

That was the purpose of the expedited procedure in 1980 which passed in the FTC bill by a vote of 87 to 10. That was the purpose of the expedited procedure in 1982, when, on S. 1080, we adopted an expedited procedure. That is the heart of legislative veto.

If we do not have an expedited procedure on a joint resolution of disapproval, we have nothing left. Congress then can be thwarted. The majority of Congress could then be thwarted even though that majority is determined to veto a regu'ation by a bureaucracy because it is not complying with the will of Congress.

What we are deciding today is the same issue we decided in 1980, the same issue we decided in 1982, by overwhelming votes. It is nothing novel; it is nothing new. It is the same expedited procedure vote which is the heart of what legislative veto is now all about.

What we say in this amendment is that Congress should have an opportunity to review the regulations of the bureaucracy. We pass the laws, but this fourth branch of Government administers the laws. Too often, they are distant from the people.

We have constituents who go into these agencies and they are told over and over again, "That is the way it is going to be." Then they come to their elected officials, and their elected officials too often tell them, "Gee, we can't do anything about the regulations. That was done by some agency over 500 miles away from where you live, or 2,000 miles away from where you live. Go and see the agency." That is what our constituents are told, "Go to see that commission. Go to the FTC. Go to some other agency," the name of which is probably unfamiliar to the constituent.

So our constituents tell us, "Wait a minute. We didn't elect the Chairman of the FTC. We elected you. We want you to do something about this regulation."

Too often Congress has ducked. So we have abdicated the legislative responsibility to unelected bureaucrats and agencies who then tell our constituents, "Sorry, that's the way it is." We can no longer hide. In 1980 we had the courage to say, by a vote of 87 to 10 on an FTC bill, that we will not hide, that we are willing to take the responsibility for the regulations of the FTC. We did this generically for all agencies of Government, with few exceptions, back in 1982 when S. 1080 was passed.

Most of us have committed ourselves to this principle—that regulations of agencies which so affect the lives of our constituents should be subject to the review of Congress. That is the fundamental issue on which we are voting again here.

Again I say that it is not new. At least twice before, the Senate, by overwhelming votes, adopted expedited procedures in legislative veto bills. It is not new. The principle is not new either. The principle is as old as democratic government.

Who is accountable to the people of the United States? Is it unelected folks who work in these agencies, who never have to run for election or reelection, or is it the elected officials in Congress and the White House who are responsible to the people?

Let me assure all my colleagues that too often we have been faced with constituents who have come to our office in a fury because they do not know where to turn for democracy to func-

tion in a real way in their lives. They want people accountable to them, who they elected, to stand up on these major regulatory issues and decide whether or not these regulations carry out the congressional will. That is the simple issue: Representative government and democratic government versus the unaccountable, the undemocratic, which is too often represented in the agencies which write these regulations.

We are here today because of Chadha. In June 1983, the Supreme Court decided that Congress would have to act by a joint resolution of disapproval if it wanted to disapprove regulations of the agencies. This amendment complies with Chadha. Of that there is surely no doubt, because it is a joint resolution of disapproval which is at the heart of the matter before us.

So there is no problem as to the constitutionality of the pending amendment. The only problem is whether or not we are going to continue to have the gumption and the will to do what our people want us to do, which is to say, "We are accountable to you. We are responsible."

The question is whether we are willing to stand up and judge whether or not these major regulations, which have such impact over the lives of our constituents, represent the will of the majority of elected officials in the Congress of the United States. It is the fundamental issue which again we are being asked to decide. We are doing it constitutionally.

In closing, I hope this amendment will be adopted by the same kind of large margin by which similar amendments have been adopted before. If that comes to pass, at that point Senator GRASSLEY and I will be offering an additional amendment which will put additional teeth into a legislative veto.

We feel that it is important that this amendment be adopted by an overwhelming vote. It is because this amendment represents much thought over many years that we are happy to cosponsor the amendment with Senator KASTEN, and we hope it receives an overwhelming vote of approval by the Senate.

Mr. FORD. Mr. President, let me state to my distinguished colleagues that it will be some time before we reach a vote on this particular measure. If the distinguished floor manager wishes to move on to other amendments, he might want to set this amendment aside and discuss, and probably adopt, other amendments that have nothing to do with legislative veto or expedited procedures.

I give my distinguished colleague that bit of information so that if he wishes to do that, I will be glad to accommodate him. As long as we do not vote on an amendment that has legislative veto, or a rose by any other name, and expedited procedures, I am willing to agree to that. Otherwise, I would have to object to any procedures.

Mr. KASTEN. Mr. President, will the Senator yield for a question?

Mr. FORD. I am glad to.

Mr. KASTEN. We are talking about a temporary delay of a couple of hours or so this afternoon and we could get off of this debate and switch back on to this. I know it is the intention of the majority leader and I believe the leadership on both sides that we try to proceed as expeditiously as we can with the work of the Senate and not only finish this bill before this evening but also get to work on a couple of other things which the majority leader announced last night. So what we are talking about is a short term.

Mr. FORD. I cannot give the distinguished floor leader a time certain. The only thing I am saying to him is that several committees are meeting this afternoon. The majority leader and minority leader both are required to be in attendance at these meetings. I have been informed by my side that I am to protect the floor as it relates to any consideration of legislative veto or any amendment that might have the expedited procedures.

If the distinguished Senator wants to think about that a while, I will be glad to talk a while. If he wants to set this one aside and move on to another amendment or two we might have, I would be more than pleased to be supportive. Otherwise, I am prepared to talk a while.

Mr. KASTEN. If the Senator will further yield for a question, would he agree with me that we might be able to at least complete part of the debate? I know the distinguished Senator from Iowa would like to speak on this amendment or there may be a couple other Senators here who would like to speak on the amendment. During the time we are speaking on the amendment, we might be able to notify other Senators that their amendments could be coming up in order, and then by unanimous consent we could set this amendment aside after we have completed debate but before we had a vote on final consideration of the amendment. Would that be agreeable to the Senator?

Mr. FORD. It certainly would as long as, if they want to talk, that satisfies my position.

May I ask the distinguished floor leader, I see four amendments that could be considered, my amendment calling for report on predatory pricing; the McClure amendment adding with changes the compromise language agreed to by FTC and AMA on professionals; the Grassley-Levin amendment giving Congress legislative veto over the Consumer Product Safety Commission and FTC rules; and then Senator KASTEN's amendment as it relates to the legislative veto, I presume, over Consumer Product Safety Commission and the FTC rules.

Are there any amendments known to the distinguished Senator beyond those?

Mr. KASTEN. If the Senator will yield, I know of no other amendments.

What I would suggest is that we allow the distinguished Senator from Iowa to complete his presentation on this issue. I then would ask unanimous consent that we go off of the debate on this amendment. We are prepared, as the Senator knows, to cooperate with him on his predatory pricing amendment, although there may be some debate on both sides, and it would be my intention then to try to move to the professions' question and to notify those Senators who are interested in that amendment that they should come to the floor and be prepared.

We will by unanimous consent switch off of this subject, once we complete the debate and try to come back to the other.

Mr. FORD. I have no problems with any of that. Does the Senator anticipate a record vote as relates to predatory pricing?

Mr. KASTEN. I do not at this time.

Mr. FORD. He does anticipate a vote on Senator MCCLURE's amendment as it relates to the professions?

Mr. KASTEN. I believe so.

Mr. FORD. And then we will have votes on the legislative veto and probably then final passage.

Mr. KASTEN. The Evans amendment is still one.

Mr. FORD. What Evans amendment?

Mr. KASTEN. There is an Evans amendment I was just notified of within the last 2 or 3 minutes. It has to do with the CAFE standards.

Mr. FORD. My goodness, we will never get this bill finished this week if we allow that amendment to come up when the committee has already withdrawn it. It did not have enough votes to pass it in committee. If they are going to bring that amendment to the floor as it relates to CAFE, the Senator might as well just bring his sleeping bag or take his trip to Mandalay.

Mr. KASTEN. As the Senator knows, both of us hoped that amendment will not be pressed. I think there is an opportunity it may be debated and not pressed. I was just notified of the intention of the Senator from Washington at least to come forward with an amendment. I would hope also that it not be, because it would involve us in a long, long arduous kind of debate, and I do not think we want that if we can proceed with the work of the Senate.

At this time I yield the floor, and we will go forward.

Mr. GRASSLEY. Mr. President, I wish to address today what I consider to be the "forgotten element" of the economic recovery program we helped set forward in 1981, and that forgotten element, of course, is regulatory reform and keeping bureaucracy under control.

I am sure all Americans are aware of our work in reducing taxes, and even today on the Senate floor, we will be continuing our battle to reduce Federal spending. But after an initial flurry of activity, we seem to have allowed the momentum to slip away on the other priority we set in 1981, and that was regulatory reform.

The dangers to our system of an unfettered Federal regulatory apparatus have long been recognized to be equal to those of growing Federal spending and taxation.

Senator Robert Taft from Ohio back in 1943 said this, and remember that he was one of the five Senators that we recognize as the greatest Senators of all time. His picture is out here with four other Senators in the reception area of the Senate. He warned in 1943 of the dangers about the spreading reach of the Federal Government.

He said:

> In order to prevent tyranny, the founders divided even the limited powers given the Federal Government between the President, Congress, and the courts, in order that no one might have the domination over the individual which would submerge his life in that of the Government. Today, that division is threatened. Administrative boards are established which make their own laws, administer the laws which they make, and then hear the cases which they themselves bring for the violation of their own laws.

Then Senator Taft goes on to say:

> As a result, we have seen * * * a complete elimination of any sense of justice and fairness. Men are coming to shrug their shoulders with helpless indifference, who should be burning with indignation. If continued, it will undoubtedly destroy that cornerstone of American character: a deeply ingrained resentment against injustice.

If Senator Taft had lived until the decade of the 1970's, he would have seen his warning about the tyranny of administrative agencies come to pass through the activities of Commissions like this one we are considering in this legislation, the Federal Trade Commission. And as we consider a new authorization for the FTC and mull the future of regulatory reform efforts, it is important to look back at the late 1970's and to remember what has happened to us.

The FTC was so activist back in those years that the Cincinnati Enquirer editoralized that "If the FTC * * * had had its way, not a sparrow would have fallen to Earth anywhere in America without the FTC's sanction."

In 1980, our former colleague Senator Jack Schmitt pointed out that the FTC was simultaneously considering rulemaking in more than 20 areas. These proposed regulations literally ranged from the cradle, as exemplified by the regulations of children's television advertising, to the grave, as exemplified by rules on funeral homes. And Senator Schmitt, if anything, understated that case; he left out the FTC's interference into insurance, agricultural cooperatives, and trademarks.

It seemed the FTC thought its mission was, to paraphrase "Star Trek's" Captain Kirk, to boldly regulate where no Federal agency has ever regulated before.

But even worse than the FTC's half-cocked, scattershot activism was the agency's employment of methods that would offend anyone's sense of "justice." In instances like the children's advertising investigation, the agency stretched its mandate by investigating practices that were not really unfair—but merely unpopular with its staff of social engineers.

The agency in many cases conducted fishing expeditions in which they harrassed legitimate businesses with subpoenas for volumes of information without discussions or an explanation of the purposes. They often acted in secret, off-the-record, and without a full investigation of the effects of the proposed regulation on the industry involved.

And worst of all, the staff was described as "arrogant" and "indifferent." And the reason for that arrogance is that the staff of the FTC in the 1970's, and to some extent the Commission members, had no regard for the market, for our system of federalism, for the people of our Nation, or for the sense of justice Senator Taft so rightly ascribed to American society in that 1934 speech.

Their only regard was for their own sense of justice and order, and for the imposition of that order on society.

So our experience with the FTC proved Senator Taft right in a sense. But it also proved him wrong. Because our resentment of justice was assailed by the FTC—but it was never destroyed. Thankfully, some truly tenacious Members of Congress—including our former colleagues Jack Schmitt and Elliott Levitas, and Congressman JIM BROYHILL, who is still in the other body—saw what was happening.

They stood up to the FTC and its entrenched supporters, fighting to control that Agency to the extent that at one point the FTC actually closed down for lack of money. And finally, Mr. President, they along with my distinguished colleagues, Senators LEVIN and BOREN, pulled in the reins on this runaway agency in 1980.

Now these gentlemen I have mentioned so far are really pioneers in this area of getting this runaway bureaucracy under control. They limited substantive activity in several areas of proposed regulation. But, even more important, they established for the first time a congressional veto over FTC rulemaking.

This authority has been exercised to review regulations involving games of chance, and the funeral industry. And it has been used to veto proposed FTC regulations involving the used car industry.

The activities of the legislators I mentioned and many others paved the way for later regulatory reform efforts. The FTC legislative veto provided the model for the Schmitt-Grassley-Levin-Boren legislative veto provision that was passed by the Senate as part of a comprehensive regulatory reform bill in 1982 by a vote of 94 to 0, and many of the other provisions of that comprehensive legislation found their genesis in the 1980 FTC amendments.

But our efforts to expand Congress' reaffirmation of its prerogatives to other agencies suffered a setback in 1983, when the Supreme Court—in a really supreme overreaction—declared all legislative veto provisions unconstitutional in the Chadha decision.

However, not giving up, Senator LEVIN and I, along with Senators DOLE, THURMOND, LAXALT, BOREN, DECONCINI, SIMPSON, HATCH, and DENTON, have devised a congressional veto provision which meets the requirements of Chadha—passage by both Houses of Congress, plus that very important approval by the President that the Supreme Court found fault with that did not exist in previous vetoes—but with an added twist. This twist is the only difference between the Kasten approach and the approach that I favor that Senator LEVIN and I have been working on. And I would like to just mention a little bit the uniqueness of this twist. The passage of the joint resolution by both Houses of Congress triggers expedited procedures for an amendment to an appropriations bill which would limit the use of Government funds to implement the disapproved rule.

Today we are proposing an amendment to the FTC authorization that would establish this veto authority over FTC and consumer product safety commission rule-making. The Congress has resolved the issue of whether these agencies' rules should be subjected to a legislative veto. That is legislative history pioneered by Senator LEVIN. Today we will merely be conforming the existing vetoes in these laws to the Supreme Court mandated rules in Chadha.

Allow me also to point out that many of the specific problems I referred to earlier have been corrected under the able leadership of the present Commission chairman, Jim Miller. Under his leadership, the FTC has regained the perspective and sense

of justice sorely lacking prior to the Reagan administration.

But we should not allow personalities to cloud our objectivity on this issue. The fact that Jim Miller is leaving the FTC and, for that matter, Ronald Reagan is not always going to be President. The potential for abuse is going to remain beyond their tenure, and abuse has been evidenced and proven. There has been legitimate reaction to it, legitimate changes made to that abuse, and so it is a certainty in the future. And it is important that we maintain, hence, the precedent of congressional review in anticipation of the day in which it will be needed at that time when there is abuse.

Most importantly, I think it is so important that we keep the bureaucracy subject to the will of the electorate. And that is not going to be done except through the branch that we serve in, the Congess of the United States.

I would like to say that even during their tenure the possibilities exist that rules will be proposed that extend beyond the intent of Congress. I am saying even when you have the best of people there on these commissions, even when people are not purposefully trying to extend the law through regulation, there is a possibility of danger. An example of that is the used car rule that I mentioned earlier. I continue to receive letters warning of continued FTC pressures to regulate the self-regulating professions such as the legal and medical professions, regulations that so historically and so long term have been left to the indidual States. But even beyond those practicalities lies the real issue. As Senator Taft pointed out in 1943, it was to avoid the kind of tyranny that we saw in the late 1970's that the Founding Fathers divided the power among three branches. The American people simply have the right to control the activities of the Federal Government through their elected representatives. And we have that constitutional responsibility to see that is done.

The legislative veto is the only method that I can conceive of that would allow both this measure of control and the delegation of powers Congress has made to agencies such as the FTC and the Consumer Product Safety Commission.

Mr. President, because of the Sensitivities of our Founding Fathers resulting from the injustices perpetrated upon them without due process of representation, our system has always been set up, always to require that the Federal Government meet a large burden before depriving Americans of life, liberty, or property.

If we are to maintain what Senator Taft described as "the cornerstone of American character, a deeply ingrained resentment against injustice"—let me say that again because that is Senator Taft speaking. What he described as "the cornerstone of American character, a deeply ingrained resentment against injustice"—we must ensure that Federal agencies continue to bear the burden of demonstrating the need for new regulation and that Congress continues to bear the burden to protect the public from unjust action reinstating the congressional veto—which Senator LEVIN and I are now cosponsoring with all the other Senators who sponsored the Kasten amendment. Keeping the congressional veto, reinstating it over the FTC and the Consumer Product Safety Commission regulations will be an important, symbolic step in that process.

So the only obvious differences I have with the Senator from Wisconsin as 100 percent right as he is, I guess I feel that the extent to which we can have an expedited procedure through the appropriation process on issues where Congress has, in fact, expressed itself through a veto that we ought to have those expedited procedures. And those are going to be the subject of an improving amendment suggested by myself and Senator LEVIN.

Before I relinquish the floor I want to read a letter that I have, dated today, from the National Federation of Independent Businesses. The same letter has gone to Senator LEVIN as well as to myself. I would like to read from John Motley III who signed it, the Director of Federal Legislation.

On behalf of the more than half million small business owners who belong to NFIB, we would like to express our support for the Grassley-Levin legislative veto amendment to S. 1078, the Federal Trade Commission Reauthorization bill.

For the small business owner, legislative veto offers an avenue of appeal against burdensome and unfair government regulation which does not now exist. Small business owners cannot afford to hire a team of lawyers to fight unwarranted government regulation, but they can appeal to their representatives in Congress. The legislative veto mechanism embodied in your amendent provides an effective and constitutional means of assuring that the Congress, the elected representatives of the people, have the final say over rules and regulations issued by unelected officials in the administrative agencies.

NFIB believes the Grassley-Levin approach is a good alternative in establishing better congressional control over the bureaucracy. It is a good compromise which could break the stalemate which has existed over legislative veto since the 1983 Surpeme Court decision.

For this reason, support for this amendment will be considered as one of NFIB's key small business votes for the 99th Congress.

I hope you will remember that it was just earlier this week this body by a vote of 95 to 2 approved equal access to justice reauthorization, and extension—let me say permanent reauthorization, extension of it to other areas, and important improvements in it. Why? Because we were mostly concerned about small businesses in this country not being able to fight the bureaucracy. The General Motors, the Chryslers, all the defense contractors that are so big with such resources, with a team of lawyers, are right there with all the ammunition and all the resources they need to challenge any regulation at any time in the administrative process or in the courts wherever they see the need to do it. But those same regulations that apply to the General Motors, the Chryslers, and the defense contractors—remember, there are no defense contractors going broke—the same regulation applied to the little mom and pop grocery stores, they apply to the small farmers, and those little operators, those little business people, do not have the resources to fight the bureaucracy.

So the name of the game around Washington when faced with runaway bureaucracy as a result basically from Congress delegating too much authority—at least too much uncontrolled authority—is how do you bring justice to the unequal opportunity of defending that the mom and pop grocery stores do not have versus the General Motors? And equal access to justice is one of them. But surely the congressional veto is even more of an important process. The courts and the adjudicatory bodies in the administrative branch of Government do not often serve the purpose of justice that they ought to.

Mr. FORD. Will the distinguished Senator yield for a question?

Mr. GRASSLEY. Yes.

Mr. FORD. Where does this act that is now before the Senate apply to the farmer?

Mr. GRASSLEY. It would apply in any instance even beyond—talking about the act or the concept of the congressional veto?

Mr. FORD. I am talking about the act. The Senator was awfully strong about how this is doing things to the farmer and the Senator's legislative veto goes to the FTC. It does not go to the agricultural bill. The Senator will have the opportunity on that. I think the Senator ought to narrow his scope instead of painting with a broad brush.

Mr. GRASSLEY. Unless I am violating rules of the Senate, and if I am not, I would like to speak in the generic sense. But the Senator is absolutely right in pointing out that the congressional veto that we are talking about at this point is applicable just to the two agencies—the FTC and the Consumer Product Safety Commission.

Mr. FORD. The only thing I am asking, the Senator is not violating any rules. I am just trying to narrow your debate instead of painting with a broad brush. The legislative veto that

the Senator is proposing now is not generic. It is singular as it relates to FTC.

Mr. GRASSLEY. That is right. But unless I am offending the Senator by the broad brush I am using——

Mr. FORD. I am trying to get the Senator into the perspective of the legislative veto as it relates to FTC.

Mr. GRASSLEY. I am well aware that I am speaking more broadly than I probably should.

Mr. FORD. I thank my colleague.

Mr. GRASSLEY. But I think that it is so necessary that we establish this principle, which we are doing through the congressional veto applicable to these agencies, reestablishing this principle that has been used probably nearly 300 times in legislation since the early 1930's reestablishing this principle for the first time since the Chadha case, which kind of changed the rules. It is in this vein, I say to the Senator from Kentucky, that I am speaking so generically.

It is so important that we bring some opportunity for the small business people and even the farmers to have the capability of fighting. As I said, we did that earlier this week through the Equal Access to Justice Act. We are doing it now through the FTC reauthorization, as the legislative veto might apply to that.

In the case of the FTC affecting farmers, I can suggest to the Senator from Kentucky that the FTC was about ready to get into the whole regulation of farmer's cooperatives. But I think we stopped that in the last few years.

Regulations within that area, subject to a legislative veto, would be helpful to the farmers in Kentucky as well as Iowa.

Mr. FORD. I understand that. But we took care of that by law and we did not have to have a whipping boy downtown cranking out regulations. We wanted to get rid of an agency we created.

Mr. GRASSLEY. I can argue with the Senator from the same point, that sometimes we do not put the proper role on the delegation of authority that we give away.

But there is a process here created in which this body and the other will be able to serve as a more effective referee between the bureaucracy and the people they have tended to hurt, mostly those people who do not have the resources to fight.

In that sense, when I read a letter from the National Federation of Independent Business, that is a very large organization representing the small businesses. They see the importance of this vote on what will later be the Grassley-Levin perfecting amendment. They are willing to list this as one of their key votes for this session. I think that speaks to the importance of what this body is considering at this time.

Mr. President, I ask for the yeas and nays on the Kasten amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is not a sufficient second.

Mr. FORD addressed the Chair.

The PRESIDING OFFICER. The Senator from Kentucky.

Mr. LEVIN. Will the Senator yield for a brief correction that I would like to make for the RECORD?

Mr. FORD. I would be delighted to yield without losing my right to the floor, Mr. President.

The PRESIDING OFFICER. The Senator from Michigan.

Mr. LEVIN. Mr. President, I indicated in my statement that in 1980 we approved expedited procedures on the legislative veto. That approval took place on the conference report on FTC rather than the vote in the Senate. I was in error when I said that the Senate voted on that matter separately 87 to 10 in 1980. Its approval came on the conference report on the FTC in 1982. However, I was correct that the Senate specifically on a legislative veto voted 69 to 25 on S. 1080 to approve a legislative veto with the expedited procedures. So both in 1980 and 1982 we approved the expedited procedures on the legislative veto. In 1980 in a conference report to the FTC bill the expedited procedures were added in the House after the Senate voted its amendment. It was 1982 that we did approve expedited procedures on the legislative veto by a vote of 60 to 25.

I thank my friend from Kentucky for allowing me to clarify the RECORD in this matter.

Mr. FORD addressed the Chair.

The PRESIDING OFFICER. The Senator from Kentucky.

Mr. FORD. Mr. President, there are more ways that one to skin a cat. That is what we are trying to do here today. I have been opposed to the legislative veto ever since I arrived in the Senate. In the beginning I was opposed to it because it is unconstitutional. Yet my colleagues went ahead and passed it and on two separate occasions the courts found that our legislative veto was unconstitutional, the Chadha case and then on the Gas Policy Act, more emphatic in July 1983, June or July 1983.

I was somewhat vindicated being opposed to the legislative veto. I was somewhat vindicated when the Supreme Court said that those of us, even though we wound up in a minority, were correct.

What really disturbs me about the legislative veto is the fact that we, the Congress, create an agency that we say will carry out our policy. Then when they do something wrong and our constituents start jumping on us, we just squeal. We run up here and try to find a way to put a cap on that agency that we created. We have the ability to do it now. If you cannot get it passed, you cannot do it anyhow.

How many of these regulations are you going to look at personally? You are not going to look at very many unless your constituents come at you about something. Otherwise, they are going to be cranked out just like they are now.

My distinguished friend from Iowa, Senator GRASSLEY, talked about the problems with the co-ops that we protected through a bill which expired in 1982. The problem is settled in this bill, if it passes. So we have done what we should do about the legislative process.

Now we have to stand up here and say we have to protect little folks down home; we have to get after these agencies; they are in the nooks and crannies over there somewhere just cranking them out on a mimeograph machine, all of these regulations popping out.

Why do we not stop them? No; you want to beat your chest for reelection and say that we are going to stop these agencies from doing anything to mom and pop, that the defense contractors have big sets of lawyers and can do anything they want to, and they go to the agency and fight. Why not worry more, as the Senator from Iowa does, about the cost of our military equipment, the overpricing of all these military parts, $640 for a commode seat and $495 for a screwdriver?

That is where we ought to be putting our attention. If you do not like what the agencies do downtown, change the law.

No; we have to get up here and wiggle around with a little amendment, hoping it will be constitutional. Then we have to pass it here, pass it over there, and send it to the President. It is almost like the line-item veto. Every time you get a regulation you have to make a bill out of it, run it through Congress, and send it to the President who is trying to do other things, who does not have time to fool with a veto of a legislative veto.

Mr. President, I will have more to say about this later, but it bothers me, because we have created an agency and when they do not do what our constituencies what them to do, or they can begin to jump on us, we start trying to find a way to put the brakes on.

We have had the brakes to put on ever since we have been elected. We have had that authority and that ability. That is what this Chamber is all about; that is what our committee meetings are all about. If you do not like what the Executive is going, go talk to your President; tell him to stop them.

I thought it was going to be cleared up when I heard all this beating of chests about how great it was going to

be. Come to find out it is just as bad today as it has ever been, if not worse. And there we are, right out front, wanting to get rid of the legislative veto.

Mr. President, I hope that neither one of these amendments will be passed and that we will begin to do what we should do—oversight. If every committee on the Senate side would have 10 days of hearings, we would clean up a lot of things and spend 10 days at it and not all the money that it is going to cost by trying to develop legislative veto.

What you are doing is abdicating what you were sent here to do; you are abdicating what you were sent here to do when you want to get a legislative veto through.

Mr. President, I shall have more to say about this later. I yield the floor.

Mr. KASTEN. Mr. President, that concludes, I believe, this portion of the debate on legislative veto. We might revisit this subject a little bit later in the afternoon.

I ask unanimous consent that the legislative veto amendment be set aside in order to consider an amendment by the Senator from Kentucky dealing with predatory pricing and that, immediately thereafter, the amendment pending on legislative veto be in order.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

AMENDMENT NO. 543

(Purpose: Add provision requiring report regarding predatory pricing practices)

Mr. FORD. Mr. President, I have an amendment which I send to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the amendment.

The assistant legislative clerk read as follows:

The Senator from Kentucky [Mr. FORD] proposes an amendment numbered 543.

Mr. FORD. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 16, insert the following immediately after line 2:

REPORT ON PREDATORY PRICING PRACTICES

SEC. 16. (a) The Federal Trade Commission shall submit to the Committee on Commerce, Science, and Transportation of the Senate and to the Committee on Energy and Commerce of the House of Representatives the information specified in subsection (b) of this section every 6 months during each of the fiscal years 1986 and 1987. A report containing such information shall be submitted when the Commission submits its annual report to the Congress during each of such fiscal years, and such report may be included in the annual report. A separate report containing such information shall be submitted 6 months after the date of submission of any such annual report. Each such report shall contain such information for the period since the last submission under this section.

(b) Each such report shall list and describe, with respect to instances in which predatory pricing practices have been suspected or alleged—

(1) each complaint made, orally or in writing, to the offices of the Commission;

(2) each preliminary investigation opened or closed at the Commission;

(3) each formal investigation opened or closed at the Commission;

(4) each recommendation for the issuance of a complaint forwarded by the staff to the Commission;

(5) each complaint issued by the Commission;

(6) each opinion and order entered by the Commission;

(7) each consent agreement accepted provisionally or finally by the Commission;

(8) each request for modification of an outstanding Commission order filed with the Commission;

(9) each recommendation by staff pertaining to a request for modification of an outstanding Commission order; and

(10) each disposition by the Commission of a request for modification of an outstanding Commission order.

Such report shall include copies of all such consent agreements and complaints executed by the Commission referred to in such report. Where a matter has been closed or terminated, the report shall include a statement of the reasons for that disposition. The discriptions required under this subsection shall be as complete as possible but shall not reveal the identity of persons or companies complained about or those subject to investigation that have not otherwise been made public. The report shall include any evaluation by the Commission of the potential impacts of predatory pricing upon businesses (including small businesses).

Mr. FORD. Mr. President, predatory pricing is an issue which affects small business deeply and has been chosen as a priority issue by the Small Business Legislative Council.

I offer this amendment simply to require a periodic FTC report to Congress on the FTC response to predatory pricing complaints.

This amendment will assist Congress in its oversight function. It has been reported to us in testimony submitted for the FTC hearing record that the National Grocers Association is engaged in a struggle to insure that antitrust law enforcement promotes fair and effective competition. An FTC periodic report will further inform us about this situation.

Mr. President, I ask unanimous consent that letters in support of this amendment by the National Grocers Association, the National Association of Retail Druggists, and the Small Business Legislative Council be printed in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

NATIONAL GROCERS ASSOCIATION,
Reston, VA, July 18, 1985.

Hon. WENDELL H. FORD,
U.S. Senate, Russell Senate Office Building, Washington, DC.

DEAR SENATOR FORD: Your leadership on the issue of Federal Trade Commission (F.T.C.) accountability for its enforcement of laws prohibiting predatory pricing is greatly appreciated. The House of Representatives has already amended H.R. 2385, the F.T.C. Authorization Act of 1985, with language requiring periodic F.T.C. reports to Congress on its response to predatory pricing complaints. Your introduction of a similar amendment on the Senate bill, S. 1078—The Federal Trade Commission Act Amendments of 1985, will help to assure its adoption in conference.

N.G.A. represents the small business sector of the food distribution industry. Our membership includes over 2,000 independent retail grocers, 61 wholesale distributors serving over 28,000 retail food stores, and 60 state and local associations. Our members serve consumers in all fifty states.

For the past two years, we have been engaged in a very important struggle on behalf of retail and wholesale grocers throughout the nation to ensure that antitrust law enforcement promotes fair and effective competition in our industry. We have consistently requested the assistance of the Federal Trade Commission in this process. N.G.A. submitted a detailed statement to the Consumer Subcommittee on April 24 of this year expressing our concerns which is enclosed for your review.

We consider this issue to be of the utmost importance for the continued viability of the independent grocer. So long as the rules of the game are fairly enforced, the small businessman will continue to provide American consumers with products and services at prices that only fair competition can assure.

Your support for the predatory pricing amendment is symbolic of your concern for the American small businessman.

Sincerely,

THOMAS K. ZAUCHA,
President.

NATIONAL ASSOCIATION OF RETAIL DRUGGISTS,
Alexandria, VA, July 20, 1985.

Hon. WENDELL H. FORD,
U.S. Senate, Russell Senate Office Building, Washington, DC.

DEAR SENATOR FORD: Mr. Joe Schutte, P.D., President-Elect of the National Association of Retail Druggists asked that we express to you our strong support of your effort to amend the Federal Trade Commission Authorization Act of 1985. Your amendment, which requires semi-annual FTC reports to Congress on the particulars of predatory pricing complaints received by the agency, as well as investigations underway, and enforcement decisions, will certainly assist the FTC in focusing its limited resources on this inappropriate and illegal conduct which threatens small businesses, especially independent retail pharmacists.

Retail pharmacists worked shoulder-to-shoulder with retail grocers in the late 1920's and early 1930's in the effort which led to the enactment of the Robinson-Patman Act. Although the contemporary context is significantly different than that of the 1930's, the threat to such retailers is no less significant today. A July 10, 1985 report by the Subcommittee on Oversight and Investigations of the House Committee on Energy and Commerce entitled "Drug

Diversion" has focused the nation's attention on predatory pricing practices in the retail pharmacy marketplace. The Committee Report provides extensive documentation of the illegal diversion of prescription drugs from nonprofit institutions which purchase under the protection of the 1938 Nonprofit Institutions Act. Our members pay $9-$10 depending on whether they purchase directly from a manufacturer or from a wholesaler, while a nonprofit hospital pays $1 for the same prescription drug. Unless independent pharmacies purchase prescription drugs that have been illegally diverted from the nonprofit hospitals, such "discounts" are unavailable to them, irrespective of the volume purchased.

The Subcommittee Report sheds light on an extensive subterranean marketplace where purchasers, frequently retail drug chains, are obtaining diverted drug products at an incredible price advantage, against all competitors. Testimony presented to the Committee by Phillip Robinson, a licensed private investigator from the State of New York, indicated that there are several hundred diverters in the prescription drug marketplace "a few large companies appear to handle the majority of the product and seem to have developed a diversion process to the highest art." Mr. Robinson stressed that the goods are resold perhaps several times and that "large chain drug stores and large wholesale distributors are among the frequent customers of diverters."

As Charles M. West, Executive Vice President of The National Association of Retail Druggists, told the Kentucky Pharmacists Association at their annual meeting on July, 20, 1985 in Paducah, Kentucky, "This illegal drug supply network and the perversely low retail prices it makes possible, is being utilized by predators to put independent retail pharmacists out of business." Your amendment will send a clear and necessary signal of Congressional interest in what has been a lackluster law-enforcement effort regarding the predatory practices which threaten small businesses such as the independent retail pharmacies we represent. We will work with you in any way which, in your view, will help to facilitate our mutal objectives.

Once again, on behalf of our officers, Executive Committee, members, especially those in Kentucky such as our President-Elect, Mr. Joe Schutte and Mr. Charles Stone, a member of our Legislation and Government Affairs Steering Committee, and the owners of more than 30,000 independent pharmacies, where over 75,000 pharmacists dispense more than 70 percent of the nation's prescription drugs and provide more than 85 percent of the Medicaid pharmaceutical services, we commend you for your initiative on predatory pricing.

Warm regards,

JOHN M. RECTOR,
Director of Government Affairs.

SMALL BUSINESS LEGISLATIVE COUNCIL,
July 18, 1985.

Hon. WENDELL H. FORD,
U.S. Senate,
Washington, DC.

DEAR SENATOR FORD: Please accept the thanks and appreciation of the Small Business Legislative Council for your initiative in sponsoring a predatory pricing amendment to the Federal Trade Commission Reauthorization bill, S. 1078.

Predatory pricing is an issue which affects small business quite deeply. In fact, this issue has been chosen by the nearly 90 trade and professional associations who belong to our coalition as SBLC's Number 5 priority for the year. Our policy statement on this issue is enclosed as part of our 1985 Issues Report.

We are delighted to learn of your leadership on this issue from one of our most prominent members, the National Grocers Association. SBLC looks forward to working with you during the course of this legislation.

Sincerely,

GERALD P. NAGY,
Managing Director.

Mr. KASTEN. Mr. President, we have had an opportunity to review this amendment. The Senator is correct: Predatory pricing is an issue which seriously concerns small business. In fact, this issue has been chosen by the nearly 90 trade and professional associations which belong to the Small Business Legislative Council as one of their priority issues for 1985. I am pleased to accept the amendment of the Senator from Kentucky.

The PRESIDING OFFICER. Is there any further debate? If not, the question is on agreeing to the amendment of the Senator from Kentucky.

The amendment (No. 543) was agreed to.

Mr. FORD. I move to reconsider the vote by which the amendment was agreed to.

Mr. KASTEN. I move to lay this motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, at an appropriate time, when the distinguished minority leader is on the floor, I hope to propose a unanimous-consent agreement on S. 1404, a bill to require the President to respond to unfair trade practices of Japan. I will then recommend an hour of debate on the bill, equally divided, an hour of debate on all first-degree amendments, 30 minutes on all second-degree amendments, and 10 minutes of debate on any debatable motions in the hopes that we might be able to dispose of this legislation, if not today, tomorrow under some time agreement. We were very close at an earlier point, and I would hope we could move on this legislation.

With reference to the pending legislation, it is my understanding that we are making progress. I hope that Members who have amendments would not be bashful in coming to the floor and offering those amendments because we hope to dispose of additional legislation if at all possible today. If not, we will dispose of it tomorrow.

It is my understanding we may be able to dispose of two or three bills in what we call wrap up by unanimous consent when we complete the business of the day, and I will discuss those measures with the distinguished minority leaders.

Mr. President, I first suggest that Members come to the floor and, secondly, suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. KASTEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. WALLOP). Without objection, it is so ordered.

Mr. KASTEN. Mr. President, what is the pending business?

The PRESIDING OFFICER. The pending question is the amendment of the Senator from Wisconsin.

Mr. KASTEN. Mr. President, I ask unanimous consent that my amendment be temporarily set aside in order to consider an amendment from the Senator from Idaho, Mr. MCCLURE, and at the end of the consideration of that amendment that the Kasten amendment once more be the order before us.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. MCCLURE addressed the Chair.

The PRESIDING OFFICER. The Senator from Idaho.

Mr. MCCLURE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MCCLURE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 544

(Purpose: To create a rational framework for the regulation of professionals)

Mr. MCCLURE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Idaho [Mr. MCCLURE] proposes an amendment numbered 544.

Mr. MCCLURE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 2, after line 9, insert the following:

(b)(1) The Federal Trade Commission Act (15 U.S.C. 41 et seq.) is amended by redesignating section 24 and section 25 as section 27 and section 28, respectively, and by in

serting after section 23 the following new section:

"SEC. 24 (a) For purposes of this section:

"(1) The term 'professional' means any person who—

"(A) in the performance of his occupation, is subject to licensure or certification under State law; and

"(B) as a prerequisite for such licensure or certification under State law, has (i) received a degree from an accredited institution of higher learning, or (ii) successfully completed a course of specialized training at an accredited education or training facility for health professions personnel operated as an integral part of a hospital.

"(2) The term 'State law' means a statute of a State and a rule or regulation duly promulgated by a State agency or by a State court of last resort in its capacity as the State authority regulating the admission or licensure of professionals within a State.".

(b) The Commission shall not use its authority under this Act to prohibit unfair or deceptive acts or practices engaged in by professionals if such use of authority would result in the invalidation of a State law or any part of such law if such law or part establishes—

"(1) training, education, or experience requirements for the licensure of professionals; or

"(2) permissible tasks or duties that professionals may perform based on specialized training or education.".

Mr. McCLURE. Mr. President, my amendment is the product of 6 years of negotiations over the proper role of the Federal Trade Commission in regulating professions. It was accepted to my knowledge by all interested Senators at the end of last year's Senate session. I understand that in the hearings before the committee this year it was subject to further and subsequent negotiation and discussion. But at the end of last year's session it was accepted by the interested Senators as the best statement of this issue that could then be devised and agreed upon.

Basically, the amendment would prohibit the FTC from using its unfair or deceptive acts or practices jurisdiction to overruie the States with respect to questions of: First, who shall be licensed for practice in a particular profession; second, what jobs or tasks require a professional license if they are to be performed in a particular State?

This language was negotiated between this Senator and the Senator from New Hampshire [Mr. RUDMAN] and to my knowledge had the acquiescence of the distinguished chairman of the committee, the distinguished chairman of the subcommittee, and all other interested parties.

What has happened since last year? The answer is that one of the outside groups with an interest in the question has decided to change its position. The organized bar has made a determination that a portion of last year's language would adequately protect the legal profession, although it concedes to me that the language might provide considerably less protection for other professional groups.

The dentists, understandably, are not quite as happy in their new role as sacrificial lambs. I would like to read a letter I have just received from the American Dental Association, reiterating that group's support of the negotiated language, in preference to the new language which is being promoted by the organized bar.

The letter is dated July 23, 1985, and is addressed to me.

In response to an inquiry from members of your staff regarding the Association's position on the Federal Trade Commission authorization bill, I am forwarding a copy of our testimony before the Senate Committee on Commerce, Science and Transportation on April 24, 1985. This testimony summarized our position then, and it remains the same today.

At that time, Dr. John Bomba, President of the American Dental Association stated the following:

"We believe it would be much preferable for the Committee to retain the professions' language contained in last year's bill, S. 1714, with a technical amendment making clear that no expansion of FTC authority to invalidate state laws is intended. . . . With these provisions in place Congress and the courts, rather than the FTC, would define the limits of Commission authority to invalidate state laws in these critical areas of public health and safety."

I hope this letter and testimony are helpful in setting forth our position with respect to the need for statutory restraints to clarify that the Commission does not have authority to invalidate state laws relating to the dental and other professions.

Mr. President, I ask unanimous consent that a copy of this letter be placed in the RECORD following my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. McCLURE. Mr. President, I have not engaged in negotiations over this issue for 6 years in order to reach a solution which would please one special-interest group or another. My goal was to negotiate a package that would embody good law. I believe my amendment achieves that goal. I also believe that the bill, without my amendment, may please one group, but falls short of the logical consistency necessary for good legislation.

To begin with, the bill applies the State action doctrine to the FTC's jurisdiction to regulate unfair methods of competition, but it does not apply it to the regulation of unfair or deceptive acts or practices. Does anyone really suppose that the FTC's jurisdiction to regulate unfair or deceptive acts or practices is not at least as broad as its jurisdiction to regulate unfair methods of competition?

If this amendment is defeated, we will have spent 6 years negotiating over this issue, and the FTC will still have the authority to declare a State bar examination an unfair act and thereby overturn the results. The FTC will still have the authority to determine whether a particular State licenses a sufficient number of its medical school graduates, or whether a State acts properly in not allowing paralegals to argue motions. The FTC will still be able to review whatever is left of State residency requirements following the Supreme Court's recent decision. In other words, there is nothing the FTC can currently do which it would not be able to do under another name if this amendment is not adopted.

As far as this Senator is concerned, that is not an acceptable result.

Mr. President, the language of my amendment would prohibit the FTC from second-guessing the States on questions of licensure and professional qualifications, whatever authority it chooses to use. Although the organized bar may argue over the necessity of my language, no one has been able to raise a single substantive objection to its terms, so long as it is made clear that my amendment creates no implication with respect to jurisdiction over activities which it does not specifically list.

And so this is the decision which the Senator has before it: It can throw out 6 years of work at the behest of one party in interest. But if this is what we choose to do, we should understand that it may be at the expense of other professions which have an equally valid interest in this legislation.

Alternatively, the Senate can attempt to use its own best judgment as to what appropriate public policy should be in this area. That is what I hope we will do.

EXHIBIT 1

AMERICAN DENTAL ASSOCIATION,
Washington, DC, July 23, 1985.

Hon. JAMES A. MCCLURE,
U.S. Senate,
Washington, DC.

DEAR SENATOR MCCLURE: In response to an inquiry from members of your staff regarding the Association's position on the Federal Trade Commission authorization bill, I am forwarding a copy of our testimony before the Senate Committee on Commerce, Science and Transportation on April 24, 1985. This testimony summarized our position then, and it remains the same today.

At that time, Dr. John Bomba, President of the American Dental Association stated the following: "We believe it would be much preferable for the Committee to retain the professions' language contained in last year's bill, S. 1714. with a technical amendment making clear that no expansion of FTC authority to invalidate state laws is intended. . . With these provisions in place Congress and the courts, rather than the FTC, would define the limits of Commission authority to invalidate state laws in these critical areas of public health and safety."

I hope this letter and testimony are helpful in setting forth our position with respect to the need for statutory restraints to clarify that the Commission does not have authority to invalidate state laws relating to the dental and other professions.

Sincerely,

HAL M. CHRISTENSEN,
Director.

Mr. KASTEN addressed the Chair.

The PRESIDING OFFICER. The Senator from Wisconsin.

Mr. KASTEN. Mr. President, I rise in opposition to the amendment of the distinguished Senator from Idaho. Let me just begin by describing what we did in committee and what we arrived at.

S. 1714 contained compromise language developed by the FTC and the American Medical Association on the scope of FTC authority to invalidate State law in order to regulate the activities of professions. This language prohibited the FTC from using its consumer protection authority to invalidate State laws prescribing training, education, or experience requirements for licensure, or the permissible tasks or duties that professionals may perform based on specialized training or education.

This compromise language was intended to protect the traditional and important role of the States in establishing criteria which guarantee the quality of professional services, while ensuring that Federal laws against anticompetitive acts, fraud, and deception are fully enforced.

Some groups have objected to any limitation on FTC authority to regulate the professions, while others have expressed the view that this language did not go far enough to restrict FTC authority, and the American Bar Association and the Texas Bar Association argued that by implication the compromise language gave the FTC authority over the other activities of the legal profession that it does not have.

I might point out that on our panel of professional groups, every single group, with the exception of the dentists that had a reservation, came up and said that they believed that the inclusion of this FTC limitation of authority in fact worked against their needs and asked the committee to be silent on this issue.

The Senator from Idaho said, What has happened between last year and this year?

As I have noted, this dispute has been one of the main obstacles to floor action on the FTC authorization. However, at the April 24 FTC reauthorization hearing the continued need for this language was questioned by the AMA and others. While there was disagreement as to the meaning of professions language and its impact on FTC authority, the view was expressed that the professions language was unnecessary and might in fact be counterproductive.

As a consequence, this language has been dropped by the committee, and it has also been dropped on the House side, as well.

To be sure, there may be a very few groups that are not totally satisfied with this approach, but the committee's action is supported by such groups as the ABA, the AMA, the ANA, the National Association of Optometrists and Opticians, and the National Association of Dental Hygienists.

What happened between last year and this year are two very important court cases which describe the situation in a way that the professions feel the courts are now adequately addressing this question and we ought to be silent on it in the legislation because of the possibility of bringing the FTC in. Southern Motor Carriers Rate Conference against the United States and the Town of Hallie against the City of Eau Claire are the two cases which the ABA, the Texas Bar, the Medical Association, and others addressed, saying that the courts are now dealing with this problem, they are working with this problem, and there is no reason for the FTC reauthorization bill to include it. Therefore, on the near-unanimous position of all of the professions, we decided to drop the language. It was dropped by the committee. The minority and the majority agreed.

I would say to the Senate that since this compromise has been reached by dropping all of the language, not one group has come to us to object, even some of those groups which had some reservations at the hearings. Not one group has come to us to object or express disapproval of the way we worked this compromise out.

As a consequence, as I pointed out, the language was dropped because there was disagreement as to the meaning of the professions language and its impact on the FTC authority. The view was expressed that the professions language was unnecessary; in fact, the view was expressed before us that not only was it unnecessary, but it might be counterproductive.

The committee's action is supported by the ABA, the AMA, the ANA, the National Association of Optometrists and Opticians, the National Association of Dental Hygienists, and other groups that have appeared before us.

I see the Senator from New Hampshire is on the floor. I shall have some additional things to say, but he and I and a number of us have worked on this language over the years, and I hope the Senate will support the position the committee has taken. That is that as a consequence of the court decisions and this near-unanimous opinion by all the different groups, the language should be dropped and not included in the FTC authorization bill this year.

Mr. McCLURE and Mr. RUDMAN addressed the Chair.

The PRESIDING OFFICER (Mr. GORTON). The Senator from New Hampshire.

Mr. RUDMAN. Mr. President, if the Senator from Idaho wanted to make a comment on the comments of the Senator from Wisconsin, I shall be perfectly happy to yield, although I am due at a conference.

Mr. McCLURE. Mr. President, I thank the Senator for yielding. I, too, am due at that conference, so I shall not take a long time. I want to comment on a couple of things the Senator from Wisconsin said.

First, it is true that various groups and organizations have supported the committee's compromise, but I think it would be incorrect to say that you can interpret from that support that they oppose the language in this amendment. Quite the contrary is true. There is only one organization of the professions that testified in opposition to the language which I am offering. That is the American Bar Association. All of the rest of the associations, in effect, said, well, if the committee's language is the best we can get, we will take it. But they will say to you privately as well as publicly, I believe, that they would prefer the McClure language, the language which was worked out between myself and the Senator from New Hampshire [Mr. RUDMAN] last year, which all groups had an opportunity to see.

Why did the bar association, among all the professions, decide they would oppose the McClure language? And they are the only ones who have testified in opposition—the only ones of the professions who testified in opposition. It is very easy to say, Mr. President, because they believe that the Supreme Court's decision of State action doctrine, as enunciated by the Supreme Court, clearly applies to a regulated profession such as the bar, which is an instrument of the State courts. But they will admit, at least in private, that they are not certain that that extends to other professions which are licensed and regulated by the States in a different manner.

I think it is very anomalous, frankly, that the bar association comes before the committee and then is represented to the Senate as opposing the McClure language on the basis that it might raise an ambiguity when precisely the same ambiguity is raised by the committee's language. If, as a matter of fact, there is ambiguity because of my language that needs to be clarified, then it needs to be clarified with respect to the committee's language.

Mr. President, I submit to you that the bar association is trying to cover its own tail while leaving everybody else's exposed. That is not the first time they may have done that nor the first time any group has done that, and it may be perfectly legitimate, but let us not be misled as to why they are doing it.

Mr. KASTEN. Mr. President, I want to respond to the points brought up by the Senator from Idaho, but I believe the Senator from New Hampshire ought to be recognized at this time.

Then I shall respond because I have a list of several groups here that goes way beyond the ABA.

Mr. RUDMAN. I thank the Senator from Wisconsin.

Mr. President, let me say that I find myself somewhat between a rock and hard place. I came to the floor from a meeting believing that the Senator from Idaho was offering the language that we had agreed on last year but with an additional paragraph which he thought was rather insignificant and I thought was greatly significant. At any rate, for whatever reason, the Senator from Idaho has dropped that portion of his amendment and the amendment that I find myself confronted with, as he states, is precisely the amendment that the Senator from Idaho and I agreed on last year.

Having said that, I see my friend from South Carolina wondering how I am going to get out of this one.

Mr. HOLLINGS. Amen.

Mr. RUDMAN. I shall say it in this way: It well may be that the Senator from Idaho is correct, that this language which was agreed to last year will do precisely what we intended to do. And, frankly, I must say, to be perfectly intellectually honest, I do not have a major problem with that. I suppose, though, that what we can say is that in the year that has intervened in that time, the various organizations—at least some of them—have now taken a contrary view as to whether they believe any language ought to be in the bill or not, particularly in light of the U.S. Supreme Court decision of 4 months ago which, if I am stating it correctly—at least it is my understanding—the American Medical Association as well as the American Bar Association believes applies to them as well. They believe that that is the Court language, that is the law of the land, that in any subsequent cases that are brought that involve the FTC, they would use that case to support the position that they obviously take.

On that basis, it just seems to me that with the year intervening and with the groups having essentially changed the view that they had at that time, I would probably be very comfortable in seeing this bill passed as it has come to the floor without the amendment offered by the Senator from Idaho.

I would be the first to say, as the Senator from Idaho remembers clearly, that 3 years ago at 3 a.m., what these groups particularly believed or thought is not terribly important to me, nor should it be important to the U.S. Senate. But it seems that since we got them involved in the process 2 years ago and finally worked out language that they all essentially agreed to, but then we did not pass it, now a year has gone by and the Senator from Wisconsin is chairman of this subcommittee and he believes that their understanding is that it would be better with no language, I am going to kind of think about this a bit. But my guess is I shall vote against the amendment offered by the Senator from Idaho.

Mr. McCLURE. Mr. President, will the Senator yield?

Mr. RUDMAN. I shall be happy to yield.

Mr. McCLURE. I asked the Senator to yield—I do not mean to detain the Senator from Wisconsin unduly at all, but the Senator from New Hampshire made one statement which I think we must explore. He says these organizations now, with the passage of a year, have looked at court action and said, We believe the best action to take is to remain silent.

Mr. RUDMAN. I believe what I said, and if I am wrong I shall stand corrected, was that some of the organizations have taken that point of view. I believe there are still some that would like language.

Mr. McCLURE. That is right. But they either like the language we agreed to a year ago or advise us to remain silent. As a matter of fact, the bill before us is not silent. Section 2 attempts to deal with this subject matter. If indeed we are to remain silent, should we not strike section 2?

Mr. RUDMAN. I say to my friend from Idaho that that section I think has pretty well been agreed to for some time by most people. I think that is a bit different than this amendment. At any rate, I congratulate the Senator from Idaho for showing the wonderful good judgment in removing the last paragraph of that amendment which I believe was rather substantial in effect. If the Senate votes on this, I hope it defeats the amendment. But I believe that it certainly is a good deal improved over what I originally thought I was coming to the floor to talk about.

I thank the Chair.

Mr. KASTEN. Mr. President, first of all, I thank the Senator from New Hampshire for his support.

I should like to bring to the attention of the Senate the fact that it is not the ABA or the lawyers who are on this particular side of this issue. I begin with the American Medical Association:

> However, as we noted in our testimony of April 24, 1985, before your subcommittee, "the AMA believes it is no longer necessary to adopt specific language concerning the professions as part of FTC reauthorization legislation."

In other words, they are not only for leaving it out, they are in favor of taking it out. "We believe it is no longer necessary to have it included," the American Medical Association said.

Now, even more specifically, the American Dental Hygienists Association says:

> We oppose Senator McClure's version of last year's bill simply because we prefer Senator Danforth's approach to eliminating any restricting language and because Senator McClure's includes none of the safeguards necessary to protect FTC legitimate intervention in anticompetitive commercial acts or practices.

Also, the American Nurses Association:

> The Commerce Committee has correctly decided that there is no need to place any restrictions on the FTC's activities over professionals.

The Conference of Chief Justices:

> It is our understanding that the ABA and the AMA now take the position that it is no longer necessary to adopt specific language on the professions as part of the FTC reauthorization bill.

I say to the Senate, they are people who are not simply saying they are neutral on this question. They are saying—the Conference of Chief Justices, the American Bar Association, the American Medical Association, and others—that they oppose the inclusion of the language that we had last year and that is why we did what we did in the committee.

Mr. McCLURE. Will the Senator yield for a question?

Mr. KASTEN. I am pleased to yield to the Senator.

Mr. McCLURE. I thank the Senator for yielding.

Mr. President, I guess you can read the English language in several different ways, but the language that says, "We no longer think it is necessary to include it," does not necessarily mean we believe it is necessary to exclude it, am I correct?

Mr. KASTEN. I read, "We oppose Senator McCLURE's version of last year's bill."

Mr. McCLURE. That was in one of the letters, but it was not in the AMA letter and it was not in the Association of Chief Justices' letter.

Mr. KASTEN. I think the Senator is correct, that you can look at these different positions as saying we do not oppose last year's bill. But the point I should like to express to the Senate is that everyone supports this year's version. There has been a court case. There have been a new set of hearings. There has been more going on and now we have together all of these groups which have been competing.

The Senator can argue, whether opposed, to the degree people are hot or cold or lukewarm, but the fact is no one has come to me as chairman of the subcommittee and expressed opposition to the compromise worked out by us. And that was the purpose of the hearings; that was the purpose of this legislation.

Mr. President, I ask unanimous consent to include at this point in the

RECORD letters from Mr. James Ritchie, expressing the opinion of the National Association of Optometrists and Opticians, another from the American Bar Association, another from the American Medical Association, another from the American Dental Hygienists Association, another from the American Nurses Association, and another from the Conference of Chief Justices.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

AMERICAN MEDICAL ASSOCIATION,
Washington, DC, July 25, 1985.

Hon. ROBERT W. KASTEN, JR.,
Chairman, Subcommittee on Consumer, Committee on Commerce, Science and Transportation, U.S. Senate, Washington, DC.

DEAR SENATOR KASTEN: The American Medical Association would like to take this opportunity to comment on S.1078, the Federal Trade Commission reauthorization bill, as reported by the Commerce Committee.

As you know, the AMA has a longstanding interest in the relationship between the FTC and the state regulated professions. We have in the past supported specific language relating to the FTC's jurisdiction over the professions. However, as we noted in our testimony of April 24, 1985, before your subcommittee, "the AMA believes it is no longer necessary to adopt specific language concerning the professions as part of FTC reauthorization legislation." We based this decision on two factors: the Supreme Court's decision in the Southern Motor Carrier case, and the increasingly sophisticated recognition by the FTC of the unique attributes of the professions.

The Committee accepted AMA's recommendation on the professions issue and S.1078 contains no specific language on the professions. We continue to believe that no language is necessary and we support the Committee's decision in this regard.

Sincerely,

JOHN S. ZAPP, *D.D.S.*

AMERICAN DENTAL HYGIENISTS' ASSOCIATION, OFFICE OF FEDERAL AFFAIRS,
Washington, DC, July 25, 1985.

Hon. JOHN DANFORTH,
Chairman, Senate Committee on Commerce, Science and Transportation, Dirksen Office Building, Washington, DC.

DEAR SENATOR DANFORTH: The American Dental Hygienists' Association endorses the provisions of S.1078 dealing with the FTC's jurisdiction over the health professions.

As the national organization for over 30,000 dental health professionals, we are alarmed at efforts to reduce competitiveness in the health care marketplace. We oppose Senator McClure's version of last year's bill simply because we prefer Senator Danforth's approach of eliminating any restricting language and because Senator McClure's includes none of the safeguards necessary to protect FTC legitimate intervention in anticompetitive commercial acts or practices.

Sincerely,

J.H. KENT,
Washington Representative.

AMERICAN BAR ASSOCIATION,
GOVERNMENTAL AFFAIRS GROUPS,
Washington, DC, July 25, 1985.

Hon. BOB KASTEN,
Chairman, Subcommittee on Consumer, Committee on Commerce, Science and Transportation, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: I am writing to restate the position of the American Bar Association with respect to S. 1078, legislation to reauthorize with Federal Trade Commission.

As you are well aware, one of the key controversies surrounding reauthorization of the FTC has centered around the issue of FTC jurisdiction over state-regulated professionals. As we stated in our testimony before your subcommittee earlier this year, the American Bar Association believes that it is not necessary or desirable to include specific language on the professions as part of an FTC reauthorization bill. In light of recent U.S. Supreme Court cases clarifying and widening the applicability of the state action doctrine, we believe questions concerning the nature and extent of FTC jurisdiction over the professions can best be resolved by the courts on a case by case basis.

We hope these views will assist you and your colleagues in considering this legislation.

Sincerely,

ROBERT D. EVANS,
Director.

NATIONAL ASSOCIATION OF OPTOMETRISTS AND OPTICIANS, INC.,
Washington, DC, July 25, 1985.

Senator BOB KASTEN,
Chairman, Consumer Subcommittee, Commerce, Science and Transportation, Committee, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: On behalf of our client, the National Association of Optometrists and Opticians, Inc.; we wish to affirm our support for S. 1978. Stephen C. Fogleman testified before your Committee regarding the proper role of the Federal Trade Commission ("FTC") with regard to the professions.

We continue to believe that the FTC does need to have jurisdiction over the commercial and business practices of professionals. Amendments to S. 1078 at this late hour can only be viewed as counterproductive. We hope that the Senate will realize that the Committee's efforts represent several years of work and that amendments dealing with the professions would negate the progress to date.

Respectfully,

JAMES E. RITCHIE,
Counsel.

AMERICAN NURSES ASSOCIATION, INC.,
Kansas City, MO, July 25, 1985.

Hon. JOHN DANFORTH,
Chairman, Senate Committee on Commerce, Transportation and Tourism, Hart Senate Office Building, Washington, DC.

DEAR SENATOR DANFORTH: On behalf of the 188,000 members of the American Nurses' Association, I would like to express our support of S. 1078, the reauthorization of the Federal Trade Commission. The ANA has spent several years working to protect the jurisdiction of the Commission over the activities of state regulated professionals and this legislation is consistent with that purpose.

The Commerce Committee has correctly decided that there is no need to place any restrictions on the FTC's activities over professionals. Concerns about improper intervention by the Commission into the activities of professionals have proven to lack merit. On the contrary, there is widespread agreement that the FTC's involvement in the health care field has lead to a lessening of price inflation, and an increase in competition. However, unwarranted restrictions on competition among professionals continue to exist. S. 1078 will permit the Commission to continue to address such activities.

The bill also makes the judicially developed "state action doctrine" immunity applicable to the Commission's "unfair methods of competition" authority. This doctrine applies only if, first, the restraint is clearly articulated and affirmatively expressed by the State legislature to supplant competition with regulation, and second, that the State actively supervises such restraint. Therefore, actions by a State licensing board of one professional group attempting to impose restrictions on another professional group would not qualify for the immunity, as such activities are not envisioned by the State legislature in the creation of such boards, and such boards are not intended to supplant competition with regulation. Additionally, we are pleased that the Committee has limited the "state action doctrine" to the "unfair methods of competition" authority of the Commission, and has not applied the state action doctrine to the FTC's "unfair or deceptive acts or practices" authority.

The American Nurses' Association is pleased to support passage of S. 1708. Passage of this legislation will allow the Commission to continue its antitrust and consumer protection activities in the professions area. We stand in opposition of any amendments which would in any way limit the jurisdiction of the Commission over the activities of professionals.

Sincerely,

EUNICE R. COLE, R.N.,
President.

CONFERENCE OF CHIEF JUSTICES,
Williamsburg, VA., April 24, 1985.

Hon. BOB KASTEN,
Chairman, Subcommittee on Consumer, Committee on Commerce, Science and Transportation, Senate Hart Office Building, Washington, DC.

DEAR MR. CHAIRMAN: This is to express the views of the Conference of Chief Justices on reauthorization of the Federal Trade Commission.

We address only that portion of the record relating to the FTC in its relations with state-licensed professionals, specifically the legal profession, an adjunct of the judiciary which functions under carefully crafted rules promulgated by state supreme courts.

As the attached resolution indicates, our official policy urges Congress to "deny authority to the FTC or any other federal agency to preempt the traditional powers of state supreme courts to regulate all lawyers or groups of lawyers in their respective states, especially in the areas of codes of ethics, disciplinary rules, and commercial and business practices." But it should be noted that this position was not adopted until July 27, 1983 when the so-called American Medical Association-Federal Trade Commission compromise was pending in both houses of Congress. Prior to that time the Conference of Chief Justices, like the American Bar Association, had not felt it necessary to seek legislation barring or re-

stricting FTC regulation of the legal profession. However, we were concerned, as was the ABA, that the newly developed compromise would codify an FTC authority over the legal profession that would greatly complicate, and be inconsistent with, the historic role of state supreme courts as regulators of the bar.

It is our understanding that the ABA and AMA now take the position that it is no longer necessary to adopt specific language on the professions as part of an FTC reauthorization bill. We concur in that view and urge the subcommittee to delete the compromise language in H.R. 2970, 98th Congress, from the legislation when reintroduced this year.

As our resolution states, conflicts between regulations of the FTC and state supreme courts would create great uncertainty as to the accepted standards for the practice of law and lead to needless friction and litigation. Judicial control of the legal profession, as evidenced throughout our history, is essential to the American system of justice. It is a complex responsibility, based on hundreds of years of experience in the English and American judicial systems, we exercise with the unmost care.

We also are concerned that federal intrusion on this responsibility historically reserved to the states, will raise constitutional questions not readily resolved. Given the complexity of existing law under the state action doctrine, together with the carefully balanced relationship between courts and the legal profession, we believe the issues addressed through the AMA-FTC compromise can best be left to resolution by the courts on a case by case basis.

We appreciate this opportunity to comment and trust our remarks will be made part of the hearing record.

Sincerely yours,

W. WARD REYNOLDSON,
President.

Mr. McCLURE addressed the Chair.

The PRESIDING OFFICER. The Senator from Idaho.

Mr. McCLURE. Mr. President, the American Bar Association has argued that the application of the State action doctrine to the Commission's authority to regulate unfair methods of competition may be parallel to the application of that doctrine to the Commission's authority to regulate unfair or deceptive acts or practices.

If that is true, does not our expressed action in legislatively applying that doctrine to the unfair competition authority create a very strong implication that we do not intend to apply it to the unfair or deceptive acts or practices jurisdiction? I think the answer to that is very clear. In the case of Parker versus Brown, the Supreme Court held that congressional silence under the Sherman Act evidenced an intent not to preempt State action. Some, but not all commentators, have been quick to create a broad principle of law on the basis of this case applying it to the FTC's Sherman Act jurisdiction, the FTC's interstitial antitrust jurisdiction, and the FTC's nonantitrust jurisdiction.

Nevertheless, with respect to quasi-private activities, such as cases in which doctors and dentists administer a licensing exam, the consequences seem to be that the activity must be a two-pronged test: First, it must be pursuant to a clearly articulated and affirmatively expressed State policy and, second, it must be supervised by the State.

I believe that to be true and, if that is true, is not it also true that in the case of medical and dental admissions practices, in some States the supervision nexus may be inadequate to exempt them from FTC jurisdiction under the bill's language.

Mr. President, I attempt to solve that problem by the amendment which I offer, and I attempt at the same time to solve a question that the ABA raises in saying, "Hey, we got our game going pretty good for us. Do not mess up our game by suggesting that." Nothing contained in my amendment shall be deemed to affect the law relating to the existence or nonexistence of jurisdiction by the Federal Trade Commission over activities of professionals other than those delineated in paragraph 1 which shall be governed by the Federal Trade Commission Act and existing and future judicial interpretations thereof, nor shall there be any inference of activities of professionals, other than those delineated in paragraph one of my amendment, be treated similarly for the purpose of determining the existence or nonexistence of jurisdiction over each such activity.

Mr. President, I would have to state that there is absolutely nothing in the bill that guarantees against that interpretation under the language contained in the bill. So if the ABA is worried about my amendment fouling up their little game, then they have got to worry about the language the committee came up with. Yet they are saying to the committee, "Oh, gee, don't let McCLURE foul up this thing by raising some questions, but we don't object to you doing it."

And why? Because the nexus question of the regulation of the bar by the State is so clear and so unambiguous that they say, "We believe we are safe. Don't bother us. Take the language of the law the way it is, with the little reference you got there in the bill and we are protected. You doctors and you dentists and you beauticians and all the rest of those are licensed by the State may be at risk. But we, as your lawyers, will advise you. Don't worry. We can argue it in courts."

I think that is the granddaddy of all conflicts of interest, where the lawyers argue their own case to the disadvantage of the clients they are advising. They are safe, under the committee's language. Everybody else is at risk. And the lawyers say, "But don't worry about it, folks, We're all OK."

Mr. President, it may be that we will not adopt this amendment today. I hope the Senate will. I hope that the Members of the Senate will correctly understand what the record before this body is and what the record before the committee is. The record and testimony before the committee is only one statement of opposition to my amendment—only one—and that statement of opposition is from whom? Guess who. The American Bar Association, covering themselves.

That is not the first time they have done it, as I have said before. It may not be the last time they have done it. They may have gotten some others to write letters since than to say, "You fellows help us out." That is legal advice to whom? To groups that are less knowledgeable in the law than they are, while they are protected adequately by the law and the people to whom they are making the representations are not.

I am a member of the bar association. I practiced law for 16 years before I started trying to make it here; but I do not think it looks very good, from my standpoint, to have the bar association say, "Leave the law the way it is most favorable to us," and then have the Congress of the United States leave it that way, to the disadvantage of the other professional groups, and when the bar association knows that is the case but will not say so.

The PRESIDING OFFICER. The Senate will be in order.

Mr. METZENBAUM. Mr. President, I would like to make a few remarks on the resolution of the "professions issue" and the extent of the FTC's authority. At first, the professions pushed for a total exemption from the FTC. This was rejected.

Then there was an effort to limit the FTC's authority in regard to the professions. This effort has been rejected as well.

The final resolution has been that the FTC's authority to challenge unfair or deceptive acts or practices—by private doctors, lawyers, or dentists or by unfair regulations adopted by professionally dominated State boards—is unchanged.

Under this act the FTC is able to challenge anticompetitive State regulations such as restrictions on the advertising of eyeglasses.

The Reagan administration, like previous administrations, has supported the actions of the FTC in challenging both private conduct and anticompetitive regulations. The challenge to the ban on the advertising of eyeglasses saved consumers millions of dollars.

By deciding against restricting the FTC in tabling this amendment, Congress has indicated its approval of future such actions. This is a good resolution for American consumers.

Mr. LEVIN. Mr. President, I will vote to table Senator McCLURE's

amendment because a statutory restriction is no longer necessary.

In 1982, I voted against an amendment to totally exempt the professions from FTC scrutiny because I felt it would not be wise to provide a blanket exemption from the antitrust and consumer protection laws which apply to everyone else. That amendment was defeated. Subsequent to the Senate's rejection of the amendment stripping the FTC of authority over the professions, the Senate Commerce Committee adopted compromise langauge in the 98th Congress as part of the FTC authorization bill which would have prohibited the Commission from exercising jurisdiction over State laws concerning the education, training, or licensure requirements of professionals. I supported this compromise language but it never became law and it now seems clear even the compromise restrictive language is no longer necessary.

Mr. President, the AMA, the ABA, and other professional associations have now taken the position that langauge restricting the authority of the FTC over the professions is not needed, and, in fact, could cause considerable confusion in this area. The professions are now satisfied that the Federal Trade Commission does not intend to exercise jurisdiction in these areas and that recent court decisions have clarified those professional activities which are exempt from scrutiny by the FTC. Thus, while I do not disagree with the purpose of Senator McCLURE's amendment, I am persuaded that there is no longer a need to legislate in this area.

Mr. KASTEN. Mr. President, I know of no further debate on the McClure amendment.

Mr. President, I move to table the amendment and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Wisconsin to lay on the table the amendment of the Senator from Idaho.

On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Colorado [Mr. ARMSTRONG] and the Senator from South Dakota [Mr. PRESSLER] are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Louisiana [Mr. LONG] is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 71, nays 26, as follows:

[Rollcall Vote No. 161 Leg.]

YEAS—71

NOT VOTING—3

Armstrong	Long	Pressler

So the motion to lay on the table amendment No. 544 was agreed to.

Mr. KASTEN. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. METZENBAUM. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 542

Mr. KASTEN. Mr. President, what is the pending business?

The PRESIDING OFFICER. The question recurs on the Kasten amendment 542.

Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. Mr. President, I think all of us would agree that the idea of a legislative veto is very appealing. It sounds like Congress is going to spend a lot of time looking at the details of the regulations.

The legislative veto is wrong from its inception, and it is wrong at every point along the line. The reality is it will not do that at all; it will not provide for Congress to spend time looking at the details of regulations. Instead, we will set up a procedure for all the special interests to descend on the Congress to kill proper consumer rules issued by the FTC and the CPSC.

Now, Mr. President, I am frank to say the FTC is but a shadow of what it once was. But it is still the only agency, other than the Consumer Product Safety Commission, that is concerned about the consumers of the country. And now we want to be sure there is a legislative veto for the FTC and the Consumer Product Safety Commission. What a joke. What a sad day it is. I remember one of the worst votes we ever had in the Senate—maybe it was one of the worst days as well—was when the Congress killed the FTC used-car rule. Thank the Lord for the Congress of the United States. They stood up and took care of the used-car dealers and they forgot about the consumers.

That rule was very simple. It was very modest. As a matter of fact, it was rather radical in a sense—maybe it was not so modest—because it provided that the dealers had to tell the buyers about the serious defects that the sellers knew were in the cars being sold. What a great day it was when we in the Congress raised our mighty voices and killed the FTC's used-car rule providing that the consumers might get adequate information concerning their newly purchased cars.

Now, the rule was killed not because of a serious study of the administrative record or the evidence obtained by the Federal Trade Commission. It was not killed because we did such an exhaustive study and came to a conclusion that the used-car rule was wrong. It was killed because the used-car dealers, with their lobby and their political action funds, had done their job very well, and they put on the heat. The Commission had studied the industry for years. The Commission had taken thousands of pages of testimony and documents and they were in the RECORD. But we in the Congress knew better. We knew better because the auto dealers told us it was better, and indeed it was better—for them—but a lot worse for the consumers of this country, for the people who buy automobiles. We killed them.

Now, let us look at the future and what is going to happen if this legislative veto is added to the FTC bill. Let us say that the FTC passes a rule to inform Congress about what is in their insurance policies.

Mr. President, did you ever try to figure out what is in your insurance policy? Try it someday. Try to comparison shop with your insurance policy. Try to figure what is different in the insurance policy that you buy either on your home, your life, or your car and what you can buy from someone else. Try to figure out what all that small type means. Try to figure out, if you have a life insurance policy, what the yield is on the extra money that you put in as a deposit and what kind of interest they are paying you on that money.

The insurance company does not want you to know that, nor would the Congress. But someday the FTC just

might have the temerity and the courage and the decency to see to it that the American people would know what is happening. It is a terrible thing in this country to let consumers know the facts, and the FTC and the CPSC are two of the few Agencies from which you might hope to get some information. But we are going to have Congress have a legislative veto. When you go back home, you ought to raise some money if you vote for this one, because all the lobbyist groups ought to be pleased about your vote. But the fact is go home and talk to your constituents and see if they really want you to have a veto power over the actions of the Federal Trade Commission and the Consumer Product Safety Commission. The FTC someday might have the temerity to move in and tell you really how bad it is to smoke cigarettes. But if they did that and they came out with some regulations, you may be certain that the tobacco companies would be here, and that Congress would stand up and salute, and we would veto the FTC rule.

Do you really think Congress would study the record and learn the facts? Do you really think that Congress was concerned about the detailed evidence? Of course not. But the industry, regardless of which industry it is, will be here in droves to kill a rule of the FTC.

The sad part is that it is going to pass here, in all probability. It is going to pass, on some kind of theory that Congress has to protect the people. We will not be protecting the people. We will be protecting those who do not need protection, and we will be forgetting about the people who do need protection.

What conceivable risk can there be for us to overrule a rule of the FTC? Congress already can legislate to overturn rules through normal legislative procedures if we do not like them, and we have done that in some instances. I point out the saccharin ban, the seatbelt-interlock rule, and others.

Congress has not done it more often, because it takes too much time, and it is not worth it. We cannot even deal with appropriations bills now. How are we going to find the time to review hundreds of rules of the FTC? The only ones we will review are those which the lobbyists direct us to review. They will come here and tell us what to do and, like good men and women, we will stand up and salute, and we will override the FTC rules.

The bill makes the assumption that Congress will spend the time to look at hundreds of these regulations on an expedited basis, with a few hours for debate. Come on! Who is kidding whom? Does anybody really think we have such a thing as expedited debate here, where there is an issue of this kind, where the auto dealers are pushing us or the real estate lobby is pushing us or the insurance lobby is pushing us or the liquor lobby or the cigarette lobby?

The reality is that the only place the people of this country can turn for protection, the only place that details of certain policies can be worked out through rulemaking, through testimony, and through appropriate appeals to courts is at the FTC level and the CSPC level.

The job of Congress is to set the standards in the first place. We set the overall parameters, and then we expect the agencies of Government to do the job. But be careful. If the two agencies that have some consumer interest do their job too well, we had better be sure we reserve to Congress the right to veto what the are doing.

If the regulations were to be reviewed later, there is a temptation to be even vaguer when we enact the statutes; and, as a consequence, we would be deferring those hard-policy decisions which we should be making.

Even this administration, the Reagan administration—and I emphasize this to my colleagues—no friend of regulations of any sort, has trouble with the legislative veto. The Department of Justice says, "Don't do this for the FTC alone."

Let me quote from the testimony of the Administrative Practice and Procedure Subcommittee hearing:

> The administration's threshold concern is that across-the-board regulatory reform is such an important matter that it should be addressed in a free-standing statute, debated, and voted upon fully on the merits. This means, first of all, that any comprehensive regulatory reform legislation should be considered separately as one law and not as an amendment to some other legislation, such as an authorization or appropriations bill. We therefore would strongly oppose any effort to add S. 1145 to the authorization bill for the Federal Trade Commission.

S. 1145 is the legislative veto.

Why pick on the FTC, anyway? Because the FTC is easy to pick on. Why is that? Because they do not have a powerful lobby behind them. The FTC's constituency are the consumers of the country, not the business interests of the country.

Why have there not been efforts to add legislative veto to the Department of Transportation rules? There are a lot of rules there. No, we do not do that. How about the Department of Commerce? There are lots of rules there, but we do not touch that. No, not the agencies that have to do with the business interests; only the agencies that it is hoped might speak up for the consumers of this country. Let us quit kidding ourselves, this will not lead to better regulations. Better laws might do that. Better regulators perhaps could do that. The legislative veto will not do that.

It is a sad commentary that in all probability it will pass this afternoon, but we will not have been performing a service to the people of this country. We would have been the handmaidens of those who speak the loudest and strongest for industry.

Mr. DANFORTH addressed the Chair.

The PRESIDING OFFICER (Mr. SYMMS). The Senator from Missouri.

Mr. DANFORTH. Mr. President, this, of course, is not the first time the legislative veto has come up on the floor of the Senate. It has been debated many times over the years. It has been watered down over a period of time, largely because of the Supreme Court's Chadha decision. So what we have today are two different approaches, two efforts, to attempt to provide for some sort of legislative veto, even a very watered-down version of the legislative veto, which would pass constitutional muster.

I have never been an enthusiast of legislative veto. I have never thought it was a good idea. I would think that a watered-down version of the legislative veto is even a worse idea than the real thing. I think it is a worse idea than the real thing because it is a trap. It is a trap for Congress.

The idea of a legislative veto, a watered-down legislative veto, provides encouragement to Members of Congress to do a sloppy job of legislating. It is very tempting for us, when we are passing a bill or, for example, when we are in conference on a bill, late at night—2 o'clock or 3 o'clock in the morning—during one of those conference meetings, when everybody wants to go home and their concentration is not what it should be, to say: "Well, let's just put it in. Let's just pass the bill. Let's just provide for more regulation, because we have a second bite at the apple because we have the opportunity for the legislative veto."

We talk a great deal about the excess delegation of power to regulatory agencies. The legislative veto is an invitation to excess delegation of power to regulatory agencies because we believe that we still have control over those agencies because we have a legislative veto.

Mr. President, it is an illusion, it is an illusion of power. We do not have power at all. We have some expedited process. We have some mechanism relating to appropriations bills but after Chadha there is no real legislative veto. It is the illusion of the legislative veto. We are dealing with illusions of control of regulatory agencies. We tell ourselves that we are still in control and we delegate more and more authority to the agencies.

These amendments, both of them, are traps and they should be rejected.

That is not to say that if we enacted such a procedure we would not at least go through the motions. We would go through the motions. We would spin our wheels. We would purport to

review regulations put out by the various agencies. But, Mr. President, ask yourself who would be conducting the reviews?

How many Senators are going to read regulations and read rules? How many Members of the Senate are going to spend their time pouring over the Federal Register on a daily basis, analyzing the rules that are put out by numerous regulatory agencies? How many people, Mr. President, in the Senate can honestly say that they personally read the rules and the regulations of the Federal Trade Commission?

How many people in the Senate even read bills for that matter, much less regulations?

We are not going to be doing the job. At the very best, staff is going to be doing the job.

Mr. President, the Congress of the United States is teeming with staff, and I must say that the staff is a very good staff. But I think that there is a limitation for a Member of the Senate how many staff people he or she can really listen to at any one time. Most of us have difficulties managing our schedules. We are going a hundred different directions at the same time. We are supposed to be on the floor. We are supposed to be in committee meetings. We are supposed to be meeting with constituents. We try to get a few minutes to do a little reading or a little thinking in our office and there is a knock on the door or the staff person comes through the door or the phone rings.

How much more responsibility do we want to give our staffs? How much more staff do we want to conduct reviews of the various rules and regulations promulgated by the various agencies of the Federal Government?

This bill is a trap because it purports to maintain control of regulatory agencies. This bill invites a proliferation of the staff of the Senate and the House of Representatives in order to at least go through the motions of doing the job of reviewing regulations.

Finally, these two amendments are lobbyists' dreams. These are dreams for the lobbyists because they give the lobbyists yet another part of the Government, or they think they can have some influence, come into Senators' offices, come into offices of the House of Representatives and say, "Hey, won't you take on this battle with respect to such-and-such a regulation?"

We are going to be under enormous pressure to conduct these reviews, to introduce the various regulations of disapproval that are called for, to push them along, to bring up privileged matters on the floor of the Senate, because this new tool, not an effective tool, but what purports to be a tool, will be available to us.

Mr. President, I do not think the Congress of the United States is functioning very well today. We might count up bills that have passed or we might count up what we have accomplished in 1985, and it is a pretty short list, I believe.

Many of us have had concerns about how to improve the workings of the Senate and make ourselves a more effective body. The legislative veto is not going to make the Senate a more effective body. The legislative veto is going to make us a less effective body. It is going to give us a powerless weapon. It is going to give us something that does no real good, that creates procedural difficulties, that expands the amount of staff necessary to do our work, that provides yet more grounds for special pleading by various interest groups, and it creates the illusion that we have a second screen, a second method of correcting defects in legislation that would invite us to legislate in a more sloppy fashion than we do right now.

So, Mr. President, I urge all Members of the Senate who are concerned about the process of this body to oppose both of the amendments that are before us now.

Mr. FORD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DANFORTH. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DANFORTH. Mr. President, I would like to note that there is no provision in this authorization bill that provides the Federal Trade Commission [FTC] with authority to involve itself in international trade issues, in setting trade policy, or in commenting on trade policy.

The role of judging whether an industry has been injured by imports and recommending appropriate relief is, by statute, exclusively that of the International Trade Commission [ITC]. The ITC has five Commissioners appointed by the President and confirmed by the Senate who have the expertise and statutory responsibility to make determinations under trade law. Earlier this year, the ITC voted 4 to 1 to recommend that quotas on imported footwear be imposed for a period of 5 years.

Mr. President, I raise this issue because on Tuesday, July 23, the FTC issued a lengthy report recommending against the imposition of restrictions on shoe imports. Instead, the FTC took it upon itself to recommend that the Federal Government provide direct financial assistance to workers in the domestic shoe industry who have lost their jobs as a result of imports.

This recommendation reflects the FTC's lack of knowledge and expertise in matters of trade. For instance, the Trade Adjustment Assistance Program is scheduled to expire by September 30, and the administration vociferously opposed its renewal. The footwear industry needs import relief, and it needs it now.

The American shoe industry has taken an incredible beating from imports. In 1968, 233,000 Americans earned their livings in footwear plants. Today, scarcely one-half of these jobs remain.

My State of Missouri is the second largest shoe producer in the Nation. In the late 1960's, we had 24,000 jobs in more than 90 plants. Today, we have fewer than 15,000 jobs. Nearly one-half of our factories have closed their doors. Every week seems to bring the announcement that a plant is going out of business.

The decline of the domestic industry has been caused primarily by imported shoes. In 1968, American workers made four of every five pairs of shoes. Today, imports claim three out of four sales. The situation is getting worse, not better.

Mr. President, the ITC made the right recommendation. Import relief is imperative. The ITC made the wrong recommendation, an ill-informed recommendation, a recommendation on an issue that it had no business examining. Therefore, Mr. President, I reiterate: This bill provides the FTC with no authority to review, examine or comment upon matters of international trade. Moreover, section 201 of the Trade Act provides the FTC with no authority in this area, nor does the Clayton Act, nor does the Federal Trade Commission Act, nor does any other act. Recommendations on import relief are the responsibility of the ITC, not the FTC.

Mr. FORD. Mr. President, I associate myself with the remarks of the distinguished Senator from Missouri, Mr. DANFORTH. I read in the paper, to my chagrin, where the Federal Trade Commission said let all the shoes keep coming in, increase the deficit to try to retrain those people who lose their jobs from the shoe industry who will not be working and paying the taxes to pay themselves to be retrained.

I just thought it was the most horrible decision any commission could make. And it says, "Well, let's just have everybody make all our products overseas and we will just retrain everybody here in this country." For what? For what?

I agree with the Senator from Missouri, the FTC has no international trade authority. They stepped outside of their bounds considerably. It just indicates some of the problems we have in this body and on the Commerce Committee trying to do what is

right as it relates to the Federal Trade Commission.

We think we are making some kind of progress, and then they make some foolish statement like this that creates the problems that we have to live with every day. The FTC has a role to play. It has a very important role to play. But when it thinks it is all things to all people, then the Federal Trade Commission does not have a role.

I am very pleased our distinguished chairman of the committee took the floor to make that kind of statement and I want to associate myself with him.

Mr. DANFORTH. Mr. President, I appreciate the comments of the Senator from Kentucky. He has worked on FTC authorization bills since time immemorial. I think one of the first bills I worked on when I came to the Senate was an FTC authorization bill when Senator FORD was the chairman of the Consumer Subcommittee of the Commerce Committee. He understands the law. He has a great knowledge in it.

My hope is that if the FTC reads the comments that are made on the floor of the Senate, it might get a pretty clear indication of what it is authorized to do and what it is not authorized to do by this legislation. The clear intent of the Congress is that it has no authority whatever to get involved in studies or examinations or putting out reports or analyses on trade matters.

We have a highly expert, really excellent group of people in the International Trade Commission. I am very proud of them. It is an independent arm of Government which was established by the Congress in order to analyze trade problems and to make recommendations after making findings of injury in such matters as the shoe case. And so if the members of the FTC do read these comments on the floor of the Senate—and I hope they will—they will get a very clear idea of the view of the Congress, at least the view of those who have wrestled with this question of the FTC in the Senate for the last number of years, that from our standpoint this question of international trade is wholly outside the jurisdiction of the FTC

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

Te bill clerk proceeded to call the roll.

Mr. FORD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. FORD. Mr. President, as the Senate Commerce Committee is the authorizing committee for many of the regulatory agencies, the members of the committee have been faced with the controversy over the legislative veto for a number of years. The issue, from this perspective, is not how to rein in the executive branch and the President through the War Powers Act or the Budget Act; rather, the issue has been how to control unelected, unaccountable Federal officials in a constitutional and effective manner. Viewing the issue from this perspective as chairman and then ranking Democrat of the Commerce Committee's Consumer Subcommittee, I have been an outspoken opponent of the legislative veto, as I believe this procedure in the past to be not only unconstitional but also ineffective.

Therefore, I was pleased that on July 6, 1983, the Supreme Court gave further breadth to its further June 23, 1983, ruling in the Chadha case declaring the legislative veto unconstitutional, that Court action, affirming lower court decisions striking a one-House veto provisions in the Natural Gas Policy Act of 1978 and a two-House legislative veto in the Federal Trade Commission Improvements Act of 1980—doomed all such legislative vetoes.

Mr. President, I will vote today—if we vote today—against amendments providing congressional review procedures because these procedures like their unconstitutional predecessor the two-House legislative disapproval procedure, provides only for an up or down vote on FTC and CPSC rules and does not provide a substitute for regular and periodic oversight of the agency which is our responsibility as U.S. Senators. These amendments would be ineffective. These congressional review procedures give the false—and I underscore "false impression"—that the agencies are under control and that no more congressional oversight is necessary. In my opinion that is hogwash.

Mr. President, with the Supreme Court's decisions declaring the legislative veto unconstitutional, Congress must revisit the issue of its role in ensuring responsible regulatory agencies. Finding a remedy for the frustrations of a large and oftentimes ineffective Federal Government is an important challenge.

I am convinced, however, that we must refrain from an ill-considered response to the Supreme Court's decision as we look at individual authorizations such as the CPSC authorization we considered yesterday and the FTC authorization bill we are considering today. Rather, we must focus our efforts on strengthening the authorization process. Nor can we reasonably attempt the task of reviewing each and every regulation for sufficient evidence. That in my opinion is the task of the courts.

Mr. President, as Senate floor manager of the last FTC authorization to become law in 1980, I stated during that debate on the legislative veto issue:

> The only way Congress can be assured that this agency—or, for that matter, any agency—is following through, is through regular and vigorous oversight. If it is determined that congressional intent is not being met, then legislative steps must be taken to put the agency back on the proper course.

The following quote from a pamphlet written by John R. Bolton under the auspices of the American Enterprise Institute in 1977 entitled, "The Legislative Veto, Unseparating the Powers" spells out the tasks that Congress must undertake in performing its constitutional and political functions. The veto as a legislative shortcut to these tasks is, as Mr. Bolton points out, an illusion:

> The story of the legislative veto is a depressing story—depressing because, although the goals sought through the use of the device are commendable, the device itself is, almost necessarily, unconstitutional. Moreover, the goals—greater agency accountability and less arbitrary governmental interference in people's lives—might be harder to reach with the legislative veto than without it because it tends to give the false impression that the agencies are under control. In order for those worthy goals to be achieved, Congress must be willing (or be forced) to make difficult political choices. Statutory grants of discretion must be more carefully structured and periodically reviewed. More attention must be paid to specifics, close scrutiny must be given to presidential nominees, and there needs to be greater resistance to calls for "immediate legislative action" from interested pressure groups.

I continue to believe there is no substitute for more carefully considered statutes. I recognize this process imposes more work, some delay, and may be politically difficult. But let me offer as an example of just such a legislative approach, the effort to define the term "unfair" in the FTC Act. The FTC has had authority since the Wheeler-Lea amendment to the FTC Act in 1938 to protect consumers against "unfair or deceptive acts or practices." The Congress had, through broad, ambiguous language, given five commissioners the sweeping power to regulate anything they believed to be, in their discretion, unfair, but Congress became increasingly concerned in the 1970's about some FTC actions under this broad mandate. My distinguished colleague from Missouri, Senator DANFORTH, and I wrote to request the FTC to develop a statutory definition of "unfair" to put boundaries around this term. The Senate Commerce Committee collected outside views on the issue, held extensive hearings, and proposed statutory language to better clarify and define the term. The commission wrote a policy statement clarifying its unfairness authority, on which statutory language was based. The committee also declined through the process to further define the term "deceptive acts or

practices," since case law had placed limits on the term which were deemed appropriately specific.

Though it is not 7 years since this process began, S. 1078, the bill we are considering today, contains this definition of unfair. I will certainly continue to work to see that this definition becomes law.

I contrast this slower, admittedly more tedious approach of reasoned lawmaking to that of the procedure provided by the Kasten amendment. That procedure provides no opportunity for amendment, simply an up or down vote on a rule.

Congress can find some aspects of a rule it likes and some it dislikes, in an absolute way. Congress can say no to what the agency does, but cannot take upon itself to say what the agency should do.

We get unhappy with the agency when they do something, but we do not give them the direction. We have the opportunity to put it into law, but we do not.

Over the years, the Consumer Product Safety Commission's most important authority has been its authority to recall hazardous products and not its rulemaking authority.

Thus, a congressional review amendment as applied to the Consumer Product Safety Commission is largely symbolic in effect. However, a vote for this procedure sets a precedent for other authorizations we will be considering in the near future.

Mr. President, we must work to insure that any new Consumer Product Safety Commission or Federal Trade Commission procedures ultimately enacted in response to the Supreme Court decision strikes a proper balance between improved agency accountability—improved agency accountability—while the traditional regularity process is maintained. However, any legislative response must be coupled with regular and periodic oversight of the agency for there simply can be no legislative substitute for this congressional responsibility.

Several years ago, when we were considering the Federal Trade Commission legislation, I offered a little amendment. I was chairman of the subcommittee at that time. That amendment mandated that the consumer subcommittee hold two oversight hearings on the Federal Trade Commission.

Well, they really laughed at me.

"You do not want to put that in. You are going to have to have oversight."

That indicated to me that oversight was not considered a very good procedure around here. No one really wanted to look at agencies, open them up, see what is inside, make people come and give an accounting of their agency, ask people to come and testify on what they are going to do in the first 6 months of the fiscal year. Then have them here 6 months later and ask, "What have you actually done that you told us you were going to do the first 6 months?" Then have them tell us what they are going to do the final 6 months. We would look at them twice, every year.

That died with the authorization bill, I guess, in 1982. It is not part of the law any more. But what really bothers me here is the legislative veto. One Congressman pressed that as an issue for 10 years. Finally, he got one through.

That is the story around here. If you even stay with a bad piece of legislation long enough, you will get it through.

What are we saying in a legislative veto? That we in Congress have no control over the agencies to which we gave birth. We set up the agency. We directed the policy. All of a sudden, the agency starts meddling in everybody's business. We got our hands caught before I got here. I have been here 10 years. I have been fighting this thing now for at least 9 of them. But when we got our hands caught with an agency getting into too many people's business, then we started to try to figure out a way to curtail regulatory agencies.

What did we come up with? The great unconstitutional idea of legislative veto. If we do not like what they do, the rule has to come to us and we get to veto it.

We have had the authority, we have had the power, and we have had the ability ever since we have had a Senate to change anything we want to change by a majority vote that any agency downtown can do. We have had the authority to abolish an agency if we wanted.

No; we have to run back home and make a speech before the chamber of commerce and say, "We are going to have the legislative veto."

We should have told the chamber of commerce that we did not have the ability or the guts to change the law. So we make a whipping boy. That whipping boy is legislative veto and we walk up and down these aisles proud as punch. We are going to regulate that agency that we gave birth to, that we are giving tens of millions of dollars to every year. And yet we say we cannot control them.

When was the last time we had an oversight of the Federal Trade Commission? When was the last time we had an oversight of the Consumer Product Safety Commission?

They came up and testified and told us how much money they needed. They sure do that. We listen to that. But when was the last time they had real oversight?

We are going to control them with legislative veto? We are going to control them with legislative veto but you know and I know it will not happen. We had legislative veto before it was declared unconstitutional but it did not solve any problems. Further, we did not and do not have the staff to consider all the rules of every agency under expedited congressional procedures.

Sure, I am part of the problem. I do not have time to do everything.

I had a young girl come to my office this afternoon. I took a little time off the floor to go see her. She had her neck broken at the University of Hawaii. Senator INOUYE and I went over and visited with her. She was paralyzed from her armpits down from that accident as a cheerleader for the University of Hawaii. She is from my hometown.

I am going to insert into the RECORD later on the story about her. They said she would never walk again. She walked into my office this afternoon approximately 9 months later.

She was a cross-country runner who had won all kinds of races, a tremendous lady. They said she would never walk again.

But she is walking, and she is going back to school, and she is going to be a cheerleader. She is not going to do the acrobatics a normal cheerleader does, but she had the intestinal fortitude to say, "This is not going to whip me. I am going to walk again."

If we had some of that fortitude in this Chamber and in our committees, we would not be worrying about legislative veto.

Sure, it looks good in the ads for your reelection that we have a legislative veto, that we are putting clamps on these regulatory agency actions.

I guarantee you, the ones who signed the paper to say it is a good deal and those who propose it are generally not even on the committees that look at most of the regulatory agencies. How in the world can they pound their chest and say, "We have done something"? They have not been to a committee hearing. They have not been there to listen to any of the testimony. Yet, they are here trying to change the Federal Trade Commission.

Mr. President, I may be getting a little harsh, but I think I am on the right track. I believe that if we do our job we do not need a legislative veto. We should just exercise the power that we have

I am concerned. They say this will meet the test of the court. That reminds me of a lawyer. I turned around to him one time and said: "What do you think I ought to do?" I was president of a little civic organization. He was our parliamentarian.

He said: "Wendell, I don't know, but whichever way you go, we will make a good case."

That is basically what we have here—whichever way you want to go, we are making a good case for it.

Mr. President, the case, in my opinion, does not have depth. I ask any Senator, when is he going to look at the regulations put out by all these commissions if these precedures are applied to all agencies? When is he going to have personal time even to review those things that are filtered through to him by his staff? How much time will he give to that and how much will he understand the regulations and how it affects people? How often is he going to be asked about one of those regulations? Only when that special-interest group tags him and he starts running and says, "Where is it? Let's look at it."

Mr. President, I think legislative veto in any form is a rose by another name and whatever happens here, we will find someday that there will be some problem with it and we will wish we had not. Because if it is wrong, as the song says, anything you do to improve it makes it worse. If it is wrong, anything we do to improve it makes it worse.

So, if we are trying to correct a wrong here, let us not try to correct it one agency at a time. That is what we are going to get. We are going to get this amendment on every authorization bill that comes down the pike. And once you get into the money bills, wait until you start stepping on other toes; wait until those regulations start coming out and it hurts you some way. You will wish you had your vote back, if you vote for this.

We have the procedure, Mr. President. We can do it on our own.

Mr. President, I would like to say that the distinguished ranking member of the Committee on Commerce also opposes the legislative veto.

I yield to the Senator from South Carolina.

Mr. HOLLINGS. Mr. President, I oppose amendments which would provide congressional review procedures to the Federal Trade Commission authorization bill.

It is important to note that in recent testimony before the Senate Judiciary Committee, the Department of Justice opposed any efforts to attach the Levin-Grassley amendment to the FTC authorization. The administration's concern is that regulatory reform issues such as congressional review of rules is too important a matter to attach to other legislation. Rather, it should be addressed in a freestanding statute, whereby we would have the opportunity to debate this issue and cast our votes fully on its merits.

I have no doubt that the Levin-Grassley amendment would further complicate an already complex appropriations process. Whenever Congress would pass a joint resolution disapproving a rule, Congress would then be required to consider an amendment to an appropriations bill to forbid the agency to spend money to enforce that rule. This would be a tremendous encumbrance to the process. Furthermore, the Appropriations Committee has traditionally acted in similar situations to withhold funding for rules with obvious congressional disapproval—so provisions such as that contained in the Levin-Grassley amendment are unnecessary.

Rulemaking by Federal agencies requires an extensive congressional review role. This is the purpose of congressional oversight. Congress may then respond by presenting legislation to the President for his signature to halt ill-conceived rules. No delay of implementation of particular rules with expedited congressional consideration is necessary.

Mr. President, the framers of the Constitution envisioned that Congress would make laws with reasonable specificity, reflecting policy judgments and decisions that would guide the agencies in execution of those laws. Congress could expand, modify, or repeal enactments that later become unsatisfactory.

The legislative veto mechanism has often been characterized as a substitute for specific congressional direction and policy guidance to agencies—especially in areas which involve tough policy choices. Yet, it is clear that in the past, the legislative veto was not only unconstitutional but was not effective in checking agency abuses. As the Department of Justice testified before the Judiciary Committee:

> . . . we think it is relatively clear that the legislative veto mechanism, in addition to its constitutional infirmities, simply was not effective in checking agency abuses and in fact may have encouraged the passage of vague and overly-broad delegations of authority. Although there has not been any relevant experience with "regulatory veto" mechanisms, . . . substantial questions are presented as to whether widespread use of such mechanisms would be similarly counterproductive and would mask, rather than relieve, the fundamental problem of clearly articulating public policies in law.

It is my belief that passage of a congressional review mechanisms on FTC and CPSC statutes would no doubt result in extension of such legislation to all agencies. It is questionable whether such widespread use of the legislative veto would be productive.

These procedures would impose rigid timetables on Congress and the Committee to introduce, debate, report on, and enact rules. If extended to all agencies, the added work-load would be a tremendous burden on congressional staff, not to mention the delay and possible stalemate that would result. A huge legislative bureaucracy would likely result.

These congressional review procedures are no substitute for narrowly defined statutes. S. 1078, the FTC authorizing legislation we are now considering, as well as the FTC Improvements Act enacted in 1980, stand as evidence that Congress can take on the tough task of oversight with resulting legislation. I urge passage of S. 1078 to further define the FTC's statutory authority and to provide policy direction. However, I urge rejection of both the Kasten and the Levin-Grassley congressional review procedures.

Mr. FORD. Mr. President, I yield the floor.

Mr. KASTEN. Mr. President, I do not know what the schedule at this time is for Senators, but I believe we have very few Senators who wish to speak further on our side. I am prepared to go forward with the vote on this issue. I understand that the distinguished minority leader is interested in speaking on this issue and there may be one or two other people who are.

It is now 5 minutes before 6 o'clock. It would be helpful if we could at least proceed to the point where the Senate could count on an approximate voting time. Maybe we could do this before the dinner hour. Maybe we would want to be discussing part of this through the dinner hour.

I wonder if the distinguished Senator from Kentucky could advise me on what kind of time we might be talking about in terms of the distinguished minority leader.

Mr. FORD. Mr. President, the only thing I can tell the distinguished Senator from Wisconsin is that the distinguished minority leader has said he expects to speak sometime on the legislative veto. I do not intend—I have told the Senator from Wisconsin earlier, privately and it is on the record publicly, that there will not be a quick vote as it relates to legislative veto amendment either of the distinguished Senator from Wisconsin [Mr. KASTEN] or of the distinguished Senators from Iowa and Michigan [Mr. LEVIN and Mr. GRASSLEY].

So, we are going to be here for a while, Mr. President. I say that with all due respect. I am doing the bidding of people on my side and I shall represent them the best I can. If the Senator wants to set this one aside and go to something else, that suits me fine, as long as it is not the legislative veto or expedited procedures. I have no ability to offer the Senator from Wisconsin any promise as to time.

Mr. KASTEN. Mr. President, I am concerned because the Senator from West Virginia said he wanted to speak on this issue, but the last time I understood he wanted to speak was early afternoon. That is what I was hoping for. Now we are out of amendments. As far as I know, there are no further

amendments. There were a couple of amendments that were considered and people have decided to put those amendments off.

Mr. FORD. The Senator has done an excellent job in holding those amendments off. I congratulate him.

Mr. KASTEN. Mr. President, we are ready to talk more, to argue more, to debate more. I am hopeful that, one way or another, we will not lose this time. I think it is important that we use this time.

Mr. FORD. Will the Senator yield for a question from me?

Mr. KASTEN. I am pleased to yield.

Mr. FORD. Did I have the correct understanding on one of the amendments he has been able to prevent coming on this piece of legislation that he has now been assured that they will be able to bring that up tomorrow on another piece of legislation and, as a result, we shall be in tomorrow?

Mr. KASTEN. I can only respond to the first part of the question: I have been successful in dissuading an amendment coming from the Senator from Washington on this bill having to do with the automobile [CAFE] requirements. I am not sure and I cannot really say what agreements have been reached with the leadership, but it is my informal understanding that he intends to bring that amendment up on legislation that is scheduled to occur on tomorrow.

Mr. KASTEN, Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. BOSCHWITZ). Without objection, it is so ordered.

Mr. BYRD. Mr. President, I apologize to the managers of the bill, who have been delayed by virtue of the fact that I asked for some time during which I might study the amendment of Mr. KASTEN and an amendment which I understand will be coming along later in the event the Kasten amendment is adopted, which will be offered, I believe, by Mr. LEVIN and Mr. GRASSLEY.

Mr. President, I will attempt not to take long in expressing some concerns that I have.

I would prefer, if others were willing, to have this measure go over until tomorrow, which would perhaps result in some modifications which would relieve some of the concerns that I have.

For the past few days we have fought off attempts to cede away some of the power of Congress—the power of the purse. In this amendment, it seems to me we are talking about taking back the authority and power that Congress has delegated to the Federal Trade Commission and other agencies. I frankly do not see how the U.S. Senate can find the time to add to its present work and agenda.

The Senate is going to become a super Federal Trade Commission, a super Consumer Product Safety Commission. Listen to this paragraph of the amendment—I will read it:

> Notwithstanding any other provision of law, no recommended rule may become effective until the expiration of a period of ninety days after the date on which such rule is received by the Secretary of the Senate and the Clerk of the House of Representatives, except that such rule may not become effective under this paragraph if within such ninety-day period a joint resolution with respect to such rule has become law.

"No recommended rule may become effective," great or small, major or minor. "No recommended rule may become effective," and so on. Can't we modify this to provide some test or threshhold so as to limit ourselves? Surely we don't mean to include every single rule no matter how minor it may be. I am told that Mr. LEVIN and Mr. GRASSLEY will also offer an amendment to provide for procedures to amend appropriation bills to deny funds, in the event the President vetoed the resolution of disapproval, to implement the regulations in question. I don't mind the funds cutoff, but I am concerned about some of the expedited procedures.

Congress has the power of oversight over the Consumer Product Safety Commission and the Federal Trade Commission. If we do not trust them, let us abolish them. If I have staff people whom I cannot trust, I should get rid of them. And if we have an agency that we do not trust, let us get rid of it. If some agencies are running amok, then let the committees call them up here and invoke a moratorium on their issuance of regulations or take away their powers completely—abolish them or put some restrictions on them, or confine their regulations to a certain area.

If we do not want them to regulate funeral homes, then take funeral home regulation out of their hands. If we do not want regulations on the sale of used cars, then take used cars off limits to the regulating agency. Congress is not without adequate resources to deal with runaway agencies if it does not like the regulations they are promoting. But do we want to take on this onerous business of taking a look at every little regulation or rules change, large or small, minor or major? If that is the case, we are going to have to employ a lot more Senate staff people to do that work. I do not think Senators themselves will have enough time to look at every little rule and regulation that is promulgated.

This might even encourage the commissions that we are talking about to issue more regulations. They can say:

> Well, why should we not issue a regulation? If Congress does not like it, Congress can come in with a resolution of disapproval.

It is almost as if we think that the Federal Trade Commission is more powerful than we are. We are going to be a super Federal Trade Commission and not a very good Senate, it seems to me.

There is no de minimis test in the amendment. No, it is any and all rules. "Notwithstanding any other provision of law, no recommended rule may become effective." So the amendment includes any and all regulatory rules.

We can provide oversight for rulemaking. But it seems to me that we are talking about a far more involved process here than any legislative veto. The Senate will become more and more like the House of Representatives. Why do I say that? Well, because of the expedited procedures provided by the amendment. I am not against expedited procedures in some instances. Sometimes there is a need for expedited procedures. Take the moneys for humanitarian aid to Contras. Take the MX. Congress approved funds and attached certain procedures which were necessary to assure that the Congress ultimately would reach a decision one way or the other as to the unfencing of those moneys. But it seems to me that here we are going too far.

Let us take a look at some of the expedited procedures.

The House has different rules than the Senate has. The House can provide for any rule it wants, depending on the circumstances. But we have standing rules in the Senate; we operate by unanimous-consent agreements; and we have precedents. Then there are procedures in the amendment for discharge of the resolution of referral from the committee to which it was earlier referred. There would be only 1 hour of debate on the motion to discharge. Ordinarily that motion would be debatable, but not so in this instance. It would be limited to 1 hour of debate. And when a committee has reported or has been discharged from further consideration of the joint resolution it shall be in order, notwithstanding the provisions of rule XXII of the Standing Rules of the Senate, at any time thereafter to move to proceed to the immediate consideration of such joint resolution. The motion is highly privileged in the Senate and is not debatable. So the motion to proceed, while ordinarily it would be debatable, will, if the Kasten amendment is adopted, not be debatable.

The amendment would eliminate the 1-day rule which requires an item on the calendar to have been there 1 legislative day before it can be called up—except by unanimous consent. The 3-day rule, the 72-hour rule, with re-

spect to committee reports is out of order here also. The 1-day rule, the 3-day rule, and debate on a motion to proceed would all be circumvented by the language of the amendment. The Kasten amendment provides a built-in time agreement limiting the debate on the joint resolution to 2 hours. Ordinarily there is no limitation on the time for debate.

An amendment to or a motion to recommit the joint resolution would not be in order. A motion to reconsider shall be in order only on the day on which occurs the vote of adoption of the joint resolution and shall not be debatable. But normally, the motion to reconsider is debatable, and normally the motion to reconsider can be made on the same day or on any one of the next 2 days of session. So there again the expedited procedure is casting aside the Standing Rules of the Senate. One of the most dangerous of the expedited procedures states that "any other motion shall be decided without debate."

Suppose a Senator rises and moves that the Senate proceed to take up the line-item veto? This amendment language which I hold in my hand says that "any other motion shall be decided without debate."

A Senator could move to proceed to the line-item veto. He could move to take up legislation on acid rain. It would not matter how important or controversial the subject might be, any motion to proceed to it would be without debate. I don't believe Mr. KASTEN really means his amendment to do that.

And even if the Senate were operating under cloture. "It shall be in order, notwithstanding rule XXII of the Standing Rules of the Senate or any other rule, at any time to move to proceed to the immediate consideration of the joint resolution."

I have never seen anything that would quite outdo that particular language. Once cloture is invoked, then the Senate cannot turn to any other business, except by unanimous consent. The amendment or the measure that is clotured must remain the unfinished business of the Senate until it is disposed of under rule XXII, except by unanimous consent. But this language by the distinguished Senator from Wisconsin would provide that even in a cloture situation it would be in order to move to proceed to take up something else.

Mr. President, I see the distinguished majority leader is on the floor. I wonder if the distinguished majority leader would be willing to set this amendment aside for the remainder of the day and possibly do the airport security bill, and resume action on this legislation tomorrow. I ask this because it may be possible, on some of the language that gives this Senator concern—and hopefully should give other Senators concern, to modify the language in Mr. KASTEN's amendment so as to avoid pitfalls I have described.

I do not think that the author of the amendment intends some of the results which I refer to. I am not talking about the bill, itself, which is before the Senate. I share the able Senator's desire to get away from so much regulation, overregulation, by the Federal Government. It is a commendable objective. But I am concerned that the suggested expedited procedures in some instances will lend themselves to mischief. I do not think that is the intention of the distinguished Senator at all. I do not think that is his desire.

His objective is one thing, but it seems to me that some of the procedural language here could create mischief. I am afraid that we more and more and more are getting away from the Standing Rules and precedents of the Senate.

This is supposed to be a deliberative body. That is the difference between this body and the other body. We are getting to the point where we are expediting our procedures so much that the Senate is no longer going to be a deliberative body. That was the genius of its creation by the Founding Fathers.

Perhaps we could have overnight to further look at the amendment by Mr. KASTEN and the Levin-Grassley amendment which I understand will be coming along. I am not interested in attempting to torpedo the amendments. I am interested in removing some of the areas which may do unintended mischief. I would hope that we could slow down a stampede toward expedited procedures on this, that, and everything else.

There are some items, such as the MX I was talking about, which I think are well served by having expedited procedures. The Budget Reform Act is full of expedited procedures. In fact, we expedited procedures under that act so much we have almost choked ourselves to death.

I yield to the distinguished majority leader.

The PRESIDING OFFICER (Mr. CHAFEE). The majority leader.

Mr. DOLE. Mr. President, what the majority leader would like to do is to temporarily set aside the pending legislation and take up the airport security legislation. I understand it is not controversial but a rollcall vote would be required. There are a number of my colleagues, I understand, who have commitments which begin before too long.

Then I would hope that, as the distinguished minority leader has suggested, we go back on this bill tomorrow and there might be some accommodation made to remove what is viewed, I am certain very objectively, as a problem.

Perhaps I better let the manager of the bill respond to that. But it would be my belief that if we could stay on the bill tomorrow, we could complete action. We would also move on to an energy bill, S. 410, tomorrow and complete action on that.

There are a couple of veterans' bills that are important to veterans, but which are not controversial, which we hope we can include tomorrow. I think there would be two or three more.

Mr. KASTEN. Will the Senator yield?

Mr. DOLE. I think the distinguished minority leader has the floor.

Mr. BYRD. I yield to the distinguished author of the amendment.

Mr. KASTEN. Mr. President, I wish to respond to the distinguished Senator from West Virginia.

The expedited procedures to which he referred are the expedited procedures in general that were included in the regulatory reform bill we worked from that was passed by the Senate on March 23, 1982. They are also the same expedited procedures, essentially the same expedited procedures, that are presently in the FTC Act right now. So what we did was try to follow the expedited procedures which, in fact, had already been agreed to by both bodies.

The Senator is absolutely correct when he assured that the Senator from Wisconsin, the author of this legislation, is not trying to create mischief with the Senate rules. I am not.

Mr. BYRD. I am absolutely sure of that.

Mr. KASTEN. What we have picked up here we have tracked from what is present law on the one hand and what has passed the Senate on the other. But without unnecessarily delaying action, it would be my hope that the Senator and I and possibly our staffs, or either or both, could review a couple of these points that were raised today. We would make every effort to accommodate his concerns.

I just hope that this does not mean that we would be unable to complete this legislation, one way or another, tomorrow. It seems to me that we ought to be able to move through. The Senate has, as I say, on two different occasions considered basically this set of expedited procedures and agreed to them.

Mr. BYRD. I share that hope, Mr. President. I certainly have no desire to torpedo action on this legislation.

I again apologize to Mr. KASTEN and others for having caused the delay by some several hours on this amendment. My own delay was not entirely under my control. As all Senators, I have very busy schedules that were set prior to today, and have to live according to those schedules. If we have constituents coming in, we have to see them. I am sorry for the delay.

I just have not had an opportunity until the last 2 hours to concentrate on this amendment and I am sorry.

Mr. President, may I say to the distinguished majority leader before I yield the floor that my side has cleared the airport security legislation. I think we need a little time for some Senators to reach the floor, and suggest we have 20 minutes or some such before a rollcall vote.

Mr. DOLE. Could we do this? I understand it is not controversial. Let the rollcall run. Could we do it the other way? Agree to let the rollcall run to accommodate these Senators?

Mr. BYRD. That is agreeable to me. I yield the floor.

Mr. DOLE. Mr. President, I ask unanimous consent to temporarily set aside S. 1078 and the pending amendments thereto and that we turn to Senate Resolution 203, the budget waiver to accompany H.R. 2796, the airport security standards bill.

The PRESIDING OFFICER (Mr. ANDREWS). Without objection, it is so ordered.

BUDGET ACT WAIVER

The PRESIDING OFFICER. The clerk will state the resolution.

The assistant legislative clerk read as follows:

A Senate Resolution (S. Res. 203): Waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of H.R. 2796.

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of H.R. 2796. Such waiver is necessary because H.R. 2796 authorizes the enactment of new budget authority which would first become available in fiscal years before fiscal year 1987, and such bill was not reported prior to the statutory deadline imposed by section 402(a) of the Congressional Budget Act of 1974 for such authorizations.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

Mr. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the resolution.

The resolution (S. Res. 203) was agreed to.

Mr. DANFORTH. I move to reconsider the vote by which the resolution was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AIR TRAVELER PROTECTION ACT OF 1985

Mr. DANFORTH. Mr. President, I ask unanimous consent that the Senate now turn to Calendar No. 243, H.R. 2796, the airport security bill.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 2796) to improve security standards for international air transportation.

The Senate proceeded to consider the bill, which had been reported from the Committee on Commerce, Science, and Transportation, with an amendment to strike out all after the enacting clause, and insert the following:

That this Act may be cited as the "Air Traveler Protection Act of 1985".

SECURITY STANDARDS IN FOREIGN AIR TRANSPORTATION

SEC. 2. (a) Section 1115 of the Federal Aviation Act of 1958 (49 App. U.S.C. 1515) is amended to read as follows:

"SECURITY STANDARDS IN FOREIGN AIR TRANSPORTATION

"ASSESSMENT OF SECURITY MEASURES

"SEC. 1115. (a)(1) The Secretary of Transportation shall conduct at such intervals as the Secretary shall consider necessary an assessment of the effectiveness of the security measures maintained at those foreign airports being served by air carriers, those foreign airports from which foreign air carriers serve the United States, and at such other foreign airports as the Secretary may consider appropriate.

"(2) Each such assessment shall be made by the Secretary in consultation with the appropriate aeronautic authorities of the concerned foreign government and each air carrier serving the foreign airport at which the Secretary is conducting such assessment.

"(3) The assessment shall determine the extent to which an airport maintains and administers effective security measures. In making an assessment of any airport under this subsection, the Secretary shall use a standard which will result in an analysis of the security measures at such airport based upon, at a minimum, the standards contained in Annex 17 to the Convention on International Civil Aviation, as such standards are in effect on the date of such assessment.

"(4) Each report required by section 315 of this Act shall contain a summary of the assessments conducted pursuant to this subsection.

"NOTIFICATION OF FINDINGS; PROVISION OF TECHNICAL ASSISTANCE

"(b)(1) Whenever, after an assessment in accordance with subsection (a) of this section, the Secretary of Transportation determines that a foreign airport does not maintain and administer effective security measures, the Secretary shall notify the appropriate authorities of such foreign government of such determination, and recommend the steps necessary to bring the security measures in use at that airport up to the standard used by the Secretary in making such assessment.

"(2) The Secretary may, in order to assist a foreign government to take any such steps, provide technical assistance concerning aviation security to that foreign government. Such technical assistance may include the conduct of surveys to analyze the level of aviation security at such airport and the provision of training in aviation security to nationals of that foreign government. Such training in aviation security may be conducted either in the United States or in the involved foreign nation. The Security may provide for the payment of subsistence and expenses for travel within the United States for any foreign national receiving such aviation security training in the United States. The Secretary may require any such foreign government to reimburse the United States for all, part, or none of the cost of providing the technical assistance authorized under this paragraph.

"NOTICE OF INEFFECTIVE SECURITY MEASURES

"(c)(1) Subject to paragraph (2) of this subsection, if the Secretary of Transportation determines pursuant to subsection (a) of this section that an airport does not maintain and administer effective security measures, the Secretary—

"(A) shall publish in the Federal Register the identity of such airport, shall notify the news media of the identity of such airport, and shall cause the identity of such airport to be posted and prominently displayed at all United States airports from which air carriers provide foreign air transportation; and

"(B) may, after consultation with the appropriate aeronautical authorities of such foreign government and each air carrier serving such airport and with the approval of the Secretary of State, notwithstanding section 1102 of this Act withhold, revoke, or impose conditions on the operating authority of any air carrier or foreign air carrier to engage in foreign air transportation utilizing such airport.

"(2) Paragraph (1) of this subsection shall become effective sixty days after the notification required in subsection (b)(1) of this section, if the Secretary determines that the relevant foreign government has failed to bring the security measures at the identified airport up to the standard used by the Secretary in making an assessment of such airport under subsection (a) of this section, except that paragraph (1) of this subsection shall become effective immediately upon such determination if the Secretary determines that a condition exists that threatens the safety or security of passengers, aircraft, or crew traveling to or from such airport.

"(3) The Secretary may cancel the requirements of paragraph (1)(A) of this subsection only if the Secretary determines that effective security measures are maintained and administered at the identified airport. If the Secretary cancels such requirements, the Secretary shall notify the news media and Congress of such cancellation.

"(4) The Secretary shall promptly report to the Congress any action taken under this subsection, including information concerning the attempts made to secure the cooperation of the relevant foreign government in meeting the standard used by the Secretary in making the assessment of such airport under subsection (a) of this section.

"IMMEDIATE SUSPENSION OF SERVICES

"(d) Notwithstanding the provisions of this section and sections 1102 and 1114 of this Act, whenever the Secretary of Transportation determines that—

"(1) a condition exists that threatens the safety or security of passengers, aircraft, or crew traveling to or from a foreign airport, and

"(2) the public interest requires an immediate suspension of services between the United States and such airport,

the Secretary shall, without notice or hearing and with the approval of the Secretary of State, suspend the right of any air carrier or foreign air carrier to engage in foreign air transportation to or from such airport and the right of any persons to operate aircraft in foreign air commerce to or from such airport.

"CONDITIONS OF AUTHORITY

"(e) The provisions of this section shall be deemed to be a condition to any authority issued to any air carrier or any foreign air carrier by the Administrator under title VI of this Act or by the Secretary of Transportation under title IV of this Act.".

(b) Section 315(a) of the Federal Aviation Act of 1958 (49 App. U.S.C. 1356(a)) is amended by adding at the end thereof the following: "Each such semiannual report shall include the information specified in section 1115(a) of this Act.".

(c) That portion of the table of contents contained in the first section of the Federal Aviation Act of 1958 which appears under the center heading

"TITLE XI—MISCELLANEOUS"

is amended by striking

"Sec. 1115. Security standards in foreign air transportation."

and inserting in lieu thereof

"SEC. 1115. SECURITY STANDARDS IN FOREIGN AIR TRANSPORTATION.

"(a) Assessment of security measures.

"(b) Notification of findings; provision of technical assistance.

"(c) Notice of ineffective security measures.

"(d) Immediate suspension of services.

"(e) Conditions of authority.".

AIR MARSHAL PROGRAM

SEC. 3. (a) As soon as practicable after the date of enactment of this Act, the Secretary of Transportation, in consultation with the Secretary of State, shall study the need for an expanded air marshal program on international flights by United States air carriers. The Secretary of Transportation shall, within six months after the date of enactment of this Act, report the results of such study to the Congress, together with such recommendations as the Secretary determines to be necessary or appropriate to implement the result of such study.

(b) Section 316(e) of the Federal Aviation Act of 1958 (49 App. U.S.C. 1357(e)) is amended by adding at the end thereof the following:

"(4) The Administrator, after consultation with the Attorney General and the Secretary of State, may procure firearms for use by persons in connection with the performance of their air transportation security duties, and may authorize such persons to carry such firearms. The Administrator may authorize such persons to make arrests without warrant for any offense against the United States committed in their presence, or for any felony cognizable under the laws of the United States, if they have reasonable grounds to believe that the person to be arrested has committed or is committing a felony.".

RESEARCH ON AIRPORT AND AIRCRAFT SECURITY DEVICES

SEC. 4. Pursuant to section 316(d)(1) of the Federal Aviation Act of 1958 (49 App. U.S.C. 1357(d)(1)), in order to improve security at international airports and aboard commercial passenger aircraft, there are authorized to be appropriated to the Secretary of Transportation from the Airport and Airway Trust Fund, in addition to amounts otherwise available for such purposes, $10,000,000, without fiscal year limitation, for the purpose of research on and development of airport and aircraft security devices and techniques for detecting explosives.

Mr. DANFORTH. Mr. President, on July 16, 1985, Senator KASSEBAUM and I, together with several other distinguished members of the Commerce Committee, introduced S. 1436, the Air Traveler Protection Act of 1985. We did so out of deep concern for international aviation security, in the wake of the TWA hijacking and other recent terrorist acts directed against civil aviation.

The purpose of this legislation is to encourage and assist the administration in taking firm, effective action to counter airport terrorism and aircraft hijacking, anywhere in the world. It does so by directing the Secretary of Transportation to assess security at foreign airports, and to assist foreign governments in correcting any security deficiencies. In the event that any such deficiency is not promptly corrected, the legislation requires that the American people be immediately informed that a security risk may exist at that airport. At airports where lax security represents an immediate threat to travelers, the bill requires U.S. air carriers to cease operations at that airport entirely.

In addition, the legislation calls upon the Secretary to examine the question of whether the Federal Air Marshal Program should be expanded, and also authorizes $10 million for research into and development of procedures and technology for detecting explosives aboard aircraft and in airports.

On July 18, the Commerce Committee unanimously reported this legislation under the number H.R. 2796. I commend my colleagues on the committee—and Aviation Subcommittee Chairman KASSEBAUM in particular—for their quick and responsible action in taking this new initiative to help protect innocent travelers everywhere from violence and terrorism. I urge my colleagues in the Senate to give this bill their fullest support.

Mr. President, this bill is a response to the obvious problem of airport security, brought to the attention of all of us by the hijacking of TWA Flight 827. The provisions of the bill are as follows: The bill would require the Secretary of Transportation to assess security at international airports and identify any deficiencies. Where security is found to be lacking, the Secretary is directed to notify the appropriate foreign government of that determination, recommend steps to remedy the deficiency, and offer technical assistance to help correct the problem.

If, in 60 days after the notification, airport security has not been brought up to standards, the Secretary is directed to advise the traveling public of the risk through notice to the press and appropriate signs in United States airports serving international destinations. Where airport security at a foreign airport poses a serious risk to United States travelers, the Secretary is directed to suspend immediately the authority of our carriers to serve that airport and to suspend the authority of that country's carriers to serve our airports. The Secretary is required to study the need for an expanded Air Marshal Program. The bill does not mandate the deployment of marshals in any location, nor require their use on any flight.

The bill authorizes $10 million without fiscal year limitation from the Airport and Airways Trust Fund for research and development of procedures and technology for detecting explosives aboard aircraft and in airports.

Mr. President, I suggest the absence of a quorum.

Mr. CHAFEE. Before we do that, Mr. President, may I ask the manager of the bill a question?

The PRESIDING OFFICER. The Senator from Rhode Island.

Mr. CHAFEE. I think everything he is proposing is excellent. I just want to ask, as I understood the provisions, if the Secretary of Transportation found that an international airport is not meeting the standards that she felt was required, we would offer technical assistance to that airport to meet the standards. Does the Secretary have the capability and manpower and finances to meet that requirement?

In other words, it would seem to me that if we set up a standard where we say we are going to help them but we cannot, just due to shortage of people——

Mr. DANFORTH. The answer to that question is yes, the Department of Transportation does have such personnel now, and does provide such advice and assistance now. The portion of the bill in question clarifies the Secretary's authority to do so.

Mr. CHAFEE. Just out of curiosity, and I shall not press if we do not have that information, how many international airports are there that our carriers fly into? Are we talking in the hundreds or are we talking in the scores?

Mr. DANFORTH. Perhaps as many as 100 or 150.

Mr. CHAFEE. Fine. I thank the Senator very much.

Mr. HOLLINGS. Mr. President, in the past several years, we have seen an increase in international terrorism that threatens life itself. And we have seen in the past few months how this wave of terrorism has been directed toward the air traveler through increased hijackings and bombings.

This was brought close to home last month by the hijacking of TWA flight 847 from Athens to Beirut and the holding of some 40 American citizens as hostages. Other recent terrorist actions in aviation have included the bombing of airports in Frankfurt, West Germany, and Narita, Japan. And there remains some speculation as to whether or not 329 Air India passengers died from a terrorist bomb over the Atlantic Ocean.

The need for action has been apparent. To her credit, Secretary of Transportation Elizabeth Dole has taken steps to minimize terrorism in aviation by imposing emergency security measures for baggage and cargo. She has also gone before the International Civil Aviation Organization, urging that its members take steps to inhibit future terrorist activities at international airports.

However, we need much more. The President and the Secretary of Transportation need expanded powers to move against such terrorism. For that reason, I have cosponsored several bills aimed at increasing security at foreign airports such as Athens, as well as to explore the need for an expanded Air Marshal Program.

Last week, the Commerce Committee approved one such measure, H.R. 2796, which is before us today. I am pleased to have joined Senator KASSEBAUM, the chairman of the Aviation Subcommittee in sponsoring H.R. 2796 and believe that it represents a strong, comprehensive approach to enhancing aviation security.

H.R. 2796 takes several important steps toward improving security aboard aircraft and in airports. Specifically, it would:

Require the Secretary of Transportation to conduct assessments of security measures at foreign airports served by U.S. airlines and foreign air carriers serving the United States. The Secretary would then be required to work with foreign authorities to resolve any problems that might be discovered, as well as to provide technical assistance that foreign authorities may need.

If, after 60 days, the security deficiencies are not resolved, the Secretary would be required to publish a list of those problem airports, while posting such a list at U.S. airports having international air service.

Give the Secretary authority to suspend immediately, without notice or hearing, the rights of any air carrier to serve such a security-deficient airport to or from the United States.

Direct the Secretary to study the need for an expanded Air Marshal Program, while authorizing FAA personnel to be used as armed air marshals.

Authorize $10 million from the aviation trust fund for research into enhanced explosives detection devices for aircraft and in airports.

Mr. President, U.S. citizens should not have to fear for their lives any time they board an aircraft bound for a foreign destination. This legislation provides the tools needed to increase aviation safety and to ensure the security of air travelers.

H.R. 2796 will free aviation of the reign of terror which has recently reared its ugly head. I urge my colleagues to support its passage.

Mr. GORTON. Mr. President, I shared the feelings of relief and gratitude of all Americans when the passengers aboard TWA flight 847 were released by their captors several weeks ago. However, we cannot forget that before this happy conclusion came the death of a fine young man and weeks of terror for the people taken hostage by the hijackers. In order to guard against similar incidents in the future, we must step up our efforts to make airports secure around the world.

S. 1436, the Air Traveler Protection Act of 1985, is an appropriate step in that direction. By providing a mechanism whereby the Department of Transportation can evaluate the safety of foreign airports, and then assist in improving safety measures if necessary, the bill takes a positive approach toward stopping hijackings on the ground. By providing for a study of the need for an expanded Air Marshal Program, it also recognizes that we must try to develop effective measures for handling hijackings once they are in motion.

The ability to travel, to move about at will, is one of the most cherished of our freedoms. And yet our citizens are not truly free if they must fear for their safety while traveling abroad. I therefore offer my support for S. 1436, and urge my colleagues to join me in that support.

Mr. LAUTENBERG. Mr. President, I rise in support of final passage of the Air Traveler Protection Act of 1985.

The need to upgrade and modernize existing air security measures has been all too clearly demonstrated in recent weeks. The hijacking of TWA flight 847 revealed again the relative ease with which armed terrorists can board aircraft and take control of innocent lives. The downing of an Air India plane with 329 passengers aboard demonstrated that terrorist need not hold a gun to passengers' throats to place their lives in jeopardy.

These tragedies, so close together and so terrible, have contributed to the fear that international air travel may not be safe. Swift action must be taken to correct this situation. Americans must be able to travel without fear, free from the threat of hijacking or bombs. If one American is threatened by terrorism, no American is safe.

This bill, a combination of many excellent proposals that were the subject of a recent Commerce Committee hearing, takes concrete steps to improve the security of Americans traveling abroad.

It requires the Department of Transportation to conduct an assessment of safety at various international airports and to provide technical assistance and other help to foreign governments to improve security problems at their airports. It also empowers the Department of Transportation to release a list of unsafe airports to the media, to publish that list in the Federal Register, and to post the list at U.S. gateways if no improvements are forthcoming in airports deemed unsafe.

The Air Traveler Safety Act of 1985 also contains two proposals with which I have been particularly involved.

The first authorizes $10 million in additional funds from the Airport and Airway Trust Fund for research on air security by the Federal Aviation Administration [FAA]. This research includes the development of improved methods for detecting explosives, screening baggage and cargo quickly and effectively, and preventing weapons from being stowed aboard aircraft.

The headquarters for the National Air Security Research Program is at the FAA Technical Center in Pomona, N.J. Through recent contacts with the center, I learned of a proposed plan to accelerate the Research Program, and of the need for additional funding to accomplish the accelerated goals. Because of the national importance of this work, I urged Secretary of Transportation Dole to adopt the proposed accelerated plan, and implement it as quickly as possible.

This week, Transportation Department officials have informed me that they intend to implement the accelerated plan. With this bill, the remainder of additional funds necessary to implement this critical research plan will be authorized.

In light of increasing terrorist activity, there can be no doubt that funding for Air Security Research Programs has been inadequate to safeguard airline passengers. The need to devote more resources to protecting air travelers is clear. The number of Americans traveling abroad has been increasing in recent years. As recent events demonstrate, these travelers are highly susceptible to action by terrorists with little or no concern for their own lives, or those of their victims.

New Jersey has a particularly compelling interest in assuring air travelers safe passage as Newark International Airport services a growing number of international passengers each year. In 1984, over 1 million overseas passengers used Newark Airport,

and overseas flights to and from that airport totaled 560. This figure is expected to grow in the coming years.

In order to combat the increasing sophistication of international terrorism, this important area of air security research and development must receive priority attention and funding. The funding provided in this bill will complement increasing efforts in this direction, and ensure adequate funding for this important air security research program.

The second provision which deserves special attention authorizes a study of the need for an expanded Air Marshal Program and permits the Federal Aviation Administration to deputize FAA personnel to act as air marshals. I recently testified before the Senate Commerce Committee in support of consideration of an expanded Air Marshal Program to combat terrorism.

By raising the specter of resistance, the presence of sky marshals could help deter hijackings or lessen their likelihood of success. Putting teams of sky marshals on selected high risk flights could give potential hijackers second thoughts by raising the costs of such an act.

Putting sky marshals on U.S. planes is not a new idea. Sky marshals were used in the late 1960's and early 1970's on domestic flights of U.S. commercial carriers in response to the rash of hijackings to Cuba. At its peak, the program employed 2,500 sky marshals. Today, sky marshals are still in use although the FAA will not disclose their precise functions for security reasons. The Israeli airline El Al, long known for its strict and successful precautions against terrorism, uses counterterrorist personnel on its flights.

Mr. President, it is indeed unfortunate that quick movement on this legislation has been spurred by the spate of hijacking and air bombing incidents that have occurred in the last weeks. American people have a right to travel freely without fear of being taken hostage or killed by terrorists. We in Congress have an obligation to do what is necessary to protect that right and make it a reality.

The measures contained in the Air Traveler Protection Act of 1985 go a long way toward ensuring the safety of millions of innocent airline passengers, and I urge my colleagues to support this bill.

Mr. DANFORTH. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. If there be no further amendment to be proposed, the question is on agreeing to the committee amendment in the nature of a substitute.

The committee amendment was agreed to.

The PRESIDING OFFICER. The question is on the engrossment of the committee amendment and third reading of the bill.

The amendment was ordered to be engrossed, and the bill to be read a third time.

The bill was read a third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

Mr. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DANFORTH. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on final passage of the bill. The clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Colorado [Mr. ARMSTRONG] and the Senator from South Dakota [Mr. PRESSLER] are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Missouri [Mr. EAGLETON] and the Senator from Mississippi [Mr. STENNIS] are necessarily absent.

The result was announced—yeas 96, nays 0, as follows:

[Rollcall Vote No. 162 Leg.]

So the bill (H.R. 2796), as amended, was passed.

The title was amended so as to read: "A bill to improve safety and security of persons who travel in foreign air transportation, and for other purposes."

Mr. DOLE. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. DANFORTH. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I announce that will be the last vote this evening.

ORDER FOR INDEFINITE POSTPONEMENT OF S. 979

Mr. DOLE. Mr. President, I ask unanimous consent that Calendar No. 157, S. 979, the Energy Policy Conservation Act, be indefinitely postponed.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORPHAN DRUG AMENDMENTS OF 1985

Mr. DOLE. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 1147.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 1147) entitled "An Act to amend the orphan drug provisions of the Federal Food, Drug, and Cosmetic Act and related laws", do pass with the following amendment:

Strike out all after the enacting clause and insert:

SECTION 1. SHORT TITLE.

This Act may be cited as the "Orphan Drug Amendments of 1985".

SEC. 2. MARKET PROTECTION.

Section 527 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360cc) is amended—

(1) by striking out "and for which a United States Letter of Patent may not be issued" in subsection (a);

(2) by striking out "and if a United States Letter of Patent may not be issued for the drug" in subsection (b); and

(3) by striking out "UNPATENTED" in the title of the section.

SEC. 3. ANTIBIOTIC DRUGS.

(a) DESIGNATION.—

(1) Section 525(a) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360aa(a)) is amended—

(A) by striking out "or" at the end of paragraph (1), by redesignating paragraph (2) as paragraph (3), and by inserting after paragraph (1) the following:

"(2) if the drug is an antibiotic, it may be certified for such disease or condition under section 507, or";

(B) by striking out "before" in paragraph (3) (as so redesignated);

(C) by inserting after "505" in the last sentence a comma and the following: "certification of such drug for such disease or condition under section 507,"; and

(D) by striking out "licensing under section 351 of the Public Health Service Act for such disease or condition" and inserting in lieu thereof "licensing of such drug for such disease or condition under section 351 of the Public Health Service Act".

(2) Section 526(a)(1) of such Act (21 U.S.C. 360bb(a)(1)) is amended—

(A) by striking out "or" at the end of subparagraph (A) and by striking our subparagraph (B) and inserting in lieu thereof the following:

"(B) if a certification for such drug is issued under section 507, or

"(C) if a license for such drug is issued under section 351 of the Public Health Service Act,"; and

(B) by striking out "the approval or license" and inserting in lieu thereof "the approval, certification, or license".

(3) Section 527 of such Act (21 U.S.C. 360cc) is amended—

(A) by striking out "or" at the end of paragraph (1) in subsection (a), by redesignating paragraph (2) as paragraph (3), and by inserting after paragraph (1) the following:

"(2) issues a certification under section 50, or";

(B) by inserting after "505" in the first sentence of subsection (a) a comma and the following: "issue another certification under section 507,";

(C) by inserting after "holder of such approved application" in subsection (a) a comma and the following: "of such certification,";

(D) by inserting after "approval of the approved application" in subsection (a) a comma and the following: "the issuance of the certification,";

(E) by striking out "or a license" in subsection (b) and inserting in lieu thereof a comma and the following: "if a certification is issued under section 507 for such a drug, or if a license";

(F) by inserting after "application approval" in subsection (b) a comma and the following: "of the issuance of the certification under section 507,";

(G) by striking out, "if the drug is a biological product," in subsection (b);

(H) by inserting after "under section 505" in subsection (b) a comma and the following: ", issue another certification under section 507,";

(I) by inserting after "holder of such approved application" in subsection (b) a comma and the following: "of such certification,";

(J) by inserting after "application" in subsection (b)(1) a comma and the following: "of the certification,"; and

(K) by inserting after "other applications" in subsection (b)(2) a comma and the following: issuance of other certification,".

SEC. 4. NATIONAL COMMISSION ON ORPHAN DISEASES.

(a) ESTABLISHMENT.—There is established the National Commission on Orphan Diseases (hereinafter referred to as the "Commission").

(b) DUTY.—The Commission shall assess the activities of the National Institutes of Health, the Alcohol, Drug Abuse, and Mental Health Administration, the Food and Drug Administration, other public agencies, and private entities in connection with—

(1) basic research conducted on rare diseases;

(2) the use in research on rare diseases of knowledge developed in other research;

(3) applied and clinical research on the prevention, diagnosis, and treatment of rare diseases; and

(4) the dissemination to the public, health care professionals, researchers, and drug and medical device manufacturers of knowledge developed in research on rare diseases and other diseases which can be used in the prevention, diagnosis, and treatment of rare diseases.

(c) REVIEW REQUIREMENTS.—In assessing the activities of the National Institutes of Health, the Alcohol, Drug Abuse, and Mental Health Administration, and the Food and Drug Administration in connection with research on rare diseases, the Commission shall review—

(1) the appropriateness of the priorities currently placed on research on rare diseases;

(2) the relative effectiveness of grants and contracts when used to fund research on rare diseases;

(3) the appropriateness of specific requirements applicable to applications for funds for research on rare diseases taking into consideration the reasonable capacity of applicants to meet such requirements;

(4) the adequacy of the scientific basis for such research, including the adequacy of the research facilities and research resources used in such research and the appropriateness of the scientific training of the personnel engaged in such research;

(5) the effectiveness of activities undertaken to encourage such research;

(6) the organization of the peer review process applicable to applications for funds for such research to determine if the organization of the peer review process could be revised to improve the effectiveness of the review provided to proposals for research on rare diseases;

(7) the effectiveness of the coordination between the national research institutes of the National Institutes of Health, the institutes of the Alcohol, Drug Abuse, and Mental Health Administration, the Food and Drug Administration, and private entities in supporting such research; and

(8) the effectiveness of activities undertaken to assure that knowledge developed in research on nonrare diseases is, when appropriate, used in research on rare diseases.

(d) COMPOSITION.—The Commission shall be composed of twenty members appointed by the Secretary of Health and Human Services as follows:

(1) Ten members shall be appointed from individuals who are not officers or employees of the Government and who by virtue of their training or experience in research on rare diseases or in the treatment of rare diseases are qualified to serve on the Commission.

(2) Five members shall be appointed from individuals who are not officers or employees of the Government and who have a rare disease or are employed to represent or are members of an organization concerned about rare disease.

(3) Four nonvoting members shall be appointed from—

(A) the directors of the national research institutes of the National Institutes of Health; or

(B) the directors of the institutes of the Alcohol, Drug Abuse, and Mental Health Administration,

which the Secretary determines are involved with rare diseases.

(4) One nonvoting member shall be appointed from officers or employees of the Food and Drug Administration who the Secretary determines are involved with rare diseases.

a vacancy in the Commission shall be filled in the manner in which the original appointment was made. If any member of the Commission who was appointed to the Commission as a director of a national research institute or an institute of the Alcohol, Drug Abuse, and Mental Health Administration or as an officer or employee of the Food and Drug Administration leaves that office or position, or if any member of the Commission who was appointed from persons who are not officers or employees of the Government becomes an officer or employee of the Government, such member may continue as a member of the Commission for not longer than the ninety-day period beginning on the date such member leaves that office or position or becomes such an officer or employee, as the case may be.

(e) TERM.—Members shall be appointed for the life of the Commission.

(f) COMPENSATION.—

(1) Except as provided in paragraph (2), members of the Commission shall each be entitled to receive compensation at a rate not to exceed the daily equivalent of the annual rate of basic pay in effect for grade GS-18 of the General Schedule for each day (including traveltime) during which they are engaged in the actual performance of duties as members of the Commission.

(2) Members of the Commission who are full-time officers or employees of the Government shall receive no additional pay by reason of their service on the Commission.

(g) CHAIRMAN.—The Chairman of the Commission shall be designated by the members of the Commission.

(h) STAFF.—Subject to such rules as may be prescribed by the Commission, the Commission may appoint and fix the pay of such personnel as it determines are necessary to enable the Commission to carry out its functions. Personnel shall be appointed subject to the provisions of title 5, United States Code, governing appointments in the competitive service, and shall be paid in accordance with the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates.

(i) EXPERTS AND CONSULTANTS.—Subject to such rules as may be prescribed by the Commission, the Commission may procure temporary and intermittent services under section 3109(b) of title 5 of the United States Code, but at rates for individuals not to exceed the daily equivalent of the basic pay payable for grade GS-15 of the General Schedule.

(j) DETAIL OF PERSONNEL.—Upon request of the Commission, the head of any Federal agency is authorized to detail, on a reimbursable basis, any of the personnel of such agency to the Commission to assist the Commission in carrying out its functions.

(k) ADMINISTRATIVE SUPPORT SERVICES.—The Administrator of General Services shall provide to the Commission on a reimbursable basis such administrative support services as the Commission may request.

(l) GENERAL AUTHORITY.—The Commission may, for the purpose of carrying out this section, hold such hearings, sit and act at such times and places, take such testimony, and receive such evidence, as the Commission considers appropriate.

(m) INFORMATION.—The Commission may secure directly from any department or agency of the United States information necessary to enable it to carry out this section. Upon request of the Chairman, the head of such department or agency shall furnish such information to the Commission.

(n) REPORT.—The Commission shall transmit to the Secretary and to each House of the Congress a report not later than Sep-

tember 30, 1987, on the activities of the Commission. The report shall contain a detailed statement of the findings and conclusions of the Commission, together with its recommendations for—

(1) a long range plan for the use of public and private resources to improve research into rare diseases and to assist in the prevention, diagnosis, and treatment of rare diseases; and

(2) such legislation or administrative actions as it considers appropriate.

(o) TERMINATION.—The Commission shall terminate 90 days after the date of the submittal of its report under subsection (n).

(p) FUNDS.—The Director of the National Institutes of Health shall make available $1,000,000 to the Commission from appropriations for fiscal year 1986 for the National Institutes of Health.

SEC. 5. FINANCIAL ASSISTANCE.

(a) QUALIFIED TESTING.—Section 5 of the Orphan Drug Act (21 U.S.C. 360ee) is amended—

(1) in subsection (a) by striking out "clinical"; and

(2) by amending subsection (b)(1) to read as follows:

"(1) the term 'qualified testing' means—

"(A) human clinical testing—

"(i) which is carried out under an exemption for a drug for a rare disease or condition under section 505(i) of the Federal Food, Drug, or Cosmetic Act (or regulations issued under such section); and

"(ii) which occurs after the date such drug is designated under section 526 of such Act and before the date on which an application with respect to such drug is submitted under section 505(b) or 507 of such Act or under section 351 of the Public Health Service Act; and

"(B) preclinical testing involving a drug for a rare disease or condition which occurs after the date such drug is designated under section 526 of such Act and before the date on which an application with respect to such drug is submitted under section 505(b) or 507 of such Act or under section 351 of the Public Health Service Act.".

(b) AUTHORIZATION.—Subsection (c) of such section 5 is amended to read as follows:

"(c) For grants and contracts under subsection (a) there are authorized to be appropriated $4,000,000 for fiscal year 1986, $4,000,000 for fiscal year 1987, and $4,000,000 for fiscal year 1988.".

SEC. 6. TECHNICAL CORRECTIONS.

(a) PUBLIC LAW 98-619.—The paragraph following the heading "education for the handicapped" under title III of the Departments of Labor, Health and Human Services, and Education and Related Agencies Appropriation Act, 1985 (Public Law 98-619) is amended—

(1) by inserting after "shall" the first time it appears a comma and the following: "except for part D of such Act,", and

(2) by adding at the end thereof the following: "The amounts available for such part D shall be available for obligation on October 1, 1984, and shall remain available until September 30, 1985.".

(b) PUBLIC LAW 98-527.—Section 122(b)(4)(C) of the Developmental Disabilities Assistance and Bill of Rights Act (42 U.S.C. 6022(b)(4)(C)) is amended by inserting "(i)) after "(C)" and by adding at the end the following:

"(ii) Notwithstanding the requirements of subparagraph (E), upon application of a State, which under section 133(b)(4)(C) of this Act, as in effect on October 18, 1984, was permitted to make expenditures for services without regard to the requirements of section 133(b)(4)(B) of this Act as so in effect, the Secretary pursuant to regulations which the Secretary shall prescribe may permit the portion of the fund which must otherwise be expended under the State plan of such State for service activities in a limited number of services to be expended for the additional services for which expenditure was permitted under section 133(b)(4)(C) as so in effect if the Secretary determines that—

"(I) funds are not otherwise available under this Act for such additional services, and

"(II) the expenditures of such State on service activities in the initially specified services has reasonably met the need for those services in such State in comparison to the extent to which the need for such additional services has been met in such State.".

SEC. 7. EFFECTIVE DATE.

(a) GENERAL RULE.—Except as provided in subsection (b), this Act and the amendments made by this Act shall take effect October 1, 1985.

(b) EXCEPTION.—The amendments made by sections 2, 3, and 6(a) shall take effect on the date of the enactment of this Act. The amendment made by section 6(b) shall take effect October 18, 1984.

Mr. DOLE. Mr. President, I ask unanimous consent that it be in order for me to move that the Senate concur in the House amendment with further Senate amendments on behalf of Senator HATCH and ask that they be considered en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. I so move.

AMENDMENT NO. 546

Mr. DOLE. Mr. President, I send the amendments to the desk and ask for their immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Kansas [Mr. DOLE], for Mr. HATCH, proposes amendment No. 546.

Mr. DOLE. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment follows:

(1) Strike out section 6(b) of the House Engrossed Amendment and insert in lieu thereof the following:

(b) Public Law 98-527.—Section 122(b)(4)(C) of the Developmental Disabilities Assistance and Bill of Rights Act (42 U.S.C. 6022(b)(4)(C)) is amended to read as follows:

"(C) Notwithstanding subparagraph (E)(i), upon application of a State, which under section 133(b)(4)(C) of this Act (as in effect on October 18, 1984) was permitted to make expenditures for services without regard to the requirements of section 133(b)(4)(B) of this Act (as so in effect) the Secretary, pursuant to regulations which the Secretary shall prescribe, may permit a portion of the funds which, pursuant to subparagraph (E)(i), must otherwise be expended under the State plan of such State for service activities in the priority services, to be expended in fiscal years 1985, 1986, and 1987 for the additional services for which expenditure was permitted under section 133(b)(4)(C) (as so in effect) if the Secretary determines that—

"(i) such additional services are not priority services;

"(ii) such additional services are not services for which funds are otherwise available under part C, D, or E; and

"(iii) the expenditures of such State on service activities in the priority services has reasonably met the need for those services in such State in comparison to the extent to which the need for such additional services has been met in such State.".

(2) Redesignate section 7 of the House Engrossed Amendment as section 8.

(3) After section 6 of the House Engrossed Amendment insert the following new section:

SEC. 7. AREA HEALTH EDUCATION CENTERS.

Section 781(a)(2) of the Public Health Service Act (42 U.S.C. 295g-7(a)(2)) is amended by redesignating subparagaphs (A), (B), and (C) as clauses (i), (ii), and (iii), respectively, and by striking out all that precedes clause (i) (as so redesignated) and inserting in lieu thereof the following:

"(2)(A) The Secretary shall enter into contracts with schools of medicine and osteopathy—

"(i) which have previously received Federal financial assistance for an area health education center program under section 802 of the Health Professionals Educational Assistance Act of 1976 in fiscal year 1979 or under paragraph (1), or

"(ii) which are receiving assistance under paragraph (1),

to carry out projects described in subparagraph (B) through area health education centers for which Federal financial assistance was provided under paragraph (1) and which are no longer eligible to receive such assistance.

"(B) Projects for which assistance may be provided under subparagraph (A) are—".

(4) In the second sentence of section 8(b) of the House Engrossed Amendment (as redesignated by clause (2) of this motion), strike out "October 18, 1984" and insert in lieu thereof "October 19, 1984".

(5) At the end of section 8(b) of the House Engrossed Amendment (as redesignated by clause (2) of this motion), add the following new sentence: "The amendments made by section 7 shall take effect October 1, 1984 and shall cease to be in effect after September 30, 1985.".

Mr. HATCH. Mr. President, on May 23, the Senate passed the orphan drug amendments without objection. The bill has over 30 Senate sponsors; it is a good bill and a worthy endeavor. The program of orphan product development generated and fostered under the Orphan Drug Act is a joint effort among health researchers, the pharmaceutical industry, voluntary health organizations, and the Government. It is an activity that deserves our support. I, therefore, hope that my Senate colleagues will once again join me and pass S. 1147, as amended by the House, with an amendment.

The House amended S. 1147 by incorporating a technical change in the Food, Drug, and Cosmetic Act to permit the Food and Drug Administration [FDA] to designate antibiotics as orphan drugs. This change is really a

clarification of congressional intent that antibiotics may be designated as orphan drugs and are included within the scope of the Orphan Drug Act. In a recent letter to Representatives MADIGAN and WAXMAN, FDA Commissioner Young wrote, in part:

> . . . Congress should enact a technical amendment to the Orphan Drug Act specifically to include drugs approved under section 507 (antibiotics) of the Federal Food, Drug, and Cosmetic Act. . . . We are not aware of any reason why antibiotics should be distinguished from other drugs for purposes of orphan drug development and have always taken the view that Congress clearly intended that antibiotics be included under the Orphan Drug Act. . . . we have already designated two antibiotics as orphan drugs under that Act. These designations were based on our understanding of Congressional intent. A technical amendment to the Orphan Drug Act to reflect this view is clearly warranted.

The technical change made by the House accomplishes this and clarifies congressional intent. In no way is there any intention that antibiotics already designated as orphan drugs would need to be redesignated.

Several minor changes were also made by the House in language relating to the National Commission on Orphan Diseases established by S. 1147. One change restores language passed by both House and Senate in the 98th Congress to specify that the $1 million to fund the Commission will be provided from funds appropriated for the National Institutes of Health. Because the Commission will deal primarily with NIH research programs and the NIH review system, the House believes it is appropriate for the funds to come from the NIH budget. I am informed that the administration does not find this objectionable, and I therefore do not disagree. It is clearly understood that these funds will not be taken from the important research supported by various NIH institutes in areas relating to rare diseases.

Finally, the House added a provision to amend language in Public Law 98-527, last year's reauthorization of the Developmental Disabilities Assistance and Bill of Rights Act. This provision corrects a drafting error in the law. The Senate amendment to this provision allows States the option to renew previously granted waivers of nationally mandated priorities until September 30, 1987. The language of this provision has been carefully worked out and agreed to by the chairman of our Subcommittee on the Handicapped, Senator WEICKER.

Mr. President, when the Senate originally passed S. 1147, I noted that considerable progress had been made, spurred by the incentives of the Orphan Drug Act, in developing treatments for a number of rare diseases. At that time, I was especially pleased to be able to mention a particular activity that has very personal meaning for me because it relates to what this legislation has meant in my home State of Utah for children suffering from autism. As a followup to that, I would like to share with my Senate colleagues an article sent to me by the Utah Society for Autistic Children. I ask unanimous consent that this article be inserted in the CONGRESSIONAL RECORD immediately following my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

AUTISM: PROGRESS AND PROMISE

(By the Utah Society for Autistic Children)

Can you imagine having a family member who shuns affection, who does not communicate with others in the family, who will not talk or play with other children, who is always separate and alone? Can you imagine having a child who does not giggle, does not play games, does not hug? If you can, then you can to a limited extent imagine living with autism.

Autism is an incapacitating, lifelong disease which affects approximately 200,000 Americans. Even though it is a little-known, rare condition, there are actually more autistic children than blind children in this country. Autism occurs in all parts of the country, in all social classes, and in all races. Autistic persons require special education when young and lifelong support from governmental, social, and health care agencies throughout adulthood. In individuals suffering from autism, abnormal brain development is present at birth and produces characteristic problems in communication, sensory processing, social behavior, and learning.

Scientists have postulated several causes for autism, including viruses and heredity. The State of Utah is the site for a major study of the causes of autism. Every autistic person in the state is being identified with the cooperation of families, local professionals, and government personnel. Scientists from the University of Utah and UCLA, headed by Dr. Edward R. Ritvo, are uniformly diagnosing patients and collecting scientific information. To date, over 300 families are enrolled in the study. Dr. Ritvo and his associates are searching for common ancestors among the Utah families to aid in determining whether certain types of autism are due to genetic and/or familial factors. Utah offers a rare and unique opportunity for such a comprehensive epidemiologic study because of its stable population, high level of concern for children with developmental difficulties, supportive attitude of medical and education professionals, and the vast genealogical data provided by the participating families. The goals of this study, which will take five more years, are to pinpoint possible specific causes of autism, discover preventive measures to decrease the number of new cases, and to develop new treatments for persons suffering from this debilitating chronic disease.

Now, can you imagine what it might mean to the family of a seven-year-old autistic boy when for the first time in his life he begins to show interest and concern for family members? Rather than rejecting affection and social interaction, he now responds with a hug and comforts his sister when she is hurt.

Can you imagine what it might mean to the family of this boy when he leaves the isolated world of his own bedroom and for the first time prefers to go out into the neighborhood to play with his peers? Can you imagine the family's excitement when this child's attention span and concentration are improved at school and his language becomes less repetitive and more meaningful?

These dramatic changes are not just wishful thinking. They are not just beautiful scenes from a dream. They are part of a reality made possible because of the Orphan Drug Act.

The changes just described came through the use of the drug fenfluramine, a medication being tested for use in autism under the Orphan Drug Act. Without this legislation and its incentives for research and development of drugs for rare diseases, this first known specific medical treatment for autism would not be possible.

Dr. Edward Ritvo and other researchers at UCLA Medical School obtained support from the FDA Orphan Products Development program and the A.H. Robins Company to treat 200 autistic children at 20 medical centers throughout North America with fenfluramine. This product was originally marketed by A.H. Robins as a weight-loss medication, under the trade name Pondimin. Dr. Ritvo's research on similar chemical compounds and on Pondimin itself indicated that it might beneficially affect a possible chemical imbalance within the brains of autistic children. Clinical studies were proposed and are ongoing. The drug has proven successful, and no serious side effects have been observed in the children tested. Final studies are now under way which can lead to FDA approval in the near future. Fenfluramine, while not a cure, will help many victims of autism to "tune in" to the world around them and live more normal lives.

Now imagine a time when the heartbreaking burden of caring for autistic children can be lifted.

Imagine a time when new treatments can be made available to all autistic persons.

Imagine a time when the nearly one million dollars per patient required for lifetime institutionalization can be saved.

Imagine a time when the children of tomorrow who would have been born autistic will live happy, normal lives.

These are our goals and our dreams. Federal research funds provide the means whereby these dreams may become a reality. We should all be proud that in this country we couple our compassion with commitment—both in good legislation, such as the Orphan Drug Act, and in federal research dollars to alleviate the suffering of our autistic citizens and their families.

Mr. WEICKER. Mr. President, as chairman of the Subcommittee on the Handicapped, I appreciate the support of Senator HATCH, chairman of the full Committee on Labor and Human Resources, regarding the amendment to Public Law 98-527, the Development Disabilities Act which was added to S. 1147, the Orphan Drug Act.

I am offering a substitute amendment to Public Law 98-527 which has been agreed to by Mr. WAXMAN, chairman of the House Subcommittee on Health and the Environment. This amendment will allow States which utilized the waiver provision authorized by the State Grant Program of the Developmental Disabilities Assistance and Bill of Rights Act as of Octo-

ber 18, 1984, to continue to utilize that waiver provision when certain conditions are met. First, the States must have approval from the Secretary. Second, States may only choose the same waivered services which they had chosen as of October 18, 1984. Third, only States which had chosen services which are not currently priority service areas, or funded under parts C, D, or E of Public Law 98-527 are eligible for a waiver. The four States which meet these conditions are Arizona, California, Missouri, and Montana. If those States choose to, they may apply to the Secretary to continue to provide waivered service which they were providing on October 18, 1984.

The final provision of this amendment terminates the Secretary's authority to grant waivers on September 30, 1987.

This amendment represents a compromise between the House and Senate position. It will allow States which have formerly utilized the waiver provision to provide services which are not authorized as priority services or under parts C, D, or E of the act to continue those services for a limited period of time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 546) was agreed to.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Kansas.

The motion was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

ANNUAL REPORT OF THE ST. LAWRENCE SEAWAY DEVELOPMENT CORPORATION—MESSAGE FROM THE PRESIDENT—PM 68

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Environment and Public Works:

To the Congress of the United States:

Pursuant to the requirements of Section 10 of the Saint Lawrence Seaway Act of May 13, 1954, I hereby transmit the Saint Lawrence Seaway Development Corporation's Annual Report for 1984.

RONALD REAGAN.

THE WHITE HOUSE, *July 25, 1985.*

ANNUAL REPORT OF THE REHABILITATION SERVICES ADMINISTRATION—MESSAGE FROM THE PRESIDENT—PM 69

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Labor and Human Resources:

To the Congress of the United States:

In accordance with Section 13 of the Rehabilitation Act of 1973, as amended, I am pleased to transmit the annual report of the Rehabilitation Services Administration. The report, prepared by the Department of Education, covers activities supported under the Act in Fiscal Year 1984.

RONALD REAGAN.

THE WHITE HOUSE, *July 25, 1985.*

MESSAGES FROM THE HOUSE

At 12:51 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House has passed the following joint resolutions, without amendment:

S.J. Res. 57. Joint resolution to designate the week of October 20, 1985, through October 26, 1985, as "Lupus Awareness Week"; and

S.J. Res. 86. Joint resolution to designate the week of July 25, 1985, through July 31, 1985, as "National Disability in Entertainment Week".

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-1535. A communication from the Administrator of Veterans' Affairs transmitting a draft of proposed legislation to clarify the authority of the Chief Medical Director regarding disciplinary actions on certain health care employees; to the Committee on Veterans' Affairs.

EC-1536. A communication from the Under Secretary of Agriculture transmitting, pursuant to law, the annual report on activities of the Department under Public Law 480; to the Committee on Agriculture, Nutrition, and Forestry.

EC-1537. A communication from the Secretary of the Navy transmitting, pursuant to law, a report on the Phoenix program's breach of its unit cost baseline from the previously reported 17 percent to more than 25 percent; to the Committee on Armed Services.

EC-1538. A communication from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Urban Mass Transportation Administration's New Formula Grant Program: Operating Flexibility and Process Simplification"; to the Committee on Banking, Housing, and Urban Affairs.

EC-1539. A communication from the Secretary of the Treasury transmitting, pursuant to law, the annual report on activities of the Depository Institutions Deregulation Committee and the Viability of Depository Institutions; to the Committee on Banking, Housing, and Urban Affairs.

EC-1540. A communication from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Reviews of the Audits of the Trans-Alaska Pipeline Liability Fund's Financial Statements for the Years Ended September 31, 1982 and 1983"; to the Committee on Energy and Natural Resources.

EC-1541. A communication from the Chairman of the Advisory Council on Historic Preservation transmitting, pursuant to law, a copy of Federal Historic Preservation Case Law; to the Committee on Energy and Natural Resources.

EC-1542. A communication from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "The Nuclear Regulatory Commission Should Report on Progress in Implementing Lessons Learned From the Three Mile Island Accident"; to the Committee on Environment and Public Works.

EC-1543. A communication from the Secretary of the Treasury transmitting, pursuant to law, a report on the status and operation of the State and Local Government Fiscal Assistance Trust Fund; to the Committee on Finance.

EC-1544. A communication from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Use of Unaudited Hospital Cost Data Resulted in Overestimate of Medicare's Prospective Payment System Rates"; to the Committee on Finance.

EC-1545. A communication from the Director of the Office of Management and Budget transmitting a draft of proposed legislation to place off-budget items on-budget and restore the U.S. to a unified budget system; to the Committee on Governmental Affairs.

EC-1546. A communication from the Secretary of Transportation transmitting, pursuant to law, a report on the valuation of the U.S. Coast Guard Military Retirement System; to the Committee on Governmental Affairs.

EC-1547. A communication from the Assistant Secretary of the Treasury transmitting, pursuant to law, a report on a change in a Privacy Act system of records; to the Committee on Governmental Affairs.

EC-1548. A communication from the Administrator of the Veterans Administration transmitting, pursuant to law, a report on a computer matching program of physicians and dentists/Federal, State, Local, and Private Income and Payment records; to the Committee on Governmental Affairs.

EC-1549. A communication from the Director of the General Government Division of the General Accounting Office transmitting, pursuant to law, a report entitled "Coordination of Federal Drug Interdiction Efforts"; to the Committee on the Judiciary.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM-344. A resolution adopted by the Council of the County of Florence, South Carolina relating to the Soil Conservation Service; to the Committee on Agriculture, Nutrition, and Forestry.

POM-345. A resolution adopted by the Legislature of the State of Florida; to the Committee on Finance.

"MEMORIAL No. 192

"Whereas, at the present time under the Social Security Act, individuals who became eligible for benefits in or after 1979 receive reduced benefit levels compared to individuals who became eligible prior to 1979, due to changes made in 1977 in the benefit computation formula, and

"Whereas, this disparity in benefit levels has been referred to as the "notch" and has resulted in the award of reduced benefits to approximately 1.3 million persons, and

"Whereas, any remedy for narrowing the gap in benefits is complicated because the notch has been in use since 1979, and

"Whereas, H.R. 4093 has been introduced in the 98th session of the United States Congress by Representative Roybal, the Chairman of the House Committee on Aging, in an effort to eliminate the notch, and

"Whereas, it is appropriate that the Legislature of the State of Florida take a stand in support of this legislation to protect the rights of the citizens of our state: Now, therefore, be it

"Resolved by the Legislature of the State of Florida: That the Congress of the United States is urged to adopt H.R. 4093 or similar legislation to eliminate the disparity in benefit levels awarded under the Social Security Act with respect to benefits awarded prior to 1979 and in and after 1979, so as to provide equitable benefits for all retirees.

"Be it further resolved, That copies of this memorial be dispatched to the President of the United States, to the President of the United States Senate, to the Speaker of the United States House of Representatives, and to each member of the Florida delegation to the United States Congress."

POM-346. A concurrent resolution adopted by the Legislature of the State of Texas; to the Committee on Finance.

"CONCURRENT RESOLUTION

"Whereas, The health and stability of the domestic oil and petrochemical industries are of vital importance to the American economy; and

"Whereas, The present world petroleum producing capacity far exceeds the market demand resulting in a price war that threatens the stability of America's oil and petrochemical industries; and

"Whereas, The present import policies have resulted in serious economic decline and escalating unemployment in the domestic oil industry; and

"Whereas, The continuation of these present policies will result in an increasing dependence on foreign oil in contravention of national policy; now, therefore, be it

"Resolved by the House of Representatives of the State of Texas, the Senate concurring, That the 69th Legislature of the State of Texas call on the Congress of the United States to pass and send to the president an Act authorizing and imposing a temporary tariff on all imports of foreign crude oil and foreign petrochemical products; and, be it further

"Resolved, That the secretary of state of the State of Texas forward official copies of this resolution to the president of the United States, to the president of the Senate and the speaker of the House of Representatives of the United States Congress, and to all members of the Texas delegation to the congress with the request that this resolution be officially entered in the Congressional Record as a memorial to the Congress of the United States of America."

POM-347. A resolution adopted by the National Society of the Sons of the American Revolution relating to Trade Policy; to the Committee on Finance.

POM-348. A resolution adopted by the National Society of the Sons of the American Revolution relating to South Africa; to the Committee on Foreign Relations.

POM-349. A resolution adopted by the National Society of the Sons of the American Revolution relating to the Genocide Convention; to the Committee on Foreign Relations.

POM-350. A resolution adopted by the National Society of the Sons of the American Revolution relating to Central America; to the Committee on Foreign Relations.

POM-351. A resolution adopted by the National Society of the Sons of the American Revolution relating to the Prayer Amendment; to the Committee on the Judiciary.

POM-352. A resolution adopted by the National Society of the Sons of the American Revolution opposed to calling a Constitutional convention; to the Committee on the Judiciary.

POM-353. A resolution adopted by the National Society of the Sons of the American Revolution relating to the Northwest Ordinance of 1787; to the Committee on the Judiciary.

POM-354. A resolution adopted by the National Society of the Sons of the American Revolution relating to Captain Robert Gray of Tiverton, Rhode Island; to the Committee on Governmental Affairs.

POM-355. A resolution adopted by the National Society of the Sons of the American Revolution relating to draft registration and government employment; to the Committee on Governmental Affairs.

POM-356. A concurrent resolution adopted by the Legislature of the State of Michigan; to the Select Committee on Indian Affairs.

POM-357. A concurrent resolution adopted by the Legislature of the State of Texas; to the Committee on Labor and Human Resources.

"CONCURRENT RESOLUTION

"Whereas, The Legislature of the State of Texas has acted to promote the health and welfare of its citizens by providing strong, effective insurance equality laws; and

"Whereas, Texas law includes freedom-of-choice provisions affording citizens the opportunity to select the health care provider of their choice; and

"Whereas, The health and welfare of Texans is being jeopardized by the federal Employee Retirement Income Security Act [ERISA], which abridges state law and deprives the citizens of Texas the protection afforded through the insurance laws of this state and thereby leaves many citizens without access to adequate health care benefits; now, therefore, be it

"Resolved, That the 69th Legislature of the State of Texas hereby respectfully request the President of the United States to propose and the United States Congress to enact legislation amending the Employee Retirement Income Security Act (ERISA) to permit the states to regulate fully employee health benefit plans in order to assure that beneficiaries of such plans have the right to receive health care from the providers of their choice pursuant to state law, thereby preventing plans from discriminating against legally qualified health care providers and assuring the solvency of such plans; and, be it further

"Resolved, That the Texas Secretary of State forward official copies of this resolution to the President of the United States, to the President of the Senate and Speaker of the House of Representatives of the United States Congress, and to the members of the Texas congressional delegation as expressions of the sentiment of the Texas Legislature."

POM-358. A concurrent resolution adopted by the Florida Council of Administrators of Special Education urging Congress to defeat the proposed legislation House Bill 1523 and Senate Bill 415 due to the potential detrimental effect on programs and services to handicapped students; to the Committee on Labor and Human Resources.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. HATCH, from the Committee on Labor and Human Resources, with an amendment in the nature of a substitute:

S. 974. A bill to provide for protection and advocacy for mentally ill persons (with additional views) (Rept. No. 99-109).

By Mr. THURMOND, from the Committee on the Judiciary without amendment:

S.J. Res. 168. Joint resolution designating August 13, 1985, as "National Neighborhood Crime Watch Day";

S. Res. 189. Resolution to designate the week of August 18 to 24, 1985, as "Health Care Expo '85 Week"; and

H.J. Res. 164. Joint resolution to designate August 4, 1985, as "Freedom of the Press Day".

By Mr. HATFIELD, from the Committee on Appropriations, with amendments:

H.R. 2959. An act making appropriations for energy and water development for the fiscal year ending September 30, 1986, and for other purposes (Rept.No. 99-110).

H.R. 2942. An act making appropriations for the legislative branch for the fiscal year ending September 30, 1986, and for other purposes (Rept. No. 99-111).

By Mr. HATCH, from the Committee on Labor and Human resources, with an amendment in the nature of a substitute and an amendment of the title:

S. 415. A bill to amend the Education of the Handicapped Act to authorize the award of reasonable attorneys' fees to cer-

tain prevailing parties, and to clarify the effect of the Education of the Handicapped Act on rights, procedures, and remedies under other laws relating to the prohibition of discrimination (with additional views) (Rept. No. 99-112).

By Mr. DOMENICI, from the Committee on the Budget, without amendment:

S. Res. 203. Resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of H.R. 2796.

By Mr. DANFORTH, from the Committee on Commerce, Science, and Transportation:

Report to accompany the bill (H.R. 2796) to improve security standards for international air transportation (Rept. No. 99-113).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. THURMOND, from the Committee on the Judiciary: Douglas H. Ginsburg, of Massachusetts, to be an Assistant Attorney General.

(The above nomination was reported from the Committee on the Judiciary with the recommendation that it be confirmed subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. GOLDWATER, from the Committee on Armed Services: Donald Alden Hicks, of California, to the Under Secretary of Defense for Research and Engineering.

Mr. GOLDWATER. Mr. President, from the Committee on Armed Services, I report favorably the attached listing of nominations.

Those identified with a single asterisk (*) are to be placed on the Executive Calendar. Those identified with a double asterisk (**) are to lie on the Secretary's desk for the information of any Senator since these names have already appeared in the CONGRESSIONAL RECORD and to save the expense of printing again.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The nominations ordered to lie on the Secretary's desk were printed in the RECORD of July 9, July 10, and July 22, 1985, at the end of the Senate proceedings.)

*1. Maj. Gen. Spence M. Armstrong, U.S. Air Force, to be lieutenant general. (Ref. #447)

*2. Maj. Gen. John A. Shaud, U.S. Air Force, to be lieutenant general. (Ref. #448)

*3. Maj. Gen. Robert D. Springer, U.S. Air Force, to be lieutenant general. (Ref. #449)

*4. Col. Carmelita Schimmenti, U.S. Air Force, to be brigadier general (Ref. #450)

*5. Col. Dulaney L. O'Roark, Jr., U.S. Army, to be brigadier general. (Ref. #451)

**6. In the Air Force Reserve there are 21 promotions to the grade of lieutenant colonel (list begins with John H. Boles). (Ref. #455)

**7. In the Air Force Reserve there are 3 appointments to the grade of lieutenant colonel (list begins with Roger D. Mathews). (Ref. #456)

**8. In the Army Reserve there are 163 promotions to the grade of colonel and below (list begins with Henry Robinson). (Ref. #457)

**9. In the Navy Reserve there are 158 permanent promotions to the grade of captain (list begins with David William Billharz). (Ref. #458)

**10. In the Navy Reserve there are 292 permanent promotions to the grade of commander (list begins with Harvey C. Aaron). (Ref. #459)

**11. In the Marine Corps there are 208 transfers from the Marine Corps Reserve to the grade of major and below (list begins with Philip C. Knapik). (Ref. #460)

Total 850.

*1. Maj. Gen. Leonard H. Perroots, U.S. Air Force, to be lieutenant general. (Ref. #414)

*2. Lt. Gen. James A. Williams, U.S. Army, to be placed on the retired list. (Ref. #415)

*3. Maj. Gen. Hugh R. Overholt, U.S. Army, to be The Judge Advocate General; and Brig. Gen. William K. Suter, U.S. Army, to be The Assistant Judge Advocate General and major general. (Ref. #416)

**4. In the Air Force Reserve there are 35 promotions to the grade of colonel (list begins with Lawrence B. Anderson). (Ref. #417)

**5. In the Army there are 247 appointments to the grade of second lieutenant (list begins with Francis E. Algermissen). (Ref. #418)

**6. In the Navy Reserve there are 591 promotions to the grade of commander (list begins with Charles Llewellyn Adams). (Ref. #419)

*7. Gen. John W. Vessey, Jr., U.S. Army, to be placed on the retired list. (Ref. #421)

*8. Vice Adm. Harry C. Schrader, Jr., U.S. Navy, to be placed on the retired list. (Ref. #422)

**9. In the Navy there are 879 promotions to the permanent grade of lieutenant commander (list begins with William S. Adsit). (Ref #423)

Total 1,758.

By Mr. PACKWOOD, from the Committee on Finance: S. Bruce Smart, Jr., of Connecticut, to be Under Secretary of Commerce for International Trade.

(The above nomination was reported from the Committee on Finance with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

● Mr. PACKWOOD. Mr. President, I am pleased to report the recommendation of the Committee on Finance that the Senate confirm the nomination of Bruce Smart, of Fairfield, CT, who has been nominated for Under Secretary of Commerce for International Trade. Following the pattern or recent nominations considered by the committee, President Reagan again has chosen a person of fine qualifications to carry out the Government's responsibilities in the very important position for which he has been nominated.

Mr. Smart has been with the Continental Group for 32 years. He has risen through the ranks first in various sales and general management positions, then as vice chairman of U.S. operations, later as president and chief operating officer, and finally in 1981 as chairman and chief executive officer. Mr. Smart also has held corporate directorships with such groups as the Celanese Corp., Chase Manhattan Bank N.A., and the GTE Corp. He is a member of the business council and the business roundtable.

In the Department of Commerce Mr. Smart will be supervising one of the most important agencies of the department, the International Trade Administration. As such he will have jurisdiction over the United States and foreign commercial service, the development of industry specific analysis, the formulation of international economic policy and the administration of our antidumping and countervailing duty functions.

I hope that the Senate may act expeditiously in approving Mr. Smart's nomination.●

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. HEINZ (for himself, Mr. MOYNIHAN, Mr. MITCHELL, and Mr. COHEN).

S. 1493. A bill to provide comprehensive reform of the trade laws, and for other purposes; to the Committee on Finance.

By Mr. GORTON (for himself, Mr. CHAFEE, Mr. EVANS, Mr. HATFIELD, Mr. MATSUNAGA, Mr. MOYNIHAN, and Mr. WILSON):

S. 1494. A bill to amend title 23; United States Code, to limit outdoor advertising adjacent to Interstate and Federal-aid primary highways; to the Committee on Environment and Public Works.

By Mr. MURKOWSKI (by request):

S. 1495. A bill to amend title 38, United States Code, to enhance recruitment and retention by the Veterans' Administration of graduate and student nurses; to the Committee on Veterans Affairs.

By Mr. DIXON (for himself, Mr. PROXMIRE, Mr. GRASSLEY, Mr. LEVIN, and Mr. RIEGLE):

S. 1496. A bill to correct imbalances in certain States in the Federal tax to Federal benefit ratio by reallocating the distribution of Federal spending, and for other purposes; to the Committee on Governmental Affairs.

By Mr. DOLE (for himself, Mr. ZORINSKY, Mr. HELMS, Mr. LEAHY, Mr. LUGAR, Mr. MELCHER, Mr. COCHRAN, Mr. PRYOR, Mr. BOSCHWITZ, Mr. BOREN, Mrs. HAWKINS, Mr. DIXON, Mr. ANDREWS, Mr. HEFLIN, Mr. WILSON, Mr. HARKIN, Mr. MCCONNELL, and Mrs. KASSEBAUM):

S. 1497. A bill to establish a National Commission on Agricultural Policy to study the structure, procedures, and methods of formulating and administering agricultural policies, programs, and practices of the United States; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. WEICKER (for himself, Mr. D'AMATO, Mr. DURENBERGER, Mr. STEVENS, Mr. COCHRAN, Mr. KERRY, Mr. SPECTER, and Mr. PELL):

S. 1498. A bill to amend the Internal Revenue Code of 1954 to provide tax incentives for the issuance of small business participat-

ing debentures; to the Committee on Committee on Finance.

By Mr. DECONCINI:

S. 1499. A bill to establish an antiterrorist training academy, to increase security at international airports, and for other purposes; to the Committee on Governmental Affairs.

By Mr. KERRY:

S. 1500. A bill to provide for a comprehensive bilateral and verifiable freeze between the United States and the Soviet Union on the testing, production, and deployment of nuclear weapons systems; to the Committee on Foreign Relations.

By Mr. QUAYLE:

S. 1501. A bill to amend part B of title IV of the Higher Education Act of 1965, relating to the guaranteed student loan program, to permit the deferment of payment of principal for 1 year for students who are on maternity leave if the students are enrolled in institutions of higher education; to the Committee on Labor and Human Resources.

By Mr. CHAFEE (by request):

S. 1502. A bill to amend and extend title I of the Marine Protection, Research, and Sanctuaries Act, as amended, for two years; to the Committee on Environment and Public Works.

By Mr. LAXALT (for himself, Mr. HECHT, Mr. CRANSTON, and Mr. WILSON):

S. 1503. A bill to clear title to certain lands along the California-Nevada boundary; to the Committee on Energy and Natural Resources.

By Mr. ROCKEFELLER (for himself, Mr. BYRD, Mr. MCCONNELL, Mr. DIXON, Mr. HEINZ, Mr. DECONCINI, Mr. FORD, Mr. METZENBAUM, Mr. BURDICK, Mr. BUMPERS, Mr. GRASSLEY, Mr. RIEGLE, Mr. HARKIN, Mr. TRIBLE, Mr. BINGAMAN, Mr. PRYOR, Mr. HART, Mr. GORE, Mr. BRADLEY, Mr. INOUYE, Mr. SASSER, Mr. SIMON, Mr. HOLLINGS, Mr. MELCHER, and Mr. SPECTER):

S. 1504. A bill to assure that administrative law judges making determinations under the Black Lung Benefits Act receive compensation at a rate not less than that prescribed for GS-16 under section 5332 of title 5, United States Code; to the Committee on Finance.

By Mr. MOYNIHAN:

S. 1505. A bill to require the President to take action in response to the reports on barriers to foreign market access; to the Committee on Finance.

By Mr. PROXMIRE (for himself, Mr. CHAFEE, Mr. ANDREWS, Mr. DURENBERGER, Mr. HEINZ, Mr. MCCLURE, Mr. GRASSLEY, Mr. PACKWOOD, Mr. WEICKER, Mr. KASTEN, Mr. THURMOND, Mr. DOMENICI, Mr. HATCH, Mr. HATFIELD, Mr. BURDICK, Mr. MATSUNAGA, Mr. NUNN, Mr. HOLLINGS, Mr. INOUYE, Mr. ZORINSKY, Mr. RIEGLE, Mr. GORE, Mr. EXON, Mr. BRADLEY, Mr. BAUCUS, Mr. CRANSTON, and Mr. BENTSEN):

S.J. Res. 175. Joint resolution to designate the week of August 25, 1985, through August 31, 1985, as "National CPR Awareness Week"; to the Committee on the Judiciary.

By Mr. D'AMATO:

S.J. Res. 176. Joint resolution to provide that a special gold medal honoring George Gershwin be presented to his sister, Frances Gershwin Godowsky, and a special gold medal honoring Ira Gershwin be presented to his widow, Leonore Gershwin, and to provide for the production of bronze duplicates of such medals for sale to the public; to the Committee on Banking, Housing, and Urban Affairs.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. HEINZ (for himself, Mr. MOYNIHAN, Mr. MITCHELL, and Mr. COHEN):

S. 1493. A bill to provide comprehensive reform of the trade laws, and for other purposes; to the Committee on Finance.

COMPREHENSIVE TRADE LAW REFORM ACT

● Mr. HEINZ. Mr. President, in November 1983, Senators MOYNIHAN, MITCHELL, and I introduced major trade reform legislation in cooperation with TRAC—the Trade Reform Action Coalition. That bill, S. 2139 in the 98th Congress, was in response to the failure of the Trade Agreements Act of 1979 to implement adequately the international trading rules revised during the multilateral trade negotiations.

Our 4 years of experiences with the 1979 act demonstrated numerous difficulties, unexpected consequences, and vaguenesses of definition that needed to be addressed. Overall we concluded, as I stated in 1983, that we need to make U.S. trade laws "less complex, less expensive, less arbitrary, more certain, more expeditious, more fair, and more effective for all petitioners."

We attempted to achieve those objectives in the 1983 TRAC bill, which contained some 54 amendments to the antidumping, countervailing duty, escape clause—section 201—and section 301 provisions of then-existing law.

A number of the 1983 TRAC provisions were enacted into law through an amendment I offered last year to the Trade and Tariff Act of 1984. Even though some of the more important elements of that amendment were modified or dropped in conference—in one case in violation of House and Senate rules—we nevertheless made some substantial progress through provisions that, among other things, provided for cumulation of imports by the International Trade Commission and brought "upstream" subsidies clearly within the parameters of our countervailing duty law.

In part as a result of that success, this year's TRAC bill is less complex than the original version. The antidumping and countervailing duty amendments have been reduced from more than 30 to 10, and the section 201 and 301 amendments are identical to those in the so-called LICIT bill which Senator BAUCUS and I introduced on June 25 (S. 1356). Those provisions were discussed in some detail at that time, and I will not repeat that discussion at this point, although the summary of the TRAC bill that will be printed at the conclusion of these remarks will cover those titles of the bill as well as titles I and IV.

Of particular note in title I of the TRAC bill are the provisions relating to diversionary dumping and critical circumstances. The diversionary dumping provision, which replaces last year's "downstream dumping" proposal, has been significantly narrowed in scope. Originally intended to reach products imported into the United States benefiting from factor inputs sold to the manufacturer of the end product at less than fair value, the provision this year would apply only in cases where the input itself is subject to an outstanding antidumping duty order or a suspension agreement or other restraint. As a result it would no longer be necessary for the Government to undertake a complex investigation in at least two foreign countries to determine if an input is dumped, and, if so, at what margin. In this year's version of the bill the fact of dumping and the margin will have been previously determined via an earlier investigation and will be embodied in either the duty order or the suspension or other restraint agreement. This change should eliminate most of the administrative problems the Commerce Department had with last year's version.

The second major element of title I is the changes in the critical circumstances provisions of our unfair trade practices laws. This provision is particularly important for import-impacted industries because it offers the possibility of relief before the statutory completion of the case. Since an antidumping case will commonly take a year and a countervailing duty case nearly that long, serious damage is an inevitability in any meritorious case before it is concluded and before the preliminary determination—the earliest point when any potential liability is imposed. Indeed, the filing of a petition is often a signal to the foreign producer to send in as much as he can over the next several months before the preliminary determination. Only a declaration of critical circumstances—under current practice erroneously delayed until the preliminary date—would provide for retroactive suspension of liquidation to an earlier point in the process.

In an effort to deter import surges and impose an offsetting liability, the TRAC bill would reverse the presumption of current law and require suspension of liquidation 90 days before the preliminary and an "import surge" determination by the Commerce Department and the International Trade Commission. If the determination were negative, then entries would be liquidated normally. Otherwise the additional duty would be imposed from the 90th day prior to the date of the

preliminary determination. In this way we can make our unfair trade practice laws both more effective and more timely.

Other provisions of title I as well as descriptions of the other titles are contained in the summary that follows my remarks.

Before concluding, however, Mr. President, I want to say a word about a provision in title IV of the bill relating to nonmarket or State-controlled economies. This provision requires the U.S. Government to try to secure an international agreement on how to deal with the trading practices of nonmarket economies.

In including this section in the bill, however, I want to make it clear that I have not abandoned my earlier legislation to amend our unfair trade practice laws to deal unilaterally with nonmarket economy problems. That proposal was approved by the Senate last year but dropped in conference. I plan to reintroduce this legislation later in the year, following the outcome of some pending litigation on an aspect of the issue—Continental Steel Corp., Georgetown Steel Corp., Raritan River Steel Co., and Atlantic Steel Co., against United States.

Mr. President, this is an important bill that will correct some major deficiencies in our trade laws. I hope that the Finance Committee will act on it promptly, along with the LICIT bill. Mr. President, I ask that a summary of the provisions of the bill, along with its text, be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1493

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Comprehensive Trade Law Reform Act of 1985".

SEC. 2. TABLE OF CONTENTS.

Sec. 1. Short title.
Sec. 2. Table of contents.

TITLE I—COUNTERVAILING AND ANTIDUMPING DUTIES

Sec. 101. Limitations on acceptance of country under the Agreement.
Sec. 102. Critical circumstances determinations.
Sec. 103. Persistent dumping and subsidization.
Sec. 104. Suspension of investigations.
Sec. 105. Limited application of 90-day review authority.
Sec. 106. Countervailable subsidy definition.
Sec. 107. Industry and labor associations producing component parts treated as interested parties.
Sec. 108. Diversionary dumping.
Sec. 109. Upstream subsidies.
Sec. 110. Disclosure of confidential information.

TITLE II—RELIEF FROM INJURY CAUSED BY IMPORT COMPETITION

Sec. 201. Investigations under section 201 of Trade Act of 1974.
Sec. 202. Provisional relief upon finding of critical circumstances.
Sec. 203. Consultations with foreign governments.
Sec. 204. Industry assessment and competitiveness strategy.
Sec. 205. Import relief.

TITLE III—RELIEF FROM INJURIOUS INDUSTRIAL TARGETING AND UNFAIR TRADE PRACTICES

Sec. 301. Enforcement of United States rights under trade agreements and response to injurious industrial targeting and other foreign trade practices.
Sec. 302. Investigations under title III of the Trade Act of 1974.
Sec. 303. Mandatory action in cases of injurious industrial targeting.

TITLE IV—NEGOTIATING OBJECTIVES

Sec. 401. Foreign market access; state-owned or controlled enterprises.

TITLE I—COUNTERVAILING AND ANTIDUMPING DUTIES

SEC. 101. LIMITATIONS ON ACCEPTANCE OF COUNTRY UNDER THE AGREEMENT.

Section 701 of the Tariff Act of 1930 (19 U.S.C. 1671) is amended—

(1) by inserting "which meets the requirements of subsection (c) and" after "means of country" in subsection (b),

(2) by redesignating subsection (c) as subsection (e), and

(3) by inserting after subsection (b) the following new subsections:

"(c) ADDITIONAL REQUIREMENTS.—

"(1) IN GENERAL.—A country meets the requirements of this subsection if such country has made a commitment under the General Agreement on Tariffs and Trade to—

"(A) eliminate its export subsidies within one year (or within five years in the case of least developed countries),

"(B) not increase, extend, or add export subsidies, and

"(C) eliminate immediately export subsidies on those products in which such country is competitive.

"(2) For the purpose of determining the competitiveness of merchandise, the Commission, at the request of the administering authority, shall conduct an investigation of whether the merchandise is already competitive in the United States market and whether the merchandise would be competitive in the absence of export subsidies. The Commission shall submit a final report on such investigation to the administering authority by no later than the date that is 60 days after the date on which the administering authority requested such investigation.

"(d) REVIEW OF COMPLIANCE; TERMINATION OF STATUS.—

"(1) REVIEW.—The administering authority shall review the current status of, and compliance with, the agreements described in subsection (b) or (c) at least once during each 12-month period following the date on which the agreement becomes effective.

"(2) PUBLICATION OF DETERMINATIONS.—The administering authority shall determine whether each foreign country has honored each term of the agreements described in subsection (b) or (c) that such country entered into and shall publish such determinations in the Federal Register by no later than the date that is 45 days after the anniversary of the effective date of the agreement.

"(3) TERMINATION OF STATUS; SUSPENSION OF LIQUIDATION.—

"(A) IN GENERAL.—If the administering authority determines that a foreign country has failed to honor any term of an agreement described in subsection (b) or (c) that such country entered into—

"(i) such country shall cease to be treated as a country under the Agreement for purposes of this Act on and after the day that is 30 days after the date on which such determination is published in the Federal Register, and

"(ii) the administering authority shall—

"(I) order the suspension of liquidation of all entries, and withdrawals from warehouse, for consumption after such day of all merchandise of such country that has, at any time, been the subject of an affirmative determination under section 705(a), and

"(II) initiate investigations under section 303 with respect to such merchandise on such day.

"(B) NEGATIVE PRELIMINARY DETERMINATION.—If the preliminary determination of the administering authority described in section 703(b) in an investigation conducted under section 303 is negative, the administering authority shall terminate on the day of such preliminary determination any suspension of liquidation ordered under subparagraph (A)(ii)(I) with respect to the merchandise that is involved in such investigation.".

SEC. 102. CRITICAL CIRCUMSTANCES DETERMINATIONS.

(a)(1) Section 702 of the Tariff Act of 1930 (19 U.S.C. 1671a) is amended by adding at the end thereof the following new subsection:

"(e) SURGE OF IMPORTS.—

"(1) MONITORING AND SUSPENSION OF LIQUIDATION.—If the determination under subsection (c) is affirmative and the petition alleges that a subsidy is inconsistent with the Agreement, or if an investigation is commenced under subsection (a) and the administering authority has reason to believe that a subsidy is inconsistent with the Agreement, the administering authority shall immediately—

"(A) notify the United States Customs Service of such determination and direct customs officers to collect and forward to the administering authority (at least once every 7 days until a final determination is made under section 705(a) or the investigation is terminated) information on the volume and value of entries of the class or kind of merchandise which is the subject of the investigation,

"(B) shall order the suspension of liquidation of all entries of such merchandise which are entered, or withdrawn from warehouse, for consumption on or after the date of publication of the notice of such determination in the Federal Register, and

"(C) begin monitoring (until a final determination is made under section 705(a) or the investigation is terminated) the volume of imports of such merchandise to determine whether the volume of such imports has significantly increased over the volume of such imports prior to the date on which the petition is filed under subsection (b)(1) or on which the investigation is commenced under subsection (a).

"(2) PUBLICATION OF DETERMINATION.—The administering authority shall publish in the Federal Register notice of any affirmative determination made under paragraph (1)(C) as soon as practicable.

"(3) LIMITATION ON DETERMINATION.—No determination may be made under para-

graph (1)(C) prior to the date that is 60 days after—

"(A) the date on which the petition that initiated the investigation is filed under subsection (b), or

"(B) the date on which the investigation is commenced under subsection (a).".

(2)(A) Subsection (b) of section 703 of the Tariff Act of 1930 (19 U.S.C. 1671b(b)) is amended by adding at the end thereof the following sentence: "If the determination of the administering authority under this subsection is negative, the administering authority shall terminate any suspension of liquidation ordered under section 702(e)(1)(B) with respect to the merchandise that is the subject of the investigation.".

(B) Paragraph (1) of section 703(d) of the Tariff Act of 1930 (19 U.S.C. 1671b(d)(1)) is amended by inserting ", if suspension of liquidation has not been ordered under section 702(e)(1)(B)," after "shall".

(C) Paragraph (1) of section 703(e) of the Tariff Act of 1930 (19 U.S.C. 1671b(e)(1)) is amended by striking out "If a petitioner alleges critical circumstances in its original petition, or by amendment" in paragraph (1) and inserting in lieu thereof "If the administering authority has made an affirmative determination under section 702(e)(1)(C)".

(D) Paragraph (2) of section 703(e) of the Tariff Act of 1930 (19 U.S.C. 1671b(e)(2)) is amended to read as follows:

"(2) SUSPENSION OF LIQUIDATION; POSTING OF BOND.—If the determination of the administering authority under paragraph (1) is affirmative—

"(A) the administering authority shall order the posting of a cash deposit, bond, or other security under subsection (d)(2) for, and

"(B) any suspension of liquidation ordered under this subtitle shall apply to, or, if notice of such suspension of liquidation is already published, be amended to apply to, unliquidated entries of merchandise entered, or withdrawn from warehouse, for consumption on or after the date which is 90 days before the date on which the notice of the preliminary determination made under subsection (b) is published in the Federal Register.".

(3)(A) Section 704 of the Tariff Act of 1930 (19 U.S.C. 1671c) is amended by adding at the end thereof the following new subsection:

"(l) EFFECT OF TERMINATION OF INVESTIGATION.—If an investigation under this subtitle is terminated, the administering authority shall—

"(1) terminate any suspension of liquidation ordered under this subtitle with respect to entries of the merchandise which was the subject of the investigation, and

"(2) release any cash deposit, bond, or other security required under this subtitle with respect to such entries.".

(B) Paragraph (2) of section 704(f) of the Tariff Act of 1930 (19 U.S.C. 1671c(f)(2)) is amended—

(i) by striking out "section 703(d)(1)" each place it appears and inserting in lieu thereof "this subtitle",

(ii) by striking out "section 703(d)(1)" in subparagraph (A)(iii) and inserting in lieu thereof "section 703(d)(2)", and

(iii) by striking out "pursuant to a previous affirmative preliminary determination" each place it appears and inserting in lieu thereof "under this subtitle".

(C) Paragraph (3) of section 704(h) of the Tariff Act of 1930 (19 U.S.C. 1671c(h)(3)) is amended by striking out "section 703(d)(1)" and inserting in lieu thereof "this subtitle".

(D) Subsection (i) of section 704 of the Tariff Act of 1930 (19 U.S.C. 1671c(i)) is amended by striking out "under section 703(d)(1)" in paragraph (1)(A).

(4)(A) Paragraph (2) of section 705(a) of the Tariff Act of 1930 (19 U.S.C. 1671d(a)(2)) is amended to read as follows:

"(2) CRITICAL CIRCUMSTANCES.— If the final determination of the administering authority under paragraph (1) is affirmative and the administering authority has made an affirmative determination under section 702(e)(1)(C), such final determination shall also contain a finding as to whether—

"(A) the alleged subsidy is inconsistent with the Agreement, and

"(B) there have been massive imports of the class or kind of merchandise which is the subject of the investigation over a relatively short period.

Such findings may be affirmative even though the preliminary determination under section 703(e)(1) was negative.".

(B) Paragraph (4) of section 705(b) of the Tariff Act of 1930 (19 U.S.C. 1671d(b)(4)) is amended to read as follows:

"(4) ADDITIONAL FINDING IF THREAT OF INJURY FOUND.—If the final determination of the Commission under paragraph (1) is that there is no material injury but that there is threat of material injury, such determination shall include a finding as to whether material injury by reason of imports of the merchandise with respect to which the administering authority has made an affirmative determination under subsection (a) would have been found but for any suspension of liquidation of entries of that merchandise.".

(C) Subparagraph (B) of section 705(c)(1) of the Tariff Act of 1930 (19 U.S.C. 1671d(c)(1)(B)) is amended by striking out "under paragraphs (1) and (2) of section 703(d) the suspension of liquidation and" and inserting in lieu thereof "the suspension of liquidation of all entries of the merchandise that is the subject of the investigation and shall order under section 703(d)(2)".

(D) Paragraph (2) of section 705(c) of the Tariff Act of 1930 (19 U.S.C. 1671d(c)(2)) is amended—

(i) by striking out subparagraphs (A) and (B), and

(ii) by striking out "and the administering authority shall—" and inserting in lieu thereof a period.

(E) Paragraph (3) of section 705(c) of the Tariff Act of 1930 (19 U.S.C. 1671d(c)) is amended to read as follows:

"(3) EFFECT OF CERTAIN DETERMINATIONS ON SUSPENSIONS OF LIQUIDATION AND COLLECTION OF BOND OR CASH DEPOSIT.—If the determination of the administering authority under subsection (a)(2) is negative or the determination of the Commission under subsection (b)(1) is that there is no material injury but that there is a threat of material injury or that the establishment of an industry in the United States is materially retarded, the administering authority shall—

"(A) terminate any suspension of liquidation ordered under this subtitle of entries of the merchandise entered, or withdrawn from warehouse, for consumption before the date on which the preliminary determination made under section 703(b) was published in the Federal Register, and

"(B) release any bond or other security and refund any cash deposit required under section 703(d)(2) with respect to such entries.".

(F) Paragraph (4) of section 705(c) of the Tariff Act of 1930 (19 U.S.C. 1671d(c)(4)) is amended—

(i) by inserting "or 702(e)(1)(B)" after "section 703(d)" in subparagraph (B),

(ii) by striking out "suspension of liquidation was first ordered" in subparagraph (B) and inserting in lieu thereof "the preliminary determination made under section 703(b) was published in the Federal Register", and

(iii) by striking out "suspension of liquidation is first ordered" in subparagraph (C) and inserting in lieu thereof "the preliminary determination made under section 703(b) was published in the Federal Register".

(5) Subsection (b) of section 303 of the Tariff Act of 1930 (19 U.S.C. 1303(b)) is amended by striking out paragraph (3) and redesignating paragraph (4) as paragraph (3).

(b)(1) Section 732 of the Tariff Act of 1930 (19 U.S.C. 1673a) is amended by adding at the end thereof the following new subsection:

"(e) SURGE OF IMPORTS.—

"(1) MONITORING AND SUSPENSION OF LIQUIDATION.—If the determination under subsection (c) is affirmative, or if the investigation is commenced under subsection (a), the administering authority shall immediately—

"(A) notify the United States Customs Service of such determination and direct customs officers to collect and forward to the administering authority (at least once every 7 days until a final determination is made under section 735(a) or the investigation is terminated) information on the volume and value of entries of the class or kind of merchandise which is the subject of the investigation, and

"(B) begin monitoring (until a final determination is made under section 735(a) or the investigation is terminated) the volume of imports of such merchandise to determine whether the volume of such imports has significantly increased over the volume of such imports prior to the date on which the petition is filed under subsection (b)(1) or on which the investigation is commenced under subsection (a).

"(2) PUBLICATION OF DETERMINATION.—The administering authority shall publish in the Federal Register notice of any affirmative determination made under paragraph (1)(B) as soon as practicable.

"(3) LIMITATION ON DETERMINATION.—No determination may be made under paragraph (1)(B) prior to the date that is 60 days after—

"(A) the date on which the petition that initiated the investigation is filed under subsection (b), or

"(B) the date on which the investigation is commenced under subsection (a).

"(4) SUSPENSION OF LIQUIDATION.—On the date that is 70 days after the date on which a petition is filed under subsection (b), or on which the investigation is commenced under subsection (a), the administering authority shall order the suspension of liquidation of all entries of the merchandise that is the subject of the investigation which are entered, or withdrawn from warehouse, for consumption on or after the date on which such order is issued. Notice of such suspension shall be published in the Federal Register on the date on which such order is issued.".

(2)(A) Paragraph (1) of section 733(b) of the Tariff Act of 1930 (19 U.S.C. 1673b(b)) is amended by adding at the end thereof the following sentence: "If the determination of

the administering authority under this paragraph is negative, the administering authority shall terminate the suspension of liquidation ordered under section 732(e)(4).".

(B) Subsection (d) of section 733 of the Tariff Act of 1930 (19 U.S.C. 1673b(d)) is amended by striking out paragraph (1) and redesignating paragraphs (2) and (3) as paragraphs (1) and (2), respectively.

(C) Paragraph (1) of section 733 of the Tariff Act of 1930 (19 U.S.C. 1673b(d)(1)), as redesignated by subparagraph (B), is amended to read as follows:

"(1) shall order the posting of a cash deposit, bond, or other security, as it deems appropriate, for each entry of the merchandise subject to the investigation which is entered, or withdrawn from warehouse for consumption on or after the date of publication of the notice of such determination in the Federal Register in an amount equal to the estimated average amount by which the foreign market value exceeds the United States price, and".

(D) Paragraph (1) of section 733(e) of the Tariff Act of 1930 (19 U.S.C. 1673b(e)(1)) is amended by striking out "If a petitioner alleges critical circumstances in its original petition, or by amendment" in paragraph (1) and inserting in lieu thereof "If the administering authority has made an affirmative determination under section 732(e)(1)(B)".

(E) Paragraph (2) of section 733(e) of the Tariff Act of 1930 (19 U.S.C. 1673b(e)(2)) is amended to read as follows:

"(2) SUSPENSION OF LIQUIDATION; POSTING OF BOND.—If the determination of the administering authority under paragraph (1) is affirmative—

"(A) the administering authority shall order the posting of a cash deposit, bond, or other security under subsection (d)(1) for, and

"(B) any suspension of liquidation ordered under this subtitle shall apply to, or, if notice of such suspension of liquidation is already published, be amended to apply to, unliquidated entries of merchandise entered, or withdrawn from warehouse, for consumption on or after the date which is 90 days before the date on which notice of the preliminary determination made under subsection (b) is published in the Federal Register.".

(3)(A) Section 734 of the Tariff Act of 1930 (19 U.S.C. 1673c) is amended by adding at the end thereof the following new subsection:

"(l) EFFECT OF TERMINATION OF INVESTIGATION.—If an investigation under this subtitle is terminated, the administering authority shall—

"(1) terminate any suspension of liquidation ordered under this subtitle with respect to entries of the merchandise which was the subject of the investigation, and

"(2) release any cash deposit, bond, or other security required under this subtitle with respect to such entries.".

(B) Paragraph (2) of section 734(f) of the Tariff Act of 1930 (19 U.S.C. 1673c(f)(2)) is amended—

(i) by striking out "section 733(d)(1)" each place it appears and inserting in lieu thereof "this subtitle",

(ii) by striking out "section 733(d)(2)" each place it appears and inserting in lieu thereof "section 733(d)(1)", and

(iii) by striking out "pursuant to a previous affirmative preliminary determination" each place it appears and inserting in lieu thereof "under this subtitle".

(C) Paragraph (3) of section 734(h) of the Tariff Act of 1930 (19 U.S.C. 1673c(h)(3)) is amended—

(i) by striking out "section 733(d)(1)" and inserting in lieu thereof "this subtitle", and

(ii) by striking out "section 733(d)(2)" and inserting in lieu thereof "section 733(d)(1)".

(D) Subsection (i) of section 734 of the Tariff Act of 1930 (19 U.S.C. 1673c(i)) is amended by striking out "under section 733(d)(1)" in paragraph (1)(A)".

(4)(A) Paragraph (3) of section 735(a) of the Tariff Act of 1930 (19 U.S.C. 1673d(a)(3)) is amended to read as follows:

"(3) CRITICAL CIRCUMSTANCES.—If the final determination of the administering authority under paragraph (1) is affirmative and the administering authority has made an affirmative determination under section 732(e)(1)(B), such final determination shall also contain a finding as to whether—

"(A) either—

"(i) there is a history of dumping in the United States or elsewhere of the class or kind of merchandise which is the subject of the investigation, or

"(ii) the person by whom, or for whose account, the merchandise was imported knew or should have known that the exporter was selling the merchandise which is the subject of the investigation at less than its fair value, and

"(B) there have been massive imports of the class or kind of merchandise which is the subject of the investigation over a relatively short period.

Such findings may be affirmative even though the preliminary determination under section 733(e)(1) was negative.".

(B) Paragraph (4) of section 735(b) of the Tariff Act of 1930 (19 U.S.C. 1673d(b)(4)) is amended to read as follows:

"(4) ADDITIONAL FINDING IF THREAT OF INJURY FOUND.—If the final determination of the Commission under paragraph (1) is that there is no material injury but that there is threat of material injury, such determination shall include a finding as to whether material injury by reason of imports of the merchandise with respect to which the administering authority has made an affirmative determination under subsection (a) would have been found but for any suspension of liquidation of entries of that merchandise.".

(C) Paragraph (2) of section 735(c) of the Tariff Act of 1930 (19 U.S.C. 1673d(c)(2)) is amended—

(i) by striking out subparagraphs (A) and (B), and

(ii) by striking out "and the administering authority shall—" and inserting in lieu thereof a period.

(D) Subparagraph (B) of section 735(c)(1) of the Tariff Act of 1930 (19 U.S.C. 1673d(c)(1)(B)) is amended by striking out "under paragraphs (1) and (2) of section 733(d) the suspension of liquidation and" and inserting in lieu thereof "the suspension of liquidation of all entries of the merchandise that is the subject of the investigation and shall order under section 733(d)(1)".

(E) Paragraph (3) of section 735(c) of the Tariff Act of 1930 (19 U.S.C. 1673d(c)) is amended to read as follows:

"(3) EFFECT OF CERTAIN DETERMINATIONS ON SUSPENSIONS OF LIQUIDATION AND COLLECTION OF BOND OR CASH DEPOSIT.—If the determination of the administering authority under subsection (a)(2) is negative or the determination of the Commission under subsection (b)(1) is that there is no material injury but that there is a threat of material injury or that the establishment of an industry in the United States is materially retarded, the administering authority shall—

"(A) terminate any suspension of liquidation ordered under this subtitle of entries of the merchandise that is the subject of the investigation which were entered, or withdrawn from warehouse, for consumption before the date on which the preliminary determination made under section 733(b) was published in the Federal Register, and

"(B) release any bond or other security and refund any cash deposit required under this subtitle with respect to such entries.".

(F) Paragraph (4) of section 735(c) of the Tariff Act of 1930 (19 U.S.C. 1673d(c)(4)) is amended—

(i) by inserting "previously ordered under this subtitle" after "suspension of liquidation" in subparagraph (B),

(ii) by striking out "section 733(d)" in subparagraph (B) and inserting in lieu thereof "section 733(d)(2)",

(iii) by striking out "suspension of liquidation was first ordered" in subparagraph (B) and inserting in lieu thereof "the preliminary determination made under section 733(b) was published in the Federal Register", and

(iv) by striking out "suspension of liquidation is first ordered" in subparagraph (C) and inserting in lieu thereof "the preliminary determination made under section 733(b) was published in the Federal Register".

(5) Paragraph (1) of section 736(b) of the Tariff Act of 1930 (19 U.S.C. 1673e(b)(1)) is amended by striking out "section 733(d)(1)" each place it appears and inserting in lieu thereof "this subtitle".

(6) Subsection (a) of section 737 of the Tariff Act of 1930 (19 U.S.C. 1673f(a)) is amended by striking out "section 733(d)(2)" in the heading and in the text and inserting in lieu thereof "section 733(d)(1)".

SEC. 103. PERSISTENT DUMPING AND SUBSIDIZATION.

Section 703 of the Tariff Act of 1930 (19 U.S.C. 1671b) is amended by adding at the end thereof the following new subsection:

"(i) WAIVER OF PRELIMINARY DETERMINATION BY COMMISSION.—If the Commission has made an affirmative determination under section 703(a), 705(b), 733(a), or 735(b) with respect to the merchandise which is the subject of the investigation during the 1-year period ending on the date on which such investigation is initiated—

"(1) the Commission shall not be required to make a preliminary determination under subsection (a), and

"(2) subsection (b) shall be applied without regard to the requirement that an affirmative determination under subsection (a) be obtained.".

SEC. 104. SUSPENSION OF INVESTIGATIONS.

(a) Paragraph (1) of section 704(b) of the Tariff Act of 1930 (19 U.S.C. 1671c(b)(1)) is amended to read as follows:

"(1) to eliminate the subsidy completely with respect to that merchandise exported directly or indirectly to the United States after the date on which the investigation is suspended, or".

(b) Subsection (b) of section 704 of the Tariff Act of 1930 (19 U.S.C. 1671c(b)) is amended by striking out "OR OFFSET COMPLETELY" in the heading.

SEC. 105. LIMITED APPLICATION OF 90-DAY REVIEW AUTHORITY.

(a) Paragraph (1) of section 736(c) (19 U.S.C. 1673e(c)(1)) is amended to read as follows:

"(1) CONDITIONS FOR WAIVER OF DEPOSIT OF ESTIMATED DUTIES.—The administering authority may permit, for not more than 90 days after the date of publication of an order under subsection (a), the posting of a bond or other security in lieu of the deposit of estimated antidumping duties required under subsection (a)(3) if—

"(A) the investigation has not been designated as extraordinarily complicated by reason of—

"(i) the number and complexity of the transactions to be investigated or adjustments to be considered,

"(ii) the novelty of the issues presented, or

"(iii) the number of firms whose activities must be investigated,

"(B) the final determination in the investigation has not been postponed under section 735(a)(2)(A);

"(C) on the basis of information presented to the administering authority by any manufacturer, producer, or exporter in such form and within such time as the administering authority may require, the administering authority is satisfied that a determination will be made, within 90 days after the date of publication of an order under subsection (a), of the foreign market value and the United States price for all merchandise of such manufacturer, producer, or exporter described in that order which was entered, or withdrawn from warehouse, for consumption on or after the date of publication of—

"(i) an affirmative preliminary determination by the administering authority under section 733(b), or

"(ii) if its determination under section 733(b) was negative, an affirmative final determination by the administering authority under section 735(a),

and before the date of publication of the affirmative final determination by the Commission under section 735(b);

"(D) the person described in subparagraph (C) provides credible evidence that the amount by which the foreign market value of the merchandise exceeds the United States price of the merchandise is significantly less than the amount of such excess specified in the antidumping duty order published under subsection (a); and

"(E) the data concerning the foreign market value and the United States price apply to sales in the usual commercial quantities and in the ordinary course of trade and the number of such sales are sufficient to form an adequate basis for comparison.".

(b) Subsection (c) of section 736 (19 U.S.C. 1673e(c)) is amended by adding at the end thereof the following new paragraph:

"(4) PROVISION OF CONFIDENTIAL INFORMATION; WRITTEN COMMENTS.—Before determining whether to permit the posting of bond or other security under paragraph (1) in lieu of the deposit of estimated antidumping duties, the administering authority shall—

"(A) make all confidential information supplied to the administering authority under paragraph (1) available under a protective order described in section 777(c)(1)(B) to all interested parties described in subparagraph (C), (D), (E), or (F) of section 771(9), and

"(B) afford all interested parties an opportunity to file written comments on whether the posting of bond or other security under paragraph (1) in lieu of the deposit of estimated antidumping duties should be permitted.

SEC. 106. COUNTERVAILABLE SUBSIDY DEFINITION.

Subparagraph (B) of section 771(5) of the Tariff Act of 1930 (19 U.S.C. 1677(5)) is amended—

(1) by striking out clauses (i) and (ii) and inserting in lieu thereof the following new clause:

"(i) The provision of capital, loans, loan guarantees, goods, or services at preferential rates or on terms inconsistent with commercial considerations.", and

(2) by redesignating clauses (iii) and (iv) as clauses (ii) and (iii), respectively.

SEC. 107. INDUSTRY AND LABOR ASSOCIATIONS PRODUCING COMPONENT PARTS TREATED AS INTERESTED PARTIES.

(a) Subparagraph (C) of section 771(9) of the Tariff Act of 1930 (19 U.S.C. 1677(9)(C)) is amended to read as follows:

"(C) a manufacturer, producer, or wholesaler in the United States of a like product, or of—

"(i) major parts,

"(ii) materials,

"(iii) components, or

"(iv) assemblies or subassemblies,

which, due to inherent characteristics, are intended to be incorporated into a like product.".

(b) Paragraph (9) of section 771 of the Tariff Act of 1930 (19 U.S.C. 1677(9)) is amended by striking out "like product" in subparagraphs (D), (E), and (F) and inserting in lieu thereof "like product or of a major part, material, component, assembly, or subassembly described in subparagraph (C)".

SEC. 108. DIVERSIONARY DUMPING.

(a) Section 771 of the Tariff Act of 1930 (19 U.S.C. 1677) is amended by adding at the end thereof the following new paragraph:

"(18) DIVERSIONARY DUMPING.—

"(A) IN GENERAL.—Diversionary dumping occurs when any material or component which—

"(i) is incorporated into the merchandise under investigation, and

"(ii) has been the subject of a previous investigation under subtitle B,

is purchased by the manufacturer or producer of such merchandise at a price that is less than the foreign market value of such material or component.

"(B) DETERMINATION OF FOREIGN MARKET VALUE.—

"(i) ANTIDUMPING DUTY IN EFFECT.—If an antidumping duty order is in effect with respect to the material or component described in subparagraph (A) at the time a determination of the existence of diversionary dumping is made, the foreign market value of such material or component used in determining the amount of such duty shall be used in determining the existence of diversionary dumping.

"(ii) NO ANTIDUMPING DUTY IN EFFECT.—If the previous investigation under subtitle B has been terminated or suspended because of the entry in force of any arrangement, agreement, or understanding entered into or undertaken by the United States and any foreign country or foreign customs union containing quantitative limitations, restrictions, or other terms relating to the importation into the United States of the material or component described in subparagraph (A), the determination of the foreign market value of such material or component which is used in determining the existence of diversionary dumping shall be based upon the best available evidence, including the allegations contained in any petition filed with respect to any previous investigation of such material or component under subtitle B and any information gathered in such previous investigation.".

(b) Paragraph (4) of section 773(a) of the Tariff Act of 1930 (19 U.S.C. 1677b(a)(4)) is amended—

(1) by striking out "or" at the end of subparagraph (B),

(2) by striking out the comma at the end of subparagraph (C) and inserting in lieu thereof "; or", and

(3) by inserting after subparagraph (C) the following new subparagraph:

"(D) diversionary dumping;".

(c) Section 773 of the Tariff Act of 1930 (19 U.S.C. 1677b) is amended—

(1) by inserting "(including such adjustments as may be appropriate to take into account the effects of diversionary dumping on such costs)" after "in question" in the first sentence of subsection (b), and

(2) by inserting "or components, as appropriately adjusted for diversionary dumping," after "the cost of materials" in subsection (e)(1)(A).

SEC. 109. UPSTREAM SUBSIDIES.

(a) Subsection (a) of section 771A of the Tariff Act of 1930 (19 U.S.C. 1677-1(a)) is amended by inserting "or is paid or bestowed under the authority of any statute, regulation, policy, or practice of the customs union or any of its members" after "provided by the customs union" in the second sentence.

(b) Subsection (b) of section 771A of the Tariff Act of 1930 (19 U.S.C. 1677-1(b)) is amended by adding at the end thereof the following new paragraph:

"(3) DIVERSION.—

"(A) DETERMINATION.—If—

"(i) a countervailing duty order is in effect with respect to an input product, or

"(ii) an input product is subject to any arrangement, agreement, or understanding entered into, or undertaken by, the United States and any foreign country or foreign customs union which contains quantitative limitations or restriction on, or other terms relating to, the importation of such input product into the United States,

and a subsidy continues to be paid or bestowed on such input product after the date on which such countervailing duty order was issued or on which such agreement took effect, the administering authority shall determine whether an increase in imports of the merchandise under investigation has occurred since such date.

"(B) PRESUMPTION.—If the determination made under subparagraph (A) is affirmative, the administering authority shall presume that a competitive benefit is being bestowed on the merchandise under investigation.".

SEC. 110. DISCLOSURE OF CONFIDENTIAL INFORMATION.

(a) Subparagraph (A) of section 777(c)(1) of the Tariff Act of 1930 (19 U.S.C. 1677f(c)(1)(A)) is amended to read as follows:

"(A) IN GENERAL.—Upon receipt of an application (before or after receipt of the information requested) which describes in general terms the type of information sought and sets forth reasons for the request, the administering authority and the Commission shall make confidential information submitted by any other person to the investigation available under a protective order described in subparagraph (B), unless the person who submitted such information establishes that substantial harm to the business operations of such person would result from such disclosure.".

(b) Clause (ii) of section 777(b)(1)(B) of the Tariff Act of 1930 (19 U.S.C.

1677f(b)(1)(B)(ii)) is amended to read as follows:

"(ii) a statement that the information should not be released under an administrative protective order, a statement of the reasons why the information should not be so released, and a statement of whether the person submitting the information will withdraw the information if the administering authority or the Commission determines to release the information under subsection (c).".

(c) Paragraph (1) of section 777(c) of the Tariff Act of 1930 (19 U.S.C. 1677f(c)(1)) is amended by adding at the end thereof the following new subparagraph:

"(C) TIME LIMITATION.—The determination of whether to make information available under this paragraph, and the availability of such information under a protective order if such determination is affirmative, shall occur not later than 5 days (or 10 days if the statements described in subsection (b)(1)(B)(ii) are submitted with such information) after the later of—

"(i) the date on which such information is requested under subparagraph (A), or

"(ii) the date on which such information is submitted to the Commission or the administering authority.".

TITLE II—RELIEF FROM INJURY CAUSED BY IMPORT COMPETITION

SEC. 201. INVESTIGATIONS UNDER SECTION 201 OF TRADE ACT OF 1974.

(a)(1) Chapter 1 of title II of the Trade Act of 1974 (19 U.S.C. 2251, et seq.) is amended—

(A) by striking out "President" each place it appears and inserting in lieu thereof "Administering Authority", and

(B) by striking out "presidential" in the heading of section 202 and inserting "by the administering authority" after the word "action".

(2) Section 601 of the Trade Act of 1974 (19 U.S.C. 2481) is amended by adding at the end thereof the following new paragraph:

"(11) The term 'Administering Authority' means the United States Trade Representative or any officer of the United States to whom the responsibility for carrying out the duties of the Administering Authority under this Act are transferred by law.".

(b) Paragraph (1) of section 201(a) of the Trade Act of 1974 (19 U.S.C. 2251(a)(1)) is amended by inserting "or to enhance competitiveness" after "alternative uses" in the second sentence.

(c) Subsection (b) of section 201 of the Trade Act of 1974 (19 U.S.C. 2251(b)) is amended—

(1) by striking out "to the domestic industry producing an article like or directly competitive with the imported article" in paragraph (1) and inserting in lieu thereof "to any domestic industry that produces an article like or directly competitive with the imported article or that produces materials, parts, components, or subassemblies irrevocably destined for incorporation in an article like or directly competitive with the imported article.";

(2) by striking out "substantial cause" in paragraphs (1), (2)(C), and (2)(D) and inserting in lieu thereof "cause";

(3) by inserting "domestic production facilities" after "operate" in paragraph (2)(A);

(4) by amending paragraph (2)(B) to read as follows:

"(B) with respect to the threat of serious injury—

"(i) a decline in sales or market share in the domestic industry concerned;

"(ii) a higher and growing inventory in the domestic industry concerned;

"(iii) a downward trend in production, profits, wages, or employment (or increasing underemployment) in the domestic industry concerned;

"(iv) any combination of coordinated government actions, whether carried out severally or jointly, that—

"(I) are bestowed on a specific enterprise, industry, or group thereof the effect of which is to assist the beneficiary to become more competitive in the export of any class or kind of merchandise, and

"(II) causes, or threatens to cause, serious injury to the domestic industry concerned; and

"(v) the extent to which the United States market is the focal point for diversion of exports of the article concerned by reason of restraints on exports of such article to, or on imports of such article into, third country markets; and";

(5) by striking out "may" in paragraph (3)(A) and inserting in lieu thereof "shall";

(6) by amending paragraph (4) to read as follows:

"(4) For purposes of this section, the term 'cause' means a cause which is important. A cause may be important even though other causes, such as a general economic recession, are of equal or greater importance."; and

(7) by adding at the end thereof the following new paragraph:

"(8) For purposes of this section, imports of like or directly competitive articles by domestic producers in an industry shall not be considered a factor indicating the absence of serious injury, or threat thereof, to such industry.".

(d) Paragraph (1) of section 201(d) of the Trade Act of 1974 (19 U.S.C. 2251(d)(1)) is amended—

(1) by striking out "or" at the end of subparagraph (A) and inserting in lieu thereof "and", and

(2) by striking out "remedy" in subparagraph (B) and inserting in lieu thereof "assist in remedying".

SEC. 202. PROVISIONAL RELIEF UPON FINDING OF CRITICAL CIRCUMSTANCES.

Section 201 of the Trade Act of 1974 (19 U.S.C. 2251) is amended by adding at the end thereof the following new subsection:

"(g)(1) If, during the course of an investigation initiated under this title, the Administering Authority finds that critical circumstances exist, the Administering Authority shall impose provisional measures consisting of any actions authorized under section 203(a). Such provisional measures shall remain in effect until the later of—

"(A) the date on which the measures are revoked by the President,

"(B) the date on which the Commission makes a negative determination under subsection (b)(1), or

"(C) the date that is 60 days after the date on which the Commission makes an affirmative determination under subsection (b)(1).

"(2) For purposes of this subsection, critical circumstances exist if a significant increase in imports (absolutely or relatively) over a short period of time has led to circumstances in which a delay in the imposition of relief would cause damage that would be difficult to repair.".

SEC. 203. CONSULTATIONS WITH FOREIGN GOVERNMENTS.

(a) Subsection (d) of section 201 of the Trade Act of 1974 (19 U.S.C. 2251(d)) is amended by adding at the end thereof the following new paragraph:

"(3) If the Commission makes an affirmative finding or recommendation under this paragraph, the Commission shall also determine (for purposes of section 203(l))—

"(A) whether trade in the article concerned has been affected by any combination of coordinated government actions, carried out severally or jointly, that—

"(i) are bestowed on a specific enterprise, industry, or group thereof, and

"(ii) assist the beneficiary in becoming more competitive in the export of any class or kind of merchandise, and

"(B) the extent to which the United States market is the focal point for diversion of exports of such article by reason of restraints on exports of such article to, or on imports of such article into, third country markets.

Such determinations shall be included in the report submitted under paragraph (1).".

(b) Section 203 of the Trade Act of 1974 (19 U.S.C. 2253) is amended by adding at the end thereof the following new subsection:

"(l) If—

"(1) the Administering Authority determines to provide import relief under section 202(a)(1), and

"(2) the Commission has made an affirmative determination under section 201(d)(3) with respect to an article,

the Administering Authority shall, in addition to the actions taken under section 202(a)(1), consult and negotiate with other countries that produce or consume such article to seek the establishment of a multilateral framework for the maintenance and development of fair, equitable, and nondisruptive patterns of trade in such article.".

SEC. 204. INDUSTRY ASSESSMENT AND COMPETITIVENESS STRATEGY.

(a) Chapter 1 of title II of the Trade Act of 1974 (19 U.S.C. 2251 et seq.) is amended by adding at the end thereof the following new section:

"SEC. 204. INDUSTRY ASSESSMENT AND COMPETITIVENESS STRATEGY.

"(a) After the Commission commences an investigation under section 201(a) on the basis of a petition filed by—

"(1) firms,

"(2) a certified or recognized union, or

"(3) a group of workers,

which represent a significant portion of the industry, the Administering Authority shall establish an advisory group for the industry if such representatives of the industry request, in the petition, that such an advisory group be established.

"(b) Each advisory group established under this section shall consist of—

"(1) individuals appointed by the Administering Authority from among the petitioners who are representative of the firms and of the workers in the domestic industry, and

"(2) officials of the Department of Labor, the Department of Commerce, and the Administering Authority.

"(c)(1) Each advisory group established under this section shall prepare for the industry concerned an assessment of current problems and a strategy to enhance competitiveness that sets forth objectives and specific steps that workers and firms could usefully undertake to improve the ability of the industry to compete or to assist the industry to adjust to new methods of competition.

"(2) Each advisory group established under this section shall include in the assessment and strategy prepared under paragraph (1) a determination of the ability of producers in the industry concerned to generate adequate capital to finance the modernization of plant and equipment or to oth-

erwise enhance competitiveness (including any associated research and development) specified in such assessment and strategy. Such determination shall include an estimate of the overall capital requirements of such industry.

"(3) The assessment and strategy prepared under paragraph (1) shall set forth those actions which may be taken by the appropriate Federal agencies under existing authority, or under new legislation, to assist in achieving the objectives set forth in the assessment and strategy.

"(4) Each advisory group shall submit copies of the assessment and strategy prepared under paragraph (1) to the Commission, the Administering Authority, the Secretary of Labor, and the Secretary of Commerce, within 120 days after the date on which the Commission commences the investigation with respect to the industry under section 201.

"(d) After an assessment and strategy is submitted by an advisory group under subsection (c)(4) and before the close of the period referred to in section 202(b), the Administering Authority shall seek to obtain, on a confidential basis, information from the individual members of such advisory group regarding—

"(1) how such members intend to act upon the recommended objectives and actions specified in such assessment and strategy, and

"(2) any other actions such members intend to take which will foster the objectives described in subsection (c)(1).

The Administering Authority shall transmit such information to the Commission, the Secretary of Labor, and the Secretary of Commerce on a confidential basis. The Administering Authority shall include in the transmission of such confidential information any other information obtained by the Administering Authority on the capital requirements of the industry referred to in section 201(b)(2)(B).

"(e) The Administering Authority, the Secretary of Commerce, and the Secretary of Labor shall provide such staff, information, personnel, and administrative services and assistance to advisory groups established under this section as such advisory groups may deem necessary to enable such advisory groups to carry out their responsibilities under this section. The Administering Authority may request other Executive branch agencies which administer programs that may contribute to enhancing the competitiveness of the domestic industry concerned to assist such advisory groups in carrying out their responsibilities under this section.

"(f)(1) If an assessment and strategy is submitted under subsection (c), the Administering Authority, the Commission, the Secretary of Labor, and the Secretary of Commerce shall consider such assessment and strategy in making any determination, or taking any action, under the provisions of this title.

"(2) Neither the failure of the representatives of an industry to request the establishment of an advisory group under subsection (a) nor the failure of an advisory group to submit an assessment and strategy under subsection (c) shall be taken into account in making any determination, or taking any action, under the provisions of this title.".

(b)(1) Subsection (a) of section 201 of the Trade Act of 1974 (19 U.S.C. 2251(a)) is amended by adding at the end thereof the following new paragraph:

"(3) Firms and workers representing a significant portion of an industry may request in the petition that an industry advisory group be established under section 204 for the purpose of preparing an assessment of current problems of the industry and a strategy to enhance competitiveness for the industry.".

(2) Subparagraph (B) of section 201(b)(2) of the Trade Act of 1974 (19 U.S.C. 2251(b)(2)(B)), as amended by section 201(b)(4) of this Act, is amended—

(A) by striking out "and" at the end of subclause (II) of clause (iv), and

(B) by adding at the end thereof the following new clause:

"(vi) in the case of an industry that has developed an assessment and strategy under section 204, the inability of producers in the domestic industry to generate adequate capital to finance the modernization of plants and equipment, or to otherwise enhance competitiveness, including any associated research and development, as set forth in such assessment and strategy for enhanced competitiveness; and"

(3) Subsection (d) of section 201 of the Trade Act of 1974 (19 U.S.C. 2252(d)) is amended by adding at the end thereof the following new paragraph:

"(4) If an assessment and strategy for the domestic industry is submitted under section 204(c)(2), the Commission shall take into account in developing its recommendations under paragraph (1) the objectives and actions, including the nature and extent of import relief, specified in such assessment and strategy.".

(c)(1) Paragraph (1) of section 202(a) of the Trade Act of 1974 (19 U.S.C. 2252(a)(1)) is amended—

(A) by striking out "and" at the end of subparagraph (A),

(B) by redesignating subparagraph (B) as subparagraph (C), and

(C) by inserting after subparagraph (A) the following new subparagraph:

"(B) shall, if an assessment and strategy has been prepared under section 204, evaluate any objectives and actions specified in such assessment and strategy, and".

(2) Paragraph (3) of section 202(c) of the Trade Act of 1974 (19 U.S.C. 2252(c)(3)) is amended to read as follows:

"(3) the probable effectiveness of import relief as a means of promoting adjustment or modernization in order to improve competitive abilities, the efforts being made or to be implemented by the industry concerned (including actions specified in the assessment and strategy prepared under section 204) to adjust to import competition, and other considerations relative to the position of the industry in the United States economy;".

(d) Section 203 of the Trade Act of 1974 (19 U.S.C. 2253) is amended by adding at the end thereof the following new subsection:

"(m)(1) If the Administering Authority determines to provide import relief under section 202(a)(1) and an assessment of current problems and strategy to enhance competitiveness was submitted under section 204(c) for the industry concerned, the Administering Authority shall publish in the Federal Register, on the same day on which action is taken under subsection (a), notice of the availability to the public of the text of such assessment and strategy and a summary thereof. Upon publication of a summary of the assessment and strategy under the preceding sentence, the Administering Authority shall be entitled to rely upon the actions outlined in such competitive assessment and strategy, and in the confidential information obtained under section 204(d), as one basis for granting relief.

"(2)(A) If a summary of an assessment and strategy is published under paragraph (1), a review committee consisting of the Administering Authority, the Secretary of Labor, and the Secretary of Commerce shall—

"(i) monitor, on a continuing basis, actions taken by the petitioners to improve the competitive position of the industry, including actions specified in any confidental information obtained under section 204(d);

"(ii) make such recommendations for administrative action under existing statutory authority as may be necessary to achieve the objectives specified in such assessment and strategy; and

"(iii) submit to Congress such recommended legislation as the review committee considers necessary or appropriate for the purpose of achieving the objectives specified in such assessment and strategy.

Any proposed legislation submitted under clause (iii) shall be subject to the same rules applicable to an implementing bill under section 151.

"(B) If the review committee described in subparagraph (A) determines that the firms or workers in the domestic industry are not implementing, or are implementing in an unsatisfactory manner—

"(i) the recommended objectives and actions specified in the assessment and strategy published under paragraph (1), or

"(ii) the actions declared in the confidential information obtained under section 204(d),

the review committee shall consult with the advisory group members on an individual or joint basis, as appropriate.

"(C) If, after consultations are held under subparagraph (B) and after taking into account such other relevant information as may be available, the review committee determines that the failure to implement, or failure to implement satisfactorily, the actions described in clause (i) or (ii) of subparagraph (B)—

"(i) is not justified by changed circumstances, and

"(ii) has adversely affected overall implementation of the objectives specified in the assessment and strategy published under paragraph (1),

the Administering Authority shall request the Commission to issue a report under section 203(i)(2) within 60 days of the date of such request. After taking such report by the Commission and the determination of the review committee into account, the Administering Authority shall determine whether all import relief provided to the industry under this section should be terminated or modified.".

(e) The table of contents of the Trade Act of 1974 is amended by inserting after the item relating to section 203 the following new item:

"Sec. 204. Industry assessment and competitiveness strategy.".

SEC. 205. IMPORT RELIEF.

(a) Subsection (a) of section 203 of the Trade Act of 1974 (19 U.S.C. 2253(a)) is amended—

(1) by striking out "or" at the end of paragraph (4),

(2) by redesignating paragraph (5) as paragraph (6), and

(3) by inserting after paragraph (4) the following new paragraph:

"(5) consult with petitioners and representatives of workers and firms in the affected industry as to the advisability and de-

sirability of taking appropriate action under section 303 or title VII of the Tariff Act of 1930, or title III of this Act, if, pursuant to any investigation under this title, the Administering Authority has reason to believe that any foreign government or firm is engaged in any action or practice for which relief is available under such section or title; or".

(b) Subsection (j) of section 203 of the Trade Act of 1974 (19 U.S.C. 2253(j)) is amended by inserting "good cause is shown or" after "unless".

TITLE III—RELIEF FROM INJURIOUS INDUSTRIAL TARGETING AND UNFAIR TRADE PRACTICES

SEC. 301. ENFORCEMENT OF UNITED STATES RIGHTS UNDER TRADE AGREEMENTS AND RESPONSE TO INJURIOUS INDUSTRIAL TARGETING AND OTHER FOREIGN TRADE PRACTICES.

(a)(1) Paragraph (1) of section 301(a) of the Trade Act of 1974 (19 U.S.C. 2411(a)(1)) is amended to read as follows:

"(1) IN GENERAL.—If the Administering Authority determines that action by the United States is appropriate—

"(A) to enforce the rights of the United States under any trade agreement; or

"(B) to respond to any act, policy, or practice of a foreign country or instrumentality that—

"(i) is inconsistent with the provisions of, or otherwise denies benefits to the United States under, any trade agreement,

"(ii) is unjustifiable, unreasonable, or discriminatory and burdens or restricts United States commerce, or

"(iii) constitutes injurious industrial targeting;

the Administering Authority may, to the extent necessary to enforce such rights, or to obtain the elimination of, or offset or otherwise respond to, such foreign act, policy, or practice, take the actions described in subsection (b).".

(2) Paragraph (2) of section 301(a) of the Trade Act of 1974 (19 U.S.C. 2411(a)(2)) is amended by striking out "President" and inserting in lieu thereof "Administering Authority".

(b) Subsection (b) of section 301 of the Trade Act of 1974 (19 U.S.C. 2411(b)) is amended to read as follows:

"(b) AUTHORIZED ACTIONS.—If the Administering Authority determines to take action under subsection (a), the Administering Authority may—

"(1) suspend, withdraw, or prevent the application of benefits of trade agreement concessions to carry out a trade agreement with the foreign country or instrumentality involved;

"(2) direct customs officers to—

"(A) assess duties or impose other import restrictions on the products of, or

"(B) assess fees or impose restrictions on the services of,

such foreign country or instrumentality for such time, in such an amount, and to such a degree as the Administering Authority determines appropriate;

"(3) negotiate agreements (including, but not limited to, orderly marketing agreements) with foreign countries or instrumentalities to fully offset the burden or restrictions on United States commerce;

"(4) submit to the President proposed administrative actions, and if necessary, legislation to implement any other government action which would restore or improve the international competitive position of the industry that has been injured or threatened with injury;

"(5) notwithstanding any other provision of law, recommend to the President action respecting service sector access authorization; or

"(6) any combination of the actions described in the preceding paragraphs.".

(c) Subsection (c) of the Trade Act of 1974 (19 U.S.C. 2411(c)) is amended—

(1) by striking out "President" each place it appears and inserting in lieu thereof "Administering Authority",

(2) by striking out "United States Trade Representative (hereinafter in this chapter referred to as the 'Trade Representative')" in paragraph (2)(B) and inserting in lieu thereof "Administering Authority", and

(3) by striking out "Trade Representative" in paragraph (3) and inserting in lieu thereof "Administering Authority".

(d) Section 301 of the Trade Act of 1974 (19 U.S.C. 2411) is amended by striking out subsection (d) and redesignating subsection (e) as subsection (d).

(e) Subsection (d) of section 301 of the Trade Act of 1974 (19 U.S.C. 2411(e)), as redesignated by subsection (d) of this section, is amended—

(1) by adding at the end thereof the following new paragraph:

"(7) INJURIOUS INDUSTRIAL TARGETING.—The term 'injurious industrial targeting' means any combination of coordinated government actions, whether carried out severally or jointly—

"(A) which are bestowed on a specific enterprise, industry, or group thereof,

"(B) which assist such enterprise, industry, or group to become more competitive in the export of any class or kind of merchandise, and

"(C) which cause, or threaten to cause, material injury (within the meaning of section 305(c)).", and

(2) by striking out "For purposes of this section" and inserting in lieu thereof "For purposes of this title".

(f) Section 302 of the Trade Act of 1974 (19 U.S.C. 2412) is amended—

(1) by striking out "United States Trade Representative (hereinafter in this chapter referred to as the 'Trade Representative')" in subsection (a)(1) and inserting in lieu thereof "Administering Authority",

(2) by striking out "President" in subsection (a)(1) and inserting in lieu thereof "Administering Authority",

(3) by striking out "Trade Representative" each place it appears and inserting in lieu thereof "Administering Authority", and

(4) by striking out "in order to advise the President concerning the exercise of the President's authority under section 301" in subsection (c)(1).

(g) Section 303 of the Trade Act of 1974 (19 U.S.C. 2413) is amended—

(1) by striking out "Trade Representative" each place it appears and inserting in lieu thereof "Administering Authority",

(2) by striking out "section 304" in subsection (b)(1)(B) and inserting in lieu thereof "sections 304 and 305",

(3) by striking out "section 306" in subsection (b)(2)(B) and inserting in lieu thereof "section 310",

(4) by adding at the end thereof the following new subsection:

"(c) DOMESTIC FIRMS AND WORKERS.—The Administering Authority shall consult with representatives of domestic firms and workers that may be affected by any investigation initiated under section 302, including the appropriate advisory committees established under section 135, regarding any determination which is required to be made by the Administering Authority under this title.", and

(5) by striking out "upon initiation of investigation" in the heading.

(h)(1) Sections 305 and 306 of the Trade Act of 1974 (19 U.S.C. 2415; 2416) are each amended by striking out "Trade Representative" each place it appears and inserting in lieu thereof "Administering Authority".

(2) Subsection (c) of section 305 of the Trade Act of 1974 (19 U.S.C. 2415(c)) is amended to read as follows:

"(c) CONFIDENTIAL BUSINESS INFORMATION.—

"(1) IN GENERAL.—Upon receipt of a written request for confidential business information obtained by the Administering Authority in connection with any investigation initiated under this title, including any information submitted by foreign governments, the Administering Authority shall make such information available (other than customer names and the identity of market research organizations) under a protective order described in paragraph (5).

"(2) NATIONAL SECURITY.—No information classified for national security reasons shall be made available under this section.

"(3) PROCEDURES.—The Administering Authority shall act upon requests for access to confidential business information within 10 days after receiving such request.

"(4) CONTINUING REQUEST.—A request for confidential business information shall be treated as continuing for the period of the investigation.

"(5) PROTECTIVE ORDER.—The protective order under which confidential business information is made available under this subsection shall contain such requirements as the Administering Authority may prescribe by regulation. The Administering Authority shall prescribe regulations that provide such sanctions for violations of protective orders as the Administering Authority determines to be appropriate, including disbarment from practice before the Administering Authority.".

(i) The table of contents of the Trade Act of 1974 is amended by striking out "upon initiation of investigation" in the item relating to section 303.

SEC. 302. INVESTIGATIONS UNDER TITLE III OF THE TRADE ACT OF 1974.

Section 304 of the Trade Act of 1974 (19 U.S.C. 2414) is amended to read as follows:

"SEC. 304. INVESTIGATIONS BY THE ADMINISTERING AUTHORITY.

"(a) COLLECTION AND VERIFICATION OF INFORMATION.—

"(1) FOREIGN GOVERNMENTS AND ENTERPRISES.—

"(A) QUESTIONNAIRES.—In conducting any investigation initiated under section 302, the Administering Authority shall present detailed questionnaires to the foreign governments and the foreign enterprises involved in such investigation in order to obtain information concerning the allegations contained in the petition.

"(B) VERIFICATION.—The Administering Authority shall verify all information provided by any foreign government or foreign enterprise in the course of any investigation initiated under section 302 which is relied on by the Administering Authority in making any determinations under this title.

"(2) USE OF BEST INFORMATION.—If—

"(A) any foreign government or foreign enterprise fails to provide information requested by the Administering Authority concerning any acts, policies, or practices of

such government or enterprise which are under investigation, or

"(B) the information provided by any foreign government or foreign enterprise is not sufficient or is otherwise unsatisfactory,

the determinations of the Administering Authority under this title shall be based on the best information otherwise available, which may be the allegations and information contained in the petition.

"(b) PRELIMINARY DETERMINATIONS.—

"(1) IN GENERAL.—By no later than the date that is 5 months after the date on which an investigation is initiated under section 302, the Administering Authority shall make a preliminary determination based upon such investigation as to whether there is reason to believe that—

"(A) the rights of the United States under any trade agreement are not being enforced, or

"(B) any act, policy, or practice of a foreign county or instrumentality—

"(i) is inconsistent with the provisions of any trade agreement or otherwise denies benefits to the United States under any trade agreement,

"(ii) is unjustifiable, unreasonable, or discriminatory and burdens or restricts United States commerce, or

"(iii) constitutes injurious industrial targeting.

"(2) PROVISIONAL ACTION.—If the preliminary determination of the Administering Authority under paragraph (1) is affirmative, the Administering Authority may take any action described in paragraph (1), (2), or (3) of section 301(b), or any combination of such actions, pending completion of the investigation.

"(c) FINAL DETERMINATION.—

"(1) IN GENERAL.—By no later than the date that 11 months after the date on which an investigation is initiated under section 302, the Administering Authority shall make a final determination based upon such investigation as to whether any of the circumstances described in subparagraph (A) or (B) of subsection (b)(1) exists.

"(2) ACTIONS AFTER FINAL DETERMINATIONS.—

"(A) AFFIRMATIVE FINAL DETERMINATION.—

"(i) IN GENERAL.—Except as provided in section 306, if the final determination under paragraph (1) is affirmative, the Administering Authority shall, by no later than the date that is 30 days after the date of such final determination, make a determination as to what action, if any, the Administering Authority will take under section 301(a).

"(ii) CONSULTATION.—If the final determination made under paragraph (1) is affirmative, the Administering Authority shall consult with the petitioner, if any, and representatives of the affected domestic firms and workers regarding the action, if any, which is to be taken under section 301(a).

"(iii) REPORT ON FAILURE TO TAKE ACTION.—If the final determination made under paragraph (1) is affirmative and the Administering Authority declines to take any action under section 301(a), the Administering Authority shall submit to the Congress a written statement which specifies—

"(I) the reasons why the Administering Authority decided to take no action under section 301(a), and

"(II) the views of representatives of the affected domestic firms and workers regarding such decision.

"(B) NEGATIVE FINAL DETERMINATION.—If—

"(i) the final determination under paragraph (1) is negative, and

"(ii) the Administering Authority took any action under subsection (b)(2),

the Administering Authority shall terminate such action and refund any duties or fees paid by reason of such action.

"(d) PUBLICATION.—Notice of the determinations made under subsections (b)(1) and (c)(1) of this section and of any determination to take action under section 301(a) shall be published in the Federal Register.".

SEC. 303. MANDATORY ACTION IN CASES OF INJURIOUS INDUSTRIAL TARGETING.

(a) Title III of the Trade Act of 1974 is amended by redesignating sections 305 and 306 as sections 309 and 310, respectively, and by inserting after section 304 the following new sections:

"SEC. 305. INVESTIGATIONS OF INJURIOUS INDUSTRIAL TARGETING.

"(a) INVESTIGATIONS BY ADMINISTRATIVE AUTHORITY.—If the Administering Authority makes a preliminary determination under section 304(b)(1) that the circumstances described in section 304(b)(1)(B)(iii) exist, the Administering Authority—

"(1) shall establish an advisory committee composed of—

"(A) representatives of domestic firms and workers in the industries which are affected by such targeting, and

"(B) appropriate Federal officials, and

"(2) by no later than the date on which a final determination is required to be made under section 304(c)(1) with respect to such targeting, shall formulate, in consultation with such advisory committee, proposals which would restore or improve the competitive position of such domestic industries in both domestic and foreign markets.

"(b) INVESTIGATIONS BY INTERNATIONAL TRADE COMMISSION.—

"(1) NOTICE OF INVESTIGATION.—On the day on which the Administering Authority initiates an investigation under section 302 of injurious industrial targeting, the Administering Authority shall submit to the United States International Trade Commission (hereafter in this title referred to as the 'Commission') a copy of—

"(A) if the investigation is initiated under section 302(a), the petition, or

"(B) if the investigation is initiated under section 302(b), a written statement describing the issues under investigation.

"(2) PRELIMINARY DETERMINATION.—By no later than the date that is 60 days after the date on which notice of an investigation is submitted to the Commission under paragraph (1), the Commission shall make a preliminary determination, based upon the best information available to the Commission at the time of the investigation, of whether there is a reasonable indication that—

"(A) an industry in the United States—

"(i) is materially injured, or

"(ii) is threatened with material injury; or

"(B) the establishment or growth of an industry in the United States is materially retarded;

by reason of sales or likely sales in the United States or other foreign markets of the merchandise which is the subject of such investigation.

"(3) FINAL DETERMINATION.—The Commission shall make a final determination of whether any of the circumstances described in paragraph (2) exist with respect to the merchandise that is the subject of an investigation initiated under section 302 by no later than the date that—

"(A) if an affirmative preliminary determination under section 304(b)(1) was made with respect to such investigation, is 45 days after the date on which an affirmative final determination is made under section 304(c)(1) with respect to such investigation, or

"(B) if the Administering Authority mad a negative preliminary determination unde section 304(b)(1) with respect to such inves tigation, is 75 days after the day on whic an affirmative final determination is mad under section 304(c)(1) with respect to suc investigation.

No final determination shall be require under this subsection with respect to an in vestigation if the final determination unde section 304(c)(1) is negative.

"(4) JUDICIAL REVIEW.—Any determinatio made by the Commission under this sectio shall be subject to review by the Unite States Court of International Trade as i such determination were made under eithe section 703(a) or 705(b) of the Tariff Act o 1930, as the case may be.

"(c) MATERIAL INJURY AND THREAT OF MA TERIAL INJURY.—

"(1) MATERIAL INJURY.—

"(A) IN GENERAL.—For purposes of this sec tion, the term 'material injury' means harr which is not inconsequential, immaterial, o unimportant.

"(B) VOLUME AND CONSEQUENT IMPACT.—I making determinations under this sectio the Commission shall consider, among othe factors—

"(i) the volume of sales of the merchan dise which is the subject of the investiga tion,

"(ii) the effect on sales of that merchan dise on prices in the United States or othe foreign markets for like products, and

"(iii) the impact of sales of such merchan dise on domestic producers of like product

"(C) EVALUATION OF VOLUME AND PRICE E FECTS.—For purposes of this section—

"(i) VOLUME.—In evaluating the volume o sales of merchandise, the Commission sha consider whether the volume of sales of th merchandise, or any increase in tha volume, either in absolute terms or relativ to production or consumption in the Unite States or other foreign markets, is signif cant.

"(ii) PRICE.—In evaluating the effect o sales of the merchandise on prices, th Commission shall consider—

"(I) whether there has been significan price undercutting by the foreign merchan dise as compared with the price of like pro ucts of the United States, and

"(II) whether the effect of sales of th merchandise otherwise depresses prices to significant degree or prevents to a signif cant degree price increases that otherwi would have occurred.

"(iii) IMPACT ON AFFECTED INDUSTRY.—In e amining the industry involved in the inves gation, the Commission shall evaluate a relevant economic factors which have bearing on the state of the industry, inclu ing, but not limited to—

"(I) actual and potential decline in outpu sales, market share, profits, productivit return on investments, and utilization of c pacity,

"(II) factors affecting domestic and fo eign prices,

"(III) actual and potential negative effec on cash flow, inventories, employmen wages, growth, ability to raise capital, an investment, and

"(IV) displacement of United States e ports of like products in third country ma kets.

"(2) THREAT OF MATERIAL INJURY.—

"(A) IN GENERAL.—In determining wheth an industry in the United States is threa ened with material injury, the Commissi

shall consider, among other relevant economic factors—

"(i) any increase in production capacity or existing unused capacity in foreign countries under investigation that is likely to result in increased exports from such country,

"(ii) any rapid increase in United States market penetration and the likelihood that the penetration will increase to an injurious level,

"(iii) the probability that imports of the merchandise under investigation will enter the United States at prices that will have a depressing or suppressing effect on domestic prices of like products,

"(iv) the probability that exports from foreign countries under investigation will enter third country markets at prices that will have a depressing or suppressing effect on prices for United States exports of like products or will decrease sales of like products of the United States in such third country markets,

"(v) any substantial increase in inventories of the merchandise in the United States or in third country markets,

"(vi) the extent to which the United States market is the focal point for exports of such merchandise by reason of restraints on exports of such article to, or on imports of such article into, third country markets, and

"(vii) any other demonstrable adverse trends that indicate that the importation or sale for importation of such merchandise, or sales of such merchandise in third country markets, will be the cause of actual injury.

"(B) BASIS FOR DETERMINATION.—Any determination by the Commission under this section that an industry in the United States is threatened with material injury shall be made on the basis of the evidence that the threat of material injury is real and that actual injury is imminent. Such a determination may not be made on the basis of mere conjecture or supposition, but can be made on the basis of official statements of intended action by foreign governments.

"(3) STANDARD FOR DETERMINATION.—The presence or absence of any factor which the Commission is required to evaluate under paragraph (1)(C) or (2) shall not necessarily give decisive guidance with respect to the determination of material injury by the Commission.

"SEC. 306. MANDATORY ACTION IN CASES OF INJURIOUS INDUSTRIAL TARGETING.

"(a) PROVISIONAL ACTION.—If—

"(1) the Administering Authority makes a preliminary determination under section 304(b)(1) with respect to an investigation that an act, policy, or practice of a foreign country or instrumentality constitutes injurious industrial targeting, and

"(2) the Commission makes an affirmative preliminary determination under section 305(b)(2) with respect to such investigation,

the Administering Authority shall, pending conclusion of such investigation, take at least one of the actions described in paragraph (1), (2), or (3) of section 301(b), or any combination of such actions, in order to prevent further injury, or threat of injury, from such injurious industrial targeting.

"(b) ACTION IN RESPONSE TO FINAL DETERMINATION.—

"(1) IN GENERAL.—Except as provided in subsection (c), if—

"(A) the Administering Authority makes a final determination under section 304(c)(1) with respect to any investigation that an act, policy, or practice of a foreign country or instrumentality constitutes injurious industrial targeting, and

"(B) the Commission makes an affirmative final determination under section 305(b)(3) with respect to the merchandise that is the subject of such investigation,

the Administering Authority shall take at least one of the actions described in section 301(b) in order to fully offset the material injury, or threat of material injury, from such injurious industrial targeting.

"(2) PROPOSALS.—

"(A) IN GENERAL.—If the requirements of subparagraphs (A) and (B) of paragraph (1) are met, the Administering Authority shall submit to the President—

"(i) any proposed administrative action, and

"(ii) any proposed legislation,

which the Administering Authority determines is necessary to restore or improve the competitive position of any industry that is materially injured, or threatened with material injury, by the injurious industrial targeting.

"(B) SPECIAL CONSIDERATION OF PROPOSED LEGISLATION.—The President may submit to the Congress a bill that consists of the legislative proposal described in subparagraph (A)(ii). Such bill shall be subject to the same rules applicable to an implementing bill under section 151, except that in applying paragraphs (1) and (2) of section 151(e) with respect to such bill "15th day" shall be substituted for "45th day".

"(3) REPORT TO CONGRESS.—If the requirements of subparagraphs (A) and (B) of paragraph (1) are met, the Administering Authority shall submit a written statement to the Congress which specifies the actions that the Administering Authority will take under paragraph (1) to offset the material injury, or threat of material injury, from the injurious industrial targeting.

"(c) SETTLEMENT AGREEMENTS.—In lieu of taking action under subsection (b)(1), the Administering Authority may enter into an agreement with the foreign country or instrumentality involved if—

"(1) such agreement completely eliminates the material injury, or threat of material injury, from the injurious industrial targeting, and

"(2) in the case of an investigation initiated under section 302(a), such agreement is approved by the petitioner.

"(d) PUBLICATION.—Notice of any action taken by the Administering Authority under this section, and of any agreements entered into under subsection (c), shall be published in the Federal Register.

"SEC. 307. TERMINATION AND COMPENSATION UPON GATT DISAPPROVAL.

"If the contracting parties to the General Agreement on Tariffs and Trade disapprove of any action taken by the Administering Authority under section 301 or 306, the Administering Authority may take such other action as the Administering Authority determines appropriate to compensate any foreign country or instrumentality that is adversely affected by such action, including, but not limited to—

"(1) modification or termination of the action taken under section 301 or 306, or

"(2) modification or continuance of any existing duty or any duty-free or excise treatment.

"SEC. 308. REMEDIES UNDER TARIFF ACT OF 1930.

"If, in the course of an investigation conducted under this title, the Administering Authority has reason to believe that a foreign government is engaged in any action or practice for which relief is available under section 303 or title VII of the Tariff Act of 1930, the Administering Authority shall consult with the petitioner, if any, and the representatives of the domestic firms and workers that may be affected by such action or practice regarding the advisability and desirability of taking action under the appropriate provisions of section 303 or title VII of the Tariff Act of 1930.".

(b) The table of contents of the Trade Act of 1974 is amended by striking out the items relating to sections 304, 305, and 306 and inserting in lieu thereof the following:

"Sec. 304. Investigations by the Administering Authority.
"Sec. 305. Investigations of injurious industrial targeting.
"Sec. 306. Mandatory action in cases of injurious industrial targeting.
"Sec. 307. Termination and compensation upon GATT disapproval.
"Sec. 308. Remedies under Tariff Act of 1930.
"Sec. 309. Requests for information.
"Sec. 310. Administration.".

TITLE IV—NEGOTIATING OBJECTIVES

SEC. 401. FOREIGN MARKET ACCESS; STATE-OWNED OR CONTROLLED ENTERPRISES.

(a) Chapter 1 of title I of the Trade Act of 1974 is amended by adding at the end thereof the following new section:

"SEC. 110. FOREIGN MARKET ACCESS; STATE-OWNED OR CONTROLLED ENTERPRISES.

"Principal United States negotiating objectives under section 102 shall be—

"(1) to obtain and preserve maximum access to international markets for United States manufactured products;

"(2) to obtain the elimination of foreign government acts, policies, or practices identified under section 181 with particular consideration given to measures which deny to United States industries national treatment in all respects;

"(3) to obtain internationally agreed upon rules and procedures to evaluate and respond to the maintenance and operation of enterprises owned or controlled by any government which engages in international trade in goods and services; and

"(4) to establish procedures which—

"(A) assure that the sale of goods and services in international commerce by such enterprises are on commercial terms,

"(B) provide standards for the operation of such enterprises pursuant to commercial considerations, and

"(C) provide special rules under the trade agreements approved under section 2 of the Trade Agreements Act of 1979 for the treatment of goods and services of such enterprises that are not operated according to commercial considerations.".

(b) The table of contents of the Trade Act of 1974 is amended by inserting after the item relating to section 109 the following new item:

"Sec. 110. Foreign market access; state-owned or controlled enterprises.".

[Section-by-Section Analysis]

THE COMPREHENSIVE TRADE LAW REFORM ACT OF 1985

TITLE I—COUNTERVAILING AND ANTIDUMPING DUTY LAWS

Section 101. Limitations on acceptances of country under the agreement:

This section amends Section 701 of the Tariff Act of 1930 by requiring that countries "under the Agreement" must commit themselves under the General Agreement on Tariffs and Trade to eliminate export

subsidies within one year; not to increase existing export subsidies; not to extend such subsidies to new merchandise or introduce new export subsidies; and to eliminate immediately export subsidies on merchandise which the ITC finds is already competitive in the U.S. market and would be competitive without such subsidization. Least developed countries, as defined in Section 124 of the Foreign Assistance Act of 1961, as amended, are allowed a transitional period of five years to phase out export subsidies, as opposed to higher income developing countries that must eliminate the subsidies promptly.

The Administering Authority would be required to review compliance with the commitments once a year. If noncompliance were found, the designation would be withdrawn. If the withdrawal occurred after the Commission had made a negative injury determination or after an order has been revoked, the negative determination of revocation would be voided.

Section 102.—ITC review of critical circumstances:

This section revises the procedural aspects of antidumping and countervailing duty law in four ways:

(1) Instead of requiring a petitioner to allege critical circumstances, the ITA would be required to begin a critical circumstances investigation on the date that it initiates the dumping or subsidies investigation. It would publish a "notice of import surge" whenever it found evidence that imports have increased significantly in response to the filing of the petition.

(2) The ITC would be required to make an affirmative critical circumstances determination if the ITA has made an affirmative critical circumstances determination and if the ITC has made an affirmative material injury determination (not a threat only or retardation of establishment only determination).

(3) The ITA would direct Customs to suspend liquidation of entries under investigation entered 90 days before the anticipated date of the preliminary determination. If no critical circumstances determination is made, Customs would be ordered to liquidate all imports entered before the date of the preliminary determination.

(4) Countries that are not "countries under the Agreement" would be made subject to the critical circumstances provisions of the countervailing duty law.

Section 103.—Persistent dumping and subsidization:

This section amends Sections 703 and 733 to waive the requirement of a preliminary determination by the Commission in any instance where the Administering Authority determines that, during the year preceding the filing of a petition, the Commission had made a preliminary or final affirmative determination with respect to the same product. This section therefore dispenses with the requirement of a preliminary determination in those instances where successive petitions are filed to deal with imports of the same product from many different countries. In addition, it provides for the waiver of preliminary injury determinations in such instances, without regard to whether the preceding injury determination was made under antidumping or countervailing duty law with respect to investigations of that product.

Section 104.—Suspension of investigations:

This section amends Section 704(b) to prevent the Commerce Department from suspending a CVD investigation based on a promise by a foreign government to apply an export tax equal to the determined net subsidy (otherwise known as an "offsetting" export tax), thus eliminating the export tax as a basis for suspending a CVD investigation.

Section 105.—Limited application of 90-day review authority:

This section amends Section 736(c) by adding three new criteria for the institution of expedited reviews of AD orders, and allows for written comments by interested parties before the decision is made to conduct such a review. The additional criteria include: (1) normal AD time lines; (2) evidence of a significant anticipated margin differential; and (3) representative sales as the basis for review.

Section 106.—Countervailable subsidy definition:

This section amends the definition of subsidy to make countervailable the provision of goods or services which are on terms inconsistent with commercial considerations (as well as on preferential terms). In addition, it make countervailable loans, loan guarantees and equity infusions which are on preferential terms (as well as on terms inconsistent with commercial considerations). At present, only the provision of goods or services or preferential terms and/or loans, loan guarantees and equity infusions on terms inconsistent with commercial considerations are countervailable.

Section 107.—Component part producers treated as interested parties:

This section defines "interested party" to permit participation in AD & CVD proceedings by those associated with the production of major parts and components intended to be incorporated into the imported article.

Section 108.—Diversionary dumping:

This section does the following:

(1) It establishes a new Section 771(18) definition of "Diversionary Dumping" that permits a less than fair value dumping analysis to be applied to an input which is the subject of an outstanding antidumping order against the manufacturer or producer of the material or component, as well as to an input which is the subject of a suspension agreement or other arrangement affecting the material or component.

(2) It amends Section 773(a) to include an adjustment amount for diversionary dumping in determining foreign market value.

(3) It amends Section 773(b) to include an adjustment amount for diversionary dumping in determining sales at less than cost of production.

(4) It amends Section 773(e) to include an adjustment amount for diversionary dumping in determining the constructed value of components as well as materials.

Section 109.—Upstream subsidies:

This section does the following:

(1) It amends Section 771A(a) to enlarge the third-country application of the upstream subsidy provisions to subsidies paid or bestowed under the authority of a customs union or its members.

(2) It establishes a new Section 771A(b)(3) "special diversion" rule creating a presumption of competitive benefit for an input product where there is a prior subsidy finding or the input product is subject to an arrangement which results in increases in imports of the investigated product.

Section 110.—Disclosure of confidential information:

This section amends Section 777 to make clear that continuing disclosure is to take place pursuant to one application that describes, in general terms, the type of information sought. The initial application may be filed before any information is submitted by any party and may list and request all of the types of information that may be submitted in the case. This application would operate as an ongoing request for release. In addition, this section specifies strict time lines for the release of information under APO, to ensure that current procedures are improved. With regard to those parties that oppose release, such parties would be required to state at the time the information is submitted both why they oppose release and whether they want to withdraw the information should the Commerce Department decide release is justified. Finally, this section requires disclosure of confidential information submitted under a properly filed APO, unless the submitter proves disclosure will cause substantial harm to its business operations, and that such harm outweighs the requester's need for the information.

TITLE II—RELIEF FROM INJURY CAUSED BY IMPORT COMPETITION

Section 201.—Investigations under section 201 of Trade Act of 1974:

This section amends Chapter 1, Title II of the Trade Act of 1974, dealing with authority to grant temporary import relief to injured industries following investigations by the International Trade Commission. In the past, the ultimate decision to grant import relief has rested with the President. This section transfers that authority to the Administering Authority.

This section includes enhancement of an industry's competitiveness as a purpose for which import relief can be sought.

Standing is given to an industry that produces materials, parts, components or subassemblies irrevocably destined for incorporation in an article like or directly competitive with an imported article.

This section replaces the requirement that imports be the "substantial cause" of injury with the requirement that they be merely "the cause of injury." The term "cause" is defined as a cause which is important, even through another cause or other causes, such as a general economic recession, may be of equal or greater importance.

This section also lists additional factors for the International Trade Commission (ITC) to consider in making a determination of threat of injury. These include (1) a decline in market share; (2) higher and growing domestic inventories; (3) a downward trend in production, profit, wages or employment; (4) foreign industrial targeting and (5) the extent to which diversion of exports to the U.S. market occurs because other markets are closed. The section also provides that imports by domestic producers shall not be considered a factor indicating the absence of serious injury, or threat thereof. If injury is found to exist, the ITC must recommend relief, even if the relief will only assist in remedying the injury. The ITC may also recommend adjustment assistance in addition to increased duties or import restrictions.

Section 202.—Provisonal relief upon finding of critical circumstances:

This section adds a new subsection to Section 201 of the Trade Act of 1974, permitting the Administering Authority to impose provisional measures should it find that critical circumstances exist. Critical circumstances are defined as instances where a delay in inhibiting a significant increase in imports which occurred over a short period of time would cause damage difficult to repair. Provisonal measures may consist o

duty imposition, tariff-rate quotas, quantitative restrictions, orderly marketing agreements or any combination thereof. These measures would remain in force until the President revokes them, the ITC makes a negative determination, or 60 days after the ITC makes an affirmative determination.

Section 203.—Consultations with foreign governments:

This section amends Section 201 of the Trade Act of 1974 to provide that when the ITC makes an affirmative recommendation to the Administering Authority, it shall determine whether the foreign government concerned engaged in actions to expand export markets or to restrict imports of the article, and whether diversion of exports to the United States has occurred because other markets are closed. If the ITC determines that either of these conditions has occurred, and the Administering Authority decides to impose import relief, the Administering Authority must consult and negotiate with other producing and consuming countries to seek to establish a multilateral framework for the maintenance and development fo fair, equitable and non-disruptive patterns of trade.

Section 204.—Industry assessment and competitiveness strategy:

This section adds a new Section 204, entitled "Industry Assessment and Competitiveness Strategy." The section accords firms and workers representing a significant portion of the industry the right to request the establishment of an ad-hoc industry advisory group to prepare an assessment of current problems and a strategy to enhance competitiveness for the industry. The assessment and strategy is to set forth objectives and specific steps which workers and firms could usefully undertake to improve the industry's ability to compete or to assist the industry to adjust to new methods of competition. The advisory group is to include in its report a determination of the ability of producers in the industry to generate adequate capital to finance the modernization of plant and equipment, or to otherwise enhance competitiveness, including an estimate of the overall capital requirements of the industry. Copies of the assessment and strategy are to be submitted to the ITC, The Administering Authority, and the Secretaries of Commerce and Labor within 120 days after the ITC began the investigation. The membership of the group is to include appointees of the Administering Authority who are representative of workers and the industry, and employees of the Departments of Commerce and Labor. Staff is to be provided by the Secretaries of Commerce and Labor.

After the assessment and strategy is completed, the Administering Authority will seek to obtain, on a confidential basis, information from individual members of the advisory group concerning how they intend to act upon the recommended objectives and actions in the assessment and strategy, or other actions they intend to take to enhance competitiveness. Such information will be shared, on a confidential basis, with the ITC and the Secretaries of Labor and Commerce.

Failure to prepare an assessment and strategy for the industry may not be a factor considered by the ITC in making either its injury determination, or its relief recommendation, nor may it be a factor in the relief decision of the Administering Authority. The ITC is, however, required to take account of such assessment and strategy in making its recommendation regarding the appropriate relief.

The ITC is also to consider, as a factor in evaluating threat of substantial injury, the inability of producers in the industry to generate adequate capital to finance plant and equipment modernization or enhance competitiveness, as provided in the assessment and strategy.

This section requires the Administering Authority, in determining what, if any, relief to provide an injured industry, to evaluate the assessment and strategy and take account of the probable effectiveness of import relief as a means to improve competitive abilities. The Secretaries of Labor and Commerce are also required to take account of the assessment and strategy in developing their advice.

This section also provides that when import relief is granted and an assessment and strategy for the industry has been prepared, the Administering Authority is entitled to rely upon the actions outlined in the assessment and strategy, and individual confidential submissions, as one basis for granting relief. The Administering Authority is also to establish a review committee, comprised of itself and the Secretaries of Commerce and Labor, to monitor actions taken to improve the competitive position of the industry, including actions described in the confidential submissions. If, after consultation with the advisory group, the review committee considers that recommended actions and objectives in the assessment and strategy or intended actions described in confidential submissions are not being implemented, or are being unsatisfactorily implemented, and that the failure to implement them is not justified by changed circumstances and has adversely affected the overall implementation of the objectives in the assessment and strategy, then it must so notify the Administering Authority. The Administering Authority will then ask the Commission to report under Section 203(i)(2) on the effects of removing relief. After receiving the Commission report, the Administering Authority will immediately consider whether import relief to the industry should be terminated or modified.

Section 205.—Import relief.

This section provides that if the Administering Authority determines that import relief is appropriate, the Administering Authority shall consult with petitioners and industry representatives as to the advisability of taking action under the countervailing duty provisions of U.S. trade laws or under Title III of the Trade Act of 1974, where there is reasonable cause to believe that such actions would be appropriate.

TITLE III—RELIEF FROM INJURIOUS INDUSTRIAL TARGETING AND UNFAIR TRADE PRACTICES

Sections 301.—Enforcement of United States rights under trade agreements and response to injurious industrial targeting and other foreign trade practices:

This section transfers all Section 301 authority from the President to the Administering Authority, and authorizes the Administering Authority to act in response to injurious industrial targeting. This practice is defined as any combination of coordinated government actions, whether carried out severally or jointly which: (a) are bestowed on a specific enterprise industry or group thereof, (b) assist such enterprise, industry or group to become more competitive in the export of any class or kind of merchandise, and (c) cause, or threaten to cause, material injury. In addition, this section requires the Administering Authority to consult with representatives from industry and labor prior to reaching any determination; authorizes various actions (including duties, restrictions and negotiated agreements) to restore or improve the international competitive position of the affected domestic industry; and requires that confidential information submitted during an investigation be available for disclosure under administrative protective order.

Section 302.—Investigations under title III of the Trade Act of 1974:

This section requires written questionnaires and verification of all information submitted by foreign governments and corporations; specifies strict time lines in regard to preliminary and final determinations; and requires submission of a written statement to the Congress if the final determination was affirmative and the Administering Authority declines to take any ion.

Section 303.—Mandatory action in cases of injurious industrial targeting:

This section establishes a separate track for investigations of injurious industrial targeting and, upon an affirmative ITC material injury finding and an affirmative determination by the Administering Authority, requires that the Administering Authority take at least one of a number of described actions to offset the material injury or the threat of material injury from such targeting. In addition, when the Administering Authority determines preliminarily that targeting has occurred, it requires establishment of an advisory committee (composed of representatives of affected domestic firms and workers as well as appropriate federal officials) to develop proposals to improve the competitive position of the industry affected by such targeting.

TITLE IV—NEGOTIATING OBJECTIVES

Section 401.—Foreign market access for all products.

This section amends Section 104 of the Trade Act of 1974 to clarify that the United States objective of securing maximum access to international markets extends to all products, not just high-technology products. In addition, it clarifies, as a principal U.S. negotiating objective, the elimination of those acts, policies, or practices identified in Section 181 which deny national treatment to U.S. industries.

STATE-OWNED OR CONTROLLED ENTERPRISES

This section amends Sections 102 and 121 of the Trade Act of 1974 to require that the United States undertake efforts to secure an international agreement on rules and procedures to evaluate and respond to the maintenance of state-owned or controlled enterprises. This section also specifies the desirable terms of such an agreement and urges the United States to negotiate on the expansion and revision of Article XVII of the GATT (relating to state-controlled enterprises).●

● Mr. COHEN. Mr. President, I am pleased to join my colleagues today in introducing the Comprehensive Trade Law Reform Act of 1985. Last year, the Congress took the first steps toward the rationalization of our trade laws with enactment of the Trade and Tariff Act of 1984. The legislation we are introducing today builds upon the framework laid down last year, and moves the United States closer to a fair trade relief mechanism that will effectively deal with the complexities of the international trading system.

In my own State of Maine, the lumber, fishing, potato, textile, shoe and paper industries have been under siege by government-subsidized imports from a great number of our trading partners. Many of these industries are currently pursuing unfair trade complaint cases before the Commerce Department and the International Trade Commission. To date, their collective track record has not been good—which is more a reflection on the inadequacy of our existing trade laws than on any deficiency in the merits of their petitions. The legislation we are introducing today will correct many of these flaws in our current trade laws which have prevented a significant number of U.S. industries from obtaining the relief they so clearly deserve.

As my colleague, Senator HEINZ, has detailed the various provisions of this comprehensive trade law revision, I will not repeat him. However, let us serve notice to our trading partners that the United States will no longer be the marketplace for subsidized and dumped foreign products, nor the object of foreign government targeting.

We are committed to rationalizing the system by which we control our borders to ensure that our domestic producers do not unjustly suffer from the illegal trading practices which have become more prevalent in this increasingly merchantilistic world. I urge my colleagues to join us in supporting this important initiative.●

By Mr. GORTON (for himself, Mr. CHAFEE, Mr. EVANS, Mr. HATFIELD, Mr. INOUYE, Mr. MATSUNAGA, Mr. MOYNIHAN, and Mr. WILSON):

S. 1494. A bill to amend title 23, United States Code, to limit outdoor advertising adjacent to Interstate and Federal-aid primary highways; to the Committee on Environment and Public Works.

(The remarks of Mr. GORTON and the text of the legislation appear earlier in today's RECORD.)

By Mr. MURKOWSKI (by request):

S. 1495. A bill to amend title 38, United States Code, to enhance recruitment and retention by the Veterans' Administration of graduate and student nurses; to the Committee on Veterans' Affairs.

RECRUITMENT AND RETENTION OF NURSES

Mr. MURKOWSKI. Mr. President, I rise to introduce, by request, a bill which would improve and enhance the ability of the Veterans' Administration to recruit and retain graduate and student nurses.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1495

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 4114(a)(3) of title 38, United States Code, is amended—

(A) by striking out "shall not exceed one year" in the second sentence of paragraph (A) and inserting in lieu thereof "may exceed one year, but shall not exceed two years"; and

(B) by inserting after paragraph (B) the following new paragraph:

"(C) A student who is pursuing a full course of nursing in a recognized school of nursing approved by the Administrator may be reappointed for one year. Other personnel whose appointments are limited by this section to one year may not be reappointed.".

By Mr. DIXON (for himself, Mr. PROXMIRE, Mr. GRASSLEY, Mr. LEVIN, and Mr. RIEGLE):

S. 1496. A bill to correct imbalances in certain States in the Federal tax to Federal benefit ratio by reallocating the distribution of Federal spending, and for other purposes; to the Committee on Governmental Affairs.

(The remarks of Mr. DIXON and the text of the legislation appear earlier in today's RECORD.)

By Mr. DOLE (for himself, Mr. ZORINSKY, Mr. HELMS, Mr. LEAHY, Mr. LUGAR, Mr. MELCHER, Mr. COCHRAN, Mr. PRYOR, Mr. BOSCHWITZ, Mr. BOREN, Mrs. HAWKINS, Mr. DIXON, Mr. ANDREWS, Mr. HEFLIN, Mr. WILSON, Mr. HARKIN, Mr. MCCONNELL, and Mrs. KASSEBAUM):

S. 1497. A bill to establish a National Commission on Agricultural Policy to study the structure, procedures, and methods of formulating and administering agricultural policies, programs, and practices of the United States; to the Committee on Agriculture, Nutrition, and Forestry.

NATIONAL AGRICULTURAL POLICY COMMISSION ACT

Mr. DOLE. Mr. President, it is my pleasure to introduce today the National Agricultural Policy Commission Act of 1985. I ask that the following Senators be listed as original cosponsors: Senator DOLE, Senator ZORINSKY, Senator HELMS, Senator LEAHY, Senator LUGAR, Senator MELCHER, Senator COCHRAN, Senator PRYOR, Senator BOSCHWITZ, Senator BOREN, Senator HAWKINS, Senator DIXON, Senator ANDREWS, Senator HEFLIN, Senator WILSON, Senator HARKIN, Senator MCCONNELL, and Senator KASSEBAUM. This legislation is in response to a call by the National Governors' Association, chaired by Kansas Gov. John Carlin, for an impartial and bipartisan forum to evaluate and make recommendations for improvements in the way U.S. agricultural policies, programs, and practices are developed and implemented. As such, the National Commission on Agricultural Policy would have no direct policy making authority, but would serve as a sounding board for the administration and for the Congress on these issues.

AGRICULTURE COMMITTEE ACTION

During this morning's markup on the 1985 farm bill in the Senate Agriculture Committee, every member joined in a unanimous 17 to 0 vote to add this legislation to the other provisions already approved. Due to the uncertain date for completing the farm bill, however, I am introducing this act at this time as a separate piece of legislation.

QUALITY OF COMMISSION MEMBERS IS KEY

In recommending the establishment of such a panel, the National Governors' Association has stressed the importance of choosing individuals who will place the welfare of our agricultural system and its role in U.S. society and the national economy above parochial concerns. As an advisory group, the Commission would serve little purpose and could lose the respect and attention of both the administration and congressional committees if it were seen to be dominated by special interests competing for their own piece of the pie.

One of the basic reasons for the establishment of this Commission is the well-recognized fact that our national policy development process for agricultural issues is not working very well. We are also fully aware of the crisis conditions that seem to have become an almost permanent feature across the landscape of rural America. These difficult times call for agricultural statesmanship—not politics as usual.

I believe, Mr. President, that the quality of the Commission and its work will depend in large part on how its members are selected. I have the greatest regard for the private sector representatives who are active in policy issues at the national level. Nonetheless, I also recognize the need to involve agricultural leaders recognized for their leadership and judgment at the grassroots level. Accordingly, I have provided for the various State Governors to nominate from two to four candidates each, and for the President to select 15 Commission members from this list.

THE KANSAS WORKING GROUP MODEL

In making their nominations, Governors would do well to consider appointing selection committees or working groups similar to the one which Governor Carlin established in Kansas 3 years ago. I recently met with the group and its chairman, State Secretary of Agriculture Harland Priddle, to discuss the problems facing our farmers and ranchers. I am very much impressed by the balanced and broa

perspective they have been able to achieve among individuals representing a range of different interests. I would point out that the proposal to create this Commission grew directly from their work, and from Governor Carlin's efforts to promote it within the NGA. I am confident he will turn to the Kansas agriculture working group for recommendations on who our State should nominate to the Commission, if this legislation is enacted. I would wholeheartedly recommend the Kansas model to other States.

THE VALUE OF COMMISSIONS

Mr. President, I share the suspicions of other Members of the Senate about the value and purpose of setting up new Commissions. The number which have made substantive and lasting contributions to the policy development process are unfortunately in a distinct minority.

Nonetheless, I am convinced that we need to provide for some continuity in assessing and proposing new solutions to our agricultural problems, which will not end with enactment of the 1985 farm bill later this year. We will need to have constant feedback and input at the grassroots level, and we must remain flexible in responding to these constituencies. It is my great hope that the National Commission on Agricultural Policy will develop into a nonpartisan, balanced and impartial forum that commands the respect of both political parties and all sectors of the national economy. If this goal can be attained, U.S. agriculture will have an effective new way to make its concerns and needs known at the national level.

I ask unanimous consent that the text of this act and the accompanying section-by-section summary be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1497

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "National Agricultural Policy Commission Act of 1985".

DEFINITIONS

SEC. 2. As used in this Act:

(1) The term "Commission" means the National Commission on Agricultural Policy established under section 3.

(2) The term "Governor" means the chief executive officer of a State.

(3) The term "State" means the fifty States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, the Virgin Islands, American Samoa, or the Trust Territory of the Pacific Islands.

ESTABLISHMENT OF COMMISSION

SEC. 3. (a) There is established a National Commission on Agricultural Policy to study the structure, procedures, and methods of formulating and administering agricultural policies, programs, and practices of the United States.

(b) In addition to the members referred to in subsection (c), the Commission shall be composed of fifteen members appointed by the President and selected as follows:

(1) The President shall request Governors of States to nominate members representing individuals and industries directly affected by agricultural policies, including—

(A) producers of major agricultural commodities in the United States;

(B) processors or refiners of United States agricultural commodities;

(C) exporters, transporters, or shippers of United States agricultural commodities;

(D) suppliers of production equipment or materials to United States farmers;

(E) providers of financing or credit for agricultural purposes; and

(F) consumers of United States agricultural commodities.

(2) The Governor of a State may submit to the President a list of not less than two, nor more than four, nominees to serve on the Commission who represent individuals and industries referred to in paragraph (1).

(3)(A) Except as provided in subparagraphs (B) and (C), the President shall appoint fifteen individuals from a total of, to the extent practicable, not less than sixty individuals nominated by States under paragraph (2)(C) to serve on the Commission.

(B) The President may appoint to the Commission not more than—

(i) one individual nominated by a particular State; and

(ii) seven individuals of the same political party.

(C) If the President determines that the individuals nominated by States under paragraph (2)(C) are not broadly representative of the individuals and industries referred to in paragraph (1), the President may substitute no more than three other individuals to serve on the Commission who represent such individuals and industries.

(c)(1) The chairman and ranking minority members of the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate shall—

(A) serve as ex officio members of the Commission; and

(B) have the same voting rights as the members of the Commission appointed under subsection (b).

(2) The chairman and ranking minority members may designate other members of the respective committees to serve in their stead as members of the Commission.

(d) A vacancy in the Commission shall be filled in the manner in which the original appointment was made.

(e) The Commission shall elect a Chairman from among the members of the Commission appointed under subsection (b).

(f) The Commission shall meet at the call of the Chairman or a majority of the Commission.

CONDUCT OF STUDY

SEC. 4. The Commission shall study the structure, procedures, and methods of formulating and administering agricultural policies, programs, and practices of the United States, including—

(1) The effectiveness of existing agricultural programs in improving farm income;

(2) the manner in which such programs may be improved to retain a family-farm system of agricultural production;

(3) the effect of legislative and administrative changes in agricultural policy on planning and long-term profitability of farmers;

(4) the effect on farmers of the existing system and structure of formulating and implementing agricultural policy;

(5) the effect on national and international economic trends on United States agricultural production;

(6) the means of adjusting the agricultural policies, programs, and practices of the United States to meet changing economic conditions;

(7) potential areas of conflict and compatibility between the structure of making agricultural policy and long term stability in policy and practices;

(8) changing demographic trends and the manner in which such trends affect agriculture and agricultural policy consistency; and

(9) the role of State and local governments in future agricultural policy.

REPORTS

SEC. 5. Not later than twelve months after the date of enactment of this Act, and each twelve months thereafter during the existence of the Commission, the Commission shall submit an annual report to the President and Congress containing the findings and recommendations of the Commission with respect to the matters referred to in section 4. The Commission shall not comment on legislation pending before Congress unless specifically requested to do so by the Chairman of an appropriate Committee.

ADMINISTRATION

SEC. 6. (a) The heads of executive agencies, the General Accounting Office, the International Trade Commission, and the Congressional Budget Office shall, to the extent permitted by law, provide the Commission with such information as the Commission may require in carrying out the duties and functions of the Commission.

(b)(1) Except as provided in paragraph (2), members of the Commission or the selection committees appointed under section 3(b) shall serve without any additional compensation for work performed on the Commission or such committees.

(2) Such members who are private citizens of the United States may be allowed travel expenses, including a per diem in lieu of a subsistence expense, as authorized by law for persons serving intermittently in the government service under sections 5701 through 5707 of title 5, United States Code.

(c) Subject to the availability of funds appropriated in advance and such rules as may be adopted by the Commission and without regard to the provisions of title 5, United States Code, governing appointments in the competitive service or the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates, the Chairman of the Commission may appoint and fix the compensation of a director and such additional staff personnel as the Commission determines are necessary to carry out duties and functions of the Commission.

(d)(1) Upon the request of the Commission, the Secretary of Agriculture shall furnish the Commission with such personnel and support services as are necessary to assist the Commission in carrying out duties and functions of the Commission.

(2) Upon the request of the Commission, the heads of other executive agencies and the General Accounting Office may furnish the Commission with such personnel and support services as the heads of the agency or office and the Chairman of the Commission agree are necessary to assist the Commission in carrying out duties and functions of the Commission.

(3) The Commission shall not be required to pay or reimburse an agency or office for personnel and support services provided under this section.

(e)(1) In accordance with section 12 of the Federal Advisory Committee Act (5 U.S.C. App. 2), the Secretary of Agriculture shall maintain records of—

(A) the disposition of any funds that may be at the disposal of the Commission; and

(B) the nature and extent of activities of the Commission.

(2) The Comptroller General of the United States shall have access to such records for the purpose of audit and examination.

(f) The Commission shall be exempt from sections 7(d), 10(e), 10(f), and 14 of the Federal Advisory Committee Act and sections 4301 through 4308 of title 5, United States Code.

AUTHORIZATION OF APPROPRIATIONS

SEC. 7. (a) There are authorized to be appropriated such sums as are necessary to carry out this Act.

(b) To the maximum extent practicable, expenses of the Commission shall be carried out using funds available to the Secretary of Agriculture.

TERMINATION

SEC. 8. This Act and the Commission shall terminate on the date which is four years after the date of enactment of this Act.

NATIONAL COMMISSION ON AGRICULTURAL POLICY

SEC. 2 Definitions.

SEC. 3 Establishes a National Commission on Agricultural Policy composed of 19 members, including 15 members nominated by State Governors and appointed by the President, and the chairmen and ranking minority members of the agriculture committees of the Senate and House of Representatives, or their designates.

Commission members appointed by the President shall represent individuals and industries directly affected by agricultural policies, including producers, processors, merchandisers, input suppliers, lending institutions, and consumers. If the state nominees do not fully represent these sectors, the President may substitute up to three members to provide for balanced representation.

No more than one individual nominated by a particular state may serve on the commission. No more than seven members of the commission may be from the same political party.

The Congressional members of the commission shall be ex officio, and shall have the same voting rights as other members. The commission shall elect its own chairman.

SEC. 4 Describes the conduct of study of the commission, including the structure, procedures, and methods of formulating and administering agricultural policies, programs, and practices for the United States.

SEC. 5 Requires the commission to report its findings and recommendations to the President and the Congress no later than 12 months after the date of enactment, and each 12 months thereafter during its existence.

SEC. 6 Provides for executive agencies, the General Accounting Office, the International Trade Commission, and the Congressional Budget Office to make available such information as the commission may require.

Commission members shall serve without compensation, with travel expenses defrayed. Provides for the appointment of a director and other staff, as determined necessary by the chairman of the commission.

The Secretary of Agriculture is required to make personnel and support services available to the commission upon request, and without reimbursement.

Authorizes the heads of other executive agencies and the General Accounting Office to make personnel and support services available to the commission upon request, and without reimbursement.

SEC. 7 Authorizes appropriation of such sums as are necessary to carry out this act.

SEC. 8 Provides for the termination of the commission four years after the date of enactment.

By Mr. WEICKER (for himself, Mr. D'AMATO, Mr. DURENBERGER, Mr. STEVENS, Mr. COCHRAN, Mr. KERRY, Mr. SPECTER, and Mr. PELL):

S. 1498. A bill to amend the Internal Revenue Code of 1954 to provide tax incentives for the issuance of small business participating debentures; to the Committee on Finance.

TAX INCENTIVES FOR ISSUANCE OF SMALL BUSINESS PARTICIPATING DEBENTURES

● Mr. WEICKER. Mr. President, today I am introducing legislation along with Senators D'AMATO, DURENBERGER, STEVENS, COCHRAN, KERRY, SPECTER, and PELL to amend the Internal Revenue Code to permit the creation of a small business participating debenture [SBPD], a new hybrid financing instrument designed to open up new sources of external capital for our Nation's small businesses.

It is well documented that small businesses historically have had an extremely difficult time raising affordable capital. Crucial growth financing to expand or purchase new equipment and facilities at a critical stage of the development of many small firms—particularly those struggling to make it in their early years—is simply not available to most small businesses.

This issue is one that has been addressed time and time again by small business groups. In 1980, the 1,600 delegates to the White House Conference on Small Business devoted a large part of that historical meeting to the discussion of small business capital formation needs. Since 1982, the congressionally mandated annual SEC Government-Business Forums on Capital Formation have brought together small business persons and professionals from every segment of the public and private sectors for multiday conferences to examine possible solutions to the capital formation problems facing small business. In each of these forums the creation of an SBPD—a concept I first introduced in 1979—was listed by the conferees as one of their top recommendations for stimulating small business capital formation.

Simply put, an SBPD is a cross between a stock and bond. It is designed specifically for the small business organized as a corporation which seeks to expand, but while, for any number of reasons, does not wish to go public. Small businesses, administering the SBPD themselves, would directly issue the instrument as a general obligation with a fixed maturity date. An SBPD would carry a fixed, nominal rate of interest, but also would offer the investor some specified share of, or participation in, the company's profits for the period the SBPD is in effect. However, the SBPD would not award any voting or conversion rights in the company.

The advantages to both the small business owner and the small business investor would be many. Small business owners retain total ownership and management control of their business, while at the same time receiving much-needed low-cost, external capital. And too, the owner would be entitled to deduct as a business expense both the basic interest payments and the share of earnings paid out. Interest paid to an SBPD investor would be taxable as ordinary income, but their participation share of the company's earnings would be taxed at the preferential long-term capital gains rate.

Mr. President, particularly in this time of acute sensitivity to budget deficits, revenue impact is clearly an overriding consideration for any legislation proposing to amend existing tax laws. While there is a disparity of views on the question of the potential revenue cost of the SBPD, it seems to me that any large negative revenue loss estimated would show a fundamental misunderstanding of the inherent nature of the SBPD. Under this proposal, the only changes to existing law which could have an adverse impact on Treasury revenue, (that is both the issuer deductibility of the profit participation share paid out and the investor capital gains treatment of this same profit participation share would become operative only if and when the borrowing business earns a profit. Thus, this legislation, by its inherent nature, would trigger a tax expenditure (or revenue impact) only when a business earns a profit, a profit on which tax would be paid. These same businesses are the ones most likely to spend, to expand, to improve facilities, and purchase new equipment, and to hire new tax-paying employees. Therefore, although I can appreciate the difficulty of assessing the impact in dollars and cents of the cost of any piece of legislation, it seems to me that the reflow of revenue back to the Government automatically generated by the SBPD makes it a money maker for the Government.

I would also like to point out that in drafting this legislation, great care has been taken to minimize any potential negative revenue impact. The size of the issuing company has been limited to a firm with up to $1 million of pai

in capital and the firm must be incorporated. Issuers must also be active and domestic businesses that do not rely on "passive" investments.

Mr. President, the Joint Committee on Taxation recently completed a revenue impact estimate of the SBPD legislation I introduced last Congress and determined a revenue loss of $3.7 billion over a period of 5 years. At the same time, the Joint Tax Committee performed a comparable estimate on legislation incorporating the reforms I have already noted are included in my current bill—except for the provision that the issuer must be incorporated—and determined that revenue loss would be reduced by $1.2 billion to $2.5 billion over a 5-year period. This was due primarily to the fact that the maximum size of the issuer was decreased from $10 million of equity capital to $1 million "paid in" capital.

Mr. President, dialog with Joint Tax Committee staff indicated that this revenue estimate could be reduced even further—another 35 percent to 40 percent—if the eligible borrowing small business entities were restricted only to entities organized as corporations. And, because of my strong desire to minimize to the maximum extent practicable any potential revenue loss, this incorporation limitation has been included in the legislation I am introducing today. Thus, the revenue impact over 5 years could be reduced another billion dollars to approximately $1.5 billion, or about a 60-percent saving over the revenue impact of the SBPD legislation I introduced last Congress. But again, I must emphasize that this calculation does not include the reflow of revenue back to the Government automatically generated by the use of the SBPD, which should make it a money maker, rather than a revenue loser.

In addition, it was never contemplated that the SBPD would be used economy-wide. Indeed, given its unique nature and limited appeal—it requires a business owner to "offer"—though to the borrowing small business the operative word here might be "give away"—to a complete stranger a right to participate in the borrowing business's profits—any small business resorting to such financing obviously would not have access to conventional fixed-rate financing through more usual lending channels. Immediately coming to mind are new, emerging businesses which have not yet had sufficient time to establish dependable, or even reliable, income streams to satisfy the typical bank's understandably conservative required debt service projections. Small businesses with a track record, which need long-term, growth financing not readily available from banks and other financial institutions under reasonable terms, would also benefit substantially from the use of the SBPD.

Mr. President, I hope my colleagues will give careful consideration to this legislation. If we are going to continue to shore up the economy, we must first make sure that its small business foundation is strong. That will never take place as long as this Nation's small firms are kept starving for affordable capital. The jobs we so desperately need, the innovations and economic growth that we must have if we are to maintain the current recovery and regain our former strength, are largely dependent on the health of our smaller businesses.

This legislation will help to ensure that our small businesses, at little or no cost to the Government, will have access to affordable private capital necessary to expand and create new jobs.

The SBPD, I believe, is a concept uniquely suited to these times when Federal economic development and loan programs are being cut back, and alternatives to traditional forms of financing must be found. I urge my colleagues to join me in supporting this important legislation.

Mr. President, I ask unanimous consent that the legislation I am introducing today be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1498

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. TREATMENT OF INCOME, GAINS, LOSSES, ETC. ON SMALL BUSINESS PARTICIPATING DEBENTURES.

(a) CAPITAL GAINS TREATMENT OF EARNINGS.—Part IV of subchapter P of chapter 1 of the Internal Revenue Code of 1954 (relating to special rules for determining capital gain and loss) is amended by adding at the end thereof the following new section:

"SEC. 1257. EARNINGS DISTRIBUTIONS UNDER SMALL BUSINESS PARTICIPATING DEBENTURES.

"(a) IN GENERAL.—For purposes of this subtitle, amounts actually paid during the taxable year to a taxpayer with respect to any small business participating debenture which constitute the distribution of a share of the earnings of the issuer shall be treated as long-term capital gain.

"(b) SPECIAL RULES FOR PAYMENT.—For purposes of this section and section 163(h)—

"(1) TIME FOR PAYMENTS.—Payments under subsection (a) shall be deemed to have been made on the last day of a taxable year if the payment is on account of such taxable year and is not made later than the time prescribed by law for the filing of the return for such taxable year (including extensions thereof).

"(2) ORDER OF PAYMENTS.—Any payment with respect to a small business participating debenture shall be treated—

"(A) first, as a payment of interest until all interest required to be paid under the debenture for the taxable year is paid, and

"(B) then, as a payment of earnings.

"(c) SMALL BUSINESS PARTICIPATING DEBENTURE DEFINED.—For purposes of this section—

"(1) IN GENERAL.—The term 'small business participating debenture' means a written debt instrument issued by a qualified small business which—

"(A) is a general obligation of the qualified small business,

"(B) bears interest at a rate not less than the rate prescribed by the Secretary under section 7872(f)(2)(A),

"(C) has a fixed maturity,

"(D) grants no voting or conversion rights in the qualified small business to the purchaser, and

"(E) provides for the payment of a share of the total earnings of the issuer.

"(2) QUALIFIED SMALL BUSINESS.—

"(A) IN GENERAL.—The term 'qualified small business' means, with respect to any small business participating debenture, any domestic trade or business which is incorporated—

"(i) the paid-in capital of which does not exceed $1,000,000 immediately before the small business participating debenture is issued,

"(ii) with respect to which, at the time the small business participating debenture is issued, the face value of all outstanding small business participating debentures issued (including such debenture) does not exceed $1,000,000,

"(iii) which has not securities outstanding which are subject to regulation by the Securities and Exchange Commission on the date of issuance of the small business participating debenture,

"(iv) during the 5-year period ending on such date, derived more than 50 percent of its aggregate gross receipts from sources other than royalties, rents, dividends, interest, annuities, sales and exchanges of stocks or securities, and transactions in real estate, and

"(v) which is not under foreign control on such date.

"(B) CONTROLLED GROUPS.—For purposes of determining under subparagraph (A) the paid-in capital and outstanding small business participating debentures of any member of a controlled group of corporations, the paid-in capital and outstanding debentures of all members of such group shall be taken into account.

"(C) PAID-IN CAPITAL.—For purposes of this paragraph, the term 'paid-in capital' means the aggregate amount of—

"(i) money, and

"(ii) the adjusted basis of the corporation in all other property, received by the corporation for stock, as a contribution to capital, or as paid-in surplus.

"(D) ADJUSTED BASIS OF PROPERTY.—For purposes of applying subparagraph (C), the adjusted basis of the corporation in any property shall be reduced by any liabilities—

"(i) to which the property was subject at the time the corporation received the property, or

"(ii) which were assumed by the corporation in connection with the receipt of the property.

"(E) SECURITIES SUBJECT TO REGULATION BY THE SECURITIES AND EXCHANGE COMMISSION.—For purposes of this paragraph, the term 'security subject to regulation by the Securities and Exchange Commission' means a security—

"(i) registered on a national securities exchange under section 12(b) of the Securities Exchange Act of 1934;

"(ii) registered or required to be registered under section 12(g) of such Act (or which would be required to be so registered except for the exemptions in subparagraphs (B) through (H) of such section); or

(iii) issued by a company subject to the reporting requirements of section 15(d) of such Act.

"(F) TRADE OR BUSINESS UNDER FOREIGN CONTROL.—A trade or business shall be treated as being under foreign control if more than 20 percent of—

"(i) the total combined voting power of all classes of stock of the corporation entitled to vote, or

"(ii) the total value of shares of all classes of stock of the corporation, is owned (or treated under section 318 as owned) by persons who are not United States persons.

"(3) EXCLUSION OF DEBENTURES ACQUIRED IN REORGANIZATIONS OR REDEMPTIONS.—The term 'small business participating debenture' shall not include any debt instrument acquired in a transaction described in section 302, 351, 361, or 371 to the extent that the basis of the debt instrument received by the taxpayer in such transaction is determined by reference to the basis of the taxpayer in the property exchanged for such debt instrument.

"(d) RELATED PARTIES.—

"(1) DEBENTURES ISSUED BY A RELATED PARTY.—Subsection (a) shall not apply to amounts paid in respect of a small business participating debenture issued by a small business in which the taxpayer has an interest.

"(2) INTERESTED TAXPAYER.—For purposes of this subsection, a taxpayer shall be considered as having an interest in the issuer of a small business participating debenture if the taxpayer is considered, under section 318, to own 10 percent or more of—

"(A) the total value of shares of all classes of voting stock, or

"(B) the total combined voting power of all classes of voting stock,

in such corporation or in a corporation which is a member of the same controlled group of corporations.

"(e) CONTROLLED GROUP OF CORPORATIONS.—For purposes of this section, the term 'controlled group of corporations' has the meaning given to such term by section 1563(a), except that 'more than 50 percent' shall be substituted for 'at least 80 percent' each place it appears in section 1563(a)(1).".

"(b) INTEREST DEDUCTIBLE AS INTEREST EXPENSE.—Section 163 of such Code (relating to interest) is amended by redesignating subsection (h) as (i) and by inserting after subsection (g) the following new subsection:

"(h) INTEREST AND OTHER AMOUNTS PAID ON SMALL BUSINESS PARTICIPATING DEBENTURE.—For purposes of this section (other than subsection (d)), amounts paid as a share of earnings on a small business participating debenture (as defined in section 1257(c)) shall be treated as interest.".

"(c) LOSSES ON SMALL BUSINESS PARTICIPATING DEBENTURES TREATED AS ORDINARY LOSS.—Section 1244 of such Code (relating to losses on small business stock) is amended by adding at the end of subsection (d) the following new paragraph:

"(5) SMALL BUSINESS PARTICIPATING DEBENTURES TREATED SAME AS SECTION 1244 STOCK.—For purposes of this section, any loss on a small business participating debenture (as defined in section 1257(c)) issued to an individual or partnership shall be treated as if it were a loss on section 1244 stock issued to that individual or partnership.".

(d) CONFORMING AMENDMENT.—The table of sections for such part is amended by adding at the end thereof the following new item:

"Sec. 1257. Earnings distributions under small business participating debentures.".

SEC. 2. EFFECTIVE DATE.

(a) IN GENERAL.—Except as provided in subsection (b), the amendments made by this Act shall apply to small business participating debentures acquired after the date of enactment of this Act in taxable years begining after December 31, 1984.

(b) PROCEEDS USED TO REPAY LOANS.—The amendments made by this Act shall not apply to any small business participating debenture issued during calendar year 1985 if the proceeds of such debenture are used to repay any loan of the issuing small business other than a loan—

(1) with a stated rate of interest in excess of the prevailing rate of interest for businesses in the area in which such small business is located, and

(2) secured by the inventory or accounts receivable of such small business.●

● Mr. D'AMATO. Mr. President, I rise today to support passage of the small business participating debenture [SBPD] legislation championed by my dear friend, the distinguished senior Senator from Connecticut. I do so because SBPD's can provide smaller businesses with an attractive financing instrument without burdening them with oppressive debt or requiring the businesses to give up management control or ownership. This would allow smaller firms to take their new ideas and have them reach fruition, acquiring the needed financing without losing control of the business.

An SBPD is a hybrid security which offers investors both nominal interest and a negotiated percentage of the annual profits of the borrowing small business. Chairman WEICKER has done a superlative job of crafting legislation which minimizes any potential negative revenue impact.

Chairman WEICKER has reintroduced this bill with several minor revisions to limit potential abuses. The size of the business permitted to issue an SBPD has been reduced from $10 million of equity capital to $1 million in paid-in capital, and issuers now must be incorporated. These revisions allow for a reduction in revenue loss to the Treasury of over 60 percent from the bill introduced in the last Congress.

I am pleased to have supported this bill in the past and I continue to support it. I urge its adoption.●

● Mr. KERRY. Mr. President, today I am joining with Senator WEICKER and others as a cosponsor of a proposal to create a new capital formation tool for small businesses; the small business participating debenture. I support this measure because I believe that encouraging the growth of small business, entrepreneurship, and risk-taking is essential to the economic and social well-being of the United States, and because I believe that this incentive will effectively advance these goals.

It is no exaggeration to say that this country, Mr. President, was built by small entrepreneurs, by people who began with ideas and motivation and little else, by people willing to take risks and make something of themselves. Today, small firms account for 40 percent of the Nation's GNP, for 48 percent of the Nation's nonfarm, nongovernment employment, and for about two-thirds of all new jobs created by the economy. I am cosponsoring this bill because it encourages such entrepreneurship and risk-taking and gives small business a chance to grow and compete in an economy that is sometimes unfairly stacked against them.

Now, as a general rule, I am not a believer in tampering with the free market when it's working properly; and I'm not a believer in subsidizing business just for the sake of subsidizing business. But I do believe there are times when markets fail to operate efficiently; when without some kind of incentives, valuable opportunities for economic growth will be lost. For example our Nation's Tax Code has since 1981 contained a tax credit for research and development. In an age when our international competitiveness is critically dependent upon our economy's technological leading edge, and at a time when government's around the world are subsidizing their own industry's research needs, the measurable increase in R&D spending as a result of the tax credit is sufficient justification for this kind of approach.

As with the R&D tax credit, there is an obvious need for tax incentives to promote small business and entrepreneurship. It is no secret that small businesses have difficulty raising capital in this country—much more difficulty than medium- or large-sized businesses which have been in operation for a long time. The main reason for this difference is that private investors, be they financial institutions or individual investors, cannot completely diversify their risk, and so without government incentives, often will not lend to small business or buy their stock even when doing so may be justified from the standpoint of the whole economy.

In other words, small business face an inherent disadvantage in private capital markets, which thwarts their growth, and which, I am sorry to say, seems to be growing worse.

This situation is undesirable for several reasons. First, a small business may be able to produce more efficiently and at lower cost than a larger competitor but cannot obtain the capital needed to begin operation. Second, the entrance of a small business into a particular market makes that market more competitive. Third—and this is less of an economic reason than it is value judgment—I think there's an element of individuality, creativity, and self-expression in a small business that you're just not going to find in a giant corporation. A small business is a

creation, a product of years of hard work and, often, years of sacrifice; but it is also a source of hope for the future for millions of individual Americans.

This piece of legislation, by offering tax incentives for investment in small business, represents a cost-effective way to raise capital and encourage this kind of entrepreneurship. The small business participating debenture [SBPD] is a security issued by a small business, which would offer investors both nominal interest and a negotiated percentage of the business' annual profits. An SBPD would offer two tax incentives: The profit share paid to investors would be treated preferentially under the Tax Code, as long-term capital gains, and the small business could deduct both interest and the profit share paid out to investors.

This particular approach to stimulating investment in small business has two main advantages. First, small business people who wish to retain control of their enterprises could raise capital without giving up management or ownership, yet without having to take on the risk of the high debt service associated with traditional debt instruments. The other advantage of the SBPD is that by using the Tax Code to provide an incentive for small business capital formation, the Government can assist small business through the capital markets, without setting up an elaborate bureaucracy and incurring administrative costs to the Government.

The concept of the small business participating debenture is not a new one—it was among the top five recommendations of the 1980 White House Conference on Small Business and was the top recommendation of two subsequent Securities and Exchange Commission government-business forums on small business capital formation.

In an age of $200 billion deficits, some people are going to object, regardless of the merits of the bill, that we can't afford it. In response, I wish to point out that the original bill has been modified to prevent possible abuse and to limit the size of qualifying businesses, so that the Joint Tax Committee's first-order estimate of revenue loss is now just $1.5 billion over 5 years, compared to the $3.7 billion estimate for the original bill. And I want to emphasize that $1.5 billion over 5 years is a first-order estimate, and, in fact, is likely to be an overestimate, because it takes no account of the fact that the proposal will stimulate the growth of small business and thereby enlarge the tax base.

The point is this: If we wish to encourage entrepreneurship in this country, if we wish to help small firms gain access to capital markets, if we wish to create an economic environment in which small businesses can compete on equal footing with larger firms, then SBPD's are a cost-effective way to go about it.●

By Mr. DECONCINI:

S. 1499. A bill to establish an anti-terrorist training academy, to increase security at international airports, and for other purposes; to the Committee on Governmental Affairs.

ANTI-TERRORIST TRAINING AND ENFORCEMENT ACT

Mr. DECONCINI. Mr. President, the act of terrorism against the 40 American hostages this summer has triggered understandable feelings of shock and anger and generated calls for both retaliation and long-term solutions. The President has reacted to this national outrage with a call for resurrection of the Sky Marshal Anti-Hijacking Program and other measures aimed at improving security at airports. All of these proposals are appropriate responses to the growing threat of hijacking and other international terrorist attacks on our interests and our people, both at home and abroad.

Mr. President, the bill that I am introducing today, however, offers a plan to bring to bear all of the law enforcement and security muscle the U.S. Government can muster to prevent terrorist attacks and investigate terrorist threats before rather than after they occur. The Federal Bureau of Investigation—FBI—cannot and should not have to go it alone in the battle against terrorists. There are a number of other Federal law enforcement agencies that have both existing statutory jurisdiction and the skills to investigate and interdict terrorist threats at our international airports and the southwest border where the threat of terrorist intrusions are most acute. The intent of my legislation is to tap all of these law enforcement resources, to enlist them into the war against terrorism, and to improve their capabilities to assist the FBI and the President to stop terrorism before it starts.

Mr. President, let me quickly add what my legislation is not intended to do. It is not intended to usurp the clear jurisdiction of the Federal Bureau of Investigation as our lead agency in anti-terrorist investigations. Nothing in this bill changes or diminishes the statutory authority of the Bureau to conduct their anti-terrorist business. To the contrary. The clear intent of this legislation is to supplement the role of the FBI and to bring all of our Federal enforcement resources into the battle against terrorism as quickly and effectively as possible. Here is what the "Anti-Terrorist Training and Enforcement Improvement Act of 1985" will do.

First, the bill establishes a national anti-terrorist training academy at the Federal Law Enforcement Training Center (FLETC) for all Federal law enforcement agencies except the FBI and the Drug Enforcement Administration (DEA) which will continue to be trained at the FBI academy at Quantico, VA. The new anti-terrorist training academy would become a permanent training element at the existing Federal Law Enforcement Training Center at Glynco, GA—a bureau of the Department of the Treasury. This important national training facility would have its mission expanded to perform basic and/or advanced counterterrorist training for all law enforcement agencies that are currently trained at FLETC plus State and local law enforcement agencies; foreign law enforcement officials involved in counterterrorist and security activities, from nations determined to be friendly to the U.S. and willing to tackle this important mission; security personnel of the major U.S. commercial air carriers; and private sector security officials on a space available basis.

This legislation would make counterterrorist training mandatory for all Federal law enforcement officers, with the exception of the FBI and the DEA which will continue their current levels of training at the FBI academy. An appropriation of $18,700,000 would be authorized for establishment of the new Anti-Terrorist Training Academy at the Federal law Enforcement Training Center, including approximately $13,000,000 for construction of new facilities on the center campuses.

Second, the bill directs the Secretary of Transportation, in cooperation with other Cabinet officers, to develop comprehensive, mandatory security and anti-terrorist safety standards for all international airports, including those overseas, and gives the Secretary of Transportation the authority to deny landing rights to commercial air carriers originating flights at international airports that do not comply with these new standards. The bill also authorizes the Secretary of Transportation to require the installation of x-ray equipment in international airports to examine baggage and cargo after it is checked-in in the terminals, but before it is finally placed in the baggage or cargo compartment of the aircraft. Current, x-ray equipment only examines carry-on bags. This provision would require one additional screening of baggage and cargo before the international flight is actually loaded.

Third, the bill authorizes an additional $3,000,000 for the Bureau of Alcohol, Tobacco, and Firearms (BATF) to accelerate development of a portable system of explosives detection devices to be available to airport security authorities by no later than fiscal year 1987. This additional funding will speed up bringing to market these explosive detection devices that are currently undergoing research and development.

Fourth, the bill authorizes an additional $3,000,000 to develop an international explosive incident data base at BATF—a computerized data base that this country currently does not have, but should have in order to track such incidents. This data base will be of significant use to both the BATF and the FBI.

Fifth, the bill authorizes additional appropriations of $71.1 million to beef up Federal enforcement staff at the international airports and along the southwest borders of the United States—the two areas where the terrorist threats are most likely to occur. Specifically, the bill provides:

That $21.1 million for 160 additional U.S. Customs inspectors and 16 canine enforcement teams to improve anti-terrorist interdiction at international airports; 100 additional inspectors to improve security at the southwest borders; and associated equipment;

$6.1 million for 150 additional trained and equipped Immigration and Naturalization inspectors at the ports of entry along the southwest border;

$29.0 million for 384 additional special agents; uniformed officers; and support positions and associated equipment for the U.S. Secret Service to improve the Service's anti-terrorist investigation capability within their existing statutory protective mission in the United States and overseas; and

$14.9 million for 216 additional Bureau of Alcohol, Tobacco, and Firearms agents and equipment to establish an enhanced capability within the Bureau to conduct anti-terrorist investigations under BATF's existing statutory authorities in the area of weapons and explosives.

Sixth, the bill authorizes reimbursement to State and local law enforcement agencies that are engaged in cooperative anti-terrorist activities with the Department of Justice; the Department of Transportation; the Department of the Treasury; or the Department of State.

Finally, the bill establishes an Anti-Terrorist Law Enforcement Coordinating Council within the Executive Office of the President and under the chairmanship of the Attorney General. The Council will serve to review and coordinate all Federal anti-terrorist enforcement activities and promote cooperation and coordination of the same. The Secretary of the Treasury; the Secretary of State; the Secretary of Transportation; the Director of the FBI; the Director of the U.S. Secret Service; and the Director of the Federal Law Enforcement Training Center and its newly formed National Anti-Terrorist Training Academy, or their designees shall be members of this important coordinating council.

Mr. President, this bill does not change any Federal law enforcement agency's statutory jurisdiction. It does not pit one agency against another in the fight against terrorism. What it does do is establish a mandatory training program for all Federal law officers to better prepare them to prevent, interdict, or investigate any terrorist incident or threat within their existing jurisdictions. The bill also provides much-needed law enforcement staffing improvements at the most vulnerable ports of entry in the United States—the international airports and the southwest border. The Customs Service; the Immigration and Naturalization Service [INS]; the Bureau of Alcohol, Tobacco, and Firearms, and the Secret Service have had their budgets either cut back sharply or virtually frozen for the past 4 years. Only the Border Patrol within INS has enjoyed an increase among these important Federal law enforcement agencies. This bill will allow these agencies to gear up for a major, permanent, preventive, anti-terrorist campaign in the airports and at the land borders.

Mr. President, this bill, coupled with the other anti-terrorist measures being brought forward by the President and the Congress, will go hand in glove in our effort to counter the terrorist threat in this country and overseas.

It is true that this bill does call for increased spending for law enforcement. At a time of budget deficits hovering at $200 billion, I am cognizant of the need to save every tax dollar and spend the taxpayers money only on those activities that are essential to the Nation's well-being. I strongly believe that establishing a strong, national anti-terrorist security program in the United States is as important as our traditional national defense programs. Furthermore, of the $95.8 million in new funding authorized in this bill, nearly $39 million or 41 percent of it is for nonrecurring equipment or research and development costs that will not have to be annualized year after year. I hope that the Senate will move quickly to pass this bill and others that will set the framework for an effective, tough gameplan to halt the terrorist threat from reaching our shores.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1499

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I—ESTABLISHMENT OF AN ANTITERRORIST TRAINING ACADEMY AT THE FEDERAL LAW ENFORCEMENT TRAINING CENTER OF THE DEPARTMENT OF THE TREASURY

ESTABLISHMENT OF ACADEMY

SEC. 101. (a) There is established within the Department of the Treasury at the Federal Training Center at Glynco, Georgia and its satellite facility at Marana, Arizona, the National Antiterrorist Training Academy (hereafter in this title referred to as the "Academy").

TRAINING OF FEDERAL LAW ENFORCEMENT OFFICERS

SEC. 102. (a) The purpose of the Academy shall be to perform basic and specialized antiterrorist training for Federal law enforcement officers, both existing personnel and new employees, subject to the provisions of this title.

(b) All Federal law enforcement officers subject to the provisions of this title shall receive mandatory antiterrorist training.

(c) An exception to the mandatory antiterrorist training provisions of this section shall only be granted if the appropriate officer or agency head determines and the President concurs that such training is inconsistent with the statutory responsibilities of the department, agency, or office and is not in the best interests of the United States.

(d) The training requirements of this section shall not apply to personnel and new employees of the Federal Bureau of Investigation and the Drug Enforcement Administration. Such personnel and employees shall continue to receive their current levels of training at the Federal Bureau of Investigation Academy, Quantico, Virginia.

TRAINING FOR OTHER LAW ENFORCEMENT OFFICERS

SEC. 103. (a) In addition to the mandatory antiterrorist requirements provided in section 102, the Academy shall also provide basic and specialized antiterrorist training, on a reimbursable basis, for—

(1) State and local government law enforcement officials as requested;

(2) law enforcement officials of a foreign country involved in international counterterrorist and security activities, as requested, if the Attorney General, the Secretary of State, and the Secretary of Defense determine that the foreign country has shown a demonstrated willingness to cooperate fully with the United States in combating terrorist activities outside the boundaries of the United States;

(3) security personnel of the major United States commercial air carriers;

(4) United States airport authority security officials; and

(5) private sector security officials.

(b) The antiterrorist training provided for in this section shall be mandatory for all personnel described in paragraphs (3) and (4).

AUTHORIZATION OF APPROPRIATIONS

SEC. 104. There are authorized to be appropriated for fiscal year 1986, $18,700,000, to establish the Academy at the Federal Law Enforcement Training Center and for all other necessary expenses of the Federal Law Enforcement Training Center required to fully implement the establishment of such Academy, including construction of facilities at Glynco, Georgia and Marana, Arizona. Sums appropriated under this section for construction at the Federal Law Enforcement Training Center and its satellite facilities shall be available until expended.

REPORT OF THE SECRETARY

SEC. 105. No later than 90 days after the date of enactment of this title, the Secretary of the Treasury shall report to the Committees on Appropriations of the House of Representatives and the Senate describing the plans of such Secretary for implementing the provisions of title I.

TITLE II—INTERNATIONAL AIRPORT SAFETY ACT OF 1985

SHORT TITLE

SEC. 201. This title may be cited as the "International Airport Safety Act of 1985".

ANALYSIS OF SECURITY STANDARDS

SEC. 202. Within 90 days after the date of enactment of this title, the Secretary of State and the Secretary of Transportation, in consultation with the Attorney General and the Secretary of the Treasury, shall publish in the Federal Register and distribute through appropriate international channels, a comprehensive analysis and outline of mandatory security, antiterrorist, and related safety standards for international airports.

(b) The purpose of these standards shall be to reduce the risk of terrorist attacks at international airports. The standards shall confirm in substance to Federal Aviation Administration requirements for preventive safety and security measures at domestic airports in the United States.

INSTALLATION OF NEW X-RAY EQUIPMENT

SEC. 203. (a) Notwithstanding any other provision of law, the Secretary of Transportation, in consultation with the head of the Federal Aviation Administration, the Attorney General, and the Secretary of the Treasury, shall require that appropriate new x-ray equipment be installed in all international airports located in the United States to examine all passenger baggage and cargo after it has been checked in at the appropriate passenger and cargo terminals but prior to its actual placement in the baggage or cargo compartments on any commerical aircraft prior to the departure of such aircraft on an international flight.

(b) Notwithstanding any other provision of law, the Secretary of Transportation shall require the commercial air carriers conducting international flights from international airports in the United States, airport authorities, and other private, municipal, and governing bodies or entities responsible for providing security at such international airports, to adequately staff such new x-ray equipment installations at all international airports in the United States.

(c) Within 90 days after the enactment of this title, the Secretary of Transportation shall publish regulations in the Federal Register governing applicability and implementation of the provisions contained in this section.

DENIAL OF LANDING RIGHTS

SEC. 204. Notwithstanding any other provision of law, the Secretary of Transportation is authorized to deny landing rights in the United States to any commercial air carrier originating flights at international airports if such carrier does not comply with the regulations issued under sections 201 and 202 within 180 days after the publication of such regulations in the Federal Register.

TITLE III—AUTHORIZATION OF ADDITIONAL APPROPRIATIONS

PART A—BUREAU OF ALCOHOL, TOBACCO, AND FIREARMS, DEPARTMENT OF THE TREASURY

AUTHORIZATION FOR DEVELOPMENT OF EXPLOSIVES IDENTIFICATION AND DETECTION DEVICES

SEC. 311. (a) There are authorized to be appropriated to the Bureau of Alcohol, Tobacco, and Firearms for the fiscal year ending September 30, 1986, an additional $3,000,000 for the development and implementation of a portable system of explosives identification and detection devices. Funds appropriated under this section shall be available until expended.

(b) The Director of the Bureau of Alcohol, Tobacco, and Firearms shall take whatever steps are practicable to accelerate the development and production of such devices in order to have explosive identification and detection devices available to the appropriate Federal, State, and local law enforcement agencies, offices, and airport authorities by no later than the fiscal year ending on September 30, 1987.

AUTHORIZATION FOR EXPLOSIVES INCIDENT DATA BASE

SEC. 312. There are authorized to be appropriated to the Bureau of Alcohol, Tobacco, and Firearms for the fiscal year ending September 30, 1986, an additional $3,000,000 for the development and maintenance of an international explosives incident data base.

AUTHORIZATION FOR ADDITIONAL EMPLOYEES

SEC. 313. There are authorized to be appropriated to the Bureau of Alcohol, Tobacco, and Firearms for the fiscal year ending September 30, 1986, $14,879,000 to provide for the salaries and expenses for 216 additional full-time, permanent agent positions and related and necessary equipment to establish an enhanced capability within the Bureau to conduct antiterrorist investigations under the existing statutory authorities of the Bureau of Alcohol, Tobacco, and Firearms.

REPORT ON USE OF FUNDS APPROPRIATED UNDER THIS TITLE

SEC. 314. The Director of the Bureau of Alcohol, Tobacco, and Firearms shall report to the appropriate legislative committees of the House of Representatives and the Senate of the United States and the Committees on Appropriations of the House and the Senate on a quarterly basis regarding progress made in accelerating the development of the devices as provided in section 311 and the international explosive incident data base as provided in section 312. The Director shall also report on a periodic basis to the Committees on Appropriations of the House and Senate regarding the Bureau's hiring, training, and deployment of the additional 216 agents authorized in section 313.

PART B—UNITED STATES CUSTOMS SERVICE, DEPARTMENT OF THE TREASURY

AUTHORIZATION FOR ADDITIONAL DRUG ENFORCEMENT AND COUNTERTERRORIST ACTIVITIES

SEC. 321. (a) There are authorized to be appropriated to the United States Customs Service for the fiscal year ending September 30, 1986, $21,100,000 for additional salaries and expenses to carry out increased security, drug enforcement, and counterterrorist activities at international airports within the United States and at the ports of entry and between the ports of entry along the southwest border of the United States.

(b) The authorization of additional appropriations under this section includes the authorization of funding of—

(1) $6,800,000 for 160 additional full-time, permanent inspectors and 16 canine enforcement teams to establish additional Contraband and Enforcement Teams (C.E.T.) and other enforcement teams at the international airports in the United States;

(2) $6,100,000 for additional equipment to support the personnel and canine enforcement teams in paragraph (1);

(3) $4,200,000 for 100 additional full-time permanent inspectors to establish enhanced counterterrorist and other security capabilities at the ports of entry and between the ports of entry along the southwest border of the United States; and

(4) $4,000,000 for additional equipment to support the personnel and the activities in paragraph (3).

PART C—IMMIGRATION AND NATURALIZATION SERVICE, DEPARTMENT OF JUSTICE

AUTHORIZATION FOR INCREASED ANTITERRORIST SECURITY ALONG THE SOUTHWEST BORDER OF THE UNITED STATES

Sec. 331. There are authorized to be appropriated to the Immigration and Naturalization Service, Department of Justice, for the fiscal year ending September 30, 1986, $6,100,000 for salaries and expenses for an additional 150 full-time, permanent inspector positions to be located at the ports of entry along the southwest border of the United States. Such funding shall be used to recruit, train, hire, and equip additional inspectors to improve antiterrorist security at the ports of entry along the southwest border of the United States.

PART D—UNITED STATES SECRET SERVICE, DEPARTMENT OF THE TREASURY

AUTHORIZATION FOR ANTITERRORIST ACTIVITIES OF THE SECRET SERVICE

Sec. 341. (a) There are authorized to be appropriated to the United States Secret Service, Department of the Treasury, for the fiscal year ending September 30, 1986, $29,000,000 for salaries and expenses for additional personnel and equipment to conduct counterterrorism activities under the existing statutory authorities of the United States Secret Service.

(b) The authorization of additional appropriations under this section includes the authorization of funding of—

(1) $19,894,000 for an additional 384 full-time, permanent positions, including 129 Special Agents, 137 Uniformed Officers, and 118 Support Positions;

(2) $4,253,000 for an increase in the United States Secret Service law enforcement vehicle fleet; and

(3) $4,853,000 for additional ADP equipment, security systems, research and development, and technical security supplies and equipment.

ADVANCE PAYMENT AUTHORITY

Sec. 342. Notwithstanding any other provision of law, the Attorney General, the Secretary of Transportation, the Secretary of the Treasury, or the Secretary of State may make advance payments for expenses arising out of contractual and reimbursable agreements with State and local law enforcement agencies while engaged in cooperative antiterrorist activities.

TITLE IV—ESTABLISHMENT OF ANTITERRORIST LAW ENFORCEMENT COORDINATING COUNCIL

ESTABLISHMENT OF COUNCIL

SEC. 401. There is established within the Executive Office of the President an "Antiterrorist Law Enforcement Coordinating Council" (hereafter in this title referred to as the 'Council").

PURPOSE

SEC. 402. The purpose of the Council shall be to regularly review all Federal antiterrorist law enforcement activities and facilitate the coordination of such antiterrorist law enforcement activities, including such new activities mandated by this Act, among the various Federal, State, and local departments, agencies, offices, and authorities.

MEMBERSHIP

SEC. 403. The Council shall be chaired by the Attorney General of the United States and membership on the Council shall include—

(1) the Secretary of the Treasury or his designee;

(2) the Secretary of State or his designee;

(3) the Secretary of Transportation or his designee;

(4) the Director of the Federal Bureau of Investigation or his designee;

(5) the Director of the United States Secret Service; and

(6) the Director of the Federal Law Enforcement Training Center.

MEETINGS AND REPORTS

SEC. 404. The Council shall meet on a quarterly basis to review the antiterrorist law enforcement activities of the Government and shall make periodic written reports on such activities to—

(1) the President;

(2) the House and the Senate Select Committees on Intelligence;

(3) the House and the Senate Committees on Appropriations; and

(4) other appropriate legislative committees of the House and the Senate.

By Mr. QUAYLE:

S. 1501. A bill to amend part B of title IV of the Higher Education Act of 1965, relating to the guaranteed student loan program, to permit the deferment of payment of principal for 1 year for students who are on maternity leave if the students are enrolled in institutions of higher education; to the Committee on Labor and Human Resources.

STUDENT AID ASSISTANCE AMENDMENTS

● Mr. QUAYLE. Mr. President, I am introducing a bill to amend the Guaranteed Student Loan [GSL] Program to provide for the deferment of payment on a loan for students who are on maternity leave.

Under the GSL Program, students and former students can apply for a deferment of payment on their loans under certain conditions. If a student qualifies for a deferment, he or she does not have to pay the interest on the loan, rather the Government will resume payment of the interest and principal to help the student through a particular period. The Government ultimately prevents defaults in the program by providing deferments to students that are serious about repayment who are faced with a difficult economic situation for a limited amount of time.

The current deferments in law include the period the student is in school; up to 3 years for military service or service in the Public Health Service Corps; up to 3 years for service as a Peace Corps or VISTA volunteer; up to 2 years for a professional internship; up to 12 months for a period of unemployment; and up to 3 years for a temporary, total disability.

The last deferment, for a temporary, total disability, can and does include periods of illness. However, the law does not provide a deferment for pregnancy, and women who have sought a deferment for pregnancy have been rejected by the Department of Education.

Women who become pregnant should receive treatment equal to that received by individuals who are accorded a deferment for a period of illness or disability. I believe we send the wrong signal by saying that pregnancy is not an appropriate or legitimate reason for a break in education.

The bill I am introducing today could add a new category for deferments in the GSL Program for maternity leave. The deferment would be for no longer than 12 months and only women who are enrolled at institutions of higher education would be eligible. This deferment, therefore, would not apply to a student already out of school and in repayment who then became pregnant.

The reauthorization of the Higher Education Act will be before the Senate this Congress, and I believe that we need to look at changes such as the one I am proposing to ensure that women are not discouraged from pursuing a higher education and that maternity leave is accorded equitable treatment with other deferment categories.

Mr. President, I look forward to the support of my colleagues on this issue and ask that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1501

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Student Aid Assistance Amendments of 1985".

SEC. 2. (a) Section 427(a)(2)(C) of the Higher Education Act of 1965 (hereinafter referred to in this Act as the "Act") is amended by striking out "or (viii)" and inserting in lieu thereof the following: "(viii) not in excess of 12 months during which the borrower is on maternity leave if the borrower is an enrolled student at an eligible institution; or (ix)".

(b) Section 428(b)(1)(M) of the Act is amended by striking out "or (viii)" and inserting in lieu thereof "(viii) not in excess of 12 months during which the borrower is on maternity leave if the borrower is an enrolled student at an eligible institution; or (ix)".

SEC. 3. The amendments made by section 2 of this Act shall take effect with respect to loans made after the date of enactment of this Act.●

By Mr. CHAFEE (by request):

S. 1502. A bill to amend and extend title I of the Marine Protection, Research, and Sanctuaries Act, as amended, for 2 years; to the Committee on Environment and Public Works.

MARINE PROTECTION, RESEARCH, AND SANCTUARIES ACT AUTHORIZATION

● Mr. CHAFEE. Mr. President, today I am introducing legislation at the request of the Administration to reauthorize title I of the Marine Protection, Research, and Sanctuaries Act for 2 years.

This legislation reauthorizes the existing program at an increased authorization level of $8,863,800 for fiscal year 1986 and such sums as may be necessary for fiscal year 1987.

The Subcommittee on Environmental Pollution will be holding hearings on title I of the MPRSA on July 30, 1985 at 2 p.m. The hearings will focus on this bill as well as S. 824 which was introduced by Senator LAUTENBERG.

Mr. President, I ask unanimous consent the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1502

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 111 of the Marine Protection, Research, and Sanctuaries, Act, as amended (33 U.S.C. 1420), is amended by striking "and" immediately following "1981," and inserting "and not to exceed $8,863,800 for fiscal year 1986, and such sums as may be necessary for fiscal year 1987," immediately following "1982".●

By Mr. LAXALT (for himself, Mr. HECHT, Mr. CRANSTON, and Mr. WILSON):

S. 1503. A bill to clear title to certain lands along the California-Nevada boundary; to the Committee on Energy and Natural Resources.

CALIFORNIA-NEVADA BOUNDARY LANDS

● Mr. LAXALT. Mr. President, I introduce, with my distinguished colleagues from Nevada and California, a bill to quiet title to certain lands which were involved in the California-Nevada border dispute litigation resolved by the Supreme Court in 1980.

The purpose of this bill is to remove any cloud on title to these particular lands and to avoid further costly litigation as the means of resolving title. This legislation will impact only those lands which have been transferred to third parties over the years from lands originally granted to the States. Portions of the land involved in the border litigation decision are now in a different State from their original location, and title to that land is now under a cloud. Some 12,000 acres are threatened to be involved in this title-clouded situation.

The State attorney generals of California and Nevada support passage of this measure, as do the State lands commissions and land title associations.

I want to make clear that only land formerly in Federal ownership, transferred to the States and then to third parties, is covered by the provisions of this bill. Any remaining disputes about State land selections in either State are not addressed.

Mr. President, it is important that land title impacted by litigation between the States be cleared to avoid ongoing hardship to landowners not party to the suit and to also avoid hardships to the two States. This bill will do that without any impact on the Federal Government. I hope the bill can be considered expeditiously and favorably.●

● Mr. HECHT. Mr. President, today I am pleased to join my colleague Senator LAXALT in introducing a bill to correct possible land title problems for private landowners in Nevada and California.

In 1980 and 1982, the U.S. Supreme Court fixed a permanent boundary line between California and Nevada. In doing so, the Court inadvertently placed a cloud on the title to some 12,000 acres of privately owned land. The cloud resulted from the fact that some lands that the U.S. Government had once conveyed to the States of Nevada and California, and which the States later conveyed to private parties, were determined by the Court to be situated in the other State. This fact technically invalidates the title to these privately owned lands. Our bill validates these land titles for the private landowners.

The bill is simple and does not involve public lands. It protects and secures the private property rights of individual private land owners, who, through no fault of their own, might otherwise have future difficulty exercising their normal property rights.

This measure has been developed in cooperation with the State and Federal land management agencies, and the attorneys general of Nevada and California.

I urge my colleagues to join with me in supporting this bill and thereby solving this technical land title problem.●

By Mr. ROCKEFELLER (for himself, Mr. BYRD, Mr. MCCONNELL, Mr. DIXON, Mr. HEINZ, Mr. DECONCINI, Mr. FORD, Mr. METZENBAUM, Mr. BURDICK, Mr. BUMPERS, Mr. GRASSLEY, Mr. RIEGLE, Mr. HARKIN, Mr. TRIBLE, Mr. BINGAMAN, Mr. PRYOR, Mr. HART, Mr. GORE, Mr. BRADLEY, Mr. INOUYE, Mr. SASSER, Mr. SIMON, Mr. HOLLINGS, Mr. MELCHER, and Mr. SPECTER):

S. 1504. A bill to assure that administrative law judges making determinations under the Black Lung Benefits Act receive compensation at a rate not less than that prescribed for GS-16 under section 5332 of title 5, United States Code; to the Committee on Finance.

BLACK LUNG BENEFITS AMENDMENTS ACT

Mr. ROCKEFELLER. Mr. President, along with my distinguished colleagues, Senate Minority Leader ROBERT C. BYRD and Senators MCCONNELL, DIXON, HEINZ, DECONCINI, FORD, METZENBAUM, BURDICK, BUMPERS, GRASSLEY, RIEGLE, HARKIN, TRIBLE, BINGAMAN, PRYOR, HART, GORE, BRADLEY, INOUYE, SASSER, SIMON, HOLLINGS, MELCHER, and SPECTER, today I am introducing a bill to eliminate a thoroughly unnecessary but significant barrier to the effort to speed up the processing of black lung claims. This bill would enable the Department of Labor to assign as many of its administrative law judges as are needed and available to decide upon appeals pending at this level of the system. The result would be that the agency would be applying its maximum resources to resolving the intolerable problem of a backlog now totalling over 21,000 cases.

I was incredulous when I first learned about what currently prevents the Department of Labor from using all of its ALJ's to settle black lung cases. For years, the Office of Personnel Management has continued to insist on an age-old policy that says only administrative law judges in the GS-15 pay grade category are supposed to hear and decide upon black lung cases. This means that out of the 90 administrative law judges now working in the Department of Labor, only 28 of them—the number of GS-15 ALJ's—can settle black lung claims.

The reason this is so astonishing is that the rest of the administrative law judges—the other 62 who are GS-16's—have far fewer cases to deal with. The ALJ office has a backlog of 30,000 cases. Of those 30,000, 21,000 are black lung cases and 9,000 are cases dealing with other programs under DOL's jurisdiction. Who would believe that DOL can use only its 28 judges to decide upon 21,000 cases and its 26 judges to decide upon 9,000 cases?

I have thoroughly checked the history behind this inefficient distribution of DOL's caseload. I am including in my statement for the CONGRESSIONAL RECORD several documents that state, in no uncertain terms, administrative law judges assigned to hear black lung cases should be GA-16's. I refer my colleagues, in particular, to the analysis of Mr. Alan McKean, a former chief examiner for OPM, that concludes the work involved in determining black lung appeals is at a level of difficulty and complexity "at least equal to that of other administrative law judge positions which the OPM has classified at GS-16."

At various times in the past 4 years, the DOL has asked OPM for the change in the latter's policy which is called for in my bill being introduced today. Two different letters from the agency's Assistant Secretary for Administration and Management are included with my statement—both ask OPM to classify DOL's administrative law judges into one grade, that is, GS-16's.

Thus, my bill is an effort to make the change legislatively that historically has been sought out by the Department of Labor through administrative channels. Now that we have a new Secretary of Labor, William Brock, I am hopeful that he will be successful in achieving the change. The bill being introduced today is meant to send a signal from Congress to OPM, in particular, that we want this change to be enacted expeditiously.

I urge all of my colleagues to join me by cosponsoring this bill. Miners afflicted with the crippling black lung disease should not have to wait the 3 to 5 years it now takes for the administrative law judges to decide whether they will be provided some relief. Everyone, in fact, involved in the black lungs appeal process—the miners, their families, the lawyers, coal companies, and the administrative law judges—are frustrated with the backlog and want it addressed. This problem reminds me of the phrase "justice delayed is justice denied."

My bill calls for a change that should have been made long ago. The Department of Labor should have the ability to use all of its existing resources to break the black lung logjam and settle claims efficiently and cost-effectively. By placing all of the agency's administrative law judges into the GS-16 pay grade category which corresponds to the complicated nature or black lung cases, we will surely find that justice will be restored and rendered more quickly and fairly.

I ask unanimous consent that the bill and before-mentioned documents be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1504

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Black Lung Benefits Amendments Act of 1985".

SEC. 2. The seventh sentence of section 428(b) of the Black Lung Benefits Act (30 U.S.C. 938(b)) is amended by inserting after "section" a comma and the following: "under the other provisions of this title,".

SEC. 3. The amendment made by section 2 shall apply to determinations for benefits pending before the Department of Labor on the date of enactment of this Act as well as to claims brought after the date of enactment of this Act.

U.S. DEPARTMENT OF LABOR,
OFFICE OF ADMINISTRATIVE LAW JUDGES,
Washington, DC, March 18, 1982.

Memorandum to: Alfred M. Zuck, Assistant Secretary for Administration and Management.

From: Nahum Litt, Chief Judge.

Subject: Single grade for judges.

As part of an independent law suit brought by one of our judges, the Office of Personnel Management (OPM) has supplied, for the first time, copies of all actions which it has taken in classifying and grading Administrative Law Judge's in government [1]. These records which are reported to be complete go back 35 years.

Attached is a copy of a decision of the Civil Service Commission dated February 19, 1963 stating that it was the policy of the Civil Service Commission to have only one grade at any agency. I would call to your attention the fourth paragraph on page 5, which states: [2]

We have not been able to find any sound and defensible basis for distinguishing among the various regulatory agencies which have hearing examiners in grade GS-15 so as to recommend that the hearing examiners in some of these but not others be upgraded. Neither have we been able to find any sound and defensible basis for determining that some hearing examiners positions in some agencies be upgraded to grade GS-16, while leaving others in the same agency in grade GS-15.

I was amazed to find that in 1963 the Civil Service Commission not only addressed the issue of multi-grade for judges at single agencies, but had decided that it was indefensible as well as poor policy to have more than one grade at an individual agency. Apparently, by the time the Department of Labor sought additional grades for its judges in the mid-1970's, the personnel had changed and the administrative history had been lost. We have found no document that OPM has ever reconsidered or readdressed the issues decided by it in 1963. The imposition by OPM of the dual grade structure on the Department, therefore, contravenes OPM's policy, rationale, and decision.

Interestingly, two other agencies also have been subjected in the mid-1970's to a bifurcated structure—the Department of Interior and the Evironmental Protection Agency have returned to a single grade system. DOL is the only agency left.

I believe we may have already convinced Director Devine on the merits, since I understand that the Office of Administrative Law Judges at OPM had been directed to come up with an "options paper" looking towards ending the grade split. Nonetheless finding this memorandum is a ground for immediate action.

EXHIBIT 4.—C.A. No. 83-0354

Hon. DONALD J. DEVINE,
Director, Office of Personnel Management, Washington, DC.

Re reclassification of remaining DOL judges to the grade 16 level.

DEAR MR. DEVINE: The Department of Labor respectfully requests that OPM reconsider its recent classification by Judge Marvin Morse of cases arising under the Federal Black Lung Benefits Reform Act. Judge Morse determined that administrative law judges assigned to hear those cases be classified at the Grade GS-15 level, instead of GS-16, which the Department believes to be the grade required by the level of difficulty of that work.

As you are aware, the dual grade structure of administrative law judges assigned to DOL, has not only created an inequitable situation among judges who, essentially are performing the same function, but has become a management nightmare. Under the present structure, judges must be sent to distant cities to hear a few grade GS-16 cases there, even though we may have an office of GS-15 judges in those cities who are fully competent to hear the cases.

Apart from our own belief that there is not a sufficient difference in the responsibility as well as the level of difficulty in most any case before a judge, we have attached a memorandum based upon a classification study by Mr. Alan McKean, a highly respected former OPM classifier, who subscribes to the same opinion.

We urgently require this relief in order for the Office of Administrative Law Judges to function in an efficient and economical manner. The costs are minimal and would be more than offset by savings in administrative and travel costs which would be realized by a prompt approval of this request. Your prompt attention will be appreciated.

Sincerely,

ALFRED M. ZUCK,
Assistant Secretary for Administration and Management.

ANALYSIS TO SUPPORT CLASSIFICATION OF THE DEPARTMENT OF LABOR "BLACK LUNG" ADMINISTRATIVE LAW JUDGES TO GS-935-16

This paper presents an analysis relating to the proper classification grade for Department of Labor Administrative Law Judges who may be engaged entirely in proceedings arising from Title IV of the Federal Mine Safety and Health Act of 1977. (For convenience, these Judges are hereinafter referred to as the "Black Lung ALJ's.") A description of the Black Lung ALJ positions is attached.

This analysis will, we believe, demonstrate the appropriateness of the GS-16 grade for these positions on the following grounds:

1. First and foremost, by comparison with published OPM position classification standards. While standards have not been published specifically for "Administrative Law Judges," the published standards for Attorney positions provide a clear basis for supporting GS-16 when proper recognition and weight is given to the level of responsibility inherent in the genuinely judicial function of these positions.

2. Secondly, we will show that these positions involve work of a level of difficulty and complexity, and a level of responsibility, which is clearly at least equal to that of other Administrative Law Judge positions which the OPM has classified at GS-16.

3. By law,[1] one type of case involving "black lung" (discharge or discrimination in employment against miners because of pneumoconiosis) must be heard by GS-16 ALJ's. Such cases cannot be given to the "Black Lung ALJ's" who, clearly, possess the most appropriate qualifications for adjudicating them, unless they are classified to GS-16.

4. Finally, while not a directly valid classification argument, we would point out that these positions equal or exceed in complexity and responsibility other ALJ positions which have been placed in GS-16 by action of the Congress. While Congressional actions are not technical classification decisions, we believe they reflect a sense of worth of ALJ positions which merits consideration, and that equity cries out for equal classification grades for positions of clearly comparable difficulty and responsibility.

MARCH 23, 1982.

Hon. DONALD J. DEVINE,
Director, Office of Personnel Management, Washington, DC.

Re single grade for Department of Labor judges.

DEAR MR. DEVINE: Attached is a memorandum from Chief Judge Nahum Litt to me stating that his office has just been supplied with a copy of the 1963 decision of the Civil Service Commission which determined that there should be only one grade for judges at each department or agency. I believe that the finding of this decision, if it still represents OPM's policy on multi-grade levels for judges within the same agency, should be sufficient cause for you to direct that appropriate actions be taken consistent with this OPM policy. I know that you have taken a personal interest in ending this issue and I am most appreciative.

Sincerely,

ALFRED M. ZUCK,
Assistant Secretary for Administration and Management
(For Betty Bolden).

By Mr. MOYNIHAN:

S. 1505. A bill to require the President to take action in response to the reports on barriers to foreign market access; to the Committee on Finance.

INCREASED MARKET ACCESS PROMOTION ACT

● Mr. MOYNIHAN, Mr. President, I rise today to introduce the Increased Market Access Promotion Act of 1985. The purpose of this bill is quite simple: To increase access for U.S. products, services, and investment in foreign markets.

Trade barriers in foreign countries which limit exports of U.S. goods, services and investment present a real problem for us. Japan is the nation most frequently cited—but other countries in the Far East and other areas of the world are guilty of acts, policies and practices that constitute significant trade barriers.

Our representatives have tried to remove these barriers through negotiations—too often, to no avail. In part, this reflects the fact that foreign countries have little incentive to reduce their trade barriers because they believe—correctly—that the United States will do nothing in response.

This has to change. We need to convince foreign countries that it is in their interest to eliminate their trade barriers.

I believe that requiring the President to use his existing authority under section 301 of the Trade Act of 1974, as amended, to retaliate against a country that persists in maintaining trade barriers by limiting that country's access to our markets, can provide the much needed leverage.

However, Mr. President, legislative proposals advanced in the last few months would restrict imports from

---

[1] This action was supplied under a Freedom of Information request pressed in the U.S. District Court by a DOL judge. No other material was supplied on this issue.

[2] An article by the Chairman of the Civil Service Commission, John W. Macy, Jr., also sets out this policy. The APA and the Hearing Examiner: Products of a Viable Political Society, 27 Fed Bar J. 351 (Fall 1967), at 377 (attached).

[1] Sec. 428(b) of Federal Mine Health and Safety Act of 1977.

foreign countries without regard to the existence and extent of those countries' trade barriers, or to their success in eliminating those barriers.

Take for example, S. 1404, Senator DANFORTH's bill approved by the Finance Committee on April 3 by a vote of 12 to 4—I voted against the bill. S. 1404 was drafted in response to the anticipated exports of $4.5 billion more Japanese autos to the United States following the expiration of the Japanese Voluntary Restraint Agreement. S. 1404 requires the President to take action to ensure that U.S. exports to Japan increase by the amount of the additional autos Japan will export to the United States. To the extent the Japanese do not open their markets and U.S. exports do not increase by this amount, the President would be required to restrict Japanese imports.

The problem with this bill, is that the President is required to retaliate against the Japanese based on the value of the additional autos they send us, rather than the value of U.S. exports they keep out of their markets. The premise of the bill, in other words, is "enough is enough": the message to the Japanese is "from now on, you can't send us any more than we send you."

A similar objection applies to bills offered by Senators GORTON, MURKOWSKI, HEINZ, and BENTSEN, to impose surcharges on imports from countries—that is, Japan—with which we have large trade deficits—even if those deficits reflect not trade barriers but rather such factors as relative competiveness, economic growth, fiscal and monetary policies, saving behaviour, or exchange rates rather than trade barriers.

What we should be saying instead is:

You have trade barriers that keep out our exports. Unless you eliminate those barriers, we will keep out of our markets as much as you keep out of your markets. On the other hand, if you eliminate your trade barriers and let our exports into your markets, then we will let your products into our markets—even if, as a result, you end up sending us more goods than we send you."

That is what my bill will do.

The bill would require:

First, USTR to submit to Congress on March 31 of each year a report identifying "acts, policies, or practices which constitute significant barriers to, or distortions of" U.S. exports of goods and services an investment abroad and to provide a quantitative estimate of the amount by which U.S. exports or investment would have increased in the previous year absent each barrier.

Second, the President to negotiate the elimination of those barriers as soon as possible—with the expectation that the barriers will be at least half removed after 1 year and completely eliminated after 2 years—so that in the first year following initiation of the negotiations, U.S. exports will increase 50 percent of the amount that USTR estimated they would have increased absent the barrier, and in the second year 100 percent.

Third, the President to immediately limit imports from countries with trade barriers—and large trade surpluses with the United States—by half the amount that U.S. exports would increase if the country eliminated its barriers—to create incentives for the foreign country to negotiate.

Fourth, the President to continue to limit imports from countries that have large trade surpluses with the United States and fail to eliminate their barriers as we expect—with the President limiting imports by the amount that U.S. exports would increase if the country had eliminated its barriers as expected—that is 50 percent after the first year, and 100 percent after 2 years—less the amount by which the foreign country does reduce its barriers and U.S. exports increase.

Permit me to illustrate with an example.

USTR estimates that if Japan eliminated its barriers to U.S. telecommunication exports, U.S. exports would be $2 billion greater. The President immediately limits Japanese imports by $1 billion. Negotiations to eliminate the barriers also commence. As a result of negotiations, Japan reduces its barriers and after a year U.S. exports increase $800 million. Since we expect that Japan would have reduced its barriers by one-half after 1 year, so that U.S. exports would have increased by $1 billion, the President would be required to limit $200 million of Japanese imports. If, after 2 years the Japanese had further reduced, but not eliminated, their barriers so that telecommunications exports were $1.6 billion higher than when USTR first reported the trade barriers, then the President would be required to limit Japanese imports by $400 million (since we expect that with the elimination of the barriers U.S. exports would have increased $2 billion).

I might note that, under the provisions of my bill, if a foreign country does not reduce its trade barriers, but instead maintains or increases them, then the President would be required to limit imports from that country in the full amount that U.S. exports would have increased absent that barrier.

Let me further add, Mr. President, that the retaliation provisions would only be used as leverage in those cases in which: First, the country had trade barriers; and second, our trade imbalance with that country had deteriorated to a significant extent—which is to say, in those cases where our bilateral trade deficit with that country exceeded 5 percent of our total trade deficit. Thus in 1984, the retaliation provisions would have applied to Japan, Canada, Taiwan, West Germany, and Mexico—which together accounted for 68 percent of our $123 billion trade deficit.

Mr. President, my approach builds on existing law. Under section 301, the President is already authorized to "take all appropriate and feasible action within his power" to enforce U.S. rights under trade agreements and to eliminate trade barriers to U.S. exports or direct foreign investment, if these barriers are "unjustifiable, unreasonable or discriminatory" and burden or restrict U.S. commerce.

Under section 301, the President may deny a foreign country the benefits of a prior trade agreement with the United States or impose duties or other import restrictions.

My bill simply requires the President to take action in order to obtain the leverage necessary to eliminate foreign trade barriers.

Moreover, the Trade and Tariff Act of 1984 directed the USTR to submit a report to Congress identifying significant foreign barriers to U.S. exports and estimating the "trade-distorting impact on United States commerce * * *" of those barriers. The bill simply requires USTR to go one step further and estimate the amount by which U.S. exports (or investment) would increase absent those barriers.

Mr. President, we need to take action to improve access to foreign markets. Yet at the same time, we need to reject proposals that would restrict imports without justification.

I hope my colleagues will agree and cosponsor this bill, and I ask unanimous consent that the text of the bill be printed at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1505

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Increased Market Access Promotion Act of 1985".

SEC. 2. REPORTS ON BARRIERS TO FOREIGN MARKET ACCESS.

Section 181 of the Trade Act of 1974 (19 U.S.C. 2241) is amended—

(1) by striking out "Not later than the date on which the initial report is required under subsection (b)(1)," in subsection (a)(1) and inserting in lieu thereof "For calendar year 1985, and for each succeeding calendar year,",

(2) by inserting "of each foreign country or instrumentality" after "or practices" in subsection (a)(1)(A),

(3) by striking out "and" at the end of subsection (a)(1)(A)(ii),

(4) by striking out the period at the end of subsection (a)(1)(B) and inserting in lieu thereof"; and",

(5) by adding at the end of subsection (a)(1) the following new subparagraph:

"(C) make an estimate of—

"(i) the value of additional goods and services of the United States, and

"(ii) the value of additional foreign direct investment by United States persons,

that would have been exported to, or invested in, each foreign country or instrumentality during such calendar year if each of such acts, policies, and practices of such country or instrumentality did not exist.",

(6) by striking out "and" at the end of subsection (a)(2)(C),

(7) by striking out the period at the end of subsection (a)(2)(D) and inserting in lieu "; and",

(8) by adding at the end of subsection (a)(2) the following new subparagraph:

"(E) the actual increase in—

"(i) the value of goods and services of the United States exported to, and

"(ii) the value of foreign direct investment made in,

the foreign country or instrumentality during the calendar year for which the estimate under paragraph (1)(C) is made.

(9) by striking out "the date which is one year after the date of the enactment of the International Trade and Investment Act, and" in subsection (b)(1) and inserting in lieu thereof "March 31 of 1986, and of",

(10) by inserting "for the calendar year preceding such calendar year to the President," after "under subsection (a)" in subsection (b)(1), and

(11) by striking out "ACTIONS" in the section heading and inserting in lieu thereof "REPORTS".

SEC. 3. ACTIONS IN RESPONSE TO REPORTS ON BARRIERS TO MARKET ACCESS.

(a) Chapter 8 of title I of the Trade Act of 1974 (19 U.S.C. 181) is amended by adding at the end thereof the following new section:

"SEC. 182. ACTIONS BY THE PRESIDENT IN RESPONSE TO REPORTS ON BARRIERS TO MARKET ACCESS.

"(a) NEGOTIATIONS.—Upon receipt of the report submitted under section 181, the President shall take action to initiate negotiations between the United States and each foreign country which is identified in such report as having acts, policies, or practices described in section 181(a)(1)(A) for the purpose of eliminating such acts, policies, and practices within 2 years.

"(b) ACTION UNDER SECTION 301.—If—

"(1) a foreign country is identified in a report submitted under section 181 as a country that has acts, policies, or practices described in section 181(a)(1)(A), and

"(2) the amount of the trade deficit between the United States and such country for the calendar year preceding the calendar year in which such report is submitted exceeds an amount equal to 5 percent of the amount of the trade deficit between the United States and the world for such calendar year,

the President shall, by no later than April 15 of the calendar year in which such report is submitted, take all actions authorized under section 301 against such county which are necessary to meet the applicable objective described in subsection (c) for such calendar year.

"(c) OBJECTIVES.—

"(1) FIRST YEAR SUBSECTION IS APPLICABLE.—If a foreign country was not described in paragraph (1) and (2) of subsection (b) for the calendar year preceding the current calendar year, the objective of the actions that are required to be taken against such country under subsection (b) for the current calendar year shall be the reduction of the aggregate value of the goods and services of such country that the President estimates would (but for this section) be exported to the United States during the current calendar year by an amount equal to 50 percent of the sum of the amounts described in clauses (i) and (ii) of section 181(a)(1)(C) that the United States Trade Representative estimates in the report submitted under section 181 during the current calendar year would have exported to, or invested in, such country if the acts, practices, and policies of such country identified in such report did not exist.

"(2) SECOND YEAR IF REDUCTION OF BARRIERS HAS BEEN MADE.—

"(A) IN GENERAL.—If paragraph (1) applied with respect to a foreign country during the calendar year preceding the current calendar year, the objective of the actions that are required to be taken against such country under subsection (b) for the current calendar year shall be the reduction of the aggregate value of the goods and services of such country that the President estimates would (but for this section) be exported to the United States during the current calendar year by an amount equal to the excess, if any, of—

"(i) the sum of the amounts described in clauses (i) and (ii) of section 181(a)(1)(C) that the United States Trade Representative estimates in the report submitted under section 181 during the current calendar year would have been exported to, or invested in, such country if the acts, policies, and practices of such country identified in such report did not exist, over

"(ii) an amount determined by multiplying—

"(I) 50 percent, by

"(II) the sum of the amounts described in clauses (i) and (ii) of section 181(a)(1)(C) that the United States Trade Representative estimates in the report submitted under section 181 during the calendar year preceding the current calendar year would have been exported to, or invested in, such country if the acts, policies, and practices of such country identified in such report did not exist.

(2) by inserting after the item relating to section 181 the following new item:

"Sec. 182. Actions by the President in response to reports on barriers to market access.".

"(B) EXCEPTION.—This paragraph shall not apply if the amount determined under subparagraph (A)(i) exceeds the amount described in subparagraph (A)(ii)(II).

"(3) OTHER YEARS.—If paragraph (1) and (2) do not apply, the objective of the actions that are required to be taken against a foreign country under subsection (b) for the current calendar year shall be the reduction of the aggregate value of goods and services of such country that the President estimates would (but for this section) be exported to the Untied States during the current calendar year by an amount equal to the sum of the amounts described in clauses (i) and (ii) of section 181(a)(1)(C) that the Untied States Trade Representative estimates in the report submitted under section 181 during the current calendar year would have been exported to such country if the acts, policies, and practices of such country identified in such report did not exist.

"(d) FOREIGN COUNTRY.—For purposes of this section, the term 'foreign country' includes foreign instrumentalities.".

(b) The table of contents of the Trade Act of 1974 is amended—

(1) by striking out "Actions" in the item relating to section 181, and inserting in lieu thereof "Reports", and●

By Mr. PROXMIRE (for himself, Mr. CHAFEE, Mr. ANDREWS, Mr. DURENBERGER, Mr. HEINZ, Mr. MCCLURE, Mr. GRASSLEY, Mr. PACKWOOD, Mr. WEICKER, Mr. KASTEN, Mr. THURMOND, Mr. DOMENICI, Mr. HATCH, Mr. HATFIELD, Mr. BURDICK, Mr. MATSUNAGA, Mr. NUNN, Mr. HOLLINGS, Mr. INOUYE, Mr. ZORINSKY, Mr. RIEGLE, Mr. GORE, Mr. EXON, Mr. BRADLEY, Mr. BAUCUS, Mr. CRANSTON, and Mr. BENTSEN):

S.J. Res. 175. Joint resolution to designate the week of August 25, 1985, through August 31, 1985, as "National CPR Awareness Week"; to the Committee on the Judiciary.

(The remarks of Mr. PROXMIRE and the text of the legislation appear earlier in today's RECORD.)

By Mr. D'AMATO:

S.J. Res. 176. Joint resolution to provide that a special gold medal honoring George Gershwin be presented to his sister, Frances Gershwin Godowsky, and a special gold medal honoring Ira Gershwin be presented to his widow, Leonore Gershwin, and to provide for the production of bronze duplicates of such medals for sale to the public; to the Committee on Banking, Housing, and Urban Affairs.

GOLD MEDALS HONORING GEORGE AND IRA GERSHWIN

● Mr. D'AMATO. Mr. President, I rise today with tremendous pride to honor two Americans and their music. The joint resolution I offer today provides for a special gold medal honoring George Gershwin to be presented to his sister, Frances Gershwin Godowsky, and a gold medal honoring Ira Gershwin to be presented to his widow, Leonore Gershwin. My joint resolution also would provide for the creation of bronze duplicates of such medals to be sold to the general public, in turn raising the revenues to reimburse Treasury for the production of the medals.

In the past, only two American composers have received the Congressional Gold Medal: George M. Cohan for his patriotic songs "Over There" and "A Grand Old Flag" and Irving Berlin for "God Bless America" and other songs. It is time that we now honor the composers who epitomize America and its music. These creative artists have immortalized Americana and served it to the international community with the universal style that makes George and Ira Gershwin composers of the world.

Let us take a moment to review some of George and Ira's works. George Gershwin's first major hit came in 1919 with "Swanee"—truly an American classic. Even after George and Ira started working together in 1924, George did some musical pieces for concert halls. To note a few of George's compositions for the concert hall, there was "Rhapsody in Blue,"

"Concerto in F," "An American in Paris," and "Three Preludes"—need I say more. George's influence has been so pervasive that it left its mark on the following three films made after his death: "An American in Paris" (1951), "Funny Face" (1957), and "Manhattan" (1979). The remarkable creations of George Gershwin bring George and his works melodiously to mind when we least expect it.

Ira is no less a presence in American music. Ira Gershwin composed some of the greatest lyrics known to all ages. This immortal lyricist wrote such songs as "Summertime" with George; with other musicians he did "The Man That Got Away" and "Long Ago and Far Away." He also did the Broadway musicals "Lady in the Dark" and "A Star Is Born."

But there was never such harmony and feeling as when the two brothers created together. While colleagues, Ira and George wrote the Broadway musicals "Oh Kay!," "Strike Up the Band," "Funny Face," "Girl Crazy," and "Of Thee I Sing." This last one was the first musical comedy to receive a Pulitzer Prize and displayed the virtuoso talent of these gentlemen as musicians, writers, and folk philosophers.

However, there is one musical form which challenges even the most talented composers: opera. America has produced little to succeed internationally in this field, and the 20th century has been sorely lacking as well. In a world of Wagner and Bizet, George and Ira Gershwin, in perhaps their crowning achievement, have placed America on the opera stages of the world, and they have done so in such a common poetic fashion as to capture the hearts of divas and the everyday worker as well. I speak of "Porgy and Bess" of course. This masterpiece is celebrating its 50th anniversary this year, and we salute it and the two Americans who made it possible.

I ask my colleagues to join me as cosponsors of this fine tribute to the living memory of Ira and George Gershwin.

I also ask unanimous consent that my joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 176

Whereas George and Ira Gershwin, individually and jointly, created music which is undeniably American and which is internationally admired;

Whereas George Gershwin composed works acclaimed both as classical music and as popular music, including "Rhapsody in Blue", "An American in Paris", "Concerto in F", and "Three Preludes for Piano";

Whereas Ira Gershwin won a Pulitzer Prize for the lyrics for "Of Thee I Sing", the first lyricist ever to receive such prize;

Whereas Ira Gershwin composed the lyrics for major Broadway productions, including "A Star is Born", "Lady in the Dark", "The Barkleys of Broadway", and for hit songs, including "I Can't Get Started", "Long Ago and Far Away", and "The Man That Got Away";

Whereas George and Ira Gershwin collaborated to compose the music and lyrics for major Broadway productions, including "Lady Be Good", "Of Thee I Sing", "Strike Up the Band", "Oh Kay!", and "Funny Face";

Whereas George and Ira Gershwin collaborated to produce the opera "Porgy and Bess" and the 50th anniversary of its first performance will occur during 1985;

Whereas George and Ira Gershwin collaborated to compose the music and lyrics for important contributions to the American song, including "I Got Rhythm", "Summertime", "Love is Here to Stay", "Fascinating Rhythm", "Let's Call the Whole Thing Off", "I Got Plenty of Nuttin", and "Someone to Watch Over Me"; and

Whereas George and Ira Gershwin have made outstanding and invaluable contributions to American music, theatre, and culture: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. AUTHORIZATION TO PRESENT GOLD MEDALS.

The President is authorized to present on behalf of the Congress a gold medal honoring George Gershwin to his sister, Frances Gershwin Godowsky, and a gold medal honoring Ira Gershwin to his widow, Leonore Gershwin.

SEC. 2. PRODUCTION OF GOLD MEDALS AND PRODUCTION AND SALE OF BRONZE DUPLICATE MEDALS.

(a) PRODUCTION OF GOLD MEDALS.—The Secretary of the Treasury shall coin one gold medal honoring George Gershwin and one gold medal honoring Ira Gershwin and shall deliver such medals to the President for presentation under section 1. Each gold medal shall contain suitable emblems, devices, and inscriptions to be determined by the Secretary.

(b) PRODUCTION AND SALE OF BRONZE DUPLICATE MEDALS.—The Secretary of the Treasury shall coin and sell bronze medals which are duplicates of each gold medal coined pursuant to subsection (a) under such regulations as the Secretary may prescribe, at a price sufficient to cover the cost of the gold medals and such duplicates, including the cost of labor, materials, dies, use of machinery, and overhead.

SEC. 3. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated for the fiscal year beginning October 1, 1985, such funds as may be necessary to carry out the purposes of this Act.

SEC. 4. EFFECT ON OTHER LAW.

The medals provided for in this Act are national medals for the purpose of section 5111 of title 31, United States Code, and are coins for the purposes of sections 331 and 485 of title 18, United States Code.●

ADDITIONAL COSPONSORS

S. 104

At the request of Mr. THURMOND, the name of the Senator from Kentucky [Mr. FORD] was added as a cosponsor of S. 104, a bill to amend chapter 44, title 18, United States Code, to regulate the manufacture and importation of armor-piercing bullets.

S. 274

At the request of Mr. DENTON, the names of the Senator from Texas [Mr. GRAMM], the Senator from Kansas [Mrs. KASSEBAUM], the Senator from New Hampshire [Mr. RUDMAN], and the Senator from Arkansas [Mr. PRYOR] were added as cosponsors of S. 274, a bill to provide for the national security by allowing access to certain Federal criminal history records.

S. 676

At the request of Mr. BENTSEN, the name of the Senator from Texas [Mr. GRAMM] was added as a cosponsor of S. 676, a bill to establish the title of States in certain resources.

S. 721

At the request of Mr. BOREN, the name of the Senator from Idaho [Mr. MCCLURE] was added as a cosponsor of S. 721, a bill to amend the Commodity Credit Corporation Charter Act regarding the export of agricultural commodities.

S. 827

At the request of Mrs. HAWKINS, the names of the Senator from Rhode Island [Mr. PELL], and the Senator from Maryland [Mr. SARBANES] were added as cosponsors of S. 827, a bill to amend the Public Health Service Act to provide for the compensation of children and others who have sustained vaccine-related injuries, and for other purposes.

S. 961

At the request of Mr. SARBANES, the names of the Senator from Maryland [Mr. MATHIAS], the Senator from Indiana [Mr. LUGAR], the Senator from Rhode Island [Mr. CHAFEE], and the Senator from Wisconsin [Mr. PROXMIRE] were added as cosponsors of S. 961, a bill to authorize the Alpha Phi Alpha Fraternity to establish a memorial to Martin Luther King, Jr., in the District of Columbia.

S. 1084

At the request of Mr. GOLDWATER, the name of the Senator from Pennsylvania [Mr. HEINZ] was added as a cosponsor of S. 1084, a bill to authorize appropriations of funds for activities of the Corporation for Public Broadcasting, and for other purposes.

S. 1153

At the request of Mr. D'AMATO, the names of the Senator from Florida [Mr. CHILES], the Senator from Illinois [Mr. DIXON], the Senator from New Mexico [Mr. BINGAMAN], the Senator from New Mexico [Mr. DOMENICI], and the Senator from New York [Mr. MOYNIHAN] were added as cosponsors of S. 1153, a bill to provide for the distribution within the United States of the U.S. Information Agency film entitled "Hal David: Expressing a Feeling."

S. 1223

At the request of Mr. ARMSTRONG, the name of the Senator from Massa-

chusetts [Mr. KENNEDY] was added as a cosponsor of S. 1223, a bill authorizing the erection of a memorial on Federal land in the District of Columbia or its environs to honor members of the Armed Forces of the United States who served in the Korean war.

S. 1259

At the request of Mr. THURMOND, the name of the Senator from South Dakota [Mr. PRESSLER] was added as a cosponsor of S. 1259, a bill to correct certain inequities by providing Federal civil service credit for retirement purposes and for the purpose of computing length of service to determine entitlement to leave, compensation, life insurance, health benefits, severance pay, tenure, and status in the case of certain individuals who performed service as National Guard technicians before January 1, 1969.

S. 1371

At the request of Mr. LEVIN, the names of the Senator from Massachusetts [Mr. KERRY], the Senator from Pennsylvania [Mr. HEINZ], the Senator from Alaska [Mr. MURKOWSKI], the Senator from Connecticut [Mr. DODD], and the Senator from Massachusetts [Mr. KENNEDY] were added as cosponsors of S. 1371, a bill to designate the portion of 15th Street SW, Washington, DC, located between Maine and Independence Avenues as "Raoul Wallenberg Avenue."

S. 1380

At the request of Mr. GLENN, the name of the Senator from Arkansas [Mr. BUMPERS] was added as a cosponsor of S. 1380, a bill to reform certain regulatory procedures governing the export of banned and severely restricted substances.

S. 1406

At the request of Mr. DECONCINI, the name of the Senator from Utah [Mr. GARN] was added as a cosponsor of S. 1406, a bill to make permanent the formula for determining fees for the grazing of livestock on public rangelands.

S. 1430

At the request of Mr. MOYNIHAN, the name of the Senator from Hawaii [Mr. MATSUNAGA] was added as a cosponsor of S. 1430, a bill to require the Secretary of Health and Human Services to make grants to eligible State and local governments to support projects for education and information dissemination concerning acquired immune deficiency syndrome, and to make grants to State and local governments for the establishment of programs to test blood to detect the presence of antibodies to the human T-cell lymphotrophic virus.

S. 1434

At the request of Mr. WILSON, the names of the Senator from Kansas [Mrs. KASSEBAUM] and the Senator from Nebraska [Mr. ZORINSKY] were added as cosponsors of S. 1434, a bill to amend the Fair Labor Standards Act of 1938 to exclude the employees of States and political subdivisions of States from the provisions of that act relating to maximum hours.

S. 1479

At the request of Mr. SASSER, the name of the Senator from Ohio [Mr. GLENN] was added as a cosponsor of S. 1479, a bill to amend the Public Safety Officer's Death Benefits Act.

S. 1487

At the request of Mr. GRASSLEY, the name of the Senator from Nevada [Mr. LAXALT] was added as a cosponsor of S. 1487, a bill to amend section 504 of title 5, United States Code, and section 2412 of title 28, United States Code, with respect to awards of expenses of certain agency and court proceedings, and for other purposes.

SENATE JOINT RESOLUTION 48

At the request of Mr. LEVIN, the name of the Senator from West Virginia [Mr. ROCKEFELLER] was added as a cosponsor of Senate Joint Resolution 48, a joint resolution to designate the year of 1986 as the "Year of the Teacher."

SENATE JOINT RESOLUTION 117

At the request of Mr. LEVIN, the names of the Senator from Alabama [Mr. DENTON], the Senator from Maine [Mr. MITCHELL], the Senator from Oklahoma [Mr. NICKLES], and the Senator from Maine [Mr. COHEN] were added as cosponsors of Senate Joint Resolution 117, a joint resolution designating the week beginning September 22, 1985, as "National Adult Day Care Center Week."

SENATE JOINT RESOLUTION 132

At the request of Mr. DANFORTH, the names of the Senator from Louisiana [Mr. JOHNSTON], and the Senator from Texas [Mr. BENTSEN] were added as cosponsors of Senate Joint Resolution 132, a joint resolution designating October 1985, as "National Head Injury Awareness Month."

SENATE JOINT RESOLUTION 141

At the request of Mr. SASSER, the names of the Senator from Alabama [Mr. DENTON], and the Senator from South Carolina [Mr. THURMOND] were added as cosponsors of Senate Joint Resolution 141, a joint resolution to designate the week beginning May 18, 1986, as "National Tourism Week."

SENATE JOINT RESOLUTION 149

At the request of Mr. DIXON, the names of the Senator from North Dakota [Mr. BURDICK], the Senator from Nebraska [Mr. ZORINSKY], the Senator from South Carolina [Mr. HOLLINGS], the Senator from Oklahoma [Mr. NICKLES], and the Senator from South Carolina [Mr. THURMOND] were added as cosponsors of Senate Joint Resolution 149, a joint resolution to designate the week of September 15, 1985 through September 21, 1985, as "National Dental Hygiene Week."

SENATE JOINT RESOLUTION 150

At the request of Mr. BRADLEY, the names of the Senator from Wisconsin [Mr. PROXMIRE], the Senator from Nevada [Mr. LAXALT], and the Senator from New York [Mr. MOYNIHAN] were added as cosponsors of Senate Joint Resolution 150, a joint resolution to designate the month of March 1986 as "National Hemophilia Month."

SENATE JOINT RESOLUTION 156

At the request of Mr. MURKOWSKI, the names of the Senator from South Dakota [Mr. PRESSLER], and the Senator from Mississippi [Mr. COCHRAN] were added as cosponsors of Senate Joint Resolution 156, a joint resolution authorizing a memorial to be erected in the District of Columbia or its environs.

SENATE JOINT RESOLUTION 158

At the request of Mr. MURKOWSKI, the name of the Senator from Iowa [Mr. GRASSLEY] was added as a cosponsor of Senate Joint Resolution 158, a joint resolution designating October 1985 as "National Community College Month."

SENATE JOINT RESOLUTION 161

At the request of Mr. DOLE, the name of the Senator from Colorado [Mr. ARMSTRONG] was added as a cosponsor of Senate Joint Resolution 161, a joint resolution to appeal for the release of Soviet Jewry.

SENATE JOINT RESOLUTION 166

At the request of Mr. DURENBERGER, the names of the Senator from Oregon [Mr. HATFIELD], the Senator from Colorado [Mr. ARMSTRONG], and the Senator from Maine [Mr. COHEN] were added as cosponsors of Senate Joint Resolution 166, a joint resolution to appeal for the release of Dr. Yury Orlov and other Helsinki Final Act monitors.

At the request of Mr. MOYNIHAN, the names of the Senator from Indiana [Mr. QUAYLE], the Senator from South Dakota [Mr. PRESSLER], the Senator from Oklahoma [Mr. NICKLES], and the Senator from North Dakota [Mr. BURDICK] were added as cosponsors of Senate Joint Resolution 166, supra.

SENATE JOINT RESOLUTION 168

At the request of Mr. TRIBLE, the names of the Senator from Minnesota [Mr. BOSCHWITZ], the Senator from California [Mr. WILSON], and the Senator from Mississippi [Mr. COCHRAN] were added as cosponsors of Senate Joint Resolution 168, a joint resolution designating August 13, 1985, as "National Neighborhood Crime Watch Day."

SENATE RESOLUTION 37

At the request of Mr. PRYOR, the names of the Senator from Iowa [Mr. GRASSLEY], the Senator from Alabama [Mr. HEFLIN], the Senator from Montana [Mr. MELCHER], and the Senator from South Dakota [Mr. ABDNOR] were added as cosponsors of Senate

Resolution 37, a resolution regarding small business and agricultural representatives on the Federal Reserve Board.

SENATE RESOLUTION 186

At the request of Mr. D'AMATO, the name of the Senator from Illinois [Mr. DIXON] was added as a cosponsor of Senate Resolution 186, a resolution expressing the sense of the Senate that the President should call for negotiations with those democratic nations plagued by terrorism for a treaty to prevent and respond to terrorist attacks.

SENATE RESOLUTION 202

At the request of Mr. FORD, the names of the Senator from Arizona [Mr. DECONCINI], and the Senator from Maine [Mr. COHEN] were added as cosponsors of Senate Resolution 202, a resolution to urge negotiators for major league baseball owners and players to quickly settle their differences and avoid a scheduled players' strike.

AMENDMENTS SUBMITTED

FEDERAL TRADE COMMISSION AUTHORIZATION

KASTEN (AND OTHERS) AMENDMENT NO. 542

Mr. KASTEN (for himself, Mr. GRASSLEY, and Mr. LEVIN) proposed an amendment, which was subsequently modified, to the bill (S. 1078) to amend the Federal Trade Commission Act to provide authorization of appropriations, and for other purposes; as follows:

On page 16, insert the following immediately after line 2:

CONGRESSIONAL REVIEW OF RULES

SEC. 16. (a) The Federal Trade Commission Act (15 U.S.C. 41 et seq.) is amended by inserting after section 25, as added by section 10 of this Act, the following new section:

"SEC. 26. (a) For purposes of this section, the term—

"(1) 'appropriate committee' means either the Committee on Commerce, Science, and Transportation of the Senate or the Committee on Energy and Commerce of the House of Representatives, as the case may be;

"(2) 'joint resolution' means a joint resolution the matter after the resolving clause of which is as follows: 'That the Senate and the House of Representatives disapprove the rule , entitled transmitted to the Congress by the Federal Trade Commission on , 19 .', the blank spaces being filled with the appropriate title of the rule and the date of transmittal of the rule to the Congress, respectively; and

"(3) 'rule' means any rule promulgated by the Commission pursuant to this Act, other than any rule promulgated under section 18(a)(1)(A) of this Act and any interpretive or procedural rule.

"(b)(1) Except as provided in subsection (g)(1) of this section, on the day the Commission forwards to the Federal Register for publication a recommended rule, the Commission shall transmit a copy of such rule to the Secretary of the Senate and the Clerk of the House of Representatives. The Secretary of the Senate and the Clerk of the House of Representatives are authorized to receive a recommended rule under this subsection whether the appropriate House is in session, stands in adjournment or is in recess.

"(2) On the day on which the Secretary of the Senate and the Clerk of the House of Representatives receive a recommended rule, the Secretary and the Clerk shall transmit a copy of such rule to the appropriate committees.

"(c)(1) Notwithstanding any other provision of law, no recommended rule may become effective until the expiration of a period of ninety days after the date on which such rule is received by the Secretary of the Senate and the Clerk of the House of Representatives, except that such rule may not become effective under this paragraph if within such ninety-day period a joint resolution with respect to such rule has become law.

"(2) For purposes of this subsection—

"(A) the term 'days' means only days of continuous session of Congress;

"(B) continuity of session is broken only by an adjournment sine die at the end of a Congress; and

"(C) the days on which either House is not in session because of an adjournment or recess to a day certain shall be excluded in the computation of days of continuous session of Congress for the ninety-day period referred to in this subsection if the adjournment is for more than five days.

"(d) Notwithstanding any other provision of law, any rule subject to this section shall be considered a recommendation of the Commission to the Congress and shall have no force and effect as a rule unless such rule has become effective in accordance with this section.

"(e) Whenever an appropriate committee reports a joint resolution pursuant to this section, the resolution shall be accompanied by a committee report specifying the reasons for the committee's action.

"(f) Congressional inaction on, or rejection of, any joint resolution shall not be deemed an expression of approval of the rule involved. The compliance of the Commission with the requirements of this section, including any determination by the Commission under this section, shall not be subject to judicial review of any kind.

"(g)(1) If a recommended rule of the Commission does not become effective because of an adjournment of Congress sine die before the expiration of the period specified in subsection (c)(1) of this section, the Commission may resubmit the recommended rule at the beginning of the next regular session of Congress. The ninety-day period specified in the first sentence of section (c)(1) shall begin on the date of such resubmission, and such rule may only become effective in accordance with this section. The Commission shall not be required to forward such rule to the Federal Register for publication, if such rule is identical to the rule transmitted during the previous session of Congress.

"(2) If a recommended rule of the Commission is disapproved under this section, the Commission may issue a recommended rule which relates to the same acts or practices as the disapproved rule. Such recommended rule—

"(A) shall be based upon—

"(1) the rulemaking record of the recommended rule disapproved by the Congress; or

"(ii) such rulemaking record and the record established in supplemental rulemaking proceedings conducted by the Commission, in accordance with section 553 of title 5, United States Code, in any case in which the Commission determines that it is necessary to supplement the existing rulemaking record; and

"(B) may reflect such changes as the Commission considers necessary or appropriate, including such changes as may be appropriate in light of congressional debate and consideration of the joint resolution with respect to the rule.

"(3) After issuing a recommended rule under this subsection, the Commission shall transmit such rule to the Secretary of the Senate and the Clerk of the House of Representatives, in accordance with subsection (b)(1) of this section, and such rule shall only become effective in accordance with this section.

"(h) The provisions of this subsection, subsection (a)(1) and (2), subsection (e), and subsections (i) through (l) of this section are enacted by Congress—

"(1) as an exercise of the rulemaking power of the Senate and the House of Representatives, respectively, and as such they are deemed a part of the rules of each House, respectively, but applicable only with respect to the procedure to be followed in that House in the case of joint resolutions, and they supersede other rules only to the extent that they are inconsistent therewith; and

"(2) with full recognition of the constitutional right of either House to change the rules (so far as relating to the procedure of that House) at any time, in the same manner and to the same extent as in the case of any other rule of that House.

"(i) Except as provided in subsection (1) of this section, joint resolutions shall, upon introduction or receipt from the other House of Congress, be immediately referred by the presiding officer of the Senate or the House of Representatives to the appropriate committee of the Senate or the House of Representatives, as the case may be.

"(j)(1)(A) Except as provided in subparagraph (B) of this paragraph, if the committee to which a joint resolution has been referred does not report such resolution within 30 days of continuous session of Congress after the date of transmittal to the Congress of the recommended rule to which such joint resolution relates, it shall be in order to move to discharge the committee from further consideration of such resolution.

"(B) If the committee to which a joint resolution transmitted from the other House has been referred does not report such resolution within 30 days after the date of transmittal of such resolution from the other House, it shall be in order to move to discharge such committee from further consideration of such resolution.

"(2) Any motion to discharge under paragraph (1) of this subsection must be supported in the House in writing by one-fifth of the Members, duly chosen and sworn, and in the Senate may be made by one Senator, and is highly privileged in the House and privileged in the Senate (except that it may not be made after a joint resolution has been reported with respect to the same rule); and debate thereon shall be limited to not more than one hour, the time to be di-

vided in the House of Representatives equally between those favoring and those opposing the motion to discharge and to be divided in the Senate equally between, and controlled by, the majority leader and the minority leader, or their designees. An amendment to the motion is not in order.

"(k)(1) Except as provided in paragraphs (2) and (3) of this subsection, consideration of a joint resolution shall be in accord with the rules of the Senate and of the House of Representatives, respectively.

"(2) When a committee has reported or has been discharged from further consideration of a joint resolution, or when the companion joint resolution from the other House has been placed on the calendar of the first House, it shall be in order, notwithstanding the provisions of rule XXII of the Standing Rules of the Senate or any other rule of the Senate or the House of Representatives, at any time thereafter (even though a previous motion to the same effect has been disagreed to) to move to proceed to the immediate consideration of either such joint resolution. The motion is highly privileged in the House and privileged in the Senate and is not debatable. An amendment to the motion is not in order.

"(3) Debate on a joint resolution shall be limited to not more than two hours (except that when one House has debated the joint resolution of that House, the companion joint resolution of the other House shall not be debatable), which shall be divided in the House of Representatives equally between those favoring and those opposing the resolution and which shall be divided in the Senate equally between, and controlled by, the majority leader and the minority leader, or their designees. A motion further to limit debate is not in order. An amendment to, or motion to recommit, the joint resolution is not in order. A motion to reconsider shall be in order only on the day on which occurs the vote of adoption of the joint resolution, and shall not be debatable. Any other motions shall be decided without debate.

"(1) If a joint resolution has been ordered reported or discharged from the committee of the House to which it was referred, and that House receives a joint resolution with respect to the same rules from the other House, the resolution of disapproval of the other House shall be placed on the appropriate calendar of the first House. If, prior to the disposition of a joint resolution of one House, that House receives a joint resolution with respect to the same rule from the other House, the vote in the first House shall occur on the joint resolution of the House.".

(b) Section 36 of the Consumer Product Safety Act (15 U.S.C. 2083) is amended to read as follows:

"CONGRESSIONAL REVIEW OF RULES

"SEC. 36. (a) For purposes of this section, the term—

"(1) 'appropriate committee' means either the Committee on Commerce, Science, and Transportation of the Senate or the Committee on Energy and Commerce of the House of Representatives, as the case may be;

"(2) 'joint resolution' means a joint resolution the matter after the resolving clause of which is as follows: 'That the Senate and the House of Representatives disapprove the rule entitled , transmitted to the Congress by the Consumer Product Safety Commission on , 19 .', the blank spaces being filled with the appropriate title of the rule and the date of transmittal of the rule to the Congress, respectively; and

"(3) 'rule' means any rule promulgated by the Commission pursuant to this Act.

"(b)(1) Except as provided in subsection (g)(1) of this section, on the day the Commission forwards to the Federal Register for publication a recommended rule, the Commission shall transmit a copy of such rule to the Secretary of the Senate and the Clerk of the House of Representatives. The Secretary of the Senate and the Clerk of the House of Representatives are authorized to receive a recommended rule under this subsection whether the appropriate House is in session, stands in adjournment or is in recess.

"(2) On the day on which the Secretary of the Senate and the Clerk of the House of Representatives receive a recommended rule, the Secretary and the Clerk shall transmit a copy of such rule to the appropriate committees.

"(c)(1) Notwithstanding any other provision of law, no recommended rule may become effective until the expiration of a period of ninety days after the date on which such rule is received by the Secretary of the Senate and the Clerk of the House of Representatives, except that such rule may not become effective under this paragraph if within such ninety-day period a joint resolution with respect to such rule has become law.

"(2) For purposes of this subsection—

"(A) the term 'days' means only days of continuous session of Congress;

"(B) continuity of session is broken only by an adjournment sine die at the end of a Congress; and

"(C) the days on which either House is not in session because of an adjournment or recess to a day certain shall be excluded in the computation of days of continuous session of Congress for the ninety-day period referred to in this subsection if the adjournment is for more than five days.

"(d) Notwithstanding any other provision of law, any rule subject to this section shall be considered a recommendation of the Commission to the Congress and shall have no force and effect as a rule unless such rule has become effective in accordance with this section.

"(e) Whenever an appropriate committee reports a joint resolution pursuant to this section, the resolution shall be accompanied by a committee report specifying the reasons for the committee's action.

"(f) Congressional inaction on, or rejection of, any joint resolution shall not be deemed an expression of approval of the rule involved. The compliance of the Commission with the requirements of this section, including any determination by the Commission under this section, shall not be subject to judicial review of any kind.

"(g)(1) If a recommended rule of the Commission does not become effective because of an adjournment of Congress sine die before the expiration of the period specified in subsection (c)(1) of this section, the Commission may resubmit the recommended rule at the beginning of the next regular session of Congress. The ninety-day period specified in the first sentence of subsection (c)(1) shall begin on the date of such resubmission, and such rule may only become effective in accordance with this section. The Commission shall not be required to forward such rule to the Federal Register for publication, if such rule is identical to the rule transmitted during the previous session of Congress.

"(2) If a recommended rule of the Commission is disapproved under this section, the Commission may issue a recommended rule which relates to the same acts or practices as the disapproved rule. Such recommended rule—

"(A) shall be based upon—

"(i) the rulemaking record of the recommended rule disapproved by the Congress; or

"(ii) such rulemaking record and the record established in supplemental rulemaking proceedings conducted by the Commission, in accordance with section 553 of title 5, United States Code, in any case in which the Commission determines that it is necessary to supplement the existing rulemaking record; and

"(B) may reflect such changes as the Commission considers necessary or appropriate, including such changes as may be appropriate in light of congressional debate and consideration of the joint resolution with respect to the rule.

"(3) After issuing a recommended rule under this subsection, the Commission shall transmit such rule to the Secretary of the Senate and the Clerk of the House of Representatives, in accordance with subsection (b)(1) of this section, and such rule shall only become effective in accordance with this section.

"(h) The provisions of this subsection, subsection (a) (1) and (2), subsection (e), and subsections (i) through (l) of this section are enacted by Congress—

"(1) as an exercise of the rulemaking power of the Senate and the House of Representatives, respectively, and as such they are deemed a part of the rules of each House, respectively, but applicable only with respect to the procedure to be followed in that House in the case of joint resolutions, and they supersede other rules only to the extent that they are inconsistent therewith; and

"(2) with full recognition of the constitutional right of either House to change the rules (so far as relating to the procedure of that House) at any time, in the same manner and to the same extent as in the case of any other rule of that House.

"(i) Except as provided in subsection (1) of this section, joint resolutions shall, upon introduction or receipt from the other House of Congress, be immediately referred by the presiding officer of the Senate or the House of Representatives to the appropriate committee of the Senate or the House of Representatives, as the case may be.

"(j)(1)(A) Except as provided in subparagraph (B) of this paragraph, if the committee to which a joint resolution has been referred does not report such resolution within 30 days of continuous session of Congress after the date of transmittal to the Congress of the recommended rule to which such joint resolution relates, it shall be in order to move to discharge the committee from further consideration of such resolution.

"(B) If the committee to which a joint resolution transmitted from the other House has been referred does not report such resolution within 30 days after the date of transmittal of such resolution from the other House, it shall be in order to move to discharge such committee from further consideration of such resolution.

"(2) Any motion to discharge under paragraph (1) of this subsection must be supported in the House in writing by one-fifth of the Members, duly chosen and sworn, and in the Senate may be made by one Senator, and is highly privileged in the House and privileged in the Senate (except that it

may not be made after a joint resolution has been reported with respect to the same rule); and debate thereon shall be limited to not more than one hour, the time to be divided in the House of Representatives equally between those favoring and those opposing the motion to discharge and to be divided in the Senate equally between, and controlled by, the majority leader and the minority leader, or their designees. An amendment to the mention is not in order.

"(k)(1) Except as provided in paragraphs (2) and (3) of this subsection, consideration of a joint resolution shall be in accord with the rules of the Senate and of the House of Representatives, respectively.

"(2) When a committee has reported or has been discharged from further consideration of a joint resolution, or when the companion joint resolution from the other House has been placed on the calendar of the first House, it shall be in order, notwithstanding the provision of rule XXII of the Standing Rules of the Senate or any other rule of the Senate or the House of Representatives, at any time thereafter (even though a previous motion to the same effect has been disagreed to) to move to proceed to the immediate consideration of either such joint resolution. The motion is highly privileged in the House and privileged in the Senate and is not debatable. An amendment to the motion is not in order.

"(3) Debate on a joint resolution shall be limited to not more than two hours (except that when one House has debated the joint resolution of that Hoiuse, the companion joint resolution of the other House shall not be debatable), which shall be divided in the House of Representatives equally between those favoring and those opposing the resolution and which shall be divided in the Senate equally between, and controlled by, the majority leader and the minority leader, or their designees. A motion further to limit debate is not in order. An amendment to, or motion to recommit, the joint resolution is not in order. A motion to reconsider shall be in order only on the day on which occurs the vote of adoption of the joint resolution, and shall not be debatable. Any other motions shall be decided without debate.

"(1) If a joint resolution has been ordered reported or discharged from the committee of the House to which it was referred, and that House receives a joint resoluiton with respect to the same rule from the other House, the resolution of disapproval of the other House shall be placed on the appropriate calendar of the first House. If, prior to the disposition of a joint resolution of one House, that House receives a joint resolution with respect to the same rule from the other House, the vote in the first House shall occur on the joint resolution of the other House.".

(c) Section 17 of the Flammable Fabrics Act (15 U.S.C. 204) is amended to read as follows:

"CONGRESSIONAL REVIEW OF REGULATIONS

"SEC. 17. (a) For purposes of this section, the term—

"(1) 'appropriate committee' means either the Committee on Commerce, Science, and Transportation of the Senate or the Committee on Energy and Commerce of the House of Representatives, as the case may be;

"(2) 'Commission' means the Consumer Product Safety Commission;

"(3) 'joint resolution' means a joint resolution the matter after the resolving clause of which is as follows: 'That the Senate and the House of Representatives disapprove the regulation entitled , transmitted to the Congress by the Consumer Product Safety Commission on , 19 .', the blank spaces being filled with the appropriate title of the regulation and the date of transmittal of the regulation to the Congress, respectively; and

"(4) 'regulation' means any regulation promulgated by the Commission under section 2(q)(1) or 3(e).

"(b)(1) Except as provided in subsection (g)(1) of this section, on the day the Commission forwards to the Federal Register for publication a recommended regulation, the Commission shall transmit a copy of such regulation to the Secretary of the Senate and the Clerk of the House of Representatives. The Secretary of the Senate and the Clerk of the House of Representatives are authorized to receive a recommended regulation under this subsection whether the appropriate House is in session, stands in adjournment or is in recess.

"(2) On the day on which the Secretary of the Senate and the Clerk of the House of Representatives receive a recommended regulation, the Secretary and the Clerk shall transmit a copy of such regulation to the appropriate committees.

"(c)(1) Notwithstanding any other provision of law, no recommended regulation may become effective until the expiration of a period of ninety days after the date on which such regulation is received by the Secretary of the Senate and the Clerk of the House of Representatives, except that such regulation may not become effective under this paragraph if within such ninety-day period a joint resolution with respect to such regulation has become law.

"(2) For purposes of this subsection—

"(A) the term 'days' means only days of continuous session of Congress;

"(B) continuity of session is broken only by an adjournment sine die at the end of a Congress; and

"(C) the days on which either House is not in session because of an adjournment or recess to a day certain shall be excluded in the computation of days of continuous session of Congress for the ninety-day period referred to in this subsection if the adjournment is for more than five days.

"(d) Notwithstanding any other provisions of law, any regulation subject to this section shall be considered a recommendation of the Commission to the Congress and shall have no force and effect as a regulation unless such regulation has become effective in accordance with this section.

"(e) Whenever an appropriate committee reports a joint resolution pursuant to this section, the resolution shall be accompanied by a committee report specifying the reasons for the committee's action.

"(f) Congressional inaction on, or rejection of, any joint resolution shall not be deemed an expression of approval of the regulation involved. The compliance of the Commission with the requirements of this section, including any determination by the Commission under this section, shall not be subject to judicial review of any kind.

"(g)(1) If a recommended regulation of the Commission does not become effective because of an adjournment of Congress sine die before the expiration of the period specified in subsection (c)(1) of this section, the Commission may resubmit the recommended regulation at the beginning of the next regular session of Congress. The ninety-day period specified in the first sentence of subsection (c)(1) shall begin on the date of such resubmission, and such regulation may only become effective in accordance with this section. The Commission shall not be required to forward such regulation to the Federal Register for publication, if such regulation is identical to the regulation transmitted during the previous session of Congress.

"(2) If a recommended regulation of the Commission is disapproved under this section, the Commission may issue a recommended regulation which relates to the same acts or practices as the disapproved regulation. Such recommended regulation—

"(A) shall be based upon—

"(i) the regulation-making record of the recommended regulation disapproved by the Congress; or

"(ii) such regulation-making record and the record established in supplemental regulation-making proceedings conducted by the Commission, in accordance with section 553 of title 5, United States Code, in any case in which the Commission determines that it is necessary to supplement the existing regulation-making record; and

"(B) may reflect such changes as the Commission considers necessary or appropriate, including such changes as may be appropriate in light of congressional debate and consideration of the joint resolution with respect to the regulation.

"(3) After issuing a recommended regulation under this subsection, the Commission shall transmit such regulation to the Secretary of the Senate and the Clerk of the House of Representatives, in accordance with subsection (b)(1) of this section, and such regulation shall only become effective in accordance with this section.

"(h) The provisions of this subsection, subsections (a) (1) and (3), subsection (e), and subsections (i) through (l) of this section are enacted by Congress—

"(1) as an exercise of the rulemaking power of the Senate and the House of Representatives, respectively, and as such they are deemed a part of the rules of each House, respectively, but applicable only with respect to the procedure to be followed in that House in the case of joint resolutions, and they supersede other rules only to the extent that they are inconsistent therewith; and

"(2) with full recognition of the constitutional right of either House to change the rules (so far as relating to the procedure of that House) at any time, in the same manner and to the same extent as in the case of any other rule of that House.

"(i) Except as provided in subsection (l) of this section, joint resolutions shall, upon introduction or receipt from the other House of Congress, be immediately referred by the presiding officer of the Senate or the House of Representives to the appropriate committee of the Senate or the House of Representatives, as the case may be.

"(j)(1)(A) Except as provided in subparagraph (B) of this paragraph, if the committee to which a joint resolution has been referred does not report such resolution within 30 days of continuous session of Congress after the date of transmittal to the Congress of the recommended regulation to which such joint resolution relates, it shall be in order to move to discharge the committee from further consideration of such resolution.

"(B) If the committee to which a joint resolution transmitted from the other House has been referred does not report such resolution within 30 days after the date of transmittal of such resolution from the other House, it shall be in order so move to

discharge such committee from further consideration of such resolution.

"(2) Any motion to discharge under paragraph (1) of this subsection must be supported is the House in writing by one-fifth of the Members, duly chosen and sworn, and in the Senate may be made by one Senator, and is highly privileged in the House and privileged in the Senate (except that it may not be made after a joint resolution has been reported with respect to the same regulation; and debate thereon shall be limited to not more than one hour, the time to be divided in the House of Representatives equally between those favoring and those opposing the motion to discharge and to be divided in the Senate equally between, and controlled by, the majority leader and the minority leader, or their designees. An amendment to the motion is not in order.

"(k)(1) Except as provided in paragraphs (2) and (3) of this subsection, consideration of a joint resolution shall be in accord with the rules of the Senate and of the House of Representatives, respectively.

"(2) When a committee has reported or has been discharged from further consideration of a joint resolution, or when the companion joint resolution from the other House has been placed on the calendar of the first House, it shall be in order, notwithstanding the provisions of rule XXII of the Standing Rules of the Senate or any other rule of the Senate or the House of Representatives, at any time thereafter (even though a previous motion to the same effect has been disagreed to) to move to proceed to the immediate consideration of either such joint resolution. The motion is highly privileged in the House and privileged in the Senate and is not debatable. An amendment to the motion is not in order.

"(3) Debate on a joint resolution shall be limited to not more than two hours (except that when one House has debated the joint resolution of that House, the companion joint resolution of the other House shall not be debatable), which shall be divided in the House of Representatives equally between those favoring and those opposing the resolution and which shall be divided in the Senate equally between, and controlled by, the majority leader and the minority leader, or their designees. A motion further to limit debate is not in order. An amendment to, or motion to recommit, the joint resolution is not in order. A motion to reconsider shall be in order only on the day on which occurs the vote of adoption of the joint resolution, and shall not be debatable. Any other motions shall be decided without debate.

"(l) If a joint resolution has been ordered reported or discharged from the committee of the House to which it was referred, and that House receives a joint resolution with respect to the same regulation from the other House, the resolution of disapproval of the other House shall be placed on the appropriate calendar of the first House. If, prior to the disposition of a joint resolution of one House, that House receives a joint resolution with respect to the same regulation from the other House, the vote in the first House shall occur on the joint resolution of the other House.".

(d) Section 21 of the Federal Hazardous Substances Act (15 U.S.C. 1276) is amended to read as follows:

"CONGRESSIONAL REVIEW OR REGULATIONS

"SEC. 21. (a) For purposes of this section, the term—

"(1) 'appropriate committee' means either the Committee on Commerce, Science, and Transportation of 0 the Senate or the Committee on Energy and Commerce of the House of Representatives, as the case may be;

"(2) 'Commission' means the Consumer Product Safety Commission;

"(3) 'joint resolution' means a joint resolution the matter after the resolving clause of which is as follows: 'That the Senate and the House of Representatives disapprove the regulation entitled , transmitted to the Congress by the Consumer Product Safety Commission on , 19 .', the blank spaces being filled with the appropriate title of the regulation and the date of transmittal of the regulation to the Congress, respectively; and

"(4) 'regulation' means any regulation promulgated by the Commission under section 2(q)(1) or 3(e); such term does not include any finding by the Secretary that a hazardous substance presents an imminent hazard to the public health under section 2(q)(1) or 3(e)(2).

"(b)(1) Except as provided in subsection (g)(1) of this section, on the day the Commission forwards to the Federal Register for publication a recommended regulation, the Commission shall transmit a copy of such regulation to the Secretary of the Senate and the Clerk of the House of Representatives. The Secretary of the Senate and the Clerk of the House of Representatives are authorized to receive a recommended regulation under this subsection whether the appropriate House is in session, stands in adjournment or is in recess.

"(2) On the day on which the Secretary of the Senate and the Clerk of the House of Representatives receive a recommended regulation, the Secretary and the Clerk shall transmit a copy of such regulation to the appropriate committees.

"(c)(1) Notwithstanding any other provision of law, no recommended regulation may become effective until the expiration of a period of ninety days after the date on which such regulation is received by the Secretary of the Senate and the Clerk of the House of Representatives, except that such regulation may not become effective under this paragraph if within such ninety-day period a joint resolution with respect to such regulation has become law.

"(2) For purposes of this subsection—

"(A) the term 'days' means only days of continuous session of Congress;

"(B) continuity of session is broken only by an adjournment sine die at the end of a Congress; and

"(C) the days on which either House is not in session because of an adjournment or recess to a day certain shall be excluded in the computation of days of continuous session of Congress for the ninety-day period referred to in this subsection if the adjournment is for more than five days.

"(d) Notwithstanding any other provision of law, any regulation subject to this section shall be considered a recommendation of the Commission to the Congress and shall have no force and effect as a regulation unless such regulation has become effective in accordance with this section.

"(e) Whenever an appropriate committee reports a joint resolution pursuant to this section, the resolution shall be accompanied by a committee report specifying the reasons for the committee's action.

"(f) Congressional inaction on, or rejection of, any joint resolution shall not be deemed an expression of approval of the regulation involved. The compliance of the Commission with the requirements of this section, including any determination by the Commission under this section, shall not be subject to judicial review of any kind.

"(g)(1) If a recommended regulation of the Commission does not become effective because of an adjournment of Congress sine die before the expiration of the period specified in subsection (c)(1) of this section, the Commission may resubmit the recommended regulation at the beginning of the next regular session of Congress. The ninety-day period specified in the first sentence of subsection (c)(1) shall begin on the date of such resubmission, and such regulation may only become effective in accordance with this section. The Commission shall not be required to forward such regulation to the Federal Register for publication, if such regulation is identical to the regulation transmitted during the previous session of Congress.

"(2) If a recommended regulation of the Commission is disapproved under this section, the Commission may issue a recommended regulation which relates to the same acts or practices as the disapproved regulation. Such recommended regulation—

"(A) shall be based upon—

"(i) the regulation-making record of the recommended regulation disapproved by the Congress; or

"(ii) such regulation-making record and the record established in supplemental regulation-making proceedings conducted by the Commission, in accordance with section 553 of title 5, United States Code, in any case in which the Commission determines that it is necessary to supplement the existing regulation-making record; and

"(B) may reflect such changes as the Commission considers necessary or appropriate, including such changes as may be appropriate in light of congressional debate and consideration of the joint resolution with respect to the regulation.

"(3) After issuing a recommended regulation under this subsection, the Commission shall transmit such regulation to the Secretary of the Senate and the Clerk of the House of Representatives, in accordance with subsection (b)(1) of this section, and such regulation shall only become effective in accordance with this section.

"(h) The provisions of this subsection, subsections (a) (1) and (3), subsection (e), and subsections (i) through (l) of this section are enacted by Congress—

"(1) as an exercise of the rulemaking power of the Senate and the House of Representatives, respectively, and as such they are deemed a part of the rules of each House, respectively, but applicable only with respect to the procedure to be followed in that House in the case of joint resolutions, and they supersede other rules only to the extent that they are inconsistent therewith; and

"(2) with full recognition of the constitutional right of either House to change the rules (so far as relating to the procedure of that House) at any time, in the same manner and to the same extent as in the case of any other rule of that House.

"(i) Except as provided in subsection (l) of this section, joint resolutions shall, upon introduction or receipt from the other House of Congress, be immediately referred by the presiding officer of the Senate or the House of Representatives to the appropriate committee of the Senate or the House of Representatives, as the case may be.

"(j)(1)(A) Except as provided in subparagraph (B) of this paragraph, if the committee to which a joint resolution has been referred does not report such resolution

within 30 days of continuous session of Congress after the date of transmittal to the Congress of the recommended regulation to which such joint resolution relates, it shall be in order to move to discharge the committee from further consideration of such resolution.

"(B) If the committee to which a joint resolution transmitted from the other House has been referred does not report such resolution within 30 days after the date of transmittal of such resolution from the other House, it shall be in order to move to discharge such committee from further consideration of such resolution.

"(2) Any motion to discharge under paragraph (1) of this subsection must be supported in the House in writing by one-fifth of the Members, duly chosen and sworn, and in the Senate may be made by one Senator, and is highly privileged in the House and privileged in the Senate (except that it may not be made after a joint resolution has been reported with respect to the same regulation); and debate thereon shall be limited to not more than one hour, the time to be divided in the House of Representatives equally between those favoring and those opposing the motion to discharge and to be divided in the Senate equally between, and controlled by, the majority leader and the minority leader, or their designees. An amendment to the motion is not in order.

"(k)(1) Except as provided in paragraphs (2) and (3) of this subsection, consideration of a joint resolution shall be in accord with the rules of the Senate and of the House of Representatives, respectively.

"(2) When a committee has reported or has been discharged from further consideration of a joint resolution, or when the companion joint resolution from the other House has been placed on the calendar of the first House, it shall be in order, notwithstanding the provisions of rule XXII of the Standing Rules of the Senate or any other rule of the Senate or the House of Representatives, at any time thereafter (even though a previous motion to the same effect has been disagreed to) to move to proceed to the immediate consideration of either such joint resolution. The motion is highly privileged in the House and privileged in the Senate and is not debatable. An amendment to the motion is not in order.

"(3) Debate on a joint resolution shall be limited to not more than two hours (except that when one House has debated the joint resolution of that House, the companion joint resolution of the other House shall not be debatable), which shall be divided in the House of Representatives equally between those favoring and those opposing the resolution and which shall be divided in the Senate equally between, and controlled by, the majority leader and the minority leader, or their designees. A motion further to limit debate is not in order. An amendment to, or motion to recommit, the joint resolution is not in order. A motion to reconsider shall be in order only on the day on which occurs the vote of adoption of the joint resolution, and shall not be debatable. Any other motions shall be decided without debate.

"(1) If a joint resolution has been ordered reported or discharged from the committee of the House to which it was referred, and that House receives a joint resolution with respect to the same regulation from the other House, the resolution of disapproval of the other House shall be placed on the appropriate calendar of the first House. If, prior to the disposition of a joint resolution of one House, that House receives a joint resolution with respect to the same regulation from the other House, the vote in the first House shall occur on the joint resolution of the other House.".

FORD AMENDMENT NO. 543

Mr. FORD proposed an amendment to the bill S. 1078, supra; as follows:

On page 16, insert the following immediately after line 2:

REPORT ON PREDATORY PRICING PRACTICES

SEC. 16. (a) The Federal Trade Commission shall submit to the Committee on Commerce, Science, and Transportation of the Senate and to the Committee on Energy and Commerce of the House of Representatives the information specified in subsection (b) of this section every 6 months during each of the fiscal years 1986 and 1987. A report containing such information shall be submitted when the Commission submits its annual report to the Congress during each of such fiscal years, and such report may be included in the annual report. A separate report containing such information shall be submitted 6 months after the date of submission of any such annual report. Each such report shall contain such information for the period since the last submission under this section.

(b) Each such report shall list and describe, with respect to instances in which predatory pricing practices have been suspected or alleged—

(1) each complaint made, orally or in writting, to the offices of the Commission;

(2) each preliminary investigation opened or closed at the Commission;

(3) each formal investigation opened or closed at the Commission;

(4) each recommendation for the issuance of a complaint forwarded by the staff to the Commission;

(5) each complaint issued by the Commission;

(6) each opinion and order entered by the Commission;

(7) each consent agreement accepted provisionally or finally by the Commission;

(8) each request for modification of an outstanding Commission order filed with the Commission;

(9) each recommendation by staff pertaining to a request for modification of an outstanding Commission order; and

(10) each disposition by the Commission of a request for modification of an outstanding Commission order.

Such report shall include copies of all such consent agreements and complaints executed by the Commission referred to in such report. Where a matter has been closed or terminated, the report shall include a statement of the reasons for that disposition. The descriptions required under this subsection shall be as complete as possible but shall not reveal the identity of persons or companies complained about or those subject to investigation that have not otherwise been made public. The report shall include any evaluation by the Commission of the potential impacts of predatory pricing upon businesses (including small businesses).

McCLURE AMENDMENT NO. 544

Mr. McCLURE proposed an amendment to the bill S. 1078, supra; as follows:

On page 2, after line 9, insert the following:

(b) (1) The Federal Trade Commission Act (15 U.S.C. 41 et seq.) is amended by redesignating section 24 and section 25 as section 27 and section 28, respectively, and by inserting after section 23 the following new section:

"SEC. 24 (a) For purposes of this section:

"(1) The term 'professional' means any person who—

"(A) in the performance of his occupation, is subject to licensure or certification under State law; and

"(B) as a prerequisite for such licensure or certification under State law, has (i) received a degree from an accredited institution of higher learning, or (ii) successfully completed a course of specialized training at an accredited education or training facility for health professions personnel operated as an integral part of a hospital.

"(2) The term 'State law' means a statute of a State and a rule or regulation fuly promulgated by a State agency or by a State court of last resort in its capacity as the State authority regulating the admission or licensure of professionals within a State.".

"(b) The Commission shall not use its authority under this Act to prohibit unfair or deceptive acts or practices engaged in by professionals if such use of authority would result in the invalidation of a State law or any part of such law if such law or part establishes—

"(1) training, education, or experience requirements for the licensure of professionals; or

"(2) permissible tasks or duties that professionals may perform based on specialized training or education.".

ANTITRUST DAMAGES

GORTON (AND OTHERS) AMENDMENT NO. 545

(Ordered to be referred to the Committee on the Judiciary.)

Mr. GORTON (for himself, Mr. RUDMAN, Mr. BINGAMAN, Mr. STAFFORD, and Mr. METZENBAUM) submitted an amendment intended to be proposed by them to the bill (S. 1300) to provide for antitrust law violators to be subject to individual responsibility for treble the amount of damages attributable to their violations, and to assure fairness in the allocation and award of antitrust damages; as follows:

At p. 1, strike line 4, and insert in lieu thereof, "the following: Title I".

At p. 1, line 4, before "Sec. 4I(a)" add "SEC. 1. After Section 4H of the Clayton Act, add the following new section:".

At the end of the bill add the following:

"TITLE II

"SEC. 1. Section 4 of the Clayton Act (15 U.S.C. 15) is amended by adding at the end thereof a new section 4(J) to read as follows:

"SEC. 4(J)(a)(1). An action brought by the Attorney General of a State on behalf of the State or a political subdivision thereof, pursuant to section 4 of this Act to secure monetary relief as provided for injury sustained by such State or political subdivision by reason of any violation of section 1 of this title, by the United States pursuant to section 4(A) of this Act for injury sustained by the United States by reason of any violation of section 1 of this title, or by an Attorney General pursuant to Section 4(C) of

this Act, may be maintained when such State, political subdivision, the United States or such natural persons on whose behalf the action is brought has or have purchased indirectly from the defendant: *Provided*, That, nothing in this section shall preclude any existing right of any State, political subdivision, the United States, or an Attorney General on behalf of natural persons, to sue under sections 4, 4(A) or 4(C).

"(2) In any action arising out of indirect purchases by the United States, any State or political subdivision thereof or by any natural person, permitted by paragraph (a)(1) of this section, the court shall award to the United States, State or political subdivision, threefold that amount which constitutes the damage which would have been sustained by any direct purchaser with respect to purchases, directly or indirectly, by the United States, State or political subdivision or natural persons, had the damage not been passed on by the direct purchaser to any other person; *Provided, however*, There shall be excluded from the amount of monetary relief awarded in such action any amount of monetary relief which (1) duplicates amounts which have been awarded for the same injury to another person who has proven, in fact, such injury in a previous action in which the defendant has asserted a defense under section 9(J)(b) against said other person and in which notice has been properly given pursuant to said section, or (2) is properly allocable to any person who purchased directly from the defendant, upon proof, in fact, in such action that the damage was not passed on by such person. The court shall also award to the Attorney General the cost of suit, including a reasonable attorney's fee.

"Section 4(J)(b)(1). In any action brought under section 4 of this Act, the defendant shall be entitled to allege, as a partial or complete defense, that some of all of what would otherwise constitute plaintiff's damages were passed on by plaintiff to any other person and that with respect to such damages an action may be brought by the United States or any Attorney General of a State pursuant to paragraph (a)(1) of this section. The defendant shall set forth, in asserting such defense, with as much particularity as is reasonable, the identity of those to whom the defendant asserts the plaintiff has passed on, directly or indirectly, some or all of plaintiffs damages.

"(2) In the event that a defendant has pleaded the defense permitted by paragraph 1 of this subsection, the plaintiff shall have the burden of proving that all or part of the damages, as the case may be, have not been passed on by the plaintiff.

"(3) In the event that the defendant asserts the defense permitted by paragraph 1 of this subsection, the defendant shall provide written notice, by certified or registered mail, return receipt requested, to any Attorney General who may be entitled to maintain an action against the defendant under paragraph (a)(1) of this section.

"(4) Upon receipt of such notice, the Attorney General of the United States, or of any State, in addition to any other remedy, may, upon motion made within one hundred and twenty (120) days, intervene in such action and shall be joined pursuant to Rule 24 of the Federal Rules of Civil Procedure with respect to any issue arising under paragraph (1) of this subsection."

"(5) In any case in which the defendant has asserted a defense pursuant to this subsection and in which the court awards monetary relief, there shall be excluded from the amount of monetary relief awarded any amount which (1) duplicates amounts which have been awarded for the same injury to another person who has proven, in fact, such injury in a previous action, or (2) is properly allocable to the United States, any state or political subdivision or any natural person based on the application of this subsection to any action."

"SEC. 2. This Act may be cited as "The Taxpayer Antitrust Enforcement Act of 1985.".

ORPHAN DRUG ACT

HATCH AMENDMENT NO. 546

Mr. DOLE (for Mr. HATCH) proposed an amendment to the amendment of the House to the bill (S. 1147) to amend the orphan drug provisions of the Federal Food, Drug, and Cosmetic Act and related laws; as follows:

(1) Strike out section 6(b) of the House Engrossed Amendment and insert in lieu thereof the following:

(b) PUBLIC LAW 93-527.—Section 122(b)(4)(C) of the Developmental Disabilities Assistance and Bill of Rights Act (42 U.S.C. 6022(b)(4)(C)) is amended to read as follows:

"(C) Notwithstanding subparagraph (E)(i), upon application of a State, which under section 133(b)(4)(C) of this Act (as in effect on October 18, 1984) was permitted to make expenditures for services without regard to the requirements of section 133(b)(4)(B) of this Act (as so in effect) the Secretary, pursuant to regulations which the Secretary shall prescribe, may permit a portion of the funds which, pursuant to subparagraph (E)(i), must otherwise be expended under the State plan of such State for service activities in the priority services, to be expended in fiscal years 1985, 1986, and 1987 for the additional services for which expenditure was permitted under section 133(b)(4)(C) (as so in effect) if the Secretary determines that—

"(i) such additional services are not priority services;

"(ii) such additional services are not services for which funds are otherwise available under part C, D, or E; and

"(iii) the expenditures of such State on service activities in the priority services has reasonably met the need for those services in such State in comparison to the extent to which the need for such additional services has been met in such State.".

(2) Redesignate section 7 of the House Engrossed Amendment as section 8.

(3) After section 6 of the House Engrossed Amendment insert the following new section:

SEC. 7. AREA HEALTH EDUCATION CENTERS.

Section 781(a)(2) of the Public Health Service Act (42 U.S.C. 295g-7(a)(2)) is amended by redesignating subparagraphs (A), (B), and (C) as clauses (i), (ii), and (iii) respectively, and by striking out all that precedes clause (i) (as so redesignated) and inserting in lieu thereof the following:

"(2)(A) The Secretary shall enter into contracts with schools of medicine and osteopathy—

"(i) which have previously received Federal financial assistance for an area health education center program under section 802 of the Health Professionals Educational Assistance Act of 1976 in fiscal year 1979 or under paragraph (1), or

"(ii) which are receiving assistance under paragraph (1),

to carry out projects described in subparagraph (B) through area health education centers for which Federal financial assistance was provided under paragraph (1) and which are no longer eligible to receive such assistance.

"(B) Projects for which assistance may be provided under subparagraph (A) are—".

(4) In the second sentence of section 8(b) of the House Engrossed Amendment (as redesignated by clause (2) of this motion), strike out "October 18, 1984" and insert in lieu thereof "October 19, 1984".

(5) At the end of section 8(b) of the House Engrossed Amendment (as redesignated by clause (2) of this motion), add the following new sentence: "The amendments made by section 7 shall take effect October 1, 1984 and shall cease to be in effect after September 30, 1985.".

NOTICES OF HEARINGS

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. ROTH. Mr. President, the Senate Committee on Governmental Affairs will hold a hearing on the nomination of Constance J. Horner to be the Director of the Office of Personnel Management on Tuesday, July 30, at 2 p.m. in SD-342.

For further information, please contact Carol Fox at 224-4751.

COMMITTEE ON RULES AND ADMINISTRATION

Mr. MATHIAS. Mr. President, I wish to announce that the Committee on Rules and Administration will meet on Tuesday, July 30, 1985, at 9:30 a.m., in SR-301, to consider legislative and administrative business currently pending on its agenda, including resolutions to authorize printing, gratuities, and the purchase of wall calendars.

For further information regarding this meeting, please contact Beth Cady of the Rules Committee staff at 224-0287.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

Mr. GORTON. Mr. President, I ask unanimous consent that the Committee on Agriculture, Nutrition, and Forestry be authorized to meet until 12:30 p.m. during the session of the Senate on Thursday, July 25 to mark up S. 616, the farm bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON CIVIL SERVICE

Mr. TRIBLE. Mr. President, I ask unanimous consent that the Subcommittee on Civil Service of the Committee on Governmental Affairs be authorized to meet during the session of the Senate on Thursday, July 25, to hold a hearing on the GAO report on pay equity.

The PRESIDING OFFICER. Without objection, it is so ordered.

SELECT COMMITTEE ON INTELLIGENCE

Mr. TRIBLE. Mr. President, I ask unanimous consent that the Select Committee on Intelligence be authorized to meet in closed session, during the session of the Senate on Thursday, July 25, to hold a hearing on the national intelligence strategy.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. TRIBLE. Mr. President, I ask unanimous consent that the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate on Thursday, July 25, to hold an oversight hearing, to continue consideration of the fundamental problems facing our Nation's electric utility industry.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON LABOR

Mr. TRIBLE. I ask unanimous consent that the Subcommittee on Labor of the Committee on Labor and Human Resources be authorized to meet during the session of the Senate on Thursday, July 25, to hold a hearing on the Supreme Court decision of Garcia against San Antonio Metropolitan Transit Authority, under the Fair Labor Standards Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON INVESTIGATIONS

Mr. TRIBLE. Mr. President, I ask unanimous consent that the Permanent Subcommittee on Investigations of the Committee on Governmental Affairs be authorized to meet during the session of the Senate on Thursday, July 25, to hold an oversight hearing on money laundering in Puerto Rico.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

Mr. HELMS. Mr. President, I ask unanimous consent that the Committee on Agriculture, Nutrition, and Forestry be authorized to meet during the session of the Senate on Thursday, July 25, 1985, between the hours of 3:30 and 5 p.m. to continue the markup on S. 616, the farm bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

STATE AND LOCAL RIVER CONSERVATION EFFORTS

● Mr. DURENBERGER. Mr. President, last week the Subcommittee on Public Lands, Reserved Water and Resource Conservation held an oversight hearing on the National Park System.

The purpose of the hearing was to provide a forum to debate issues and threats facing the National Park System. The Conservation Foundation presented their new report, "National Parks for a New Generation," and Bill Mott, the new Director of the National Park Service, presented his 12 point plan. As a participant in that hearing, I would like to commend and compliment the chairman, Senator WALLOP, for an outstanding hearing.

Two themes came out during the course of the morning. The first is that we are in a transition period in how we manage our natural resources in order to protect and preserve for present and future generations. The second is that it is time to find alternatives to Federal management by encouraging State and local governments as well as the private sector to get involved in resource planning and management.

The second is one that I have advocated for quite a few years now. It is an area that I have personal experience in, as we have an outstanding example in Minnesota of how well local governments and interested persons can manage a local resource. The Mississippi Headwaters Board has an outstanding record in their management of the Upper Mississippi River.

Based on the Minnesota experience, I have introduced legislation, S. 317—the State and Local River Conservation Act of 1985—to encourage State and local governments as well as private citizens to manage their valuable river resources.

The Conservation Foundation just published a wonderful "how-to" book to complement this legislation. "A Citizen's Guide to River Conservation" is designed to encourage and help anyone to organize an effective river conservation program.

Mr. President, it is my intention to move S. 317 this fall. I ask that a commentary by the Conservation Foundation on local river conservation be printed in the RECORD.

The material follows:

LOCAL GROUPS WORK TO SAVE WILD RIVERS

Recent proposals by the Reagan Administration for several significant additions to the national Wild and Scenic Rivers System—like the Manistee in Michigan and the Cache Le Poudre in Colorado—have hartened some conservationists. But recent magazine articles with titles like "Heat on the River," "The Damming of America," and "The Small Hydro Invasion," tell a different story of a deeply troubled program.

The Wild and Scenic Rivers Act was enacted in 1968 with high hopes that by 1990 over 200 rivers would constitute a federally protected system somewhat akin to our national parks. As of today, only 65 rivers have been protected. Most of the "easy" candidates on publicly owned lands are already in the system, and a cumbersome study process coupled with a virtual moratorium on federal land acquisition do not auger well for any significant expansion.

Even in good times, the federal system is likely to protect only the best of the best, even though many other rivers are eligible for inclusion. Rivers of regional reputation—what I call "home waters"—like the Rappahannock in Virginia or the Brandywine in Pennsylvania are unlikely ever to receive federal designation.

But it is on these rivers that the threats are growing daily in a quiet, inexorable way. Some face booming development along their banks. Others are being choked slowly by soil and chemicals running off farmland. Such whittlings may in the long run be just as devastating as losing a nationally known river to dam builders.

The precarious state of many home waters might be a cue for despair among river lovers. But in the absence of federal initiative, state and local governments and grassroots conservation groups are achieving protection by using innovative conservation techniques that the federal government has eschewed. These programs have not taken hold everywhere, to be sure, but they are widespread enough to strike a note of optimism. Among the most promising are:

Private nonprofit conservation action like that taken by the Brandywine Conservancy in Pennsylvania, a land trust that has acquired easements along this scenic river as well as developing a water quality monitoring scheme and local government technical assistance program.

River corridor commissions such as the Mississippi Headwaters Board in Minnesota that rely on cooperative zoning regulations and management by local governments to protect lengthy river segments.

State river conservation programs such as those in Massachusetts and Maine that inventory state rivers and utilize special regulations and financial and technical assistance to promote local protection efforts—instead of state scenic river designation which has met with limited success in other places.

The Wild and Scenic Rivers System will continue as the linchpin in federal efforts to protect the most outstanding rivers in the United States, but greater attention needs to be paid these state and local initiatives. The National Park Service has a small, but important technical assistance program for local governments that deserves continued support, but it has been targeted by budget cutters. The importance of state and local action is also recognized in legislation introduced in Congress by Senator David Durenburger (R., Minn.) that would provide federal seed grants for local river protection programs. Although this bill enjoys bipartisan support, it has been opposed by the Administration. Yet whether the future holds brighter waters will depend in large part on support for innovative state and local river conservation efforts.●

OUTSTANDING FLORIDIANS

● Mr. CHILES. Mr. President, I would like to take this opportunity to recognize nine outstanding citizens from Florida. These fine individuals are the 1985 electees to the Dr. Nan S. Hutchinson Senior Hall of Fame. Founded in 1978, this prestigious award is bestowed upon a select group of Broward County elders. These citizens have proven—through continued service, active involvement, and compassionate devotion—their voluntary dedication to the betterment of the country and her people.

Their names are: Annie Mae Dailey, 72, of Fort Lauderdale; Philip Hale, 77, of Plantation; Lillian Hargan, 72, of

Cooper City; Lynn Hariton, 72, of Tamarac; Ethel Jacobs, 76, of Hollywood; Murray Kirschbaum, 67, of Margate; Irving Mendelson, 67, of Lauderdale Lakes; Morris Sher, 70, of Tamarac; Elliott Shernoff, 68, of Tamarac.

I hope my colleagues will join me in extending appreciation and congratulations for their outstanding service.●

PROPOSED ARMS SALES

● Mr. LUGAR. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $50 million or, in the case of major defense equipment as defined in the act, those in excess of $14 million. Upon such notification, the Congress has 30 calendar days during which the sale may be reviewed. The provision stipulates that, in the Senate, the notification of proposed sales shall be sent to the chairman of the Foreign Relations Committee.

In keeping with the committee's intention to see that such information is immediately available to the full Senate, I ask to have printed in the RECORD at this point the notification which has been received. The classified annex referred to in the covering letter is available to Senators in the office of the Foreign Relations Committee, room SD-423.

The notification follows:

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, DC, July 24, 1985.

In reply refer to: I-03694/85ct.

Hon. RICHARD C. LUGAR,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 85-45 and under separate cover the classified annex thereto. This Transmittal concerns the Department of the Army's proposed Letter of Offer to Korea for defense articles and services estimated to cost $53 million. Shortly after this letter is delivered to your office, we plan to notify the news media of the unclassified portion of this Transmittal.

Sincerely,

PHILIP C. GAST,
Director.

[Transmittal No. 85-45]

NOTICE OF PROPOSED ISSUANCE OF LETTER OF OFFER PURSUANT TO SECTION 36(b) OF THE ARMS EXPORT CONTROL ACT

(i) Prospective Purchaser: Korea.

(ii) Total Estimated Value:

	Million
Major Defense Equipment [1]	0
Other	$53
Total	53

[1] As defined in section 47(6) of the Arms Export Control Act.

(iii) Description of articles or services offered: Modification kits for 28 Battery Sets of the HAWK Product Improvement Program (PIP) PHASE II, concurrent spare parts, training and services to install the kits.

(iv) Military department: Army (XUM).

(v) Sales commission, fee, etc., paid, offered, or agreed to be paid: None.

(vi) Sensitivity of technology contained in the defense articles or defense services proposed to be sold: See Annex under separate cover.

(vii) Section 28 report: Included in report for quarter ending 31 March 1985.

(viii) Date report delivered to Congress: July 24, 1985.

POLICY JUSTIFICATION

KOREA—MODIFICATION KITS

The Government of Korea has requested the purchase of modification kits for 28 Battery Sets of the HAWK Product Improvement Program (PIP) PHASE II, concurrent spare parts, training, and services to install the kits. The estimated cost is $53 million.

This sale will contribute to the foreign policy objectives of the United States by helping to improve the security of a key friendly country in Eastern Asia. The sale of this equipment and support will enhance deterrence and contribute to the preservation of peace and stability on the Korean peninsula.

The product improvement program modification kits proposed in this sale will upgrade the I-HAWK batteries used in the Republic of Korea (ROK) for air defense. Since the North Korean Air Force enjoys more than a 2:1 numerical advantage in combat aircraft, this sale is vital to offset this quantitative disadvantage.

The sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor will be the Raytheon Corporation of Andover, Massachusetts.

Implementation of this sale will not require the assignment of any additional U.S. Government personnel; however, 25 contractor representatives will be required for 24 months in Korea.

There will be no adverse impact on U.S. defense readiness as a result of this sale.●

THE LINE-ITEM VETO

● Mr. LEVIN. Mr. President, the most difficult challenge which sometimes confronts us in the Congress is to avoid focusing our attention on and relying on superficially attractive solutions which really serve to distract us from addressing the more fundamental issue at hand. This is the case with S. 43, the line-item veto legislation.

Under this legislation, each "item" of any appropriation bill would be enrolled as a separate bill and sent to the President for his signature. The legislation defines "item" as any and all paragraphs and numbered sections contained in appropriations bills. There is a sunset provision in this legislation under which the line-item veto authority would expire in 2 years unless specifically renewed by Congress.

The line-item veto has been praised as an important step in bringing spending under control. It has been condemned as a significant shift in the balance of power from the legislative branch to the executive branch. I, very much doubt that it is the former, and recognize its potential for being the latter. But most of all, it is simply a distraction.

As for its impact on restraining spending, it is interesting to note the comments of OMB Director, David Stockman, who when asked about its effect on the Federal deficit responded by saying, "marginal, if at all." Similarly, in this year's Annual Report of the President's Council on Economic Advisers, the following comment on the line-item veto appeared:

> Approval of a line item veto may not have a substantial effect on total federal expenditure. The experience of the states indicates that per capita spending is somewhat higher in states where the governor has the authority to line item veto, even when corrected for the major conditions that affect the distribution of spending among the states.

In addition, as a practical matter in the near term, the line-item veto would only apply to a small percentage of the budget. President Reagan has clearly indicated that he believes that the focus of spending restraint should be on domestic spending. Only 11 percent of the Federal budget falls into the category of discretionary domestic spending, which would be subject to the line-item veto. If the President used this line-item veto authority to cut this spending by 50 percent, the deficit would still be over $160 billion.

Some might argue that in spite of the "marginal," to use Mr. Stockman's word, impact which the line-item veto would have on the Federal deficit, we should try it because "every little bit helps." That argument only has merit, however, if the little bit of help is not outweighed by negative side effects. I believe that the negative side effects of the line-item veto could easily outweigh any marginal positive effect.

The line-item veto threatens a significant shift in the balance of power from the legislative branch to the executive branch. Right now, in the process of practical legislating, Members of Congress are presented with bills which frequently have some elements in them which they like and some which they oppose. When asked to vote on a bill, they have to balance the pros and cons. Under current law, the President must do exactly the same analysis in deciding when to sign a bill. With the line-item veto, the President would be put in a preferred position in the legislative process. He, alone, would not have to compromise. He, alone, could pick and choose what would be enacted into law.

Furthermore, the President would be in a much better position to isolate the particular concerns of a Member of Congress and use his potential veto as leverage with that member on other issues of importance to the President. In fact, some of those Presidential interests may require a net increase in spending. The President could exercise

this line-item veto with much greater confidence that his veto would be sustained because the provision he is vetoing may relate primarily to only one State or one region. Let me make clear that I am not personalizing this concern. I am not arguing that President Reagan would use this new power unfairly as leverage. But it is naive to think that having granted this power to the Presidency, it would never be used in such a manner.

The proponents of this legislation respond to this concern by noting in the committee report that "Congress in passing the original bill may combine into single sections any of a number of disparate parts and in fact could enact a lengthy and complex measure in one numbered section or one unnumbered paragraph comprising the entire bill." A strange response, isn't it? What the proponents seem to be saying is "Don't worry about a shift of power from the legislative branch to the executive branch—Congress can easily circumvent the new power given to the President.

The proponents of this legislation cannot have it both ways. Either this line-item veto is a significant new power granted to the President—in which case it is inconsistent with the constitutional structure of coequal branches of Government, or this line-item veto is a power with the force of paper mache—in which case what is the point of it all?

Unfortunately, the effect of it all may be to distract our attention from the real issue at hand, which is substantive deficit reduction. The danger is that Members of Congress and the President may say, "Well, we missed our original deficit reduction targets, but things may yet come under control because there is now a line-item veto."

If the proponents of the line-item veto are correct in arguing that any constitutional concerns are mitigated by the fact that this new Presidential power can be circumvented by clever legislative drafting, then how much, if anything, has this new power added to the goal of deficit reduction? A time when meaningful action is required is not a time for the passage of measures which may only serve to mask inaction. The line-item veto may do too much violence to our constitutional framework, or may actually prove counterproductive to deficit reduction. Neither are goals which Congress should seek to achieve, and for that reason I oppose this legislation.●

CONGRESSMAN STEVE SOLARZ: A LEADING DEMOCRATIC VOICE FOR MEANINGFUL ARMS CONTROL

● Mr. HART. Over the Independence Day recess, I went to Geneva as a member of the arms control talks observer team. I regret to say that we seem to be very far from an agreement and the goals we hope to achieve.

The history of arms control negotiations has shown us that if the United States and the Soviet Union hope to forge a successful arms control agreement, each side must be willing to engage in compromise, and to make equitable concessions in areas of particular concern to the other. In this case, however, we are facing a fundamentally new stumbling block: One side wants to change developments of the past the other wants to avert developments of the future. In this instance, the United States seeks substantial reductions in long-range Soviet offensive weapons, and the Soviet Union wants the United States to terminate the Star Wars Program.

Unless both sides begin demonstrating some flexibility, it is evident that the current round of negotiations will be doomed to failure. And the Geneva talks will become nothing more than a dangerous prelude to an escalation of the arms race both on Earth and in the heavens.

Mr. President, the Baltimore Sun recently published an important and insightful statement on the arms control process, and the prospects for meaningful reductions in offensive nuclear weapons. The author is Congressman STEVE SOLARZ, a senior member of the House Foreign Affairs Committee, and a leading voice in the Democratic Party on arms control issues.

Congressman SOLARZ returned from Moscow recently, where he met with Col. Gen. Nickolai F. Chervov, the arms control chief for the Soviet General Staff. Based on his experiences in the Soviet Union, and my observations in Geneva, the Congressman and I came to the conclusion that a new approach was needed to restore some hope for progress in the arms control negotiating process. We believe that such an approach must include a commitment by the Soviet Union to reduce sharply its arsenal of offensive strategic weapons. Under this circumstance, the United States would agree to restrictions on the development of star wars defenses. This formula, we believe, represents a reasonable framework for an arms control agreement in the interests of both nations.

Earlier this month, Mr. SOLARZ and I introduced concurrent resolutions which embody this negotiating framework. Congressman SOLARZ, however, has gone one step further and has established a compelling case for the adoption of our legislation in his Baltimore Sun article. His statement describes not only the resolution but the conversations he had in Moscow which led him to conclude that a new step was required to break the deadlock.

Mr. SOLARZ, a prodigious writer and legislator, has written an extremely effective piece. I ask, Mr. President, that the full text of his article appear in the RECORD.

The article follows:

[From the Baltimore Sun, July 22, 1985]

ARMS CONTROL: NEW TRADEOFFS MAY BE POSSIBLE

(By Stephen J. Solarz)

Now that the second round of arms control talks in Geneva has concluded without any progress whatsoever, it is becoming increasingly clear that a new approach will be needed to break the deadlock in these critical negotiations. If the arms control process is to succeed, we will have to put forward proposals that are not based on a demand for unilateral concessions or the desire for unconditional surrender, but that protect the security and self-interest of both sides. The Soviets, after all, are no more likely to make one-sided concessions to us than we are to them.

The best opportunity to achieve an arms control agreement lies in a trade-off involving significant reductions in the number of offensive nuclear weapons and restrictions on the development, testing and deployment of defensive systems, known as "Star Wars."

Recently, Senator Gary Hart and I introduced a resolution in Congress advancing this concept of a trade-off between offensive weapons and defensive systems.

The resolution should provide a useful focus for our country's debate over Star Wars. It will help to set the stage for an expression of congressional opinion on the arms control talks. And it can contribute to a change in the American negotiating posture which is a necessary, if not sufficient, condition for a breakthrough in these vital negotiations.

Unless we are prepared to link the two overriding arms control issues of offensive weapons and defensive systems, which we have so far been unwilling to do, there will be no possibility of a meaningful agreement in the Geneva negotiations. Without a willingness to forego development, testing and deployment of Star Wars, the arms control process will be doomed to failure and the stage will be set for a tragic escalation of the arms race in space and on earth.

An American decision to proceed with an unrestrained Star Wars program would simply result in an unrestrained Soviet effort to develop more offensive weapons to overwhelm our potential defenses. Rather than having increased our own security, we would have increased the arms race. Instead of bringing the arms race under control, we would have helped to set in motion a dangerously destabilizing and extraordinarily expensive new competition to offensive weapons and defensive systems.

Our resolution does not call for a ban on research into Star Wars. It is simply not realistic for the Soviet Union to insist, as they have, on prohibitions on research into strategic defensive systems as a condition for an agreement on offensive nuclear weapons. The Soviets have long been engaged in a significant Star Wars research program of their own, and they are well aware there is no way such a ban could be verified.

If the Soviet Union continues to demand a prohibition on research into Star Wars defensive systems, knowing that such a ban is neither feasible nor verifiable, it will be clear that the Soviets have no interest in pursuing a meaningful arms control agreement.

Over the last several weeks, however, we have seen intriguing and potentially impor-

tant signs of Soviet flexibility on arms control issues.

Earlier this month, I met in Moscow with Col. Gen. Nikola F. Chervov, the arms control chief for the Soviet General Staff. General Chervov took a more flexible position than the standard Soviet line on several key questions.

He said that the Soviet offer to cut strategic nuclear forces by 25 percent included warheads as well as missiles. He also indicated that the Soviet demand for a prohibition on Star Wars research did not encompass work in laboratories, but was only intended to preclude the production of prototypes and the testing of technologies emanating from them.

Unless and until General Chervov's statements are embodied in the official Soviet position in Geneva. It remains to be seen whether his comments constitute a significant change in the Soviet stance or merely an exercise in propaganda. But if the general's statements are utlimately reflected in a new Soviet proposal, it would indeed represent a significant step forward.

Restrictions on development, testing and deployment of defensive systems are verifiable and desirable and should be sufficient to satisfy the expressed Soviet concerns, which our country should share, in preventing the development of defensive systems that could be destabilizing.

There are some who argue that because the conduct of the Geneva negotiations is the responsibility of the executive branch, Congress has no meaningful role to play in the arms control process. But for those of us who believe the administration's present posture is a formula for failure and a prescription for paralysis in the arms control talks, our resolution represents an essential effort to begin the process of formulating a more realistic and viable American negotiating position at Geneva.

The resolution Senator Hart and I have introduced is realistic and responsible.

It offers a realistic opportunity for agreement as it allows each side to accomplish its main objective: for the United States, reductions of offensive strategic weapons; for the Soviet Union, restrictions on the development of "Star Wars" defenses.

It is a responsible approach because it prescribes a pattern of mutual and verifiable reductions and restrictions that add up to meaningful arms control.

Over two decades ago, President Kennedy warned that unless we end the nuclear arms race, sooner or later the arms race will end us. Since that time, the Soviet Union and the United States have added to their respective nuclear arsenals at a frightening pace. The current arms control negotiations represent what may be the last best chance to bring the nuclear arms race under control. Whether or not we succeed in that effort will depend on the willingness of the United States and the Soviet Union to come forward with new and more realistic approaches at Geneva.

MICHIGAN'S OLDEST SYNAGOGUE

● Mr. LEVIN. Mr. President, on the weekend of August 2-4, people from all over Michigan—and well beyond—will gather in a modest house of worship in Traverse City to celebrate a remarkable occasion, the 100th anniversary of the oldest synagogue in continuous use in Michigan. It is the synagogue of Congregation Beth El, which was established by immigrants from Russia and Poland in the 1860's and 1870's. These immigrants in most cases were refugees from oppression in their native lands. It was not easy to be a Jew in those lands 100 years ago. Nor was it easy to come to a strange country, and especially to a relatively undeveloped part of the country, a veritable frontier, where comforts were few, and fellow Jews were even fewer. But these newcomers exulted in the freedom they found in America, inhaling deeply the exhilirating freshness of democracy and tolerance. At the same time, they preserved their faith, their commitment to the religious values of their ancestors. Even before they built a synagogue they came together, few and far between, on the Jewish holy days, to keep alive their ancient worship. Indeed, they made the most of their newfound opportunity to both practice their Judaism fully and openly, and to be active, contributing citizens of their adopted country. Often these actions went hand in hand. In 1884, for example, Congregation Beth El—still without a synagogue—bought land for a cemetery. Part of that land the congregation later donated to the city, for its own burial ground. And in 1885, coincidentally, both Traverse City and Congregation Beth El became incorporated, each thus sinking roots that later often intertwined, as both grew, congregation and community, flowering in fellowship. That fellowship was wonderfully symbolized at the very outset by the fact that the land on which the congregation built its now-historic synagogue, was donated to it by Perry Hannah, a non-Jewish lumber magnate.

Today, a century later, the shared experience of Traverse City and Congregation Beth El represents what is truly great about America: Freedom and opportunity, tolerance and cooperation, the chance to be what you are, to make the most of your talents, to join with your neighbors in building a new world—not just for yourself, but for your children and their children. There are hundreds of communities across this country with congregations like Beth El. We all have them in our home States. We all can imagine the joy the pioneers in those communities felt when they dedicated their first synagogue, their first church, their first school or town hall or firehouse. And we can all share today the pride and satisfaction that the descendants of those pioneers feel as they observe the landmark anniversaries that represent the fruit of their ancestors' commitment and hard work.

In Traverse City, on the upcoming centennial weekend, the entire community will be joining the members of Congregation Beth El to celebrate a dream come true—the dream of a handful of immigrants 100 years ago to establish, in the words of the congregation's president, Judith Carnick, "a Jewish community in the lifeblood of a small midwestern town." Today, that Jewish community remains small—only 25 member families. Yet the congregation maintains a religious school for children 5 to 18 years old, provides bar and bat mitzvah instruction, offers adult education courses, conducts a range of holy day services, maintains facilities for Jewish life—cycle rituals, offers counseling and guidance according to Jewish tenets, and participates in community interfaith programs. And the congregation serves not only its own members but also the growing number of vacationers in its area, and students at nearby schools.

In sum, Mr. President, Congregation Beth El has a lot to be proud of as it celebrates its 100th anniversary. And as its members celebrate what they and their ancestors have accomplished, they will be reaffirming the great potential that this Nation continues to offer its citizens, and holds out for future generations. That commitment—again in the words of Judith Carnick—is "that all Americans have the opportunity to pursue their own religious beliefs, and contribute to the community in which they live."

To that, Mr. President, we all can say "amen."⊖

PRODUCTIVITY FIGURES: A BAD OMEN FOR THE FUTURE

● Mr. BAUCUS. Mr. President, the Bureau of Labor Statistics today issued the latest figures on productivity growth in the United States. They were nothing to celebrate.

Nonfarm business productivity grew an anemic 0.5 percent during the second quarter of this year. This does not even come close to compensating for the 3.1-percent decline during the first quarter. Let there be no confusion, productivity has actually been falling the first half of 1985.

This trend is ominous for our future. And make no mistake, trend is the right word. This year's figures are not a single aberration in an otherwise healthy progression. Our rate of productivity growth has been heading in the wrong direction.

Between 1948 and 1967, productivity in the United States grew at an average of more than 3 percent per year. That growth rate fell to just over 2 percent between 1967 and 1973. It then plummeted to less than 1 percent for the duration of the 1970's.

These figures tell us two important things: That the administration's economic policies have not worked; that we, in the United States, face a major problem.

In 1981, President Reagan said his program would "revive our lagging productivity" and "restore our competitiveness in world markets." It is an understatement to say he has failed.

Our trade deficit grows by leaps and bounds. While productivity always turns up during every recovery, the current recovery ranks dead last in productivity growth compared to all postwar recoveries.

The productivity statistics tell us two things: that the President's economic policies have not worked and that we, in the United States, face a major problem.

THE IMPORTANCE OF PRODUCTIVITY GROWTH

What is the problem?

Productivity is not just a statistical artifact. Productivity growth is the engine that drives our living standards.

It is productivity growth—increases in output per worker—that leads to increases in real income. Unless we can reaccelerate productivity, nothing else we do—lowering inflation, cutting the deficit, bringing down the dollar, or reducing unemployment—will guarantee us a rising standard of living.

Every generation of Americans has sought to pass on to the next a brighter economic future and a higher standard of living. Our parents did it for us. If we are to do the same for our children, we must restart the engine of productivity growth.

CONCLUSION: WHAT NEXT?

This administration's policies have failed. Yet the President persists in wearing rose-colored glasses. What will it take to wake him up? If the administration will not act, we, in the Congress, may have to step into the breach.

We have a big job to do in this country to restore healthy balanced growth and competitiveness. We must bring down the deficit. We must try a thousand small things and experiments to restore our productivity growth. We must try new styles of labor-management arrangements. We must improve the education and preparation of our work force. We must be sure our tax laws are consistent with our efforts.

Mr. President, I call today's figures to the attention of my colleagues because they should be kept in mind when we consider legislation. We act against the background of dismal productivity growth; we must act to turn it around.●

HISTORY OF AGRICULTURE IN CALIFORNIA

● Mr. WILSON. Mr. President, nearly 150 years ago, luckless miners wandered out of the hills of California's gold rush country to discover that the real riches came not from what was buried in the soil but from the soil itself. These rugged pioneers began clearing small plots of fertile valley land and grazing cattle in foothill pastures in an attempt to build a strong future for themselves and their families.

Today these modest farms and ranches have grown into a multibillion-dollar industry that provides food and fiber to the Nation and the world. This is an industry that has evolved from simple farms to the most sophisticated, diverse, and productive agricultural region in the world.

Mr. President, this is California agribusiness.

California's rise to agricultural prominence is the result of natural good fortune as well as human industry. Geographically, the State has been blessed with a Mediterranean climate that provides long, warm growing seasons and mild winters. This moderate climate allows an enormous variety of crops to flourish in a relatively small area.

Major mountain ranges provide the snow that forms the basis for the State's massive irrigation needs. These mountains further moderate the weather and produce the rich alluvial soil that has made the Central Valley the State's most productive agricultural region.

Perhaps the key element of the State's agricultural success has been the tenacity and drive of the individual farmer, coupled with a successful partnership with big business and Government. All three have worked together to enhance the State's natural assets and develop efficient and effective means of production and distribution.

One of the earliest alliances was formed to supply a rapidly growing demand for water. By the beginning of the century, the increase in the variety and number of new crops made irrigation a vital necessity. Power companies built hydroelectric plants and developed an extensive rural electrification program that allowed farmers to pump water whenever it was needed.

In addition, production demands quickly depleted individual ground water supplies. To meet this new demand, individuals and the Government worked together to develop and build a network of dams and canals that became one of the most extensive and sophisticated irrigation systems in the world.

This constant demand for water also created a new industry to supply the technology and equipment needed to make the system as efficient as possible. Companies which started as small family concerns have grown to multinational corporations to meet the irrigation needs of the world.

Increased production created demands for a more efficient distribution system. Again, agriculture and industry worked together to form a mutually beneficial alliance. By the late 1800's the railroads had criss-crossed the State's agricultural regions and special refrigerator cars were developed to transport fresh produce to the Eastern States.

As demand for California farm products increased, so did the need for more extensive transportation systems. A handful of private entrepreneurs began meeting this need with a few small trucks, the results of this effort being that today thousands of trucks move California farm products to every corner of the Nation.

With demand for increased quantities of California farm products came the public's demand for increased quality. In response to these demands, California farmers found a partnership with education and private industry in the search of superior products. The University of California had developed and maintains a strong reputation as a leader in scientific agricultural research and development, including the Davis campus, which is at the leading edge of technological advancements in every aspect of agribusiness. From theory to harvest, advancements pioneered by the University of California system have strongly influenced the course of agricultural production throughout the world.

From the reduction of harmful pests to improved packaging, California agriculture has helped spawn and build a multitude of industries dedicated to meeting the ever changing needs of agribusiness. The success of these agricultural related industries is again based on their ability to work closely with California farmers.

As California agribusiness has become larger and more sophisticated, so has its financial needs. To meet these very special needs, some of the Nation's leading public and private financial institutions have taken an active role in maintaining the economic stability of local agribusiness. As with so many other industries, bankers have formed a strong partnership with California farmers to insure that farmers will be able to prosper in the good years and survive the bad. This relationship has helped build one of the most comprehensive banking networks in the Nation.

To compete successfully abroad in an increasingly competitive national and world market, California farmers have worked together to develop some of the largest and most sophisticated agricultural cooperatives in the Nation. As the marketing arm of California agribusiness, these groups are constantly searching out new markets for their products. Informing, convincing, and improving the image of California farm products both in this Nation and abroad, California cooperatives are competing successfully not only with foreign growers but also foreign governments.

Mr. President, the California farmer has come a long way from the frustrated miner who threw down his gold pan and picked up a plow. Today's California farmer has to be part tractor mechanic, part scientist, part banker, and part multinational corporation executive. But there is one thing that has not changed—he is still a survivor. Like his predecessors, today's California farmer is committed to the land and to what he does best—producing some of the finest farm products in the world.

Mr. President, in an effort to portray the history and success of California agriculture, the Tulare County Fair has developed and constructed a special display. It is with great pride and pleasure that I have the opportunity to share this exhibit with Washington, DC, before its premier this fall at the Tulare County Fair in California. The display consists of 20 beautifully crafted, hand-painted murals which span 80 feet in length and tell a unique and miraculous story. The exhibit itself begins with a western geographical and biological development in the 20th century. The mural will be on display this week in the Senate Russell rotunda. As one who has viewed this exhibit, I can assure you it is a spectacular sight and I urge my colleagues and their staff to view the "History of Agriculture in California" mural.●

FOREIGN STUDENTS

● Mr. SIMON. Mr. President, Edward B. Fiske had an article about foreign students in the New York Times the other day that merits careful consideration by Congress.

In it, he points out that there are 50,000 foreign students in the Soviet Union who are there as guests of the Soviet Government.

While we have more foreign students in the United States, we have only 7,500 who are here on U.S. Government scholarships.

What is happening is that the Soviets are appealing increasingly to the young people who want to change their society, rather than those who are satisified with the status quo. We tend to appeal to students who are wealthier and who are satisfied with the status quo.

The Kissinger Commission recommended changes; AID recognizes the need; and Charles Wick, who heads the U.S. Information Agency, has been providing excellent leadership in this area.

But what we have done has not been enough. We ought to be dramatically increasing these scholarships.

I will, from time to time, have amendments to do that.

I ask that the Edward B. Fiske article be printed in the RECORD at this point.

FOREIGN STUDENTS MUST PAY THE FREIGHT

(By Edward B. Fiske)

At the Patrice Lumumba People's Friendship University on the outskirts of Moscow, 5,000 students from 105 countries study alongside young Russians training for positions as third-world advisers. The non-Russians are among an estimated 50,000 foreign students in the Soviet Union, most of them from developing countries and virtually all on Soviet Government scholarships.

American colleges and universities have far more foreign students—340,000 of them—but they are a different lot. Only 7,500 are here on United States Government scholarships. The rest are supported by their families, home governments or private scholarships. "Even those from developing countries tend to come from relatively affluent families," said Elinor Barber, director of reseach for the Institute of International Education.

Since the education of foreign students is supposed to be, among other things, a means of building good will and extending American influence, these statistics are attracting attention in Washington.

According to a recent United States Information Agency study, current policies bring members of "ruling elites" who are "not necessarily representative of the forces of change in their native countries."

Steps are being taken to open things up. Following a recommendation of the Kissinger Commission, the Agency for International Development recently announced a new program that will bring 1,200 undergraduates from Central America to this country this fall. The number will in time reach 10,000 a year.

Legislation has been introduced in both the House and the Senate that would open this program to "financially deserving and academically promising students" from other developing countries.

According to the House majority leader, Jim Wright, a principal sponsor of the so-called U.S. Scholarship Program for Developing Countries Act, this would spur economic development and stability and broaden America's "base of popular support" in the third world.

"By targeting low-income students in developing countries," he said, "the program we propose will send the world a clear message—America is a friend not just of the economically well-off, but of those who come from poor families."

CUTTING RED TAPE

College officials are worrying about the heavy paperwork required by the Immigration and Naturalization Service regarding students who want to study here.

The problem goes back to the Iranian hostage crisis of 1979-1980, when immigration officals were embarrassed to admit to Congress that they did not know the whereabouts of many of the 51,000 Iranian students in this country at the time. Red faces gave way to red tape, as the service imposed new regulations. For example, colleges must now complete elaborate official forms every time a foreign student seeks to change his or her academic program.

The National Association for Foreign Student Affairs is campaigning to roll back some of the requirements on the grounds that many are unnecessary and improperly involve immigration officers in educational decisions.

"We did a survey of 35 universities and found that they are now spending an average of $44,000 apiece, or one-third of their foreign student budgets, on compliance," said Marvin J. Baron, outgoing president of the organization. "For the country as a whole, this means $50 million that could be spent on substantive programs."

GOING WHERE THE STUDENTS ARE

Some universities are leapfrogging the problems of bringing foreign students to this country by sending their teachers to the students. On the initiative of the Malaysian Government, several land-grant universities in the Middle West have formed a consortium to send 18 American faculty members to set up a college in Shah Alam, west of Kuala Lumpur. It will provide two years of general education to 2,400 Malaysians, who will complete the last two years of their education at various American colleges. The new program begins this week with the first 554 students.●

THE CHILDREN'S MUSEUM OF INDIANAPOLIS

● Mr. QUAYLE. Mr. President, should any of our colleagues or friends find themselves in Indianapolis with some spare time, I would like to let them know about a unique museum I hope they will take the time to visit. The Children's Museum of Indianapolis has the largest collection of any children's museum in this country, and is visited by more than 1.3 million people a year. It is a true delight, and the museum is successful in combining learning and fun. Recently the Wall Street Journal ran an article about the Indianapolis Children's Museum that describes several of the exhibits and shows at the museum. I am certain that after you read the article, you will find yourself planning a trip to the Indianapolis Children's Museum, with or without children.

Mr. President, at this point, I submit the attached article for the RECORD, and I encourage everyone to visit the Indianapolis Children's Museum.

The article follows:

HOOSIER TOTS PLAY AND LEARN IN THEIR OWN MUSEUM

(By Meg Cox)

INDIANAPOLIS.—When the Children's Museum of Indianapolis opened in 1925 without a collection of anything, grade-school kids were urged to go home and root around in the attic for displayable memorabilia. The fledgling museum's curator later followed housewreckers around town to unearth relics, and the most popular exhibits included an embalmed monkey and a two-headed calf.

Today, the Indianapolis museum has the largest collection of any children's museum in the country, even before counting a recent donation of 50,000 international folk toys. More than 1.3 million visitors a year come to the modern brick building that the museum is outgrowing after less than 10 years. The museum's leaders also like to think they run the best children's museum in the country. It doesn't matter whether they are right: The place is a marvel.

"We want kids to know that learning is more than someone else's words in a book," says Peter Sterling, the museum's director. "We don't want them just to know who Ein-

stein is, but to think: 'Hey. I could be a scientist.' "

Many museums slanted to children emphasize participation and "please touch" displays and don't have many traditional artifacts: Indianapolis has 130,000 objects, including dinosaur skeletons, American Indian artifacts, a popular Egyptian mummy, and the biggest toy train collection in captivity. Mr. Sterling argues that the "creative play" theme of some children's museums is limiting, and he likens them to "a big sandbox where kids just play aimlessly." What makes his institution special is the sophisticated and consistent attempt to combine fun and learning.

The best way to see this is to take a peek at an unusual and ambitious exhibition set to open here June 29, Called "Mysteries in History," the exhibit uses artifacts from several centuries of Indiana history, computers and constumed human "interpreters" to show kids how people figure out what the past was like.

Entering the gallery, children will find themselves at an archeological dig, where they will be invited to excavate on hands and knees for beads, jug handles and other "clues." There will be a guide there to explain the process, plus two computer stations that will simulate digging. Merely by touching grids on the screen, kids will expose layers of objects, and then they will be asked to choose from a list of possible conclusions, such as "There was a fireplace here."

Next, children will walk under an arch into the past, and see that the 1750 building they've been trying to decipher was a French fur trading post. A museum volunteer in period dress will greet them in French, then, in English, will explain barter.

Other exhibits in the enormous room similarly lead from artifacts into full-blown historical sets, with costumes, props and human actors. In a present-day attic, a guide will read from a diary written in the 1840s, and pass out bonnets and shawls for the kids to act out the family scene described. Under the nearby arch, kids can then wander through an Indiana log cabin and see a young girl writing the diary. They can also try a computer program that gives them $400 to load a covered wagon for the journey west: Should they forget to buy rope at the general store, they'll be in big trouble later if they get stuck in a stream.

At the last stop, dealing with oral history, "We're trying to say to kids that living people are a source of history, and they should ask questions," says Mr. Sterling, the director. Circulating storytellers will pass on legends to the kids, and they can pick up telephones at five glassed-in "time capsule" booths and hear a person describe life during the Depression, or soldiering in Vietnam. Authenticity will be added by pumped in manufactured smells: A 1930s kitchen scene will reek of apple pie.

But "Mysteries in History" fills just one of eight galleries on the five floors of the Childern's Museum of Indanapolis, which include forays into Eskimo and American Indian life, geology, and natural history (with flashlight-guided cave tours). The cherry-red Indianapolis 500 retired race car on the fourth level is a favorite stop to take behind-the-wheel family pictures, on the way to the tuneful turn-of-the-century carousel, where there's always a line for rides.

The museum's staff of 180, helped by more than 500 volunteers, ran an exhaustive 3,000 programs last year, providing so much to do that some children spend as many as 100 days a year there. An 18-foot totem pole just went up on the grounds. It was designed and carved over three months by swarms of kids led by a woodworker from Alaska. In a month long music program coordinated with local schools this spring, 200 students built their own instruments, wrote music, met professional musicians, and made music, as part of a living exhibit in the museum.

Little tots under seven in the Playscape gallery recently memorized their addresses and phone numbers, and adults were offered a Friday lunch-hour introduction to computers called "Take a Byte."

On a recent Saturday morning, the Science Spectrum gallery buzzed with giddy children spinning around in circles on platters in the "angular momentum" exhibit. They also learned about fulcrums by walking across a long wooden board till it came crashing down from their own weight. A 12-year-old junior volunteer, Matt Wright, showed other children how to look through a microscope to observe the shapes of crystals. "I want to be a chemist," he told visitors. "Science Spectrum was always my favorite room."

In the museum's basement, curators are already preparing for the next big show: a 1986 display of the folk-art toys donated by Theresa and Frank Caplan, cofounders of Creative Playthings Inc. A linear mile of steel shelving is slowly being filled as 30 giant crates disgorge 50,000 toys, masks, dolls and puppets. The two people hired just for this task won't finish unpacking until September. When it opens, the new Caplan gallery will probably include "interactive video" technology, says John Vanausdall, the museum's computer expert. "If a mask is too delicate to handle, you can type in its number and a videodisk will show an African ritual in progress using the mask," he says.

Despite its growing sophistication, the Indianapolis museum remains a warm, accessible place that kids feel belongs to them. When a turtle was recently "kidnapped" from an outdoor exhibit and held for ransom by neighborhood children, their peers quickly raised the money and returned the turtle to its home. And then there was the child who wrote to the staff: "I like the mummy best. Will you do me a favor? Keep an eye on that mummy and let me know if anything strange happens."●

UNITED STATES-JAPAN: SAVINGS, TAX AND TIME HORIZONS

● Mr. BAUCUS. Mr. President, this morning's Wall Street Journal carried a story about the contrasting savings rates in the United States and Japan.

The story focused in a way that cold statistics often do not on several very real problems: our savings rate and our focus on the short term.

SAVINGS

Our low national savings is not a moral problem—it's an economic one. Funds for investment must come from savings. If the government runs a huge deficit—which economists call dissaving—and citizens do not save, there are inadequate resources for investment. And it is investment that builds future economic growth.

What can we do? We in the Congress look at the dismal savings rate in this country, at the high savings rate in Japan, at other contrasting economic indicators, and our immediate reaction is to ask what we can do to increase U.S. savings. We are given pause, however, when we look at historical statistics. The personal savings rate in the United States has remained almost unchanged for as long as statistics have been collected.

Perhaps we have used the wrong policy tools when we have tried to change savings behavior. The Finance Committee has received some testimony that "carrots" to encourage savings haven't worked—and that they won't work without "sticks" to discourage consumption. Today's article amply describes the "sticks" in the Japanese system. They make clear how different our two societies are.

I do not suggest we adopt another country's tax system. I do believe, however, that we have to consider how we treat savings and borrowing.

SHORT-TERM PERSPECTIVE

We must also consider the charge that our business leaders—and indeed our society as a whole—focus too much on the short term. Does a focus on next quarter's earnings prevent investments that yield dividends far down the road? Do we place too high a value on tomorrow in the way we look at compensation, time, and organization? How do we encourage the long-term view without reducing the flexibility and quick response that has benefited our society and our economy?

These are questions we must consider as we look toward the restoration of our competitiveness and our productivity growth.

I urge my colleagues to read this informative article. I ask that it be printed in the RECORD.

The article follows:

AS AMERICANS SPEND, WARY JAPANESE SAVE, AND TAXES ARE A CAUSE

(By Bernard Wysocki, Jr., and Christopher J. Chipello)

The 10 Americans at the table in Florham Park, N.J., are swapping stories about home buying. The talk of borrowing down payments, of "trading up" to bigger houses, of buying houses they can't really afford. They nod knowingly as Abe Ash, a 38-year-old systems analyst, says he got a mortgage in 1976, right after he and his wife had lost their jobs. "Only in America," he says, "can you buy a house when the husband and wife are both unemployed."

Halfway around the world in Tokyo, a group of Japanese consumers are telling radically different home-buying stories. They speak of saving for 10 or 15 years, of making big down payments, of buying their first and perhaps only housing when they are on the brink of middle age. At 35, Sachiko Fukagawa is a bit younger than that, but otherwise she fits the pattern. She pulled $32,000 out of savings last year and put it down on a $72,000 condominium.

The two groups have been assembled by the Gallup Organization and the Nippon Research Center on behalf of this newspaper to explore the saving and spending habits of middle-class American and Japanese consumers. Both groups include men and women, married and single people, the young, the middle-aged and the elderly. But as the two conversations flow their separate ways, the differences grow wider and deeper.

OPTIMISM AND WORRY

The Americans are generally optimistic about the future and willing to take risks. They like to spend, so they have trouble saving. On the average they save only 7% of their after-tax income, slightly more than the U.S. average of 6%, the lowest in the developed world. By contrast, the Japanese are generally worried about the future and wary of risk. They are cautious about spending and save like crazy, giving Japan prolific savings rates averaging more than 17% of after-tax income.

At first glance, these American spenders and Japanese savers appear to exist in splendid isolation from each other. But many economists see an important, disturbing relationship. "The United States and Japan are like an old married couple. We like to spend and they like to save," said former Commerce Secretary Peter Peterson in a speech to the Japan Society a few months ago. "It is unclear, however, how long this complementary, if slightly neurotic, relationship can persist.

Mr. Peterson and others warn of a future in which Americans save so little, and American budget deficits run so large, that huge amounts of capital will have to be imported from overseas to fund those deficits, pushing up interest rates and the dollar. In fact, the large-scale importation of capital has already begun, and much of the money coming in is from the Japanese. Last year Japan exported over $50 billion in capital, much of it to the U.S. By contrast, Japan has financed its own large budget deficits rather easily and cheaply—tapping its large pool of domestic savings by selling its debt securities to banks and investors.

Furthermore, according to several economists, the low savings rate in the U.S. has left the corporate sector unprepared for the future. "We're entering a new age of technology, and we need money for those capital projects," says Thomas F. Cargill, professor of economics at the University of Nevada and recently a visiting scholar in Japan. "The level of saving is insufficient."

ENGINE OF PROSPERITY

Japan's huge savings pool has been a driving engine of postwar prosperity, serving as a cheap source of capital as banks and individuals invest much of the money in Japanese corporations. "The bottom line is, Japan's household sector bears a lot of the responsibility—and the credit—for Japanese economic growth," Prof. Cargill says. Thus, the enormous disparity in U.S. and Japanese savings rates operates in Japanese companies' favor in their competition with American companies.

Why the enormous disparity? Radically different tax policies are certainly part of the reason. Interest income on savings of up to $58,000 is tax-free in Japan, but such income is taxable in the U.S. Capital-gains taxes in Japan are nonexistent in many cases, inconsequential in others. Interest payments on home mortgages aren't tax-deductible in Japan, so Japanese have far less incentive than Americans to look for the biggest house, the biggest mortgage and the biggest tax shelter they can possibly find.

"I think everybody we know buys more house than they can really afford," says William McCormick, 31, dairy-company salesman and member of the group gathered in New Jersey. (He recently bought a bigger house.) Those who have small mortgage payments seem almost ashamed. Andrew Bruner, a retired schoolteacher whose mortgage is only $200 a month, says, "We could have bought more house, and we should have. I wish we had."

The mentality is different in Japan, where richer and poorer are more likely to be side by side, and where being conspicuous is unforgivable. "I'm the managing director of a bank," explains Hiroshi Takeuchi, chief economist of the Long-Term Credit Bank of Japan. "You might expect that I'd wear a fancy tiepin or something. Not in Japan. If I wore a diamond tiepin or diamond cuff links, people would despise me. That's why even most rich people don't build grand homes."

Other cultural constraints may also keep Japanese savings rates high. Pensions are relatively low by Western standards. Many Japanese still work six days a week, with correspondingly small amounts of leisure time. Some economists believe that the economic hardships of World War II and its aftermath have left today's adult Japanese with an ineradicable strain of frugality.

The tradition of semiannual bonuses, which account for nearly 20% of the average worker's annual salary, also appears to encourage the Japanese propensity for thrift: Surveys show that the overall savings rate leaps to more than 40% during the June and December bonus seasons.

More important, perhaps, land in Japan is expensive, house and apartment prices are high, and down payments average 32% of the purchase price. As a result, the Japanese spend many years saving the down payment. Ms. Fukagawa, who bought her $72,000 condominium with a $32,000 down payment, is unusual only because she bought her first real estate at age 35 while the median age in Japan for such purchases is 40. In the meantime, the would be homeowner spends many years piling up savings.

"Between the age of 30 and 40, a typical Japanese head of household has very heavy incentives to save," according to John Makin, head of fiscal studies at the American Enterpirse Institute in Washington. "He works six days a week. Interest income is largely untaxed, while interest expense isn't tax deductible. At age 40, he will buy a house costing 10% more than his American counterpart, given per-capita income two-thirds as large." Mr. Makin adds that with mandatory retirement looming at age 55—the standard retirement age for below-top-echelon people in large Japanese companies—that is additional incentive to save.

First-time home buyers in the U.S. have a median age of 30. A fair number are like Barbara Eadie, 29, the calm, articulate wife of a computer programmer in New Jersey. She and her husband borrowed down-payment money from her parents, and are paying off that bill, the first mortgage, and a loan for an addition. When an Internal Revenue check for $1,000 arrived recently, the tax refund went to pay bills. Says Mrs. Eadie, "We don't save very much money."

PLUNGING FEARLESSLY

Some of the New Jerseyans say they plunge fearlessly into debt because of a basic optimism about the future. Mr. Ash, the man who bought his house while unemployed, came out a winner. He says he was offered a chance to sell his house at a profit, just two weeks after he bought it. He didn't sell. Today, nine years later, the house has tripled in value.

Members of the Tokyo group are much less confident of rising values. Condominiums, particularly small ones, are seen as risky purchases. "You can't sell them," says Mitsumasa Amari, a 61-year-old physician. "For the first few years, it's OK. But after five years or so, you can't find a buyer." Dr. Amari, who built his house on a patch of old farm land in a southwest suburb of Tokyo, says the value of the lot has risen tenfold to more than $400,000 since he bought it about 12 years ago. But he says he has no desire to sell.

The Americans were far more tolerant of building up credit-card debt than their Japanese counterparts. Asked what they would do if $5,000 fell out of the sky, several of the Americans said they would use the money to reduce their credit-card balances. None of the Japanese said they would use $5,000 that way. The ones who use credit cards normally wipe the slate clean after the end of each month.

THE JAPANESE WAY

Of the eight people gathered around the table in Tokyo, Dr. Amari and Kozo Hirata, a 51-year-old accountant, are the only ones who use credit cards very much. The younger members of the group generally shun cards. They buy electronic goods and appliances through friends who work in such companies and who get them discounts. Or they head for a Tokyo neighborhood called Akihabara, where everything is routinely sold at 20% discount. "There are advantages to credit cards," says Masatoshi Takahashi, 26, an employee in the marketing department of the J. Osawa trading company. "But there are a lot of other ways to get things cheaply."

Mr. Takahashi is easily the most outgoing member of the Tokyo group, cracking jokes and wolfing down sandwiches while other participants nibble self-consciously at their food.

He is also the sort of person who makes many older Japanese worry about their country's future. He rarely works overtime—"because I don't like to," he explains. Unlike many Japanese, he takes his full week of annual vacation. And he spends money on recreation—"my car, traveling, clothes." For the younger generation, Mr. Takahashi says, saving is secondary to "enjoying life."

* * * that he is nevertheless something of a saver: He earns $14,000 a year, including his annual bonuses. He lives with his parents and pays them $120 a month for room and board. He uses $400 a month for pocket money. Yet he still manages to save $2,700 a year, more than 19% of his pay.

RATE HAS DECLINED

It is true that Japan's saving rate has slowly declined, from more than 20% in postwar years to 17% or so today. A recent Sanwa Bank report predicted a drop to 15% by 1995, basing the prediction on the growing number of elderly in Japan, who tend to save relatively little.

Some economists familiar with Japan don't see much change in Japan's savings rate, though. "I don't think it will decline much," says Edward Lincoln of the Brookings Institution in Washington. He believes that the fear of a rapidly aging population will itself keep savings rates high: People who worry that the nation may not be able

to support so many old people may well decide to save at a high rate to make sure that they will be able to support themselves if necessary.

Nor does Mr. Lincoln hold much hope for rising levels of savings in the U.S. "Nothing seems to move it out of that 4% to 7% range," he says.

During the past few years, some steps have been taken that can stimulate savings, from the expansion of the individual retirement account in 1982 to current Reagan-administration proposals to remove the tax benefits on second homes and rental properties. But neither these changes nor the rise in real interest rates since the late 1970s seems to ignite the savings impulses of the people sitting around the table in Florham Park.

IRA accounts aren't very popular with this group. Says William Carpenter, a 55-year-old engineer, thinking about all the publicity over IRA accounts: "I'm wondering if there's a little hype in there." Adds Joseph Steitz, 42, a construction worker: "I don't particularly care for IRAs. It just restricts you too much."

LIVING FOR TODAY

Then, after several people attack the provisions that call for penalties if you remove money from an IRA before age 59½, Mr. Steitz says his real problem is that he wants to live for today, whereas the IRA account keeps pushing people's thoughts into the distant future.

"I just lost a brother who was 39 years old," he says, "and he worked all the overtime and he would never take a day off to go fishing with me. And he'll never make up those days, and I don't care about one more day at 60 years old. It's not as important as tomorrow if I want to go fishing. That's the way I feel about it, and that's why I don't like the 59½-year-old thing."

Several people in the room nod in agreement. One man says, "You've got something there." Then Mr. Steitz continues: "I might have to sacrifice something for taking the day off to go fishing, but at least I did it and enjoyed it. My friend has a charter boat and he's got a bumper sticker that says, 'Even a bad day of fishing is better than a good day at work.' "

SEVEN AMERICANS ARE STILL BEING HELD HOSTAGE IN LEBANON

● Mr. SIMON. Mr. President, I rise today to remind my colleagues of the seven Americans who remain in captivity in Lebanon.

The families of these seven men were given hope during the TWA hijacking negotiations that their loved ones would be safely returned. They have met with their Senators, their Representatives, Department of State officials, and some have even met with their President. They have been plummeted through depression, anger, fear, and frustration. They have committed their family resources, their days and nights to the safe release of their loved ones. Let us not forget our commitment to them.

Let us not forget that today:

Benjamin Weir has been held hostage for 444 days—a measure of time that is engrained in our hearts and minds; William Buckley remains in captivity after 496 days; marks the 238th day since the disappearance of Peter Kilburn; Father Lawrence Martin Jenco is still a prisoner after 199 days; is the 132d day of the captivity for Terry Anderson; David Jacobsen has been held hostage for 59 days; marks day 47 for Thomas Sutherland.

Let us not forget that seven Americans are still held hostage in Lebanon.

Let us not forget our commitment to these men and their families.●

SUPERFUND EXPIRATION DRAWS NEAR

● Mr. LAUTENBERG. Mr. President, Superfund is set to expire on September 30. If Congress fails to act before this date, the hundreds of Superfund cleanup projects planned or underway across the Nation will be put in jeopardy.

Last week, Senator DURENBERGER and I circulated a letter in the Senate urging the majority leader to schedule S. 51, the Superfund Improvement Act of 1985, as soon as possible and certainly before the August recess. Within 2 days, 64 Senators had signed the letter. This is a tremendous show of support, not only for bringing the bill up for consideration, but for the program as well.

Every State has a vital stake in the reauthorization of the Superfund Program. EPA expects the fund to be virtually bankrupt by the end of September, with perhaps as little as $15 million remaining from a $1.6 billion fund. With its expiration date rapidly approaching and the funds nearly depleted, the Senate should take up this bill before we recess in August to permit careful consideration of the program and adequate time for conference with the House.

There is little need to emphasize the importance of the Superfund Program. Sites containing hazardous wastes and substances are being added to the national priority list [NPL] at an astounding rate. There are currently 812 sites proposed to or listed on the NPL. EPA has identified more than 20,000 additional sites for consideration. Ninety-seven of these sites are in my home State of New Jersey, the highest number of sites in any State. Clearly, we need to move quickly and effectively to tackle this tremendous number of sites.

In addition, the disaster in Bhopal and other serious incidents in this country in recent months have underscored the importance of effective emergency response to spills and releases of these substances.

Mr. President, I ask that the letter to Senator DOLE requesting prompt consideration of Superfund be printed in the RECORD.

The letter follows:

JULY 15, 1985.

Hon. ROBERT DOLE,
Majority Leader, U.S. Senate,
Washington, DC.

DEAR BOB: We urge you to bring S. 51, the Superfund Improvement Act of 1985, to the floor for full Senate consideration as soon as possible and certainly before the August recess. Expedited consideration of this bill is essential if the Congress is to take final action on reauthorization before the program expires on September 30 of this year.

S. 51 enjoys strong bipartisan support. The Committee on Environment and Public Works reported S. 51 by a vote of 14 to 1 on March 1. This action was followed by expeditious consideration by the Committee on Finance and the Committee on the Judiciary. The Committee on Finance reported S. 51 by a vote of 18 to 1 on May 16. The Committee on the Judiciary has also considered S. 51. The bill, which is now pending on the Senate calendar, was the subject of extensive review by these Committees and should be scheduled for consideration by the Senate this month.

We understand that Senator Stafford, Chairman of the Environment and Public Works Committee, and Senator Packwood, Chairman of the Finance Committee, are working with you to accomplish this goal. We fully support these efforts. Differences of opinion about specific provisions should be debated on the floor and should not be allowed to delay consideration of the bill. The program is too important to the health and welfare of the American public.

The tragedy at Love Canal, New York, and growing knowledge of other hazardous substance spills and disposal sites spurred Congress to approve Superfund in 1980. The current inventory of over 20,000 suspected sites around the country, as well as recent incidents threatening catastrophic release of hazardous substances, underscore the need to reauthorize a strong superfund program.

It is imperative that you make consideration of S. 51, and final Congressional approval of a reauthorization of the Superfund program, a top legislative priority this year. With the expiration date rapidly approaching and the funds for cleanup nearly depleted, we urge you bring the bill to the floor for consideration before the August recess.

Sincerely,

James Abnor, Mark Andrews, Max Baucus, Lloyd Bentsen, Jeff Bingaman, Rudy Boschwitz, Bill Bradley, Dale Bumpers, Quentin Burdick, John Chafee, Lawton Chiles, William Cohen, Alan Cranston.

John Danforth, Dennis DeConcini, Alan Dixon, Christopher Dodd, David Durenberger, Thomas Eagleton, Daniel Evans, J. James Exon, Wendell Ford, John Glenn, Albert Gore.

TECHNOLOGY ADDRESSING NEEDS OF THE DISABLED

● Mr. STEVENS. Mr. President, I would like to draw the attention of the Senate to programs underway in the Federal Government to use available and developing technology to address the needs of individuals with disabilities. The National Aeronautics and Space Administration [NASA], the Department of Defense [DOD], and the Department of Health and Human Services [HHS], through Secretary Heckler's National Initiative on Technology and the Disabled, have been instrumental in this important effort.

New development in a variety of fields hold promise for the millions of individuals with disabilities in this country and around the world. The technological resources of the aerospace and defense industries are immense, and the transfer of these developments, so-called technological spinoffs, are occurring at a rapid pace. One such spinoff device is the Jarvik-7 artificial heart, currently the "gift of life" for three human beings. I doubt many Americans realize that the pumps and metal valves used in the Jarvik-7 heart originated in the aerospace program and the development of jet engine technology.

By congressional mandate, NASA is responsible for promoting multiple uses of its technological discoveries. The purpose of NASA's Technology Utilization Program is to broaden and accelerate technology transfers from NASA, providing links between the new developments and those who might be able to apply them productively. NASA technological spinoffs can be found in the fields of medicine, public safety, transportation, industrial processes, pollution control, energy systems, construction, law enforcement, home appliances, and farm machinery, to name a few. In the health field particularly, byproducts of space technologies have led to major developments in advanced hearing devices, programmable pacemakers, and other new medical devices for the disabled.

One technological spinoff which may prove of special benefit in rural States like my own is the Lixiscope. A classic example of a spinoff application of NASA technology, in this instance the need for an x-ray astronomy device in space exploration led to the development of a handheld x-ray imaging system. Unlike conventional x-ray devices found in medical settings and industry, this new device is portable. This is of great advantage to bedridden persons, or to those assessing injuries in the field. Furthermore, it provides physicians with an instant x-ray view while they operate, without the delays or problems often associated with chemical developers.

Mr. President, the establishment of the National Initiative on Technology and the Disabled by Secretary Margaret Heckler and the Department of Health and Human Services reflects President Reagan's commitment to private sector volunteerism as the path to travel in taking care of our most needy citizens. In addition, the initiative is consistent with the congressional requests made in House Concurrent Resolution 39 for the administration to encourage opportunities for our citizens with disabilities to attain the independence and dignity that are their due. The National Initiative on Technology and the Disabled demonstrates the executive branch's commitment to the goals set forth in that congressional resolution.

Secretary Heckler is to be commended for pointing out how aerospace and defense technologies can address the needs of disabled individuals, and for reminding all of us that a little creativity can go a long way.●

COMPREHENSIVE TRADE REFORM ACT OF 1985

● Mr. MOYNIHAN. Mr. President, I rise today to cosponsor the bill offered by my distinguished colleague from Pennsylvania, Mr. HEINZ, to significantly reform and improve our trade laws.

Mr. President, on July 23, 1979, during the floor debate on the Trade Agreements Act of 1979, I urged the Congress to do more to protect American companies and workers from unfair competition. I said then,

> I am here to say that I altogether support [the Trade Act of 1979], but I support it on the condition that the pledges made by the administration that American workers' jobs will be protected from unfair and often dishonest dealings will be kept.

The promises to American workers and industries to enforce our countervailing duty, antidumping and other trade statutes, have not been kept by the current administration. But we in Congress also have neglected our responsibilities to amend our trade laws to account for fundamental changes taking place in the international trading system.

It is undisputed that State-directed economies play an increasingly important role in international trade. The emergence of State-directed economies poses serious problems for American workers and industries that compete in the international marketplace. By deliberate choice, we do not use the government-directed strategies of other nations. As the patterns of world trade have changed, so too have the mechanisms pursued by foreign governments to expand their shares of the world market.

In this context, it has become clear that our own trade statutes must be amended to take account of the changing nature of world trade in general and, in particular, of the sophisticated mechanisms used by our trading partners to unfairly claim a greater share of international markets, at the expense of American workers and industries.

Mr. President, last year many Members of this body worked long and hard to see that our "fair trade" laws were expanded, so American industries and workers could gain relief for injury from unfair trade practices. On November 18, 1983, I introduced with Senators HEINZ and MITCHELL comprehensive legislation (S. 2139) designed to: (1) Expand coverage of our fair trade laws; and (2) improve the administration of those laws to ensure that effective relief would be forthcoming.

This bill was endorsed by the Trade Reform Action Coalition, a broad-based group of labor and industry representatives from the textile, apparel, steel, leather, chemical, television and footwear industries, and others. These industries employ 4.5 million American workers and produce goods and services valued at almost $270 billion—almost 10 percent of the Nation's gross national product.

Many of the provisions of S. 2139 were adopted, some in modified form, in the Trade and Tariff Act of 1984. However, many important provisions were not enacted. The need to conform our fair trade laws to changing international conditions continues.

Mr. President, among other changes, the legislation we introduce today addresses the unfair practices of diversionary dumping, upstream subsidization, and industrial targeting; would allow companies and workers who make major components of final products to file and participate in antidumping, countervailing duty, and section 201 escape clause proceedings involving those final products; would clarify the definition of "subsidies" which are countervailable and the factors the ITC must consider in determining injury; would provide that imports need only be a cause of serious injury in order to obtain relief under section 201; and would make the USTR the administering authority in section 201 and section 301 cases.

The United States must continue to affirm its commitment to a free and open trading system, reflecting the notions of trade embodied in the General Agreements on Tariffs and Trade and our other international agreements. It is beyond dispute that a free trade system has served this Nation and the world well. But a free trade system that Americans have access to relief from unfair trading practices.

I urge my colleagues to support this important and necessary piece of legislation.●

THE 197TH ANNIVERSARY OF NEW YORK RATIFYING THE CONSTITUTION

● Mr. D'AMATO. Mr. President, I rise today in honor of New York ratifying the U.S. Constitution on July 26, 1788. This critical moment in our history still has relevance today. At the crux of this political metamorphosis in our country's life story, there were a myriad of philosophical and pragmatic questions to be answered. Could the States survive foreign enemies without a fully unified national force? Would a Federal Government strangle the State and local governments? Could there be a national economic policy without the power to tax?

Within the answers and arguments attached to these issues, one may find some of the same concerns that are raging in such modern debates as tax reform. But before proposing any modern analogies, let us look at the drama that unravelled in Poughkeepsie, NY, 197 years ago.

On June 17, 1788, the New York convention met in the courthouse to determine the fate of New York and the Union. At that time, eight States had already given the nod—only one more was required, but for a young, struggling, vulnerable Nation, they would need the full support of all the States. Virginia and New York were essential to the Union, and they were both diligently pursuing ratification and simultaneously watching the actions of one another.

However, New York was wary of the consequences of relinquishing so much of the State's power; as a result, New York remained as intrepid as it was when its two official delegates to the Philadelphia constitutional convention, Robert Yates and John Lansing, Jr., voted in opposition to key sections of the Constitution and never signed the finished document. Yet, New York's shining beacon who illuminated the virtues of the new system, Alexander Hamilton, signed the Constitution as an individual and returned to New York to become a moving force in swaying cautious New Yorkers.

New Yorkers opposing the new system of government were led by Gov. George Clinton, who had both real concerns over the erosion of State sovereignty and a great deal to lose by becoming a subordinate to the President. His majority leader, Melancton Smith, joined him in his belief that New York could swiftly dispose of this new folly. However, at the start of the convention Hamilton and Robert R. Livingston successfully pushed through an amendment that would prevent the swift disposal of the Constitution. The motion specified that the document should be reviewed article by article with no votes taken until the end. This would prove to be the downfall of the opposition's strategy. Though Clinton and his crowd wanted to appear as though they were not providing a cursory consideration of the document, their acquiescence to long consideration gave Hamilton, Livingston, and others a chance to explain away the fears of opponents.

Melancton and others in opposition argued that the central government would tax when, in their opinions, requisitions from the States were sufficient—even though that method had been a failure in the confederal system. Smith worried that this power would allow the National Government to strangle State and local governments. However, Livingston and his colleagues were swift to point out case after case in which the Confederation Government had been unable to raise the funds via requisition that it needed. Constitutionalists stated that New York might be hard pressed to protect itself from Indians and British Canada if it were attacked, and it also appeared unlikely that the confederate form would be capable of financing a continual national defense force.

This was not the only concern of New Yorkers. There was controversy over the representation of slaves in the House of Representatives and State's accountability of Senators. To the advantage of Hamilton and his friends, time dragged on.

On June 24, 1788, New Hampshire became the ninth State to ratify and, in so doing, the old confederation was dissolved. Now the two power States remaining were Virginia and New York—North Carolina was expected to follow Virginia and even the obstinate Rhode Islanders were likely to come around. Governor Clinton was speaking on July 2 when a hurried messenger stormed into the room. The messenger brought urgent news to Alexander Hamilton that Virginia had now ratified the Constitution.

New York delegates were still concerned about a few points regarding Federal powers and States rights, yet now things were more serious. Not only were supporters of the Constitution undermining Smith and the Governor, but now New York was faced with whether or not it could stand alone outside the Union. In the end, constitutionalism won—fears were allayed and New York joined the Union.

In retrospect, New York, along with other States, asked some serious questions which are of constant concern to those who wish to protect State sovereignty. Even today, we strive to preserve balance in the Union that brought us from a colonized wilderness to leader of the free world.

New York, I salute you.●

THE IMPORTANCE OF SEPARATING CHURCH AND STATE

● Mr. SIMON. Mr. President, the debate over prayer in our public schools is emotional and one that appears to be far from over. But history shows us that society's freedoms are best protected when there is a healthy separation of organized religion and government. In a column I write for newspapers in my State, I call attention to the pitfalls and abuses of too much entanglement of church and state. I ask that it be reprinted in the CONGRESSIONAL RECORD.

The article follows:

THE IMPORTANCE OF SEPARATING CHURCH FROM STATE

Senator Sam Ervin, the wise old man from North Carolina who died a few months ago, wrote in his autobiography: "If religious freedom is to endure in America, the responsibility for teaching religion to public school children must be left to the homes and churches of our land, where this responsibility rightfully belongs. It must not be assumed by the government through the agency of the public school system."

Why would he say that? Why do most of the organized churches of this country oppose a constitutional amendment to have organized prayer in the schools—either spoken or unspoken?

Neither Sen. Ervin nor the churches oppose prayer.

But those who have studied the history of governments know the dangers to both religious freedom and to governments of too much government entanglement with religion.

Government can best encourage religious institutions when it is neutral. An example would be the tax exempt status of nonprofit organizations. It applies to the Catholic church, the Jewish synagogue, the Lutheran church—but it also applies to the Society of Atheists.

Government can assist religious activity when consenting adults voluntarily use the services. We have chaplains in the armed forces and we open the House and Senate with prayer. But those who do not wish to participate in the opening prayer can skip it. Those in the armed forces who do not want to attend chapel can avoid it.

But third-graders ordered to pray, silent or spoker, have no choice.

If we believe that by government ordering them to pray we are helping either government or religion, we fool only ourselves.

Why did Thomas Jefferson and James Madison and the other founders of our nation feel so strongly about keeping government from fostering religion?

Because they had seen the abuse.

For example, a few decades before our Declaration of Independence, Chief Justice George Jeffreys of England made this statement in a trial of a Presbyterian woman charged with sheltering two men who shared that same religious affiliation.

Chief Justice Jeffreys noted: "There is not one of those lying, sniveling, canting Presbyterians but in one way or another has a hand in the rebellion. Presbytery has all manner of villainy in it. Show me a Presbyterian and I'll show thee a lying knave."

In Thomas Jefferson's colony of Virginia, a Quaker was not permitted to live within the state. If he came back three times, he would automatically be executed.

Many other abuses of too much government and religion working together could be cited from our nation's earliest days.

In nations that have official religions, where that religious belief is backed by government pressure, their people generally are

not as active religiously as are the people in the United States.

Both government and religious leaders should think long and carefully before we discard the wisdom of those who founded our country.●

NON-SMOKERS RIGHTS ACT

● Mr. STEVENS. Mr. President, when most of us think of air pollution, images like city buses' exhaust fumes, and smokestacks belching plumes of black smoke come to mind. However, a recent study completed by the Environmental Protection Agency [EPA] concludes that tobacco smoke is the Nation's most dangerous airborne carcinogen, responsible for up to 5,000 lung cancer deaths per year. To give my colleagues a sense of how great a hazard tobacco smoke is, the next most dangerous carcinogenic pollutant, coke oven emissions, cause up to 150 deaths per year, as compared to tobacco smoke's 500 to 5,000. Clearly, we must begin to take some action to protect nonsmokers from this dangerous pollutant, and I hope for this reason that S. 1440, the Non-Smokers Rights Act of 1985, will receive favorable consideration from this body.

I ask that the following article from the New York Times summarizing EPA's study of tobacco smoke be printed in the RECORD.

The article follows:

[From the New York Times, Nov. 3, 1984]

E.P.A. STUDY LINKS DEATHS OF NONSMOKERS TO CIGARETTES

(By Irvin Molotsky)

WASHINGTON.—A study by the Environmental Protection Agency estimates that 500 to 5,000 nonsmokers die each year of lung cancer caused by others' cigarettes.

The study says that "passive" tobacco smoke is the country's most dangerous airborne carcinogen, even if the lower figure of 500 deaths is used. Coke oven emissions, the No. 2 carcinogenic pollutant, are said to cause up to 150 lung cancer deaths a year.

The agency is involved in the investigation of the question because it determines the health hazards caused by air pollutants.

The study's findings are based on an analysis of lung cancer mortality rates uncovered by other researchers. It was conducted over the past three years by James L. Repace, a physicist and policy analyst in the environmental agency's Office of Air and Radiation, and Alfred H. Lowrey, a research chemist in the Laboratory for the Structure of Matter at the Naval Research Laboratory.

The question of whether nonsmokers are harmed by the smoke of others in the home, on the job and in such public places as restaurants has been hotly debated for years. Recent attempts to require the segregation of smokers from nonsmokers have been made in such widely separated places as Suffolk County, L.I., and San Francisco.

In his annual report on the health effects of smoking, the Surgeon General of the United States, Dr. C. Everett Koop, said last May that there was "very solid" evidence that nonsmokers suffered from lung diseases caused by exposure to others' cigarette smoke. Dr. Koop did not provide any supporting evidence for his assertion at that time. He was reported to be out of the country today and not available for comment on the new study.

The study has been reviewed by a panel of scientists for the journal Environment International, which Mr. Repace said had asked for some wording changes but not any alteration of figures. He said he expected the journal to publish it shortly.

It has also been subject to review by a carcinogenic assessment panel of the environmental agency. The head of the panel, Herman J. Gibb, an epidemiologist, said in a report that the lower figure of 500 deaths was "better supported" than the 5,000.

Dr. Elizabeth Anderson, director of the agency's Office of Health and Environmental Assessment, said of the Gibb assessment. "It should be noted that even this risk, given the size of the population exposed to passive smoking, translates into a significant population risk in comparison to other environmental carcinogens."

For his part, Mr. Repace said in an interview that the 5,000 figure "must be pretty close to being correct."

LINK TO 85 PERCENT OF DEATHS

In 1982, the last year for which figures are available, 116,270 deaths from lung cancer were reported in the United States. The Surgeon General has estimated that 85 percent of lung cancer deaths are caused by cigarette smoking.

Although the Repace-Lowery study has not yet been published, copies of a draft have begun to circulate, one of them reaching the Tobacco Institute, which represents the cigarette industry.

William D. Toohey Jr., a spokesman for the institute, said his organization was studying the report. "The initial glance at it indicates it has a major problem in that it relies on data that have been seriously questioned," Mr. Toohey said.

"It is totally unsupportable," the industry spokesman said. "Even the Surgeon General has not made the assertion in his reports that cigarette smoke in the air causes disease to nonsmokers. I tend to think that this study is like a house of cards; when the underpinning is pulled out, the whole paper falls apart."

In their report, Mr. Repace and Mr. Lowery seem to suggest that the conclusive proof to which Mr. Toohey referred is not necessary before action is taken. "Because society is risk-aversive, public health agencies assess and control carcinogenic risks despite incomplete evidence," they wrote.

Spokesmen for health and antismoking groups who have seen the report praised it. Robert G. Weymueller of the American Lung Association called it another study that "points in the direction of serious health effects from passive smoke."

An important part of the Repace-Lowery study was an epidemiological sssessment of previous investigations that included Mormons and Seventh-day Adventists, religious groups that proscribe smoking and whose members generally associate with co-religionists. The study cited in 1980 report in The Journal of the National Center Institute, which compared findings concerning Mormons and Seventh-day Adventists with those for nonsmokers who were more likely to associate with smokers.

The E.P.A. study said, "The non-Seventh-day Adventist group of nonsmokers who never smoked (but who were more likely to suffer involuntary exposure to tobacco smoke) had an average lung cancer mortality rate of 2.4 times that of never-smoked Seventh-day Adventists (the group less likely to have suffered such exposure by virtue of their way of life)."

The Seventh-day Adventists study involved 50,216 nonsmokers who were not members of that religion and 25,264 who were.

The study also cited T. Hiramyama's reports in the The British Medical Journal that nonsmoking women in Japan whose husbands smoked had a lung cancer mortality rate ranging from 5.3 to 9.4 per 100,000 depending on the degree of the husband's smoking.

Both the Japanese and the Seventh-day Adventists studies concluded that among nonsmokers in the susceptible age group of over 35 years, there was a risk of cancer deaths on the magnitude of 8 per 100,000 a year. The E.P.A. report applied these conclusions to population figures to reach the estimate of 5,000 deaths a year among nonsmokers.

The lower estimate of 500 deaths annually was calculated by extrapolating the risk for smokers themselves, which was estimated at about 316 deaths per 100,000 each year.

Citing a study reported in The New England Journal of Medicine by J. R. White and H. F. Froeb, Mr. Repace and Mr. Lowrey said, "Chronic exposure to tobacco smoke in the work environment is deleterious to the nonsmoker and significantly reduces small airways functions to the same extent as smoking 1 to 10 cigarettes per day."

Pipe and cigar smokers who try not to inhale smoke do not escape the dangers of smoking, they said, because they are exposed to passive smoke from their own pipes and cigars.

"Pathologic findings show lung abnormalities in such smokers which are intermediate between those of nonsmokers and cigarette smokers," they said, citing two other studies.

In conclusion, the authors wrote that their "quantitative estimates should be regarded as preliminary and subject to confirmation by further research," but that "passive smoking appears to pose a public health risk larger than the hazardous air pollutants from all industrial emission combined."●

MEXICO SHOULD ENHANCE INTELLECTUAL PROPERTY PROTECTION

● Mr. LAUTENBERG. Mr. President, today Secretary of State Shultz and U.S. Trade Representative Yuetter are in Mexico for a meeting of the United States-Mexico Binational Commission.

One issue that needs to be addressed in these talks is the level of intellectual property right protection provided by Mexico. Unfortunately, Mexico has failed to provide adequate protection of patents, copyrights, and trademarks which are essential to encourage investment in technological innovation, and to ensure that those who do in invest in innovation enjoy the fruits of their labor.

Mr. President, nine of my colleagues and I have asked the Secretary of State and the U.S. Trade Representative to raise our concerns that Mexico enhance protection of intellectual property rights.

I ask that the letters be printed in the RECORD.

The letters follow:

U.S. SENATE,
Washington, DC, July 24, 1985.

Hon. GEORGE P. SHULTZ,
Department of State,
Washington, DC.

DEAR MR. SECRETARY: We are writing to urge that, during the forthcoming meeting of the U.S.-Mexico Bi-national Commission, you convey our concern that Mexico provide improved protection of intellectual property. We suggest that you emphasize the positive role that sound protection of intellectual property can play in advancing economic growth and facilitating investment, technology transfer and trade. Greater protection of intellectual property than Mexico now provides would be in keeping with Mexico's emergence as an industrial power and an important trading partner of the United States.

The current state of Mexican patent and technology laws has inhibited trade and investment with our neighbor. Mexico's patent law, passed in 1976, has several troublesome provisions. One completely eliminates traditional patent protection for innovations in such fields as alloys, agricultural chemicals and pharmaceuticals. Another lapses patents in all fields if they are not worked within four years, normally too short a time for technically complex innovations.

Also, Mexico has no trade secret protection law. Mexico allows Mexican companies to freely use costly technical data submitted by U.S. companies in attaining product registrations. Confidentiality of technical information, normally protected by private contract, is impaired under Mexico's technology rules. The integrity of trademarks is threatened. Intellectual property rights are difficult to enforce.

Recently, Mexico has quietly shown willingness to review some of these issues. Middle-level Mexican officials appear in need of a signal from their senior level people. Your visit could exert a useful stimulus to this end. It would also support the efforts of U.S. trade officials working at the technical level in their discussions with their Mexican counterparts.

Effective action must be taken to protect American intellectual property abroad. In so many cases, America's strength in world markets is its technology, and our nation's ability to reap the benefits of its technology depends upon effective protection of patents, copyrights, trademarks and trade secrets. In the absence of such protection, competitors can enjoy the benefits of research without the costs or the risks. The incentive to innovate suffers and so do the efforts of nations like Mexico to develop their own domestic research base.

Congress has expressed growing support for making the protection of intellectual property rights a key part of our trade policy. The Trade and Tariff Act of 1984 makes protection of intellectual property an explicit negotiating objective, links treatment under the Generalized System of Preference with such protection, and mandates a comprehensive study of the current state of intellectual property right protection around the world.

We seek your support in encouraging an improvement in intellectual property right protection in Mexico. We would appreciate learning of the results of your visit.

Sincerely,

Frank R. Lautenberg, John J. Chafee, Bill Roth, Alan Cranston, Alan J. Dixon, Bill Bradley, Daniel Inouye, Edward Kennedy, John F. Kerry, J.J. Exon.

U.S. SENATE,
Washington, DC, July 24, 1985.

Hon. CLAYTON K. YEUTTER,
Office of the U.S. Trade Representative,
Washington, DC.

DEAR MR. AMBASSADOR: We are writing to urge that, during the forthcoming meeting of the U.S.-Mexico Bi-national Commission, you convey our concern that Mexico provide improved protection of intellectual property. We suggest that you emphasize the positive role that sound protection of intellectual property can play in advancing economic growth and facilitating investment, technology transfer and trade. Greater protection of intellectual property than Mexico now provides would be in keeping with Mexico's emergence as an industrial power and an important trading partner of the United States.

The current state of Mexican patent and technology laws has inhibited trade and investment with our neighbor. Mexico's patent law, passed in 1976, has several troublesome provisions. One completely eliminates traditional patent protection for innovations in such fields as alloys, agricultural chemicals and pharmaceuticals. Another lapses patents in all fields if they are not worked within four years, normally too short a time for technically complex innovations.

Also, Mexico has no trade secret protection law. Mexico allows Mexican companies to freely use costly technical data submitted by U.S. companies in attaining product registrations. Confidentiality of technical information, normally protected by private contract, is impaired under Mexico's technology rules. The integrity of trademarks is threatened. Intellectual property rights are difficult to enforce.

Recently, Mexico has quietly shown willingness to review some of these issues. Middle-level Mexican officials appear in need of a signal from their senior level people. Your visit could exert a useful stimulus to this end. It would also support the efforts of U.S. trade officials working at the technical level in their discussions with their Mexican counterparts.

Effective action must be taken to protect American intellectual property abroad. In so many cases, America's strength in world markets is its technology, and our nation's ability to reap the benefits of its technology depends upon effective protection of patents, copyrights, trademarks and trade secrets. In the absence of such protection, competitors can enjoy the benefits of research without the costs or the risks. The incentive to innovate suffers and so do the efforts of nations like Mexico to develop their own domestic research base.

Congress has expressed growing support for making the protection of intellectual property rights a key part of our trade policy. The Trade and Tariff Act of 1984 makes protection of intellectual property an explicit negotiating objective, links treatment under the Generalized System of Preferences with such protection, and mandates a comprehensive study of the current state of intellectual property right protection around the world.

We seek your support in encouraging an improvement in intellectual property right protection in Mexico. We would appreciate learning of the results of your visit.

Frank R. Lautenberg, John H. Chafee, Bill Roth, Alan Cranston, Alan J. Dixon, Bill Bradley, Daniel Inouye, Edward Kennedy, John F. Kerry, J.J. Exon.●

THE QUEST FOR FREEDOM

● Mr. LEVIN. Mr. President, today we remember the people of captive nations around the world.

The brave and freedom-loving people of Soviet-dominated nations have not known true independence for over 40 years. Every day of those 40 years, they have struggled to keep alive their dreams of freedom—freedom which we take for granted: adherence to personal religious beliefs, the preservation of cultural and historical traditions which are centuries old, the right to travel freely and to any land, the right to emigrate to another country.

Members of this Chamber speak on behalf of these oppressed people every year. Every year, I am afraid their quest for freedom remains unfulfilled. While there often seems little to give these people hope that their countries will break free of the strong grip of the Soviet Union, we can do our part by letting them know they are not forgotten.

With the release of American hostages from Lebanon, we are reminded of how precious liberty and safety is. We must not forget those for whom such personal freedom is still a dream.●

ORDERS FOR FRIDAY

RECESS UNTIL 9:30 A.M.

Mr. DOLE. Mr. President, I ask unanimous consent that once the Senate completes its business today it stand in recess until 9:30 a.m. on Friday, July 26, 1985.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECOGNITION OF CERTAIN SENATORS

Mr. DOLE. Mr. President, I further ask unanimous consent that, following the recognition of the two leaders under the standing order, there be special orders in favor of the following Senators for not to exceed 15 minutes each: Senators PROXMIRE, NUNN, and MOYNIHAN.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. DOLE. Mr. President, I ask unanimous consent that, following the special orders just identified, there be a period for the transaction of routine morning business not to extend beyond the hour of 11 a.m. with statements limited therein to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I ask unanimous consent that the time available to the leaders under the standing order be reduced from 10 minutes each to 3 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. DOLE. Mr. President, following routine morning business, the Senate will resume S. 1078, FTC authorization, with the pending Kasten amendment No. 542, and also it will be the intention of the majority leader to turn to S. 410, the Conservation Service Reform Act. A number of amendments are expected during Friday's session. It is the hope of both the majority leader and minority leader that we can move rather quickly on the amendments to work out some accommodation to some very real concerns the distinguished minority leader has. If that can be done, I hope we could complete legislative action tomorrow by 2 p.m., 2:30, 3 o'clock, or later, more or less.

It may be possible that we could reach some time agreement on some of the amendments tomorrow, but I think I will wait to pursue that tomorrow morning. It may not be necessary.

I regret some Members have other ideas for tomorrow, but this is the last weekend before a rather extensive recess and we do have a number of items that we would like to take care of. There is still some hope we will have a budget resolution by next week, supplemental appropriations, and the defense authorization conference report. We are getting very close to what could be an agreement on farm legislation, bipartisan agreement. We are not there yet. So there are a number of possibilities for next week, none of which are certain.

RECESS UNTIL 9:30 A.M.

Mr. DOLE. Mr. President, there being no further business to come before the Senate, I move that the Senate stand in recess until 9:30 a.m., Friday, July 26, 1985.

There being no objection, the Senate, at 7:43 p.m., recessed until Friday, July 26, 1985, at 9:30 a.m.

NOMINATIONS

Executive nominations received by the Senate July 25, 1985:

DEPARTMENT OF JUSTICE

Vinton DeVane Lide, of South Carolina, to be U.S. attorney for the district of South Carolina for the term of 4 years, vice Henry Dargan McMaster, resigned.

THE JUDICIARY

David Bryan Sentelle, of North Carolina, to be U.S. district judge for the western district of North Carolina, vice Woodrow W. Jones, retired.

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

Subject to qualifications provided by law, the following for permanent appointment to the grades indicated in the National Oceanic and Atmospheric Administration:

To be captain

Thomas E. Gerish
Donald E. Nortrup
John T. Atwell
Lowell J. Genzlinger
Jimmy A. Lyons
John D. Stachelhaus
John C. Albright

To be commander

Melvyn C. Grunthal
Wayne L. Perryman
Daniel S. Eilers
Alan D. Anderson
Harold B. Arnold

To be lieutenant commander

Herbert M. Kirch
Kent A. Doggett
Warren T. Dewhurst
David M. Goodrich
Virginia E. Newell
Donald R. Rice
Gerald E. Wheaton
Patrick J. Rutten
E. Scott Varney
Charles E. Gross
Eric S. Davis
Howard A. Jemison III
David H. Minkel
Walter P. Latimer
Susan J. Ludwig

To be lieutenant

Perry N. Glickman
Robert D. Henegar
Frank A. Wood
Steven R. Barnum
James R. Morris
Arthur E. Francis
Jeffrey L. Robinson
Stephen M. Bacon
James W.F. Wallace IV

To be lieutenant (junior grade)

Carolyn J. Reid
Nancy L. Crews
Janet L. Paeth
Debra M. Davis
Kenneth W. Barton
Jeffrey F. Salmore
Mark P. Ablondi
Michael F. Cholko
Wayne E. Mitchell
Paul X. Burt
Jason H. Maddox
Randal J. Shruell
David A. Hodges
Eric D. Gardner
Duane A. Timmons
Kenneth J. Cirillo
Clifford C. Wilson
Timothy J. Clancy
David W. Moeller
Gregg LaMontagne
Cy R. Oggins
Victoria A. Barnum
John S. Griffin
Lee M. Cohen
Kay L. Miller
Mark H. Pickett
William V. Flanagan
Evelyn D. Lempriere

To be ensign

Elizabeth A. Lake
Matthew J. Wellslager
Margaret H. Sano
Paul L. Schattgen
Lillian J. Cone
John C. Damm
Peter M. Hudelson
Michael S. Gallagher
Nicholas A. Lesnikowski
Mary T. Foran
Todd C. Stiles

IN THE ARMY

The following-named officers for appointment in the Regular Army of the United States to the grade indicated under the provisions of title 10, United States Code, sections 611(a) and 624:

To be brigadier general

Col. Arvid E. West, Jr., [redacted], U.S. Army.

Dollard, Wayne J.
Walker, William A., Jr.

HOUSE OF REPRESENTATIVES—*Thursday, July 25, 1985*

The House met at 10 a.m.

Rabbi Mordekai Shapiro, Young Israel of Jackson Heights, Jackson Heights, NY, offered the following prayer:

Father in Heaven:

We beseech Thee at this hour with gratitude and in prayer as we invoke Thy blessing upon all assembled in this shrine of freedom. Thou hast inspired men of courage and vision who are Thy messengers to lay the principles upon which this great Nation has grown and flourished for over two centuries. We are ever grateful for Thy divine scheme which has brought us to the shores of these United States of America.

O Sovereign of the Universe, we humbly ask that Thou guide the deliberations of these legislators, statesmen, and all the members of our Government, who toil by Thy grace, to guide the destiny of our Nation and inspire its citizenry to serve with loyalty and devotion. May Thy spirit encourage us all to faithfully and courageously adhere to the cherished ideals of our Founding Fathers.

Gracious Guardian, open Thy storehouses of loving kindness so that all inhabitants of this planet can share Thy bounty, realize their dreams of freedom, and bask in the unspoiled splendor of Thy universe.

Grant Thee, O Father of Mercy, a full and speedy recovery to our President as we pray for the continued good health of all the leaders of our democracy that they may lead with vigor and strength.

Hasten Thou the era of universal peace when all humanity will share Thy blessings with selfless friendship and fraternity, when justice, equality, and prosperity will reign swiftly in our day. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

SUNDRY MESSAGES FROM THE PRESIDENT

Sundry messages in writing from the President of the United States were communicated to the House by Mr. Saunders, one of his secretaries.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment a bill of the House of the following title:

H.R. 2378. An act to amend section 504 of title 5, United States Code, and section 2412 of title 28, United States Code, with respect to awards of expenses of certain agency and court proceedings, and for other purposes.

The message also announced that the Senate disagrees to the amendments of the House to the bill (S. 960), "An act to amend the Foreign Assistance Act of 1961, the Arms Export Control Act, and other acts to authorize appropriations for the fiscal year 1986 for international security and development assistance, the Peace Corps, the Inter-American Foundation, and the African Development Foundation, and for other purposes," and agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon.

The message also announced that the following are appointed as conferees on the part of the Senate: Mr. LUGAR, Mr. HELMS, Mr. MATHIAS, Mrs. KASSEBAUM, Mr. BOSCHWITZ, Mr. PELL, Mr. BIDEN, Mr. SARBANES, and Mr. CRANSTON.

Additional conferees solely for subtitle II of title IV of the House amendments dealing with airport security: Mr. DANFORTH, Mrs. KASSEBAUM, Mr. GOLDWATER, Mr. HOLLINGS, and Mr. EXON.

For title IX of the House amendments dealing with food and agriculture issues: Mr. HELMS, Mr. LUGAR, and Mr. ZORINSKY.

ANNOUNCEMENTS BY THE SPEAKER

The SPEAKER. The Chair at this time would like to announce that he wishes to extend the Chaplain of the House, our lovable Chaplain Ford, a happy birthday.

The only 1-minute recognition at this time will be the gentleman from New York [Mr. ACKERMAN] until after the HUD appropriation bill is completed.

RABBI MORDEKAI SHAPIRO

(Mr. ACKERMAN asked and was given permission to address the House for 1 minute.)

Mr. ACKERMAN. Mr. Speaker, I ask my colleagues to join me this morning in welcoming Rabbi Mordekai Shapiro as our guest chaplain.

Seventeen years ago this month, Rabbi Shapiro's father, Rabbi Solomon Shapiro, stood at the same place his son stood this morning to deliver the opening prayer for the House of Representatives.

Rabbi Mordekai Shapiro is a valued resident of the Seventh Congressional District in New York, not only as the spiritual leader of the Young Israel of Jackson Heights for the past 10 years, but also as a true friend of the entire community. He has instilled pride, creativity, and vision within his congregation and within our city.

Since his ordination at the Rabbi Jacob Joseph Yeshiva, Rabbi Shapiro has been active in all facets of community life. He is the immediate past president of the Vaad HaRabonim of Queens, the governing body of the orthodox rabbinate in the borough. For the past 6 years, he has taught at the Samuel H. Wang Yeshiva High School, fulfilling a most important obligation of his calling, the education of children.

Rabbi Shapiro is a member of the Union of Orthodox Rabbis of the United States and Canada, an executive member of the Rabbinical Council of America, and affiliated with its high court.

Mr. Speaker, I am, indeed, proud that Rabbi Mordekai Shapiro is with us today. I know that we are all inspired by his invocation.

PERMISSION FOR SUBCOMMITTEE ON MINING AND NATURAL RESOURCES OF THE COMMITTEE ON INTERIOR AND INSULAR AFFAIRS TO MEET TODAY DURING 5-MINUTE RULE

Mr. RAHALL. Mr. Speaker, I ask unanimous consent that the Subcommittee on Mining and Natural Resources of the Committee on Interior and Insular Affairs be permitted to meet today during the 5-minute rule.

This matter has been cleared with the ranking minority member of the subcommittee, the gentleman from Idaho [Mr. CRAIG].

The SPEAKER. Is there objection to the request of the gentleman from West Virginia?

There was no objection.

PERMISSION FOR CHAIRMAN OF COMMITTEE ON HOUSE ADMINISTRATION TO REPORT COMMITTEE ORDER NO. 37, PROVISION OF FTS SERVICE

Mr. ANNUNZIO. Mr. Speaker, I ask unanimous consent to report a committee order from the Committee on House Administration.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. ANNUNZIO. Mr. Speaker, at the direction of the Committee on House Administration and under the authority granted in Public Law 94-184 and Public Law 94-440, the committee yesterday issued Committee Order No. 37, which will become effective on October 1, 1985. I will be sending each Member a "Dear Colleague" letter within the next few days describing the administration of this change.

I include at this point in the RECORD the text of Committee Order No. 37:

Resolved, That effective October 1, 1985, until otherwise provided by order of the Committee on House Administration, each Member is entitled to three FTS lines for use in district office(s) without charge to the official expenses allowance.

Furthermore, the Committee on House Administration shall promulgate regulations to implement this order and to ensure adequate telecommunications service where FTS is not available.

"Member" shall mean Representative in, or Delegate or Resident Commissioner to, the U.S. House of Representatives.

ANNUAL REPORT OF ST. LAWRENCE SEAWAY DEVELOPMENT CORPORATION FOR 1984—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on Public Works and Transportation.

(For message, see proceedings of the Senate of today, Thursday, July 25, 1985.)

ANNUAL REPORT OF REHABILITATION SERVICES ADMINISTRATION FOR FISCAL YEAR 1984—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on Education and Labor.

(For message, see proceedings of the Senate of today, Thursday, July 25, 1985.)

PERMISSION FOR COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION TO HAVE UNTIL MIDNIGHT, FRIDAY, JULY 26, 1985 TO FILE A REPORT ON H.R. 6, WATER RESOURCES CONSERVATION, DEVELOPMENT, AND INFRASTRUCTURE IMPROVEMENT AND REHABILITATION ACT OF 1985

Mr. ROE. Mr. Speaker, I ask unanimous consent that the Committee on Public Works and Transportation may have until midnight Friday, July 26, 1985 to file a report on H.R. 6, the Water Resources Conservation, Development, and Infrastructure Improvement and Rehabilitation Act of 1985.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

Mrs. MARTIN of Illinois. Reserving the right to object, Mr. Speaker, has this matter been cleared with the ranking minority member?

Mr. ROE. Mr. Speaker, will the gentlewoman yield?

Mrs. MARTIN of Illinois. Under my reservation, Mr. Speaker, I yield to the gentleman from New Jersey.

Mr. ROE. I thank the gentlewoman for yielding.

Mr. Speaker, this matter has been cleared.

Mrs. MARTIN of Illinois. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

GENERAL LEAVE

Mr. BOLAND. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill, H.R. 3038.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT-INDEPENDENT AGENCIES APPROPRIATION ACT, 1986

Mr. BOLAND. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 3038) making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1986, and for other purposes.

The SPEAKER. The question is on the motion offered by the gentleman from Massachusetts [Mr. BOLAND].

The motion was agreed to.

□ 1008

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill, H.R. 3038, with Mr. PANETTA in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee of the Whole rose on July 24, 1985, all time for general debate had expired.

The Clerk will read.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the following sums are appropriated, out of any money in the Treasury not otherwise appropriated, for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1986, and for other purposes, namely:

TITLE I

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

HOUSING PROGRAMS

ANNUAL CONTRIBUTIONS FOR ASSISTED HOUSING (INCLUDING RESCISSION)

The amount of contracts for annual contributions, not otherwise provided for, as authorized by section 5 of the United States Housing Act of 1937, as amended (42 U.S.C. 1437c), and heretofore approved in appropriation Acts, is increased by $925,000,000: *Provided*, That the budget authority obligated under contracts for annual contributions shall be increased above amounts heretofore provided in appropriation Acts by $10,690,902,781: *Provided further*, That of the budget authority provided herein, $2,143,800,000 shall be for assistance in financing the development or acquisition cost of public housing, of which $163,800,000 shall be for assistance in financing the development or acquisition cost of housing for Indian families; $735,295,000 shall be available as an appropriation of funds, to remain available until expended, for modernization of existing public housing projects pursuant to section 14 of such Act (42 U.S.C. 1437l); $1,616,640,000 shall be for assistance for projects developed for the elderly or handicapped under section 202 of the Housing Act of 1959, as amended (12 U.S.C. 1701q); $2,468,160,000 shall be for the section 8 existing housing program (42 U.S.C. 1437f); $1,286,100,000 shall be for the section 8 moderate rehabilitation program (42 U.S.C. 1437f); $75,000,000 shall be available as an appropriation of funds, to remain available until September 30, 1986, only for rental rehabilitation grants pursuant to section 17(a)(1)(A) of the United States Housing Act of 1937, as amended (42 U.S.C. 1437o); $75,000,000 shall be available as an appropriation of funds, to remain available until September 30, 1986, only for development grants pursuant to section 17(a)(1)(B) of the

United States Housing Act of 1937, as amended (42 U.S.C. 1437o); and $672,177,500 shall be available for the housing voucher program under section 8(o) of the United States Housing Act of 1937, as amended (42 U.S.C. 1437f): *Provided further,* That $500,000,000 shall be deferred and shall not become available until January 1, 1986: *Provided further,* That any balances of authorities made available prior to the enactment of this Act which are or become available for obligation in fiscal year 1986 shall be added to and merged with the authority approved herein, and such merged amounts shall be made subject only to terms and conditions of law applicable to authorities becoming available in fiscal year 1986: *Provided further,* That none of the merged amounts available for obligation in 1986 shall be subject to the provisions of section 213(d) of the Housing and Community Development Act of 1974, as amended (42 U.S.C. 1439): *Provided further,* That all amounts of budget authority (and contract authority) equal to the amounts of such budget authority (and contract authority) which are recaptured during fiscal year 1986 shall be rescinded: *Provided further,* That the United States Housing Act of 1937 is amended as follows:

(1) Section 6(b) is amended by striking out the period at the end of the first sentence and inserting in lieu thereof: "except, in cases where the Department cannot demonstrate that the prototype cost sought to be imposed reflects fully costs for public housing units of comparable size and type of building for which contracts were let in the area within three months of the effective date of the prototype, the Department shall approve commitments and enter annual contributions contracts, without reference to prototype cost; instead, the Department shall approve the lowest responsible bid received by the public housing authority through a competitive process.".

(2) In the third sentence of section 6(b) there shall be inserted after the word "determination" the phrase "or in approving plans, commitments and funding for projects excepted herein from prototype costs".

(3) The last sentence of section 6(b) is amended by striking out the period and inserting in lieu thereof: "; no prototype costs for any area shall become effective unless the proposed prototype costs, together with the data on which such costs are based, shall have been published for notice and comment in accordance with section 553 of title 5, United States Code, and the relevant rulemaking regulations of the Department.".

(4) Section 6(j) is amended by striking out "three or more bedrooms" and inserting in lieu thereof: "a mix of two and three or more bedrooms".

:*Provided further,* That up to 20 per centum of the $1,980,000,000 provided herein for assistance in financing the development or acquisition cost of public housing shall be made available for major reconstruction of obsolete public housing projects.

AMENDMENT OFFERED BY MR. BARTLETT

Mr. BARTLETT. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BARTLETT: Page 3, strike out the proviso beginning on line 17.

□ 1010

Mr. BARTLETT. Mr. Chairman, what this amendment would do, and it is the first in a series of amendments to bring us to a freeze level for fiscal year 1986, would be to delete the $500 million item in the appropriations bill which provides for a fund, unspecified as to programs, for new programs that may be created at a later time.

I would call to the Committee's attention the line item in the appropriations bill that is entitled "Program Reserve," and I have in front of me a chart showing fiscal year 1985 and fiscal year 1986, and it is very apparent of course to the committee that in fiscal year 1985 there was no such item known as Program Reserve, and in fiscal year 1986 we would then be adding to the appropriations $500 million for unspecified, new, unauthorized programs that had never even been considered by this House.

Now I want to begin by reminding the House why it is necessary to adopt each of these three amendments, beginning with this $500 million deletion. It is necessary in summary to reduce the totality of the assisted housing program's appropriations bill; some $10 billion in the appropriations bill, back to the fiscal year 1985 appropriated level. That level is $8.9 billion. As you recall from the debate, that requires a $1.7 billion reduction, and $1.7 billion of new spending in this section of the bill was achieved in two methods.

First, by changing accounting methods under modernization in which we do the same amount of modernization from one year to the next, but we call it $900 million in reductions, and so in essence, we spend that $900 million twice.

The second is $800 million from a conversion program to section 8 of purchasing contracts; the conversion is now completed, and in fiscal year 1985 we left $800 million unspent in the appropriations bill for 1985, but the committee bill would take that $800 million and add it to or include it in the baseline for fiscal year 1986.

Thus the need to reduce the total spending bill, appropriations bill for this portion of the appropriations, down to $8.9 billion.

I offer this amendment for two reasons. First on procedure and second on substance. First on procedure: These new programs which are unspecified in the appropriations bill have never been authorized by the Congress; indeed they have never even been debated on the floor of the House.

Mr. VENTO. Will the gentleman yield?

Mr. BARTLETT. I yield to the gentleman.

Mr. VENTO. I just want to clue the gentleman in that in fact the Emergency Shelter Program has been passed this House on three separate occasions. So it is not—perhaps not in this magnitude, but——

Mr. BARTLETT. Reclaiming my time, I appreciate the gentleman bringing that up, because in the appropriations bill, there is no specification as to whether that program or any other program would be in this new program reserve. It is simply a reserve in the bill for unspecified programs. That may or may not turn out to be one of them.

The programs have never been authorized by the Congress. That is the one thing that they have in common and the one thing that we know about them is they are unspecified and they are as yet unauthorized, and may well never be authorized.

Mr. SCHUMER. Will the gentleman yield?

Mr. BARTLETT. I yield to the gentleman.

Mr. SCHUMER. I would just ask the gentleman a question. Is it not true that if none of those programs are authorized, that that amount of money could be spent on existing programs?

Mr. BARTLETT. Reclaiming my time, the gentleman is correct, and that is one of the difficulties of this bill.

This provision is a proviso that says that $500 million is simply deferred until January 1, 1986, for unauthorized and unspecified programs.

Let me finish my point and then I will be happy to yield to the gentleman as I know he will to me during the debate.

Now on the substance, there are a large number of Members of this body who have concluded that this is the year to at least freeze spending in the aggregate. The difficulty is you cannot freeze spending in food nutrition, in defense, in NASA, in education of the handicapped, in disability rehabilitation in other areas while you at the same time create new programs where none had existed before.

Mr. GREEN. Will the gentleman yield?

Mr. BARTLETT. I yield to the gentleman.

Mr. GREEN. I thank my friend from Texas for yielding to me, and I really do find it passing strange that a member of the Banking Committee should be criticizing us for using this reserve approach.

Essentially what we have done is to try to protect the interests of your committee, the authorizing committee on this housing legislation, by creating the reserve.

Mr. BARTLETT. Reclaiming my time, and we had a portion of that debate yesterday, and I think that is what the Appropriations Committee has done.

(By unanimous consent, Mr. BARTLETT was allowed to proceed for 2 additional minutes.)

Mr. BARTLETT. That is precisely what the Appropriations Committee has done, to defer a $500 million item to another committee of Congress. I would suggest it would be far preferable to defer to the will of the House in total by creating a new program reserve today, we in essence short-circuit the debate when the authorization comes up, because Members on both sides of the aisle will stand up and say, we have already set aside the money; it is already in appropriations, so why should not we go ahead and authorize it to be spent?

Mr. GREEN. If the gentleman will yield further.

Mr. BARTLETT. I further yield to the gentleman.

Mr. GREEN. I do appreciate what he is saying, but the fact of the matter is, I think we are being honest with the House. We are saying that it is the intention of the Appropriations Committee to have an additional $500 million for housing; and we are spelling that out in this bill.

We will not deny the House the opportunity to pass on that. The fact of the matter is this is not some new device that is on the floor for the first time this year; a couple of years ago we had a very similar device, and we came back to the House and got approval of the specific allocation of those funds, as we would this year.

Mr. BARTLETT. Reclaiming my time, the correct way to do it, the correct way to create new programs, would be to decide that those new programs are more important than old programs, and to take them out of other appropriated items or other authorized items.

My point would be that the committee ought to allow the House to work its will without first spending the money and then deciding whether to authorize.

Mr. MACK. Will the gentleman yield?

Mr. BARTLETT. I yield to the gentleman.

Mr. MACK. I thank the gentleman for yielding, and I do not think there is any question about the honesty of the committee. I think that what we are really concerned about here is that a time when we are—every area of spending, at least people are coming forward and saying we ought to be freezing and in this particular case to be saying that we are going to set aside half a billion dollars for programs to be worked out in the future, and I think the gentleman is absolutely correct.

We will be reminded, on a day-to-day basis when we deal with authorization, that the Appropriations Committee has already allowed for the money, so why should not we go through with the program?

I just want to compliment the gentleman for bringing this information to us, and making us aware of it.

Mr. BARTLETT. I thank the gentleman.

I yield to the gentleman from New York [Mr. GREEN].

Mr. GREEN. I thank the gentleman for yielding again. I think the precedent is very clear that this subcommittee did not assume, when it established one of those reserves 2 years ago, that we were then free on our own to see that money allocated. We came back to the House with a specific schedule on how the money should be allocated among the HODAG and the rental rehabilitation program, the voucher program, the rehab program and the existing section 8 program.

We got the House's approval before any of that money was spent, and I think it is misleading to suggest that we are spending any of that money today.

We are not spending the money; we are simply putting the House on notice that we feel that housing is a priority, and that we are, therefore, reserving half a billion dollars while we defer to the Banking Committee to decide what sort of a housing bill we should have. I think the House ought to know that we are trying to establish a priority.

(On request of Mr. GREEN and by unanimous consent, Mr. BARTLETT was allowed to proceed for 3 additional minutes.)

Mr. BARTLETT. I yield to the gentleman from New York.

Mr. GREEN. I thank the gentleman for yielding again, and I think we are trying to establish a priority. We are saying that the housing programs are important in the midst of all the programs that this subcommittee has to deal with.

We are saying that we ought to establish the priority for this funding. I can assure the gentleman that if the funds are not reserved for housing purposes, there would be plenty of other Members standing in the wings with amendments to use this money for other purposes.

We are saying we want to establish a priority; we want to establish a priority for housing, but we want the gentleman's committee, the authorizing committee, to have the opportunity to set policy in the housing area.

Mr. BARTLETT. Reclaiming my time, as the gentleman knows, these are new programs; these are programs that do not now exist and that is the difficulty with it; some may be good, some may be bad, but in the context of the $230 billion deficit, in the context of this House, freezing NASA, freezing defense, freezing education for the handicapped, freezing disability rights, freezing school nutrition, this is not the year nor the place nor the time nor the bill to be creating new programs.

Mr. PURSELL. Will the gentleman yield?

Mr. BARTLETT. I yield to the gentleman.

Mr. PURSELL. I want to congratulate the gentleman from Texas. As a member of the committee, my excellent colleagues here; Mr. BOEHLERT, Mr. GREEN, and our outstanding members of the committee that provide a lot of leadership over the years in housing development, which I have supported in the past, but I think in respect to the deficit and people would like to read the editorial in the Washington Post today that addressed the issue, how severe this is nationally. I congratulate the gentleman for an outstanding amendment.

□ 1020

I think we ought to continue the housing program but at the freeze level. As I understand it, these are new additional programs, and in this particular amendment you are trying to ask the House to restrain themselves at least until they get authorized; and, as I understand it, the program at this point has not been authorized. Is that correct?

Mr. BARTLETT. Reclaiming my time, the gentleman is correct. And there is no way to characterize, as the gentleman knows, brand new programs that are not yet authorized, that were not appropriated last year. There is no way to characterize $500 million in new programs as anything approaching a freeze.

Like the gentleman, I have the greatest respect for the Housing Subcommittee, the chairman and the ranking minority member, and I do not have a quarrel with them individually. I think the House does have a quarrel with the $1.7 billion increase in one year and a half a billion dollars of it in new programs.

Mr. MACK. Mr. Chairman, will the gentleman yield?

Mr. BARTLETT. I yield to the gentleman from Florida.

Mr. MACK. I just want to follow up on a point that several Members have made here this morning, and that is that at least the picture that is beginning to be developed is if the $500 million—let us say there was no authorization that came through itemizing either the new program or new programs. What happens to that $500 million at that time?

Mr. BARTLETT. Well, I would call the gentleman's attention to page 5 of the bill. What I am deleting is a proviso or a provision that simply sets aside $500 million and defers it until January 1, 1986.

The CHAIRMAN. The time of the gentleman from Texas [Mr. BARTLETT] has expired.

(By unanimous consent, Mr. BARTLETT was allowed to proceed for 1 additional minute.)

Mr. BARTLETT. And defers that until January 1, 1986. So if the House does not act—and it may well not—on authorizing these new programs, or the Congress as a whole does not, well, then, that $500 million is freed up to go back on top of the fiscal year 1985 freeze level of $8.9 billion. So the taxpayers lose, in any event, is the gentleman's point.

Mr. MACK. That was really the question. The $500 million, then, could be used for other aspects of the housing program?

Mr. BARTLETT. The gentleman is correct.

Mr. GREEN. Mr. Chairman, will the gentleman yield?

Mr. BARTLETT. I yield to the gentleman from New York.

Mr. GREEN. I thank the gentleman for yielding so that I can respond to the gentleman from Florida.

We shall have to come back to the House with a program for using this money. We want to use the money for housing. We have produced a bill which is a freeze bill and below a freeze bill in terms of last year's appropriation, and we are below our 302(b) allocation. We have increased some programs, we have decreased others, we have kept others level. That is what the appropriation process is supposed to accomplish.

We have decided that we have a priority for a certain amount of spending for housing. We are trying to alert the House to the fact that we have that priority but to defer to the——

The CHAIRMAN. The time of the gentleman from Texas [Mr. BARTLETT] has again expired.

(On request of Mr. GREEN and by unanimous consent, Mr. BARTLETT was allowed to proceed for 1 additional minute.)

Mr. GREEN. To defer to the Banking Committee so that it can set policy and come to the House with its recommendations, and we can then come back with appropriate action to earmark this money for specific housing programs. If the House does not act on the housing bill, we will have to come back to the House and earmark this for specific housing. We are simply trying to set the priority in this bill.

Mr. BARTLETT. Reclaiming my time, what the House would prefer that the appropriations and the authorizing committee do is to first adopt a freeze budget at the $8.9 billion level, which was the amount that we spent last year. It is true that in some areas the Appropriations Committee made some modest reductions in some programs. But on a net basis, we would be increasing this budget by $1.7 billion.

I yield further to the gentleman from New York.

Mr. GREEN. I do not call a cut in general revenue sharing of over $1 billion as a minor cut. We have taken very painful cuts in order to be able to establish these priorities. And I think it is wrong for the gentleman to say that we are violating any sort of freeze because we have taken those painful cuts in other places in order to fund what we consider our priorities.

Mr. BARTLETT. Reclaiming my time, the $10.6 billion in 1986 compares to $8.9 billion in 1985 from year to year. This is the wrong place and the wrong time and the wrong bill and the wrong year to be creating new programs.

The CHAIRMAN. The time of the gentleman from Texas [Mr. BARTLETT] has again expired.

(On request of Mr. PURSELL and by unanimous consent, Mr. BARTLETT was allowed to proceed for 5 additional minutes.)

Mr. BARTLETT. I yield to the gentleman from Michigan.

Mr. PURSELL. I think it is appropriate to know here that most housing people that I have talked to, at least in our area, are concerned mostly with, No. 1, the deficit and, No. 2, rising interest rates, or at least a control and hopefully a decline of interest rates, at least 1 or 2 or 3 percentage points, so that housing can get back on track.

As I understand it, this is not necessarily a low-income type project. It is mostly addressed as moderate-level housing programs, and I think it is appropriate for us, who do want to help in the area of low income, to address the safety net that we have tried to provide here over the years, but I think it is important that housing people are not looking for more Government expenditures to build moderate-type housing in light of the Federal national debt as we see it today.

Mr. BARTLETT. The gentleman is correct. And I want to make crystal clear to every Member of the House who is at this debate and listening to this debate that this $10 billion item entitled "Assisted Housing Programs," this aggregate, is not that portion that actually goes to low-income tenants. That is an additional $12 billion that is off budget, that is entitled by the creation of these 100,000 new units. All these assisted housing programs do is create new units or to repair existing units. But the actual transfer dollars, the actual money that goes to low-income tenants is not being affected by this amendment or by this section of the bill. This is, in essence, to create 100,000 new units in the totality of the bill and not in any way to affect the month-to-month subsidies.

I would be happy to yield to the gentleman from New York.

Mr. GREEN. I am a little puzzled at the gentleman's statement that the creation of the 100,000 additional housing units is off budget. That just is not so. The fact of the matter is that the numbers look very large in the housing accounts because these things are on budget and because we have to lay out the budget authority that gets paid year after year, often over 20 and 30 years, and that very much inflates the size of these programs in terms of the amount of budget authority required, as contrasted to the amount of actual housing we are going to be adding to the housing stock.

Mr. BARTLETT. If the gentleman is saying that we are in this section of the budget or this section of the appropriations bill creating $10.6 billion worth of new or repaired units so as to create an additional entitlement on top of the $12 billion of off budget nonappropriated entitlements for additional transfer payments to some 4 million units of existing housing that already exists, then the gentleman is correct. The point is, this portion of the budget does not affect those ongoing monthly payments that are made month to month to the 4 million assisted housing units that exist in this country as a whole.

Mr. GREEN. Those 4 million units are on budget. They were on budget last year and the year before and the year before that. The fact that you have a $10 billion account in this bill is because we are covering payments that are going to be made 20 and 30 years hence, just as the payments that are being made this year were in last year's budget and in the budget the year before that and in the budget the year before that. That budget authority was all appropriated. It is not off budget.

Mr. BARTLETT. I would call to the gentleman's attention page 80 of his conference report, which lists the $12 billion of additional payments that are required to support every single year the existing units.

Mr. GREEN. If the gentleman will yield further, that money was all on budget. That budget authority was appropriated. None of this is off budget.

Mr. ROEMER. Mr. Chairman, will the gentleman yield?

Mr. BARTLETT. I yield to my colleague, the gentleman from Louisiana.

Mr. ROEMER. I thank my colleague for yielding.

"On budget," "off budget," it is money we do not have. As I understand the gentleman's amendment, you are trying to save $500 million in what is called new program reserve. Could you explain to the Members of this body what these programs are? Have we debated them? Have we spelled them out? Are they part of the national commitment? Just what is the $500 million to be used for?

Mr. BARTLETT. The gentleman asks a penetrating question. What these programs have in common is

that they are unspecified in the appropriations bill, number one, so we do not know what they are in reading the bill or the conference report. We speculate what they may or may not be. Number two, what they have in common is that they are new. They have never been authorized by the Congress. They do not exist today. They did not exist in 1985 and they do not exist in 1986. And the third thing they have in common is that we have refused to take that $500 million out of other existing programs in order to pay for them.

So I would ask for an honest debate on authorizing those programs and say if those additional programs, whatever they are, are all that good, well, then, we can take the money out of a program that is not so good.

The CHAIRMAN. The time of the gentleman from Texas [Mr. BARTLETT] has again expired.

(On request of Mr. ROEMER and by unanimous consent, Mr. BARTLETT was allowed to proceed for 2 additional minutes.)

□ 1030

Mr. ROEMER. I thank the gentleman for yielding.

Would the gentleman characterize the $500 million that his amendment would delete as a real savings? Would the gentleman characterize the $500 million, whether it be on budget or off budget, being important in and of itself?

Mr. BARTLETT. The gentleman is correct. If this amendment passes, the taxpayers will be liable for $500 million of less spending in 1986 than they would be if the amendment does not pass.

Mr. ROEMER. Then I think the gentleman has an excellent amendment. I thank him for offering it.

Mr. VENTO. Mr. Chairman, will the gentleman yield?

Mr. BARTLETT. I yield to the gentleman.

Mr. VENTO. I think the gentleman says that he wants a fair debate, but I think he sets up a tenet which is most unfair with regards to his justification in terms of what he is asking for. He seems to want to make it everything to everyone, but yet I think has provided no clarity to this House with regard to this appropriation.

I am saddened by the gentleman's remarks. This particular amendment goes beyond a freeze. This lowers and takes away from programs and goes below a freeze; that is what the gentleman is attempting to do. This committee should be commended for the action it has taken in staying under the budget and within a freeze with regards to the program by virtue of the types of accounting that has been done here.

The gentleman goes back and looks at appropriations that have been made for the past years in terms of the contracts that shoot 25 and 30 years ahead and then the gentleman puts that burden on here suggesting that that is off budget. It is not off budget. It was all appropriated in past years. In fact, these housing programs have had to deal with a very stringent type of appropriation process, and then the gentleman comes to this House floor and suggests that the ongoing programs that we have appropriated money for in the past have to be added in to what we are proposing to do this year.

By any standard, what is being proposed in this particular bill in terms of public housing and programs in community development are about half the level that they were in 1980. Almost half the level that they were in 1980. The modifications and changes this year to keep it within budget I believe are entirely appropriate in terms of and below a freeze. The gentleman takes to task the Appropriations Committee.

The CHAIRMAN. The time of the gentleman from Texas [Mr. BARTLETT] has expired.

(On request of Mr. VENTO and by unanimous consent, Mr. BARTLETT was allowed to proceed for 2 additional minutes.)

Mr. BARTLETT. If the gentleman would restate his question, I will yield to the gentleman from Minnesota [Mr. VENTO].

Mr. VENTO. The point is that this particular budget as I said is at least within the budget and certainly we should not be held to task for appropriations that have gone in the past in terms of off budget funding.

Mr. BARTLETT. I thank the gentleman for his question and I reclaim my time.

The fact of the matter is that there is no way to have a budget freeze if you create $500 million, a half a billion dollars of new programs that did not exist last year, and you do not take it out of existing programs, and that is what this bill does.

Mr. PENNY. Mr. Chairman, will the gentleman yield?

Mr. BARTLETT. I yield to the gentleman.

Mr. PENNY. I thank the gentleman for yielding.

Mr. Chairman, that is precisely the point. You cannot say that we are cutting housing programs by $500 million by adopting this amendment. These are new programs; this is new spending. What the committee had in its fiscal year 1985 budget was an $11-billion appropriation level, but that money was not all spent on housing projects and other housing programs. There was money in that budget to pay interest on the debt in the housing area; that has now been moved to another budget category. That interest payment will still be made. But they treat it as a $1 billion savings in this budget, even though it is still going to be spent elsewhere, and they are now going to spend it twice.

Additionally, there was a one-time appropriation last year to buy out some housing projects. That money was not to recur; it was not to be spent again, but they have kept it in the budget, and they are now going to spend it this year.

We have a series of amendments; this is just one of three. What we are achieving by these amendments is taking out additional expenditures and additional housing projects over and above the number and the dollars appropriated in fiscal year 1985. So if we want a true freeze on housing programs, which is what this House is trying to accomplish, we must adopt these 3 amendments and start with this one.

Mr. BARTLETT. The gentleman is precisely correct in reminding us why this amendment is necessary.

The CHAIRMAN. The time of the gentleman from Texas [Mr. BARTLETT] has expired.

Mr. PENNY. Mr. Chairman, I ask unanimous consent that the gentleman be given 1 additional minute.

The CHAIRMAN. Is there objection to the request of the gentleman from Minnesota?

Mr. VENTO. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

Mr. SCHUMER. The Chairman, I move to strike the requisite number of words.

Mr. Chairman, if this amendment passes, we will, ironically, by removing this reserve, move the House backward in the process of trying to cut the budget. I would ask all Members to please heed my words. The Housing Authorization Committee has struggled over the last 5 years. We have borne a disproportionate amount of cuts. We have receded from $31 billion in authorized money and that is including, I remind the gentleman from Texas, I remind him that is including out-year expenditures, that is not an off-budget item. It is totally incorrect to state that it is.

We have gone down to approximately $15 billion. Half. Every year there has been a struggle on the Housing Authorizing Committee. Some Members say that we must try to ask for more, because we will be cut, let us ask for more and exceed the budget resolution, and then we will be cut and we will come out ahead. Every year a good number of members of the Housing Authorization Committee, including this gentleman from Brooklyn, have said "no." We want to live within the budget resolution, because that is the only way to be responsible and it is the only way to do something.

We did that this year. We are not above a freeze in this resolution. We are $60 million below a freeze in this resolution. Now, it has been brought up by the gentleman from Texas that the $500 million is a reserve. It is indeed. Is it new money? It is not. It is money that has been taken from old programs, programs that have existed for years and put into reserve in case some of the new programs will pass the authorization. That is what it is. Nothing more, nothing less.

Now, you say that we should not authorize a new program. That was originally the gentleman on the Appropriation Committee's view too. And we went to him on the Housing Subcommittee, and we have said we have come up with some newer, cost-efficient programs. We have come up with some programs that will build six units of housing for every dollar spent where the old programs only built one unit of housing. Do not put in a huge amount of money for those new programs, we said to him but, God, please let us have a little bit of that money to see if these programs work.

The gentleman from Texas—and I have worked with him on one of these new programs and he is a supporter of it—The gentleman from Florida, the gentleman from Louisiana, and even, yes, the gentleman from Massachusetts, the chairman of this subcommittee, has constantly urged us to do is get more cost efficient in housing because we do not have money like we did in the old days. And we did. So we went to the gentleman from Massachusetts and we said take $500 million out of some of the existing programs which many people in this House have said have not worked and put it in a reserve. That is what we did.

Now, to cut this $500 million out now tells the Housing Authorization Committee, tells everybody in this country—and we know there is a desperate need for housing, although, as my friend, the gentleman from Michigan has stated, we cannot afford to solve those needs right now, given the deficit—and it says two things: It first says to the Housing Authorizing Committee, do not try to be responsible. Do not try to live within the budget resolution, because we will cut you further anyway. It should be noted that a freeze would actually give us more money if you define a freeze as the Budget Committee has.

Such an act would say, "Go back to your old game. When the Budget Committee says $15 billion, authorize $18 or $19 billion, and it will be cut some." That is the first lesson that it says.

It says in the second lesson, it says to people like myself who have been trying to find cost-efficient ways to build housing, "Do not do it," because the minute you try, you will be attacked for coming up with a new program and they will say, "Do not do it."

So let us keep the status quo, ladies and gentlemen. Let us keep the status quo. Let us tell the good gentleman from Massachusetts.

The CHAIRMAN. The time of the gentleman from New York [Mr. SCHUMER] has expired.

(By unanimous consent, Mr. SCHUMER was allowed to proceed for 2 additional minutes.)

Mr. SCHUMER. When the House Authorization Committee does what it is supposed to do, does a little better on housing, does not spend hundreds of thousands of dollars for one unit, and instead finds a way to spend only tens of thousands of dollars to build one unit we should not discourage them.

□ 1040

If it was new money, if we had not lived within the budget resolution, I would be on the floor supporting the amendment offered by the gentleman from Texas, but it is not new money. It is money that the Appropriations Committee originally had in old programs, and took it out at our request.

Ladies and gentlemen of this House, it is an easy vote to vote and say cut housing some more. We all know that housing does not have the constituency that, say, agriculture or water pollution or so many of the other programs do. But it is not a fair vote, it is not a right vote, and it says once and for all, "Do not try to innovate." Go to the old, established ways of doing housing that have been discredited, and do not dare try to stick your big toe in the water and do something new because we will chop it off.

Mr. BARTLETT. Mr. Chairman, will the gentleman yield?

Mr. SCHUMER. I yield to the gentleman from Texas.

Mr. BARTLETT. I thank the gentleman for his comments, and also for his arguments and his work on the Housing Subcommittee.

At least one of the programs that may be included in this unspecified reserve may have some merit, and it is a program that I think has a lot of merit. But I have pled with the gentleman from New York to actually use that program to replace an existing program, and that has not happened.

We still have in this bill HODAG, which would spend $75 million to create 3,000 new units, of which 20 percent will be for low income at a cost of $22,000 per unit.

The CHAIRMAN. The time of the gentleman from New York [Mr. SCHUMER] has again expired.

Mr. BARTLETT. Mr. Chairman, I ask unanimous consent that the gentleman be allowed to proceed for 5 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

Mr. MCKINNEY. Mr. Chairman, reserving the right to object, and I shall not, and I certainly appreciate what the gentleman from New York has had to say, and the gentleman from Texas, but I do think that this is a deliberative body where we need to spread ourselves around a little bit more.

So I would state that I will object next time if the time is extended.

Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

The CHAIRMAN. The gentleman from New York [Mr. SCHUMER] is recognized for an additional 5 minutes.

Mr. BARTLETT. If the gentleman would yield further, I would ask the gentleman from New York one specific question.

I have a chart here, and the wall chart I used a minute ago of the appropriations items which were eliminated.

Mr. SCHUMER. My eyesight is not good enough to see that chart.

Mr. BARTLETT. I will give the gentleman a copy.

If the gentleman could just tell us which existing programs were eliminated to create the new programs the gentleman is trying to achieve.

Mr. SCHUMER. The program the gentleman says we should eliminate, the HODAG Program, is the other cost-efficient program in the budget. What was done was that larger programs such as existing section 8, such as public housing, were appropriated at $500 million less to indeed then put the new money in this program.

Mr. GREEN. If the gentleman will yield on that point, I think that is a very important point. If one takes the HODAG and the rental rehab program, 2 years ago we made a 2-year appropriation for those programs, following the Banking Committee and following our reserving the money to accommodate the Banking Committee, to the tune of $615 million, or more than $300 million per year. We did not fund it last year for that reason.

In this year's bill, we have funded those programs only to the tune of $150 million, or at a rate per year less than half of what we provided for 2 years ago. That is how we came up, along with a whole page full of other cuts below last year that I can show the gentleman, with the money for that $500 million.

So the gentleman in the well is exactly right. This is money that we have saved elsewhere.

Mr. BARTLETT. Mr. Chairman, if the gentleman will yield further, I

think it is important to get it on the record. I have the list of those programs in front of me. The gentleman mentioned two: public housing and section 8. Public housing, the committee would increase the expenditures from $945 million to $1.9 billion. Section 8, four different categories of section 8, and every single one of them was increased: with one exception that was decreased slightly. Section 202, $1.7 billion to $1.9 billion. Housing vouchers were the only one decreased.

Mr. SCHUMER. Section 202 is not section 8, neither is housing vouchers.

Mr. BARTLETT. Section 202 is section 8.

Mr. SCHUMER. Mr. Chairman, if I may reclaim my time, the gentleman is not being fair. My basic point is, the gentleman is saying eliminate one new program that is working for another new program that is working that are little bitty programs, drops in the bucket.

What we have done to live within this budget resolution is take money out of the larger, more mammoth programs. We have also put money into vouchers, which the administration supports. What we are doing in the housing field, if the gentleman from Texas would allow me, and I know indeed that the gentleman is trying to innovate with programs because we have worked on one together that would be wiped out if the reserve is eliminated, is try and see what other kinds of programs work.

There has been a suggestion from HUD. That is incorporated in the appropriation; small, but there. There is a suggestion from this gentleman which is incorporated. There is a suggestion from a few other gentlemen. That is incorporated. All of these are itty-bitty programs, but again, I remind the gentleman, as he responded last time, we are within the budget resolution. We have lived within the budget resolution. We will continue to live within the budget resolution, and that should be the sine qua non of this body, because otherwise the budget resolution will fall apart.

Mr. MORRISON of Connecticut. Mr. Chairman, will the gentleman yield?

Mr. SCHUMER. I would be happy to yield to the gentleman from Connecticut.

Mr. MORRISON of Connecticut. I thank the gentleman for yielding.

Mr. Chairman, I just want to commend the gentleman on his statement. I think to underscore one of the real-life dynamics of what is going on here, we all recognize the difficulty of the Appropriations Committee, faced with a situation in which the authorizing committees have not been able to bring and have acted upon on the floor all of their measures.

We hear regularly from members of authorizing committees that they feel frustrated that their measures and new measures are not being considered, and we hear the same frustration from the Appropriations Committee, that they have to act in the absence of authorizations.

Here is an appropriation measure where that has been accommodated, and it has been accommodated by discussions over the year to try to strike the proper balance. If one votes to strike this $500 million out of this appropriation, the message that is sent is, "Do not bother. Do not bother the Appropriations Committee to listen to the authorizing subcommittee, and do not bother with respect to the authorization process to even try to work within the process and get something constructive to happen."

The gentleman from New York is absolutely correct. This $500 million reserve accommodates new programs within the authorization that ought to be funded.

Mr. PORTER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I have been speaking out to all who would listen for this entire year about the pernicious effect of huge deficits upon our economy and upon the future of our children and our society.

One thing I have said from the very start is that we have to begin with a freeze on all spending categories, and I have previously on this floor commended the chairman of the subcommittee and the ranking minority member of this subcommittee for reaching that level in terms of this spending bill. But there is more to achieving budget savings than simply a freeze, and I have said repeatedly that we have to eliminate uneconomic or wasteful programs, and most importantly, we must not in the face of these huge deficits, create any new spending programs or expand existing ones.

We have to hold the line in each of these ways if we are going to get this deficit under control. The comments of the gentleman from New York about the budget are irrelevant. The budget is dead, let us face it. The budget is not going anywhere.

What we have to do is establish standards apart from the budget because there is no budget, that will bring down this deficit. One such standard is that we cannot create new programs.

What this amendment does is attempt to eliminate a program reserve. The gentleman from New York said the money involved here is taken from old programs and set aside in case new programs are authorized. I want to say this morning that what we want to do is not fund any new programs, authorized or not. We want to take the money from old programs that don't work or are wasteful and put that money toward reducing the deficit, not new programs. That is exactly what the amendment offered by the gentleman from Texas attempts to do, and I commend him for offering it.

□ 1050

Mr. BARTLETT. Mr. Chairman, will the gentleman yield?

Mr. PORTER. I yield to the gentleman from Texas.

Mr. BARTLETT. Mr. Chairman, I thank the gentleman for yielding.

A minute ago we had in the debate the allegation that existing programs had been reduced out of public housing and section 8. I would want on the record that both section 8 and public housing were vastly increased under the appropriation bill, and in addition to that, we added this $500 million on for new programs.

There were no reductions, as the gentleman knows. We merely add on. That is what is wrong with the budget process, and that is what is causing the deficit today.

Mr. VENTO. Mr. Chairman, will the gentleman yield?

Mr. PORTER. I yield to the gentleman from Minnesota.

Mr. VENTO. Mr. Chairman, I thank the gentleman for yielding.

I respectfully disagree with the gentleman from Texas with regard to the reductions. That is a debatable point as to whether or not the old programs have been reduced. I would say indeed that they have.

I would further point out to the gentleman that on this block of $500 million, he can say that the Banking Committee has authorized some of these programs in the past and they could very well flow back in, but what the gentleman has suggested to us is that we ought to cut back the old inefficient programs, maybe the section 8 and others that the gentleman feels are inappropriate. But he leaves us with really no alternative as to whether or not we are willing to address the housing needs of the homeless or the housing needs of the poor, the inner city folks, or rural housing. That is really what is at stake here, and we are trying to create an alternative to meet these needs.

All we are asking is to have an opportunity to permit these new ideas to compete so that we can meet these particular housing needs, the homeless needs, in a more efficient manner, and what the gentleman's amendment would do is to wipe out that opportunity to take money out of the old programs, in my judgment and in my argument, is to put some dollars into the new programs.

As I said to the gentleman, I think we are under budget. I do not think we ought to measure housing dollars with an 11-inch foot ruler. That is what is happening here. We are saying this

program is an easy one; we are dealing with the poor and the program is imperfect. I would hope that the gentleman would look into this.

The problem with not having a budget is that we have a dozen experts in this House who set themselves up as experts as to what a freeze or the budget constitutes. I would just tell the gentleman that this is below a freeze in terms of spending. This appropriation measure does take the money and permit the new ideas to compete, which I think we ought to be doing. This is a creative effort to try to deal with the housing and shelter problems.

Mr. ROEMER. Mr. Chairman, will the gentleman yield?

Mr. PORTER. I yield to the gentleman from Louisiana.

Mr. ROEMER. Mr. Chairman, I thank the gentleman for yielding, and I thank him for his statement.

Whether it is on budget, off budget, over budget, or under budget, the fact is that this amendment takes $500 million in new and yet-to-be-authorized programs and eliminates it. If we cannot do this, we cannot do anything.

Mr. PORTER. Mr. Chairman, I thank the gentleman for his excellent statement.

I think the difference lies in priorities. Some of the gentlemen have talked about the need for new housing programs. In a time of surplus, we should discuss that need. But what must be our highest priority now is to address a deficit that is pernicious to economic growth and our children's future. Unless we get the deficit under control, we are not going to have the ability to build any houses in the future. As I've said over and over again, and attempted to address in opposing a new chemical weapons program this year, now is not the time to be addressing new programs in any area. I urge the adoption of this responsible amendment.

Mr. McKINNEY. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, the gentleman from Texas [Mr. BARTLETT] showed me this amendment yesterday as ranking member of the Housing Subcommittee, and I have studied it. I said to my good friend, the gentleman from Texas, "I really don't think I will try to help you by not speaking against it." But having studied it over the evening, I can do nothing but speak against it.

As a member of the 92 Group, for instance, we pledged ourselves to a freeze. The authorization committee has frozen housing. The Appropriations Committee has frozen it and come in, in fact, below fiscal year 1985. They have taken money from community development block grants, UDAG, the American Battle Monuments Commission, almost everything—you name it—so that we could set aside $500 million to try some new ideas.

I have heard a lot said today that "we can't afford this" and "we can't afford that," but what we really cannot afford is not getting some new ideas in housing. With Government housing programs as they presently stand, we have more of what I call the Builders and Contractors Relief Act, the section 8 program. What a wonderful deal that is. Those programs are inefficient, wasteful, and costly. We have tried to put some new programs in the authorization bill which we think will work better, which we think will produce more, and which we think will be cheaper.

But what has happened? Mr. Chairman, I would suggest to the Members that this is the tragedy of taking up an appropriation bill before an authorization bill. I can tell the Members right now that our authorization bill will be a freeze, it will be within the budget, and it will in fact have some new ideas.

Do you mean to tell me that we are not going to be allowed to have a new program if it is a better idea? Are we going to be like General Motors and Ford back in the 1970's and stay with the gas-guzzlers, that we are not going to try to improve?

What are we here for? What is this blanket "no new programs"? What is this thing? Why have an authorization committee? We, who study housing day in and day out, should we not or do we not have to come forth with some better idea? But you put the word, "new," in front of it, and suddenly it is evil.

I would suggest that we probably need a new Social Security system. I know we need a new management system in the Pentagon. I could suggest that we need a new agricultural production system. They are all bad. They do not work in 1985. We ought to be looking for new ideas. But instead we are going to run with this ideological claptrap of "new is bad." I do not think "new" is bad. I think that the Nehemiah project, for instance, which my friend, the gentleman from Texas, likes, is probably the best idea that has come across in housing in a long, long time. It has its rough spots.

What are we doing? Are we saying that we are going to throw everything in the Nehemiah pool? No. We are saying we are going to take a very small amount of money and look at it.

For the first time, we talk about HHS and HUD talking to each other. Health and Human Services, through rental income payments, puts more money on a day-to-day basis into low-income housing than HUD does for new housing. And what happens? They never talk about housing quality. The Government in fact becomes the biggest rent-payer for slums, decrepit, substandard housing that you can possibly find.

There is nothing wrong with the word, "new." This housing authorization that we will get in September—we should have had it already—is under budget. It is a freeze. This appropriation has carefully taken $500 million out of other programs and set it aside and said, "Let's try something that may work better." The Appropriations Committee has done an excellent job. They have done an incredible job.

Mr. ROEMER. Mr. Chairman, will the gentleman yield on that point?

Mr. McKINNEY. Certainly, I yield to the gentleman from Louisiana.

Mr. ROEMER. Mr. Chairman, we do not disagree about "new." What we disagree about is more. More is the bad idea here, not new. If you want to take new programs and substitute them for the old programs that you say are not working, like section 8, which are up in this budget, let us do it, I say to the gentleman from Connecticut [Mr. McKINNEY]. It is not new; it is more that is bad.

Mr. McKINNEY. Mr. Chairman, I will reclaim my time and say that I think the gentleman is wrong. Right here is a list of every single program that has been cut by the Appropriations Committee in order to put that money aside.

Mr. SCHUMER. Mr. Chairman, will the gentleman yield?

Mr. McKINNEY. I yield to the gentleman from New York.

Mr. SCHUMER. Mr. Chairman, I think the gentleman from Connecticut is exactly on point. What we have done, I would tell the gentleman from Louisiana, is we have done more with less. We have spent less money than we did last year, and yet we are going to be able to build more units than last year because we have some of these new programs. That is what it is about. If the issue is more, then the gentleman from Louisiana should vote against this amendment. But we have done it with less.

The CHAIRMAN. The time of the gentleman from Connecticut [Mr. McKINNEY] has expired.

Mr. VENTO. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, we have been discussing this, and I think that last quote especially epitomizes what is at stake in this particular debate, and that is the debate that somehow the Housing Subcommittee is not within the House-passed budget and not within the mythical freeze. Whatever that freeze is, I do not know. We have 12 different experts, and we have to try to satisfy all of them with regard to what the freeze is. That is the worst type of discipline, the most unfair type of discipline, I submit to this House,

that could possibly occur with regard to judging these bills.

This bill contains less money than we spent last year. That seems to me to be better than a freeze. It is better than a freeze.

That fact of the matter is, though, that I think the heart of the matter gets to another fight. It certainly serves the interest of those who would like to eliminate a national housing program across this Nation. We need that national housing program. Our States and local governments need that type of assistance today, and I think they are going to need it into the future with regard to housing for low-income and moderate-income individuals.

The fact of the matter is that it serves that interest by simply saying this: It simply says that you cannot change any of the existing housing programs that you have. That is what the discipline of this particular amendment suggests. It suggests that you cannot make any changes and you cannot add to the program or modify it, because if you do, you are going to be accused of having a new program.

□ 1100

The new program, the claptrap of new programs, that has occurred here is mindless. It does not look at the facts. It is not interested in the facts. It is only interested in sacrificing them in the name of budget austerity, and that is the problem, I think, with the type of arguments that have been presented here, very hard argument, frankly, to address in the sense that there is the concern about the deficit; but I think it is an unfair argument. I think it is a wrong-headed argument. It is a blind argument that does not address itself to the real concerns and needs of housing across this Nation. Keep the programs static. Do not modify them, and under those circumstances we can see the demise of those housing programs. It is unfair.

The fact is this proposal is within the budget. These particular programs we are talking about, the Nehemiah Program, the programs for the homeless, the programs for the intermediate type of housing needs are important needs across this country. They provide opportunities for nonprofits and they provide opportunities for cities and States to get involved meaningfully in meeting housing needs.

The old programs are expensive. Housing is expensive. We are not going to make a significant contribution to that unless we are willing to stand up for the types of costs that we face in this appropriation bill.

But no one should vote for this amendment with the assumption that these new programs are adding to the commitments. In fact, they are a retreat from that commitment.

Questions have been brought up about the rent supplemental program. They are going to be brought up later. Frankly, the Rent Supplement Program was based on taking money out of the section VIII program and coverting the Rent Supplement Program, so we lost new section VIII units in the past when we were doing that. In other words, that authority was granted. Last year that was accelerated somewhat. Last year the Director of the Budget decided on another parallel, to go out and borrow all the money at Treasury rates and pay the interest rates on them to buy out various types of contracts. In the process of doing so, he spent an extra $2.5 billion. Someone says maybe we should count that toward the budget last year.

The fact of the matter is, there are all kinds of rules, all sorts of experts around here as to what constitutes a freeze. I would just suggest that this budget and the inclusion of this $500 million that is sought to be eliminated is killing new ideas, killing any opportunity to address the types of housing needs that low income and poor peopled have in this country. I think it is wrong.

Mr. Chairman, I think the Bartlett amendment should be defeated on that basis.

Mr. WYLIE. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the Barlett amendment. I want to commend the gentleman for his knowledge and persistence in putting this amendment together.

During the markup of H.R. 1, I offered an amendment which was adopted to establish a congressional policy regarding aggregate budget authority that said:

Findings: The Congress hereby finds that the congressional budget process for fiscal year 1986 has not yet been completed"—and everybody knows that—"and in its consideration of this Act the Committee on Banking, Finance and Urban Affairs of the House of Representatives has been required to operate under new principles of budget accounting, including the inclusion of off-budget items. It is, therefore, the policy of the Congress that the aggregate amounts of funds authorized in this Act for any fiscal year not exceed the total amount of funds approved in the Appropriation Act for similar programs for fiscal year 1985.

Now, the point was made a little earlier that we can talk about budget authority, budget outlays, or how much money is being spent, but in terms of a freeze amendment, and I did think in terms of offering a freeze amendment on this appropriations bill, I find that the amount appropriated is actually less than the amount which was appropriated last year; but the point I would make here is that the Appropriations Committee through appropriating $500 million into this reserve fund has, in effect, appropriated money for five new programs which have not yet been authorized. They are not yet in place, and that is the point the gentleman from Texas would make by his amendment.

I offered an amendment in committee which would delete all new program authorizations and that amounts to about $325 million.

When H.R. 1 comes up on the floor, and I am setting the stage for it right now, I intend to offer a substitute which would comply with this policy statement and freeze the 1986 authorizing level at the 1985 appropriation level.

So what this does, it suggests that we do not want to spend money today for programs which have not yet been authorized. I think as a general proposition that this is not the time to initiate new costly and untried programs.

Now, to suggest that there is no money in here for housing is very misleading. This appropriation bill appropriates $16.4 billion for housing, so it is not as if all the housing programs are going to come to a halt if this amendment is adopted; but I think this is a bad time, as I say, to start new programs. It gives the impression that we have money that we do not have, given the size of the Federal budget deficit, which is now over $200 billion and growing every day.

When our fiscal situation looks better, then I think it is time to look at new programs and suggest new programs be authorized.

In the meantime, I think that additional funds should not be appropriated for programs which have not been authorized and we ought to let the authorizing committee and the Housing Subcommittee work its will here on the House floor.

Mr. SCHUMER. Mr. Chairman, will the gentleman yield?

Mr. WYLIE. I yield to the gentleman from New York.

Mr. SCHUMER. Mr. Chairman, I thank my good friend and colleague from Ohio for yielding. I know that his intentions and integrity are highest. We have worked together on so many things.

But I would just like to ask the gentleman to reiterate a point that he made, one point in his statement that I agree with. Is it true, as the gentleman said, that the appropriation this year is less than last year; is that correct?

Mr. WYLIE. The appropriation level in this bill is less than it was last year.

Mr. SCHUMER. Mr. Chairman, I thank the gentleman.

Mr. WYLIE. But the point I wanted to make is that there are five new programs being authorized in effect with $500 million reserve fund, which is set aside for there use.

Mr. BARTLETT. Mr. Chairman, will the gentleman yield?

Mr. WYLIE. I yield to the gentleman from Texas.

Mr. BARTLETT. Mr. Chairman, I appreciate the gentleman's answer on that. Of course, as the gentleman so well knows, that nominal same amount comes from two items. One is from a change in accounting, which we have debated endlessly on the authorizing committee. The accounting change is not necessarily bad, but it counts as savings, a $980 million savings that the CBO and everyone has looked at and concludes it is not a savings at all. In fact, we are doing the same amount of modernization from one year to the next. You cannot do the same amount of work for half the amount of money.

I would ask the gentleman one additional question. Our colleague, the gentleman from Connecticut, a little while ago described section VIII as inefficient, costly, outmoded—I am paraphrasing—yet this appropriations bill adds on a net basis $950 million to section 8. It does not cut it at all. There are no cuts being made.

Mr. WYLIE. That is correct. We are shifting money around. It is sort of a shell game in a way; but the point I really want to make again is that I do not think we should be authorizing new programs in an appropriation bill, which is what this does.

The gentleman made another point, which I think is important.

The CHAIRMAN. The time of the gentleman from Ohio [Mr. WYLIE] has expired.

(At the request of Mr. GREEN, and by unanimous consent, Mr. WYLIE was allowed to proceed for 3 additional minutes.)

Mr. WYLIE. Mr. Chairman, I will yield to the gentleman from New York in just a minute.

The other point which the gentleman from Texas made is that there is an accounting proposition here someplace. We are establishing a new Direct Capital Grant Program to finance public housing which in effect amounts to a savings, according to the accounting procedure. I am not sure whether it does or does not.

The point the gentleman is making is that those programs will continue, so that there is a cost to them. I see the gentleman from New York nodding his head affirmatively and I assume he wants to speak to that.

Mr. GREEN. Mr. Chairman, will the gentleman yield?

Mr. WYLIE. I yield to the gentleman from New York.

Mr. GREEN. Mr. Chairman, I do thank the gentleman for yielding.

First, I should point out that the section 8 new construction program and the section 8 substantial rehabilitation program were repealed in the 1983 Housing Act. Those were the big ticket section 8 items. All we have left is the section 8 existing program and moderate rehabilitation program, which is roughly half the cost per unit per year and a much shorter number of years than the programs that we repealed, so in a very real way the 1983 act solved that problem of the expense of section 8.

On the question of whether a so-called change in the accounting method results in a change in cost and whether you can buy the same amount of modernization for less, I think the answer plainly is correct. Anyone who goes out and buys a car on credit instead of paying cash for it knows that at the end of 4 years he has put out more dollars than if he had paid cash up front. You go and tell a finance company that that is just an accounting change and you are not going to pay any interest on that, and you will not have your car very long. That is more than an accounting change.

This is saving the Government money, because we are not buying on time.

Mr. HILER. Mr. Chairman, will the gentleman yield?

Mr. WYLIE. I yield to the gentleman from Indiana.

Mr. HILER. Mr. Chairman, I thank the gentleman for yielding.

The Government is running a $200 billion deficit, so what the Government says, instead of in the housing account showing it up as borrowing the money and loaning the money and then putting the accrued interest cost in, we will just now chalk it up as a direct grant.

The Government still has to go out and borrow that money. We are not sitting on huge reserves that we do not have to borrow. What we have done is transferred the cost to another function of Government out of the HUD and independent agencies appropriation bill, so that we can come in with this very nice freeze looking level, all the while just transferring a billion in costs.

Mr. WYLIE. Well, the point here is that the two very articulate, knowledgeable gentlemen, have made different points about the same subject. There is confusion on that as to whether it does or does not amount to a savings.

I guess the point I really want to make again is that I would have some pride of authorship when it comes to new housing programs. I think our authorizing committee and the Subcommittee on Housing ought to have more to say about it than to say that if the money is appropriated, we are going to have these new programs.

□ 1110

We do not know how much these new programs are going to actually cost when it comes to down-the-pike costs as far as budget authority or budget outlays or spending or whatever. And for that reason, I think that the Bartlett amendment should be adopted.

Mr. GREEN. Mr. Chairman, will the gentleman yield?

Mr. WYLIE. I yield to the gentleman from New York.

Mr. GREEN. I would like to respond to two points. First, your most recent point.

We are agreeing that the authorizing committee ought to have the right to work its will. What you are telling us, if you adopt this amendment, and what every authorizing committee in this House will be telling us if their Members vote for this amendment, is to ignore the authorizing committees and ignore their work in process.

The CHAIRMAN. The time of the gentleman from Ohio [Mr. WYLIE] has expired.

(On request of Mr. GREEN and by unanimous consent, Mr. WYLIE was allowed to proceed for 2 additional minutes.)

Mr. GREEN. Will the gentleman yield further?

Mr. WYLIE. I yield to the gentleman from New York.

Mr. GREEN. You will be saying you go appropriate under the old programs and forget what the authorizing committees are trying to do.

Mr. WYLIE. I beg to differ because what I am suggesting is that we do go back to the old process perhaps by this amendment, that we suggest that the authorizing committee work its will here on the House floor, that we decide what new programs ought to come into being. Then we come back through the appropriations process and appropriate the money for those to see what the level of spending should be.

But in this new budget procedure, we supposedly set ceilings for these programs, but we do not have a budget this year, and we have not had a budget. So what I am saying is that I think we ought to go back to the procedure which I thought was tried and found true in the first year of my service here in the Congress.

Mr. GREEN. If the gentleman will yield further, I could not agree with him more. We would love to have authorizing legislation in place when we have to start the appropriation process and bring our bill to the floor. It is a great tragedy in the way this House works that we have to come to the floor with a bill well over 50 percent of which has not been authorized.

Mr. WYLIE. We appreciate your generosity, but we think we would like to defer it until a little later time.

Mr. GREEN. If the gentleman would yield further, I would just like to respond to the gentleman from Indiana [Mr. HILER] to whom the gentleman

yielded a moment ago, and that is we have to borrow the money under the traditional system for the modernization program. We have to borrow about twice as much money to do the same amount of modernization, and we have to pay the interest on that money when we borrow it because the local housing authorities first borrowed the money, we paid the principal; we paid the interest. And over 20 years, that more than doubled the amount we pay.

And then we pay the interest on the national debt when we borrow the money to pay not only the principal, but the interest.

Mr. HILER. Mr. Chairman, will the gentleman yield?

Mr. WYLIE. I will be glad to yield to the gentleman from Indiana.

Mr. HILER. Mr. Chairman, the Congressional Budget Office, certainly not a right-winged radical operation, sent a letter or a memorandum, and I will read a couple of clauses from it, although I will be happy to read the entire letter into the RECORD. But they are talking about the change in accounting procedures.

"However, there are no net savings in outlays to the Federal budget as a whole since the proposed financing methods would simply cancel a host of intergovernmental transfers which occur under the current direct loan system."

The CHAIRMAN. The time of the gentleman from Ohio [Mr. WYLIE] has again expired.

(On request of Mr. HILER and by unanimous consent, Mr. WYLIE was allowed to proceed for 2 additional minutes.)

Mr. HILER. It goes on a couple of sentences, and then finally the last sentence says "Finally, the elimination of interest payments from HUD to the Treasury which constitute the ultimate savings in outlays in function 600 is completely offset by a reduction in income in function 900."

There are no outlay savings to the Federal budget overall, and yet we chalk up $1 billion of savings and then we use half of that $1 billion in savings to fund $500 million in new programs. We are dealing with funny money. It is not real money.

Mr. WYLIE. The gentleman makes an excellent point, and I think with all of the sand in the air on this amendment that this is not the time to appropriate $500 million when we do know where it is going to be spent.

I yield back the balance of my time.

Mr. BOLAND. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I wonder if we can get some agreement on the time here. We have now been on this amendment for more than an hour, an hour and almost 15 minutes.

I ask unanimous consent that all debate on this amendment and amendments thereto close at 11:30.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

Mr. ROEMER. Mr. Chairman, reserving the right to object, I wonder if our chairman would yield for a question.

Mr. BOLAND. Surely.

Mr. ROEMER. The Members, Mr. Chairman, that I see on the floor now, are as many as eight or nine. I wonder if we might extend the limit to 10 minutes longer than the gentleman suggested, having those on their feet now with a chance to speak?

Mr. BOLAND. Mr. Chairman, I ask unanimous-consent that on this amendment and all amendments thereto that debate close at 20 minutes to 12.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

Mr. FRENZEL. Mr. Chairman, reserving the right to object, under my reservation I would observe that so far the players have been members of only two committees. Amateurs apparently have to register somewhere else to play. And I think there are a few of us who would like to express our opinions as well.

Now members of the Appropriations Subcommittee and members of the Committee on Banking, which includes the excellent Subcommittee on Housing, have had a wonderful time this morning in the first hour. But it was my impression that the House of Representatives also consisted of elected officials from other parts of the world and other committee jurisdictions. If this is what is going to happen here, that we are going to be excluded from the debate, then I am going to be constrained to object.

I have had some marvelous ideas that I would like to give to the distinguished chairman for consideration. But, under his suggestion, I am going to be limited to only 2 minutes. That is hardly enough time to get warmed up.

Mr. BOLAND. Will the gentleman yield?

Mr. FRENZEL. I yield to the gentleman from Massachusetts.

Mr. BOLAND. Mr. Chairman, I would be the last person in the world to restrict the time of the gentleman from Minnesota. He is not from any other part of the world. He is from a great State, and he is a great Member, and he is a very active Member of this body.

Would the gentleman be willing to take an additional 10 minutes, if I added 10 minutes more to the request? Incidentally, let me say this is not the only business of the day. There will be some other business following this. It is an important item of business, as I understand it, dealing with Micronesia that must be resolved today. I hope we can finish this bill in about 2½ hours. I think the gentleman from Texas [Mr. BARTLETT] indicated that the next two amendments will probably take another hour on each. I think that was what he indicated to me yesterday.

But we have been at it for some time now, and it has been an interesting debate. And as the gentleman from Minnesota has pointed out, practically everybody who has been in on the debate so far comes from the authorization committee. But I am delighted they have, because they probably know more about the subject matter than anyone else.

But in any event, it would appear to me that all of the arguments have been aired on this particular amendment.

Would the gentleman object if I extended the time another 10 minutes?

Mr. FRENZEL. Further reserving the right to object, my problem with this thing is that most of the people who are standing up have already had 10 minutes to play. Some of us poor folk have not had an opportunity to participate at all, and whenever you go into these unanimous consent requests, all of the folks here freeze out the free agents.

I can stand your request, but I do want to tell the gentleman that we have made these kinds of bills clubhouse affairs. And I will eventually release my objection to the gentleman's new suggestion, but I do want to tell the gentleman that in the future, I will object if I find the committee dominating the debate to the exclusion of all other participants, which has, in fact, been the situation this morning.

With that, Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

Mr. SCHUMER. Mr. Chairman, reserving the right to object, and I will not object, but since I am bereft of marvelous ideas, I would, having stood up and having spoken, yield my time to the gentleman from Minnesota in an effort of expediting debate.

Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

Mr. ROEMER. Mr. Chairman, reserving the right to object, it seems to me that our colleague from Minnesota has raised a good point under the time constraints, and I will not object to the 10 minutes to 12 time limit, except that those who have already gotten their 5 minutes, I think, should be excluded from the division of time. I am asking could the gentleman make that

a part of his recommendation. If so, I will not object.

Mr. BOLAND. Mr. Chairman, will the gentleman yield?

Mr. ROEMER. I will be glad to yield.

Mr. BOLAND. Mr. Chairman, I hesitate to suggest that type of a restriction, because I do not want to bar those who have important points to make from speaking, simply because they may have already spoken.

I do not know whether there are many other Members that want additional time besides those who have already spoken on the amendment.

Mr. ROEMER. Mr. Chairman, I see more than one Member on his feet who has had the 5 minutes.

Mr. BARTLETT. Mr. Chairman, will the gentleman yield?

Mr. ROEMER. I will be glad to yield.

Mr. BARTLETT. I thank the gentleman for yielding. I have had my 5 minutes, and I think most of the people who have had their 5 minutes would be content to let others then lead it.

□ 1120

Obviously there may be questions which would cause one Member to yield to another, but I would concur with the gentleman from Louisiana's suggestion.

Mr. ROEMER. I thank the gentleman.

Mr. Chairman, I am not asking that we exclude anyone in the questions and answers. We have been good within and without the committee, of yielding. I mean that. I am just saying that for purpose of moving this off center, I agree with the gentleman from Massachusetts' limitation but I ask only that the original 5 minutes be given to those who have not exercised that right before.

Mr. BOLAND. Mr. Chairman, will the gentleman yield?

Mr. ROEMER. Further under my reservation, Mr. Chairman, I yield to the gentleman from Massachusetts.

Mr. BOLAND. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, there seems to be an agreement on what the gentleman from Louisiana is trying to do. I would have no objection to that particular procedure.

Mr. ROEMER. Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Would the gentleman from Massachusetts [Mr. BOLAND] please restate his unanimous-consent request?

Mr. BOLAND. Mr. Chairman, I ask unanimous consent that debate on this amendment and all amendments thereto close at 12 o'clock.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. BOLAND. Mr. Chairman, may I amend that to include the procedure that Members who have not spoken for 5 minutes be given preference during that period of time? Is that a proper request?

The CHAIRMAN. The Chair will seek to accord that preference in recognizing Members.

Members standing at the time of the unanimous-consent request will be recognized for 3 minutes each.

The Chair recognizes the gentleman from Michigan [Mr. LEVIN].

Mr. LEVIN of Michigan. I thank the Chairman.

Mr. Chairman, I think it is time to talk some commonsense on this. The proponents of the amendment I very much oppose, they shift their grounds.

First it is pointed out to them that this bill is within the budget resolution. Well, they say, the budget resolution is dead. Well it is not dead here in the House. We just passed a resolution Tuesday and hopefully it is not dead between the House and the Senate.

Well, then they raise the banner of the freeze. Well, it is pointed out that this is below the freeze level.

Then what do they say? And by the way, there was discussion of the freeze when we did not have a budget resolution. Now we have one. So let us live within it.

Then it is said, well, all right, it is within the budget resolution, it is within the freeze level, but there are new programs, there are new programs. But there is no moratorium on new programs within this Congress. I think everybody who here is raising the new program notion has voted for some new ones. In foreign policy, the Cambodia amendment, for example, I could name 10 or 15.

And by the way, within this $500 million there is an administration proposal for a new program. At least one of the people who is urging support of this amendment voted for that new program in the authorizing committee.

We are for a sober budget, not an absolutely stagnant one. This notion that there can be no new programs is absolutely absurd. We are living in this bill within a budget resolution, and if you want, within a freeze. There is nothing worse, it seems to me, than carrying a good idea to an absurd degree and that is what this amendment really is. It is a mindless kind of amendment.

It is said, well, there has not been an authorization of these new programs. I think the gentleman from New York has made it very clear what they did in the Appropriations Committee. They are providing for our acting hereafter on new programs through the authorizing process. If these programs are stricken down, then the appropriating committees and the conference committee can take care of elimination of the $500 million. What is happening is that the proponents of this amendment are yelling "fire" when there is no fire. That is exactly what they are doing.

I hope very much that this House will not bite on this apple when it does not exist.

Let no one raise the banner of a freeze or raise the banner of excess over the budget when it is not true. This House has enough sense to know when to march behind a banner and when not to.

Mr. Chairman, I strongly urge defeat of this amendment.

The CHAIRMAN. The Chair recognizes the gentleman from Indiana [Mr. HILER].

Mr. HILER. My colleagues, Mr. Chairman, I am not sure the question is whether or not we should favor a stagnant approach or whether we should favor a dynamic budget approach. I do not think any of us are opposed to replacing programs that do not work with programs that do work. I think that is part of the congressional process. We ought to be a dynamic institution which recognizes our mistakes and which tries to correct those mistakes.

But it seems to me that when we are faced with $200 billion deficits, if the way we decided to try to create the new programs is to use funny money to come up with alleged savings that we transfer to new programs, that is when we make the mistake. And wem are getting $500 million for new program reserve out of $989 million in funny money savings from an accounting change.

I would like to read from a memorandum from the Congressional Budget Office:

> The administration's refinancing proposal would forgive all direct loans to public housing authorities as well as the associated borrowing from Treasury. Activity authorized from 1986 on would be financed with direct grant.
>
> This financing method would affect both function 600—income security—and function 900—interest on the public debt.
>
> Adoption of the administration's proposal would result in a reduction in budget authority for new activity, because of the elimination of the need to appropriate funds for interest payments. However, there are no net savings in outlays to the Federal budget as a whole, since the proposed financing methods would simply cancel a host of intra-governmental transfers which occur under the current direct loan systems.

So there are no savings from the modernization effort. Yet we use $500 million from that change in accounting method and put it into a new program reserve. We are not making the critical choice between old programs that do not work and new programs that might. What we are saying is we will keep the old and we will add the new, too, and because of an accounting change we will chalk it up as even-steven, as if we somehow have obtained the mythical level of a freeze. I think it is perfect hypocrisy on the

part of this House to say that we are somehow making the tough choice between the old that does not work and new that might work. We are keeping both and adding $500 million. I think at a time of $200 billion deficits when critical discussions are taking place as to how to attain a budget, for us to go along merrily on our way chalking up this accounting savings as real money is being shortsighted and we are committing a hoax and a fraud on the budget process and on the American people.

So I would encourage my colleagues to vote for this amendment, not because you are opposed to new programs but because you are opposed to creative financing in order to finance those new programs.

The CHAIRMAN. The Chair recognizes the gentleman from Texas [Mr. COLEMAN].

□ 1130

Mr. COLEMAN of Texas. I thank the chairman, and I say to my colleagues we are also losing sight of the real issue: Budget deficits are certainly important, and I want to commend the committee, the ranking minority member and the chairman from Massachusetts for their very fine effort in keeping this bill within the House-passed budget. In fact this bill freezes spending at last year's level.

So the deficit is not the only issue, though, to be debated here today. A hoax and a fraud on the American people? The statement from my good friend from Louisiana, if we cannot do this, we cannot do anything—that is not even the right question. The right question is:

Do we want to do this—not whether we can or we cannot; the question is whether we want to. The question is also whether we want to work a hoax and a fraud on those who need public housing.

There are people in the southwest who cannot even get water in their homes; there are people all over America that cannot get housing. I suggest that we not lose sight, after all, of what it is that we are about with programs of this kind. It is right that the Government care about the people and their right to live with some dignity.

Make no mistake about it; the administration has taken some very strong positions about housing as an issue—they do not like it. This administration is opposed to housing bills and housing programs for the elderly and the poor, all across America.

I think it is time that some of us stood up and told the administration that there is another view, coming from at least the Democratic side, and from the debate here, certainly some Members of the other side of the aisle as well.

We should remember that that administration's proposal placed a 2-year freeze on assisted housing programs. The administration has requested a moratorium on new housing starts.

So what this committee has done I think is absolutely appropriate. They have attempted to find new ways to save money; they have attempted to find new programs that will work better than those old programs. It is not whether we can or cannot do something, I say to my colleague from Louisiana; it is whether or not we want to try something new and whether or not we have got the wherewithal to stand up to an administration that does not like housing programs, and whether or not we have got what it takes to come up with new ideas and a new dynamism.

I think we do; I think this House does. So I say to my colleagues, let us not really miss the overall issue. It is not the deficit in this bill; we have stayed within the budget resolution. We have all tried to make serious cuts in the runaway deficits of this administration by freezing expenditures in this bill.

I think that what we have to understand is that we cannot turn our backs on the poor and the elderly people of America who need this Congress to represent them in the way that we should. This bill has already addressed the deficit with a freeze. I urge opposition to this amendment which unnecessarily cuts housing funds so desperately needed in these United States.

The CHAIRMAN. The Chair recognizes the gentlewoman from New Jersey [Mrs. ROUKEMA].

Mrs. ROUKEMA. I thank the Chair. I strongly support Mr. BARTLETT's amendment.

I have heard Members refer to this as a "mindless" amendment, others have said something about "deficit or budget fetishes." The fact of the matter is that this Congress seems to be making a fetish out of creating new programs and funding them without even authorizing them! That is the fetish that I think Mr. BARTLETT is dealing with.

I yield to my colleague.

Mr. BARTLETT. I thank the gentlewoman for yielding. The gentlewoman is correct. What we have had on the floor today under the guise of an appropriations bill is in fact a debate over authorizing programs; and yet the debate is never focused on the merits or demerits of these programs.

In addition, it is important for all of us to remember that the amendment before us simply deletes new and unauthorized programs that are unspecified before the authorization process has had an opportunity to work its will.

Mrs. ROUKEMA. Reclaiming my time, I think our colleagues should also note that in committee some of these issues were very heavily debated. They are by no means without controversy, and this Congress is going to have the right and the responsibility to debate these issues when the authorization bill comes up.

Mr. BARTLETT. If the gentlewoman will yield further, the gentlewoman is correct; these are controversial programs; it is controversial in and of itself as to whether in a year in which we are freezing education of the handicapped, freezing disability payments and vocational rehabilitation, freezing school nutrition programs, freezing defense, freezing NASA, that we should be creating new programs.

I think it is also important to note from the gentlewoman's remarks that many of us on the committee, as we may support a new program, a new way of doing things, we beg the proponents on the other side to please delete existing programs, or to reduce existing programs as a way to fund new programs; that has not been done; the appropriations bill in these sections are higher than ever—$940 million in section 8, for example.

All that has been done, as the gentlewoman knows, is an accounting method change which shifts costs to another portion of the Federal budget.

All we are attempting to do is to freeze that totality of the Housing Assisted Programs budget at last year's level of $8.9 billion.

One other point that I know the gentlewoman agrees with, and that is we are not cutting people off assistance; these are the programs for new construction or repair. This is nothing to do with the day-to-day or month-to-month existing payments that go to some 3.9 million families who are receiving payments and subsidies under these housing programs.

In fact, if you look at fiscal year 1982, the first year of this administration's budget, and compare it to this year, you see a 680,000-unit increase from 1982; 3.2 million to 3.9 million units in those years.

The CHAIRMAN. The Chair recognizes the gentleman from Texas [Mr. GONZALEZ].

Mr. GONZALEZ. First, Mr. Chairman, of course I rise in opposition of what I consider to be a mischievous amendment to say the last, but mostly to congratulate the chairman and the members of the Subcommittee on Appropriations.

The way we have been operating here the last few years, we have had a sort of a reversal of the processes. We have had appropriations committees acting before the authorization committees, or the substantive committees, have had a chance to work.

In this case this year, however, we have completed the authorization processes in the authorizing subcommittee, in the full committee, and

absent was the ability to get priority from the leadership to bring it up on the floor, even before this Appropriation Committee.

The reason being that the leadership has taken a position that they will give priority to all of the appropriation bills by the time we break up for the August recess.

Now this amendment is really a very mischievous thing, for the reason that on the subcommittee level, we had a most historic experience. We had a total of 95 amendments offered during markup, 95 amendments. Of that number, two-thirds were offered by the minority, and of that two-thirds, 30 percent were offered by the gentleman author of this amendment.

They ran with this in subcommittee; they ran with this in the very beginning. We had to decide whether or not we could have a consensus on the budgetary question; that was first and foremost.

Now, if this amendment, which is mischievously offered because even in its presentation, the gentleman from Texas was contradictory. He is offering it for one fundamental reason, he is against housing for the poor and moderate income. The question of new programs are offered as if these are brand new programs that are calling for a new appropriation; this is not true. We had decided at the outset of the markup proceedings, that eve would stay within budget resolution and we have.

Now, if we accept this amendment today, let me tell you what we will be doing. This would mean that there will be absolutely no funding for the question of housing the homeless, which today by all accounts is a national crisis situation.

The very innovative program, such as a Nehemiah Program, that the gentleman author of this amendment himself says he is for—why? Because it provides for home ownership for the moderate income and the poor, based on a very ingenious formula that has originated in a destroyed section of the Bronx.

Mr. VENTO. Mr. Chairman, I ask unanimous consent to grant my time, my 3 minutes, to the chairman of the Housing Subcommittee.

The CHAIRMAN. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

The CHAIRMAN. The gentleman from Texas [Mr. GONZALEZ] is recognized for an additional 3 minutes.

□ 1140

Mr. GONZALEZ. There would be no authorization, that is, it would be in vain that we have worked as diligently and, by all accounts, as fairly as ever a bill as comprehensive as the Housing Authorization Act of 1985 has been worked out. In fact, I am really surprised that my colleague from Texas would be offering this because he had a big hand in our success in guiding what we call H.R. 1 through the subcommittee and through the full committee.

Now, I think that this is an effort at this time on this level of appropriation to try to do what could not succeed in the normal substantive authorization process, and for that reason I believe that it is the wisest thing of all to defeat this amendment. I urge my colleagues to defeat it.

Mr. MORRISON of Connecticut. Mr. Chairman, will the gentleman yield?

Mr. GONZALEZ. I yield to the gentleman from Connecticut.

Mr. MORRISON of Connecticut. I would like to thank the chairman of our Housing Subcommittee for yielding, and I want to commend him on his statement and on his leadership in laying the basis, the groundwork, that has been built upon so well by the Appropriations Committee.

We have a spending level here that is within a freeze, as the gentleman knows, and we fought hard to get to that point. This is below the budget.

And, finally, the statements that are being made about false savings are just plain false. This money that is being used in the appropriation is real savings. It was recommended by the administration, and it involves paying cash instead of borrowing. And by paying cash, there are real savings. We should be turning those savings to constructive use, and that is exactly what the Appropriations Committee has done. I think it is to be commended for doing, so, because we need all of the housing that we can get in these times of budget constraint because the needs are overwhelming, as the gentleman from Texas has reminded the committee time after time.

Mr. VENTO. Mr. Chairman, will the gentleman yield?

Mr. GONZALEZ. I yield to the gentleman from Minnesota.

Mr. VENTO. I thank the gentleman for yielding.

Mr. Chairman, we keep talking about a budget outlay, in terms of the Congressional Budget Office statement, but this is budget authority we are talking about in the amendment. When we talk budget authority with housing, we are committing money for as long as 40 years. And the fact is, CBO report comment on budget outlays, there may not be any savings, but there is significant savings in budget authority, and that is what is included in the appropriation measures. This amendment would cut unfairly and eliminate any opportunity to creatively assist in the housing area.

The CHAIRMAN. The Chair recognizes the gentleman from Minnesota [Mr. FRENZEL].

Mr. FRENZEL. Mr. Chairman, this committee well knows my feelings about our deficit, about the way we appropriate, about the way we budget. For those who believe the budget resolution is alive, I hope that they will be waiting in a sincere pumpkin patch along about Hallowe'en because who knows what will come by and give them a sack of candy.

Clearly, we are at a budget impasse. And even if we were to get a budget resolution, if it bore any resemblance of the cream-puff budget passed in the House, it is not going to save any appreciable amount of money.

Here we are talking about a little segment of our total budget. The first point of debate is how much housing do we want for the country, how much should the Federal Government spend? That is an interesting part of the debate, and even though I have strong feelings others are more qualified to speak on that question.

The second part is, are we alleging some kind of a freeze here on the basis of accounting legerdemain. That is a more important part of the debate, as far as I am concerned, because that is how we have done this scam for the last 10 years. Accounting tricks have put us into deep deficit trouble.

The third problem is what I call the point of order problem. That is the one that says, "Here, you guys are appropriating money for unauthorized projects." Under normal rules we could not do this, but because of special rules it is being done here.

And then woven through all of those 3 points is the question of new spending versus old spending.

Now, in my judgment, Mr. Chairman, if we pass this, we have simply given the authorizers a blank check, we have setup a nice target for the special interests, another place for heroic Congressmen to build more monuments to themselves.

That is how we got here in the first place. We have blindly funded new programs. We did not know if they would work, we did not know much about them. That is how they got us into this $200 billion difficulty.

New programs are always welcome, improvements on old programs are welcome. But new spending is not welcome under the current deficit emergency.

I am really nervous about our scorekeeping. The Appropriations Committee every year brings in great feats of magic which tell us that somehow we are not exceeding our budget, and yet every year we increase our appropriations by large amounts. Last year, the Members will recall, we managed to spend 11 percent more than the year before. Already the Appropriations Committee for this fiscal year has exceeded its own 302(b) target, which it did not reveal to us until February.

We do not know how they made them or how they did them.

I see no other recourse if this House is ever going to redeem its virtue than to vote for the Bartlett amendment.

The CHAIRMAN. The Chair recognizes the gentleman from Florida [Mr. McCOLLUM].

Mr. McCOLLUM. Mr. Chairman, I think the gentleman from Minnesota who just spoke has made the telling point in this entire debate, if you strip everything else away from it, and that is what we are discussing today is a question of whether or not we are going to get serious about reducing these enormous deficits and talk about it in terms of reality.

We are talking about $200 billion deficits. We are talking about here a very small sum of money relative to that—$500 million seems like a lot to me, but it is very small—we are talking about the fact that we have in this bill over $10 billion for housing for this next year already. We are talking about the fact that in addition to that $10 billion there is permanently obligated another $12 billion that is going to be spent next year that we could not do anything about if we wanted to.

That is not good for housing for low-income Americans. And, as a matter of fact, right here in this bill, H.R. 1, there is language that has come out of committee that acknowledges that fact, "that continued large Federal Government deficits are antihousing and such large Federal Government deficits tend to keep interest rates high, thereby denying many otherwise eligible home buyers the opportunity to own a home."

It is very simple. We have a chance to say "no" to any new programs today; we have a chance to say we do not want any more new ones until we have sufficiently cutback on those that are there, to make sense in the marketplace, so that all Americans of all income levels but particularly those at the lower end are given a fair shake to get the right chance to be able to live on an economy again instead of having the runaway deficits create higher unemployment, another recession, and so forth. It will not do them any good, it will not do us any good, and it certainly will not do the housing effort any good to let our debt continue to runaway unchecked.

In the strongest of terms I urge the Members to vote for the Bartlett amendment and the following amendments of the gentleman from Texas that will do nothing more than pare this back a little bit and get us on the right track.

The CHAIRMAN. The Chair recognizes the gentleman from New York [Mr. GREEN].

Mr. GREEN. Mr. Chairman, first, just so the record is clear, I think that it should be understood that the letter from the Congressional Budget Office refers to an interim method of financing public housing which has been necessitated by an ambiguity in a recent revenue bill which has threatened the tax exempt status of local housing authority bonds. But there is no question that as compared with the traditional method of financing the modernization program, which is not referred to in that letter, which is the guarantee of local housing authority loans by the Federal Government and the payment of the debt service on them by the Federal Government, there is real saving in the new method.

Second, even if you want to take the other view on the question of financing of the modernization program, the fact of the matter is that this bill is a billion dollars under last year's bill, and we got there through cuts that anyone must acknowledge are real and painful cuts. We took $347 million out of the Community Development Block Grant Program. We took $110 million out of the UDAG Program. We took $1,142,000 million out of the Revenue Sharing Program. And I could go on, because we have a page full of such cuts. Those are real cuts in anyone's book, and they are painful cuts. And we did that because we place a higher priority on housing than we did on these other areas where we made these cuts.

So I think the issue really is: Do you place a priority on trying to do something to keep going the housing programs in this country when the need is so desperate? That is the priority we addressed. I do not think anyone can say that we did not make difficult choices in addressing it.

The other point that has to be made is that this amendment is a real test of whether the House is sincere about wanting the Appropriations Committee to defer to the authorizing committees.

□ 1150

This $500 million represents a sincere effort by the Appropriations Committee to defer to the work in progress that the Banking Committee has completed through the committee process, and, when the calendar permits, will be bringing to the floor of this House.

We in the Appropriations Committee wish that we were not in a situation where not only the housing part of this appropriations bill has largely not been authorized, but other large chunks of this bill have not been authorized. Unless the House wants to do all of its appropriations work in a single continuing resclution at the end of the Congress, it is going to have to live with that.

I have to say to the House that, if you pass the Bartlett amendment, you are telling this Member of the Appropriations Committee not to try to make this kind of accommodation in the future; just go ahead and run with the ball because then you are not going to be subject to this kind of amendment on the floor of the House. If that is what the Members of the authorizing committees in this body want, let them vote for the Bartlett amendment and we will know next year what we have to do on the Appropriations Committee.

The CHAIRMAN. The Chair recognizes the gentleman from Pennsylvania [Mr. COUGHLIN].

Mr. COUGHLIN. Mr. Chairman, I rise as a member of the subcommittee and as the former ranking minority Member of the subcommittee, and I rise with great, great reluctance indeed to oppose my dear friends, the distinguished chairman of the subcommittee and the ranking minority Member.

But the gentleman from Texas has a point. What the gentleman from Texas is saying, and those who support this amendment are saying, is how can you double the number of new public housing starts, double them; how can you increase the number of modernization public housing starts by half, and increase the number of section 8 units by 4,500 over last year, and still have a freeze in spending? You cannot do it.

You can do it with great difficulty, I should say. You can do it only by some accounting changes, supported by the administration, but in a way that then makes the freeze something done by mirrors.

The number of assisted housing units in the United States during the course of this administration has increased by 600,000 units. That is a real increase in the number of additional units of assisted housing that are available. What we are saying with this amendment is that you will simply freeze the increases, freeze the increases, not freeze the number of assisted housing units, freeze the increases at last year's level. That is the factual matter of this.

When you look at what has been done, the transfer of almost a billion dollars of interest from one account to another, the inclusion of a nonrecurring program in the accounting for the calculation of a freeze level, all of that then means that we are not at a level that freezes the increases at last year's level. It comes right back to the point that the gentleman from Texas makes, that is that you cannot say that you are at freeze level if you are doubling the number of new start public housing units, if you are increasing by half the number of new modernization units, and you are increasing the section 8 program. You cannot say that you are freezing them. In order to do so, you have to support this amendment of the gentleman from Texas and his subsequent amendments. I say

that with great reluctance and I hate opposing my chairman and my ranking minority member, but those are the facts.

I think the House should know them and be aware of them and support the amendment of the gentleman from Texas.

The CHAIRMAN. The Chair recognizes the gentleman from Louisiana [Mr. ROEMER].

Mr. ROEMER. I thank the Chair.

Mr. Chairman, I would like to join with my colleague from Pennsylvania in pointing out that often our budget conversations are nonsensical. We do not live in the realities of the numbers. This is not a freeze on housing. This appropriations bill is not a freeze on housing. The cut some other programs and give back to housing.

Now, some of my colleagues think that is a good idea, and I respect them for that, because they feel deeply that we need to do more in housing. I have no problem with that. I tell you, though, that this is not a freeze. I tell you that there are times in our lives when two great principles run headlong. One is the need for more housing for those who need it, and the other is the need to help America by reducing the deficit.

This amendment forces us to make a choice. The choice we ought to make is to join with Mr. BARTLETT and take a section in this bill, specifically set up for new programs, untested and unauthorized, totally $500 million and exorcise it from the bill. That does not mean we are against new. That does not mean we are opposed to innovation; we need more of it. We are just concinced that we cannot have it both ways. We cannot spend more money on the old, and new money on the new. In both cases, we are short of funds.

Simply put, my colleague and I serve on the Banking Committee and the Housing Subcommittee. I congratulate him for the work that he has done. I do not believe that he is antibanking or antihousing. I think he is progressive toward reducing the deficit.

Five hundred million might not seem like much to you, but where I come from, it is a lot of money. It is a step we ought to take. If we could do this a couple of times a day, next year housing would be a lot better in America. For the rich, for the middle class and for those who need it worst of all, who can afford least of all to pay high interest rates, the very poor.

Support Mr. BARTLETT; he is doing the right thing.

The CHAIRMAN. The Chair recognizes the gentleman from Massachusetts [Mr. BOLAND] to conclude debate.

Mr. BOLAND. Mr. Chairman, first of all, let me highlight a few points that have been made in this debate. It has been, let me say, an instructive debate. I am delighted that members of the Subcommitte on Housing of the Banking, Finance and Urban Affairs Committee have been so active today. Obviously, it is a subcommittee that is an active subcommittee within the large committee, and I think this debate clearly indicates that.

At the start of this debate, one of the remarks made was that there was no program reserve in fiscal year 1985. That was simply because there was an authorization for HUD last year.

In fiscal year 1984, a reserve of $1.5 billion was established to protect the Banking Committee and whatever efforts they would authorize. This was something that the Banking Committee wanted, it is something that the Appropriations Committee agreed to—that if new programmatic thrusts were finally adopted by the House in a housing authorization bill, then the $1.5 billion reserve would be released. And it was released for some very important housing programs and some new programmatic thrusts contained in that bill.

But in 1986, we have the same situation as we had in 1984. We do not have a housing authorization bill. It has been approved and reported, incidentally, by the Banking Committee. It might very well be that we will have an authorization bill this year. Or, it might very well be that we may not have one.

The bill that we report today carries a January 1, 1986, date with respect to availability of the $500 million reserve. That is all we are talking about in this amendment. The distinguished gentleman from Texas is a knowledgeable Member in this area, and I understand a very valued member of the Banking Committee. His particular amendment is attuned to the $500 million reserve that the Appropriations Committee has set aside in the event that the authorization bill, H.R. 1, is passed. But that date is not magic. That date can be moved, that date can be moved back, and probably will be.

In any event, if there is no authorization bill, if H.R. 1 never sees the light of day, then the recommendations made in that bill might very well be carried in a continuing resolution. And we may have one, two, or three continuing resolutions before the expiration of this session.

□ 1200

But in any event, Mr. Chairman, this committee will have an opportunity to get a look at those programs if there is an authorization bill by that time, and if we are in agreement with the budget resolution.

I think it is safe to say, and I think I can speak for the members on this side of our committee, and also for the members on the minority side, that we will take a close look at it. If there is no authorization bill, then I think it is safe to say whatever new programmatic thrusts that are envisioned for the $500 million reserve will probably not be approved.

It is that simple. Mr. Chairman, I trust that this committee will vote down the amendment offered by the distinguished gentleman from Texas.

● Mr. RODINO. Mr. Chairman, I strongly oppose this amendment to eliminate the provision allocating budget authority for a $500 million reserve fund for housing programs pending enactment of a fiscal year 1986 housing authorization bill.

Federally subsidized housing programs have already been drastically cut during the past 4 years. For example, as recently as fiscal year 1981, a total of almost $25 billion was provided for assisted housing. In fiscal year 1985, the comparable appropriation was only $10.8 billion. This severe decline is aggravated by the fact that a 1985 housing dollar buys approximately 15 percent less than a 1981 dollar.

Yet the administration's budget proposes a 2-year freeze on all assisted housing programs. Fortunately, our House committee rejected this unrealistic abandonment of Federal responsibility for housing, believing it is not fair or equitable to forego all subsidized housing efforts while other activities throughout the Government are maintained at or near the current rate of expenditure. Moreover, such a 2-year moratorium would have a crippling impact on the ability of HUD to resume provision of subsidized housing units after the freeze is lifted.

Ongoing funding for Federal housing assistance programs is critical if we are even to begin to meet the mounting need for housing for the most vulnerable members of our society. We cannot in wisdom or good conscience add a freeze on housing assistance to the cuts already suffered by our low-income citizens, the elderly, disabled, and our children, in health and nutrition programs. I urge defeat of this amendment to prevent us from funding essential housing programs that may be recommended in an authorization bill.●

● Mr. GARCIA. Mr. Chairman, this amendment represents a further cut in much needed housing programs. As it stands now, H.R. 1 authorizes 10,000 new units nationwide. We could use those units in the Bronx alone. This $500 million is intended for new programs. We need new ideas, we need innovation in order to meet the ever-growing housing needs of our lower income population. We have about 2 million homeless nationwide, and in New York City, the waiting lists for public housing grow longer every day as the housing stock dwindles. Since 1980, there has been a 60 percent reduction in housing assistance—our housing programs have been gutted in the last few years—we need housing,

we need programs that represent new ideas, and these programs should be given the opportunity to work and to help. The House is committed to cutting the deficit, and the Committee on Banking, Finance and Urban Affairs has shown that spending cuts can be made without jeopardizing much needed programs. Too many Americans are homeless, and living below the poverty level.

Neighborhood development groups have been a major source of economic development in distressed areas. They have for the most part done a wonderful job in pulling together and renovating or rebuilding their areas. There are several such groups in my district, and I cannot put into words the heartening effect their work has on the residents of the Bronx. Everyone is pulling together to better their environment because they do not believe in the policy of "If you don't like it—move!" These groups raise private sector funds, but this money is generally raised because matching funds are provided by the Government. Areas like the Bronx, "high risk" areas, generally depend on some Government backing in order to be able to complete for private funds.

We spend billions on foreign assistance because we believe in helping our friends. Let's show that we also believe in helping our citizens, and let's continue to give them the opportunity to help themselves.●

The CHAIRMAN. All time has expired.

The question is on the amendment offered by the gentleman from Texas [Mr. BARTLETT].

The question was taken; and on a division (demanded by Mr. BARTLETT) there were—ayes 20, noes 14.

RECORDED VOTE

Mr. BOLAND. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic vote, and there were—ayes 236, noes 172, not voting 25, as follows:

[Roll No. 256]

□ 1210

The Clerk announced the following pairs:

On this vote:

Mr. Rudd for, with Mr. Rodino against.

Mr. Chappie for, with Mr. Hawkins against.

Mr. Hendon for, with Mr. Gejdenson against.

Mr. Franklin for, with Mr. Lehman of Florida against.

Messrs. ASPIN, FASCELL, and VOLKMER changed their votes from "aye" to "no."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

Mr. BONER of Tennessee. Mr. Chairman, I erroneously cast a vote in favor of the first amendment offered by Mr. BARTLETT of Texas. In fact, I am opposed to this and the other Bartlett amendments.

Cloaking these amendments in terms of budget freezes or reductions to fiscal year 1985 funding levels ignores the substantive merits of the program funding recommendations presented by the Appropriations Committee.

The Appropriations Committee recommendations were not arrived at lightly. They reflect the committee's considered review of all of the programs within the committee's jurisdiction. The fact that some of the recommendations do not match last year's funding levels demonstrates that the members of the committee have carefully looked at these programs and have asked the House to accept the changed priorities set forth in the bill.

The bill in its entirety is below the appropriated levels passed for fiscal year 1985. To claim that the Bartlett amendments are necessary to keep the bill at freeze levels is clearly not the case. The bill is nearly a billion dollars below the level of appropriations provided last year for the same agencies

and programs. The committee has made the difficult choice of reducing other programs so as to fund the increases recommended in the assisted housing program.

Opponents of the committee's recommendations should be truthful in acknowledging that they disagree with the committee's funding priorities.

□ 1220

AMENDMENT OFFERED BY MR. BARTLETT

Mr. BARTLETT. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BARTLETT: Page 2, line 18, strike out "$2,143,800,000" and insert in lieu thereof "$1,153,800,000".

Page 5, line 16, strike out "$1,980,000,000" and insert in lieu thereof "$990,000,000".

Mr. BARTLETT. Mr. Chairman, this is likewise a very straightforward amendment. It follows on the heels of the amendment which was just adopted and in which the House made its will known on a true appropriations freeze by a vote of 237 to 171.

Mr. Chairman, what this amendment would do is in the same context of attempting to achieve an appropriations freeze at fiscal year 1985 levels. The background of this amendment is the further attempt of the House to reduce the total or aggregate level of assisted housing programs in the appropriations bill down to $8.9 billion which was the total amount spent in last year's appropriations for fiscal year 1985.

Again, that is the background and the context of what the House is now attempting to do.

This amendment is very straightforward. This amendment merely freezes the level of new units of public housing at last year's level.

The committee bill, and I would call to the attention of the floor the item entitled "New Construction of Public Housing," the committee bill would have us increase from fiscal year 1985 at a construction pace of 5,000 new units. The committee bill would increase that to 10,000 units, a 100-percent increase in 1 year, or increase it from $945 million to $1.5 billion.

This amendment is essentially a freeze. It does not propose to eliminate units or reduce the number of new units to less than last year's level. It merely says that in the face of this Congress freezing NASA, freezing defense, freezing education for the handicapped, freezing school nutrition, freezing vocational rehabilitation for handicapped persons, that this House ought to also at least freeze the number of new units of public housing and we should not adopt a 100-percent increase in the construction of new units.

Now, Mr. Chairman, this amendment likewise does not affect existing units of public housing; so if each of you would think of the public housing complexes in your district, there are some 3.9 million units of total assisted public housing, or 1.3 million units of public housing units in this country as a whole. I would ask you to remember that this amendment does not affect those at all.

This amendment says that we will only build 5,000 new units instead of 10,000 new units, as the committee would propose.

Now, I have some concern about the wisdom of constructing large numbers of new units of public housing. I think in particular the House has concern about doubling the number of units or increasing the construction.

These new units of public housing, Mr. Chairman, will cost in the bill alone $6,600 per unit. But do not be mislead. That is $6,600 per unit per year for 30 years.

It is undoubtedly one of the most expensive ways that we could ever provide assistance to low-income persons in helping to provide housing. There are better ways. There are more rational ways. There are more compassionate ways.

One low-income resident of New York City in testifying before our committee told us in response to the question as to whether we should build any more public housing units, she took the microphone and said, "Perhaps, gentlemen, you did not understand. We don't want any more public housing. We want the chance to own our homes."

There is another issue, and the other issue is the repair——

Mr. GARCIA. Mr. Chairman, will the gentleman yield?

Mr. BARTLETT. I am happy to yield to the gentleman from New York.

Mr. GARCIA. Mr. Chairman, I really think that the statement made by the gentleman from Texas is so misleading. We presently have today in the city of New York 173,000 people on a waiting list for public housing. That one women should say that she wants to own a home, as opposed to cutting back on all the public housing, I think is really a disservice to this Congress.

Mr. BARTLETT. Reclaiming my time, Mr. Chairman, I have heard that same statement from residents of public housing throughout Texas, through other States. At every meeting of public housing residents that I have attended, anyway, they say, "Don't construct more units of public housing. Repair the ones you have. Bring them up to decent, safe and sanitary standards, but we are not asking for more units."

□ 1230

Last year we built 5,000 new units of public housing. This coming year, in light of the deficit, we ought to agree to build the same 5,000 units, but not a 100-percent increase.

Mr. GARCIA. Will the gentleman yield?

Mr. BARTLETT. I am happy to yield to the gentleman from New York.

Mr. GARCIA. There is no question that everybody's dream is to own their own home, whether you live in Texas or in the city of New York or in California.

But until you get to that point in your life where you can own your own home, we as a Congress, as a Government, have a responsibility. And to come again to this floor and to say that somebody, somebody someplace in Texas wants to own a home as opposed to public housing, I would just say to my colleague from Texas that we are dealing today with one of the most essential ingredients of many of America's urban centers.

The CHAIRMAN. The time of the gentleman from Texas [Mr. BARTLETT] has expired.

(On request of Mr. GARCIA and by unanimous consent, Mr. BARTLETT was allowed to proceed for 2 additional minutes.)

Mr. GARCIA. Some of you may not understand what is happening in the South Bronx, but I would wish that you would come to the South Bronx and talk to the people there.

Mr. BARTLETT. Reclaiming my time, I would suggest to the gentleman that the purpose of the housing appropriation bill in the Federal Government, what we should concentrate on is repairing the thousands, and the tens of thousands, and perhaps hundreds of thousands of units that are now vacant and in need of repair, and not decent, and not safe, and not sanitary as opposed to constructing new units of public housing.

Mr. ROTH. Mr. Chairman, will the gentleman yield?

Mr. BARTLETT. I yield to the gentleman from Wisconsin.

Mr. ROTH. I thank my friend from Texas for yielding. I think the gentleman from Texas has a good amendment.

I have been following what the gentleman has done in our subcommittee and in committee, and I think he is on the right track. We want people to have decent housing, but by driving up the deficits like we are going to do, we are going to do precisely the opposite of what we are intending. By destroying the economy in the long run through high deficits and interest rates we are hurting most the people who need the most help. Any economist you talk to will tell you that high deficits mean high interest rates. And if we are ever going to get these interests rates down, we have to take a look at legislation such as we are debating here today. We have to take a look at amendments like this. We can cut this

budget by a billion dollars by adopting this amendment.

We had 5,000 new units last year. In a country like this 5,000 or even 10,000 units means nothing and we aren't going to meet our housing needs by taking the most expensive approach to housing our people.

You have got problems in New York, yes. I love New York. But you drive through New York, at times it looks like it is bombed out in some areas. We have untold thousands of vacant units in New York, yet the Appropriations Committee would have us build still more new units of housing.

Let's disabuse ourselves of the notion that new is better. The $250 billion we have spent on housing has bought enough to house one-fourth of the people who are eligible for assisted housing. These 5,000 additional units the committee wants to build at a cost of $6,600 for the next 30 years won't solve the problem. Let's get our deficit down. Let's get interest rates down then we'll see some housing built. I thank the gentleman for yielding.

Mr. BARTLETT. I thank the gentleman for his comments.

The purpose of this amendment is, whether you believe that we ought to be constructing new units of public housing or not constructing new units of public housing, to say that it is not a priority of this Government to increase by 100 percent that construction pace while we are freezing NASA, while we are freezing education of the handicapped, while we are freezing disability rights, and freezing virtually every other program.

The CHAIRMAN. The time of the gentleman from Texas [Mr. BARTLETT] has again expired.

(On request of Mr. HILER and by unanimous consent, Mr. BARTLETT was allowed to proceed for 2 additional minutes.)

Mr. HILER. Mr. Chairman, will the gentleman yield?

Mr. BARTLETT. I yield to the gentleman from Indiana.

Mr. HILER. I thank the gentleman for yielding.

Will the gentleman who is a member of the Housing Subcommittee answer the question, In the authorization bill which will get to the floor hopefully in September, how many units were authorized in the authorization bill?

Mr. BARTLETT. The gentleman is correct in asking the question. The number was 5,000 units. The authorizing committee has concluded that a 100-percent increase is not the correct approach to the needs of public housing in this country.

Mr. HILER. So the Appropriations Committee would be appropriating money for 100 percent again as many units as what the full Banking Committee thought might be appropriate?

Mr. BARTLETT. The gentleman is correct. The authorizing committee has concluded that 5,000 new units is the correct number of new units. And to do different in the appropriations process is to essentially obviate the process.

Mr. HILER. Will the gentleman yield further?

Mr. BARTLETT. I yield to the gentleman from Indiana.

Mr. HILER. On the last amendment there was a great deal of discussion over the $500 million of new programs, and the $500 million of new programs had a great deal of debate within the authorizing committee. But does the gentleman recollect whether or not there was a great deal of debate in the full Banking Committee or the Housing Subcommittee on whether we should have 5,000 or 10,000 or more?

Mr. BARTLETT. I thank the gentleman for his question and, of course, that is why I had to search my mind a little bit, to determine, to try to remember how many we had authorized, because I attended every hearing, as you know, and I attended every markup and there was no debate over increasing the number of new units of public housing.

Mr. HILER. If the gentleman will yield further, the question of going to 10,000 was not really in the ball game. There was 5,000, and that was pretty generally agreed that it would be the equivalent number of new units as there were new units in 1985.

Mr. BARTLETT. The gentleman is correct, and the question has not been debated by the subcommittee, nor by the full committee, nor so far as I know by an informal group, but perhaps it has been.

Mr. KASICH. Mr. Chairman, will the gentleman yield?

Mr. BARTLETT. I yield to the gentleman from Ohio.

The CHAIRMAN. The time of the gentleman from Texas [Mr. BARTLETT] has again expired.

(On request of Mr. KASICH and by unanimous consent, Mr. BARTLETT was allowed to proceed for 30 additional seconds.)

Mr. KASICH. Mr. Chairman, all the gentleman from Texas is trying to do is to have an appropriation bill that matches what we authorized; is that not correct? And in fact, what the Appropriations Committee is trying to do at this point is double what the authorizing committee said we ought to do on this floor; is that correct?

Mr. BARTLETT. The gentleman is correct. The amendment is to say if we built 5,000 new units last year, we ought to build 5,000 new units next year, no more, no less. It is a straightforward freeze in the new construction of public housing units, and I yield back the balance of my time.

Mr. GREEN. Mr. Chairman, I move to strike the last word.

It is not permissible under the rules of this House for me to discuss what may happen in the other body when this bill gets there.

But I think it might be instructive to look at what happened to this appropriation bill last year. When this appropriation bill left the House last year, it had a 10,000-unit public housing appropriation. The other body voted zero for public housing.

We went to conference and we wound up with 5,000 units, and that is where the gentleman gets his 5,000-unit figure.

All this amendment is doing is chopping the legs out from under the House conferees when we go to conference with the other body.

Mr. GARCIA. Mr. Chairman, I rise in opposition to the amendment.

I would just like to ask my colleague from Texas a couple of questions, if I may. One of the things that really troubles me about all of this is that I guess that is what this country is all about, some of us represent the poor and we care, and some of you represent the fairly wealthy, and maybe you have a difference of opinion.

I do not know if you have any public housing projects in your district, and you may or may not. But if my assumption is correct, the gentleman represents one of the richest districts in America.

Mr. BARTLETT. Mr. Chairman, will the gentleman yield briefly?

Mr. GARCIA. I yield to the gentleman from Texas.

Mr. BARTLETT. I have public housing units in my district. I have a 10- to 15-year record of working on behalf of the residents in public housing in the Dallas area.

Mr. GARCIA. OK, but if I may continue the question, you also represent one of the wealthiest congressional districts in America, do you not?

Mr. BARTLETT. And if the gentleman will yield further, yes, and in representing that district, we take the view that we all live in that town together, and thus my working with HUD, and with the Dallas Housing Authority, and with the residents of public housing, some of whom live in my district and some of whom do not.

Mr. GARCIA. Well, I would just like to say, if I may, that I represent the poorest congressional district in all America. And for those of you who may not be aware, during the battles over housing in the subcommittee, led by our chairman, the gentleman from Texas, HENRY GONZALEZ, who has done an outstanding job, and who understands the plight of the poor, and understands what we need in housing, I would ask you gentlemen if you ever travel, if you care enough to travel through those parts of the country where there is a need.

For those of you who may not know, to give you an example of some of the problems we have, not too long ago my

wife and I were about to board a train for Albany, NY, from Grand Central Station, and we had about 1½ to 2 hours before the train departed. So we decided to go find a locker in Grand Central Station and check our bags so that we can go to a local store close by to look at whatever it is we were interested in at the time.

We looked high and low throughout Grand Central Station for one locker. There was not one locker to be found.

What has happened is that every one of those lockers have been taken up by the homeless, each one of those lockers. And I ask any one of you to go into Grand Central Station, or Penn Station right now and find a locker to put your suitcase, and you will find that you will not be able to get one locker because the homeless in New York are growing by leaps and bounds, and they use those lockers to keep their belongings.

□ 1240

To go beyond that, you stand outside of Grand Central Station at about 9 or 10 o'clock at night on Vanderbilt Avenue between 43d and 42d Street and you see the long line of homeless waiting to get into Grand Central Station or waiting to find a place that is warm.

Now I believe in deficits. I believe we have a responsibility to cut deficits. But I believe that this country was founded on the faith that all persons in this country should at least have an opportunity for decent housing. That is the part that really troubles me in this debate; yes, we have to represent our consitutents and I try to do the best I can as you try to do the best you can, but I will be gosh-darned if from time to time I can see your point of view. I would hope from time to time you can see the plight of the poor. That troubles me. It troubles me greatly because if there is any need we have in this country today it is housing.

Mr. BARTLETT. Mr. Chairman, will the gentleman yield?

Mr. GARCIA. I would yield to my colleague.

Mr. BARTLETT. I thank the gentleman for yielding.

Mr. Chairman, I have a great deal of respect for the gentleman from New York City. On housing issues we sometimes agree and sometimes we disagree. I believe that the gentleman does set out to represent the plight of the poor, as do I. But the point is there are homeless in New York, there are homeless programs in this bill. New construction of public housing is not one of those programs for homeless in New York City. New construction of public housing is for public housing new construction. I would suggest there are better ways of accomplishing this.

Mr. GARCIA. Reclaiming my time, I ask my colleague a question: Did you support the rehabilitation of those under the section 8(a) program? Did the gentleman support that? That would be rehabilitation of structures that are standing, that need rehabilitation. I would ask the gentleman did he support that because he mentioned that two or three times, that that is what we should be doing.

Mr. BARTLETT. Mr. Chairman, will the gentleman yield further?

Mr. GARCIA. I yield to the gentleman from Texas.

Mr. BARTLETT. I thank the gentleman for yielding further.

Mr. Chairman, I did, I have, I will continue to support funds to repair the existing units of public housing.

Mr. GARCIA. Repair or rebuild?

The CHAIRMAN. The time of the gentleman from New York has expired.

(By unanimous consent, Mr. GARCIA was allowed to proceed for 2 additional minutes.)

Mr. GARCIA. I would ask my colleague, is he talking about repairing or rebuilding?

Mr. BARTLETT. Repairing.

Mr. GARCIA. Repairing? Well, there is a big difference between repairing and rebuilding. Repairing can be anything from a doorknob on a door to the entrance of a building to changing a window. Rehabilitation means gutting that building and making an apartment in there, making something livable.

Mr. BARTLETT. If the gentleman would yield further, since the gentleman continues to ask me what I have supported and what I have not supported, I have supported the repair, rehabilitation, and modernization of existing units of public housing. There are 1.3 million units of public housing in the country today, of which we believe there could be as much as a $10 billion need for repair.

It may be that the gentleman from New York does not think that a new doorknob on a front door is very important, but for the person who is living there trying to provide some security for his family, it becomes terribly important.

Mr. GARCIA. Sure. Reclaiming my time, reclaiming my time and making it very clear to my colleague from Texas: I would hope, he sounds very good and I applaud what he says, but I think the terms of deed as opposed to action are two different things in terms of what we are saying.

I am troubled by this amendment. I was troubled by the last amendment. I am troubled by this amendment because I think the gentleman understands as a member of our Housing Committee the needs that we have in America. I would hope that the gentleman would just do one favor, come into my district and talk to the people. Do not listen to me. Talk to the people and ask them what the need is. I would appreciate that. I think it would give the gentleman a sense of where we are going.

There are a lot of good things happening, a lot of good things to build on. It would seem to me that that is what we have to be doing. I would be delighted to go to the district of the gentleman to talk to his constituents and tell them about my needs. I have no problem in doing that.

Mr. MARKEY. Mr. Chairman, will the gentleman yield?

Mr. GARCIA. I yield to the gentleman from Massachusetts.

● Mr. MARKEY. Mr. Chairman, I would just like to state for the record that as chairman of the Energy Conservation and Power Subcommittee, I do not agree with the report language on pages 37-38 of the Appropriations Committee's report with respect to the Federal Emergency Management Agency. It is significant to note that the subcommittee which I chair and the full Energy and Commerce Committee have also considered the matter of offsite emergency planning for nuclear powerplants and chose not to enact or suggest any new authority or responsibilities.

The appropriations report implies that FEMA should presume that State and local governments will participate in emergency planning even when those governmental agencies have stated to the contrary. This is an insult to all State and local governments. We should be asking ourselves what are the concerns of these governmental entities rather than suggesting that the Federal Government should simply override their legitimate authority in these matters. The fact is that public health and safety can only be protected if these local governmental entities participate fully in the planning and the preparedness process. It is wrong to presume they will be able to act to protect the public in an emergency if they have not participated in the planning and preparedness process.

The committee report might be read by some to suggest that as a last resort FEMA should preempt State and local government authority. A report prepared for me by the American law division of CRS shows that under current law and regulations only State and local governments are empowered to implement an emergency preparedness plan. Even the Director of FEMA has acknowledged in a letter to the National Governors Association that his agency does not have the authority to implement a nuclear powerplant emergency plan. Report language simply does not confer any new authority to FEMA. I might add that any involvement by FEMA in actually implementing an emergency plan

would raise serious conflict of interest questions since FEMA is in the position of independently evaluating emergency plans for the Nuclear Regulatory Commission.

Significantly, the Director of FEMA has also repeatedly stated that FEMA should not have the power to implement an emergency plan as a last resort because it could not adequately protect public health and safety. There are significant safety questions involved here and I do not think that Congress should be suggesting that FEMA—or other Federal agencies—should take actions which FEMA—the Nation's experts on emergency planning—have identified as being problematic from a safety perspective.

On a policy level, the President and the Secretary of Energy have made it clear that this administration does not support the imposition of Federal authority over the objections of a State and local government in this arena. I don't believe the Congress does either. And, if Congress wished to consider this matter, then the appropriate manner would be through a separate legislation, a process that would entail public hearings and debate among members. Significantly, Congress has not done this. Further, the likely policy ramification of Federal preemption in this area would be to encourage State and local governments with a financial incentive to refuse to participate in emergency planning measures since they would be led to believe that the Federal Government is offering bailouts.

Clearly then, whether this issue is looked at from a legal, safety or policy perspective, FEMA should not be considered as a last resort to implement emergency plans for commercial nuclear power plants.

Any effort by FEMA to act in such a manner and to usurp the legitimate authority and responsibility of local and State governments will be vigorously challenged.●

Mr. GARCIA. Mr. Chairman, I yield back the balance of my time.

Mr. HILER. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I will not take a long time. This is a very straightforward amendment. The question in this amendment is not whether or not we will have any funds for new public housing units. The question is not between 10,000 units and zero units. The question is whether or not we will authorize 5,000 new units for 1986 as we authorized 5,000 new units for 1985. The question is not between all or nothing; the question is whether we have a 100-percent increase or whether we have the same amount of new construction as we had in the last Congress.

I think it is a very responsible amendment. The fact that the gentleman from Texas [Mr. BARTLETT] recognizes that there continue to be needs for new public housing authority, he recognizes that and says that 5,000 units, the same number of units that were authorized in the housing authorization bill which will eventually get to this floor, the number of units that there was no discussion about in the subcommittee markup or in the full committee markup, where it was generally agreed that 5,000 units was the proper number of units.

So the gentleman from Texas' amendment would say to the Appropriations Committee and have it as a policy of this Congress that we will go forward with 5,000 new units. We will not double the number of new units, we will simply go with the same number of new units as we did in the last Congress.

Mr. Chairman, I yield back the balance of my time.

Mr. HOYER. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I rise to congratulate Chairman BOLAND for a responsible and impressive piece of legislation for housing and urban development. There is a critical need for this legislation which addresses the continuing shortage of housing which affects many Americans. In the Washington area this problem has increased dramatically in the past 4 years.

Last month, the Metropolitan Washington Council of Governments [COG] completed a housing needs assessment for the Washington area. COG found that 12 percent of all Washington area households, or 134,135 households, are still in need of housing assistance because of low income, substandard housing conditions, and lack of affordable housing resources in the area. Further, the COG study found that in 1984, 33,619 households were on lower income housing waiting lists which was a 110-percent increase over the number which were waiting in 1974.

In response to this great need, the administration proposed a 2-year moratorium on all subsidized housing programs with no funding provided for any additional housing units in fiscal year 1986. In the face of high interest rates, escalating housing costs and a documented need for housing by a significant proportion of our population the administration asks us to wait. Further, the President asked over 33,000 people in the Washington area to continue to wait for 2 full years before considering their needs.

Mr. Chairman, luckily, the chairman and his distinguished subcommittee recognized that the need is now and we cannot wait to meet it. In the Washington area, as elsewhere in this Nation, our elderly population is growing. The COG report documents a 32-percent increase in the elderly population in the Washington area, to over 225,000 people in 1980. This growth rate is triple the growth rate of the 18- to 54-year-old working population; 47 percent of these elderly have incomes below $15,000 and are unable to withstand the pressure of rising housing costs. These elderly, particularly senior, females living alone increasingly rely on housing assistance not only because of financial necessity but because of the need for social and medical support as well. We cannot ask them to wait for 2 years. This legislation does not ask them to wait, but rather acts to appropriate $1.6 billion for the support of 12,000 additional units of elderly and handicapped housing and sets a $631 million limit on direct loans for this group as well.

Compassionately, and wisely, Chairman BOLAND rejected the President's request by restoring funding for various housing assistance programs, including essential public housing and elderly and handicapped housing. Prudently, the chairman appreciated the need to address our most pressing national problem, that is, our bloated deficit, by keeping the fiscal year 1986 appropriation below the fiscal year 1985 appropriation. In keeping this delicate balance, the chairman and the subcommittee has shown this Congress that our concern for the deficit need not eclipse our concern for our Nation's social needs. I congratulate him and all the members of his subcommittee and urge support for this important appropriation.

Mr. KASICH. Mr. Chairman, I move to strike the requisite number of words and I rise in support of the amendment.

Mr. Chairman, we are greeted every day by article after article in our morning papers about the deadlock in Congress over deficit reduction, the deadlock in the Congress over budget problems, about trying to pull ourselves together, either here in the House or in the Senate, within both Houses, to put a budget together.

When you read the New York Times, or the Wall Street Journal, or the Washington Post, you find the bond market and the stock market reacting to our seeming inability to come to grips with the problem of the deficit. Now if you turn on the television set at 10 o'clock every morning to watch our proceedings, there is no question that you will see people from the left and people from the right making 1-minute speeches about the the deficit problem particularly people on the left who stand up and scream and shout about deficits.

Now I want to tell you that for those people who are Congress watchers, in the last couple of weeks we have had a

couple of votes up here that in my opinion were simple votes to try to trim the budget and trim the deficit.

Let me tell you about two of them. One of them was the vote on the EDA. Most of the people, most of our colleagues in this Congress, if you speak to them off this floor, will tell you that this is one program that we could have done without.

Then we come back and, of course, did not vote to end the program. We did not vote to eliminate or reduce the EDA. We voted for more spending just like an addict who has to have more every day. We shoot more money into our arms because we cannot control ourselves in this House.

□ 1250

Then just a couple of days later we had the water bill before us. Everybody in this House knew that we could all do with a little less pork; and we had an effort to try to freeze the appropriation at last year's level. The great freeze program. We lost that one, too.

There are a lot of people on my side of the aisle who look to the chairman of the Budget Committee, and look to my colleagues like the gentleman from Connecticut [Mr. MORRISON], and many others on this side who we believe are trying to make a good-faith effort to get this deficit under control.

We must make a good-faith effort to prioritize programs in the Federal budget, so that we can do what we hear every morning during these 1-minute speeches; and try to trim deficits.

We all know how critical it is; you just have to pick up the newspaper, or pick up the Journal of the House or the Senate.

Keeping that in mind, what is the gentleman from Texas [Mr. BARTLETT] trying to do? Mr. BARTLETT is simply trying to keep the increase in housing and public housing at last year's level. We are not trying to reduce anything; we are trying to restrain the increase to last year's level, and as the gentleman form Indiana [Mr. HILER] says, rather than having 10,000 new units, we simply want to have 5,000 more units; not a freeze; that is not a zero; that is a 5,000-unit increase.

To cut 5,000 of the increase will save about $1 billion over the life of this program, I am told by committee staff.

When you watch the Congress and you see the votes on EDA, and you see the votes on the water renewal bill, and you see the Congress have a seeming inability to control its spending, and then you take a look and you see Mr. BARTLETT's first amendment that passed here this morning, it gives you reason to be encouraged. It gives you reason to believe that maybe, when the going gets tough, the Congress will get tough and sensibly prioritize programs; and actually address the deficit.

Because if we do not, this Congress is driving an automobile at 100 miles an hour, and we are driving this automobile right into a brick wall, and we all know it.

Now, as a strong proponent of defense, and my colleagues on the Democrat side know that I support the defense programs; this time I supported a freeze in defense spending at the 1985 level. I thought we should do it; I was one of the first Republicans to say that.

I think that defense spending has to play a part in deficit reduction, but as I pointed out last week on the floor when Mr. WALKER had his amendment before us, defense spending as a percentage of our gross national product is 6.6 percent; a full 2 percentage points less than what John Kennedy and Lyndon Johnson spent on defense, while we spend 15 percent of GNP on nondefense programs. We cannot solve our deficit by relying on programs that represent essentially a quarter of the budget of the United States to play 50 percent of the part in deficit reduction.

We have to make responsible program changes. This amendment is not some wild-eyed scheme to devastate anybody; it is a program that says, let us have 5,000 new units. Let us do what the authorization committee said we ought to do. Let us save $1 billion and still provide more homes, more units, and move forward, and give those people who watch this Congress a reason to be optimistic about our ability to come to grips with our spending problem.

(On request of Mr. PURSELL and by unanimous consent, Mr. KASICH was allowed to proceed for 2 additional minutes.)

Mr. PURSELL. Will the gentleman yield?

Mr. KASICH. I yield to the gentleman.

Mr. PURSELL. The gentleman mentions other authorization bills; yes, we have won some, we have lost one, so I congratulate you for consistency; especially being on the Armed Services Committee, and that takes a lot of courage on your part.

I just suggest that it is a matter of discipline in the House. The gentleman has mentioned the freeze, and I would just like to remind all of us that that only gets us $32 billion. We are trying to set a goal of at least $50 billion this year, irrespective of the budget resolution.

Now let us suggest that the budget conferees falls apart on us. All right, we come back and continue to discipline the House, so we can still achieve that goal with or without a budget.

Just in case we do not, it does not mean that the House can come back here and just say: Well, the budget conference fell apart, so we are going to fall apart. We cannot afford to lose the discipline that we are attempting to achieve at least a $32 billion savings. If we can't achieve that goal, then how do we get the next $18 billion to attain a $50 billion objective?

I support Mr. BARTLETT's amendment.

Mr. KASICH. I appreciate the gentleman's contribution.

I would be glad to yield to my friend from Connecticut.

Mr. MORRISON of Connecticut. I thank the gentleman for yielding, and I commend the gentleman for his support of the various attempts to freeze spending, and I think we, especially with respect to his role as a member of the Committee on Armed Services, in taking that position.

Frankly, this amendment is, as if within the Armed Services budget, we have done weapon system by weapon system and said: Well, now wait a minute; you are buying twice as many of those this year, or 50 percent more; now, we would like you to cut that down in the name of a freeze.

The fact is that the overall spending level in this appropriation is at or below last year's level; it is below the budget level, and we ought not to be using the name of the freeze or the idea of controlling spending in support of this amendment.

If the gentleman from Texas believes that this allocation of priorities, spending money on public housing, is the wrong one; that is one argument. But to talk about this as if it were a fiscal matter is really misdefining what we have got here.

Mr. KASICH. I appreciate the gentleman's comments. My concern about this, for those that are watching this debate is——

(On request of Mr. WILLIAMS and by unanimous consent, Mr. KASICH was allowed to proceed for 2 additional minutes.)

Mr. KASICH. My concern is, as I understand it, and the gentleman from Texas [Mr. BARTLETT] may want to comment on this, we had a bookkeeping change. We had smoke and mirrors in trying to say that we were not going to make expenditures; we took $1 billion that was funded out of this Housing Program, but we took the billion and we put it in another pocket.

Then we said that we reduced housing by $1 billion; and the gentleman from Connecticut [Mr. MORRISON] knows that when you are shifting money from one pot to another, you're not cutting it, you're still spending it. It does not matter whether you spend it in housing or whether you spend it in NASA; the $1 billion is flowing out.

I wonder if the gentleman from Texas would comment on that.

Mr. BARTLETT. The gentleman is correct. In order to get to a freeze

level at fiscal year 1985 levels, we have to reduce this appropriation of the assisted housing programs down to $8.9 billion.

It is not an across-the-board freeze; it aggregates all of those assisted housing programs to an aggregate level of $8.9 billion.

Further, of course, as the gentleman knows, it is impossible to freeze the budget if you are increasing that section by 5,000 units, or if you are doubling the number of new units; that is patently not a freeze.

Mr. KASICH. Let me just say to the gentleman from Texas, and let me ask him this question again so there is no confusion.

The authorizing committee said we ought to have 5,000 new units. Is that correct?

Mr. BARTLETT. If the gentleman will yield, that is what the authorizing committee has so far said, and will be bringing the bill to the floor.

Mr. KASICH. The Appropriations Committee said we have got to spend more; we have got to bust the budget; we want 10,000 new units; which is twice as many as what the authorizing committee said we ought to do. Is that correct?

Mr. BARTLETT. The Appropriations Committee has put 10,000 new units in its budget. I will leave it to the gentleman to characterize how they did that.

Mr. KASICH. Let me say this: What the gentleman from Texas wants to do is only to create the new number of units that is authorized.

Mr. BARTLETT. If the gentleman will yield, that is correct; there is sentiment in the House as the gentleman knows, for a moratorium for no new units. This amendment does not do that; this amendment would build the same number of new units next year as we built last year.

Mr. KASICH. Let me complete my statement. Mr. Chairman, we cannot keep going home and blaming the President; we cannot keep going home and blaming somebody else. We have got a deficit in this country of $213 to $214 billion. We have got to face up to this, ladies and gentlemen, and this amendment is very, very reasonable and I would suggest we support it.

□ 1300

Mr. WILLIAMS. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, just very quickly, to respond to some of what was said accurately by the last speaker in the well. We indeed, those of us on the Budget Committee, commend the members of the Armed Services Committee who found it within themselves to support the freeze; my colleagues and folks need to understand that there is a freeze and then there is a programmatic freeze, and what they supported, what most Members of this House supported, was not a true freeze, not a freeze at last year's dollar level, but rather a programmatic freeze. And it is critical to understand that a programmatic freeze means that the American taxpayers are being asked to spend between $18 and $20 billion more next year than they spend this year on the Pentagon.

Now, with regard to associating defense spending to the gross national product as a ratio. To do that, indicates that the richer this Nation becomes, the more that it automatically needs for defense. If we are going to use that ratio, then Afghanistan is perhaps the strongest military power in the world. Gross national product is not related to how much you spend on defense. Our Nation's defense needs are what we have to take into account in determining how much you need to spend on defense. Those needs are not directly related to our gross national product.

Mr. GONZALEZ. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, again I rise, first, to congratulate the Appropriations Committee. I never thought, Mr. Chairman, that I would hear the day that you were accused of being liberal and profligate, when you have been hearing the very opposite from us, even to this day, the authorization committee component. But I rise in opposition to the amendment because, first, I agree with the gentleman from New York when he charged that the presentation offered by the author of the amendment, my colleague from Texas, was, in my words, mischievous, because it is, it has been.

Let me tell you why: The impression has been given that this is an unauthorized increase of 5,000 new units of public housing. There is no such thing. As a matter of fact, the budget obligation authority within which we work, the overall budget figure, to conform with the then Budget Committee action as approved by the House of Representatives, and as of yesterday's action, certainly in conformity with what we consider to be, even by liberal interpretations, a freeze.

Now, the trouble stems that this is basically a philosophic fight that has been ongoing since the beginning of public housing. It is no different.

When the gentleman from Texas refers to public housing tenants who are begging him not to have new public housing, I do not know wherein he bases that statement or what public housing resident is urging that in Texas, because the district he represents and the county in which his district is located was one of the last to accept public housing in Texas. My district and the original district, which was the entire county, was the first in Texas. We have been fighting because even now in San Antonio, TX, my home city, we have over 11,000 pending requests and applications for public housing. It so happens that I represent that particular section of this county that has the lowest per capita family income in the State of Texas, so that we are used to Texas having big "D" come in and tell us that we ought to raise ourselves by our bootstraps when we do not even have huaraches. We are barefoot. Now, when you are barefoot and when you are homeless and shelterless, you do not worry about falling out of bed because you are already sleeping on the ground.

I want to say that, in the case of shelter, why, the gentleman from Dallas would not even have us build adobe huts if we could in San Antonio. If we were allowed in San Antonio to use the building standards that they do in northern Mexico, we would take care of our housing problems just with adobe and mud structure. But I think the responsibility here is plain. Every single hearing we had—and our subcommittee was the first to bring to national attention the question of homelessness. Every single hearing we had, and we had the most comprehensive—the gentleman said he was present at every one of them, but he did not go with us to the field, he was not with the subcommittee when we went to see the horrible plight 1 hour and 15 minutes from here of the migrant farmers' housing in Maryland, Delaware, and Virginia, in the Eastern Shore; he was not with us when we went to the Bronx; he was not with us when we went to the south or southeast Bronx; he was not with us when we went to north Texas, to the labor camps up in Deaf Smith County; he was not with us when we went to California. So what I am saying is that public housing is an absolute need, that, if anything, the Subcommittee on Appropriations ought to be complimented for a responsible and responsive position which is certainly in keeping with frugality, within the freeze limits, within the budget limits and, as the chairman has well pointed out, it is contingent on action taken by the House on a housing authorization bill.

So if the House works its will when we bring the housing authorization—the only reason we do not have it is because the leadership has made a decision to give priority to the Appropriation Committees on their bills for the balance of this month. We have been ready. The housing authorization was approved by the subcommittee, it was approved by the full committee, and we are ready for the full House committee.

Mr. ROTH. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I know time is at a premium, but I wanted to mention something that I think the entire House knows. There is no one who works harder on this, more diligently, than the gentleman from Texas [Mr. GONZALEZ]. But, quite frankly, I think we are losing perspective.

One of the gentlemen from the other side of the aisle got up and said, "In my congressional district we need 133 housing units." We are talking about 5,000 units here, not 133. How many do we need nationwide? Millions.

But the Government cannot supply all of these units. It can't build new units of housing for everyone. What we are saying by adopting amendments like this is that we are going to keep Federal spending under control. And if we keep Federal spending under control or try to get it under control, we are going to have interest rates come down. And if we have interest rates come down, we are going to have more housing units produced. It is the private sector that can produce these units; $6,600 per year for a unit of new public housing? That is unconscionable. Or $200,000 up in Massachusetts to rehabilitate each of 350 units? That is unconscionable. The Government cannot possibly do as good a job as private enterprise is what we are saying. We are also saying you can rehabilitate old housing for a lot less than it costs to build new housing.

What we are saying here is that if we can save $1 billion, let us save $1 billion. We are still going to be even with last year where new construction is concerned.

We have people come up and talk about the budget and the deficits. You know what I think the problem is? We have got too many "yes but-ers" in this body. "Yes, I am concerned about the deficit, but not on this amendment; yes, I am concerned about the deficit, but not in this bill; yes, I am concerned about deficits, but not this week." And by the time we get through with all of you "yes but-ers" we have $250 billion deficits as far as the eye can see, and we are going to reap an economic whirlwind. That is what I am concerned about. We all ought to be concerned about it. But some of us are crying crocodile tears.

Mr. McCOLLUM. Mr. Chairman, will the gentleman yield?

Mr. ROTH. I yield to the gentleman from Florida.

Mr. McCOLLUM. I think the gentleman is right on point. What we need to recognize is that this is exactly the same issue on this amendment as it was on the last amendment of the gentleman from Texas. We need to get the budget under control, we need to get the deficits under control. It is in the best interest of low income persons and housing to have that happen. If you voted "yes" on the previous one, you should vote "yes" on this amendment. I strongly urge, with my colleagues, that there be a "yes" vote on this amendment by the gentleman from Texas.

Mr. ROTH. I thank the gentleman for his contribution, and I think it is time to vote.

Mr. MORRISON of Connecticut. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would like to take issue with the characterization of this vote by the gentleman from Florida that somehow this is the same vote as the last vote. We are hearing in this debate all about how the authorizing committee recommended 5,000 units and the appropriating committee recommended 10,000, therefore we should knock it back to 5,000.

Now, some of us in the last vote thought it was important that the Appropriations Committee had left some room to adjust its appropriation to the level of the authorization. Apparently that argument was good enough for the last vote, but now that that vote is over we are going to throw that one in the basket and now all of a sudden the authorizing committee is king.

Well, I do not think either the appropriating committee or the authorizing committee has the last word. I think it is a cooperative process. It is unfortunate that some people felt inclined to remove that degree of freedom in the appropriation bill on the last vote, but they certainly should not use that as a precedent to be in lock step and vote "yes" for this amendment.

The fact is that this amendment is a direct attack on the poorest of our people in this country who have a need for housing. The people who live in public housing in this country are desperate people. They have very few choices. Many of them would like to live in areas other than where this housing is provided. But there are huge waiting lists. I know in one town in my district there are 1,500 people waiting on a waiting list for a public housing authority that only has 4,500 units total. How many units could be expected to be built in that housing authority from this appropriation? A small amount more. But many more units are needed.

Now, is it a wrong thing for the Appropriations Committee, operating within the budget and within a freeze level, to have provided these units? No, I do not think so.

□ 1310

We keep hearing about how the freeze level is some lower amount. Well, I think that when this is done it is a misuse of a good idea and a fair idea. Apparently, savings do not count. Removing money from one category to another, that does not count. We do not want the Appropriations Committee to set any priorities, apparently. We want them to be locked in. If we did 5,000 units of public housing last year, we have got to do 5,000 units of public housing this year and call it a freeze, line by line by line. I think that is making a fetish out of a freeze, and I do not think that is what we ought to be doing.

The idea is what we accomplished in the budget, and yes, maybe we can accomplish more. But in the budget we found a way to save over $50 billion, and we should do so. The Appropriations Committee is right in line with those numbers. There is no budget justification for this amendment. This is a policy suggestion. Less public housing; less for the poorest Americans. Our budget resolution here in the House was a proud one because it said even in these desperate times, we are going to care about the poorest Americans; we are going to do what we can with limited resources. Right in keeping with that spirit and with that resolution, this Appropriations Subcommittee has come forward with something that worries about the poorest American, the Americans who are being attacked by this amendment.

I think it would be a shame and a disgrace if masquerading as a budget amendment, this attack on those needy people were to succeed. Maybe there were arguments for that last amendment, but they certainly do not apply here. The need for public housing is overwhelming. It will not be met with 10,000 units much less 5,000. But let us not let the budget argument be used to undermine fair and decent priorities within the budget and within the freeze.

Mr. McCOLLUM. Mr. Chairman, will the gentleman yield?

Mr. MORRISON of Connecticut. I yield to the gentleman.

Mr. McCOLLUM. I thank the gentleman for yielding.

Mr. Chairman, I think the gentleman has made my point. That is, this is a vote on the same basic issue as the previous vote. It is a budget vote. We have $10 billion for housing in this bill. Some of us would like to see this radically cut, but we are not going to have significantly impaired reduction of that amount no matter what amendments are adopted today. We have $12 billion more in permanent obligation that is going to be spent on housing regardless of this bill. What we are attempting to do in this is make one more step toward some kind of fiscal sanity in regaining control of the budget which is the only way the poorest in America can hope to survive without us going into another recession, more unemployment and so on.

The gentleman has made my point for me. It is the same vote as the last one. We have got to vote "yes" again if we voted "yes" before.

Mr. MORRISON of Connecticut. Reclaiming my time, I think the gentleman would like to think this is a budget vote, but this is a priority vote, and it seems to me the priorities that have been set by the Appropriations Subcommittee are reflective of the priority that was set by this House when we passed the budget resolution.

I would hope people would see this vote as one of protecting the people most in need of housing.

Mr. SCHUMER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, on listening to the arguments from the other side, I feel like I got hit one way and then another way. The last amendment we were told we should not have new programs. Do not put money into new programs. The gentleman from Wisconsin, my good friend on the committee, talked about $200,000 for this unit and $70,000 for that unit. It is a very high price to pay for the dear need of housing a poor person. I tend to agree with him it is a high price to pay.

Thus, working with the gentleman from Texas, we try to come up with new programs. What happens? It is new program; cut it out. So we do not have any new programs any more because we voted in the last amendment to knock them out, and now, what are we saying? Cut the old programs.

The gentleman from Connecticut is correct. Let us not hide behind budget. This amendment I would say to my friend, the gentleman from Texas, is mean-spirited. This amendment simply takes the very poorest of the poor, and says to them, "We are not going to help you."

To respond to the gentleman from Florida, it does not take any courage up here to say that the low-income housing, and I have hardly any of it in my district, it does not affect my constituents, it does not take any courage to say, "Cut them another 5,000." It takes courage for many people to cut the agriculture bill below budget, but we did not. It takes courage to actually have a freeze on the defense bill, but we did not. It takes courage to cut some of the programs that affect your district and affect your voters, but you did not.

Now, we are up here beating our breasts saying we can cut from the very poorest of the poor. Yes, we are concerned with the homeless. Yes, we are concerned with people who have no roof over their heads. Well go ahead, cut them. But do not tell me you are being courageous, and certainly, do not tell me that you are helping the very people when you do not vote to freeze below budget for defense, for agriculture, for roads, for water projects, but now you will vote to go below the budget resolution when it comes to poor people.

I think it is a disgrace; I am sorry I am getting excited, but this is a mean-spirited amendment. This is an amendment that says, "You are down, you have got no political power, you have got no weight; kick."

Every member of our Budget Committee, Democrat or Republican, Mr. GRAY, Mr. LATTA, and everyone in between had one agreement. The only agreement we were able to reach at the beginning was that the poor peoples' programs were not going to be slashed any further. This amendment undoes that; it will be a sad day on the floor of this House if this mean-spirited amendment passes.

Mr. PENNY. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, the assertion has been made that this amendment is a cut in housing programs. It is not a cut in housing programs. We authorized the start of 5,000 new housing units in fiscal year 1985. This bill, if it is not amended, would authorize 10,000 housing unit starts in 1986. What we are doing is reducing the number of housing units back to 5,000, back to the same number that we are allowed in fiscal year 1985, so it is not fair to say that this is a cut in housing programs. It is not fair to say that this is taking away from those who might have access to those housing units. We are just continuing the same funding level for the same number of units that we approved for fiscal year 1985.

Mr. MORRISON of Connecticut. Mr. Chairman, will the gentleman yield?

Mr. PENNY. I yield to the gentleman.

Mr. MORRISON of Connecticut. I thank the gentleman.

Mr. Chairman, I think the gentleman is using a microscope when it we looked at the whole picture it would look somewhat different.

Last year, we had 100,000 new units of housing; this year, we have 100,000 new units of housing. That, if one looks at the entire picture, is a freeze. If you are concerned about using units, although I do not think that is necessarily the way to measure. But now you have taken down with your microscope and you have got one piece.

The committee thinks it can do a better job in addressing the need by moving some of those units around so it has got 10,000 units of public housing and it has reduced units in other categories in order to have a total of 100,000.

Now, if you are focused on units, this bill is a freeze. If you are going to say to the committee the only way that it holds things constant is in each and every category, then what are we really doing with respect to the committee?

Mr. PENNY. If I may reclaim my time, the concept of an overall budget freeze for this program and for other programs is exactly the point we are trying to make today. I commented on this earlier when I described the amount that we set aside for housing programs in fiscal year 1985. It was $11 billion. But there were $2 billion in there that had nothing to do with the construction of new housing units. That money should not have recurred in this year's budget because $1 billion was moved to another budget category and will be spent there, and another billion dollars was a nonrecurring expenditure that should not have been put in fiscal year 1986 appropriations. So if we are going to hold the total funding level at the same level that actually went to housing programs in fiscal year 1985, then that level should be $9 billion rather than $11 billion. You have to find some way to get back to $9 billion. What we have done is zeroed in on new housing programs, a half-a-billion dollars, taken them out by the previous amendment. Now in this amendment we have another area where we can make a reduction that will get out an additional portion of that $2 billion that should not be spent. We will be spending more on housing programs in fiscal year 1986 than we did in fiscal year 1985 unless these amendments are adopted.

Mr. BARTLETT. Mr. Chairman, will the gentleman yield?

Mr. PENNY. I yield to the gentleman.

Mr. BARTLETT. I thank the gentleman for yielding.

Mr. Chairman, I thank the gentleman for his comments, and specifically I would thank the gentleman from Minnesota for his consistent advocacy of budget and fiscal responsibilities in every program of the Federal Government across the board. Whether it is defense or child nutrition or housing or any of the other issues, the gentleman from Minnesota has been consistent in advocating that we return to some fiscal sanity.

This is no different. In order to achieve a freeze level in fiscal year 1986, we have to adopt this amendment, as we adopted the last amendment, and then there is one additional amendment that will be required to bring it to a freeze level, which has been the consistent position of the majority of this House, and the gentleman from Minnesota's position specifically.

Mr. BOLAND. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the amendment. The gentleman from Connecticut, of course, is exactly right. Last year we had 100,000 incremental units, by that I mean new housing units. We arrived at that

figure through an informal agreement with the Office of Management and Budget. Over the past 3 years we have added approximately 100,000 incremental units to the housing program each year.

We have to do that every year. If we do not add incremental units, of course, we are not providing housing for people who are looking for it, particularly for those in the very low income brackets.

I see the gentleman from Illinois [Mr. YATES], sitting here. Public housing came into being back in 1937, almost 50 years ago. At that time, it was the conscious decision of the Congress and the administration that there was an obligation and a responsibility on the part of the Government and the American people to provide safe, sound, and decent housing for those who could least afford that kind of housing.

□ 1320

So we embarked on the public housing program, and we have been engaged in that program ever since that time. I have been sitting on this committee now for 34 years. That is a long time. When I first came here I had some concern about public housing, just as a lot of Members are expressing some concern today. The gentleman from Illinois [Mr. YATES] was a member of that committee, and the chairman of that committee was the distinguished gentleman from Texas [Mr. Thomas]. I know of no Member of Congress who was more of a giant in intellect and a giant in size than he, and I know of no Member who was more persuasive on the floor of this House than Chairman Thomas.

I remember he used to oppose public housing, but slowly, imperceptibly, he changed his opinion. I came, not slowly but more rapidly, to supporting this program.

Today, there are 1,300,000 public housing units in this Nation. These units shelter almost 4 million people—4 million people, the poorest of the poor as has been said here, those in the lowest income brackets, those sometimes without any income at all except welfare.

What we are doing here is reducing what the Appropriations Subcommittee has proposed—reducing the 10,000 units recommended by this committee to 5,000 recommended by the gentleman from Texas.

I do not quarrel with the gentleman's knowledge on public housing, because he is pretty well attuned to it. He had a public housing project in Dallas named Lake West, with 3,500 units about 30 years old. It was something like Pruitt-Igoe in St. Louis. It never really worked properly because it was badly planned, and he knows it better than I, just as Pruitt-Igoe was. As a matter of fact, they had to dynamite Pruitt-Igoe.

The gentleman from Dallas who supported the Lake West project came before our committee a couple of years ago looking for some modernization funds. He testified that the only way, really, that we could improve public housing in that particular project was to provide modernization funds, and we did.

There is approximately $735 million contained in this bill for modernization of public housing—about the same level as last year. The gentleman from Texas is right when he says that this is one of the areas in which we should be expending our money to improve public housing, to get away from the high density, to give these people an opportunity to enjoy the sunlight and not to intensify the problems that have existed over the years. Slowly but surely over the years we have provided public housing, we have met that need. The great problems of the past that afflicted public housing have been resolved, or at least they have been dissipated to some extent.

I stand here as one who is really concerned about this amendment. I have a feeling also that those who supported the last amendment want to have their cake and eat it, too. They were concerned about the fact that we had a reserve of $500 million for programs that have not been authorized. This program has not been authorized. The administration requested no new units for fiscal year 1986.

Let me tell you why the Appropriations Committee put in 10,000 units. We put in 10,000 units last year and the Senate bill had none. We went to conference and we finally wound up with 5,000 units. Why not give us a chance to do the same thing this year. It might very well be, and the gentleman from Texas knows it as well as I do, that the Senate will take the same position as it did last year with respect to public housing.

This is not a popular program with everybody in America.

The CHAIRMAN. The time of the gentleman from Massachusetts [Mr. BOLAND] has expired.

(By unanimous consent, Mr. BOLAND was allowed to proceed for 3 additional minutes.)

Mr. BOLAND. It has been a program that has been highly criticized because of the problems of some of the public housing projects in this Nation. But that is something of the past. There are 2,400 public housing authorities in the United States, and let me repeat, 1,300,000 public housing units.

I think there is a constant and growing need for public housing. As a matter of fact, it is the only program that I am aware of within the incremental units that will provide the necessary housing for the poor. We cannot hand someone a voucher under the Voucher Program or the section 8 Assisted Housing Program and realistically expect that they are going to go out and find a unit.

That is one of the big problems. That is the reason we need this program. I know the gentleman from Texas supports the program, but his amendment is doing it in the wrong way today, let me say. Give us the 10,000 units. Give us an opportunity to march over to the other side of this building and provide at least what we did last year, 5,000 units.

The ability to provide for public housing units without that kind of leverage is nil, let me say, or almost nil.

So, Mr. Chairman, I think this committee ought to vote down this amendment. I can count. I looked at the last vote. This is not the easiest program to handle budgetwise. It is the kind of a situation where a lot of these programs are not popular with a great many of the American people. There is no popular interest in a great number of these programs. So the responsibility rests upon us, all of us who are in this Chamber, and particularly upon the housing authorization committee and this Appropriations Committee to provide those kinds of housing projects that benefit the lowest in our society.

I hope that this amendment will not be adopted. I hope that those on that side who supported the $500 million reduction in the first amendment will vote against this amendment. Give us an opportunity to move this program ahead. It is a good program, and the bottom line is, again, that we are providing housing for the poorest of the poor, and it is awfully difficult for them to get housing under any other program.

I have been dealing with these housing programs now for some 30 years or better, and let me tell my colleagues, in my judgment this is one of the most important housing programs to deal with the problems of the poor.

□ 1330

Mr. COUGHLIN. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. DREIER of California. Mr. Chairman, will the gentleman yield?

Mr. COUGHLIN. I yield to the gentleman from California.

Mr. DREIER of California. Mr. Chairman, I thank my friend, the gentleman from Pennsylvania, for yielding.

With over 70,000 vacant units in this country, it seems ludicrous that we would in any way consider a 100-percent increase as we face this deficit crisis.

Mr. Chairman, I urge support of the Bartlett amendment.

You know, I hear a great deal of talk in this Chamber about the need for deficit reduction, but when we finally have the opportunity to do something about it, those voices all of a sudden become conspicuously silent. This Congress is currently preoccupied with a serious national dilemma: How to reduce a $200 billion-plus yearly deficit.

I think most of my colleagues will agree that, throughout the process of debate on the budget this year, a consensus has developed that the least we should do is freeze Federal programs at 1985 levels. That consensus prevailed in the Housing Subcommittee, when my colleagues adopted an amendment establishing the proposition that aggregate funding for programs in H.R. 1, the housing authorization bill, should not exceed 1985 levels.

The combined 1985 annual and supplemental appropriations for housing programs totaled $15.9 billion. But the appropriated levels contained in H.R. 3038 are $1.7 billion over that level—a 6-percent increase. We are adding new housing programs in this bill while the budget conferees are bashing their heads against the wall trying to find additional program cuts. In essence, what we are saying here today is that the time and effort those conferees have given us in the name of deficit reduction is irrelevant. We are also setting a precedent which will allow every other appropriations bill that comes to this floor to come in over budget.

The gentleman's amendment is not only a fair and sensible one, it is absolutely necessary. I urge my colleagues to support the Bartlett amendment.

Mr. COUGHLIN. Mr. Chairman, let me just say that I think in going on 14 years on this subcommittee this is the first time I have stood here and opposed the distinguished chairman of the subcommittee. I know the distinguished chairman believes in public housing, and I believe in public housing and the need to house people.

I also believe that we have to keep some control on the rate of growth of these programs and the rate of growth in Federal spending, and that is what this is all about.

This is part of the same package of amendments that the last amendment referred to, so those Members who were watching in their offices on television should know that this is part of the same package and a vote of "yes" before should be a vote of "yes" now.

I have watched the very distinguished chairman of the subcommittee in conference with the Senate over the years, and I might say that I have never known him to be bettered by the other body in those conferences. He does a fantastic job of representing the House, and I know he will in this instance.

What we are asking for in this amendment is simply that we retain the number of new starts, the number of new units of public housing, at the same level that was proposed last year. Purely and simply, that is what this amendment does.

Mr. Chairman, I yield back the balance of my time.

Mr. TRAFICANT. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I was over watching the debate, and I just have a few comments I would like to make.

We have a $200 billion-plus deficit, and every time we start to talk about cutting that back we talk about programs that bear on the very existence of many of the people who are left with no other recourse. We are reaching the record levels of poverty of the early 1960's. I have one of the highest unemployment rates in all of America in my district. What we are talking about is housing.

I did not hear one Member of the House get up on that foreign aid bill and talk about the deficit, and a $13 billion bill passed on a voice vote.

If we are talking about housing, let us talk just for a minute about the deficit. The tragedy of $200 billion deficits is not that we continue to have them but what we are doing in spending while we still have that deficit. You may not like that, and I am sure we are opposed on philosophical grounds. But I think the matter of the deficit has been beaten to death, and I think there are some areas where the deficit would have been a better argument in this House, not on housing. I think we should all take a look at that.

Mr. Chairman, I think a vote on this amendment should be looked at very carefully before we go ahead and pass this amendment. That is all I have to say.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas [Mr. BARTLETT].

The question was taken; and on a division (demanded by Mr. BARTLETT) there were—ayes 27, noes, 23.

RECORDED VOTE

Mr. BOLAND. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 213, noes 204, not voting 16, as follows:

[Roll No. 257]

□ 1350

The clerk announced the following pair:

On this vote:

Mr. Carney for, with Mr. Gejdenson against.

Mr. JEFFORDS and Mr. ROBINSON changed their votes from "aye" to "no."

Mr. HUTTO changed his vote from "no" to "aye."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. BARTLETT

Mr. BARTLETT. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BARTLETT: Page 2, line 14, strike out "$925,000,000" and insert in lieu thereof "$756,897,547".

Page 2, line 17, strike out "$10,690,902,781" and insert in lieu thereof "$9,200,902,781".

Mr. BARTLETT. Mr. Chairman, this amendment is a technical and conforming amendment. I have cleared it with the chairman and the ranking member of the committee.

This amendment labeled 3A conforms the total appropriations in the housing bill to the first two amendments passed.

After this amendment is adopted, and I assume it will be because it simply conforms the bill to the two amendments we have already adopted, then I will be offering an across-the-board reduction of 2½ percent.

So, Mr. Chairman, this is a technical and conforming amendment to conform the bill to the two amendments that have just passed.

Mr. BOLAND. Mr. Chairman, I move to strike the last word.

We have no objection to the amendment. As the author of the amendment has said, this is a technical amendment.

However, I will have some problems with the 2.5-percent reduction amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas [Mr. BARTLETT].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. BARTLETT

Mr. BARTLETT. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BARTLETT: Page 5, after line 19, insert the following:

Notwithstanding any other provision of this Act, each dollar amount specified under this heading (annual contributions for assisted housing) hereby is reduced by 2.5 percent.

Mr. BARTLETT. Mr. Chairman, this amendment is the third of the three amendments that this House is required to pass in order to achieve a true freeze level for fiscal year 1986 appropriations at the fiscal year 1985 levels.

I would remind the House of the need to achieve that freeze. It relates only in the assisted housing program and it has been achieved in three ways:

First, we reduced or eliminated the new program reserve of $500 million. Second, we just reduced the number of public housing units by 5,000 units, or another $990 million.

Now, Mr. Chairman, that leaves this bill still very close, but a sum of $231 million short from achieving the $8.9 billion in appropriated spending that was appropriated for fiscal year 1985. I think it is terribly important for this House, as it has been all year, to be consistent, to be consistent in adopting a freeze level of appropriations.

I would comment that in order to achieve the freeze level of appropriations, the House has chosen to do it two ways. First, to reprioritize, and we have done that with the first two amendments. We have discussed and made a conclusion on two specific areas of the bill.

Now then with $231 million still short, this amendment would reduce across the board for all programs in assisted housing, by the same equal amount of 2.5 percent. That reduces the total $231 million.

Now Mr. Chairman, this task is made much easier, with only a 2½-percent reduction, by the fact that the House did the right thing and prioritized the issues we have already faced. But the 2½-percent across-the-board reductions still remains to be made.

If this House is going to say to NASA that we are going to freeze spending from 1 year to the next, as we have; if this House is going to say to Defense we are going to freeze spending from 1 year to the next, as we have; if this House is going to say that to education of the handicapped, and disability, school nutrition, and virtually every other program, then I think we ought to have the guts, as we do, to do an across-the-board reduction or freeze spending for assisted housing programs.

One other point, Mr. Chairman. This amendment does not affect those month-to-month payments to low-income families who are now on section 8 or in public housing units. Those payments are in another section from the appropriated items.

□ 1400

Those payments amount to an additional $12 billion, which is not anywhere in this bill. It is mentioned in the bill as a $12 billion commitment, as an entitlement. This amendment makes no changes in those commitments that we have to existing poor people. This amendment would merely bring into compliance an across-the-board budget freeze for assisted housing programs.

Mr. ROEMER. Mr. Chairman, would the gentleman yield?

Mr. BARTLETT. I yield to the gentleman from Louisiana.

Mr. ROEMER. I thank the gentleman for yielding.

Two questions quickly. One, we have made some reductions in programmatic spending in the last few hours on the House floor. Is your amendment in addition to those cuts? And if so, how did you choose the 2½ percent?

Mr. BARTLETT. I chose the 2½ percent very, very precisely. It is the calculation to achieve a $231 million budget reduction, which is the amount required to bring this appropriations bill back to the level that we spent last year. So it is an exact calculation of a freeze level, a freeze at fiscal year 1985.

Mr. ROEMER. Would that mean program by program then we will spend only as much in 1986 as we do in 1985? The reason I ask that question of the gentleman from Texas was that some good Members of this Congress who serve on the Banking Committee and the Housing Subcommittee objected to our earlier amendment. How would the gentleman respond to that? Why the 2½ percent more?

Mr. BARTLETT. The 2½ percent more is required to get it to a true freeze level or a level calculated at the exact amount appropriated and spent last year. The true freeze requires $1.7 billion reduction of the House appropriations bill. But that merely brings it back to fiscal year 1985. It came in two areas the gentleman knows.

The CHAIRMAN. The time of the gentleman from Texas [Mr. BARTLETT] has expired.

(On request of Mr. ROEMER and by unanimous consent, Mr. BARTLETT was allowed to proceed for 2 additional minutes.)

Mr. BARTLETT. One area was an accounting fund change which we have discussed all day. The Congressional Budget Office, chairman of the Budget Committee, and others have said that accounting change does not save any money. This amendment would back that accounting change back out so we would calculate modernization using the same accounting method from 1 year to the next. The second area is simply not to count in the 1985 baseline that $800 million that was left unspent for a conversion program that was nonrecurring, that does not exist anymore. This amendment does reduce each program by 2½ percent, but the programs themselves still have been prioritized by the Subcommittee on Appropriations. We are still allowing the committee process to work. We are saying the final product is 2½ percent short so we will do an across-the-board reduction of 2½ percent to bring it down to last year's levels.

Mr. ROEMER. I thank the gentleman.

Mr. GREEN. Mr. Chairman, I move to strike the last word.

I rise to oppose the amendment. I think that the amendment that the gentleman from Texas has offered now really puts in the clearest possible light the issue of whether the House and the Appropriations Committee are simply slavishly to follow every last line in the previous year's appropriation bill or whether we still reserve for ourselves the right to make some choices among programs and to shift priorities from year to year.

What the gentleman is essentially suggesting is that if we get the defense appropriation bill on the floor and last year's defense appropriation bill provided we should procure 500,000 rifles, then if the Defense Appropriations subcommittee thinks we can do with 400,000 new rifles this year and uses the savings from those 100,000 rifles to improve some other higher-priority defense program, we should not be able to do it. We have made cuts. There have been arguments about one of the cuts we made, but no one can argue that $1.142 billion out of revenue sharing is a real cut; no one can argue that $347 million out of the community development block grant is not a real cut. No one can argue that $110 million out of UDAG is not a real cut. There are a whole page full of those I can give any Member who wants all of those details.

So we are down to the question, having made those cuts in other line items in this bill, is the House now to deny itself the right to use those clear real savings to try to keep the housing programs going? The gentleman has already cut the assisted housing programs from 100,000 units down to 95,000 units by dint of the amendment that just passed.

But the effect of this amendment will now be to reduce the public housing program below the 5,000 units that he was just arguing for a moment ago. It will reduce the programs for the elderly and the handicapped below the ongoing level that the committee has sought to provide. We will wind up with something like 92,500 units rather than 100,000 units.

Mr. ANTHONY. Mr. Chairman, will the gentleman yield?

Mr. GREEN. I yield to the gentleman from Arkansas.

Mr. ANTHONY. I would like to associate myself with the gentleman's comments. I think what he has adequately pointed out is that the committee, utilizing its own discretion, is operating within well-defined constraints, but the gentleman's amendment will go right after a program for assisted housing that has been basically emasculated since 1981. I think that is something that this Congress needs to be made aware of. Do not compare it with last year, compare it with the total of 1981, 1982, 1983, and then 1984, and then say you do not want to assist the elderly, handicapped, and rural people to have adequate housing because that is really what this amendment is all about.

Mr. GREEN. I thank the gentleman for making that valid point. I would like to dwell a bit on it. At one point this Congress was approving funding at levels of 400,000, 500,000, 600,000 units of additional housing every year. At the end of the Ford administration, for example, the budget request from the administration approved by this House provided for 400,000 units of section 8 housing. Two-thirds of that was going into the very expensive new construction and substantial rehabilitation programs.

By the end of the Carter administration we were down around 200,000 units per year.

We then went down to 100,000 units per year. So we are now somewhere about 25 percent in terms of number of units where we were but a few years ago and 50 percent of where we were at the start of this administration.

Now the gentleman is saying 100,000 is too much, we have got to go down to 92,500. The point that was just made that even this drop from last year is obviously a hurtful one, but if you look at where the housing programs were but a few years ago, this program has taken worse cuts than just about any other program that you can find.

The CHAIRMAN. The time of the gentleman from New York [Mr. GREEN] has expired.

(By unanimous consent, Mr. GREEN was allowed to proceed for 2 additional minutes.)

Mr. GREEN. The assisted housing programs, which in fiscal year 1981 were at the $30,169,000,000 level are at less than half of that at the present time. And so the committee in its discretion took some cuts from other programs that we like, other programs that we think are important, but we thought it was most important to try to redress the balance a little bit for the housing programs. And if the amendment that the gentleman proposes passes, you are saying to the House you cannot make any adjustment of that kind within an appropriation bill because of the freeze concept. As I say, I just ask the gentleman to think what that will mean for the defense appropriation bill when it comes on the floor if each line item in that bill is to be frozen year by year. I would say to the gentleman he is putting the House in an intolerable straitjacket if this amendment carries, and I hope the House will reject it.

Mr. BARTLETT. Mr. Chairman, will the gentleman yield?

Mr. GREEN. I yield to the gentleman from Texas.

Mr. BARTLETT. Just briefly, I do want the House to understand, and the record to be clear. This amendment would accept those changes in priorities that the appropriation bill makes from program to program. This bill would then take all of those changes and reduce the total amount by 2½ percent to get it into line with what we spent last year.

Mr. GREEN. Reclaiming my time, I do not think the gentleman is accepting the priorities that our subcommittee has. Yes, this strikes the housing assistance funding across the board, after he rejected our priorities and cut 5,000 units of public housing, but he has not respected our priority of saying that these housing programs are something to which we want to give a little more money this year and we are willing to cut general revenue sharing, willing to cut UDAG, willing to cut the community development block grant, and willing to cut another page full of programs in order to give this little bit of additional help to a housing program that has been badly cut these last 4 years. That priority the gentleman is not respecting. I urge the House to respect it.

□ 1410

Mr. MOORE. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, I am not on the Committee on Appropriations; I am not an expert on what they appropriate, and why; I do not serve on the banking and currency committee, and am not an expert on housing programs and what we need there.

I do serve on the Budget Committee, and I am now a budget conferee, and I think I have some notion of the problems we are having in trying to reduce spending, and that is what I would like to address.

I have been listening to this debate, and with all due respect to the gentleman from New York for whom I have great respect, we can say what he has just said about every appropriations bill to come to this floor. We ought to have the right to make some changes and increase spending in programs we think ought to be increased in spending.

I say to the gentleman, I do not disagree; if we had a balanced budget, I agree with you fully, we would vote for what you are doing, but we do not, and I simply ask: Where is the money going to come from?

Where does the additional money come from?

Mr. GREEN. Will the gentleman yield?

Mr. MOORE. I yield to the gentleman.

Mr. GREEN. The money is coming from the $1,142,000 we took out of the Office of Revenue Sharing. It is coming from the $347 million we took from the Community Development——

Mr. MOORE. If I can reclaim my time, I understand, but you are still coming out with more spending than you had last year.

Mr. GREEN. If the gentleman would yield; no, I would deny that, and that is because we have made these other painful cuts, and certainly after the cuts that the previous two amendments have made, there is no way that we are providing more spending than last year.

It is true that we are providing more money in the assisted housing section of the bill, but we are doing that through a series of other cuts and very painful cuts, and cuts in programs which I feel deeply about, but we thought that this priority ought to be given a little higher priority, and that we would therefore cut these other programs in order to permit that to happen.

Mr. MOORE. I would say to the gentleman, what is the net effect for the country? The committee has provided more housing, but what about spending? What have you done for the spending net effect for the country in this bill?

Mr. GREEN. Net effect, we are under our section 302(b) allowance now by a very large amount, and as a result of the cuts that the gentleman has made at this point, I would guess we are somewhere like $2 million under last year's bill.

Mr. BARTLETT. Will the gentleman yield?

Mr. MOORE. I yield to the gentleman.

Mr. BARTLETT. The House has examined the arguments as to whether we are going to count an accounting change as part of savings and whether we are going to count $800 million that was unspent in a nonrecurring program as part of the fiscal year 1985 baseline.

The House has on two prior votes concluded no; that does not count; you cannot increase the budget in virtually every category; and then come back and claim that you are spending the same amount of money.

The fact is, that if you voted for the first two amendments, this amendment brings it right back down into line for the $8.9 billion in Assisted Housing Programs.

I thank the gentleman for his assistance.

Mr. MOORE. I appreciate the comments of the gentleman from Texas [Mr. BARTLETT].

I will make the same comment again: You cannot come in here and give us smoke and mirrors; you cannot come in here without programmatic changes and then increase the appropriations bill to boot and expect to ever do anything on spending.

The authorization bill for housing has not come before us yet. From what I read in the paper, when it does, it will call for more spending; not less. You have got to have programmatic changes, my colleagues, to ever address the spending problems we have before this country.

You cannot do it; you cannot do it with a freeze. When we adopt the amendment of the gentleman from Texas and freeze you at last year's levels, even that will not address the country's spending problems, but certainly that is better than increasing spending on an appropriations bill, and until we can make the programmatic changes, we cannot ever show the people that one of these days we are going to balance the budget.

One of these days we are going to get spending under control. Until you begin to change the authorizations for the spending, you cannot do that. In the meantime, all we can do is try to hold the appropriations at least to last year's level and get the second best solution to our spending problem—which is a freeze.

Let me tell you something. If you really want to help people have housing; if you really want to help people get into better housing, cut down your spending so we can reduce the deficit and lower interest rates.

We have been told time and time again that if in our budget conference we can ever come up with a budget and then implement that budget to save something on the order of $272 to $280 billion over the next 3 years, long-term interest rates will drop 3 full percentage points.

I submit to you, with all due respect to this committee for which I have great respect, that is a far better housing program than you can ever come up with in new spending, or new authorizations, or increased spending. Just lower those long-term interest rates.

So I am not going to argue with you about how you have reshuffled the money. I am looking at the big picture. You are still spending more money than you spent last year; we are not going to be able evidently to lower programmatically the housing program, so the only defense we have got is to try to freeze you on the appropriations bill; and if we do not do this, then you are telling the American people we are not going to change the programs and we are not going to freeze spending; we are just going to talk about it, and talk the problem to death. My colleagues, that is not going to work.

(On request of Mr. PURSELL and by unanimous consent, Mr. MOORE was allowed to proceed for 3 additional minutes.)

Mr. MOORE. I yield to the gentleman from Michigan.

Mr. PURSELL. Neither one of us served on the authorization or the appropriation subcommittee; so a colloquy is appropriate:

I understand our obligation with respect to housing as far as paying the interest rate is concerned, it is an obligation of the general fund but that obligation has been moved from this function to Function 0900, and if that is correct, it is almost a $1 billion general fund obligation.

Now, if that is the case, it complicates our budget efforts. Since these dollars have been moved off this budget function to another budget function, it is still an obligation of the general fund; it increases our indebtedness in our general fund. We are borrowing 20 percent of our revenue, this year, just to pay our bills. Does the committee include this $1 billion cost? No! Therefore we again use accounting practices to hide actual true costs of this spending bill. Any appearance to look like we are under budget—that is those of us who are using the spending levels of 1985 as our freeze guideline for no additional spending in 1986.

Mr. MOORE. I thank the gentleman from Michigan. The gentleman has been following the budget process and contributing very significantly. Your comments today do the same thing, and that points up again the problem; we are not really being totally honest with the American people in our efforts to reduce spending.

The problem is, we in the Congress have loved the American people to the point of bankruptcy. Every dollar we have spent has been because we love

the American people, we want to help them, whether it is education or housing, or no matter what it is, we have helped them to the point now we have bankrupted them, and we have to step back and say, as a parent must do when they spoil the child, we have simply got to take back now some of those things we were giving you, or certainly not give you any more than we gave you last year.

I urge the passage of the amendment of the gentleman from Texas. That is going to be the only way many of us can support this bill. Without it, we are going to have to vote against it; because it is continued excessive spending of funds we do not have; and I am not even satisfied with a freeze, but that is the best, evidently, we can do this day.

Mr. MORRISON of Connecticut. Mr. Chairman, I move to strike the last word.

I think it is about time that we got a little honesty into this debate, about the famous interest savings here that we keep hearing about being moved over to another account.

I wonder whether, when the defense appropriation bill comes to the floor, the interest costs for borrowing the money to buy weapons systems are going to be brought back in and charged against the defense bill, thereby cutting down on the level available to spend with respect to that account.

The fact is, that finally now we have a situation in this housing budget where what ought to be bought for cash is being bought for cash. The interest costs are only those created by the budget deficit we are financing for all Federal expenditure. It is a question of whether we are going to pay the interest twice in our budget, or whether we are going to pay it once. The new payment system limits interest payment to the overall deficit and does not include the past folly of also paying interest on none, if authority borrowing.

The budget process has solved the problem of figuring out what a reasonable allocation of all the resources are for this function, and the appropriation bill is within that budget.

Now, there may be Members who do not like the budget and think it is not appropriate, but that does not change the fact that this appropriation is within the budget and calling this a budget-conforming amendment is wrong.

It is exactly the reason that we have a budget process that we allow priority choices to be made; and if we approve this amendment we are saying again, we reject those priorities.

I think the gentleman from New York was completely correct when he said that this series of amendments is an attack on the priorities; we have asked this Appropriations Subcommittee to make some deep cuts. There are deep cuts in community development block grants and in the UDAG program; there are deep cuts in revenue sharing.

Those cuts were made to provide resources to stay within the budget resolution. Housing has been the subject of the deepest cuts in social spending over the last 5 years.

□ 1420

They have been brutal cuts, I would say, from a 200,000-unit level in 1980 to a 100,000-unit level now. Over and over again we hear Members on both sides of the aisle concerned about homeless people wandering on our streets. Does no one recognize the connection between the decimation of our housing programs and our homeless people? The fact is that we do not have the money to do what we need to do in the area of housing, but the last thing we ought to be doing is denying the appropriation process the flexibility to respond within the resources that we do have.

This appropriation is within the budget. Arguments about where the dollars come from really do not take us anywhere. The fact is that this is an irresponsible further cut for housing programs. It is an irresponsible attack on the neediest Americans in their need for housing. Those who support the budget overall, who think that the way to get at the deficit problem is to have some sense of priorities within what is available, will reject this amendment.

I yield to the gentleman from Minnesota [Mr. VENTO].

Mr. VENTO. I thank the gentleman for yielding.

I think the gentleman has put it just right. This afternoon we have not really discussed any of these particular issues or programs on the merits. Rather, we have shrouded them in a debate with regard to budget functions and have never really addressed the issue. The issue, of course, is that there is a different way to fund some of these programs. That has been engaged. And then instead of commending the Subcommittee on Appropriations, the administration, for finding a creative and less expensive way to meet these programs, we have torn away that dollar commitment in terms of priorities in the program. We have not dealt with the issue at all. Rather, we have raised the deficit as a red flag and dismissed the needs of the poorest of the poor with regard to these programs. They are the beneficiaries of these particular programs. I think it is the wrong priority. I think it is the wrong group to take it out of, and I think you are playing by the wrong rules. The fact of the matter is, whether it is rent supplement programs, which took units out of section 8, whether it is the capitalization program, the modernization program in terms of grants, or whether it is the funds that were set aside for the homeless that has been stripped from this bill today, we have not done well, I do not think, by dealing with housing and shelter needs for low-income Americans in this bill so far.

We have got one chance left here to save some of the fabric that meets these needs so that it is not left lying on the ground, and I hope that the committee will reject this final amendment, which I think does destroy housing needs for the poor.

Mr. LEVIN of Michigan. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I am very much opposed to this amendment. You know, we have worked on the budget, and we have said this a number of times. I hope the entire House, if we say it enough, will hear it. We have worked on the budget process, we passed a budget resolution. Then the Appropriations Committee acts within that budget resolution. An appropriations bill comes out here, and then what happens? There is a move to go beneath the budget resolution.

If it makes sense substantively to go beneath the budget resolution, we ought to do it. But we should not do it by throwing slogans around here. We are not writing a budget this year that is a carbon copy of last year, and it is hypocritical for people on either side to argue, "Cut it this year because allegedly it would be the same as last year." And I am going to go through everybody's votes who votes for this and point out how many times they have voted for changing around programs. We voted on the foreign authorization bill just a few weeks ago, and there were substantial changes this year from last year. And I will bet that virtually everybody who voted "yes" on the last amendment voted for one or more of those changes.

Our function in 1985 again, is not to be a carbon copy of 1984.

Now, I want to make another point. This money goes for low-income families. It also goes for other families in America. For example, there is section 202 housing that is covered by this proposed amendment. And within a lot of areas of this country there are long waiting lists for 202 housing, far more than has been provided by programming, far more. And these in many cases are applications that have gone through the mill, through the hoops, and the Department says they are eligible, they are not only eligible, they are ripe for funding. And why not? Why not fund them? The reason is because there have not been adequate appropriations.

Section 202 is for the elderly throughout America. And what this amendment does is to take another pound of flesh out of that program. And why? Because a banner has been

raised and it has "f-r-e-e-z-e" on it. I thought our policy was to squeeze this budget, not to mindlessly freeze it, to squeeze it to make savings wherever possible and to take note of this emergency situation we have in this country but not to say because this year there are some bucks more than last year it is automatically bad. That does not make any sense at all.

In my judgment, this is a cheap shot at programs of need. I would like somebody to get up on the floor and say that 202 housing for the elderly, for example, and the handicapped is needed less than has been provided in this appropriation. I would like you to say that.

Mr. BARTLETT. Mr. Chairman, will the gentleman yield?

Mr. LEVIN of Michigan. I yield to the gentleman from Texas.

Mr. BARTLETT. I will say this: I join with the gentleman in an amendment to terminate the less productive and less compassionate programs, such as HODAG, and take that same amount of money and put it in section 202, which is a program deserving of more funds. I would join with the gentleman in making that kind of a priority. The committee, has not done that. This amendment takes the committee's priorities, as amended by the House in the last two votes, and simply says we still have to bring it down by 2½ percent across the board.

Mr. LEVIN of Michigan. Because you take two steps does not mean blindly you take a third. One should argue the merits. And your statement, my friend and colleague from Texas, exposes the danger and the falseness of this amendment. What you say is, "Yes, if it were pinpointed, I would join you." What I say to this House is: Do not take the meat ax that hangs from the sky and just grab it.

Mr. BARTLETT. Will the gentleman yield?

Mr. LEVIN of Michigan. I yield to the gentleman from Texas.

Mr. BARTLETT. I repeat my question: Would the gentleman join me in an additional prioritizing amendment to eliminate HODAG? That way we would not have to take so much out across the board.

Mr. LEVIN of Michigan. Let me just say that we argued priorities within the Housing Subcommittee, and what you are now trying is an end run on this, and everybody should understand that.

The CHAIRMAN. The time of the gentleman from Michigan [Mr. LEVIN] has expired.

(By unanimous consent, Mr. LEVIN of Michigan was allowed to proceed for 1 additional minute.)

Mr. LEVIN of Michigan. We are going to have the housing authorization up here. But you essentially acknowledge that you would be cutting from needed programs by this kind of an across-the-board proposal. It is bad public policy, it is inconsistent with the budget resolution, it is putting the blinders on this House. And I think that we are beyond that. I think we have the intelligence in this House to pick and choose, and that is not what this amendment is about.

I soundly urge, regardless of how you voted on the previous two amendments, that we join together to defeat this amendment.

Mr. ROEMER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I will say that occasionally in the House you come to a point where one person can make a difference. It does not happen often. I mean we are a large body, a diverse body, and we work together and apart, right and wrong, and usually we are part of a crowd, sometimes losing, sometimes winning. But occasionally, every now and then, one person can make a difference. BARTLETT from Texas has made a difference.

Now, whether you like it or not, whether you are happy with it or not, if we had a BARTLETT on every committee in this Congress, we would be stronger. We would be stronger. He has done his homework. And those of you who serve on the Housing Subcommittee know it. Like it or not, he has done his homework. Like it or not, he has put in the time that many of us are not willing to do.

And my colleagues on my side of the aisle are so right. We hide beyond cliches, we do hypocritical things, we say one thing and often do another. It is tough business. I am not pointing my finger at anybody. I just rise to say that I support the gentleman. It is not easy to do. You can make a good case. I have heard it. I have heard people get up and say we have got to help the farmers, they feed America; do not cut their programs. I have heard people get up and say we have got to give a blank check to the generals, they defend America; do not cut their programs. I have heard it program after program. And there is truth there. There is truth there. I am proud to be a Democrat, the kind of a party that believes in a government that sets priorities and helps its people, and you cannot do enough, you cannot do enough. We do not do enough in this bill to help people. I know it, and you know it. The question is: Can we together take a step back, taking from defense, taking from housing, taking from all these programs, so that together, by giving up a little, we might have a lot more?

□ 1430

Now, I do not want to burden you with my beliefs, but in the 5 years I have been here, I have hated the fact that day after day I have had to stand up on the House floor and say "no." I dislike the fact that I could not be for something; for program A or program B and build something.

To the gentleman from Texas, I just want to say this in front of the world, if I could: I have enjoyed serving with you on that Housing Subcommittee and on the Banking Committee and we often work together. I hope the guys on my side will agree: We often work for innovative ideas and I think genuine concepts. Occasionally, one person can make a difference. Whether you win on this amendment or not, Mr. BARTLETT, you have made a big difference in this House.

Mr. BARTLETT. Mr. Chairman, will the gentleman yield?

Mr. ROEMER. I yield to the gentleman.

Mr. BARTLETT. I thank the gentleman for yielding.

I so much thank the gentleman for his kind words. It will require all of us, of course, on the next vote because each Member will also be that one person that will make a difference. I think the vote will be close, and I am urging everyone who saw the wisdom in reducing the level of spending at fiscal year 1986 will take that third step and make sure we do it right and we bring it all the way down to the fiscal year 1985 levels.

Mr. ROEMER. I thank my colleague.

Mr. Chairman, I ask my colleagues, left and right, Democrat and Republican: Let us do the freeze. It is not great, it is not perfect; I do not like it. But it is about all we have got. Let us join with Mr. BARTLETT and take the final step.

Mr. TRAXLER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, perhaps unlike the other Members, I am slightly confused between the freeze movement and what we do in the Budget Committee and what we do with the budget resolution. I hope someone can assist me in reconciling the efforts on the part of the Budget Committee and the budget resolution and the efforts on the Appropriations Committee and all of its subcommittees to follow the budget resolution adopted by the House and what the proponents of these housing amendments are doing.

Are they saying that the Appropriations Committee has abandoned the House budget resolution on housing?

Mr. BARTLETT. Mr. Chairman, will the gentleman yield?

Mr. TRAXLER. I yield to the gentleman.

Mr. BARTLETT. No, we are not saying that the Appropriations Committee has abandoned the budget resolution. What we are saying is that there are two items in the Appropriations Committee's bill which were accounting changes rather than real

changes. Now, whether or not they conformed or did not conform with the budget resolution, the fact is that they turned out to be $1.7 billion more than in fiscal year 1985. So this is the third of a series of amendments to back out that $1.7 billion of increases.

Mr. TRAXLER. Let me reclaim my time. I would like to have a dialog with the gentleman if I may.

So it is the gentleman's contention that through some "Chinese arithmetic" there was some $1.5 billion that did not show up in the committee's work?

Mr. BARTLETT. If the gentleman would yield, that is correct. It has taken several weeks to identify those accounting changes. The way it became apparent was that virtually all of the items in assisted housing were increased, and yet the total stayed about the same. So then you had to look at the item of modernization and the item of rent supplement RAP, those are the two areas in which the creative accounting was done.

Mr. TRAXLER. But the gentleman would also agree that there is a dispute about whether or not this was creative accounting? The gentleman would also agree that the committee does not agree with his analysis?

Mr. BARTLETT. The gentleman is correct.

Mr. GREEN. Mr. Chairman, will the gentleman yield?

Mr. TRAXLER. I yield to the gentleman.

Mr. GREEN. I think the gentleman raises a most important question. I think it is worth taking a look at the numbers, and I hope the House will be in with me on this, because I know numbers are not easy to follow.

Mr. TRAXLER. What I would like you to do is educate me; I think the other Members have got their own problems. I am just trying to sort through where we are in relationship to the House-adopted budget. Would you please tell me, sir, as one of my leaders on the subcommittee, are we following the House-adopted budget?

Mr. GREEN. If the gentleman would yield, we are, but let me take it a step further.

Let us assume for the moment that the gentleman from Texas is right that we should not count $1.7 billion of the cuts we made. Then, under the gentleman's theory, we started out $700 millon over last year's bill, rather than $1 billion under as our theory would provide. His amendments, as I count them, have already not only dealt with the $700 million, they have created $1,590 million of extra budget authority for this committee.

The gentleman is now saying that despite that, we have got to make still further cuts in the housing programs because he wants us not just to freeze the overall bill, but to freeze each and every item in the bill, in this case the housing assistance account within the bill. For some reason, in his eyes, only if we do that are we blessed from above.

Mr. TRAXLER. I thank the gentleman.

I yield to the gentleman from Texas [Mr. BARTLETT].

Mr. BARTLETT. I appreciate the gentleman yielding because it does help to clarify the issues.

Amendment No. 1, which the House adopted, reduced the appropriations level by $990 million. Amendment No. 1 by $500 million; amendment No. 2 by $990 million. That is still $231 million short of the $8.9 billion that we spent in fiscal year 1985. The $231 million was not created; it did not come out of thin air. It is a matter of addition and subtraction.

Mr. GREEN. Mr. Chairman, will the gentleman yield?

Mr. TRAXLER. I yield to the gentleman.

Mr. GREEN. Again, I think it ought to be made very clear that the gentleman from Texas is not talking about the bill as a whole, and that, as a result of his amendment, in the bill as a whole we are now hundreds of millions of dollars below last year's bill, even using his version of the accounting.

The CHAIRMAN pro tempore. The time of the gentleman from Michigan [Mr. TRAXLER] has expired.

(On request of Mr. GREEN and by unanimous consent, Mr. TRAXLER was allowed to proceed for 5 additional minutes.)

Mr. TRAXLER. I continue to yield to the gentleman from New York [Mr. GREEN].

Mr. GREEN. The objection of the gentleman from Texas is that it is not enough that we get the whole bill below a freeze as it now is, by any method of calculation, but that we must take this one portion of the bill, the assisted housing portion, and get that below its last year's level, even though we are already hundreds of millions of dollars below a freeze in the overall bill. To me that is an unnecessary and unwise requirement.

Mr. TRAXLER. I appreciate the gentleman's explanation.

Mr. Chairman, I yield to the gentleman from New York [Mr. SCHUMER].

Mr. SCHUMER. I thank the gentleman for yielding to me.

Mr. Chairman, if I might also try to help clarify for the gentleman. The gentleman from Texas maintains that there are two programs that have brought us $1.7 billion above the resolution last year. One of those programs, in terms of public housing modernization, is being financed differently and there has been a great deal of discussion on that. Let us assume, just for the sake of argument, that the gentleman from Texas is right. The other program is an $800 million program whereby certain moneys were converted into a different program. Those $800 million that were in last year's budget were spent. Every single one of those $800 million was spent, and I am sure the gentleman from Texas will not dispute that.

Those moneys do not have to be spent this year. Just as there will be no more money for certain water projects this year, there will be no more moneys for certain defense programs this year, that they are finished. Those moneys were spent again. That $800 million was spent, and now what the gentleman is saying is because that program terminates this year, because it is a nonrecurring expenditure, we must bring the amount further down. It is not fair, it is not right to treat the housing portion of the budget that way and treat all the others another way.

□ 1440

To give the gentleman an example, if we had spent $200 billion on defense and $4 billion on the C-5A and that terminated this year, in other words, there was going to be no money for C-5A's in the next budget, we would say a freeze would not be the $200 billion they spent last year but the $196 billion minus the C-5A.

If we did that for defense, if we did that for mass transit, if we did that for agriculture, we should do it here. But we are having a different standard for housing than we have for the rest of the budget.

Mr. HILER. Mr. Chairman, will the gentleman yield?

Mr. TRAXLER. I yield a few seconds to the gentleman from Indiana.

Mr. HILER. I thank the gentleman for yielding.

Mr. Chairman, we are not talking about the $800 million that was spent; we are talking about the $800 million that was not spent, because in last year's appropriation bill there was $1.6 billion, give or take a few dollars, that was appropriated in this particular account.

HUD has said that only $800 million will be spent, so there is $800 million that will not be spent, and what the gentleman from Texas is doing is backing out the $800 million that will not be spent and saying let us not include that as the baseline for this year. Subtract out the $800 million that was never spent.

Mr. SCHUMER. If the gentleman from Michigan would yield further, I would make that point. The chairman of our Committee on Armed Services has said that in terms of budget authority there was $16 billion last year that was not spent. I am sure, I would assure the gentleman from Indiana, if we looked at every other program in this budget there was certain moneys not spent.

I have not seen the gentleman from Indiana, the gentleman from Texas, or any of the gentlemen on either side of the aisle in this House offer amendments saying that is not a real freeze; what is a real freeze is to take those unspent moneys and deduct them from the ceiling.

Mr. HILER. Mr. Chairman, if the gentleman will yield further, now you are making another argument. The first argument you were making was that this is $800 million that was spent so why should we back it out? Now we are talking about the $800 million that was not spent. If the gentleman wants to take one argument or the other——

Mr. SCHUMER. Which one will the gentleman take? I will take either one.

Mr. HILER. I will take either one.

Mr. SCHUMER. Great. Then we should agree and withdraw the amendment.

Mr. TRAXLER. Mr. Chairman, I will take my time back.

I want to sincerely thank my colleagues for the participation in this dialog. It has been most helpful to me, and I guess where I have to come down is that I have made my choice now and I am going to go with the Budget Committee and the budget resolution as adopted by the House.

I appreciate the gentleman's comment about the arithmetic. In doing some of these accounts, perhaps we become creative and there may be room for questions on that point. I yield that issue, not conceding the amount, but I yield on the issue and say that there is some room here for doubt.

But I do want to suggest this: That as we approach these amendments, and as we look at the bill, that we do so not only in terms of the grand plan called the freeze, which many of us examined in our own minds months ago and support in concept, but then in the application we yield to the budget resolution.

The CHAIRMAN. The time of the gentleman from Michigan [Mr. TRAXLER] has again expired.

(By unanimous consent, Mr. TRAXLER was allowed to proceed for 1 additional minute.)

Mr. TRAXLER. So in working our way through this exercise of how to deal with the deficit, my own impression, in having listened to my colleagues, my own decision is that I am going to follow the House Budget Committee and the House budget resolution for the reason that it is a rational process and my estimation is that we are not exceeding last year's total expenditures in areas where we have discretionary choices. In the areas where there are, of course, the built-ins, the entitlements, that is a separate issue, and none of the amendments coming to the floor will deal with any of that kind of an issue.

So I have to make the choice that the budget process is a rational one, that I do not want to abandon the Budget Committee, that I do not want to abandon the House budget resolution, that in my judgment, by and large these totals were within the allocations approved in the budget resolution, so my baseline is that. We have not exceeded that baseline.

In all due respect for the authors of the amendment, I must respectfully vote against it and support the bill.

Mr. BOLAND. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I must say that I am disappointed in the amendment offered by the gentleman from Texas. Yesterday when we were discussing his amendments, the clear indication to me was that if the first two amendments were adopted, he probably would not offer the 2.5-percent reduction across the board.

Mr. BARTLETT. Mr. Chairman, if the gentleman would yield, if I conveyed that impression, that is distinctly incorrect from what I have conveyed consistently. My consistent position is that it was going to require three amendments. I said that in my floor statement publicly, and privately. I apologize if the gentleman received an erroneous impression.

Mr. BOLAND. I suppose this is a day of success for those who want to really stab the housing programs. Somebody told me a long time ago that if you are ever in Las Vegas and you are on a roll, keep on going. So he threw a seven on the first one and reduced it by $500 million. He threw an 11 on the next one and reduced the assisted housing program by $1,490 million.

The bill came to the floor with sufficient funds to provide 100,000 incremental units, and I have debated that before. That number has already been reduced to 95,000 units by the amendment offered by the gentleman from Texas.

The effect of the 2.5-percent reduction amendment would be to reduce the public housing program below 5,000 units. It will reduce housing for the elderly below 12,000 units. It will reduce all programs further, so that we will have only 92,500 incremental units. That is really not acceptable for providing safe, sanitary, and decent housing for those who need it most in America.

So I suppose one of the questions is, and it was asked by the gentleman from Michigan [Mr. LEVIN] who serves on the authorizing subcommittee, "How much of a pound of flesh do you want here?" You have taken a substantial one now—one that is not lethal to the programs, but one that will affect the program substantially.

I guess that most of the cuts in the assisted housing program will affect the people who are looking for housing. All of us would hope they could find it, but they are not able to find it.

So, Mr. Chairman, I am disappointed in this particular amendment. I would hope that the House would stick by the position of this committee. As has been pointed out, the reductions in the assisted housing program since 1981 have been dramatic, have been incredible. As a matter of fact, as has been pointed out here a number of times, the budget authority back in 1981 was around $30 billion for the assisted housing programs, and later on it was reduced, I think to about $25 billion.

We now are carrying a figure of less than $10 billion. I do not know of any other programs of the Government that have been reduced that dramatically and that are really attuned, really targeted to those who need housing the most.

So I would hope, Mr. Chairman, that this particular reduction would not be accepted. I have been around here for a few years and I can understand when the gloss of success touches the minds of people who enjoy it. But I oftentimes hope and believe that it really ought to touch the hearts of those who are concerned about these programs.

Mrs. BOGGS. Mr. Chairman, will the gentleman yield?

Mr. BOLAND. I yield to the gentlewoman from Louisiana.

Mrs. BOGGS. I thank the gentleman for yielding.

Mr. Chairman, I should also like to ask the gentleman if, during the 1981 appropriations of approximately $33 billion, there was a provision made within that for some 300,000 units of public housing, new housing or rehabilitated housing. At the time, the estimate of need was for 400,000 units a year.

So even in that year when there was $33 billion in the budget for new and substantially rehabilitated housing, we were really not meeting the needs at that time. With 100,000 units, is it not true that we will be meeting only a fourth of the need that was estimated in 1981?

Mr. BOLAND. The gentleman, of course, is correct. The number of units which were provided 4 to 5 years ago was around 250,000 units. Now we are only providing 100,000 incremental units in an area and a program where we ought to be providing more.

We have tried our best here, and I think this committee has done its best to do the right thing. My own judgment is that this across-the-board cut really is one that the Committee of the Whole House on the State of the Union should not accept, and I would hope the House would not do it.

□ 1450

Mr. HILER. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, the question that we are faced with here is whether or not, by passing this 2½ percent, across-the-board reduction, we bring assisted housing in line with the amount that we spent in fiscal year 1985. There was nearly $1 billion that has been chalked up as alleged savings from accounting changes, and there was $800 million that was appropriated last year that HUD said they will not spend. So the total is about $1.7 billion to $1.8 billion that was in last year's appropriation that, for a variety of reasons, ought to be backed out of the accounting procedures for this year.

The gentleman's amendment for a 2½-percent, across-the-board cut, in combination with the first two amendments that have been passed by the full House, would bring the fiscal year 1986 level in line with the fiscal year 1985 level, and I think that would in fact be a true freeze.

Mr. Chairman, I encourage my colleagues to support the amendment.

Mr. BARTLETT. Mr. Chairman, will the gentleman yield?

Mr. HILER. I yield to the gentleman from Texas.

Mr. BARTLETT. Mr. Chairman, I thank my colleague for yielding.

I think we are about ready for a vote. I feel compelled, out of the respect I have for the chairman of the subcommittee, the gentleman from Massachusetts [Mr. BOLAND], to say a few words about heart and compassion, and assisting low-income residents of this Nation.

I have been involved in housing issues and low-income housing issues for a long, long time, and I have watched a lot of things come and go. One of the things I have noticed is that in the last 4 years, unlike what has been characterized here, in fact this Congress has appropriated and this Federal Government has built 680,000 new units of assisted housing. There has not been a freeze in terms of units; there has been an increase since fiscal year 1982.

Mr. GREEN. Mr. Chairman, will the gentleman yield on that point?

Mr. HILER. I yield to the gentleman from New York.

Mr. GREEN. Mr. Chairman, I do think that we ought to set the history of these programs straight.

The gentleman is claiming credit for the construction of units in the 1980's that were appropriated in the 1970's, and as we know, public housing projects take some time to get under way, with environmental clearances, the drawing of the plans and all that. But plainly, if one looks at the number of units we have funded, the final Ford budget called for 400,000 units in the section 8 program alone. We can argue what the final Carter budget called for. I would have placed it at around 200,000; they would claim 220,000 units.

In this last budget we were down to 100,000 units. As a result of the gentleman's amendment, we are already down to 95,000 units. This amendment is going to knock off 3,000 more units when the bill as a whole is now way below the freeze level by any calculation, yours as well as mine.

Mr. BARTLETT. Mr. Chairman, will the gentleman yield further?

Mr. HILER. I yield to the gentleman from Texas.

Mr. BARTLETT. Mr. Chairman, the fact is that what we are debating today is the number of incremental new units, not the number of total units of existing assisted public housing.

The other thing I have noticed is that in many ways it was the big appropriations, both in housing and elsewhere in this country throughout the 1970's, that seemed to cause a lot more persons to fall into poverty. The fact is that this Congress has overspent and overpromised, and the result of the cumulative effect of those programs and that spending has been that we have had an increase in the despair and the poverty levels that has then required us to come back and ask for more programs. It has been the deficits themselves that push and drive people into poverty.

Now, H.R. 1, in the housing authorization preamble, says a little bit about something to do to help with low-income families. It says in paragraph 8: "Continued large Federal Government deficits are antihousing. Such large Federal deficits tend to keep interest rates high, thereby denying many other eligible homebuyers the opportunity to own a home."

Now, it is true that a freeze is not perfect, but a freeze is all we have left. We have frozen defense, NASA, education to the handicapped, school nutrition, and everything else. The true compassionate vote would be to bring the deficits down. This 2½-percent, across-the-board reduction is necessary in order to achieve that freeze in assisted housing programs.

Mr. Chairman, I thank the gentleman for yielding.

Mr. HILER. Mr. Chairman, I thank the gentleman for his comments, and I yield back the balance of my time.

Mr. SCHUMER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I compliment the gentleman from Texas and the Members on his side of the aisle. They have found a weak program that does not have much of a constituency and they have managed to kick the heck out of it today.

But let me say that we have a crisis in this country. It is a quieter crisis. We do not have Soviets at the gate, as we do in defense, we do not have farmers pleading for help, as we do in agricultural areas across the country, and we do not have mayors and Governors knocking at our door, coming in and talking about the need for revenue sharing, but we have a housing crisis indeed. We have hundreds and thousands of poor and very poor people who are wandering our streets and sleeping on subway grates. We have millions of middle-class people, young people, newly, married, who do not have the money to buy a home and live in absence of the American dream. We have hundreds of thousands of elderly who have no place to go because they cannot afford the prevailing rents if they were fortunate enough to own a home.

This bill makes a small dent in that crisis. It does it responsibly. It does it within the budget limitations. I can assure the gentleman as a member of the Budget Committee that the original cuts that we made were painful, indeed painful, given this crisis.

We do indeed have a housing crisis. Five years from today we will rue the day when we cut another 2 percent out of this progam, $1.7 billion out of a $10 billion program that, even when it was $30 billion and admittedly less efficient than it is today, did not solve the needs of the people in this country.

We need this money. Americans from one end of the country to the other need the money that is here.

We are within the budget resolution. Let us not, as the good gentleman from Massachusetts said, exact that extra pound of flesh when the amount of dollars we will save will not do as much good as the amount of dollars we will spend.

So again I compliment the gentleman on that side of the aisle. He is sincere, and he believes this money is better off not spent than spent, but I would remaind my colleagues in the House that the housing crisis is creeping up, is coming upon us. It will make this body do all sorts of things in the next decade that we could have prevented by not being penny-wise and pound-foolish today.

Mr. Chairman, I urge the defeat of this amendment and support for the responsible within-the-budget provision of the Appropriations Committee.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas [Mr. BARTLETT].

The question was taken; and on a division (demanded by Mr. BARTLETT) there were—ayes 25, noes 29.

RECORDED VOTE

Mr. BARTLETT. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 203, noes 213, not voting 17, as follows:

[Roll No. 258]

□ 1510

The Clerk announced the following pairs:

On this vote:

Mr. Chappie for, with Mr. Mitchell against.

Mr. Rudd for, with Mr. Gejdenson against.

Mr. FLIPPO changed his vote from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

The CHAIRMAN. Are there other amendments to the pending paragraph?

If not, the Clerk will read.

The Clerk read as follows:

RENTAL HOUSING ASSISTANCE

(RESCISSION)

The limitation otherwise applicable to the maximum payments that may be required in any fiscal year by all contracts entered into under section 236 of the National Housing Act (12 U.S.C. 1715z-1) is reduced in fiscal year 1986 by not more than $2,000,000 in uncommitted balances of authorizations provided for this purpose in appropriation Acts.

HOUSING FOR THE ELDERLY OR HANDICAPPED FUND

In 1986, $631,033,000 of direct loan obligations may be made under section 202 of the Housing Act of 1959, as amended (12 U.S.C. 1701q), utilizing the resources of the fund authorized by subsection (a)(4) of such section, in accordance with paragraph (C) of such subsection: *Provided*, That such commitments shall be available only to qualified nonprofit sponsors for the purpose of providing 100 per centum loans for the development of housing for the elderly or handicapped, with any cash equity or other financial commitments imposed as a condition of loan approval to be returned to the sponsor if sustaining occupancy is achieved in a reasonable period of time: *Provided further*, That the full amount shall be available for permanent financing (including construction financing) for housing projects for the elderly or handicapped: *Provided further*, That the Secretary may borrow from the Secretary of the Treasury in such amounts as are necessary to provide the loans authorized herein: *Provided further*, That, notwithstanding any other provision of law, the receipts and disbursements of the aforesaid fund shall be included in the totals of the Budget of the United States Government: *Provided further*, That, notwithstanding section 202(a)(3) of the Housing Act of 1959, loans made in fiscal year 1986 shall bear an interest rate which does not exceed 9.25 per centum, including the allowance adequate in the judgment of the Secretary to cover administrative costs and probable losses under the program.

CONGREGATE SERVICES

For contracts with and payments to public housing agencies and nonprofit corporations for congregate services programs in accordance with the provisions of the Congregate Housing Services Act of 1978, $2,700,000, to remain available until September 30, 1987.

PAYMENTS FOR OPERATION OF LOW-INCOME HOUSING PROJECTS

For payments to public housing agencies and Indian housing authorities for operating subsidies for low-income housing projects as authorized by section 9 of the United States Housing Act of 1937, as amended (42 U.S.C. 1437g), $1,210,600,000.

HOUSING COUNSELING ASSISTANCE

For contracts, grants, and other assistance, not otherwise provided for, for providing counseling and advice to tenants and homeowners—both current and prospective—with respect to property maintenance, financial management, and such other matters as may be appropriate to assist them in improving their housing conditions and meeting the responsibilities of tenancy or homeownership, including provisions for training and for support of voluntary agencies and services as authorized by section 106(a)(1)(iii) and section 106(a)(2) of the Housing and Urban Development Act of 1968, as amended, $4,000,000.

TROUBLED PROJECTS OPERATING SUBSIDY

For assistance payments to owners of eligible multifamily housing projects insured, or formerly insured, under the National Housing Act, as amended, in the program of operating subsidies for troubled multifamily housing projects under the Housing and Community Development Amendments of 1978, all unobligated balances of excess

rental charges and any collections after September 30, 1985, to remain available until September 30, 1987: *Provided*, That assistance payments to an owner of a multifamily housing project assisted, but not insured, under the National Housing Act may be made if the project owner and the mortgagee have provided or agreed to provide assistance to the project in a manner as determined by the Secretary of Housing and Urban Development.

FEDERAL HOUSING ADMINISTRATION FUND

For payment to cover losses, not otherwise provided for, sustained by the Special Risk Insurance Fund and General Insurance Fund as authorized by the National Housing Act, as amended (12 U.S.C. 1715z-3(b) and 1735c(f)), $239,762,000, to remain available until expended.

During 1986, within the resources available, gross obligations for direct loans are authorized in such amounts as may be necessary to carry out the purposes of the National Housing Act, as amended.

During 1986, additional commitments to guarantee loans to carry out the purposes of the National Housing Act, as amended, shall not exceed $50,900,000,000 of loan principal.

During fiscal year 1986, gross obligations for direct loans of not to exceed $89,222,000 are authorized for payments under section 230(a) of the National Housing Act, as amended, from the insurance fund chargeable for benefits on the mortgage covering the property to which the payments made relate, and payments in connection with such obligations are hereby approved.

NONPROFIT SPONSOR ASSISTANCE

During 1986, within the resources and authority available, gross obligations for the principal amounts of direct loans shall not exceed $500,000.

GOVERNMENT NATIONAL MORTGAGE ASSOCIATION

GUARANTEES OF MORTGAGE-BACKED SECURITIES

During 1986, new commitments to issue guarantees to carry out the purposes of section 306 of the National Housing Act, as amended (12 U.S.C. 1721g), shall not exceed $68,250,000,000 of loan principal.

SOLAR ENERGY AND ENERGY CONSERVATION BANK

ASSISTANCE FOR SOLAR AND CONSERVATION IMPROVEMENTS

For financial assistance and other expenses, not otherwise provided for, to carry out the provisions of the Solar Energy and Energy Conservation Bank Act of 1980 (12 U.S.C. 3601), $20,000,000, to remain available until September 30, 1987.

COMMUNITY PLANNING AND DEVELOPMENT

COMMUNITY DEVELOPMENT GRANTS

For grants to States and units of general local government and for related expenses, not otherwise provided for, necessary for carrying out a community development grant program as authorized by title I of the Housing and Community Development Act of 1974, as amended (42 U.S.C. 5301), $3,124,800,000, to remain available until September 30, 1988: *Provided*, That not to exceed 20 per centum of any grant made with funds appropriated herein shall be expended for "Planning and Management Development" and "Administration" as defined in regulations promulgated by the Department of Housing and Urban Development.

During 1986, total commitments to guarantee loans, as authorized by section 108 of the aforementioned Act, shall not exceed $225,000,000 of contingent liability for loan principal.

URBAN DEVELOPMENT ACTION GRANTS

For grants to carry out urban development action grant programs authorized in section 119 of the Housing and Community Development Act of 1974, as amended (42 U.S.C. 5301), pursuant to section 103 of that Act, $330,000,000, to remain available until September 30, 1989.

REHABILITATION LOAN FUND

During 1986, collections, unexpended balances of prior appropriations (including any recoveries of prior reservations) and any other amounts in the revolving fund established pursuant to section 312 of the Housing Act of 1964, as amended (42 U.S.C. 1452b), after September 30, 1985, are available and may be used for commitments for loans and operating costs and the capitalization of delinquent interest on delinquent or defaulted loans notwithstanding section 312(h) of such Act.

URBAN HOMESTEADING

For reimbursement to the Federal Housing Administration Fund for losses incurred under the urban homesteading program (12 U.S.C. 1706e), and for reimbursement to the Administrator of Veterans Affairs and the Secretary of Agriculture for properties conveyed by the Administrator of Veterans Affairs and the Secretary of Agriculture, respectively, for use in connection with an urban homesteading program approved by the Secretary of Housing and Urban Development pursuant to section 810 of the Housing and Community Development Act of 1974, as amended, $12,000,000, to remain available until expended.

POLICY DEVELOPMENT AND RESEARCH

RESEARCH AND TECHNOLOGY

For contracts, grants, and necessary expenses of programs of research and studies relating to housing and urban problems, not otherwise provided for, as authorized by title V of the Housing and Urban Development Act of 1970, as amended (12 U.S.C. 1701z-1 et seq.), including carrying out the functions of the Secretary under section 1(a)(1)(i) of Reorganization Plan No. 2 of 1968, $16,900,000, to remain available until September 30, 1987.

FAIR HOUSING AND EQUAL OPPORTUNITY

FAIR HOUSING ASSISTANCE

For contracts, grants, and other assistance, not otherwise provided for, as authorized by title VIII of the Civil Rights Act of 1968, as amended, $6,700,000, to remain available until September 30, 1987.

MANAGEMENT AND ADMINISTRATION

SALARIES AND EXPENSES

(INCLUDING TRANSFER OF FUNDS)

For necessary administrative and nonadministrative expenses of the Department of Housing and Urban Development, not otherwise provided for, including not to exceed $4,000 for official reception and representation expenses, $592,831,000, of which $251,404,000 shall be provided from the various funds of the Federal Housing Administration: *Provided*, That in the Department of Housing and Urban Development not to exceed sixteen full-time permanent positions and eighteen staff years shall be available for the Office of Public Affairs.

TITLE II

INDEPENDENT AGENCIES

AMERICAN BATTLE MONUMENTS COMMISSION

SALARIES AND EXPENSES

For necessary expenses, not otherwise provided for, of the American Battle Monuments Commission, including the acquisition of land or interest in land in foreign countries; purchases and repair of uniforms for caretakers of national cemeteries and monuments outside of the United States and its territories and possessions; rent of office and garage space in foreign countries; purchase (one for replacement only) and hire of passenger motor vehicles; and insurance of official motor vehicles in foreign countries when required by law of such countries; $10,954,000: *Provided*, That where station allowance has been authorized by the Department of the Army for officers of the Army serving the Army at certain foreign stations, the same allowance shall be authorized for officers of the Armed Forces assigned to the Commission while serving at the same foreign stations, and this appropriation is hereby made available for the payment of such allowance: *Provided further*, That when traveling on business of the Commission, officers of the Armed Forces serving as members or as Secretary of the Commission may be reimbursed for expenses as provided for civilian members of the Commission: *Provided further*, That the Commission shall reimburse other government agencies, including the Armed Forces, for salary, pay, and allowances of personnel assigned to it: *Provided further*, That section 409 of the general provisions carried in title IV of this Act shall not apply to the funds provided under this heading.

□ 1520

AMENDMENT OFFERED BY MR. FRENZEL

Mr. FRENZEL. Mr. Chairman, I offer amendments, and I ask unanimous consent that they be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from Minnesota?

There was objection.

The Clerk read as follows:

Amendments offered by Mr. FRENZEL: Page 13, line 20, strike out "$10,954,000" and insert in lieu thereof "$10,779,000".

Page 15, line 7, strike out "$7,759,000" and insert in lieu thereof "$7,635,000".

Page 34, line 10, strike out "$9,368,694,000" and insert in lieu thereof "$9,218,795,000".

Page 34, line 15, strike out "$195,840,000" and insert in lieu thereof "$192,707,000".

Page 34, line 21, strike out "$61,119,000" and insert in lieu thereof "$60,141,000".

Page 35, line 7, strike out "$760,547,000" and insert in lieu thereof "$748,378,000".

Page 35, line 20, strike out "$516,160,000" and insert in lieu thereof "$507,901,000".

Page 37, line 15, strike out "$144,400,000" and insert in lieu thereof "$142,090,000".

Page 38, line 8, strike out "$22,000,000" and insert in lieu thereof "$21,648,000".

Page 38, line 13, strike out "$3,000,000" and insert in lieu thereof "$2,952,000".

Page 38, line 20, strike out "$500,000" and insert in lieu thereof "$492,000".

Page 39, line 8, strike out "$235,000,000" and insert in lieu thereof "$231,240,000".

Mr. FRENZEL (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. FRENZEL. Mr. Chairman, the amendments which I have proposed, in effect a series of amendments, all relate to discretionary spending amounts for veterans.

The House budget resolution which we passed in June, and which was ratified by the House this week, included a ceiling of $27.45 billion for veterans' benefits and services under function 700. This bill before us contains a total of $26.52 billion for the Veterans' Administration, the Battle Monuments Commission and cemeterial expenses.

It also contains $1.5 billion in entitlement expenses. All of these expenses for veterans' programs are detailed in the table on page 81 of the committee report.

There are also deductions for receipts and fund transfers which CBO totals at $586 million. These are not shown in the table on the committee report. The absence of receipts and transfers from the report does tend to confuse things a little bit.

Therefore, the total appropriation and entitlement authorized in the bill are a little over $27.4 billion. That is just barely under the budget ceiling of $27.45 billion.

However, Mr. Chairman, there is more entitlement spending that must come under this ceiling, and that is the Veterans' Educational Benefit Fund, and the Soldiers, Sailors and Airmen's Home, which cost, between them, $194 million. Those two items will come up in the DOD appropriation.

Adding up all of what is going to be appropriated and what is in this appropriation bill we will be appropriating about $182 million over the House budget ceiling of $27.45 billion.

My amendment caps spending for the veterans at the House budget level. It reduces spending for discretionary programs only by 1.6 percent or $180 million.

My amendment does not reduce any pension compensation, burial benefits, readjustment benefits, insurance, or indemnity. It only changes the discretionary spending. It also does not freeze discretionary spending at last year's levels, since the House budget resolution accommodated a small increase of about 2 percent.

My amendment preserves that increase in veterans' functions. Mr. Chairman, we have had a lot of Members talk about freezes. Today, for the first time, the House has indicated some seriousness about living up either to a freeze or to its own budget resolution.

I must say that I have been rather outspoken in indicating that I think the House budget resolution is in fact a cream puff and will not develop much savings. Nevertheless, my amendment is not structured to a freeze, it is structured to the higher level of the House budget resolution.

It is confusing, because there are offsetting fund transfers and receipts which are in the bill and which are taken into account in the bill's total—but not shown in the committee report, and also by the fact that there are items charged to this function which are going to occur in a following appropriation.

There will be, under the resolution we passed this week, a direction to the authorizing committee, to reduce $300 million. I know the committee will carry out that responsibility. However, a COLA expense which is going to exceed $300 million is left out of this bill. So, even if my amendment is passed, we may spend a little more than the limits of our budget resolution.

I appreciate that no person in this House wants to vote for a reduction to veterans, just as we do not want to vote for reductions to anybody else. Nevertheless, this amendment is in my judgment, and in the opinion of the Congressional Budget Office, as close to fitting the House budget resolution as is possible under the circumstances.

Mr. Chairman, I hope the amendment will be supported.

□ 1530

Mr. HAMMERSCHMIDT. Mr. Chairman, I rise in opposition to the amendment offered by Mr. FRENZEL.

The amendment reduces discretionary programs in the Veterans' Administration by $180 million. The only spending of this nature at VA is in the general operating expenses and in the medical program. The vast majority of employees in VA are in this latter category. The net result therefore of the amendment would be to adversely affect the medical care of veterans.

Mr. Chairman, over 80 percent of VA expenditures are for salaries. The sum of $180 million equates to several thousand employees. The loss of that number of individuals when added to others already being absorbed would be devastating to VA medicine. It would lower the quality of care. And this would occur at a time when VA is facing an ever-increasing workload brought on by the great number of veterans advancing into their aging years.

Mr. Chairman, the appropriations subcommittee, under the able leadership of the gentleman from Massachusetts [Mr. BOLAND] and the gentleman from New York [Mr. GREEN] have done a good job on the bill before us. The job was most difficult. In my view, the VA has been treated fairly. The amendment before us would damage the agency and the veterans it serves. It ought not to pass.

Mr. FRENZEL. Mr. Chairman, will the gentleman yield?

Mr. HAMMERSCHMIDT. I yield to the gentleman from Minnesota.

Mr. FRENZEL. Mr. Chairman, I do not disagree with the gentleman's opinion. The gentleman is a distinguished expert in the House on this subject. If, in his opinion, the program would be damaged, that opinion has to carry great weight in the House.

I did want to point out, however, that the reduction in medical care under my amendment is a reduction from the Appropriation Committee bill, not a reduction from last year.

After giving full effect to my amendment, the House bill would still provide for a 4.9-percent increase over medical care from last year.

Mr. HAMMERSCHMIDT. I appreciate the fine work of the gentleman and the good intentions of his amendment. However, let me say that there are some 50, 53, or so new services being opened up in the Veterans' Administration, and filling positions for them would have to come out of the hide of existing programs; even now, they have to move employees around without adding any additional personnel to make those programs function.

So, therefore, in my opinion, the amendment would damage the medical program of the VA.

I yield to the distinguished ranking minority member of the subcommittee.

Mr. GREEN. I want to commend the distinguished ranking minority member of the Veterans' Affairs Committee for his statement. He is absolutely right that the bulk of this money is involved in the medical program; that is a labor-intensive program. The number of veterans reaching senior years is increasing very rapidly, to a point where it really threatens to overwhelm the system, and if we allow the number of employees in the VA medical system to shrink, we are going to reach a very dangerous situation there, in terms of the quality of care that is offered.

The VA hospitals currently have a lower staffing-to-patient ratio than hospitals generally in this country, which I think should be a cause for concern, and to go still further in that direction I think would be very dangerous, so I join the gentleman in opposing this amendment.

Mr. ROBINSON. Will the gentleman yield?

Mr. HAMMERSCHMIDT. I yield to my distinguished friend from Arkansas [Mr. ROBINSON].

Mr. ROBINSON. I would like to commend my colleague and ranking

minority member of our Veterans' Affairs Committee, and I also want to state that I think, in my opinion, you are the expert in this House, and, due to the fact that you have as much expertise if not more than anyone in this House, we should vote down this amendment, and I commend the gentleman.

Mr. HAMMERSCHMIDT. Mr. Chairman, I thank the gentleman, and I yield back the balance of my time.

Mr. BOLAND. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I oppose it for all the reasons that were detailed by the distinguished gentleman who sits on the Veterans Affairs Committee, and for some additional reasons. As the gentleman from Minnesota [Mr. FRENZEL] has indicated, this amendment would reduce the veterans' function by about $181 million, and $150 million of that is in the Medical Care Program.

If we made that kind of reduction in the Medical Care Program, it would force a reduction in personnel from the 193,941 ceiling that we require for medical care. It would reduce staffing by about 3,500 employees. That, of course, is unacceptable to the VA. It is unacceptable to those who believe that the medical care system ought to have sufficient personnel to handle the growing demand. That reduction creates a great deal of problem for medical care in the VA.

So for those reasons, Mr. Chairman, I oppose the amendment.

Mr. EDGAR. Mr. Chairman, the House-passed budget resolution authorized $27.45 billion in budget authority and $26.8 billion in outlays. This bill, H.R. 3038, is well within those figures. The gentleman from Minnesota has now asked that we vote for additional spending cuts for other functions not covered by the resolution. However, in doing so, he chooses to ignore that these other expenditures are offset by receipts. There is no significant net change in budget authority or outlays as a result of these items. For example, although there is budget authority of $162 million associated with the DOD-education benefits fund, this amount is offset by $171 million in receipts for this same account. I refer the gentleman to the Congressional Budget Office for a more complete explanation of these offsets.

Mr. Chairman, the budget resolution passed by the House contains funds for a minimum current services budget for medical care for our Nation's veterans. The budget also requires the Committee on Veterans' Affairs to provide $300 million in savings for fiscal year 1986. It is very likely that this savings will have to be realized from the medical care account since medical care is the only account which is not an entitlement account. An additional cut of the magnitude proposed in this amendment would make it impossible to maintain even current services since reduction in hospital medical staffing would undoubtedly be required.

This Nation has maintained the medical services for our country's veterans as an obligation which must be met. It is important to defeat this amendment and reffirm our commitment.

Mr. Chairman, I strongly urge my colleagues to defeat this amendment.

Mr. Chairman, I rise today in support of H.R. 3038, the HUD and Independent Agencies appropriations bill for fiscal year 1986.

Mr. Chairman, let me first assure you and my colleagues that I understand the dilemma that we face as a nation and particularly as Members of Congress as we again undertake to disburse our country's human and material wealth. The budget deficit is a very serious problem and scrutinizing each Federal program and activity is an arduous and sometimes painful exercise of our individual and collective intellects. Yet we must do it and we are doing it. The great risk is that we might forget our obligations.

High among the obligations we as a society and we here in the Congress have observed over the years is providing for our Nation's veterans. Mr. Speaker, I want to commend the members of the Appropriations Committee and the Appropriations Subcommittee on HUD and Indepdendent Agencies on the bill that is before us today. Their actions again reflect that long-held obligation.

I speak today in my capacity as chairman of the Subcommittee on Hospitals and Health Care of the Committee on Veterans' Affairs. I want to thank the members of the Appropriations Committee and the Appropriations Subcommittee on HUD and Independent Agencies for acting on my recommendations which were approved by the subcommittee I chair and by the full Committee on Veterans Affairs.

My recommendations were based on the anticipated great increase in need for medical care as our veteran population ages, and the requirement to provide care for those eligible veterans who are not yet old. The increase is expected to include both acute and long-term care. The extent of the increased need is well documented in private sector research and reports, in the VA's own report called "Caring for the Veteran," and in testimony before several committees of the Congress. Clearly the response to this set of needs must be a combination of cost effective delivery of current kinds of services and the implementation of alternative and innovative ways to address medical needs.

The members of the Committee on Veterans' Affairs were quite concerned that the budget proposed by the administration for fiscal year 1986 seemed to ignore the urgent requirements stated so clearly in the credible VA aging report and other sources by maintaining the status quo on most geriatic programs, such as adult day health care services and geriatic evaluation units.

It is patently obvious that resources must increase over the next 20 years to meet the anticipated demand for services by the aging veteran population while still providing care to other eligible veterans.

So, I was especially pleased to learn that the Appropriations Committee did not allow hospital staffing to be reduced as requested in the President's budget. As I had recommended, the Veteran's Affairs Committee approved, and now the Appropriations Committee has reported out increased funding of $75,720,000 to maintain a staffing level of 193,941, the 1985 average employment level. This is the "current services" level that my Veterans' Affairs colleagues and I recommended. I am also very pleased to see a restoration of the proposed 5-percent reduction in pay proposed by the administration. This is so vitally needed to maintain the quality and quantity of VA health care employees.

It is also good to see an increase over the President's proposed budget for medical and prosthetic research. The additional $8.76 million for a total of $195.84 million will enhance the VA's ability to conduct and support medical, rehabilitative and health services research. These are important aspects of the VA Medical Program which provides complete medical and hospital services for veterans. The Prosthetic Research Program is also essential in the development and testing of prosthetic, orthopedic and sensory aids for the purpose of improving the care and rehabilitation of eligible disabled veterans, including amputees, paraplegics and blind. The health services research and development projects at VA medical centers provide unique opportunities to improve the economy of delivery of health services and the accessibility of such services.

Last, let me talk about the medical construction budget. The Appropriations Committee has recommended a budget for major construction projects, those costing $2 million or more, of $516,160,000. This would include construction of new facilities and the modernization, alteration, and improvement of others. This amount provides an additional $98.4 million in fiscal year 1986 for the clinical addition project at Philadelphia. Last year we provided $17.7 million for design funds for the project. The amount requested by the administration for fiscal year 1986 was $12 million. The result of the Appropriations Commit-

tee's addition means that this project will now be fully funded at $128.1 million, which is the current estimated cost of the project. My recommendations over the years have been to do just this. The physically connected and operationally tied parts of this project, the clinical addition, nursing home, and parking facility have been considered a singular project until February of this year. That change, if accepted by the Congress would add time, costs, and inefficiencies to the project. I am pleased that my committee and now the Appropriations Committee have seen fit to recommend full funding to keep the project on track for next year.

I am also pleased that the project at Houston has been fully funded this year also. Funding for design, site acquisition, and site preparation was also recommended for Allen Park in the amount of $26,760,000. While an additional $167,840,000 will be required, the design and site funds will provide a good start for the future.

In summary, Mr. Chairman, I am generally pleased with the action of the Appropriations Committee and urge support of their recommendations. I wish to give my special thanks to the chairman of the HUD and Independent Agencies Subcommittee, Mr. BOLAND and the ranking minority member, Mr. GREEN, and the chairman of the full Appropriations Committee, Mr. WHITTEN, and the ranking minority member, Mr. CONTE. It is an honor and privilege to serve in the House with such dedicated men.

Mr. MONTGOMERY. Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from Minnesota. I haven't had a lot of time to look at the gentleman's amendment. As I understand it, his amendment would reduce veterans discretionary programs by $180 million. The gentleman indicates that his amendment would not reduce pension, compensation, burial benefits, readjustment benefits, or insurance. That is true because they are entitlements. Therefore, since the amendment is limited to discretionary spending, $180 million would have to come out of the veterans health care budget or general operating expenses.

The VA's health care budget is the major discretionary program. If we reduce VA's Hospital Program by $180 million it would require a reduction of some 6,000 personnel, unless the cut is to be taken by closing existing wards or closing hospitals. I can tell you that a 6,000 reduction in staff across the board would have an adverse impact on the quality of care.

I would remind the gentleman that the VA's health care budget has not contributed a penny to the deficit; that fact has been documented by our committee as well as the Appropriations Committee. In constant dollars, we are spending no more for veterans health care today than what we were spending in 1975.

To the credit of Mr. BOLAND and Mr. GREEN and other members of the Appropriations Committee, the reduction of personnel in VA hospitals proposed by the administration in fiscal year 1986 was not accepted. It was not accepted because Congress will fulfill its commitment to take care of the health care needs of our World War II veteran population.

Mr. Chairman, when we have approximately 11 million World War II veterans approaching the average age of 65 years, this is not the time to be cutting back on the VA's health care system. Many are already being turned away, and if we are to fulfill the pledge we have made over the years to take care of the health care needs of the World War II veteran population, we can't do it by reducing the VA's health care budget. I urge the Members to oppose the amendment of the gentleman from Minnesota.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Minnesota [Mr. FRENZEL].

The amendments were rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

CONSUMER PRODUCT SAFETY COMMISSION

SALARIES AND EXPENSES

For necessary expenses of the Consumer Product Safety Commission, including hire of passenger motor vehicles, services as authorized by 5 U.S.C. 3109, but at rates for individuals not to exceed the per diem rate equivalent to the rate for GS-18, and not to exceed $500 for official reception and representation expenses, $37,000,000, of which $1,000,000 shall be available only for activities authorized by the Cigarette Safety Act of 1984 (Public Law 98-567).

DEPARTMENT OF DEFENSE—CIVIL

CEMETERIAL EXPENSES, ARMY

SALARIES AND EXPENSES

For necessary expenses, as authorized by law, for maintenance, operation, and improvement of Arlington National Cemetery and Soldiers' and Airmen's Home National Cemetery, $7,759,000, to remain available until expended: *Provided*, That reimbursement shall be made to the applicable military appropriation for the pay and allowances of any military personnel performing services primarily for the purposes of this appropriation.

ENVIRONMENTAL PROTECTION AGENCY

SALARIES AND EXPENSES

For necessary expenses, not otherwise provided for, including hire of passenger motor vehicles; hire, maintenance, and operation of aircraft; uniforms, or allowances therefor, as authorized by 5 U.S.C. 5901-5902; services as authorized by 5 U.S.C. 3109, but at rates for individuals not to exceed the per diem rate equivalent to the rate for GS-18; purchase of reprints; library memberships in societies or associations which issue publications to members only or at a price to members lower than to subscribers who are not members; construction, alteration, repair, rehabilitation, and renovation of facilities, not to exceed $25,000 per project; and not to exceed $3,000 for official reception and representation expenses; $690,176,000: *Provided*, That none of these funds may be expended for purposes of Resource Conservation and Recovery Panels established under section 2003 of the Resource Conservation and Recovery Act, as amended (42 U.S.C. 6913).

RESEARCH AND DEVELOPMENT

For research and development activities, $223,400,000, to remain available until September 30, 1987: *Provided*, That $6,000,000 of the funds provided under this heading shall be available only for a full scale demonstration of limestone injection multistage burner technology in a tangentially fired boiler on an equal cost sharing basis with the electric power industry.

ABATEMENT, CONTROL, AND COMPLIANCE

For abatement, control, and compliance activities, $577,600,000, to remain available until September 30, 1987: *Provided*, That none of these funds may be expended for purposes of Resource Conservation and Recovery Panels established under section 2003 of the Resource Conservation and Recovery Act, as amended (42 U.S.C. 6913), or for support to State, regional, local and interstate agencies in accordance with subtitle D of the Solid Waste Disposal Act, as amended, other than section 4008(a)(2) or 4009: *Provided further*, That $50,000,000 of the funds provided under this heading shall be available for the purposes of the Asbestos School Hazards Abatement Act of 1984, including $5,000,000 for administrative expenses: *Provided further*, That the $45,000,000 available for grants and loans for school asbestos abatement may be obligated only for projects conducted by contractors who are State-certified or by employees who have successfully completed a training program approved by the Environmental Protection Agency.

BUILDINGS AND FACILITIES

For construction, repair, improvement, extension, alteration, and purchase of fixed equipment for facilities of, or use by, the Environmental Protection Agency, $5,000,000, to remain available until expended.

EXECUTIVE OFFICE OF THE PRESIDENT

COUNCIL ON ENVIRONMENTAL QUALITY AND OFFICE OF ENVIRONMENTAL QUALITY

For necessary expenses of the Council on Environmental Quality and the Office of Environmental Quality, in carrying out their functions under the National Environmental Policy Act of 1969 (Public Law 91-190), the Environmental Quality Improvement Act of 1970 (Public Law 91-224), and Reorganization Plan No. 1 of 1977, including not to exceed $500 for official reception and representation expenses, and hire of passenger motor vehicles, $700,000.

OFFICE OF SCIENCE AND TECHNOLOGY POLICY

For necessary expenses of the Office of Science and Technology Policy, in carrying out the purposes of the National Science and Technology Policy, Organization, and Priorities Act of 1976 (42 U.S.C. 6601 and 6671), hire of passenger motor vehicles, services as authorized by 5 U.S.C. 3109, not to exceed $1,500 for official reception and representation expenses, and rental of conference rooms in the District of Columbia, $2,343,000: *Provided*, That the Office of Science and Technology Policy shall reimburse other agencies for not less than one-half of

the personnel compensation costs of individuals detailed to it.

FEDERAL EMERGENCY MANAGEMENT AGENCY

DISASTER RELIEF

For necessary expenses in carrying out the functions of the Disaster Relief Act of 1974, as amended (42 U.S.C. 5121 et seq.), $194,000,000, to remain available until expended.

SALARIES AND EXPENSES

For necessary expenses, not otherwise provided for, including hire and purchase of motor vehicles (31 U.S.C. 1343); uniforms, or allowances therefor, as authorized by 5 U.S.C. 5901-5902; services as authorized by 5 U.S.C. 3109, but at rates for individuals not to exceed the per diem rate equivalent to the rate for GS-18; expenses of attendance of cooperating officials and individuals at meetings concerned with the work of emergency preparedness; transportation in connection with the continuity of government program to the same extent and in the same manner as permitted the Secretary of a Military Department under 10 U.S.C. 2632; and not to exceed $1,000 for official reception and representation expenses, $118,746,000, of which not to exceed $95,771,000 shall be available for obligation in the personnel compensation and benefits object classifications: *Provided*, That of the funds provided herein for personnel compensation and benefits (object classifications 11, 12, and 13), not to exceed $24,839,000 shall become available on October 1, 1985, and that amount shall be increased by (1) $23,644,000 on January 1, 1986, (2) $23,644,000 on April 1, 1986, and (3) $23,644,000 on July 1, 1986: *Provided further*, That of the funds provided under this heading, not to exceed $30,079,000 shall be available for headquarters management and administration activities: *Provided further*, That the funds provided herein for headquarters management and administration activities shall be used to support 42 full-time equivalent employment (FTEE) in the Office of Inspector General and not to exceed (1) 8 FTEE in the Office of the Director, (2) 18 FTEE in the Office of General Counsel, (3) 2 FTEE in Special Programs, (4) 5 FTEE in the Executive Administrator's Office, (5) 8 FTEE in the Office of Public Affairs, (6) 6 FTEE in the Office of Congressional Relations, (7) 2 FTEE in the Office of International Affairs, (8) 5 FTEE in the Office of Equal Opportunity, (9) 11 FTEE in the Office of Security, (10) 31 FTEE in the Office of Acquisition Management, (11) 41 FTEE in the Office of Personnel, (12) 74 FTEE in the Office of the Comptroller, (13) 7 FTEE in the Office of Program Analysis and Evaluation, (14) 60 FTEE in the Office of Administrative Support, (15) 64 FTEE in Automatic Data Processing, and (16) 6 FTEE in the Office of Regional Operations.

EMERGENCY MANAGEMENT PLANNING AND ASSISTANCE

For necessary expenses, not otherwise provided for, to carry out activities under the National Flood Insurance Act of 1968, as amended, and the Flood Disaster Protection Act of 1973, as amended (42 U.S.C. 4001 et seq.), the Disaster Relief Act of 1974, as amended (42 U.S.C. 5121 et seq.), the Earthquake Hazards Reduction Act of 1977, as amended (42 U.S.C. 7701 et seq.), the Federal Fire Prevention and Control Act of 1974, as amended (15 U.S.C. 2201 et seq.), the Strategic and Critical Materials Stock Piling Act, as amended (50 U.S.C. 98 et seq.), the Federal Civil Defense Act of 1950, as amended (50 U.S.C. App. 2251 et seq.), the Defense Production Act of 1950, as amended (50 U.S.C. App. 2061 et seq.), section 103 of the National Security Act (50 U.S.C. 404), and Reorganization Plan No. 3 of 1978, $248,910,000.

AMENDMENT OFFERED BY MR. CARNEY

Mr. CARNEY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. CARNEY: On page 20, line 23, strike the period and insert a semicolon and add the following new proviso: ": *Provided*, That none of the funds made available may be expended for the purpose of the preparation, testing or implementation of an emergency radiological response plan without the consent of the appropriate State and/or local authorities.".

Mr. GREEN. Mr. Chairman, I reserve a point of order with respect to the amendment.

The CHAIRMAN. The gentleman reserves a point of order on the amendment.

The Chair recognizes the gentleman from New York [Mr. GREEN].

Mr. CARNEY. Mr. Chairman, this amendment is quite simple. It does not delete any money; it just gives some guidance; and basically what you might want to call this amendment is a "State's rights" amendment.

We are not trying to prevent FEMA from cooperating and working with local governments in the implementation of emergency radiological response plans, but what we are trying to do is to preserve the localities' rights to determine their own destination.

It is quite simple, and I would hope that it would enjoy the support of my colleagues in the House.

POINT OF ORDER

Mr. GREEN. Mr. Chairman, I very much regret that I must press my point of order, that the amendment constitutes legislation on an appropriation bill, particularly insofar as it imposes additional duties on the agency by requiring them to ascertain the views of State and local government officials, local government officials indeed to be quite numerous in the area around a nuclear generation plant, and that would therefore be a substantial additional duty imposed on the agency.

The CHAIRMAN. Does the gentleman from New York desire to be heard?

Mr. CARNEY. Mr. Chairman, I regret that a point of order was made on my amendment; I think it is an amendment that would be germane, and I also believe it is an appropriate amendment at this time in the bill.

The CHAIRMAN. The question is one, not of germaneness, but obviously whether it abides by the rules of the House.

Does the gentleman have a specific response to the point of order that this constitutes legislation on an appropriations bill?

Mr. CARNEY. Mr. Chairman, I thought I had written the amendment in a narrow enough sense that it would stand up to parliamentary consideration.

The CHAIRMAN (Mr. PANETTA). Is there further discussion on the point of order?

If not, the Chair is prepared to rule on the point of order.

The amendment states at the conclusion that it demands that this response plan not be concurred in without the consent of the appropriate State and/or local authorities.

In the view of the Chair, that constitutes legislative direction on an appropriation bill not shown to be required by existing law and therefore violates clause 2, rule XXI which prohibits legislation on an appropriations bill and therefore the point of order is well taken.

□ 1540

The Clerk will read.

The Clerk read as follows:

NATIONAL FLOOD INSURANCE FUND

(INCLUDING TRANSFERS OF FUNDS)

For repayment under notes issued by the Director of the Federal Emergency Management Agency to the Secretary of the Treasury pursuant to section 15(e) of the Federal Flood Insurance Act of 1956, as amended (42 U.S.C. 2414(e)), $92,852,000, of which $8,760,000 shall, upon enactment of this Act, be transferred to the Salaries and expenses appropriation for administrative costs of the insurance programs and $45,750,000 shall, upon enactment of this Act, be transferred to the Emergency management planning and assistance appropriation for flood plain management activities, including $4,778,000 for expenses under section 1362 of the National Flood Insurance Act of 1968, as amended (42 U.S.C. 4103, 4127), which amount shall be available until September 30, 1987. In fiscal year 1986, no funds in excess of (1) $40,750,000 for operating expenses, (2) $67,591,000 for agents' commissions and taxes, and (3) $9,160,000 for interest on Treasury borrowings shall be available from the National Flood Insurance Fund without prior notice to the Committees on Appropriations.

EMERGENCY FOOD AND SHELTER PROGRAM

There is hereby appropriated $70,000,000 to the Federal Emergency Management Agency, to remain available until September 30, 1986, to carry out an emergency food and shelter program. Notwithstanding any other provision of this or any other Act, such amount shall be made available under the terms and conditions of the following paragraphs:

The Director of the Federal Emergency Management Agency shall, as soon as practicable after enactment of this Act, constitute a national board for the purpose of determining how the program funds are to be distributed to individual localities. The national board shall consist of seven members. The United Way of America, the Salvation Army, the National Council of Churches of Christ in the U.S.A., the National Conference of Catholic Charities, the Council of Jewish Federations, Inc., the American Red Cross, and the Federal Emergency Management Agency shall each designate a repre-

sentative to sit on the national board. The representative of the Federal Emergency Management Agency shall chair the national board.

Each locality designated by the national board to receive funds shall constitute a local board for the purpose of determining how its funds will be distributed. The local board shall consist, to the extent practicable, of representatives of the same organizations as the national board except that the mayor or appropriate head of government will replace the Federal Emergency Management Agency member.

The Director of the Federal Emergency Management Agency shall award a grant for $70,000,000 to the national board within thirty days after enactment of this Act for the purpose of providing emergency food and shelter to needy individuals through private voluntary organizations and through units of local government.

Eligible private voluntary organizations should be nonprofit, have a voluntary board, have an accounting system, and practice nondiscrimination.

Participation in the program should be based upon a private voluntary organization's or unit of local government's ability to deliver emergency food and shelter to needy individuals and such other factors as are determined by the local boards.

Total administrative costs shall not exceed 2 per centum of the total appropriation.

As authorized by the Charter of the Commodity Credit Corporation, the Corporation shall process and distribute surplus food owned or to be purchased by the Corporation under the food distribution and emergency shelter program in cooperation with the Federal Emergency Management Agency.

Mr. PASHAYAN. Mr. Chairman, I want to address myself to the committee's report language on emergency planning for nuclear facilities. This is an issue with which I have some familiarity as a result of my activities on the Interior Committee. In fact, I sponsored an amendment on this subject in this year's Nuclear Regulatory Commission authorization bill. The amendment would extend a provision of existing law authorizing the NRC to consider utility emergency plans for nuclear facilities when affected States and localities decline to submit their own plans.

Last year, when we included that provision in the NRC authorization, I spoke on the floor regarding its significance. I noted that the reason that it is, in fact, significant is that, once utility emergency plans are submitted and approved in the face of State and local opposition to a plant, those plans can be implemented by Federal authorities. States and localities are thus denied a veto of nuclear facilities. They cannot veto a facility by failing to submit a plan, because the current NRC authorization, and indeed the NRC's underlying authority, permit the Commission to consider a utility plan in the licensing process. They cannot veto by failing to exercise or to carry out a plan, because of the authority in Federal agencies to conduct those activities.

The report language before us today underscores the latter point. It makes clear that the Federal Emergency Management Agency is authorized to exercise and implement emergency plans and to coordinate the efforts of other Federal agencies with regard to those activities. That authority derives primarily from the Civil Defense Act of 1950 and the Disaster Relief Act of 1974. More important, the report directs that the authority actually be used. I am delighted to see the committee take this step, since it is one that will benefit both the nuclear power industry and those who live in the vicinity of nuclear plants.

I should like to elaborate on the authority of FEMA under the two relevant acts. The Civil Defense Act directs the Federal Government to provide the necessary direction, coordination and guidance for a system of civil defense. Through a reorganization plan and a subsequent delegation, FEMA has become the lead agency under the act. The resulting responsibility in FEMA to provide for a civil defense system must of necessity include the reponsibility to fill in the gaps in any system that is provided. If States and localities fail to exercise their own responsibilities under that system, FEMA would appear to have not only the authority but also the obligation to compensate for their inadequacies. That is true not only for actions in response to a nuclear attack, but it also applies to responses to natural and manmade disasters—including nuclear powerplant accidents.

Thus, when I hear, as I occasionally do, statements that FEMA does not have the authority to carry out emergency evacuation plans for nuclear facilities, I have difficulty understanding them. When I hear that FEMA lacks the authority to exercise such plans, I have even more difficulty. To repeat—and I think it bears repeating—responsibility for a system simply must include the authority to intervene directly on behalf of the system when it would otherwise fail. And that authority must in turn include the authority to conduct exercises so that such intervention, when called for, will be effective.

The authority granted under the Disaster Relief Act was originally conferred on the President and was then delegated to the Director of FEMA by executive order. Under that act, at the request of the Governor of any State, the President can declare an emergency. Federal agencies are then authorized, on the direction of FEMA, to provide assistance by "utilizing * * * equipment, supplies, facilities, personnel, and other resources." In short, once an emergency is declared, whether it relates to a natural disaster, a nuclear accident, or whatever, FEMA has broad and far-reaching powers to deal with the situation.

It is true that FEMA can exercise those powers only after a Governor of the affected State requests it to do so. It must be assumed, however, that, in the event of any emergency in which the State or an affected locality does not assume control of the situation, the Governor would request Federal action. In such a case, FEMA would be the agency that exercised command and control, unless it chose another agency to assume that role.

If FEMA has that command and control responsibility, it must be prepared to use it at the appropriate time. It therefore unquestionably has the authority to participate in any exercise that is designed to ensure adequate preparation. Emergency planning exercises for nuclear facilities have percisely that function. FEMA is thus clearly authorized to participate in those exercises.

The authority is made explicit by 42 U.S.C. 5131. The section authorizes FEMA to establish a program of disaster preparedness that utilizes the services of all agencies, including FEMA. The program is to include, among other things, "preparation of disaster preparedness plans for mitigation, warning, emergency operations * * * and recovery," and "training and exercises." The message, once again, could hardly be clearer: The authority is there.

The committee adopted language similar to this report language in its report accompanying the energy and water appropriation bill. The language directs the Department of Energy to participate in emergency preparedness exercises and emergency plan execution when States and localities refuse to do so. Thus, both FEMA and DOE have now been so directed. At the time of our consideration of the energy and water bill, Mr. MARKEY stated that DOE has no authority to perform those activities. As a final matter, I should like to address myself briefly to his remarks.

First of all, it should be noted that the Department of Energy Organization Act is ambiguous in this area. It is, therefore, a close question whether, without the action of any other Federal agency, DOE would be authorized on its own to exercise or carry out an emergency plan. There is no question whatever, however, that FEMA is capable of delegating its own authority to perform these functions to DOE. Short of delegating the authority, FEMA may also use the services of DOE, while retaining responsibility for the activity in question. FEMA's authority to delegate is explicit under section 201 of the Civil Defense Act. Section 401(c) of that act further provides that FEMA may utilize the services of Federal agencies in exercising its own authority. Beyond that, Executive Order 11490 provides that the civil

defense authorities delegated by that order can be transferred from one agency to another with the concurrence of FEMA. Finally, the Economy Act authorizes all Federal agencies to perform certain services for other Federal agencies subject to very modest constraints.

It is thus clear that DOE can play a critical role in emergency plan exercises and execution, should FEMA authorize it to do so. It is less clear, but still arguable, that the Department's role can be significant even if FEMA takes no such action. The Energy and Water report language simply directs the Department to make full use of its authority in either event.

In essence, the committee has told FEMA and DOE that a serious problem exists in nuclear power regulation and that the two agencies are obligated to work it out together. That, it seems clear, was the appropriate path to take. I congratulate the committee for taking the lead in this troublesome area, and I welcome the opportunity to support its effort.

AUTHORITY OF THE FEDERAL EMERGENCY MANAGEMENT AGENCY TO EXERCISE AND IMPLEMENT EMERGENCY PLANS FOR NUCLEAR FACILITIES AND TO USE THE SERVICES OF THE DEPARTMENT OF ENERGY OR OTHER AGENCIES IN CONNECTION WITH SUCH ACTIVITIES

I. AUTHORITY UNDER THE FEDERAL CIVIL DEFENSE ACT OF 1950

The Federal Civil Defense Act of 1950 was adopted "to provide a system of civil defense" for protection from enemy attack and from natural and man-made disasters. 50 U.S.C. App. §§ 2251 and 2252(b). The relevant authority under the act has been delegated to the Director of the Federal Emergency Management Agency (FEMA). Executive Order 12148, § 4-103, reprinted in 50 U.S.C. App. § 2251 note. The authority "to provide a system" of necessity includes the authority to intervene directly to compensate for deficiencies in that system.

Section 201 of the Act authorizes the Director of FEMA "to delegate, with the approval of the President, to the several departments and agencies of the Federal Government appropriate civil defense responsibilities." 50 U.S.C. App. § 2281(b).

In addition, section 401(c) of the Act provides that the Director may "utilize the services of Federal agencies." 50 U.S.C. App. § 2253(c). Indeed, the Director is instructed to use existing resources of the federal government to the maximum extent possible. 50 U.S.C. App. § 2257. The Director is authorized to reimburse assisting departments for expenditures or for compensation of their personnel. 50 U.S.C. App. § 2253(e).

II. AUTHORITY UNDER THE DISASTER RELIEF ACT OF 1974

The Disaster Relief Act of 1974 authorizes the President to declare an emergency or major disaster and to provide assistance at the request of the Governor of the affected state. 42 U.S.C. § 5141. Authority to declare an emergency or major disaster remains with the President, but all other relevant authority has been delegated to the Director of FEMA. Executive Order 12148, § 4-203, reprinted in 50 U.S.C. App. § 2251 note.

Once an emergency or major disaster has been declared, Federal agencies are authorized, at the direction of FEMA, "to provide assistance by (1) utilizing * * * their equipment, supplies, facilities, personnel, and other resources." Federal agencies are also authorized to perform "emergency work or services essential to save lives and to protect and preserve property, public health and safety, including but not limited to * * * movement of supplies or persons, clearance of roads," etc. 42 U.S.C. § 5146(a).

Moreover, regardless of existing emergencies or disasters, the Director of FEMA is "authorized to establish a program of disaster preparedness that utilizes services of all apprporite agencies * * * and includes (1) preparation of disaster preparedness plans for mitigation, warning, emergency operations, rehabilitation, and recovery; [and] (2) training and exercises." 42 U.S.C. § 5131.

III. AUTHORITY UNDER EXECUTIVE ORDER 11490

Executive Order 11490, as amended, reprinted in 50 U.S.C. App. § 2251 note, delegates numerous civil defense authorities to various federal agencies and departments. The order provides that these authorities are to be exercised under the guidance and coordination of FEMA. Section 3013 of the order provides:

"Transfer of Functions. Any emergency preparedness function under this order, or parts thereof, may be transferred from one department or agency to another with the consent of the heads of the organizations involved and with the concurrence of the Director, FEMA. Any new emergency preparedness function may be assigned to the head of a department or agency by the Director, FEMA by mutual consent."

IV. AUTHORITY UNDER THE ECONOMY ACT

The Economy Act authorizes federal departments and agencies to perform services for other federal departments and agencies. 31 U.S.C. § 1535. The act is implemented by letters of agreement between such departments and agencies. Id. The agreement must be in the best interests of the U.S. government; the department or agency must be able to provide the services; and the services must not be available as conveniently or cheaply from a commercial source. Id.

The Clerk read as follows:

GENERAL SERVICES ADMINISTRATION

CONSUMER INFORMATION CENTER

For necessary expenses of the Consumer Information Center, including services authorized by 5 U.S.C. 3109, $1,249,000, to be deposited into the Consumer Information Center Fund: *Provided*, That the appropriations, revenues and collections deposited into the fund shall be available for necessary expenses of Consumer Information Center activities in the aggregate amount of $5,200,000. Administrative expenses of the Consumer Information Center in fiscal year 1986 shall not exceed $1,631,000. Appropriations, revenues and collections accruing to this fund during fiscal year 1986 in excess of $5,200,000 shall remain in the fund and shall not be available for expenditure except as authorized in appropriation Acts.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

OFFICE OF CONSUMER AFFAIRS

For necessary expenses of the Office of Consumer Affairs, including services authorized by 5 U.S.C. 3109, $1,988,000.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

RESEARCH AND DEVELOPMENT

For necessary expenses, not otherwise provided for, including research, development, operations, services, minor construction, maintenance, repair, rehabilitation and modification of real and personal property; purchase, hire, maintenance, and operation of other than administrative aircraft, necessary for the conduct and support of aeronautical and space research and development activities of the National Aeronautics and Space Administration; $2,756,800,000, to remain available until September 30, 1987: *Provided*, That of the funds provided herein, not to exceed $200,000,000 shall be available for a space station, except that the Administrator of the National Aeronautics and Space Administration may increase the aforementioned amount by the $10,000,000 made available herein for the orbital maneuvering vehicle.

AMENDMENTS OFFERED BY MR. HENRY

Mr. HENRY. Mr. Chairman, I offer a series of seven amendments, and I ask unanimous consent that they be considered as read, printed in the RECORD, and considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The texts of the amendments are as follows:

Amendments offered by Mr. HENRY: Page 24, line 23, strike out "$2,756,800,000," and insert in lieu thereof "$2,700,561,000,".

Page 25, line 15, strike out "$3,402,900,000," and insert in lieu thereof "$3,333,481,000,".

Page 25, line 23, strike out "$139,300,000," and insert in lieu thereof "$136,845,000,".

Page 27, line 6, strike out "$1,367,000,000," and insert in lieu thereof "$1,339,113,000,".

Page 28, line 19, strike out "$1,347,205,000," and insert in lieu thereof "$1,327,670,500,".

Page 30, line 6, strike out "$115,100,000," and insert in lieu thereof "$113,431,000,".

Page 30, line 17, strike out "$60,550,000," and insert in lieu thereof "$59,698,500,".

Mr. HENRY. Mr. Chairman, of the seven amendments involved here four deal with the NASA appropriation and three with the National Science Foundation appropriation. The intent of each of the amendments is simply to bring the appropriated level down to the authorized amount, to bring the appropriations language into concurrence with the authorization that was passed by this House in April by an overwhelming margin.

There has been objection to this amendment raised, quite frankly. A letter was circulated, a "Dear Colleague" letter, bearing the signatures of some 31 of our colleagues, suggesting that this was an attempt to slash funding for NASA and slash funding for the NSF.

I would point out that, so far as the NASA freeze amendments go, we are talking, roughly, about 2 percent pro rata reduction, and with regard to the National Science Foundation amendments, a pro rata reduction of 1.5 percent, in keeping with the language adopted by this body several months ago when we first began discussing the freeze issue.

Now, we have had a lot of discussion of what is a freeze and what is a freeze

and what are we freezing against. And when this discussion began on the floor of this House, Mr. Chairman, the effort in this case was to freeze discretionary spending across the board other than nonentitlement programs and other than programs that affect the needy, poverty-needs directed programs, to hold them consistent with the spending levels of 1985 fiscal year.

These amendments, Mr. Chairman, do nothing more than that but freeze each of these items at the 1985 level, including the 1985 supplemental.

Each of us supports efforts to cut the deficit. All too often, and, unfortunately, on a regular basis, Mr. Chairman, we come round and round, saying, "But let's begin somewhere else." We fought that battle on several occasions here today. Sometimes these amendments have prevailed; sometimes they have not. But in this case, Mr. Chairman, the House is solidly on record for a freeze, in this case, Mr. Chairman, when we debated the authorization bill, an authorization freeze with the overwhelming support of this body and the overwhelming support of the Members of this body from both sides of the aisle. It is argued, Mr. Chairman, that increased spending in this area, particularly in the NASA area, for example, gives us returns of $7 to $14 for every additional dollar we invest.

Mr. Chairman, the same argument is made relative to almost every program. Jobs Corps supporters, which I support, argue that every dollar returns $8 on the dollar in terms of revenues saved. WIC supporters, a program I support, argue that for every dollar invested there is a $6 return on the dollar. Were it that simple, Mr. Chairman, we ought to spend more in order to save more. But, alas, it is not so.

I have no argument with the merit of the NASA programs, the programs of the National Science Foundation. The goals of both these programs are important. Their work is vital to our future. But, likewise, Mr. Chairman, I share the concern that has been expressed so often today and throughout these last months with the deficits we are amassing. These amendments are simple, across-the-board-freeze, based on 1985 spending levels.

Mr. FUQUA. Mr. Chairman, I move to strike the last word.

Mr. Chairman, the amendment that is offered by the gentleman from Michigan I am sure is well intended. I would like to point out to the membership of the committee that this bill as presented by the distinguished gentleman from Massachusetts, with the able leadership of the distinguished gentleman from New York [Mr. GREEN], is within the budget resolution as passed by the House. It is also below the budget request of this administration.

Now, what do we do in the National Science Foundation if we reduce those funds?

At the direction of the Congress in the last budget year, we recognized the need to develop supercomputer research and training at various institutions of higher education in this country, and that program is beginning to be initiated at the present time at four distinguished universities throughout this country and hopes to be expanded in later budgets.

What would this do? It would severely impact those programs, programs that are very vital to this country.

Where else would it impact? In repeated hearings that we have had in our science policy task force there has been the crying need in this country to turn out more and more engineers and scientists to meet the demands of not only Government but of industry in this country. Those are very critical programs. Only this morning we had some very distinguished individuals from a broad section of this country testify before our panel about the critical need for this.

This House in 1983 passed one of the first major pieces of legislation dealing with science and math education as a result of a study called Crisis in Education in America. We responded, and it was enacted into law and signed by President Reagan last year, to be directed by the National Science Foundation.

It would impact high schools and elementary schools in trying to upgrade the teaching capabilities of their teachers and provide stronger programs in science and math education.

That program would be severely impacted if this amendment were to pass, the very things that are investments in the future, investments that we as responsible Members and elected Members of this House must look at. This is not dead-end spending. This is an investment in the future of the country.

Now, let us look at the Aeronautics and Space Administration and to some events that have happened since the authorization bill was on the floor.

First of all, the NASA bill is 15 percent below the 1973 NASA budget request in terms of purchasing power. The NASA employees are down over 5,000 from what they were in 1973. And I might add that was after the Apollo Program. The first thing we realize is that these are programs in which we have already made large investments. Those include the Galileo mission to Jupiter, the space telescope, both of which are due to be launched in 1986; the Upper Atmosphere Satellite Program, which has been in development for several years, cutting this program would be very wasteful. We would not save any money. We would stretch the programs out and they would cost the taxpayers considerable more money. The Centaur modification that is going to be necessary to fly in the space shuttle has been underway for some time and the modification to Centaur to fly the Galileo as well as the international solar polar mission which is an international mission.

□ 1550

Therefore cutting the Centaur Program would have a domino effect on many other programs. Then we had hoped to have the tracking and data relay satellite system which needs to be implemented so that we can close some very expensive ground stations that we have to use around the world. There has been some technical problems with that TDRSS satellite, and to cut funds in NASA, they just cannot be cut because we must have the tracking ground stations in order to insure the safety and the information that we need from our space missions.

So this would not be in the best interest.

The CHAIRMAN. The time of the gentleman from Florida [Mr. FUQUA] has expired.

(By unanimous consent, Mr. FUQUA was allowed to proceed for 3 additional minutes.)

Mr. FUQUA. So if we agree to this amendment, we then have to look at the new programs that we have to cut. What is the biggest new program? It is the space station. Here again, the Europeans have signed on, the Canadians have signed on, the Japanese have signed on for a program. The space station would have to be cut if this amendment passes.

Our Science programs would have to be cut. We would have to cut the Mars Orbiter, which has been highly recommended by the scientific community. We would have to cut our gravity probe experiment which the President's science advisor has recommended as being very much needed. The solar optical telescope would probably have to be eliminated. In the area of space transportation, we would have to cut the orbiter maneuvering vehicle that would be used in connection with retrieval of sattelites for the space station so that they could be serviced. We would have to look at other cuts in NASA personnel.

From all the examples that we see, it is clear that we simply cannot have a freeze and have a vigorous Civilian Space Program. I know that many Members support certain items in the NASA and the NSF budget, but they may not support the bottom line figure. I might point out that this budget is below the President's request.

About 3 years ago, the gentleman from Massachusetts and the gentleman from New York are very familiar

with this, there was agreement made between NASA and the OMB that the NASA budget would increase by inflationary growth plus 1 percent. So they perceive to get involve and commit to programs based on this budget assurance. Now, we ran into tight budget considerations. We are below the President's budget request. We are some $220 million below what the President requested in his tight budget. These are his priorities.

Mr. LEWIS of California. Mr. Chairman, will the gentleman yield?

Mr. FUQUA. I yield to the gentleman.

Mr. LEWIS of California. I thank the gentleman for yielding.

I was not quite sure if I clearly understood what the gentleman was saying. I consider myself to be among the real budget cutters around here, but did the gentleman say that this NASA budget is some $220 million below the President's request?

Mr. FUQUA. The gentleman is absolutely correct.

Mr. LEWIS of California. And did you say that it was $220 million below the original authorization committee's recommendation?

Mr. FUQUA. That is correct.

Mr. LEWIS of California. If the gentleman would yield further, it strikes me as amazing that there would be a suggestion that we ought to cut even further in a program that has support on both sides of the aisle, that is recognized as the horizon of the future of our Nation. The real hope for the expansion of industry, for breakthroughs in health care. It is incredible that those figures are accurate as you have outlined them. Indeed, I think the gentleman is making a very important point, and I hope that our colleagues will listen.

Mr. FUQUA. I might point out to the gentleman that it has been proven by several economic studies, not Government studies, but private studies, that for every $1 that we spend in these high technology programs that they generate approximately $7 to $14 back into generated income from that investment. That is better than we get from many water works projects or many other projects.

This is a money-making project for the Federal Government, for our technological advancement and for keeping our competitive edge that we have in the world markets today.

Mr. LEWIS of California. Mr. Chairman, will the gentleman yield?

Mr. FUQUA. I yield to the gentleman.

Mr. LEWIS of California. I would suggest to my chairman that in this very critical subject area, we indeed must deal with the budget crisis with great care. There is not a program around, it seems to me, that gives more hope in terms of future expansion of our economy, and that is really the way to go about affecting the deficit problems that we face.

I think the chairman is making a very important point and I appreciate it.

Mr. FUQUA. I might further amplify on the gentleman's point. In the National Science Foundation, as the gentleman knows, we have a critical need for science and math in this country, and we are having a technologically illiterate society developed. When you look at the SAT scores, when you look at the number of engineers that we are producing, we are not producing the number of engineers that we need to meet the demands that we have. We need to further move in other directions in the scientific base.

This also, in the National Science Foundation, is a very, very important investment that we are making.

The CHAIRMAN. The time of the gentleman from Florida [Mr. FUQUA] has expired.

(On request of Mr. LEWIS of California and by unanimous consent, Mr. FUQUA was allowed to proceed for 5 additional minutes.)

Mr. HENRY. Mr. Chairman, will the gentleman yield?

Mr. FUQUA. I yield to the gentleman.

Mr. HENRY. I thank my distinguished chairman. He knows I have listened to his words seriously and with great respect. I know this comes very hard, because this is his committee upon which I have requested to serve because I believe in everything the gentleman has said.

I do not question the fiscal facts as have been presented. I do not question the fact that the authorization level, the appropriation level is substantially below the administration's request. I do simply say this: As we set out on this long and arduous path of trying to get ahold of the deficit, I remember taking the well of the House and saying, quite frankly with a bit of fear and trepidation, given my side of the aisle and being a newer Member, saying I would be ready to step in and vote for a freeze on defense. I was going to vote for a freeze on this, and I was going to ask on the other side of the aisle to deal with the same kind of disciplines that are necessary on some of the social and human service programs. But we get caught in the middle here. We are all caught because we ourselves voted to impose this discipline upon ourselves, when we voted overwhelmingly on both sides of the aisle only 3, 4 months ago to freeze the authorizations. This is all I am asking to do.

Mr. FUQUA. Let me tell the gentleman that he well knows that the time the authorization bill was on the floor we had not adopted a budget resolution. Now, since that time there has been a budget resolution adopted. This bill is well below the figures and the function 250, which is a category that carries these two funds, it is well below the budget resolution.

So I feel as though the House has spoken. And where their priorities are in trying to support those things that they feel are necessary for the advancement of this Nation. So we are in a different situation now and we are not comparing apples and apples; we are comparing apples and prunes.

Mr. NELSON of Florida. Mr. Chairman, will the gentleman yield?

Mr. FUQUA. I yield to the gentleman.

Mr. NELSON of Florida. I want to underscore what my chairman has said. The circumstances in which we are dealing is considerably different than when the NASA authorization and the NSF authorization bills were on this floor. I said at that time in my capacity as chairman of the gentleman's Subcommittee on Space, that I felt like that NASA ought to take its licks with everybody else if indeed there was going to be a freeze. But that freeze, everybody ought to be willing to get in the barrel and share in the sacrifice. Obviously, the freeze is unraveling and has unraveled. We have seen votes that have occurred. We have seen votes that have taken place down in the Senate; we have seen votes that have taken place in the Conference Commitee on the Budget, and there is no true freeze.

But even if we came, as the gentleman from Michigan says, still articulating the freeze idea, let me tell you, this gentleman right here, the chairman of the HUD Independent Agencies appropriations; the gentleman over there from New York, the gentleman from California on his committee has done a terrific job, because not only did they freeze the agencies within their jurisdiction, they actually brought a bill to this floor that was a billion dollars less than fiscal year 1985 appropriations level, and with the two amendments just adopted, that brings it down another billion and a half, so they are below in the posture that we sit here on this floor, $2.5 billion below the appropriations for 1985 of the agencies in his jurisdiction.

□ 1600

I served on the Budget Committee for the maximum 6 years allowed, and let me tell my colleagues there is a constant dog and cat fight between the Appropriations Committee and the Budget Committee about who is going to set the economic policy. It is clear over the wrangling of the years that the Budget Committee, in the adopted budget resolution, sets the macro policy.

I want the gentleman from Michigan to hear this.

The macro policy is set by the budget that is passed. We adopted a resolution that gives the force of law to the House-passed budget yesterday, since it is stalled in conference. The right of the Appropriations Committee to crosswalk the figures in the macro policy out of the budget into their individual appropriations subcommittees is jealously guarded.

The CHAIRMAN. The time of the gentleman from Florida [Mr. FUQUA] has expired.

(On request of Mr. NELSON of Florida and by unanimous consent, Mr. FUQUA was allowed to proceed for 2 additional minutes.)

Mr. NELSON of Florida. If the gentleman will yield further, the gentleman from Massachusetts has done that, has done it admirably, done it not only at a freeze level but less than a freeze. So if we want to talk freeze, let us talk freeze. He has done it, and he has done it in the crosswalk of the figures out of the budget resolution.

Mr. FUQUA. I might say to the gentleman, and to my colleagues, that in the purest sense we are within a freeze in the overall category of this bill, $1 billion below the budget resolution that we have, and there is nothing in that that says we cannot remove and move figures around within that budget. But the overall bill is below the fiscal year 1985 appropriated level.

Mr. HENRY. Mr. Chairman, will the gentleman yield?

Mr. FUQUA. I would be glad to yield to my friend, the gentleman from Michigan.

Mr. HENRY. I thank the gentleman for yielding.

Mr. Chairman, I would simply point out that I do not contest that this section of this bill is within the budget resolution. Obviously there is a great deal of debate in this body as to whether the remaining parts of the bill were. Those are questions of judgment, of interpretation.

Mr. FUQUA. Would the gentleman admit that it is below the fiscal year 1985 appropriation level, this total bill?

Mr. HENRY. I will not concede that, Mr. Chairman, because there are all kinds of questions unanswered, the way in which the interest functions, particularly in the housing portion, were rearranged and transferred to other lines. But that is a different section of the bill that is past and we are finshed with it.

Mr. FUQUA. Let me yield to the gentleman from New York [Mr. GREEN] who is a member of the committee. I think he can answer that question.

Mr. GREEN. By way of explanation, there was a dispute, and a legitimate dispute, about two items totaling $1.7 billion. Because the bill was $1 billion under, as we calculated it, the most that those who offered the amendments earlier claimed that we were over could be $700 million because $1 billion from $1.7 billion leaves $700 million.

The amendments that have been adopted have taken $1½ billion additional out of this bill, so we are plainly, at this point, on anyone's method of calculation, hundreds of millions of dollars below last year's bill and also below our section 302(b) allocation.

The CHAIRMAN. The time of the gentleman from Florida [Mr. FUQUA] has again expired.

(On request of Mr. GREEN and by unanimous consent, Mr. FUQUA was allowed to proceed for 3 additional minutes.)

Mr. GREEN. Mr. Chairman, if the gentleman will yield further, this is the point that ought to be emphasized.

It has never been the theory in this House that every item, every line item, within a bill ought to be held at last year's level and that there can be no adjustment of priorities from year to year. The theory has been that these bills ought to meet the budget targets, and there is now no question, however you calculate the numbers, that we are below our 302(b) allocation. There is no question that we are below last year's bill.

I think it is wrong to try to force these bills into a straightjacket of having every item within the bill below last year's.

Mr. FUQUA. Let me commend the gentleman, because the gentleman hit a very good point.

In a freeze in the purest sense, you penalize good programs and reward poor programs. In the overall context of the freeze contained in this bill and in the broader context, then you can set priorities of these programs that are deserving and trim those that we feel have a less high priority.

I think the committee has done a very excellent job in that, and I support the bill. We have extenuating circumstances, like the Veterans' Administration, which has a tremendous problem right now. We have to recognize that and cannot ignore it. We cannot ignore the technological leadership of this country and the committee has recognized that and they have addressed those issues within this bill so that we can, as a country, move forward and meet the challenges that we have.

Mr. PACKARD. Mr. Chairman, will the gentleman yield?

Mr. FUQUA. I would be glad to yield to my friend, the gentleman from California, a member of the Committee on Science and Technology.

Mr. PACKARD. I appreciate my distinguished chairman yielding.

Mr. Chairman, there is no one who has been more supportive of the concept of holding the line on spending than I have. I voted for budget freezes in all categories, and I voted last time for this when I saw the trend of the House moving in that direction. But I do not see that trend remaining, and I see now that we are no longer freezing all programs and on important concepts.

There is no program that the American people are more committed to than our space program. It is one of the most popular spending program we have, and I certainly do not think now is the time to send a message out to the American people that it is taking a lesser position in terms of its importance.

The spin-offs that are available to the average American that have come from the space program are incalculable. Surely now is not the time to cut back our commitment to the space program. I totally support the position that our chairman is taking on this budget issue and recommend to my colleagues a no vote on this amendment.

Ms. OAKAR. Mr. Chairman, will the gentleman yield?

Mr. FUQUA. I would be delighted to yield to the gentlewoman from Ohio.

Ms. OAKAR. I thank the gentleman for yielding.

Mr. Chairman, I want to associate myself with the eloquent remarks of the distinguished chairman about values and vision, the values of being concerned about the fact that we want our children to have the proper education in the sciences, because we know for some time now that we have neglected this area and now we are starting to refocus on this area.

The CHAIRMAN. The time of the gentleman from Florida [Mr. FUQUA] has again expired.

(On request of Ms. OAKAR and by unanimous consent, Mr. FUQUA was allowed to proceed for 3 additional minutes.)

Ms. OAKAR. This would be devastating to programs that relate to the sciences and education, research, and those areas.

The idea of vision, and especially because this is $220 million less than what the conservative President of the United States asked for, the vision is that as the greatest country in the world, we have never stood for the status quo. We have always been interested in furthering and advancing the quality of life and the adventures of life of our people. That is one of the wonderful things about the space program.

But it is not just some ethereal kind of program. The spin-offs, as the gentleman from California, the gentleman from Florida, and others have mentioned, are tremendous. I know that at the center in Ohio, and so that no one thinks this is just a regional issue, this is a national issue, at the center in Ohio, beyond doing fantastic work in

the area of energy conservation and in the whole area of electrical energy research, that so many industries have valued and are using right now, I know beyond that they have done fabulous work in conjunction with cataract surgery. Now one can go and have surgery on an outpatient basis, and we could never do that. It was thanks to the research in conjunction with the medical community down at my very own center.

In addition to that, the research they are doing about drugs. Do we not want to find a vaccine for cancer? I am convinced that it is the kind of research that they are doing when they indeed take those space station explorations that have never gotten a lot of national attention, but the fact is, that is the kind of thing they are doing.

I think it would be a very pointless thing to cut any further. We have already cut enough, and we are within the budget limitations. We are $220 million beyond the President. What more can we do? Are we going to be a nation that is backward or are we going to be forward looking, a nation that has values and visions?

I want to say to my friends from my region, Ohio and Pennsylvania and Indiana and other areas, in terms of your State's economy, the fact that you have one of those centers in our region is a tremendous asset and it also stimulates the economy as well.

So let us soundly vote down this amendment once and for all and say to America that we really do not want to be a country that exists for the status quo.

□ 1610

The CHAIRMAN. The time of the gentleman from Florida [Mr. FUQUA] has expired.

[On request of Mrs. BOGGS, and by unanimous consent, Mr. FUQUA was allowed to proceed for 1 additional minute.)

Mrs. BOGGS. Mr. Chairman, will the gentleman yield?

Mr. FUQUA. I am delighted to yield to my good friend, the gentlewoman from Louisiana.

Mrs. BOGGS. Mr. Chairman, I rise to commend the gentleman in the well for pointing out to us in this House that the programs of NASA and the National Science Foundation that are being funded in this bill are totally necessary to the technological and scientific literacy, to the commercial viability, and to the national security of this Nation. I thank the gentleman for all of his work in these regards.

Mr. FUQUA. Mr. Chairman, I thank the gentlewoman for her words, and I think she said it very eloquently. If Members are for science and math improvement and trying to move this country forward, they should vote no this amendment.

Mr. LEWIS of California. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, let me say to my colleagues on both sides of the aisle that I think it is important to make note of the fact that the author of the amendment, the gentleman from Michigan [Mr. HENRY], was kind enough to point carefully to a "Dear Colleague" which was shared with the Members of the House and which was signed by 31 of our Members from both sides of the aisle. I think it is important to make note of his referring in detail to our "Dear Colleague" which I had the privilege of helping to craft, for this "Dear Colleague" is most unusual in its form. It is a "Dear Colleague" that is signed by such esteemed conservatives in the House as my colleague, the gentleman from New York [Mr. BILL GREEN], and my friend, the gentleman from California [Mr. TONY COELHO], and by such liberals in the House as my friend, the gentleman from New York [Mr. JACK KEMP], my friend, the gentleman from Pennsylvania [Mr. BOB WALKER], my friend, the gentleman from Texas [Mr. TOM LOEFFLER]—and I see the gentleman from Texas [Mr. WILSON] is raising his hand—and other Members on both sides of the aisle who recognize that indeed we have got a very, very tough political year as well as a very, very tough budget here in the House.

Everybody wants to be proud of cutting and squeezing and trimming. It is an old tradition around here. But the fact is that when a broad variety of opinion and a broad reflection of the spectrum around here comes together in support of programs like NASA, there is a reason for it. To attempt to use the term, "freeze," in this case, to take the heart out of the most important program that involves the future of our Nation, it is recognized that such action would be a grave mistake.

Those 31 "wild people" who signed this "Dear Colleague" suggested such things as this: If we should amend this bill to take another $154 million out of NASA, for example, we would in the process be amending the bill to the point of taking it $375 million below the President's request for NASA. Indeed we would be $375 million below the very careful work of the authorizing committee before they brought the bill to the floor. It is important for us to realize that at that point in time, when the bill came to the floor, we did not yet have a budget, so the House was looking at the package in a different way. Since that time, the subcommittee of the Appropriations Committee on which I have the privilege to serve has looked very, very carefully at this package. That appropriations subcommittee has gone a lot further than I would have in terms of cutting back NASA—$220 million below the President's request.

Nonetheless, after careful examination, we have come to the conclusion that within that budget of the Appropriations Committee, NASA can go forward on a healthy track. Space station will not be disrupted. The shuttle will not be axed. The space telescope will be able to go forward effectively.

This so-called freeze, which really would only cut 2.3 percent, but a vital 2.3 percent, would take us off track and perhaps would undermine the future of the NASA program, the space program, as those who are visionaries within this administration and the Congress would have it.

Mr. PURSELL. Mr. Chairman, will the gentleman yield?

Mr. LEWIS of California. I yield to the gentleman from Michigan.

Mr. PURSELL. Mr. Chairman, I am frankly a little shocked today on this particular amendment. Of all the amendments that this House passed, the authorization bill for NASA was considered on April 3 of this year.

Mr. LEWIS of California. This year, yes.

Mr. PURSELL. That was 90 days ago. It was passed by a vote of 369 to 36. Those of us who wanted some freeze listened intently to the committee chairman who offered the freeze amendment. Not outsiders outside the committee but the authorization committee itself offered that amendment, and it was adopted on a major vote here in the House. Now, 90 days later, Members want to change their opinion of what the authorization level and the appropriation level should be.

Now, I think that is totally inconsistent and does not suggest any discipline in this House, irrespective of how great NASA is, or clean water or veterans; programs.

Mr. LEWIS of California. I will reclaim my time.

Mr. PURSELL. So I am suggesting that we are not consistent today. We ought to stay with the authorized level that passed this House by an overwhelming vote.

Mr. LEWIS of California. Mr. Chairman, reclaiming my time, let me respond to the gentleman.

I must say that the point he is making is that the House considered the first freeze amendment on the floor before we had a budget in the House.

The CHAIRMAN. The time of the gentleman from California [Mr. LEWIS] has expired.

(By unanimous consent, Mr. LEWIS of California was allowed to proceed for 3 additional minutes.)

Mr. LEWIS of California. When the idea came to the floor, it looked like that piece of magic that sometimes we like to dance to around here, and there was not the broad form of consideration on the part of the Appro-

priations Committee that now has taken place.

Suddenly, the Members are looking again at that concept as some Members come to the floor and selectively freeze one program and blithely ignore another. In this case we take a look at what has been done by the authorizing committee in detail and by the Appropriations Committee, and what we have done in attempting to respond to the budget, dealing with a program that the public distinctly supports; nonetheless, we have cut that program $220 million below the president's request. We have done that because we believe we can go forward in a responsible way with the appropriated amount. But this freeze could clearly take us off track in terms of the kind of program we are all hoping for in this very critical space program.

Mr. HENRY. Mr. Chairman, will the gentleman yield?

Mr. LEWIS of California. I yield to the gentleman from Michigan.

Mr. HENRY. Mr. Chairman, it kind of pains me to talk about who is a visionary around here and who is not a visionary.

If I understood the gentleman's comments, he suggested that those who are trying to get spending under control lack vision. I suggest it is just the opposite.

When we dealt with the NASA freeze, there were only 36 no votes. Were the no votes the visionaries?

When we dealt with the National Science Foundation, there were four no votes. Were those the only visionaries?

Mr. LEWIS of California. I will reclaim my time to respond to the gentleman.

Mr. HENRY. Mr. Chairman, let me make one quick comment.

On the letter that was sent out, with 31 signatures on the "Dear Colleague," 16 out of those 3 months ago voted for a freeze. Now, when were they a visionary? When they were trying to get some meaningful way to grasp at the deficit problem or when they were trying to find some meaningful way to get around it?

Mr. LEWIS of California. Mr. Chairman, let me respond to the gentleman.

It is very important for the Members to know what we are about here. In a difficult year, when we are faced with budget deficits, all of us look for a tune that we can dance to that evidences our concern. That first vote for a freeze on the floor happened to hit this authorization bill when there had been very little in-depth and across-the-aisle discussion, so lots of Members voted for a freeze then, but then they began to look at the depth of impact it would have on this critical program. So Members have thought through the process, and indeed many have changed their minds.

The fact is that we are doing the best we can to hold this budget deficit down, but the NASA program is so critical to our future and so important in terms of creating jobs that this is a place where we cannot cut any further than the $220 million we have cut from the President's request.

Mr. PACKARD. Mr. Chairman, will the gentleman yield?

Mr. LEWIS of California. I am happy to yield to my colleague, the gentleman from San Diego, CA.

□ 1620

Mr. PACKARD. Mr. Chairman, I would like to associate myself with the remarks of the gentleman in the well.

The vote on the NASA budget was the very first budget vote. There were many of us at that time that were willing to go along with this.

The CHAIRMAN. The time of the gentleman from California [Mr. LEWIS] has again expired.

(At the request of Mr. PACKARD, and by unanimous consent, Mr. LEWIS of California was allowed to proceed for 3 additional minutes.)

Mr. PACKARD. Mr. Chairman, will the gentleman continue to yield?

Mr. LEWIS of California. I am happy to yield.

Mr. PACKARD. Mr. Chairman, I think it is important to recognize that there were many of us who voted to set in pattern the freeze concept, because many of us supported the freeze concept, but that freeze concept has not stayed true in all programs and therefore of all programs that ought not to be frozen, if there are any that are not going to be, it would be in my judgment the NASA budget.

So those of us who voted to freeze in the first budget vote of this year, I think voted for a different reason than what we are voting on now.

I agree with the gentleman in the well.

Mr. LEWIS of California. Mr. Chairman, I compliment the gentleman on his vision and appreciate his reconsideration.

Mr. LOWERY of California. Mr. Chairman, will the gentleman yield?

Mr. LEWIS of California. I yield to another gentleman from San Diego.

Mr. LOWERY of California. Mr. Chairman, I wish to associate myself with the comments of my colleague from the Appropriations Committee and try to recreate for my colleagues the atmosphere that existed on the day we considered NASA's authorization, April 3. There was very little that this House had accomplished in 4 months of being in session. It was on the eve of a recess for Easter.

It was, indeed, the first authorization bill brought to the floor. Poor little defenseless NASA, having all the warts and liabilities of the defense budget from some of our liberal brethren and none of the protections of the defense budget from some of my conservative colleagues, went down in flames.

I said at the time, and I was one of the 36 who voted against that freeze, if this House had the courage to freeze all spending measures across the board, including entitlements, then indeed NASA should pony-up and take its fair share of cuts.

But let us look at the record since April. We are freezing darn little, darn little! We have not come to grips with the budget, and thus failed to consistently freeze each authorization.

Mr. LEWIS of California. Mr. Chairman, I will reclaim my time.

Mr. Chairman, I was very, very pleased just the other day when two particular people that I would point to decided almost at the same moment to join our "Dear Colleague" in opposing such an amendment. Among those who joined at the very same moment were the honorable gentleman from Florida, CLAUDE PEPPER. We all know the priorities of the distinguished gentleman from Florida [Mr. PEPPER] in this country. He is concerned about our retired citizens and he is concerned about our future.

At the same moment, the distinguished gentleman from New York, Mr. JACK KEMP, suggested that NASA was not the place to cut any further.

That combination of vision is very interesting. It should be contemplated carefully by our colleagues. The reason they came together in that fashion, in my judgment, is because for every $1 invested in NASA research and development, $7 to $14 have been returned to our economy.

It is estimated that in the very near term we are going to develop at least 5 million new jobs as a direct result of the work of these space programs.

It is fundamental to recognize that if indeed we are going to do what we must do with our budget and our deficit in the future, we have got to have a healthy economy and a healthy future. That future is a part of this NASA program.

Mr. BROOKS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I yield to the gentleman from California [Mr. LEVINE].

Mr. LEVINE of California. Mr. Chairman, I rise in strong opposition to the proposed NASA freeze amendment. Any move to reduce further the NASA budget would undermine our Nation's leadership role in space and would discourage sound investment in our economic future.

The Appropriations Committee has already reduced NASA funding by $220 million below the President's fiscal year 1986 budget request. This year's NASA budget does not permit enough funding for space agency programs to keep up with inflation. More-

over, the HUD-independent agencies aggregate spending level is fully consistent with the House budget resolution.

We all support efforts to reduce the deficit. However, I fear that additional cuts in NASA funding will ultimately stifle profitable investment in space activities which would eventually flow back to the U.S. Treasury. For every dollar invested in NASA research and development $7 to $14 have been returned to our economy. The transfer of NASA technology to the private sector has spawned new industries and created 5 million jobs. More encouraging, it is estimated that by the end of the century, U.S. space operations will generate more than $200 billion in industry revenue, returning more than $50 billion in taxes to the Treasury.

Mr. Chairman, should Congress further reduce the NASA budget, our nation's space agency will be forced to alter development of space shuttle operations, space commercialization projects, and space station deployment. I am particularly concerned about delayed development of the space station, America's next great technological venture in space. Once deployed, the space station will promote a new generation of space experimentation, commercialization, and international cooperation.

Our Nation has gone to great lengths to include Japan, Canada, and the European Space Agency in on the space station project and any funding delays will discourage future foreign participation and investment. Moreover, stretching our space station development and other space projects will only drive up overall program costs by breaking up research teams and deferring necessary tests of integrated systems.

Mr. Chairman, let us not be deceived into thinking that freezing the NASA budget at last year's level will not force significant cutbacks in America's space program. Already competing space-faring nations such as Germany and Japan invest a greater percentage of their GNP in civilian space research. We cannot afford to lag further behind.

Therefore, let a vote against a NASA spending freeze signify a vote for maintaining American leadership in space development and a vote for a proven investment in our Nation's technological advancement.

Mr. BROOKS. Mr. Chairman, I rise in opposition to the amendment.

A freeze of NASA appropriations at last year's level will stall America's progress in space research and development.

The NASA Space Program is one of the most attractive investments we have made in America's future. The United States is presently experiencing a massive trade deficit of over $130 billion a year. The space industry is one of the most promising industries we have in our effort to recover trade superiority. This is not the time to be cutting back on that program.

The House Appropriations Committee has recommended a modest increase in funding for NASA Research and Development programs for fiscal year 1986. It has offset most of this increase by reducing funding in other areas. It is below the House budget level.

I think the American people are willing to put public funds into investment programs which historically have paid such handsome dividends to our Nation.

NASA will not be able to carry out its planned programs if funds are frozen at last year's level. I hope my colleagues will join me in supporting full funding for this important program.

Mr. PURSELL. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I know these have been trying days. We are starting the process of passing appropriation bills, 13, many of which we will not complete until we come back after the August recess.

I suggest that we will be back to a concurrent resolution, which means that the whole process will not be on the President's desk by October 1. It means that the House and the Senate have lost their sense of discipline in respect to the budget and the deficit that we face.

We are in a critical period of time now. It appears that the House Budget Committee and the Senate Budget Committee are having a difficult time trying to achieve some targets which are agreeable to the respective bodies and the White House.

There is much talk here that the budget has fallen apart and that we are going back to our House budget resolution and the Senate to their respective budget resolution. This means the message is clear: All bets are off. It does not matter whether it is clean water or housing or veterans' programs or the defense budget or the MX. The flood gates are open.

Many of us back in February started to establish some sense of discipline, knowing that it is not a true-blue professional effort day by day because of the variance of the committees and the leadership within those committees. Some members of the authorization committees took the responsibility to say that we will offer those amendments to keep at the 1985 level so that we could accomplish at least a $32 billion savings; to attack the deficit, just $32 billion out of an almost $1 trillion total budget.

Now, it is incredible that the authorization committee chairmen are speaking against their own committees this week and saying, "We have changed our minds, folks," within the last 90 days. "We want to add $155 million to this because maybe we will have a new standard of measurement here"—not the 1985 current appropriation levels, but the new House Budget Committee.

Now, all of this could suggest great programs. I serve on Labor-HEW and I can think of student aid, nurses' programs, and I can come in here and offer amendments and the rest of us could, too; but we had a sense of discipline here and we started to achieve that. We have accomplished seven out of eight victories in the last few weeks, but as of this week when it looks like things are going to fall apart, we appear to go right back to square one, right back historically to where this House has been—spend the tax.

In my 9 years in the Congress, we end up with continuing resolution and we ignore fiscal discipline and so the deficit is out of control.

Now, if we have a heart for programs, let us have a heart for the taxpayer, who says every day, "Get that deficit under control. I don't care what you do."

So we have tried to set a pattern, a balance of fairness across the board.

I can remember the good Congressman standing over here, GEORGE BROWN, who came to the well and said, "If we freeze on social programs, will you freeze defense?"

And we said yes, and a lot of us stood up and said no to the defense increases and we came out with a freeze on defense, which is now part of the budget resolution.

Now we get into social programs and each authorization committee, a power unto itself, begins to say, "Well, let's make some changes. Let's not follow those guidelines."

Well, I think we ought to be very careful here.

Mr. Chairman, this train is moving pretty fast and I am afraid the train is about ready to leave the track and if it does, it is going to be a head-on collision, not only with the taxpayers, but with the sense that I have hoped and achieved for this Nation finally in the House of Representatives, irrespective of the Senate, irrespective of what the President has in his priorities, that we had a sense of discipline here to say no, to try to achieve some fairness and a balance across the board, knowing that it is not true-blue every day, knowing that there are variances here, but our committee chairmen again, our authorizing chairmen, offered those amendments in good faith less than 90 days ago and 369 Members said yes to that good-faith offer. Let us hold to that. Let us keep some degree of consistency here today, or if we do not, as far as I am concerned, all bets are off and we are right back to fiscal irresponsibility. The decision is yours.

51-059 O-86-21 (Pt. 15)

□ 1630

Mr. KANJORSKI. Mr. Chairman, will the gentleman yield?

Mr. PURSELL. I am happy to yield to the gentleman from Pennsylvania.

● Mr. KANJORSKI. Mr. Chairman, I rise to explain my vote on final passage of H.R. 3038, the HUD-independent agencies appropriations bill for fiscal year 1986.

I want to commend Chairman BOLAND and the members of his subcommittee for the generally excellent job they have done in preserving essential housing and veterans programs. I particularly appreciate their willingness to support a full 4.1 percent cost-of-living adjustment for veterans' pensions, and to direct the VA to proceed with the design of a $4.1 million 60-bed nursing home in Wilkes-Barre, PA. This nursing home project is badly needed by the aging veterans in northeastern Pennsylvania.

While I support the vast majority of the subcommittee's work I cannot vote for final passage of H.R. 3038 because it contains major cuts in several important programs which are essential to the 11th District. In particular, the bill cuts both the Federal Revenue Sharing Program and the Urban Development Action Grant Program [UDAG] by 25 percent.

UDAG is important to the economic recovery of the 11th District which is still suffering from double-digit unemployment and the last recession. The UDAG program can help to get a number of northeastern Pennsylvania's priority economic development projects off the ground. Projects like the Eberhard-Faber project which would create 111 new jobs, the All-Steel project which would create 151 new jobs, and Magee Industries project which would create about 150 new jobs.

Revenue sharing is important to the 11th District because if the cities, townships and boroughs of the district have to increase their local property taxes in order to replace revenue-sharing funds, it will require an average 87 percent in property taxes. In 25 percent of revenue sharing is eliminated, property taxes may have to increase by an average of 22 percent. Mr. Chairman, more than a third of my constituents are either senior citizens living on fixed incomes or unemployed. These individuals cannot afford this kind of a major hike in their local property taxes. I cannot vote for legislation which would impose this kind of a burden on those who are already struggling to make ends meet.

As the Congress continues its consideration of legislation in this area I will continue to work for more adequate levels of funding for these programs. If their funding is cut, I will work to target the remaining funds toward areas like the 11th District which are still working to recover from the recent economic recession. ●

Mr. MINETA. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise today to express my opposition to the gentleman's amendment to freeze the NASA appropriations. The bill which was reported to us by the House Appropriations Subcommittee on HUD and Independent Agencies is, I believe, a very prudent and carefully crafted approach to the NASA budget.

The Appropriations Committee has already reduced NASA funding by $220 million below the President's own request for fiscal year 1986 funding, and the overall HUD-independent agencies appropriations is consistent with the House budget resolution.

Regrettably, budget considerations have already forced us to pare the NASA budget to the bare minimum. Many very exciting and dynamic programs have been scrapped due solely to a shortfall in adequate funding levels. What begins as highly speculative scientific ventures in space do end up enhancing our understanding of our environment, the laws of nature, and vastly improves our technological base.

The kinds of experiments currently performed on the space shuttle include work on galium arsenide crystals which will one day replace silicon as the main component of computer chips. One day, as a result of work in space, we will have newer and faster computers. Indeed, this is likely to affect the daily lives of almost everyone in this country.

In addition, experiments are being conducted today which will have an enormously beneficial effect on medical care—undoubtedly leading to the creation of brand new pharmaceuticals and cures for debilitating illnesses.

While it is true that over the years, space exploration has engendered a pioneering spirit and a sense of adventure in this country. But, let us not believe for a second that space exploration is just a luxury—it is critically important as well. We are fortunate to have before us today a sound appropriations bill. The committee has balanced a very difficult budget climate with the pressing needs of NASA and we have no reason at this juncture to arbitrarily undo their fine work with a freeze.

Let me also indicate, Mr. Chairman, that our Science and Technology Committee has, under the chairmanship of the gentleman from Florida [Mr. FUQUA], conducted a series of hearings through the Science Policy Task Force, a number of hearings on ths issue of graduate education. In those hearings, we have heard a great deal about the work of the National Science Foundation, and it is my hope that we do not further cut the work of the National Science Foundation.

So therefore, Mr. Chairman, I urge my colleagues to vote against this amendment and to uphold the package that is presented to us by the very able members of the Subcommittee on HUD and independent agencies of the Appropriations Committee.

I yield back the balance of my time.

Mr. BATEMAN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the pending amendment, and in doing so recognize the fact that I, and those who share my point of view on this amendment, are somewhat burdened by the fact that what we would have the House do in its vote on this amendment is inconsistent with the action taken by the House at an earlier time in this session. And, in fact, I am burdened myself by the fact that what I would ask the House to do today, and what I propose to do today is inconsistent with that vote in April to freeze the NASA authorization. I think that was a regrettable action on the part of the House.

Let me say that I do not approach this issue as one who is unconcerned or soft on the subject of deficit reduction. It is a major, the major national challenge facing this session of Congress.

But a mindless freeze that freezes everything without regard to the implications on our body politic is not the way to achieve budget reduction. By freezing the NASA budget, disregarding that which the authorizing committee has felt was necessary in terms of national priorities, disregarding now what the Appropriations Subcommittee has regarded as in keeping with paramount national priorities, is not the way we ought to go about being fiscally responsible.

There are things that we approve by way of appropriation and authorization in this Congress which represent investments in the future of America. In no instance is that more clearly demonstrable than with reference to NASA. There is no agency of Government that has broadened the frontiers, the horizons of the American people, done more to create technology which created jobs, which have made us more competitive in an increasingly competitive world. This investment in America's future is absolutely critical.

I hope, notwithstanding the seriousness of the deficit problem, that we will seize on other opportunities which have been abundant, and should be even more so than we have availed ourselves of to restrain our spending habits. But let us not do it in a mindless way. Let us invest in the future of America. Let us make sure that we are competitive in technology. Let us

make sure that American aeronautics, which is the leading source of our meager exports that reduce our balance of trade, does not flounder in the face of increasing competition, but that we flourish in our ability to compete in aeronautics, just as we must be able to do so in the world of space and in the world of computers, and these projects and programs which have been inspired by and are the natural offshoot of the remarkable things which have been accomplished by NASA.

Mr. LEWIS of California. Mr. Chairman, will the gentleman yield?

Mr. BATEMAN. I will be happy to yield to the gentleman from California.

Mr. LEWIS of California. Mr. Chairman, I interrupt my colleague's train of thought to make a point on the very thought he was expressing himself.

Frankly, the spinoff from NASA is critical to the interests of the House in terms of the future of space and the application that space might have upon the benefits of the poorest of the poor in our society, of those who are hungry, those who are disabled, people who are looking for major breakthroughs in health care.

If you would just glance at this booklet that is available to all of the Members; there are endless items illustrating efforts in space like the programmable pacemakers that will dramatically affect the health of people who have heart problems; research in the field of eye surgery and space weightlessness, and the effect upon a person's ability to balance oneself, to help the disabled who are having difficulty in that sense. There are endless values that are reflected here.

It is suggested that at least 7, some people suggest as many as 23 times the actual investment is coming back not just in terms of industry, but in terms of the health care of those people in the country who most desperately need it.

Mr. BATEMAN. I appreciate very much my colleague's comments. He certainly makes much better than I the point that needs to be made here.

You can have mindless amendments suggesting or requiring a freeze in appropriation levels if you choose to be mindless. If you choose to be thoughtful, perceptive, and to really separate out our national values, and what the contributions of the dollars appropriated mean to American, then you will defeat this amendment.

Mr. TRAXLER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I am going to rise in opposition to the amendment, and that is with some great pain because my two distinguished colleagues from Michigan generally enjoy my support, and they are both very valuable Members of this body, and I treasure their wisdom, common sense.

I think the difficulty we are having this afternoon is that we are using different measuring sticks as we approach the question of achieving the balanced budget down the road and the idea of fiscal integrity. The problem is some are using an apple, which is a definition of freeze, which nowhere is in the House rules or the Senate rules or in the Budget Act.

□ 1640

Some of us are looking at something called the 302(a)/302(b) allocations, provided for in the Budget Act, which the subcommittee and the full committee both work on and perhaps there are one or two out there still talking about the President's budget recommendations. As we speak it is sort of a Tower of Babel because we are talking in different languages using different rules and yardsticks. We are together on the concept that we want to restrain spending. We are in somewhat of a disagreement because we fail to appreciate that what the Budget Committee and what the Appropriations Committee have done under the Budget Control and Impoundment Act is to follow some clear statutory guidelines or mandates.

Regretfully we are all frustrated because the budget process has not culminated in a final product. Now we all hope and pray that that will occur, we all want it to occur. In the absence of that conference report coming to us we are operating under the House 302(a) allocations as modified by the 302(b) Appropriations Committee allocations.

There is a budget system here and it is rational in concept.

It means that the House—both the Budget Committee and the Appropriations Committee—has said this is the yardstick which we are going to use. They have conducted, and I do not have to go into details because my colleagues know much more about this than I—the Budget Committee spent days, weeks, months of meetings and the Appropriations Committee did the same thing. We took their broad directive, further divided by the 13 subcommittees of appropriations, and we have a system that says, when we are all done and finished, here is what the total is going to be. The total expended is $568 billion, $117 million, and that is less, in my judgment, but I believe that comes in at less than last year's total appropriations figure.

So there is an order here and method.

Now my colleagues from Michigan and my friends are disturbed, and I suppose I am putting that mildly, when they say we are not following the authorization bill. To that I have to plead guilty. That is true. And the reason for that—and there is reason here—again is that the authorization bill was the first one out of the chute. Like most other people, I was then, as I am now, committed to fiscal solvency, accountability, and responsibility and I said that we are going to do something here and it is called a freeze. That is the yardstick I was using at that time. Subsequently and since that time the Budget Committee has come forward with their 302(a) allocations; the Appropriations Committee, following on that, as required by the statute, had done their 302(b) allocations. The appropriations for NSF and NASA is different from the authorization.

The authorization committee is not offended by that. In fact, they encourage us and they support it because they think they were treated unfairly in their authorization bill, and in my judgment they were.

So there have been some corrections. But we have not abandoned a rational, intelligent approach to budgeting in my judgment. And the process that was at work here, 302(a) and 302(b), is leading us to the promised land, not by the same road as what my colleagues want to take, but we're going to the same place.

Mr. Chairman, I hope the Members vote "no" on the amendment.

Mr. WALKER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, it has been said by someone that for every complicated problem there is a simple answer and it is probably wrong. Well, in this case I am afraid that the freeze may have fallen into exactly that category. It is true, as has been brought out during this debate, that when the authorization bill was on the floor that we did attempt to move with the freeze because it was one of those concepts that was floating around Congress at that point, it was an idea for trying to control our budgetary problem. The budgetary problem is a complicated one. The deficit problem is a complicated one. This appeared to be an answer that everybody could buy into at that point. And you may want to go back and reference the debate, some of you who have referred to it, because I think what you will find members of the committee said all along there is, if this simple solution to a complicated problem works, we are willing to buy into it. But if this simple solution to a complicated problem does not work then we have got to take a look at how we prioritize things. The problem here is that makes, it seems to me, a case that in aggregate the Federal Government can probably get along on what we spent in 1985. You can probably even look at overall budget categories and say in aggregate within those categories we can get along with what we spent in 1985.

I think it becomes a simple idea that goes the route of lunacy of you begin to suggest that in every spending category you are going to say that 1985 priorities should be reflected. I was able to put together the 1985 appropriation and the 1985 budget and we were not perfect. We did some pretty stupid things at that point. Now to say that we can make no corrections, do nothing about the 1985 priorities does not seem to me to make any sense.

What I would suggest is that the 1985 budget should not become the sacred document upon which we base everything. I think what we need to be doing is make judgments in this body and that we ought to be willing to cut programs where those programs are not working, abolish programs not meeting true needs; but where you have programs that are going to contribute to economic growth in the future, we need to have some kind of way of making certain that those programs move forward.

In the case of the space program you have one of those programs going to contribute to economic growth. I would say there is nobody's scenario, nobody's that does not include economic growth as the main way we are going to reduce budget deficits. You have got to have economic growth to bring deficit figures down. You cannot have it any other way.

Now here is a program that not according to me and not according to some social scientist or a bunch of people looking around for ways to justify programs, according to Chase Econometrics, here is a program that pays back 23 to 1, 23 to 1 in terms of GNP growth for every billion dollars of expenditure. Here is a program that pays back, then, at the kind of rates, according to a 1977 Chase Econometrics study that would say that the first $150 million we are talking about here, would in fact lead to about $5 billion in GNP growth and in turn that $5 billion GNP growth would lead to about $100 million a year of additional taxes falling into the Treasury. That is what we are dealing with here. It seems to me that you cannot expect to deal with deficits unless you allow some of those programs to move forward and allow economic growth to take place.

So while I am one who has regularly come to the floor asking for whole programs to be abolished, I have sponsored amendments where I do not think programs are not working. I also think it is time to define priorities in this case along the lines of economic growth. Here is a growth program that needs to be supported.

Mr. HENRY. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from Michigan.

Mr. HENRY. I thank the gentleman.

You know, sometimes the rhetoric gets a little exaggerated. We have heard it said that a simple approach of freezing across the board was mindless. I have to think that may be all but four of us were mindless. I have to think that maybe all but four of us were mindless when we dealt with the NSF bill. Now it is said we are verging on lunacy when we adopted this approach.

Mr. WALKER. No, the gentleman is not listening carefully because I do not think that was the point. The point is if you take an approach that virtually every line item in the 1985 appropriations bills is in fact a sacred item, that that becomes almost lunacy. That is the point that this gentleman made and I will contend that that is true.

□ 1650

Mr. ANDERSON. Mr. Chairman, I rise in opposition to the amendment.

I rise in opposition to this amendment, which would decrease the appropriations for NASA by over $150 million, and this would represent a small reduction in the budget deficit.

However, the termination of certain new start NASA programs would most certainly be harmful to the national economy in long-range terms.

In the funding originally requested, $7.88 billion represented a very modest level to carry out the goals of maintaining world leadership to aerospace technology, development, and supporting research on new materials and processes in space for beneficial use on Earth.

Although we all must be concerned with deficit reduction, I would point out that the overall HUD-independent agencies appropriation total is more than $1 billion below that which was appropriated for fiscal year 1985; adequate funding for NASA represents an investment in the future whose returns will be much greater than the funds invested; for every dollar invested in NASA research and development, $14 has been returned to our economy.

The potential benefit from new operations in space by the end of this century has been estimated at $240 billion in industry revenue. These activities should create over 4 million new jobs and return $60 billion in taxes to the Treasury.

It seems to me it is penny-wise and pound-foolish to cut the NASA budget; and I urge my colleagues to join in opposition to this amendment.

Mr. SCHUMER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, as I sit here and listen to the debate, in certain ways I think I am the dumbest patsy in this whole place; because you could take the words of the gentleman from Pennsylvania and take the words of so many of the other gentlemen and substitute the word "NASA" for the word "housing program" and get the exact same arguments.

So one toys with the argument and toys with the idea, well, why not get up and oppose this amendment; because they did it to us; why do not we do it to them? Because there are a good number of people; in this Chamber who did vote for staying within the budget, and yet with this committee on housing, and there are a good number of people who are there are a good number of people in this room who voted against us on housing, and yet now are making the same arguments we were trying to make on NASA.

So one is tempted to just get up and say, Well, we will show those folks something; and we, too, will vote against NASA, because the argument is identical. Yes, there is more money in there than 1985, but yes, also, we are within the range of the budget resolution.

But when one thinks about that argument, one realizes it is not correct; and it is not correct for a very simple reason. We all have our priorities in this place; we all have things, as the gentleman from Pennsylvania said that are more important to some of us than others of us; but we still have a budget process.

We have a process that thus far even if the other body does not come to an agreement with itself, can because of the rule and resolution we passed 2 days ago, bring some sense to us.

Are we going to reduce the deficit tomorrow? No. But are we starting a downward slope? Yes. So I would appeal to my colleagues that the budget process is the one sensible way we can go about trying to restrain rapid growth and trying to reduce the deficit.

We ought to stick with that budget process; we ought not to change our parameters depending on the differences between one program and another; unspent money applies in this, and unspent money does not in that; a freeze is one thing for one program and a different thing for another.

Since this committee has stayed within the budget resolution, I think we can support the programs, mindful of the fact that yes, it is some increase above last year, but overall in the budget process it is not damaging to it.

So I would say to my colleagues, I wish that they would think of those arguments when we talk about programs that may not affect them as directly as the previous programs affected some of us.

Certainly this NASA appropriation, in terms of a parochial interest, does not affect me and many others. If we could all think of those arguments, this body will reduce the deficit in the

long run by a lot more than by pursuing individual initiatives, however meritorious the initiatives might be; we will reduce the deficit a lot more by sticking within the confines of the process, by not exceeding it but also by not taking pot shots and undercutting it, and we will indeed, at the end of this year, no matter what the other body does, reduce the deficit by a significant amount.

I support the committee; I oppose the amendment.

Mr. NELSON of Florida. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, it is late in the day; the arguments have all been made and made well, and I will merely attempt to summarize.

If you are talking about the politics and the strategy of the situation, indeed the Appropriations Committee has come, not only within the budget resolution which as a result of the resolution we passed yesterday has the force of a passed budget resolution; but indeed, they have done better than freeze.

Within their jurisdiction allocated to them by the budget, they are under the 1985 spending figures, the appropriation figures. Under it as they came out of committee by a billion dollars; under it as this vehicle is before us now by approximately $2½ billion.

Now, that is the politics and the strategy. The fact of how the whole process has unraveled; the fact that this Member from Florida was the only person that spoke when the NASA authorization bill was here, that spoke in opposition to the freeze amendment; and yet I did so by saying that I would be willing to do that if the freeze concept were the way that we were to get the fiscal budgetary deficit problem under wraps.

It has not worked that way. I hope that it will in the future, and today I would still be willing to vote for a freeze across the board on everything, but it has not worked that way, so we have got to work in a different way.

All right. That is the politics and that is the strategy. Now quickly, a summary of the merits.

The Members have to give deference to the gentleman from Massachusetts, the chairman. All of his ranking members—you have to give deference to the chairman of the Committee on Science and Technology, deference to my ranking member on the Space Subcommittee who work in these programs day in and day out and we know what is happening on the merits.

We know that funds to NASA and the National Science Foundation, which is a part of this amendment, is perfecting an excimer laser right now that could render moot open heart surgery, if perfected. We know that they are just ready to implant a device called "PIMS' into a body cavity at Johns Hopkins Hospital that will do away with daily injections of insulin, because space researched microcomputers will release prescribed doses of medicine on a daily basis.

We know, for example, the potential of materials processing in the zero gravity of space can produce more perfect crystals that might be able to help us understand that complication of cancer, and we can design the key because we better understand that protein crystal of cancer. That is a possibility.

We know that the electrophoresis experiment that has been on the shuttle several times is having excellent results, and soon we will be seeing a drug coming forth because of the purity that can be achieved in zero gravity in space will attack a dread disease here on Earth.

That is the merits of the argument in trying to cut the figures that the Appropriations Committee has come out with on the National Science Foundation and NASA. I urge the Members to oppose the amendment.

Mr. MONSON. Will the gentleman yield?

Mr. NELSON of Florida. I yield to my colleague on our Space Subcommittee, the gentleman from Utah [Mr. MONSON].

□ 1700

Mr. MONSON. Mr. Chairman, I think what we are seeing here is the flaws of a freeze approach. The freeze concept started out a good idea with seemingly strong support. The further we go, however, the less it is we adhere to it. The freeze was flawed from the start because it never did get us the amount of savings and deficit reduction that we needed. The one great advantage the freeze offered was an opportunity to bring everyone together, to each give something for the good of the country, and feel good about.

Now we see that that process has not held together. The feature that brings that home most vividly is that a freeze approach does not allow for priorities to be set.

In the bill before us we have seen savings made, overall beyond a freeze approach, yet priorities established.

NASA and NSF both present opportunities for the future. Opportunities that will better enable us to meet the demands and needs of the citizens. Not all programs do that. Some cost us now with little if any significant future benefit.

We should support those programs that will bring benefit to us. This bill accomplishes that goal. We should defeat this amendment with good feelings and knowledge that overall we are still going to spend less than we did in 1985.

Mr. BOLAND. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Most of the arguments I think have been solid arguments against this amendment, but let me make a few final points that I believe are important. I respect the gentleman's position in supporting a freeze for NASA at the 1985 level. Frankly, with the kinds of deficits that we face in this country, freezing agencies at the 1985 level appears to be attractive, and it is terribly difficult to oppose them. But the problem I have with those who want to freeze these agencies is that they do not tell us where the programs will be cut. When we stand up here and we vote for a freeze for NASA, what we are really doing is surrendering Congress' role in making decisions about where these cuts ought to be made. What we are doing is turning that decision totally over to NASA or, worse, to the OMB. I cannot believe that is what we want to do with the programs that are as important as those carried in this bill. I think we ought to have the strength of our own convictions and say, "OK, NASA will be frozen in 1985, and these are the programs that are going to be cut or reduced." And, Mr. Chairman, that is exactly what we did in the HUD Subcommittee. We said, "OK, let us see how close we can come to a 1985 freeze, by either eliminating or reducing new starts and preserving funding for those programs that have already been started." So we cut nearly all of the funding for the solar optical telescope—$25 million. We reduced the orbital maneuvering vehicle to $10 million. We cut the space station by $30 million. And I should say—that was not a popular cut. And we cut the scatterometer, which is a joint program with the Navy, from $31 million to $6 million. But at the same time, we tried to protect programs already underway. And a good example is pointed out by the distinguished chairman of the Science and Technology Committee—the upper atmospheric research satellite. We only reduced it by $5 million. The 1986 request for UARS is $134 million. We could just as well have cut the program another $20 million, but do you know what that would mean? If we were to do that, we would be cutting the program right at its midstream funding point. If we are not going to cancel the program entirely, that kind of reduction would cost NASA $50 million, $60 million, or $70 million additional in fiscal years 1987 and 1988. That does not make any sense, particularly if NASA is going to be frozen again next year.

So when we took a look at where we could cut, to avoid ending up costing the Government ultimately more money, we came up with a number that reduces NASA by about $220 million below the budget request. The

point is, it is easy to come out here and vote for a freeze, but it is not so easy to identify where that money is going to come from. That is why you have subcommittees on appropriations to point out the specific areas in which those cuts can be made and made logically.

We all seem to be for attacking the deficit in generalities. But when it gets down to specific cuts, nobody wants to do that except the subcommittees on appropriations. That is the problem. But I think at least the HUD Subcommittee made a real effort to tackle that problem, and I think the bill includes a very credible and a realistic funding level for NASA.

Mr. LEWIS of California. Mr. Chairman, will my chairman yield?

Mr. BOLAND. I yield to the distinguished gentleman from California, who serves on the Subcommittee on Appropriations dealing with NASA.

Mr. LEWIS of California. I know that the day is growing late and we want to get on to a vote on these important matters, but I wanted to take a moment to express my deep appreciation for the chairman's work, particularly on this portion of the bill. It is a very, very tough subject area to deal with. The gentleman has been tough on me, in terms of wanting to expand this funding even more. Nonetheless, the chairman has made the point time and again that if we become even more inconsistent in our funding, we are going to push people like the Japanese into this business, and they are going to steal a big part of the value of it.

I must tell the Members that Chairman BOLAND from Massachusetts, as well as my ranking minority member from New York, have done an outstanding job of balancing this bill. In terms of NASA, they have pushed us to see that we have cut as far as we could but insisted at the same time that we have some sense of balance, and I appreciate the chairman's work in that regard.

Mr. BOLAND. I thank the gentleman from California.

Mr. NIELSON of Utah. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I am really amazed at this House. We have heard from the Appropriations Committees at various times along the way that the authorization committee has not done its work and therefore the Appropriation Committee has to proceed with an appropriations bill without waiting for the authorizing committee. Now we have a clear case where the authorizing committee did its work and the chairman of that authorizing committee himself recommended a freeze at last year's levels. His amendment was supported by almost all of the members of the Science and Technology Committee. All this amendment does, as I see it, is to have the Appropriations Committees stick to the parameters that were given to them by the authorizing committee. It requires a 2-percent cut in NASA, a 1½-percent cut in NSF, returning them to the levels we adopted in this House 369 to 36 on April 8 on NASA, and 407 to 4 on April 17 on NSF. I think it is a very clear mandate that we wanted things frozen at the 1985 level. The fact that these were the first bills so amended and frozen is irrelevant. Many of us would like to freeze every bill, and we have tried to do so on many bills.

Mr. FUQUA. Mr. Chairman, will the gentleman yield?

Mr. NIELSON of Utah. I yield to the distinguished gentleman from Florida, the chairman of the Science and Technology Committee.

Mr. FUQUA. My friend from Utah—and he is my friend—I think not intentionally somewhat misstated my position. At the time that the bill came to the floor, there had not been any budget resolution, and the mood of the House was to freeze, and I said if that is the mood, then that is the way it will be. But since that time, there have been circumstances in NASA that have happened that changed that, plus the fact that the House has since passed a budget resolution. The subcommittee of the gentleman from Massachusetts has come in with a bill that is substantially below the 1985 funding level. So while at that particular time we had no budget resolution, we had no guidelines to go by, it was an expression by the House, as the gentleman knows—it was the first authorization bill that reached the floor—so in addition to circumstances that have caused increased funding necessary in NASA that is beyond their control, and the fact that we have had a budget resolution does not necessarily mean that I think a freeze is the most appropriate thing under the current circumstances that we find ourselves.

Mr. NIELSON of Utah. I understand the chairman's position. He did it somewhat reluctantly in the spirit of having everything frozen. Everything has not been frozen, I agree. However, in this instance the margin was extremely large, over 10 to 1, in the NASA case, and 100 to 1 in the NSF case. The House said emphatically that it did want to freeze the appropriations of these two agencies at last year's levels. In fact, if we had done this on other bills and had had the same resolve, we would have been much better off as far as the budget is concerned. I criticize the Budget Committee also for recommending an amount above that of the authorization bill. I think the Budget Committee did the wrong thing and I think the Appropriations Subcommittee did the wrong thing. When the authorizing committee speaks and this House accepts it emphatically, then I think we ought to stick with what we have done in the authorizing committees just 3 months ago.

I hope the Members will vote for the amendment.

Mr. LOWERY of California. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the amendment. This amendment, to cut NASA funding, is both shortsighted and ill advised.

Not that the intentions of my colleagues from Michigan [Mr. HENRY and Mr. PURSELL], are without merit. On the contrary, I appreciate their efforts to contain Federal spending so that we might make real reductions in our burgeoning deficit.

But we can't eliminate or hamper those Federal endeavors which serve to enhance our Treasury, bolster our economy, or improve our balance of trade. Clearly, this is not the kind of program we want to diminish in a deficit environment. My statistics may be a little more conservative than my colleague from Pennsylvania [Mr. WALKER], but for every $1 invested in NASA research and development, $7 to $14 is returned to our economy—a 700- to 1,400-percent return on investment. It is safe to say that reductions in the NASA account are counterproductive to solving our budget problem—or to use a tired phrase, cutting NASA is penny-wise and pound-foolish. Indeed, to cut NASA, a national treasure, is simply not fiscally responsible.

At a time when we see American industry straining to meet the challenges of foreign competition on a variety of fronts, we should strive to ensure the continuity of U.S. superiority in the field of space technology. We cannot afford to do otherwise.

As you know, the Appropriations Committee has already reduced NASA by $220 million below the President's request. Both the gentlemen from Massachusetts, our distinguished subcommittee chairman, and the gentleman from New York, the ranking member, are to be commended for their diligent efforts in bringing this House a good bill. The measure before us today is entirely consistent with the House budget resolution and last year's bill. Certainly, this Congress should not be in the business of rubberstamping budgets or should across-the-board freezes without weighing the consequences. We must not abdicate our responsibility to our constituents and our country, to assess our needs and balance our priorities.

One final point. During this debate over NASA funding, the appropriations minority staff checked with the Office of Management and Budget to ascertain the official administration

position on the Henry-Pursell Amendment. When asked if the administration supported or opposed the Henry-Purcell amendment, they were told the administration was opposed. The answer we have received is that the amendment will take NASA too far below President Reagan's request. We then asked OMB's position on the HUD and independent agencies appropriations bill. Their response was the bill as amended by Bartlett is acceptable.

Mr. Chairman, I urge defeat of this amendment and support for our country's economic future.

□ 1710

Mr. JACOBS. Mr. Chairman, will the gentleman yield?

Mr. LOWERY of California. I yield to the gentleman.

Mr. JACOBS. How much did the gentleman say we get back for each $1 we spend with this appropriation?

Mr. LOWERY of California. The estimates are some $7 to $14.

Mr. JACOBS. How much would we have to spend in order to wipe out the whole deficit?

Mr. LOWERY of California. Well, it does not work that way. There are a number of programs you spend money on where there is no return. Research and development dollars——

Mr. JACOBS. No, no, no, no, no, I want to know, if it is a money maker, how much would we have to spend to wipe out the deficit on the Space Program?

Mr. LOWERY of California. Well, I think you reach a point of diminishing return, and we are no where near there with the NASA budget.

Mr. JACOBS. Are we at the dew point?

Mr. LOWERY of California. No. We are not even close to the dew point.

Mr. JACOBS. How much more could we make by doubling the appropriation?

Mr. LOWERY of California. We could probably, absolutely insure America's technological superiority in the world and we would not have to worry about the encroachment on our trade from our European and Japanese trading partners.

Mr. JACOBS. Well, I am more mundane than that; I want my $7 from my $1 invested. How much more can I invest to get $7 back?

Mr. LOWERY of California. You just vote for this bill for R&D and an investment in the future of America, and our cutting edge technologies, and we will continue to stay competitive in the world.

Mr. JACOBS. It sounds real good.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Michigan [Mr. HENRY].

The question was taken; and the chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. HENRY. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 112, noes 300, not voting 21, as follows:

[Roll No. 259]

□ 1730

Messrs. VENTO, MOODY, SMITH of New Hampshire, PORTER, and Mrs. MARTIN of Illinois changed their votes from "aye" to "no."

Ms. KAPTUR and Messrs. SCHAEFER, LIVINGSTON, WOLF, VISCLOSKY, MORRISON of Washington, and SWINDALL changed their votes from "no" to "aye."

So the amendments were rejected.

The result of the vote was announced as above recorded.

PERSONAL EXPLANATION

Mr. PASHAYAN. Mr. Chairman, on rollcall 259, I was unavoidably detained. Had I been present, I would have voted "no."

Mr. MRAZEK. Mr. Chairman, I move to strike the last word.

Mr. Chairman, first I wish to compliment Chairman BOLAND on preparing

a superb bill dealing with the 1986 appropriations for HUD and independent agencies.

However, I also wish to clarify for the record, language which appears in the committe report accompanying the bill. This at pages 37 and 38 of report No. 99-212.

Mr. Chairman, this particular section is clearly misleading. The report states that where State and local cooperation in establishing emergency plans is inadequate, the committee intends that the Federal Emergency Management Agency, as a last resort, coordinate supplemental assistance of Federal agencies that are expected to provide requisite resources "within their authority." The report goes on to say that the committee believes it is "clear" that the Federal Emergency Management Agency has the authority to perform this function and intends that it be exercised.

Mr. Chairman, there is no statutory authority which confers upon FEMA or any other Federal agency the power to impose upon any State or local government an emergency plan, no matter how simple or workable that plan may be. Clearly, Congress has yet to pass legislation which allows any Federal bureaucrat to implement an emergency evacuation plan upon an unwilling State or local government, nor has any judicial decision been found which construes the charter of any Federal agency to allow this type of instrusion.

Not only is such legal authority conspicuous by its absence but this administration and the President of the United States are on record as opposing any effort to impose the Federal will over that of the State and local governments who fail or refuse to develop effective evacuation plans.

In a letter to the National Governors Association, Louis O. Giuffrida, the Director of FEMA, had this to say on the desire of the administration to preempt State and local governments, and I quote:

> FEMA does not support the idea that the Federal Government should be empowered as the "last resort" to develop a plan even if all other responsible entities fail to do so. The role of the Federal Government is to enhance, not supplant, State and local government capabilities to prepare for and respond to radiological and other types of emergencies.
>
> * * * * *
>
> The Federal Government is not in position in terms of policy, authority, or resources to assume the responsibilities of State and local governments for protecting the health and safety of citizens in the event of an accident at a commerical nuclear power facility.

If anything is clear and real in discussing this entire matter, it is that our executive branch of Government lacks the authority, the motivation, the capability, and the expertise either to act in the place of, or to impose its wishes upon, State and local governments when it comes to emergency evacuation plans. No amount of report language should ignore this reality.

Mr. Chairman, I would like to ask the chairman of the authorizing subcommittee responsible for determining congressional intent in this area for off-site plans, my distinguished colleagues, the gentleman from Massachusetts [Mr. MARKEY], if my understanding of that language is correct.

Mr. MARKEY. Mr. Chairman, will the gentleman yield?

Mr. MRAZEK. I yield to the gentleman from Massachusetts.

Mr. MARKEY. Mr. Chairman, the gentleman has in fact accurately stated the law covering the ability of the Federal Government to preempt the State and local police powers with regard to an off-site emergency plan.

Mr. MRAZEK. I would also ask the subcommittee chairman if in fact this report language is binding on anyone.

Mr. MARKEY. This report language is not binding since there is no explicit statutory provision which is placed on the books that would preempt or override existing law.

Mr. MRAZEK. Mr. Chairman, I would also say to the gentleman from Massachusetts [Mr. MARKEY] that I am also concerned that this language may be construed by some as a congressional license allowing State and local governments to actually refuse to exercise or implement an emergency plan on the belief that the Federal Government would bail them out. I guess the reasoning of some may be that if our Government can bail out Chrysler, why not uncooperative State and local governments who refuse to come up with a good evacuation plan.

Does the gentleman believe that FEMA is authorized to implement an evacuation plan over the objections of the State and local governments?

Mr. MARKEY. No; that is in fact not the existing law.

Mr. MRAZEK. Mr. Chairman, does the gentleman agree that this might set in motion those kinds of bailout syndromes for a lot of other plants?

Mr. MARKEY. It does have that potential if a misconception would in fact be interpreted that way, if this kind of report language is misconstrued.

Mr. MRAZEK. Mr. Chairman, I thank the gentleman.

□ 1740

Mr. GREEN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I do understand the concern of my friend, the gentleman from New York [Mr. MRAZEK], about the situation regarding the Shoreham plant in Long Island. The gentleman has expressed those concerns very vociferously in the Appropriations Committee on consideration and in similar language in the energy and water bill a couple years ago, so that the gentleman is very clearly on record in this issue; but I must respectfully disagree with the position the gentleman is taking with respect to the authority that exists in the law with respect to FEMA. Since the gentleman has chosen to try to make legislative history, I do feel that I have to respond as to what those are.

First of all, the Federal Civil Defense Act of 1950 was adopted "to provide a system of civil defense" and that covers not only enemy attacks, but natural and man-made disasters.

The relative authority has been delegated to the Director of the Federal Emergency Management Agency by Executive Order 12-148 and the authority "to provide a system" of necessity includes the authority to intervene when necessary to compensate for deficiencies in existing systems.

Section 201 of that act authorizes the Director of the FEMA "to delegate, with the approval of the President, to the several departments and agencies of the Federal Government, appropriate civil defense responsibilities."

In addition, section 401(c) of the act provides that the Director may utilize the services of Federal agencies and the Director is instructed to use existing resources of the Federal Government to the maximum extent possible to reimburse the departments for expenditures and compensation for their personnel.

The Disaster Relief Act of 1974 does authorize the Director of FEMA to establish a program of disaster preparedness that utilizes the services of all appropriate agencies and includes preparation of disaster preparedness plans for mitigation, warning, emergency operations, rehabilitation and recovery as well, and it specifically refers to training exercises in that legislation.

There is other authority I believe under Executive Order 11-490 under the Economy Act which authorizes Federal departments and agencies to perform services for other Federal departments and agencies.

In short, there is a very substantial body of law in this area that I think the gentleman overlooks.

Mr. MRAZEK. Mr. Chairman, will the gentleman yield?

Mr. GREEN. I am happy to yield to my good friend, the gentleman from New York.

Mr. MRAZEK. Mr. Chairman, I would simply ask the gentleman, as I recall during the Korean war it was President Harry Truman who determined under the same law that there was a national emergency as a result of a steel strike and he sent troops in to work in the steel mills and the U.S.

Supreme Court ruled that in fact he did not have the power to do so.

Is the gentleman suggesting that if one nuclear powerplant has a problem that that constitutes a national emergency or would be interpreted that way by any court in this land?

Mr. GREEN. I would suggest that the analogy to the steel case is wrong, because obviously there is no taking of private property contemplated in this circumstance at all.

Second, obviously if there were a major leakage from a plant, it would constitute an emergency under the relevant legislation and that there is very considerable authority in the law for FEMA, and in fact direction in the law to FEMA, to prepare for that kind of emergency and specifically to hold training exercises.

Mr. MRAZEK. Mr. Chairman, if the gentleman will yield further, is it the gentleman's belief that FEMA has the authority to implement an evacuation plan over the objections of a State or local municipality?

Mr. GREEN. Again, if I may reclaim my time, the statute provides that the evacuation plan may be by a State government, it may be by a local government, it may be a utility, so I would say to the gentleman the plan in the first instance has to be drawn under the authorizing legislation by a State, by a local government, or by a utility. If there is such a plan, then I think that FEMA can use its good offices to make that plan a workable one.

Mr. MARKEY. Mr. Chairman, will the gentleman yield?

Mr. GREEN. I am happy to yield to the gentleman from Massachusetts.

Mr. MARKEY. Mr. Chairman, last year our subcommittee when notified that both the Department of Energy and FEMA were looking into this issue, we posed the question to the Congressional Research Service as to whether or not in fact the laws which the gentleman is referring to would in fact confer upon any Federal agency the power to usurp State or local authority with respect to policing.

We posed the question to the Congressional Research Service to give us their recommendation as to whether or not the statutes, the laws, which the gentleman is referring to, do in fact confer upon the Federal Government the right to usurp local and State police authority.

The response the committee received I think cannot be clearer. It said to us, the Congressional Research Service:

> A court would be unlikely to infer congressional authorization of such a substantial Federal intrusion into a traditional area of State authority without the clearest of statutory indications. If no clear authority for the aforementioned command and control emerges, it is unlikely that any FEMA claim of command and control authority would be sustained by a court in the absence of unequivocal statutory indications.

The CHAIRMAN. The time of the gentleman from New York [Mr. GREEN] has expired.

(By unanimous consent, Mr. GREEN was allowed to proceed for an additional 5 minutes.)

Mr. MARKEY. Mr. Chairman, will the gentleman continue to yield?

Mr. GREEN. I yield to the gentleman.

Mr. MARKEY. Mr. Chairman, I thank the gentleman very much.

The Director of FEMA himself has repeatedly stated that he is opposed to FEMA usurping the traditional role of State and county and local agencies in the planning and implementation of emergency offsite plans, because FEMA has neither the authority nor the resources to implement such a plan.

Last year President Reagan in a letter to another Congressman from New York issued a statement saying that he was opposed to the Federal preemption of traditional State and local powers.

In fact, what would happen here is that this would establish bad policy because it would basically send a signal to local and to State officials to back out of the kind of planning and implementation of emergency offsite planning that are absolutely essential to ensure that people are protected in the event of an accident.

Mr. GREEN. Mr. Chairman, if I may reclaim my time, I do not think the language in our report contemplates any usurping of State or local police powers. It assumes that the State and local police will do their sworn duty; so I do not think when the gentleman talks about usurping police powers that he is talking about anything contemplated by our amendment.

Mr. PASHAYAN. Mr. Chairman, will the gentleman yield?

Mr. GREEN. I am happy to yield to the gentleman from California.

Mr. PASHAYAN. Mr. Chairman, I hope it is not the intention of the gentleman, it is certainly not the intent of Congress in any way, including in any legal way, to permit a State or local entity to prevent a nuclear installation from being constructed and operated simply because the State or local entity does not plan for an emergency and prepare to execute the plan. I hope the gentleman is not making the contention with that proposition.

Mr. MARKEY. Mr. Chairman, will the gentleman yield?

Mr. GREEN. I am happy to yield to the gentleman from Massachusetts.

Mr. MARKEY. Mr. Chairman, the proposition that the gentleman now states that simply because a local and State governmental entity argues that they cannot protect their people in the event of an accident is not such a simple proposition. That goes to the fundamental responsibility of State and local governmental organizations and Federal preemption in this area across the board traditionally for 200 years in this country has been something which has been very rarely transgressed.

Mr. GREEN. Mr. Chairman, if I may reclaim my time, with all due respect to all parties, this is not the place to have an extended debate on nuclear power. The report language obviously cannot be addressed in any meaningful manner on the floor of the House.

I did just simply want to say in response to my friend, the gentleman from New York, that there are obviously, as I have indicated, other views of the statutory situation from those he has expressed. I do not think we are trying to usurp State and local police powers. Quite the contrary, our language specifically says that we expect they will perform their duties as they are sworn to do.

Mr. Chairman, with that, I yield back the balance of my time.

Mr. MARKEY. Mr. Chairman, I move to strike the requisite number of words.

I yield to the gentleman from New York [Mr. MRAZEK].

Mr. MRAZEK. Mr. Chairman, I think there are two points actually that are very important to make in the context of this particular debate. The gentleman asks if a State and local government can prevent the construction or the opening of a nuclear powerplant if they decide they cannot safely evacuate from that plant.

I would submit that this represents a significant problem; however, there is no way that the Federal Government has the authority to override that decision by the State and local government if they say they cannot safely evacuate a plant. The only option, the only alternative, is to set up some kind of Federal SWAT team which would be designed to be sent in in the event of an emergency to actually execute an evacuation plan, if that local government says that the police will not participate in it, the emergency people will not participate in it and if the gentleman is contemplating setting up some massive SWAT team to be camped out here on the Mall in tents waiting for the next 30 years for a nuclear accident to take place so that they can fly in to try to find the Long Island Expressway in the town of Riverhead and evacuate people, then I think that is far more than the U.S. Congress ever intended.

□ 1750

Mr. MARKEY. If I can reclaim my time again, the point is that in the Appropriations Committee report, the statement is basically made that the Federal Government has the right to presume that State and local governments have, in fact, afforded protection to their citizens in the event of a

nuclear powerplant accident when, in fact, the State and local officials are telling the Federal Government that they have not.

The role traditionally of FEMA has not been to make that kind of presumption, but in fact to make a determination as to whether or not the plan can be implemented. Not to do the planning itself. The planning has traditionally been placed in the hands of the State and local officials.

To make a presumption that State and local governments have done something which they are affirmatively saying they have not is to insult and to, in fact, abrogate and to preempt the rights of those States and local governments to make decisions for themselves. And, in fact, the report itself is inherently contradictory in its language. There are only three paragraphs dealing with the issue.

Early on they say the concern of the committee is because of the problem of unnecessary expenditure of Federal funds and personnel time by FEMA, and that the committee is now recommending that FEMA, as the last resort, coordinate and supplement assistance to Federal agencies across the board in the planning and implementation of all of these programs, which means essentially that you are going to dramatically increase the costs, the expenditures that this agency is going to have to put out in order to provide these functions. So you run totally contradictory to the initial spirit you say you are trying to achieve in involving the FEMA agency into these kinds of activities.

Mr. PASHAYAN. Mr. Chairman, will the gentleman yield?

Mr. MARKEY. I yield to the gentleman from California.

Mr. PASHAYAN. If the next Director of FEMA, and there is going to be another Director because, as we all know, this Director is on his way out, if the next Director of FEMA says he does have the manpower, would the gentleman then yield on this point and accept his opinion?

Mr. MARKEY. The question is not one of assertion by the head of FEMA, but rather of a constitutional law which reserves traditionally the rights of police power at the State and local level to those entities. And I think that any statement by the Director of FEMA to the contrary would have no constitutional effect.

Mr. PASHAYAN. There are several Supreme Court cases that have found an inherent police power in the U.S. Government, as in any government, judiciously applied, and here in the U.S. Government. And I cannot see that the gentleman should stand and make a sweeping statement.

Mr. MARKEY. If I may reclaim my time, in the one case where the issue was litigated, the courts found that the actions of the State and local government were lawful. That is a 1984 case, in fact, referring to the Shoreham nuclear powerplant.

So I think the legal grounds upon which the gentleman is speaking are very shaky. And if it is going to be resolved, it will have to be resolved in the courts and not here on the floor of the Congress.

Mr. PASHAYAN. Is the gentleman in favor then of this body and the other body developing language that is clear and more direct on the point?

Mr. MARKEY. The point I am trying to make to the gentleman is even if we do, there will still be a substantial legal question that will have to be resolved, and I am sure any local or State entity will take it to the highest court of the land before they will allow any law in this country to preempt the traditional authority at that level.

I would like before yielding back my time to compliment the gentleman from Long Island, Mr. MRAZEK, for his leadership on this issue. He has, in fact, identified an issue that clearly needed to have some further clarification, and I compliment him for it, and I yield back the balance of my time.

Mr. STRATTON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I have been for a substantial number of years interested in the development of nuclear energy, not only as the chairman of the Procurement and Nuclear Military Systems Subcommittee of the Armed Services Committee, but also as a resident of Schnectady where the General Electric Co. has in past years developed a good deal of ability in producing nuclear power generation, and had expected that as a result of our experiences in World War II we would continue that. Unfortunately, largely because of obscurantist views on the part of many people concerning nuclear power and a good deal of misunderstanding, the promise of nuclear energy has largely evaporated. But it will come back because the energy crisis is not yet over.

I want to congratulate the Appropriations Committee for addressing in their report for the third year now an extremely serious national problem and one that has very largely been focused in my own State of New York, I regret to say. That problem is that the States and localities are failing to participate in the emergency preparedness process, as a way of exercising an otherwise illegal veto over such projects as nuclear powerplants that require such things as evacuation plans. Mr. Chairman, these States and localities are using the refusal to cooperate as an extra legal veto of nuclear powerplants that have survived the entire complex licensing process—which has been even more complicated as a result of many unwise measures enacted in this Chamber, passed through the entire inspection process, and have finally been built. These plants are sitting there ready to operate, and are being held up solely by the refusal to cooperate on the part of the States and localities.

In my home State of New York, in Suffolk County—and I am sure reference has been made to this already—the local county executive held up the start of the Shoreham nuclear plant for over a year now merely by refusing to cooperate in the formulation of an evacuation plan in case of an accident.

Mr. Chairman, this effective veto by a local government came after all legal remedies had been exhausted. After that the Governor of the State, Governor Cuomo, went even farther, by taking the matter into the State court.

I completely agree with the committee report that it is not in the power of local Governments or of local State Governors, for that matter, to overthrow projects approved and licensed by the Federal Government in this fashion. The adoption of the Atomic Energy Act at the end of World War II indicates very clearly that the basic responsibility for nuclear power lies in the Federal Government not in the States or the counties.

The committee states what I think to be an effective remedy; namely, that in those cases where local authorities fail to participate adequately in this necessary process for emergency preparedness that FEMA has the authority and should not hesitate to use it, and should be required to use it to participate in the exercise and implementation of emergency plans, and to pull together the participation of other Federal activities.

Actually, the issue that shut down the Shoreham plant was that there was not an opportunity to get a 10-mile radius for air evacuation plan. But the interesting fact that apparently was never recognized very clearly was at Shoreham that the 10-mile radius had been prescribed because of the belief that when an accident occurred, iodine would be vaporized and become radioactive and that would spread out over this 10-mile radius and contaminate the population. The fact of the matter, however, was that the Three Mile Island disaster demonstrated that when there is an accident, iodine does not vaporize. Instead it sinks to the bottom of the containment vessel.

So with the authority that FEMA has under the Civil Defense Act of 1950, and the Disaster Relief Act of 1974, they have the capability of assuming this role, the expediting of these unused power stations. And as a member of the Armed Services Committee that has produced that legislation, and has oversight over the Civil Defense Act, I am very familiar with

the provisions of that act, and I believe that the Federal Government should be directed to provide the necessary leadership and coordination in situations of this kind.

The CHAIRMAN. The time of the gentleman from New York [Mr. STRATTON] has expired.

(On request of Mr. MCCAIN and by unanimous consent, Mr. STRATTON was allowed to proceed for 2 additional minutes.)

□ 1800

Mr. McCAIN. Mr. Chairman, will the gentleman from New York yield?

Mr. STRATTON. I would be happy to yield to the gentleman from Arizona.

Mr. McCAIN. Mr. Chairman, I want to associate myself with the remarks of the gentlemen from New York [Mr. GREEN and Mr. STRATTON].

Mr. Chairman, I want to congratulate the committee on its report language regarding emergency planning for nuclear facilities. The committee has performed a useful service in constructing a way out of a difficult problem for the nuclear power industry. For years that industry and its supporters have been concerned about the prospect of State or local vetoes of nuclear powerplants. The committee's language, if dutifully followed by the Federal Emergency Management Agency, will finally remove that prospect.

What the committee is essentially saying is that FEMA has the authority to step into the breach whenever States and localities fail to participate in the exercise or implementation of emergency plans. The committee then goes on to direct that FEMA use this authority whenever States and localities shirk their responsibilities by failing to participate adequately in the process.

The report language does not create new authority, but that is unnecessary since two statutes clearly provide FEMA with the means to go forward in this area. I would like to say a few words about the Civil Defense Act of 1950 and the Disaster Relief Act of 1974, both of which are directly applicable.

The Federal Civil Defense Act of 1950 was adopted "to provide a system of civil defense" for protection from enemy attack and from natural and manmade disasters. Nuclear plant accidents clearly fit into the last category. The relevant authority under the act has been delegated to the Director of FEMA by Executive Order 12148. It seems clear that the authority to "provide a system" of necessity includes the authority to intervene directly to compensate for deficiencies in that system. Thus, the act provides the authority both to exercise and implement emergency plans when States and localities create deficiencies by failing to participate in those activities.

The Disaster Relief Act of 1974 authorizes the President to declare an emergency or major disaster and to provide assistance at the request of the Governor of an affected State. Again, the emergencies envisioned by the statute, are broad enough to encompass nuclear powerplant accidents. While the authority to declare an emergency or major disaster remains with the President, all other relevant authority has been delegated to the Director of FEMA.

Once an emergency or major disaster has been declared, Federal agencies are authorized, at the direction of FEMA, "to provide assistance by * * * utilizing * * * their equipment, supplies, facilities, personnel, and other resources." Federal agencies are also authorized to perform "emergency work or services essential to save lives and to protect and preserve property, public health and safety, including but not limited to * * * movement of supplies or persons, [and] clearance of roads." In other words, once an emergency is declared, FEMA has extremely broad powers to deal with the situation. These powers are certainly sufficient to allow it to implement an emergency plan in response to a nuclear incident.

Since FEMA must be adequately prepared to implement such a plan at all times, it follows that it must be able to take whatever measures are necessary to assure such preparedness. Such measures would necessarily include participation in nuclear powerplant emergency exercises.

The authority to engage in such exercises is also explicitly provided. Under the act the Director is "authorized to establish a program of disaster preparedness that utilizes services of all appropriate agencies * * * and includes (1) preparation of disaster preparedness plans for mitigation, warning, emergency operations, rehabilitation, and recovery; [and] (2) training and exercises."

In sum, there is no doubt about FEMA's authority to carry out the directive provided by this report language. The language makes a valuable contribution to our system of nuclear regulation, to the protection of those who live in the vicinity of nuclear powerplants, and to the future of the nuclear industry. Again, I commend the committee for including it in its report.

Mr. MRAZEK. Mr. Chairman, will the gentleman yield to me?

Mr. STRATTON. I yield to the gentleman from New York.

Mr. MRAZEK. I thank the gentleman for yielding.

Mr. Chairman, the gentleman raised the issue of the accident at Three Mile Island and the question of iodine.

I think there is also another important element of that accident that has to be taken into account. If we are to rely entirely to FEMA and perhaps the deputizations of the employees of the utility to resolve the question of an evacuation plan, we could run into the same problem that existed at Three Mile Island. That is that they never informed the citizenry around them from that utility that an accident was taking place. Hour after hour after hour went by; they were 35 minutes away from a possible meltdown and they never informed the citizenry that there was a problem there.

Mr. STRATTON. Let me reclaim my time because I think the important fact is, as has been pointed out, even on bumper stickers, that nobody died at Three Mile Island. As a matter of fact, nobody got any excess radiation as a result of that action beyond what they would have received had they found that there was no snow to ski in in upstate Pennsylvania and went out to Aspen, CO, to ski. That is the extent of any excess radiation they received. For us to try to pretend that this was some serious problem in Three Mile Island the fact is that, the fact, as I have already indicated, not only was there no serious radiation received by the people of the Harrisburg area, but instead the local courts had to dream up something about what the psychological feelings were of those who lived in the Harrisburg area, in order to put an injunction that would further delay the opening of the undisturbed Three Mile Island reactor. On nuclear matters, we ought to deal with facts, not with myths.

I commend the committee's frank statements.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SPACE FLIGHT, CONTROL AND DATA COMMUNICATIONS

For necessary expenses, not otherwise provided for; in support of space flight, spacecraft control and communications activities of the National Aeronautics and Space Administration, including operations, production, services, minor construction, maintenance, repair, rehabilitation, and modification of real and personal property; tracking and data relay satellite services as authorized by law; purchase, hire, maintenance and operation of other than administrative aircraft; $3,402,900,000, to remain available until September 30, 1987.

CONSTRUCTION OF FACILITIES

For construction, repair, rehabilitation and modification of facilities, minor construction of new facilities and additions to existing facilities, and for facility planning and design not otherwise provided, for the National Aeronautics and Space Administration, and for the acquisition or condemnation of real property, as authorized by law, $139,300,000, to remain available until September 30, 1988: *Provided*, That, notwithstanding the limitation on the availability of funds appropriated under this heading by this appropriation Act, when any activity

has been initiated by the incurrence of obligations therefor, the amount available for such activity shall remain available until expended, except that this provision shall not apply to the amounts appropriated pursuant to the authorization for repair, rehabilitation and modification of facilities, minor construction of new facilities and additions to existing facilities, and facility planning and design: *Provided further,* That no amount appropriated pursuant to this or any other Act may be used for the lease or construction of a new contractor-funded facility for exclusive use in support of a contract or contracts with the National Aeronautics and Space Administration under which the Administration would be required to substantially amortize through payment or reimbursement such contractor investment, unless an appropriation Act specifies the lease or contract pursuant to which such facilities are to be constructed or leased or such facility is otherwise identified in such Act.

RESEARCH AND PROGRAM MANAGEMENT

For necessary expenses of research in government laboratories, management of programs and other activities of the National Aeronautics and Space Administration, not otherwise provided for, including uniforms or allowances therefor, as authorized by law (5 U.S.C. 5901-5902); awards; lease, hire, maintenance and operation of administrative aircraft; purchase (not to exceed thirty for replacement only) and hire of passenger motor vehicles; and maintenance and repair of real and personal property, and not in excess of $100,000 per project for construction of new facilities and additions to existing facilities, repairs, and rehabilitation and modification of facilities; $1,367,000,000: *Provided,* That contracts may be entered into under this appropriation for maintenance and operation of facilities, and for other services, to be provided during the next fiscal year: *Provided further,* That not to exceed $35,000 of the foregoing amount shall be available for scientific consultations or extraordinary expense, to be expended upon the approval or authority of the Administrator and his determination shall be final and conclusive.

ADMINISTRATIVE PROVISION

Notwithstanding any other provision of this Act, the space shuttle pricing policy for commercial and foreign users for the period beginning on October 1, 1988, and ending on September 30, 1991, shall be in the manner provided for in title II of H.R. 1714, the National Aeronautics and Space Administration Authorization Act of 1986, as reported to the House of Representatives on March 28, 1985.

AMENDMENT OFFERED BY MR. WALKER

Mr. WALKER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WALKER: On page 27 strike lines 14 through 21.

Mr. WALKER. Mr. Chairman, I think that we have an agreement with the committee on this amendment so I shall not take very long. What the Appropriations Committee had done is put in the bill language with regard to pricing policy for the shuttle. This is a matter that was debated by the House, has been extensively looked at by the authorization committee, will be debated further in the conference committee where the resolution of the matter is really a very important policy matter, but where we feel that the authorizing committee is well onboard in attempting to make goodfaith efforts to see to it that the matter is resolved in an appropriate way.

I think it would be unfortunate to go forward with an Appropriations Committee provision when in fact there is much activity taking place on the authorization front.

So my amendment is to strike this language so that we can proceed forward in trying to come up with a rational policy for the country. The policy that was developed by the House is a policy of flexible pricing which would allow a pricing by NASA of anywhere from $45 million of marginal costs up to $106 million for mature technologies.

The advantage of flexible pricing is that it does give some leeway, some competitive advantage and also, under that amendment, the NASA Administrator would be required to make certain that two-thirds of all the business being done would be aboard U.S. craft.

So that his pricing would have to reflect what is necessary to meet foreign competition.

Mr. GREEN. Mr. Chairman, would the gentleman yield?

Mr. WALKER. I would be glad to yield to the gentleman from New York.

Mr. GREEN. I thank the gentleman for yielding.

Mr. Chairman, frankly my main concern as I have explored this issue, it appears to me that the marginal cost of a shuttle flight for commercial purposes, assuming no additional shuttle is needed, is probably somewhere in the $40 million range. If an additional shuttle is needed by reason of the level of activity to conduct a commercial flight so that we have to go on to a fifth orbiter, then it would be my impression that the marginal cost would rise to something in the order of $70 million or $80 million per flight.

From a fiscal point of view it is obviously advantageous if necessary in order to get the business, so long as we can at least recover something over the marginal cost, that we charge accordingly because that does start to absorb some of the NASA overhead and therefore reduces the amount that the House and Senate have to appropriate in order to cover NASA overhead.

I think there are many who had billed the gentleman's effort in the authorizing committee as one designed to get a necessarily high price on NASA flights which would discourage the marginal cost analysis in setting pricing.

The gentleman today seems to be assuring me that that is not his intention, that is not the case, in offering this amendment.

Mr. WALKER. Let me reply to the gentleman by telling him that there has been some focus on the fact that the flexible pricing policy would allow prices to go up as high as $106 million in practical terms. There is no money specification in the policy itself. It says all the way from marginal cost to essentially an add-on cost kind of concept. However, what we have not focused on very much is the fact that it also allows the marginal pricing policy which the gentleman and I might disagree whether it is $40 million or $45 million, but nevertheless, language in the bill says marginal pricing.

So it allows the flexibility and I think the additional advantage of the policy is that it tells the Administrator of NASA that it has to have two-thirds of the business aboard NASA craft. So that it does pressure him to keep the costs competitive within the world market.

I certainly agree with the gentleman that ultimately what we do want to do is to recover some appropriate kind of costs. So in mature technologies it may well be that a higher price is sustainable in the market and I simply want to have that kind of market flexibility available.

Mr. GREEN. I thank the gentleman for his comments.

Mr. BOLAND. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I will be glad to yield to the gentleman from Massachusetts.

Mr. BOLAND. Mr. Chairman, I am delighted to accept the amendment offered by the gentleman from Pennsylvania.

Mr. WALKER. I thank the gentleman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania.

The amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

NATIONAL CREDIT UNION ADMINISTRATION

CENTRAL LIQUIDITY FACILITY

During 1986, obligations of the Central Liquidity Facility for new loans to member credit unions as authorized by the National Credit Union Central Liquidity Facility Act (12 U.S.C. 1795) shall not exceed $600,000,000: *Provided,* That administrative expenses of the Central Liquidity Facility in fiscal year 1986 shall not exceed $850,000.

NATIONAL SCIENCE FOUNDATION

RESEARCH AND RELATED ACTIVITIES

For necessary expenses in carrying out the purposes of the National Science Foundation Act of 1950, as amended (42 U.S.C. 1861-1875), title IX of the National Defense Education Act of 1958 (42 U.S.C. 1876-1879), and the Act to establish a National Medal of Science (42 U.S.C. 1880-1881); services as authorized by 5 U.S.C. 3109; maintenance and operation of aircraft and purchase of flight services for research support; acquisition of one aircraft; hire of passenger motor vehicles; not to exceed $2,500 for official reception and representation expenses; uniforms

or allowances therefor, as authorized by law (5 U.S.C. 5901-5902); rental of conference rooms in the District of Columbia; and reimbursement of the General Services Administration for security guard services; $1,347,205,000, to remain available until September 30, 1987: *Provided*, That of the funds appropriated in this Act, or from funds appropriated previously to the Foundation, not more than $71,743,000 shall be available for program development and management in fiscal year 1986, including $3,300,000 for expenses of travel: *Provided further*, That contracts may be entered into under the program development and management limitation in fiscal year 1986 for maintenance and operation of facilities, and for other services, to be provided during the next fiscal year: *Provided further*, That receipts for scientific support services and materials furnished by the National Research Centers and other National Science Foundation supported research facilities may be credited to this appropriation: *Provided further*, That to the extent that the amount appropriated is less than the total amount authorized to be appropriated for included program activities, all amounts, including floors and ceilings, specified in the authorizing Act for those program activities or their subactivities shall be reduced proportionally: *Provided further*, That not to exceed $8,000,000 shall be available for the very long baseline array: *Provided further*, That the Foundation is hereafter authorized to indemnify grantees, contractors, and subcontractors associated with the ocean drilling program under the provisions of section 2354 of title 10 of the United States Code, with all approvals and certifications required thereby made by the Director of the National Science Foundation.

UNITED STATES ANTARCTIC PROGRAM ACTIVITIES

For necessary expenses in carrying out the research and operational support for the United States Antarctic Program pursuant to the National Science Foundation Act of 1950, as amended (42 U.S.C. 1861-1875); maintenance and operation of aircraft and purchase of flight services for research and operations support; maintenance and operation of research ships and charter or lease of ships for research and operations support; hire of passenger motor vehicles; not to exceed $1,000 for official reception and representation expenses; $115,100,000, to remain available until expended: *Provided*, That receipts for support services and materials provided to individuals for non-Federal activities may be credited to this appropriation: *Provided further*, That no funds in this account shall be used for the purchase of aircraft.

SCIENCE EDUCATION ACTIVITIES

For necessary expenses in carrying out science education programs and activities pursuant to the purposes of the National Science Foundation Act of 1950, as amended (42 U.S.C. 1861-1875), including award of graduate fellowships, services as authorized by 5 U.S.C. 3109, and rental of conference rooms in the District of Columbia, $60,550,000, to remain available until September 30, 1987: *Provided*, That to the extent that the amount of this appropriation is less than the total amount authorized to be appropriated for included program activities, all amounts, including floors and ceilings, specified in the authorizing Act for those program activities or their subactivities shall be reduced proportionally.

SCIENTIFIC ACTIVITIES OVERSEAS

(SPECIAL FOREIGN CURRENCY PROGRAM)

For payments in foreign currencies which the Treasury Department determines to be excess to the normal requirements of the United States, for scientific activities, as authorized by law, $1,000,000, to remain available until September 30, 1987: *Provided*, That this appropriation shall be available in addition to other appropriations to the National Science Foundation for payments in the foregoing currencies.

Mr. SABO. Mr. Chairman, I ask unanimous consent that we return to page 10, line 9 of the bill.

The CHAIRMAN. Is there objection to the request of the gentleman from Minnesota?

Mr. WALKER. Mr. Chairman, reserving the right to object, can the gentleman tell me for what purpose he wants to revisit a section of the bill?

Mr. SABO. Certainly. Will the gentleman yield?

Mr. WALKER. I yield to the gentleman from Minnesota.

Mr. SABO. Earlier today the House in its wisdom reduced the budget authority by $500 million for projected new programs within the HUD bill.

Mr. Chairman, I would propose an amendment that simply uses 70 percent of those funds, to restore the Community Development Block Grant Program to its freeze level.

Mr. BARTLETT. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

The Clerk will read.

The Clerk read as follows:

NEIGHBORHOOD REINVESTMENT CORPORATION

PAYMENT TO THE NEIGHBORHOOD REINVESTMENT CORPORATION

For payment to the Neighborhood Reinvestment Corporation for use in neighborhood reinvestment activities, as authorized by the Neighborhood Reinvestment Corporation Act (42 U.S.C. 8101-8107), $17,669,000.

SELECTIVE SERVICE SYSTEM

SALARIES AND EXPENSES

For necessary expenses of the Selective Service System, including expenses of attendance at meetings and of training for uniformed personnel assigned to the Selective Service System, as authorized by law (5 U.S.C. 4101-4118) for civilian employees; and not to exceed $1,000 for official reception and representation expenses; $27,780,000: *Provided*, That during the current fiscal year, the President may exempt this appropriation from the provisions of 31 U.S.C. 1341, whenever he deems such action to be necessary in the interest of national defense: *Provided further*, That none of the funds appropriated by this Act may be expended for or in connection with the induction of any person into the Armed Forces of the United States.

DEPARTMENT OF THE TREASURY

PAYMENTS TO LOCAL GOVERNMENT FISCAL ASSISTANCE TRUST FUND

For payments to the Local Government Fiscal Assistance Trust Fund, $4,566,700,000: *Provided*, That, notwithstanding the provisions of 31 U.S.C. 6701-6724, payments to local governments from this appropriation shall not exceed $3,425,025,000 and this appropriation is hereby reduced by $1,141,675,000 through a 25 per centum reduction in each quarterly payment.

AMENDMENT OFFERED BY MR. HORTON

Mr. HORTON. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HORTON: On page 32, lines 15 and 16, strike out "through a 25 per centum reduction in each quarterly payment" and insert in lieu thereof "through the elimination of the payment for the final quarter of the entitlement beginning October 1, 1985 and ending September 30, 1986".

□ 1810

Mr. HORTON. Mr. Chairman, I offer this amendment on behalf of myself, the gentleman from New York [Mr. WEISS] and the gentleman from Pennsylvania [Mr. WALKER].

Mr. Chairman, this is a very simple technical amendment. It does not make any change in the dollar figures of any of the appropriations contained in the bill. It simply restructures the timing of the 25-percent cut made in the funding for the General Revenue Sharing Program.

General Revenue Sharing is a program which provides general-purpose funds to 39,000 local governments all over the country. It is authorized through the end of fiscal year 1986. Because of the entitlement nature of this program, all those local governments have made their own budget plans on the very reasonable assumption that revenue-sharing funds would be given to them in predictable amounts at preditable times.

I want to emphasize again that this is an entitlement program. We are not talking about a typical grant program in which recipients do not know from one year to the next how much money will be available to them. When Congress reauthorized general revenue sharing back in 1983, it made a commitment to 39,000 local governments that $4.6 billion would be forthcoming in each of the next 3 years.

The bill before us today does something which is extremely unusual—it makes a substantial reduction in an entitlement program. It says to those local governments, we are going back on a commitment we made to you; we are going to give you only three-quarters of the money we promised for fiscal year 1986.

Mr. Chairman, I realize that this reduction is included in the House-passed budget resolution, and that the provision in today's bill is consistent with that resolution. Even though I believe that the General Revenue Sharing Program should be continued at its currently authorized levels—and have introduced a bill to accomplish this goal—I accept the principle that we should not appropriate more

money for the program than the latest budget resolution provides.

The amendment does not affect the total amount appropriated. It merely changes the timing of the distribution of funds to the local governments. The bill before us would cut each of four quarterly payments by 25 percent. The amendment would leave the first three payments at current levels, and eliminate the fourth payment.

This amendment would not increase Federal Government appropriations, but it would greatly ease the burden of local governments in coping with the reduction in revenue-sharing funds. By keeping payments at expected levels throughout most of the year, we would give localities substantially more time to plan how to adjust their own spending practices to this change.

For that reason, numerous organizations of local governments have endorsed my amendment. These groups include the National League of Cities, U.S. Conference of Mayors, National Association of Counties, National Association of Towns and Townships, and American Federation of State, County, and Municipal Employees.

Mr. Chairman, I urge my colleagues to support the amendment.

Mr. BOLAND. Mr. Chairman, will the gentleman yield?

Mr. HORTON. I yield to the gentleman from Massachusetts.

Mr. BOLAND. I will accept the gentleman's amendment. I am conscious of the fact that he is the ranking minority member on the Government Operations Committee. Out of that committee, of course, came the General Revenue Sharing Program; and he is familiar with it. So I will be delighted to accept the amendment.

But I want to put the House on notice, if there is no budget resolution, or if there is a budget resolution that includes a 25-percent reduction for revenue sharing in fiscal year 1986, I will oppose any effort to restore the last quarter payment for revenue sharing.

We should not adopt a budget resolution that assumes a 25-percent cut in such a major program, and then come back in a supplemental and restore the funds.

Mr. HORTON. I would agree with the gentleman. I would also ask the gentleman, and I would like to engage him in a colloquy.

In the event, as the gentleman knows, the House budget did provide for a 25-percent cut in revenue sharing for fiscal 1986, the Senate budget provides for full funding in 1986.

In the event that the Budget Committee adopts the Senate position of full funding, I would hope that the committee then would be willing to provide full funding for the last fiscal year, which is what is now contained in the entitlement program.

Mr. BOLAND. Will the gentleman yield?

Mr. HORTON. I yield to the gentleman.

Mr. BOLAND. If the House and Senate adopt that kind of budget resolution, then the fourth quarter would be fully funded.

Mr. GREEN. Will the gentleman yield?

Mr. HORTON. I yield to the gentleman.

Mr. GREEN. I thank my friend from New York for yielding, and I think his amendment has the great merit of giving the local governments additional time in which to adjust to the situations so they will not find themselves on relatively short notice facing a 25-percent cut in their checks later this year.

So I think the gentleman's amendment does have merit. I am happy to accept it.

Mr. WEISS. Will the gentleman yield?

Mr. HORTON. I yield to the gentleman.

Mr. WEISS. I thank my distinguished friend and colleague from New York for yielding to me, and I want to express my appreciation to him for offering the amendment, and I wholeheartedly support it, and I simply want to state for the record that I fully appreciate the intention stated by the distinguished chairman of the Appropriations Subcommittee on HUD and Independent Agencies, I am sure that if the House works its will, and decides in fact to fund fully for fiscal 1986 that the distinguished chairman will of course bow to the will of the House majority if in fact there should be such, and I am sure the gentleman from New York would have no objection to that.

Mr. HORTON. I would have no problem with that, and I want to thank the gentleman for his support for revenue sharing, and for his efforts in this matter.

Mr. BROOKS. Mr. Chairman, title 2 of H.R. 3038 as reported by the Committee on Appropriations decreases the payments to the local government fiscal assistance trust fund—better known as the General Revenue Sharing Program—by $1.14 billion for fiscal year 1986. This 25-percent retrenchment is in agreement with the assumptions in the House-passed budget resolution.

Mr. Chairman, even though general revenue sharing falls within the jurisdiction of the Committee on Government Operations, I am certain the Members are aware that I have long regarded the program as a mistake. I opposed it when it was enacted in 1972 and I have repeated my opposition each time the program was up for reauthorization.

One feature of revenue sharing to which I have objected most strongly is the idea that it should be locked into statute as an entitlement, placed in an untouchable status above ordinary programs funded by the Federal Government. Nevertheless, the Congress has seen fit to enact revenue sharing as an entitlement, and the local government recipients of revenue-sharing funds have done their fiscal planning in line with the assumption that those funds would be forthcoming through the expiration of the current authorization in September 1986.

The serious deficit problems that we face, and their impact on the formulation of a budget for fiscal year 1986, has changed this situation. The budget leadership of this Chamber has wisely determined that, given the shape we're in, this program cannot be regarded as untouchable and must be on the table for consideration of reductions. Accordingly, the House-passed budget resolution assumed a retrenchment of 25 percent in the revenue-sharing allocation for fiscal year 1986. Even with that retrenchment, the House treated revenue sharing much more generously than President Reagan did in his budget proposal for fiscal year 1986—he called for killing off the program completely, 1 year before its authorization was to expire.

As I noted earlier, the Appropriations Committee has made this retrenchment in revenue sharing in order to comply both with the spirit and specific assumptions of the House-passed budget resolution. It is my understanding that the chairman of the subcommittee, the gentleman from Massachusetts, will consider additional funding for this program if a final budget agreement between the House and Senate includes a higher figure than is in the current House budget resolution for this program for fiscal year 1986.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York [Mr. HORTON].

The amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

OFFICE OF REVENUE SHARING, SALARIES AND EXPENSES

For necessary expenses of the Office of Revenue Sharing, including hire of passenger motor vehicles, $8,000,000.

VETERANS ADMINISTRATION

COMPENSATION AND PENSIONS

For the payment of compensation, pensions, gratuities, and allowances, including burial awards, plot allowances, burial flags, headstones and grave markers, emergency and other officers' retirement pay, adjusted-service credits and certificates, and other benefits as authorized by law; and for payment of premiums due on commercial life insurance policies guaranteed under the provisions of article IV of the Soldiers' and Sailors' Civil Relief Act of 1940, as amended, $14,160,800,000, to remain available until expended.

READJUSTMENT BENEFITS

For the payment of readjustment and rehabilitation benefits to or on behalf of veterans as authorized by law (38 U.S.C. chapters 21, 31, 34-36, 39, 51, 53, 55, and 61), $1,026,000,000, to remain available until expended.

VETERANS INSURANCE AND INDEMNITIES

For military and naval insurance, national service life insurance, servicemen's indemnities, and service-disabled veterans insurance, as authorized by law (38 U.S.C. chapter 19; 70 Stat. 887; 72 Stat. 487,) $9,750,000, to remain available until expended.

MEDICAL CARE

For necessary expenses for the maintenance and operation of hospitals, nursing homes, and domiciliary facilities; for furnishing, as authorized by law, inpatient and outpatient care and treatment to beneficiaries of the Veterans Administration, including care and treatment in facilities not under the jurisdiction of the Veterans Administration, and furnishing recreational facilities, supplies and equipment; funeral, burial and other expenses incidental thereto for beneficiaries receiving care in Veterans Administration facilities; repairing, altering, improving or providing facilities in the several hospitals and homes under the jurisdiction of the Veterans Administration, not otherwise provided for, either by contract or by the hire of temporary employee and purchase of materials; uniforms or allowances therefor, as authorized by law (5 U.S.C. 5901-5902); aid to State homes as authorized by law (38 U.S.C. 641); and not to exceed $2,000,000 to fund cost comparison studies as referred to in 38 U.S.C. 5010(a)(5); $9,368,694,000, plus reimbursements.

MEDICAL AND PROSTHETIC RESEARCH

For necessary expenses in carrying out programs of medical and prosthetic research and development, as authorized by law, to remain available until September 30, 1987, $195,840,000, plus reimbursements.

MEDICAL ADMINISTRATION AND MISCELLANEOUS OPERATING EXPENSES

For necessary expenses in the administration of the medical, hospital, nursing home, domiciliary, construction and supply, research, employee education and training activities, as authorized by law, $61,119,000, plus reimbursements.

GENERAL OPERATING EXPENSES

For necessary operating expenses of the Veterans Administration, not otherwise provided for, including uniforms or allowances therefor, as authorized by law; not to exceed $3,000 for official reception and representation expenses; cemeterial expenses as authorized by law; purchase of ten passenger motor vehicles, for use in cemeterial operations, and hire of passenger motor vehicles; and reimbursement of the General Services Administration for security guard services, and the Department of Defense for the cost of overseas employee mail; $760,547,000: *Provided*, That in the Veterans Administration not to exceed 40 full-time equivalent employment shall be available for the Office of Planning and Program Evaluation.

CONSTRUCTION, MAJOR PROJECTS

For constructing, altering, extending and improving any of the facilities under the jurisdiction or for the use of the Veterans Administration, or for any of the purposes set forth in sections 1004, 1006, 5002, 5003, 5006, 5008, 5009, and 5010 of title 38, United States Code, including planning, architectural and engineering services, and site acquisition, where the estimated cost of a project is $2,000,000 or more or where funds for a project were made available in a previous major project appropriation, $516,160,000, to remain available until expended: *Provided*, That, except for advance planning of projects funded through the advance planning fund and the design of projects funded through the Design Fund, none of these funds shall be used for any project which has not been considered and approved by the Congress in the budgetary process: *Provided further*, That funds provided in the appropriation "Construction, major projects" for fiscal year 1986, for each approved project shall be obligated (1) by the awarding of a working drawings contract by September 30, 1986 and (2) by the awarding of a construction contract by September 30, 1987: *Provided further*, That the Administrator shall promptly report in writing to the Comptroller General and to the Committees on Appropriations any approved major construction project in which obligations are not incurred within the time limitations established above; and the Comptroller General shall review the report in accordance with the procedures established by section 1015 of the Impoundment Control Act of 1974 (title X of Public Law 93-344): *Provided further*, That no funds from any other account may be obligated for constructing, altering, extending, or improving a project which was approved in the budget process and funded in this account until one year after substantial completion and beneficial occupancy by the Veterans Administration of the project or any part thereof with respect to that part only: *Provided further*, That the final proviso under this heading in the Department of Housing and Urban Development-Independent Agencies Appropriation Act, 1984 (Public Law 98-45) and the penultimate proviso under this heading in the Department of Housing and Urban Development-Independent Agencies Appropriation Act, 1985 (Public Law 98-371) are hereby repealed: *Provided further*, That prior to the issuance of a bidding document for any construction contract for a project approved under this heading (excluding completion items), the director of the affected Veterans Administration medical facility must certify that the design of such project is acceptable from a patient care standpoint.

AMENDMENT OFFERED BY MR. WORTLEY

Mr. WORTLEY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WORTLEY: Page 35, line 20, strike out "$516,160,000," and insert in lieu thereof "$524,060,000,".

Mr. WORTLEY (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. WORTLEY. Mr. Chairman, my amendment is simple and to the point. It will restore $7.9 million for a much needed parking garage for the VA Medical Center at Syracuse, NY.

Congress first recognized the need for additional parking for the Syracuse VA Medical Center in the 1970's. At that point, additional parking would have been helpful. Now it is a necessity.

The Syracuse VA Medical Center leased parking space from Syracuse University for many years. That arrangement expires on December 31, 1985, because the university is enlarging its law school and building a new school of management, on what had, until now, been a parking lot.

The Syracuse VA Medical Center serves 250,000 veterans in an 18-county area. It is equipped to handle all sorts of emergencies as well as routine cases. It has been deemed a tertiary care facility and has recently entered into a sharing arrangement with Fort Drum, a newly expanded military base as well as the Seneca Ordnance Depot.

But as of December 31, 1985, the Syracuse VA Medical Center will have approximately 167 parking spaces to accommodate its patients and medical and support personnel. That's 106 slots for both inpatients and outpatients and 61 for the 848 medical and support personnel. An independent study concluded that the Syracuse VA medical facility needs 800 parking spaces—167 spaces is not even close. The facility is faced with a crisis situation.

That's why the House Veterans' Affairs Committee as well as the Veterans' Administration support funding this much needed project. In fact, the Syracuse situation has been called one of two of the worst situations in the entire VA hospital system with regard to parking.

On July 1, 1985, Harry Walters, Administrator of the Veterans' Administration wrote to Chairman BOLAND to reiterate his strong support for the construction of a parking facility.

In that letter he said:

The parking situation at the Medical Center in Syracuse is deplorable. The Medical Center has a severe parking shortage, which causes undue hardship to veterans currently using the facility. I have visited the Medical Center and personally reviewed this intolerable situation. During my visit, I met with local officials and the Chancellor of the University of Syracuse in order to review all the possible alternatives that could solve this long-standing problem. Based upon meetings with these officials, a comprehensive analysis conducted by my staff, and my personal observation, the most effective solution is to build a proposed parking structure.

This is not a frivolous request on my part. I recognize the need for restraint but I also recognize the real need that exists for our veterans.

The money for the working drawings for the construction of the parking garage has been released. The VA has announced it will advertise for bids to construct the facility. What is needed now is funding so that construction can begin. If we fail to appropriate the funds in this bill, we will do a tremendous disservice to the quarter of a million veterans who need and depend on

the Syracuse VA Medical Center as well as the 848 employees who serve those veterans. I urge adoption of my amendment.

□ 1820

Mr. BOLAND. I am delighted to have the gentleman from New York bring this matter to our attention. I recognize that the gentleman from New York presents a valid problem in connection with the garage at Syracuse. I understand that Syracuse will not renew its agreement regarding parking for the VA.

Mr. WORTLEY. Syracuse University.

Mr. BOLAND. Which, of course, leaves that particular hospital with a very bad parking situation.

Let me assure the gentleman I will do everything I can. Hopefully, we will be able to help. We will give the problem very serious consideration in conference with the Senate, and I will do my best to assist him in getting this funded so that it will go to conference. We will make a judgment on it there.

Mr. WORTLEY. I appreciate the efforts of the chairman.

Mr. GREEN. Mr. Chairman, will the gentleman yield?

Mr. WORTLEY. I yield to the gentleman from New York.

Mr. GREEN. I just want to give my friend from New York the same assurance on this side of the aisle.

Mr. WORTLEY. I appreciate it very much.

That being the case, Mr. Chairman, I ask unanimous consent to withdraw my amendment.

Mr. BOLAND. Mr. Chairman, I appreciate the gentleman's position.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

CONSTRUCTION, MINOR PROJECTS

For constructing, altering, extending, and improving any of the facilities under the jurisdiction or for the use of the Veterans Administration, including planning, architectural and engineering services, and site acquisition, or for any of the purposes set forth in sections 1004, 1006, 5002, 5003, 5006, 5008, 5009 and 5010 of title 38, United States Code, where the estimated cost of a project is less than $2,000,000, $144,400,000, to remain available until expended along with unobligated balances of previous Construction, minor projects appropriations which are hereby made available for any project where the estimated cost is less than $2,000,000: *Provided,* That not more than $36,313,000 shall be available for expenses of the Office of Construction: *Provided further,* That funds in this account shall be available for (1) repairs to any of the nonmedical facilities under the jurisdiction or for the use of the Veterans Administration which are necessary because of loss or damage caused by any natural disaster or catastrophe and (2) temporary measures necessary to prevent or to minimize further loss by such causes.

GRANTS FOR CONSTRUCTION OF STATE EXTENDED CARE FACILITIES

For grants to assist the several States to acquire or construct State nursing home and domiciliary facilities and to remodel, modify or alter existing hospital, nursing home and domiciliary facilities in State homes, for furnishing care to veterans, as authorized by law (38 U.S.C. 5031-5037), $22,000,000 to remain available until September 30, 1988.

GRANTS FOR THE CONSTRUCTION OF STATE VETERANS CEMETERIES

For grants to aid States in establishing, expanding or improving State veterans' cemeteries as authorized by law (38 U.S.C. 1008), $3,000,000, to remain available until September 30, 1988.

GRANTS TO THE REPUBLIC OF THE PHILIPPINES

For payment to the Republic of the Philippines of grants, as authorized by law, (38 U.S.C. 632), for assisting in the replacement and upgrading of equipment and in rehabilitating the physical plant and facilities of the Veterans Memorial Medical Center, $500,000, to remain available until September 30, 1987.

DIRECT LOAN REVOLVING FUND

During 1986, within the resources available, not to exceed $1,000,000 in gross obligations for direct loans is authorized for specially adapted housing loans (38 U.S.C. chapter 37).

LOAN GUARANTY REVOLVING FUND

(INCLUDING TRANSFER OF FUNDS)

For expenses necessary to carry out Loan guaranty insurance operations, as authorized by law (38 U.S.C. chapter 37, except administrative expenses, as authorized by section 1824 of such title), $235,000,000, to remain available until expended.

During 1986, the resources of the Loan guaranty revolving fund shall be available for expenses for property acquisitions, payment of participation sales insufficiencies, and other loan guaranty and insurance operations, as authorized by law (38 U.S.C. chapter 37, except administrative expenses, as authorized by section 1824 of such title): *Provided,* That the unobligated balances, including retained earnings of the District loan revolving fund, shall be available, during 1986, for transfer of the Loan guaranty revolving fund in such amounts as may be necessary to provide for the timely payment of obligations of such fund, and the Administrator of Veterans Affairs shall not be required to pay interest on amounts so transferred after the time of such transfer.

During 1986, with the resources available, gross obligations for direct loans and total commitments to guarantee loans are authorized in such amounts as may be necessary to carry out the purposes of the "Loan guaranty revolving fund".

ADMINISTRATIVE PROVISIONS

(INCLUDING TRANSFER OF FUNDS)

Not to exceed 5 per centum of any appropriation for 1986 for "Compensation and pensions", "readjustment benefits", and "Veterans insurance and indemnities" may be transferred to any other of the mentioned appropriations, but not to exceed 10 per centum of the appropriations so augmented.

Appropriations available to the Veterans Administration for 1986 for salaries and expenses shall be available for services as authorized by 5 U.S.C. 3109.

No part of the appropriations in this Act for the Veterans Administration (except the appropriations for "Construction, major projects" and "Construction, minor projects") shall be available for the purchase of any site for or toward the construction of any new hospital or home.

No part of the foregoing appropriations shall be available for hospitalization or examination of any persons except beneficiaries entitled under the laws bestowing such benefits to veterans, unless reimbursement of cost is made to the appropriation at such rates as may be fixed by the Administrator of Veterans Affairs.

One or more pilot programs shall be conducted to determine the effectiveness of utilizing private contractual services to assist in the administrative collection of various types of delinquent debts or other funds due the government.

AMENDMENT OFFERED BY MR. NIELSON OF UTAH

Mr. NIELSON of Utah. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. NIELSON of Utah: Page 41, after line 4, insert the following new section:

GENERAL PROVISIONS

No part of any funds appropriated or otherwise made available in this title may be obligated or expended for any multiyear contract or any contract exceeding $1,000,000, unless the appropriate independent agency, board, commission, corporation, or office submits a report to the appropriations committees of the Congress indicating whether competitive bidding and second-source contracting were used in awarding such contract.

Mr. BOLAND. Mr. Chairman, I reserve a point of order on the amendment.

Mr. NIELSON of Utah. Mr. Chairman, this amendment that I propose to the independent agencies in this particular appropriation is an amendment similar to but not as extensive as one attached to the DOD authorization bill. The amendment would assure that the funds appropriated under the bill would be spent in the most efficient way possible. It makes certain that competition for all major procurement program contracts entered into by independent agencies will have been a key factor in awarding those contracts.

The amendment would apply only to procurement contracts in excess of $1 million in which the procurement of the items occur in excess of 1 year, therefore not promoting a paperwork overload.

A written review would be available for future use and increased budget control of independent agencies.

The amendment does not mandate competitive bidding. It only ensures that competitive bidding has been considered.

Congress must show taxpayers they are concerned about overpriced parts, poorly built weapons, contractor malfeasance and bureaucratic incompetence. This amendment would show taxpayers that all Federal agencies

should be held responsible to achieve this goal.

Furthermore, it does show that we are interested in competitive bidding in other areas, not just in the defense area.

For that reason, I recommend support of the amendment.

Mr. BOLAND. Mr. Chairman, will the gentleman yield?

Mr. NIELSON of Utah. I yield to the chairman of the committee.

Mr. BOLAND. I thank the gentleman for yielding.

Mr. Chairman, let me say that the gentleman's amendment concerns an important issue within the NASA organization. The issue is: Should there be a second source for the shuttle solid rocket boosters. That is an issue that is being carefully studied now by NASA. I have maintained a strict neutrality on the subject. We will let the NASA Administrator make this decision absent any amendments.

Mr. NIELSON of Utah. I thank the chairman for those remarks. I would like to indicate this applies to all independent agencies in the bill, not just the NASA approach.

I wanted to make sure that I made that point.

Second, I appreciate the fact that this condition is being considered in the case of the NASA shuttle. I also think it should be applied to the bill. I realize that we did not waive a point of order against this particular one in preparing this amendment, and perhaps we were a little late on that. However, I do think it does bear scrutiny, I do think it needs to be looked at very carefully. If not in this bill, in every other authorization bill that comes from this point on.

● Mr. LEVINE of California. Mr. Chairman, I rise in support of the Nielson-Carper amendment which requires Federal independent agencies to inform Congress whether or not they are engaging in competitive bidding and second source contracting for contracts exceeding $1 million. This amendment proposes a simple and modest reporting requirement which I hope will inject more competition into the Federal procurement process.

Only weeks ago, the House overwhelmingly adopted my amendment to the defense authorization bill requiring that the Defense Department procure all new major weapons on a competitive basis. The House is equally justified today in voting to promote increased competition and dual sourcing in all independent agencies.

Increased competition encourages private contractors to hold down prices and improve the quality of their products. Additionally, it would provide the various agencies with greater flexibility in determining what bidders should receive future contracts.

Dual sourcing has also proven itself efficient and cost-effective in Federal procurement and I would like to see more agencies adopt the practice. Furthermore, dual sourcing protects the Federal Government from a single source contractor that overcharges the Government for its work or produces a shoddy product. With the participation of more than one producer on major contracts, the Government always has access to backup research, testing, and production teams.

Mr. Chairman, this amendment only asks Congress to monitor the procurement practices of independent agencies. It does not mandate competition and dual sourcing. However, once Congress reviews whether or not the various departments have adopted the most efficient, cost-saving procurement measures, it can determine where competition is lacking and necessary.

Once again, I urge my colleagues to support this reasonable proposal which could result in saving the Government and taxpayers billion of dollars.●

● Mr.CARPER. Mr. Chairman, I rise in strong support of the amendment offered by the gentleman from Utah. This amendment would require the independent agencies to Congress that competition and second-sourcing have been considered for major contracts. The use of single sources for important products is fraught with problems from shoddy workmanship to production delays and excessive costs. The American taxpayer want and deserve more for their money.

This is not a novel effort. The gentleman from California [Mr. LEVINE] won overwhelming support from the House for his amendment to the Department of Defense authorization bill to require competitive procurement practices for major weapon systems. The wisdom of such practices is no less for these independent agencies than it is for the Defense Department.

Indeed, this amendment is a rather mild statement on the issue of competitive bidding—it does not require such bidding, only that agencies report to Congress indicating whether competitive bidding and second-source contracting were used in awarding constracts.

Serious consideration should be given to fostering competition and second-sourcing through all Federal agencies. This amendment takes a small steps in that direction, and which allow us to see just how much more ecouragement may be needed.

Whereas common sense would recommend a yes vote on this amendment, our current budget morass demands it. Millions, even billions of tax payer dollars are at stake. I urge my colleagues to support this amendment.●

POINT OF ORDER

The CHAIRMAN. Does the gentleman from Massachusetts [Mr. BOLAND] wish to assert the point of order?

Mr. BOLAND. I do, Mr. Chairman.

The CHAIRMAN. The Chair will hear the gentleman on his point of order.

Mr. BOLAND. Mr. Chairman, I make a point of order against the amendment offered by the gentleman from Utah [Mr. NIELSON].

The amendment would violate clause 2, rule XXI. The limitation contains a condition. This will require additional duties on the part of the administering official and is not in accord with existing law.

The CHAIRMAN. Does the gentleman from Utah [Mr. NIELSON] wish to respond?

Mr. NIELSON of Utah. Yes, Mr. Chairman.

The CHAIRMAN. The Chair will hear the gentleman.

Mr. NIELSON of Utah. Mr. Chairman, first of all, we have many examples of direct language in appropriations bills, legislative approach in appropriations bills. For example, page 4 of this particular bill does have similar provisions as referring to HUD, and I quote on page 4, line 17:

> * * * the Department shall approve commitments and enter annual contributions contracts without reference to prototype costs; instead, the Department shall approve the lowest responsible bid received by the Public Housing Authority through a competitive process.

Further, on page 5, it also indicates that these costs, "together with the data on which such costs are based, shall have been published for notice and comment in accordance with section 553 * * *."

Both of these are certainly legislative intent in the appropriations bill.

I might point out in the supplemental appropriations bill we have restrictive language in the case of the appropriation for Egypt, we have restrictions on the MX in the appropriations bills in fiscal year 1984, 1985, and also 1986. We also had restrictions on various recipient countries in the foreign aid bills, authorization bills, and also the supplemental appropriations bill, and we also have restrictions in the EPA bill adopted last year. If I could quote Congressman WAXMAN on that point, he said if a State failed to submit an adequate plan for meeting air quality standards, then it might make sense to cut off funding. But if a State had implemented an approved plan but failed to meet the standards, a cutoff would virtually guarantee that the standards would not be achieved.

The Congress accepted the Dannemeyer amendment, as supported by Congressman WAXMAN, as saying that they did not have the authority in the appropriations bills. So that was definitely changing things in a legislative fashion.

Now, I recognize that the point of order has some merit to it. I also say we have violated that point of order on many, many occasions, and the point has not been raised when we have made these kinds of changes in the bills.

The CHAIRMAN (Mr. PANETTA). Is there further discussion on the point of order? If not, the Chair is prepared to rule.

The issue that has been raised here is whether or not the amendment violates clause 2, rule XXI, constituting legislation on an appropriations bill.

The gentleman from Utah [Mr. NIELSON] has cited portions of this bill and provisions in other bills. The portion of this bill cited by the gentleman from Utah had a waiver under the rule, but the waiver did not apply to amendments.

Other bills either involved a waiver, or no point of order was made to those provisions.

The amendment itself includes the following, on line 5:

"* * * unless the appropriate independent agency, board, commission, corporation, or office submits a report to the Appropriations Committees of the Congress * * *."

The view of the Chair is that that constitutes a new duty in the requirement to submit that report and therefore constitutes legislation on an appropriation bill and violates clause 2, rule XXI.

Therefore, the Chair sustains the point of order.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

TITLE III

CORPORATIONS

Corporations and agencies of the Department of Housing and Urban Development and the Federal Home Loan Bank Board which are subject to the Government Corporation Control Act, as amended, are hereby authorized to make such expenditures, within the limits of funds and borrowing authority available to each such corporation or agency and in accord with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Act as may be necessary in carrying out the programs set forth in the budget for 1986 for such corporation or agency except as hereinafter provided: *Provided*, That collections of these corporations and agencies may be used for new loan or mortgage purchase commitments only to the extent expressly provided for in this Act (unless such loans are in support of other forms of assistance provided for in this or prior appropriation Acts), except that this proviso shall not apply to the mortgage insurance or guaranty operations of these corporations, or where loans or mortgage purchases are necessary to protect the financial interest of the United States Government.

FEDERAL HOME LOAN BANK BOARD

LIMITATION ON ADMINISTRATIVE EXPENSES, FEDERAL HOME LOAN BANK BOARD

Not to exceed a total of $26,213,000 shall be available for administrative expenses of the Federal Home Loan Bank Board for procurement of services as authorized by 5 U.S.C. 3109, and contracts for such services with one organization may be renewed annually, and uniforms or allowances therefor in accordance with law (5 U.S.C. 5901-5902), and said amount shall be derived from funds available to the Federal Home Loan Bank Board, including those in the Federal Home Loan Bank Board revolving fund and receipts of the Board for the current fiscal year: *Provided*, That members and alternates of the Federal Savings and Loan Advisory Council may be compensated subject to the provisions of section 7 of the Federal Advisory Committee Act, and shall be entitled to reimbursement from the Board for transportation expenses incurred in attendance at meetings of or concerned with the work of such Council and may be paid in lieu of subsistence per diem not to exceed the dollar amount set forth in 5 U.S.C. 5703: *Provided further*, That not less than $500,000 shall be available only for purposes of training State examiners: *Provided further*, That not to exceed $1,500 shall be available for official reception and representation expenses: *Provided further*, That notwithstanding any other provision of law, and in connection with the Board's delegation of certain functions to the Federal home loan banks, the Board may transfer title of related furniture, fixtures and equipment property of record as of the date of the delegation to the banks: *Provided further*, That, notwithstanding any other provisions of this Act, except for the limitation in amount hereinbefore specified, the expenses and other obligations of the Board shall be incurred, allowed, and paid in accordance with the provisions of the Federal Home Loan Bank Act of 1932, as amended (12 U.S.C. 1421-1449).

LIMITATION ON ADMINISTRATIVE EXPENSES, FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION

Not to exceed $1,404,000 shall be available for administrative expenses, which shall be on an accrual basis and shall be exclusive of interest paid, depreciation, properly capitalized expenditures, expenses in connection with liquidation of insured institutions or activities relating to section 406(c), 407, or 408 of the National Housing Act, liquidation or handling of assets of or derived from insured institutions, payment of insurance, and action for or toward the avoidance, termination, or minimizing of losses in the case of insured institutions, legal fees and expenses and payments for expenses of the Federal Home Loan Bank Board determined by said Board to be properly allocable to said Corporation, and said Corporation may utilize and may make payments for services and facilities of the Federal home loan banks, the Federal Reserve banks, the Federal Home Loan Bank Board, the Federal Home Loan Mortgage Corporation, and other agencies of the government: *Provided*, That, notwithstanding any other provisions of this Act, except for the limitation in amount hereinbefore specified, the administrative expenses and other obligations of said Corporation shall be incurred, allowed, and paid in accordance with title IV of the Act of June 27, 1934, as amended (12 U.S.C. 1724-1730f).

TITLE IV

GENERAL PROVISIONS

SEC. 401. Where appropriations in titles I and II of this Act are expendable for travel expenses and no specific limitation has been placed thereon, the expenditures for such travel expenses may not exceed the amounts set forth therefor in the budget estimates submitted for the appropriations: *Provided*, That this section shall not apply to travel performed by uncompensated officials of local boards and appeal boards of the Selective Service System; to travel performed directly in connection with care and treatment of medical beneficiaries of the Veterans Administration; to travel performed in connection with major disasters or emergencies declared or determined by the President under the provisions of the Disaster Relief Act of 1974; to site-related travel performed in connection with the Comprehensive Environmental Response, Compensation, and Liability Act of 1980; or to payments to interagency motor pools where separately set forth in the budget schedules.

SEC. 402. Appropriations and funds available for the administrative expenses of the Department of Housing and Urban Development and the Selective Service System shall be available in the current fiscal year for purchase of uniforms, or allowances therefor, as authorized by law (5 U.S.C. 5901-5902); hire of passenger motor vehicles; and services as authorized by 5 U.S.C. 3109.

SEC. 403. Funds of the Department of Housing and Urban Development subject to the Government Corporation Control Act or section 402 of the Housing Act of 1950 shall be available, without regard to the limitations on administrative expenses, for legal services on a contract or fee basis, and for utilizing and making payment for services and facilities of Federal National Mortgage Association, Government National Mortgage Association, Federal Home Loan Mortgage Corporation, Federal Financing Bank, Federal Reserve banks or any member thereof, Federal home loan banks, and any insured bank within the meaning of the Federal Deposit Insurance Corporation Act, as amended (12 U.S.C. 1811-1831).

SEC. 404. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. 405. No funds appropriated by this Act may be expended—

(1) pursuant to a certification of an officer or employee of the United States unless—

(A) such certification is accompanied by, or is part of, a voucher or abstract which describes the payee or payees and the items or services for which such expenditure is being made, or

(B) the expenditure of funds pursuant to such certification, and without such a voucher or abstract, is specifically authorized by law; and

(2) unless such expenditure is subject to audit by the General Accounting Office or is specifically exempt by law from such audit.

SEC. 406. None of the funds provided in this Act to any department or agency may be expended for the transportation of any officer or employee of such department or agency between his domicile and his place of employment, with the exception of the Secretary of the Department of Housing and Urban Development, who, under title 5, United States Code, section 101, is exempted from such limitation.

SEC. 407. None of the funds provided in this Act may be used for payment, through grants or contracts, to recipients that do not share in the cost of conducting research resulting from proposals not specifically solicited by the government: *Provided*, That the extent of cost sharing by the recipient shall reflect the mutuality of interest of the

grantee or contractor and the government in the research.

SEC. 408. None of the funds provided in this Act may be used, directly or through grants, to pay or to provide reimbursement for payment of the salary of a consultant (whether retained by the Federal government or a grantee) at more than the daily equivalent of the maximum rate paid for GS-18, unless specifically authorized by law.

SEC. 409. No part of any appropriation contained in this Act for personnel compensation and benefits shall be available for other object classifications set forth in the budget estimates submitted for the appropriations.

SEC. 410. None of the funds in this Act shall be used to pay the expenses of, or otherwise compensate, non-Federal parties intervening in regulatory or adjudicatory proceedings. Nothing herein affects the authority of the Consumer Product Safety Commission pursuant to section 7 of the Consumer Product Safety Act (15 U.S.C. 2056 et seq.).

SEC. 411. Except as otherwise provided under existing law or under an existing Executive order issued pursuant to an existing law, the obligation or expenditure of any appropriation under this Act for contracts for any consulting service shall be limited to contracts which are (1) a matter of public record and available for public inspection, and (2) thereafter included in a publicly available list of all contracts entered into within twenty-four months prior to the date on which the list is made available to the public and of all contracts on which performance has not been completed by such date. The list required by the preceding sentence shall be updated quarterly and shall include a narrative description of the work to be performed under each such contract.

SEC. 412. Except as otherwise provided by law, no part of any appropriation contained in this Act shall be obligated or expended by any executive agency, as referred to in the Office of Federal Procurement Policy Act (41 U.S.C. 401 et seq.) for a contract for services unless such executive agency (1) has awarded and entered into such contract in full compliance with such Act and the regulations promulgated thereunder and (2) requires any report prepared pursuant to such contract, including plans, evaluations, studies, analyses and manuals, and any report prepared by the agency which is substantially derived from or substantially includes any report prepared pursuant to such contract, to contain information concerning (A) the contract pursuant to which the report was prepared and (B) the contractor who prepared the report pursuant to such contract.

SEC. 413. No part of any appropriation contained in this Act shall be available to implement, administer, or enforce any regulation which has been disapproved pursuant to a resolution of disapproval duly adopted in accordance with the applicable law of the United States.

SEC. 414. Except as otherwise provided in section 406, none of the funds provided in this Act to any department or agency shall be obligated or expended to provide a personal cook, chauffeur, or other personal servants to any officer or employee of such department or agency.

SEC. 415. None of the funds provided in this Act to any department or agency shall be obligated or expended to procure passenger automobiles as defined in 15 U.S.C. 2001 with an EPA estimated miles per gallon average of less than 22 miles per gallon.

This Act may be cited as the "Department of Housing and Urban Development-Independent Agencies Appropriation Act, 1986".

Mr. BOLAND (during the reading). Mr. Chairman, I ask unanimous consent that the remainder of the bill be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

□ 1830

Mr. HILER. Mr. Chairman, reserving the right to object, under that particular unanimous-consent request, would that allow amendments to be offered further back in the bill going back to the original titles?

I yield to the gentleman for his response.

The CHAIRMAN. No; it would not. As the Chair understands it, it would only apply to the remaining portion of the bill.

Mr. HILER. Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

● Mr. BONKER. Mr. Chairman, I rise in support of H.R. 3038, the HUD-independent agencies appropriation legislation for fiscal year 1986. I commend Chairman BOLAND for his efforts on this legislation which reflect a continued congressional commitment to federally assisted housing programs in this country. The bill before us today will maintain funding of public housing, the section 202/8 program for the elderly and handicapped, and the Congregate Housing Services Program, all of which have been of vital assistance to our Nation's poor and older citizens.

As chairman of the Subcommittee on Housing and Consumer Interests of the Select Committee on Aging, I have a particular concern regarding the shelter needs of older persons. When the administration submitted its fiscal year 1986 budget to Congress, it had proposed a number of fairly harsh cuts in the housing assistance areas.

This budget prompted a hearing by our subcommittee to examine the impact it might have on the elderly. Testimony presented at that hearing consistently supported the need to maintain—and in many cases—expand the availability of affordable housing for low-income older citizens.

Mr. Speaker, I am certainly not naive in recognizing that we have a serious budget deficit problem on our hands. When the administration proposed cuts in housing assistance, it did so justifying that these steps were necessary to reduce Federal spending. Certainly the record shows that we in Congress are concerned about reducing the deficits—and believe tough measures will be necessary. But the simple facts show that over the past 4 years, the assisted housing programs of HUD have already undergone substantial cuts, and remain far below both need as well as the levels supported back in 1980.

I am gratified to see that the fiscal year 1986 HUD appropriations bill will—at the very least—maintain our present commitment to these vital programs. I am especially pleased that it will continue support for programs which benefit older people.

I commend the committee for continuing funding which recognizes the value of the section 202 program and will provide support for 12,000 units in 1986.

Over the years the section 202 program has become the most visible Federal financing vehicle for building rental housing for older persons that will enable them to remain self-sufficient and independent in our society. The program has been targeted to the unique needs of the elderly and handicapped by incorporating congregate services and design features which offer a supportive environment where social, physical, and emotional needs are met without jeopardizing independence.

The section 202 program has been remarkably successful. Since its inception in 1974, it has produced over 95,000 units of housing for the elderly at 1,458 projects nationwide. In its 11-year history there has been only one instance of foreclosure.

The HUD appropriation will also include 10,000 new units of public housing, as well as funding for modernization, and rehabilitation. This program also serves the needs of a large number of older people. Over 45 pecent of this Nation's more than 1.2 million public housing units are currently occupied by the elderly. It is important that we maintain this commitment. Additionally, the bill recognizes the need to maintain efforts to improve both modernization and rehabilitation. The National Association of Housing and Redevelopment Officials estimates that 350,000 newly constructed or substantially rehabilitated units will be needed each year until the end of the decade just to address problems of deterioration and overcrowding in the Nation's public housing stock.

Finally, I join my colleagues in support of continued appropriations for the Congregate Housing Services Program [CHSP]. The Congregate Housing Services Program recognizes that the shelter needs of older people extend beyond just brick and mortar. This demonstration project provides meals, transportation, and simple home and personal care that can mean the difference between independence and institutionalization for many of our frail elderly citizens.

Preliminary reports received by our subcommittee from the CHSP sites indicate that the program has been successful in preventing premature institutionalization and in providing these services in a cost effective manner. Program costs which include rental subsidies, remain well below the average Medicare or Medicaid reimbursements for a long-term care facility.

This Government has a 50-year commitment to the goal of affordable housing and a decent living environment for every American. Even at current funding levels, we will be unable to fulfill the need for federally assisted housing for all needy elderly. According to a study recently completed by the Senate Special Committee on Aging roughly 2 million of the 3.2 million low income elderly renters eligible for Federal housing assistance are currently not served by Federal housing programs. The bill before us today, while recognizing fiscal constraints, nonetheless will help us maintain this commitment. I commend Chairman BOLAND for his efforts and urge my colleagues in the House to join me in support of this important legislation.●

● Mr. MANTON. Mr. Chairman, I rise in strong opposition to the amendments offered by the gentleman from Texas [Mr. BARTLETT] which would dramatically cut funding for assisted housing programs.

Earlier this month, the Banking Committee, of which I am a member, approved a major housing bill, H.R. 1, authorizing roughly $10.3 billion for the Department of Housing and Urban Development's assisted housing programs. The HUD appropriations bill, as reported by the Appropriations Committee, stays within the guidelines of H.R. 1. Furthermore, this appropriations measure stays within the guidelines established by the House-passed budget resolution which provides for a 2.6-percent increase in low-income housing programs.

H.R. 3038 provides more than $10 billion for the production of an additional 100,000 assisted housing units in fiscal year 1986. This legislation also provides funding for new housing initiatives designed to assist the homeless and create homeownership opportunities for low and moderate income families. I strongly support this legislation which totally rejects the draconian cuts proposed by the Reagan administration to eliminate all funds for low income housing programs for 2 years.

Mr. Chairman, the cuts proposed by the administration would have had a devastating impact on the ninth congressional district of New York which I represent. New York City suffers from a severe shortage of safe, decent, affordable housing. The estimated number of homeless in the city range between 30,000 and 40,000. Thirty-two percent of those fortunate enough to find housing pay more than 40 percent of their income in rent. The vacancy rate for apartments which rent for less than $400 is well under 1.5 percent.

The amendments offered by the gentleman from Texas would further aggravate the serious housing crisis facing New York City and many other communities across the Nation. First, Mr. BARTLETT will offer an amendment to reject the recommendations of the House Banking Committee and the House-passed budget resolution by eliminating the 2.6 percent funding increase provided for in the bill for assisted housing programs.

Mr. Chairman, over the past 4 years the Reagan administration has cut Federal housing assistance by roughly 60 percent, more than any other Federal program. During this period, the housing problems of this Nation and New York City have grown dramatically worse. Mr. BARTLETT's amendment seeks to eliminate the modest attempt of the appropriations committee to reverse this dangerous trend.

Second, Mr. BARTLETT will offer an amendment to cut the number of new public housing units to be constructed in fiscal year 1986 from 10,000 units to 5,000 units. In New York City alone, close to 180,000 families and individuals are on the waiting list for public housing and rental assistance. This waiting list is concrete evidence as to the need for additional low income housing; a need that is not being met by the private sector. Yet despite this dramatic evidence, the amendment offered by the gentleman from Texas would cut in half the effort of the Appropriations Committee to increase the number of available public housing units.

The third amendment offered by Mr. BARTLETT would eliminate $500 million set aside by the Appropriations Committee for new housing programs which would be authorized under H.R. 1. I am hopeful that H.R. 1 will soon be considered on the floor so that these new programs can be authorized. However, in the meantime, I believe it is prudent to include funding for these programs in the FY86 HUD appropriations bill.

One of these new initiatives is a homeownership program for low and moderate income families. The program is based on the highly renowned Nehemiah project in Brooklyn, NY, where 2,000 affordable single family homes are being constructed in a previously desolate neighborhood. A group of local parishes raised the funds necessary to build the homes. With the help of innovative construction techniques and the assistance and cooperation from State and local officials in the form of tax abatements and mortgage financing, the dream of homeownership was made a reality for hundreds of moderate- and low-income families in New York City. The Banking Committee incorporated legislation I have cosponsored into H.R. 1 to establish a national program based on the Nehemiah experience.

At a time when Federal resources are becoming more scarce, it is crucial to establish programs that fulfill the commitments of the Federal Government in a more efficient and cost effective manner. Affordable housing is one of those commitments and Nehemiah is one of those cost effective programs that would fall victim to the Bartlett amendment.

A second program the Bartlett amendment would kill is a $100 million second stage demonstration housing program for the homeless. The demonstration program would determine the effectiveness in assisting nonprofit organizations in providing long-term housing and support services for the homeless. We must do more than simply provide shelter for homeless individuals and families. We must begin to address the causes and develop permanent solutions to this serious and growing program.

The Banking Subcommittee on Housing and Community Development recently held a field hearing in my congressional district in New York City. The committee received deeply troubling testimony on how the city is paying exhorbitant sums to house a woman and her four children in a crowded hotel room with one bathroom and no kitchen facilities. It is an environment in which no one, especially children, should be forced to live. Regrettably, it is a commonplace occurrence in New York City. For some, it is the only alternative to living in the street. Mr. BARTLETT's amendment would eliminate funding for a modest program designed to address this problem in a less costly and more humane manner.

Mr. Chairman, Federal housing programs have been cut to the bone over the last 4 years. Yet, during this same period the Federal deficit was tripled largely due to a bloated and wasteful Pentagon budget and an unfair tax system that socked it to the middle class to pay for the tax shelters of the well-to-do.

Federal housing programs have not caused our fiscal problems. However, a lack of support for these programs have resulted in a serious housing crisis. We must reject further cuts that seek to place the burden of balancing the budget on the poor and elderly. I urge my colleagues to defeat the amendments offered by the gentleman from Texas.●

● Mr. BROWN of California. Mr. Chairman, I rise in support of the Housing and Urban Development-independent agencies appropriation bill, H.R. 3038. I feel that the Appropriations Committee has reported a very good bill in many respects. I commend

the efforts of the subcommittee chairman, Mr. BOLAND, for reporting out a bill which is both forward looking and fiscally responsible.

I would like to focus on one aspect of H.R. 3038, the NASA budget, which is of particular interest to me. I can think of few programs that have proved themselves to be more beneficial to America than the space program. Estimates vary, but as much as $14 have been returned to the economy for every dollar committed to NASA. A recent study on the processing, products, and profits of space for 1983 to 1990 states that the relay satellite business is estimated at world sales of $2 billion for space and ground hardware and that a $10 billion market is estimated for communication services by satellite.

Telecommunications satellites, however, are just the tip of the iceberg in terms of opportunities in space for commercial expansion. On the horizon we can expect to see advanced communications and remote sensing satellites. Space manufacturing of pharmaceuticals, electronics, ultrapure crystals, and special metals are likely to dwarf the satellite industry with limitless possibilities. McDonnell Douglas, the leader in the field of space pharmaceuticals, expects sales of over $1 billion annually by the mid-1990's for a new space drug. And the $1 billion would be for only the initial drug. The aerospace company expects to manufacture up to 10 new drugs by the late 1990's.

The return on the dollar is something that is of concern to us all, but space development goes beyond economics. Space has clearly improved the quality of life and has spun off a host of humanitarian benefits. There is little in modern medicine that hasn't been enhanced by techniques and technologies developed for the space program. It will be fascinating to see the space pharmaceutical industry blossom, providing life-giving drugs never before available to millions of chronically ill patients. From the CAT scan for safely seeing inside the human skull, to the autocuer, a special pair of glasses to aid the hearing impaired in lipreading, NASA has time and again transferred its scientific knowledge to improve the quality of life.

While I am not in complete agreement with all aspects of H.R. 3038, I believe that it has many good points. In the spirit of controlling the deficit, compromises must be struck at every level. In this respect I feel that the NASA portion of this bill has been represented very well. An across-the-board freeze requiring a restructuring of NASA's budget and effecting important initiatives, such as the space station, would be counterproductive. H.R. 3038 outlines a rational alternative for reducing the budget while still maintaining NASA continuity.

Mr. Chairman, H.R. 3038 asks for an overall decrease in requested funds for NASA of $220 million for fiscal year 1986. The Appropriations Committee proposal is $155 million above the 1985 freeze of $7.51 billion—not even enough of an increase to adjust for inflation. With these cuts, NASA has more than done its part to reduce the deficit. Any more reductions in its budget would reduce our national commitment and pride in the space program.

The Appropriations Committee's request for $200 million for the space station is well below the administration's budget request of $280 million, but this is an acceptable level of funding as long as no further cuts are experienced. The bill also provides for new starts such as the orbital maneuvering unit. In addition, important space science projects, such as the Mars observer and advanced communications technology satellite, will be allowed to continue at reduced, but sufficient, funding levels. If the NASA budget isn't maintained at a reasonable level, cutbacks will have to be made in the space shuttle's operations. Two or more shuttle flights a year would be canceled in the event of a freeze.

I would like to remind my colleagues that the HUD-independent agencies appropriations bill is consistent with the House-passed budget resolution, and it actually $350 million below last year's level. I view this as responsible legislation and no further reduction is warranted at this time. Again, I urge my colleagues not to support amendments to further cut NASA funding.●

● Mr. SCHEUER. Mr. Chairman, I rise in support of H.R. 3038.

The distinguished chairman of the subcommittee, Mr. BOLAND, and the ranking minority member, Mr. GREEN, have brought to the floor a bill that provides funding for important EPA research initiatives.

Indeed, I am pleased to note that this bill contains appropriations for many of the activities which were highlighted by the Committee on Science and Technology's EPA research and development authorization bill—H.R. 2319.

I would like to note a few of these areas.

The bill before us provides $6 million for a full-scale demonstration of limestone injection multistage burning technology [LIMB].

LIMB is an extremely promising technology for reduction of acid rain percursors.

The bill also provides funding for Great Lakes research.

The EPA Great Lakes Research Station at Grosse Isle, MI, plays an important role in fulfilling our treaty obligation with Canada to conduct research in assessing and measuring the sources and effects of pollutants in the Great Lakes.

I commend the committee's support of this important activity.

Finally, I note that the bill contains $2.5 million for research into indoor air pollution.

In the last few years, many eminent scientists have concluded that the most significant public health threat from hazardous air pollutants may not come from the outside air at all.

Instead, our most significant exposures to these toxic substances may well be in our familiar and comfortable indoor environments—our homes, our schools, and our workplaces.

To what extent are we at risk from the types of exposures which we experience every day?

The answer to that question is: We don't know.

Furthermore, the administration does not want us to find out.

In March of this year, an administration witness told the Subcommittee on Natural Resources, Agriculture Research and Environment, which I chair, that OMB vetoed EPA proposals to conduct a modest research program because EPA would not be regulating indoor air.

Apparently, OMB, takes the position that, since we already know EPA won't do anything even if further evidence confirms a significant health risk, there's obviously no need to do any more research to find out if indeed there are harmful effects.

The bill we are considering today will overcome the barriers OMB has placed in the way of the scientific research needed to get the answers to these questions.

It provides the EPA with the funds and explicit congressional direction to conduct research on the indoor air issue.

I commend the Appropriations Committee for their fine work on this bill and I urge its adoption.●

● Mr. BRUCE. Mr. Chairman, I rise today to thank the chairman of the committee for bringing H.R. 3038 before the House of Representatives. I also want to commend the committee for recognizing the vital role that the National Science Foundation [NSF] plays in keeping our basic sciences moving forward, and the critical role that NSF plays in fostering economic growth and this Nation's international prominence.

In particular, I would like to draw my colleagues attention to the high priority the committee has placed on NSF's advanced scientific computing projects, the supercomputer. This is an area within NSF that truly enhances all research disciplines supported by the Foundation.

A little more than a year ago, an NSF "working group" on computers in research documented the need for

greater access to high speed computers. In February, NSF named five sites around the country to serve as hub locations for the national supercomputer network. One of these locations is in my district, the University of Illinois at Champaign-Urbana. Through the hard working of scientific researchers, like Dr. Larry Smarr and Dr. David Kuck who direct supercomputing facilities at the University of Illinois, we have begun a unique partnership among scientists, the academic community and industry and Government in the use of supercomputers.

The use of supercomputers in the basic sciences as well as in other areas, such as high energy physics, will move us forward in the development of technological initiatives that will keep this country in the forefront of high technology leadership. This expertise will also increase our economic development at home and abroad. In testimony before the House Science and Technology Committee, Dr. Smarr from the University of Illinois said that supercomputers are essential tools for building new industry and for providing new and better jobs for thousands of people.

The Washington Post recently reported that our Nation's top scientists and administrators made "dazzling" predictions about the potential for supercomputers. They noted that the power of supercomputers is so much greater than anything previously available, that revolutionary changes in they way we design automobiles, airplanes, power tools as well as computers themselves, is imminent. I request that a copy of that article appear in the RECORD immediately following my statement.

Mr. Chairman, I believe that the importance of supercomputers to our competitive position is clear. At a time when our Nation is searching for ways to increase our competitive edge—in research as well as in economic development—we must maintain, at the highest priority, the strength and well being of our technology research base.

Mr. Chairman, I urge my colleagues to grant their continued support for this critical field and to pass H.R. 3038.

[From the Washington Post, June 2, 1985]

CAMPUS SUPERCOMPUTERS MAY BOOST U.S. INDUSTRY—MIDWEST STATES STAKE MILLIONS ON EFFORT

(By Kevin Klose)

CHAMPAIGN, IL.—After years under wraps in nuclear-weapons labs and private industry, the supercomputer, crunching a blistering 500 million numbers a second, is surfacing at U.S. universities, where professors say it could radically alter American industrial competitiveness in the 21st century.

Although a state-of-the-art supercomputer is not scheduled to arrive here at the University of Illinois until summer, enthusiasm for the ultrafast calculating machines is as high on this science-oriented campus as anywhere in the nation.

Few Illini scientists have experience on the new computers, but state officials and educators already consider them indispensable to hopes of reviving the Rust Belt's beleaguered economy.

"We can survive only if we compete more effectively, becoming more productive and efficient, and the supercomputer can help us to do this," said physicist Larry L. Smarr, a leader among young scientists spearheading a costly nationwide effort to bring supercomputers to campuses.

Smarr, 36, helped persuade the National Science Foundation to earmark $200 million early this year to establish supercomputer centers here and at Cornell University, Princeton University and the University of California at San Diego. Linked by satellite for rapid information exchange, the centers will apply the supercomputers to such vital but time-consuming industrial research as metallurgical analysis, fluid dynamics, materials stress, bioengineering and three-dimensional design.

The new facilities also will conduct pure scientific research, including subatomic physics, astrophysics, molecular structural analysis, geophysics and computer modeling of weather systems.

Computers operate by breaking problems down into a set of smaller problems. A regular computer treats those problems as a series, solving them one at a time. A supercomputer solves many problems simultaneously, dramatically reducing the time involved in calculations.

Nearly a dozen universities or college consortia are using or buying supercomputers. These include Purdue University, the University of Texas, Colorado State, University, the University of Georgia and the University of Minnesota. Just five years ago, the exotic machines were virtually unknown outside government-run weapons-research programs or major oil firms, where they are used to analyze geological data.

Smarr and other scientist-administrators make dazzling predictions about the centers impact on industrial innovation and development. They foresee communities of theoreticians, engineers and programmers from many different academic and industrial disciplines gathering at the high-speed processing centers to exchange information on how to best use the supercomputers to speed industrial change.

The supercomputers' power, they say, is so much greater than anything previously available that there may be revolutionary changes in the time needed to design and produce such items as cars, airplanes, power tools, even computers.

"These tools are crucial to building new industry, providing new jobs, better jobs for thousands of people," Smarr said. "In a car, for example, safety, airflow, weight, comfort, fuel economy—all can be simulated by these machines. In the old days, it could take three months to build a clay scale model of a new car and test it in a wind tunnel. But a supercomputer can do 15 different models in a single week. That means fantastically improved efficiency."

Thomas Putnam, manager of computer-user services at Purdue, said that by learning to use Purdue's two-year-old CDC Cyber-205 supermachine, biologists have reduced from six weeks to one hour the time needed to model the structure of a simple vegetable virus.

Such feats are possible because supercomputers, depending upon what tasks are to be accomplished, process information up to 20 times faster than the largest mainframe computers now in use.

Most of the machines are built by Cray Research Inc. of Chippewa Falls, Wis., and Control Data Corp. (CDC) of Minneapolis. Their cost, which can exceed $20 million, has sharply limited their use to well-heeled federal or private agencies.

Once the University of Illinois $20 million Cray X-MP model is installed, in a nondescript building on Springfield Avenue in the heart of the campus, Smarr's National Center for Supercomputing Applications is likely to become a mecca for some of the nation's best programmers.

Already, according to George Badger, director of Illini computer services, more than 200 programmers around the country have asked him about jobs. The university plans to add only 35 full-time professionals to help run the X-MP, but that is just a start.

"We are going to produce better grad students by training them in using this new tool," Badger said. "For the first time, supercomputers are being put in very wide-open environments that will encourage interaction across many scientific disciplines.

"There will be experimenting with a lot of new ideas, and this will have a very important effect on the general technology of the country. Grad students will be able to experiment in many ways, and that will encourage their professors to learn about these new machines as well. As people become more familiar, the number of applications will increase.

"If we are going to attract high tech to the Midwest, we must have a high-tech work force," Badger said.

"These computers can do a very good simulation of a structure crashing into a wall," said Tom Walsh, head of the University of Minnesota's supercomputer operation. "Soon, it will be possible to do an auto crash solely by computer. This in turn makes it possible, in principle, to set up a design bureau, from top to bottom to simulate car crashes."

The knowledge gained will result in better, safer design at lower cost, he said.

There is growing demand from engineers to learn how to use this machine as a daily tool. They won't be productive if they don't know their way around it." Walsh said. "If you look around the Twin Cities [Minneapolis-St. Paul], you will see how it reached a point that new technology began creating new jobs. I think this probably will happen with the new supercomputer centers."

Midwestern states have staked millions in the supercomputer effort. Indiana pledged $8 million to bring the machine to Purdue. Illinois Gov. James R. Thompson (R) has backed the state university with more than $10 million in direct state aid.

Thompson intervened personally to persuade Smarr's colleague, David J. Kuck, to stay in Champaign to found a supercomputer center devoted to the design of Fifth-Generation computers, machines with so much speed and power that they could be said to have synthetic powers of thinking artificial intelligence.●

The CHAIRMAN. Are there further amendments to the bill?

If not, are there any points of order?

The Chair recognizes the gentleman from Massachusetts.

Mr. BOLAND. Mr. Chairman, I move that the Committee do now rise and report the bill back to the House with sundry amendments, with the recommendation that the amend-

ments be agreed to and that the bill, as amended, do pass.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker having assumed the Chair, Mr. PANETTA, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 3038) making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending september 30, 1986, and for other purposes, had directed him to report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill, as amended, do pass.

The SPEAKER. Without objection, the previous question is ordered.

There was no objection.

The SPEAKER. Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER. The question is on the passage of the bill.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. FRENZEL. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 340, nays 73, not voting 20, as follows:

□ 1850

Mr WHITTAKER changed his vote from "yea" to "nay."

Messrs. SAVAGE, FISH, and WHEAT changed their votes from "nay" to "yea."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

TIJUANA SEWAGE PROJECT

(Mr. BOLAND asked and was given permission to address the House for 1 minute.)

Mr. BOLAND. Mr. Speaker, I yield to the distinguished gentleman from California [Mr. LOWERY].

Mr. LOWERY of California. Mr. Speaker, I appreciate the distinguished chairman of the HUD-Independent Agencies Subcommittee yielding to me for the purpose of a brief but sweet colloquy on the issue of Tijuana sewage.

Mr. Speaker, let me say to the distinguished subcommittee chairman that you and your subcommittee have exercised considerable patience in addressing one of San Diego's most critical and pressing problems, that of sewage emanating from Tijuana, Mexico.

Earlier this year, your subcommittee provided an important language change to the EPA section, thereby freeing up the previously appropriated $5 million for planning and design of the Tijuana sewage treatment project. This change was in recognition of the progress made with Mexico over the scope of the project and the resultant U.S. position.

In the bill before us today, though the subcommittee has indicated in prior legislation that this project would be funded at $32 million, there is nothing beyond the initial $5 million installment. My understanding is that

the committee is prepared to fund the Tijuana sewage project up to a total of $32 million when it is determined that the project is ready for construction. Is that a correct assessment?

Mr. BOLAND. Mr. Speaker, the gentleman's assumption and understanding is absolutely correct.

Mr. GREEN. Mr. Speaker, will the gentleman yield?

Mr. BOLAND. I yield to the gentleman from New York.

Mr. GREEN. Mr. Speaker, I thank my subcommittee chairman for yielding.

I would simply like to give assurances from our side of the aisle also that we understand the gentleman's problem, and we have that understanding with the gentleman.

Mr. LOWERY of California. Mr. Speaker, I thank the subcommittee chairman and the ranking minority member.

PERSONAL EXPLANATION

Mr. GILMAN. Mr. Speaker, I was unavoidably detained in a meeting today and unable to cast my vote on rollcall No. 256, relating to an amendment to the Department of Housing and Urban Development—independent agencies appropriation bill of 1986, deleting $500 million in the program reserve account appropriated for new and unauthorized programs. Had I been present at that time, I would have voted no.

REPORT ON HOUSE RESOLUTION 230, ACCURACY IN HOUSE PROCEEDINGS RESOLUTION

Mr. FOLEY, from the Committee on House Administration, submitted a privileged report (Rept. No. 99-228) on the resolution (H. Res. 230) providing that for the remainder of the 1st session of the 99th Congress there should be a substantially verbatim account of House proceedings in the CONGRESSIONAL RECORD which should be clearly distinguishable by different typeface from remarks not spoken but inserted under leave to extend, which was referred to the House Calendar and ordered to be printed.

APPEAL FOR THE RELEASE OF SOVIET JEWRY

Mr. FASCELL. Mr. Speaker, I ask unanimous consent that the Committee on Foreign Affairs be discharged from further consideration of the Senate joint resolution (S.J. Res. 161) to appeal for the release of Soviet Jewry, and ask for its immediate consideration in the House.

The Clerk read the title of the Senate joint resolution.

The SPEAKER. Is there objection to the request of the gentleman from Florida?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 161

Whereas President Reagan recently stated that "Soviet Jewry suffers from persecution, intimidation, and imprisonment within Soviet borders";

Whereas President Reagan stated further that "We will never relinquish our hope for their freedom and we will never cease to work for it," and that "If the Soviet Union truly wants peace, truly wants friendship, then let them release Anatoly Scharansky and free Soviet Jewry.": Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That, in support of the President's position, the Congress calls on the Soviet Union, as an initial gesture—

(1) to release immediately Anatoly Scharansky, Yosef Begun, and all other Prisoners of Conscience, and allow them to leave the Soviet Union;

(2) to issue immediately exit permits to the many known long term "Refuseniks" such as Ida Nudel and Vladimir Slepak; and

(3) to allow those thousands of Jews who wish to emigrate to join their relatives abroad, or to be repatriated to their historic homeland, to leave this year and pledge that such cases shall be dealt with expeditiously and in a humanitarian way during the next three years, thus enabling those who have requested exit permits to leave.

● Mr. FASCELL. Mr. Speaker, I rise in support of Senate Joint Resolution 161, to appeal for the release of Soviet Jewry. This important joint resolution is in support of President Reagan's recent statements calling on the Soviet Union to release Anatoly Shcharansky and to end the imprisonment and persecution of Soviet Jewry if it truly wants peace and friendship. Senate Joint Resolution 161 calls on the Soviet Union to immediately release Anatoly Shcharansky, Yosef Begun, and all other prisoners of conscience and to allow them and thousands of other Jewish refuseniks, such as Ida Nudel and Vladimir Slepak, to emigrate immediately to join their relatives abroad.

I believe it is absolutely critical that the U.S. Congress go on record, as forcefully as possible to deplore the treatment of Jews imprisoned in the Soviet Union and to urge that, in the interest of basic human decency, these long-suffering people be freed immediately. It is imperative that all those who have requested exit permits from the Soviet Union should be permitted to leave. Allowing them to do so would demonstrate to the world that the Soviet Union is truly interested in peace and friendship.

Yesterday, our hearts were touched by the testimony before the Committee on Foreign Affairs of Anatoly Shcharansky's wife, Avital, who urged us to take prompt action on behalf of her husband and the thousands of Soviet Jews who have been denied the right to be reunited with their families abroad. It is high time for the Soviet Union to release Anatoly Shcharansky and the hundreds, perhaps thousands of prisoners of conscience, Helsinki monitors, religious believers, and many others who are guilty of nothing more than seeking to claim their rights under international law, the Helsinki Final Act and even the Soviet Constitution.

This resolution sends a clear message to the Soviet Union that the issue of human rights, including the plight of Anatoly Shcharansky and other Prisoners of Conscience is still very much on the agenda of United States-Soviet relations. It will demonstrate to the Soviet Union and the world that this vital issue of Soviet Jewry has the support of a broad coalition of Republicans and Democrats in both the House and the Senate. It will show them clearly and unequivocally that the U.S. Congress will not give up the struggle for human rights and freedom, and will keep fighting for the freedom of all those unjustly persecuted and harassed in the Soviet Union and throughout the world.

Mr. Speaker, I urge the adoption of Senate Joint Resolution 161.●

● Mr. BROOMFIELD. Mr. Speaker, I offer my strong support of the resolution before us.

This joint resolution, in support of the President's effort, calls upon the Soviet Union to immediately release Anatoly Shcharansky, Yosef Begun, and all other prisoners of conscience. The resolution also calls on the Soviet Union to issue exit permits to refuseniks including Ida Nudel and others.

Also included is a request that the Soviet Union rapidly allow thousands of Jews to leave that country so that they can rejoin their relatives.

I am particularly distressed by the terrible treatment of Mr. Shcharansky. His untold sufferings must be made known to all people from all countries around the world. The treatment which he has been subjected to is more than a violation of human rights. It is a classic example of how a police state treats a decent human being who wants to speak the truth.

Yesterday, Mrs. Shcharansky testified eloquently before the House Foreign Affairs Committee about how the Kremlin is using her husband for political advantage.

Also, Congressman KEMP of New York, a leading congressional critic of the Soviet Union's treatment of Soviet Jews, testified as to the inhumane treatment of Mr. Shcharansky by Soviet authorities, lauded the personal courage of Mrs. Shcharansky, and strongly supported the resolution before us.

President Reagan has said on many occasions that Soviet Jewry suffers from persecution and imprisonment in that country. He has pledged that America will never abandon those suf-

fering people. I am confident that the President will place this vital issue high on the agenda when he meets with Soviet leader Gorbachev in November.

This important piece of human rights legislation deserves our support. I call upon my colleagues to join me in supporting this resolution.●

● Mr. KEMP. Mr. Speaker, first of all, I would like to thank Chairman FASCELL and Senate Majority Leader DOLE for their leadership in moving this important resolution forward as quickly as possible. And to express appreciation to my colleague from Georgia, WYCHE FOWLER, with whom I have the honor of serving as cochair of the Congressional Coalition for Soviet Jewry, and to all the Members on both sides of the aisle in both Houses of Congress who have given their support to this measure.

Senate Joint Resolution 161 calls attention to President Reagan's statements affirming our commitment to freedom for Soviet Jews and calls upon the Soviet Union to make a show of good faith by:

Releasing Jewish Prisoners of Conscience, including Anatoly Shcharansky and Yosef Begun;

Granting exit visas to all known long-term refuseniks, such as Vladimir and Maria Slepak and Ida Nudel; and

Permitting family reunification and repatriation.

Yesterday I had the honor of sitting next to Avital Shcharansky when we both testified before the House Foreign Affairs Committee. I said then that Avital was one of the most courageous women in the world. She is also the most tireless. Her efforts on behalf of her husband, Anatoly, and the issue of Soviet Jewry are ceaseless, and she has become the international symbol for the struggle.

In March of this year, Senator MOYNIHAN and I were joined by 196 of our colleagues in the House and 67 of our colleagues in the Senate in writing to President Reagan and stressing the crisis situation of Jews in the Soviet Union. We urged the President to call for separate talks on the issue of free emigration, and to demand that the Soviets comply with the mandate of the Helsinki accords as a show of good faith before entering into any further agreements.

The resolution currently before us is important because it establishes this point through legislation. It strongly reiterates the U.S. position that if the Soviets want improved relations with the United States, they must honor their human rights commitments under the Helsinki accords. President Reagan has said "If the Soviet Union truly wants peace, truly wants friendship, then let them release Anatoly Shcharansky and free Soviet Jewry."

Today, on the threshold of the 10th anniversary of the signing of the Helsinki accords, shortly before a United States-Soviet summit meeting, with Avital's eloquent voice still ringing in my ears, these words of our President are particularly significant. We must establish and require linkage in all our dealings with the Soviets, in trade negotiations as well as arms agreements. This resolution takes a big step in that direction by calling attention to the President's affirmation of our commitment to Anatoly Shcharansky, Yosef Begun, Ida Nudel, Vladimir and Maria Slepak, Vladimir Felstman, and all the other Prisoners of Conscience, refuseniks, and Jews desiring repatriation and family reunification, as is their basic right as human beings and legal right under the Helsinki accords. We must demand a show of good faith from the Soviets on their previous commitments before we enter into new ones, not on a quid pro quo basis but as a unilateral action.

I urge my colleagues in the House to pass this resolution without delay.●

● Mr. GILMAN. Mr. Speaker, I would like to take this opportunity to thank the gentleman from Florida, the distinguished chairman of our House Foreign Affairs Committee, Mr. FASCELL, for expediting consideration of the measure before us today. Although we considered an almost identical version of Senate Joint Resolution 161 only a few days ago on the floor of the House as part of the foreign aid bill, logistical problems which threaten swift adoption of that bill have caused us to act on this important Soviet Jewry measure separately. Senate Joint Resolution 161, introduced only a few weeks ago, garnered the support of over 62 cosponsors and was quickly passed by the other body. The bill appeals for the release of Soviet Jews now held unjustly in Soviet prisons and labor camps, many of whom has been incarcerated only for expressing a desire to practice their religion and to study the Hebrew language. This measure goes on to further assert that the thousands of refuseniks who have been waiting for exit permits for so long, be allowed to emigrate to Israel to join their relatives, or in the case of those who have no family there, repatriation to their historic homeland.

Earlier this week, the Foreign Affairs Committee held a hearing, in which moving testimony was presented by Avital Shcharansky on behalf of her husband, Anatoly, who has become a symbol of the Soviet human rights movement throughout the world, suffering stoically through a 13-year prison term that falsely charged him with being an agent of the United States.

Senate Joint Resolution 161 calls for Anatoly Shcharansky's immediate release, as well as the release of Yosef Begun, who is now serving an unprecedented third prison term for his "crime" of teaching Hebrew. Ida Nudel, the "guardian angel" and Vladimir Slepak, both individuals of great human courage and dignity, need only exit permits for their personal ordeals to end. They have waited to join their families in Israel for such a long time, and dispite numerous appeals on their behalf, the Soviet authorities refuse to comply.

These victims or Soviet oppression were contributing citizens to their communities and were catapulted into the limelight when they had the audacity to apply for exit visas. They were refused, and were subsequently caught up in the web of the Soviet's oppressive bureaucracy that labels them parasites for not having jobs upon losing employment as a result of their having applied to emigrate. This catch-22 situation makes them vulnerable targets for arrest. The Soviet authorities even go the extent of filing blatantly false drug possession charges in a growing number of cases.

During our hearing, Avital Shcharansky, a courageous woman of great commitment, emphasized the need for continued action on the part of the House of Representatives and the Western world. The action we must take, in part evidenced by consideration of the bill today, was underscored by our colleagues, the gentleman from New York [Mr. KEMP], the gentleman from Maryland [Mr. HOYER], and the gentleman from Georgia [Mr. FOWLER], who accompanied her.

As we approach the 10th anniversary of the signing of the Helsinki accords, which will be the subject of a special order next week, it is imperative that we continue our vigilance on behalf of Soviet Jewry. In June, only 36 individuals were granted emigration visas, a pitifully low number that continues to be discouraging. Although the first 2 weeks of this month saw 153 men and women allowed to leave, this will probably be the final total for the entire month. The Soviets have a habit of clearing the refuseniks out of Moscow several weeks prior to and following any major event. On July 27, and continuing through August 2, the Soviets will be holding a youth festival in Moscow. No emigration permits will be granted for the period preceding this festival, and even Soviet Jews residing in other cities will not be allowed to visit Moscow. House consideration of this bill comes at an opportune moment, on the eve of this festival and the anniversary of the Helsinki accords.

I urge my colleagues to join us in adopting this important human rights legislation, as a signal to Soviet Jews who continue to suffer and to the Government that prolongs their oppression.●

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. FASCELL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the Senate joint resolution just passed.

The SPEAKER. Is there objection to the request of the gentleman from Florida?

There was no objection.

MAKING IN ORDER AT ANY TIME AFTER TUESDAY, JULY 30, 1985, CONSIDERATION OF CONFERENCE REPORTS ON S. 960, INTERNATIONAL SECURITY AND DEVELOPMENT COOPERATION ACT OF 1985, AND H.R. 2068, DEPARTMENT OF STATE, UNITED STATES INFORMATION AGENCY, AND BOARD FOR INTERNATIONAL BROADCASTING AUTHORIZATION ACT, 1986 AND 1987

Mr. FASCELL. Mr. Speaker, I ask unanimous consent that it may be in order at any time after Tuesday, July 30, 1985, to consider in the House the conference reports on the Senate bill (S. 960) to amend the Foreign Assistance Act of 1961, the Arms Export Control Act, and other acts to authorize appropriations for the fiscal year 1986 for international security and development assistance, the Peace Corps, the Inter-American Foundation, and the African Development Foundation, and for other purposes, and on the bill (H.R. 2068) to authorize appropriations for fiscal years 1986 and 1987 for the Department of State, the United States Information Agency, the Board for International Broadcasting, and for other purposes.

The SPEAKER. Is there objection to the request of the gentleman from Florida?

There was no objection.

REPORT ON RESOLUTION WAIVING CERTAIN POINTS OF ORDER AGAINST CONSIDERATION OF H.R. 3036, TREASURY, POSTAL SERVICE, AND GENERAL GOVERNMENT APPROPRIATION BILL, 1986

Mrs. BURTON of California, from the Committee on Rules, submitted a privileged report (Rept. No. 99-229) on the resolution (H. Res. 236) waiving certain points of order against consideration of the bill (H.R. 3036) making appropriations for the Treasury Department, the U.S. Postal Service, the Executive Office of the President, and certain independent agencies, for the fiscal year ending September 30, 1986, and for other purposes, which was referred to the House Calendar and ordered to be printed.

PROVIDING FOR CONSIDERATION OF HOUSE JOINT RESOLUTION 187, TO APPROVE THE "COMPACT OF FREE ASSOCIATION"

Mrs. BURTON of California. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 235 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 235

Resolved, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 1(b) of rule XXIII, declare the House resolved into the Committee of the Whole House on the State of the Union for the consideration of the joint resolution (H.J. Res. 187) to approve the "Compact of Free Association", and for other purposes, and the first reading of the joint resolution shall be dispensed with all points of order against the consideration of the joint resolution for failure to comply with the provisions of section 401(b)(1) of the Congressional Budget Act of 1974 (Public Law 93-344) are hereby waived. After general debate, which shall be confined to the joint resolution and shall continue not to exceed three hours, thirty minutes to be equally divided and controlled by the chairman and ranking minority member of the Committee on Foreign Affairs, thirty minutes to be equally divided and controlled by the chairman and ranking minority member of the Committee on Interior and Insular Affairs, thirty minutes to be equally divided and controlled by the chairman and ranking minority member of the Committee on Armed Services, thirty minutes to be equally divided and controlled by the chairman and ranking minority member of the Committee on the Judiciary, thirty minutes to be equally divided and controlled by the chairman and ranking minority member of the Committee on Merchant Marine and Fisheries, and thirty minutes to be equally divided and controlled by the chairman and ranking minority member of the Committee on Ways and Means, the joint resolution shall be considered as having been read for amendment under the five-minute rule. No amendment to the joint resolution shall be in order except an amendment in the nature of a substitute consisting of the text after the resolving clause of H.J. Res. 343, which shall be considered as pending and as having been read and shall be debatable for not to exceed thirty minutes, to be equally divided and controlled by Representative Rostenkowski of Illinois or his designee and a Member opposed thereto, and all points of order against said amendment for failure to comply with the provisions of clauses 5(a) and 5(b) of rule XXI are hereby waived. Said amendment shall not be subject to amendment except a substitute therefor consisting of the text after the resolving clause of H.J. Res. 344, if offered by Representative Udall of Arizona, said amendment shall be considered as having been read, shall not be subject to amendment but shall be debatable for not to exceed thirty minutes, to be equally divided and controlled by the proponent of the amendment and a Member opposed thereto, and all points of order against said amendment for failure to comply with the provisions of clauses 5(a) and 5(b) of rule XXI are hereby waived. At the conclusion of the consideration of the joint resolution for amendment, the Committee shall rise and report the joint resolution to the House with such amendment as may have been adopted, and the previous question shall be considered as ordered on the joint resolution to final passage without intervening motion except one motion to recommit with or without instructions.

□ 1900

The SPEAKER. The gentlewoman from California [Mrs. BURTON] is recognized for 1 hour.

Mrs. BURTON of California. Mr. Speaker, for the purposes of debate only, I yield the customary 30 minutes to the gentleman from Mississippi [Mr. LOTT], pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 235, is a modified closed rule providing for the consideration of House Joint Resolution 187, the compact of free association. This rule allows 3 hours of general debate, with 30 minutes to be equally divided and controlled by the chairman and ranking minority member of the Committee on Foreign Affairs, 30 minutes to be equally divided and controlled by the chairman and ranking minority member of the Committee on Interior and Insular Affairs, 30 minutes to be equally divided and controlled by the chairman and ranking minority member of the Committee on Armed Services, 30 minutes to be equally divided and controlled by the chairman and ranking minority member of the Committee on the Judiciary, 30 minutes to be equally divided and controlled by the chairman and ranking minority member of the Committee on Merchant Marine and Fisheries, and finally 30 minutes to be equally divided and controlled by the chairman and ranking minority member of the Committee on Ways and Means.

Section 401(b)(1) of the Congressional Budget Act, which prohibits consideration of new entitlement authority effective prior to October 1 of the year in which it is reported, is waived.

This measure is in violation of section 401(b)(1) because new entitlement authority in House Joint Resolution 187 would be effective in fiscal year 1985 and this joint resolution was reported during calendar year 1985. However, both substitutes made in order by this rule provide that no funds will be made available prior to October 1, 1985. Therefore, this waiver is purely technical, since the substitutes cure the Budget Act violation.

Under this rule, Joint Resolution 187 is amendable only by a substitute amendment consisting of the text following the resolving clause of House Joint Resolution 343, which shall be considered as pending and as having

been read. Debate on this amendment is not to exceed 30 minutes to be equally divided and controlled by Mr. ROSTENKOWSKI and a Member opposed to the substitute.

Points of order against this amendment for failure to comply with clause 5(a) of rule XXI are waived. Clause 5(a) prohibits appropriations in a legislative bill. There are a number of instances in this measure where funds are made available to fulfill the provisions of this agreement between the United States and these two governments of the Trust Territory of the Pacific Islands, and thereby constitute appropriations.

Clause 5(b) of rule XXI, which prohibits tax and tariff legislation in a measure over which the Ways and Means Committee does not have primary jurisdiction, is waived. This is necessary since the Ways and Means Committee was only given sequential referral of this measure, but Ways and Means recommended tax and tariff provisions which are included in this amendment.

Mr. ROSTENKOWSKI's substitute is not subject to amendment except by a substitute to be offered by Mr. UDALL of Arizona, consisting of the text following the resolving clause of House Joint Resolution 344, which shall be considered as having been read. Debate on this amendment is not to exceed 30 minutes to be equally divided and controlled by Mr. UDALL and a Member opposed to the substitute.

Clauses 5 (a) and (b) of rule XXI are also waived against the Udall amendment since this substitute, like the Rostenkowski amendment, contains appropriations and tax and tariff provisions. Mr. UDALL's amendment is not open to amendment.

Finally, Mr. Speaker, one motion to recommit, with or without instructions, is made in order by this rule.

Mr. LOTT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this is a modified closed rule providing for the consideration of House Joint Resolution 187, approving the compact of free association with the Marshall Islands and the Federated States of Micronesia.

The rule waives section 401(b)(1) of the Budget Act against consideration of the joint resolution. That section prohibits the consideration of new entitlement authority which takes effect prior to October 1 in the year it is reported. Since the bill does provide for payments to the Pacific Islands which would be made in fiscal 1985, and since this bill was reported this year, it is in violation of section 401(b)(1). However, the Committee on Interior has amended the original resolution to insure that no payments will be made prior to October 1 of this year, thereby curing the budget violation.

As a result of that corrective action, the chairman of the Budget Committee has indicated that he has no objection to this waiver.

Mr. Speaker, this rule provides for 3 hours of general debate, to be equally divided between the six committees of jurisdiction over this legislation; that is, one-half hour each for the Committees on Foreign Affairs, Interior and Insular Affairs, Armed Services, Judiciary, Merchant Marine and Fisheries, and Ways and Means.

Following general debate, the joint resolution shall be considered as having been read for amendment under the 5-minute rule. No amendment shall be in order except one amendment in the nature of a substitute which shall be the Ways and Means Committee version, and it shall only be subject to one amendment—a compromise developed by two other committees. Both amendments shall be subject to one-half of debate, with debate time on the first divided between Chairman ROSTENKOWSKI and a Member opposed, and on the second between Chairman UDALL and a Member opposed.

The rule further waives clauses 5(a) and (b) of rule XXI against both substitutes. Clause 5(a) prohibits appropriations in a legislative bill, and 5(b) prohibits consideration of revenue matters in a bill not reported by a revenue committee. Finally, after the amendments have been disposed of and the committee rises, the joint resolution will be subject to one motion to recommit, with or without instructions.

Mr. Speaker, before I go into the provisions of the joint resolution, I would like to speak briefly to the controversy surrounding this rule. The Ways and Means Committee had asked for a closed rule on its tax and trade provisions. As I have indicated, this rule instead makes in order a substitute for the Ways and Means version that contains different tax and trade provisions. I can understand and sympathize with the legitimate concerns of our tax committee over a procedure which allows for the consideration of a tax amendment not reported from Ways and Means.

Mr. Speaker, the Rules Committee does not lightly waive clause 5(b) of rule XXI which prohibits the consideration of tax measures not reported from our Tax Committee. However, in this instance we are not only faced with controversial and complex tax and trade issues, but a delicate foreign policy issue as well. The Ways and Means Committee has legitimate concerns that the tax and trade benefits in the original and compromise bills are too liberal. The Foreign Affairs and Interior Committees, on the other hand, feel just as strongly that without these provisions the compact would be unacceptable to the Micronesians, and 15 years of negotiations would go down the drain.

So, this is a close call procedurally, and I regret that we have not been able to resolve these jurisdictional differences before bringing this matter to the floor. But there is some urgency about completing action on this now since we must notify the United Nations by the end of August for the trusteeship termination issue to be put on the agenda for approval.

Mr. Speaker, House Joint Resolution 187 essentially approves and implements a compact arrived at between the U.S. Government and the Federated States of Micronesia and the Marshall Islands. This is the result of some 15 years of negotiations by four administrations—both Democratic and Republican—to end our trusteeship status over these islands which we have held since 1947. The compact would replace our U.N. trusteeship with a new political status of "free association." Under this new status, the Freely Associated States would have sovereignty over their domestic and foreign affairs, but would continue to receive certain assistance and new tax and trade benefits from the United States. In return, our country would receive the right, in perpetuity, to deny adversaries access to the territory, airspace, and waters of the Freely Associated States. We would also receive access, for 30 years, at a fixed price, to the lands comprising the Kwajalein Missile Range.

Mr. Speaker, I don't know of anyone who is completely ecstatic about either the procedures provided for in this rule, or all the provisions contained in either of the principal substitutes we will be considering. That is probably because we are dealing both with compromises reached between our Government and the trust territories, and compromises reached between our various committees of jurisdiction. Politics is the art of compromise, but no one ever said political artwork was pretty. This is messy; it's not aesthetically pleasing. But the fact remains that it's probably the best we can do under the circumstances, and it's something we must act on now. While I sympathize with the legitimate jurisdictional concerns involved, I think we must move forward with this procedure and pass a measure that will be acceptable to all the parties involved in this compact of free association. I therefore urge adoption of this rule.

Mr. Speaker, before I yield back my time, I would like to yield to a couple of colleagues who still have some concerns.

Mr. Speaker, I yield 2 minutes to the gentleman from Minnesota [Mr. FRENZEL].

Mr. FRENZEL. Mr. Speaker, I am not going to object to the rule. I think it is the best that can be done under the circumstances, but I do want at

this time to express my objection to the entire procedure under which this bill is being handled. It has been moved with intemperate speed and insufficient notification to a number of Members and committees of this House, Perhaps it is absolutely necessary. In my judgment, it is simply dereliction of duty that we have not moved in the proper way.

The Committee on Ways and Means has had very short notice on a very complicated section of the tax law which other committees have tried to write for us. We have in concert with them fashioned an uneasy compromise, the total repercussions of which are not known by anyone.

The bill will go forward, I am convinced, but I would like to put the House on notice that as in every case when we breach the regular order around here, we lay ourselves open for difficulties in the future, for complaints in this case from other possessions and inhabitants thereof, both civilian and corporate, that they are being put upon or given treatment which is in some way inferior.

We never can operate this House exactly the way we would like to under the regular order, but this particular case was a flagrant disruption of that order and the Members should at least know that they are dealing, at least in my judgment, with a jerry-rigged compromise, the results of which are not totally known.

Mr. LOTT. Mr. Speaker, I yield 5 minutes to the gentleman from Nebraska [Mr. BEREUTER].

Mr. BEREUTER. Mr. Speaker, I thank the distinguished gentleman from Mississippi for yielding me time.

This Member has been very heavily involved in matters related to the Pacific Trust Territories for over 3 years, the subject area of the rule for Micronesian compact legislation we are expecting to very shortly consider.

I am also a member of the Asian and Pacific Subcommittee of the Foreign Affairs Committee, after having been involved in this subject area through my former membership on the Committee on Interior and Insular Affairs.

□ 1910

During the last week, I have been specifically excluded from discussions between the Committee on Interior and Insular Affairs and the Committee on Foreign Affairs in their effort to find a compromise between the versions of the legislation from the two committees. I am upset with that process. I resent it. It is the first time in 7 years of service in the House that I have been precluded from a full participation in the proceedings of the House when I have a committee spot that seems to suggest such an active role is appropriate.

I also object to the rule for while it seems to allow adequate time, with 30 minutes of personal debate allocated to each of six committees, I am not at this point assured of having adequate time to engage in a colloquy with Members of at least three different committees that have been involved in the deliberations on this legislation. I also know that there is an intention to try to expedite the discussions of the bill once the rule is completed.

I can be very reasonable, I would say to my colleagues, depending on the discussions and the colloquy that we might have during the debate on the bill, House Joint Resolution 187, or the substitute, House Joint Resolution 344. But I am prepared to stay here all night, until the exhaustion of the time, objecting to any unanimous consent to shorten the amount of time unless I am assured that I am allocated at least 10 minutes of time for serious colloquy with Members of the three committees.

Mr. MAZZOLI. Mr. Speaker, will my friend yield?

Mr. BEREUTER. I yield to the distinguished gentleman from Kentucky.

Mr. MAZZOLI. I thank my friend for yielding, and just let me salute him for the work he did, lonely work at that, dealing with the immigration issues that I have some interest in myself. Let me assure the gentleman that since the gentleman from Kentucky controls under the rule a certain period of time, that he will get adequate time from my time, if necessary, in order to make clear his concerns and his observations, wise observations about this bill. And I can assure that the gentleman will not be closed out at that juncture.

Mr. BEREUTER. I thank the gentleman for that comment and very much appreciate it. I accept that offer, and I particularly appreciate it from the gentleman because of his demonstrated expertise in the subject area of immigration.

Mr. LAGOMARSINO. Mr. Speaker, will the gentleman yield?

Mr. BEREUTER. I yield to the gentleman from California.

Mr. LAGOMARSINO. Mr. Speaker, I too want to assure the gentleman that I will yield 5 minutes to him of my very limited 15 minutes, and I do so not just because the gentleman has said what he might do if that would not occur, but because he has had a great input in this legislation. He is one of the few Members of the House who has actually been to Micronesia. He and I were out there together. He knows what the situation is like there firsthand.

The gentleman made very valuable contributions to this bill in the Foreign Affairs Committee, and I can assure the gentleman that the things and the amendments he proposed, and which were accepted at that committee, have been protected, and I would say, if anything, enhanced and improved in the further negotiations that took place in the Committee on Interior and Insular Affairs and in the negotiations between the two committees.

Mr. BEREUTER. I thank the distinguished gentleman from California for that comment, and I am particularly pleased to hear it from the gentleman, since the gentleman has certainly been much more involved in Micronesian affairs for a longer period of time than myself or practically any Member of the Congress in history. And I would say to the gentleman that the gentleman from New York [Mr. SOLOMON] and myself share some very specific concerns about the certainty of lease payment to the landowners at Kwajalein Atoll by the Government of the Republic of the Marshall Islands that will be created. I would hope that the distinguished gentleman from New York [Mr. SOLOMON], might also have an opportunity to engage in a colloquy on that subject if the gentleman could find a way to provide for such time.

Mr. LAGOMARSINO. Surely.

Mr. BEREUTER. I thank the gentleman.

Mr. SOLARZ. Mr. Speaker, will the gentleman yield?

Mr. BEREUTER. I am pleased to yield to the distinguished gentleman from New York [Mr. SOLARZ], the chairman of the Subcommittee on Asian and Pacific Affairs.

Mr. SOLARZ. Mr. Speaker, I thank the gentleman for yielding. I think the gentleman makes a mistake if he feels that in any way he has been excluded from this process. I think there are very few other Members of the House who have left more of a mark on this legislation than my good friend from the other side of the aisle. Your concerns were incorporated, as you know, to a large extent in the Foreign Affairs Committee bill.

To be sure, you were not among those that participated in the effort to resolve the differences between the Committee on Interior and Insular Affairs and the Committee on Foreign Affairs, but there were a limited number who were, and that was determined on the basis of seniority.

But I think when you look at the final product, you will find that virtually all of the concerns you had expressed in the Foreign Affairs Committee, which led to the adoption of the amendment in our committee, were included in the compromise version that the House will be voting on later tonight.

Mr. BEREUTER. I thank the gentleman. I understand that most of the things I am concerned with are indeed in that compromise version of the legislation. I have only a few questions as to why certain approaches have been taken. That is the purpose of my intended colloquy.

But I would say to the chairman that I was specifically excluded from the negotiation process between the Committee on International Insular Affairs and Foreign Affairs, and that is a fact.

I yield back the balance of my time.

Mrs. BURTON of California. Mr. Speaker, for purposes of debate only, I yield 2 minutes to the gentleman from Ohio [Mr. SEIBERLING].

Mr. SEIBERLING. Mr. Speaker, I thank the gentlewoman for yielding this time to me.

First of all, let me say I rise in strong support of this rule.

Second, I would like to respond to the gentleman from Nebraska [Mr. BEREUTER]. I share the interests that the gentleman has, as he knows, and when the late Phillip Burton asked me to assume the jurisdiction dealing with this Micronesian problem in the subcommittee I chair, I did it with his mandate that he wanted to make sure that we protect the rights of the people out there. That has been one of my main concerns in dealing with this whole matter. So I share the gentleman's interest.

I am sorry the gentleman was not in the negotiations that combined the Foreign Affairs Committee and the Interior and Insular Affairs Committee bills. But I assure the gentleman that at all times we were anxious to make sure that we did not sell out the essential interest of either the people of Micronesia or the people of the United States.

I think we protected them. However, I will be happy to engage in a colloquy with the gentleman.

Mr. BEREUTER. Mr. Speaker, will the gentleman yield at that point?

Mr. SEIBERLING. I yield to the gentleman from Nebraska.

Mr. BEREUTER. I thank the gentleman for his comments. The gentleman is a leader on this and many subjects, and I have been benefited greatly from service with him, and specifically as a part of the codel that visited the Marshall Islands, Palau, the Federated States of Micronesia, and the Commonwealth of the Northern Mariana Islands. I thank him for his assurance.

GENERAL LEAVE

Mr. UDALL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on House Joint Resolution 187.

The SPEAKER. Is there objection to the request of the gentleman from Arizona?

There was no objection.

Mr. LOTT. Mr. Speaker, I yield 3 minutes to the gentleman from New York [Mr. SOLOMON].

Mr. SOLOMON. I thank the gentleman for yielding this time to me. I will tell my colleagues that I will be very brief. We do have to go back into a conference on the foreign aid bill. But I think a couple of things need to be said.

First I would like to commend the gentleman from New York [Mr. SOLARZ], for the outstanding job that he has done on this compact legislation. This legislation that has very little interest to many Members of this body, yet it has a great deal of interest to the security of this country. And the gentleman from New York [Mr. SOLARZ], has been most helpful in working out the compromise that we have come up with. I personally, representing maybe the conservative view, and certainly be representing the liberal view, have come to an understanding as far as national security is concerned that this is a good piece of legislation and that it is also supported by the administration.

I do have some reservations about the way my colleague from Nebraska was perhaps treated, whether intentional or unintentional, because I do not think he did have his day in court. He has been extremely helpful to me.

I did go with the gentleman from New York [Mr. SOLARZ] to the other side of the world to look at this situation because I was concerned about the national security, and certainly the gentleman from Nebraska [Mr. BEREUTER], has been so helpful in educating me to the overall issue of this major issue.

But again I want to apologize to the gentleman from Nebraska [Mr. BEREUTER] perhaps for the way he was treated, but to heap praise on the gentleman from New York [Mr. SOLARZ], and the gentleman from Ohio [Mr. SEIBERLING], and many others that have sort of brought this legislation along in a timely fashion. It must be acted on, and I would certainly urge the entire House to act on it favorably tonight.

Mrs. BURTON of California. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, my husband, Phillip, worked for many years as Chair of the Interior Subcommittee on Insular Affairs to perfect this document before us today.

This final product is a result of careful examination over the past 14 years by many authorities who have reached agreement of its very extensive provisions involving the Micronesian Islands.

The compact, among its wide-ranging provisions, protects our security interests in the Pacific, provides for economic development and addresses health and educational needs, including the Burton Healthcare Program for the Northern Marshall Islands.

Health care provisions also include victims of our Pacific atomic testing, settles claims relative to this issue and meets our obligation of the Trusteeship Council of 1947, agreeing to the self-determination of these people.

I urge my colleagues to support this rule.

□ 1920

Mr. LOTT. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mrs. BURTON of California. Mr. Speaker, I have no further requests for time and I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. As the Chair stated previously, the Chair will recognize members for 1-minute speeches at this time.

Hearing none, the Chair recognizes the gentleman from Illinois [Mr. ROSTENKOWSKI].

REQUEST TO SUBSTITUTE HOUSE JOINT RESOLUTION 355 FOR HOUSE JOINT RESOLUTION 343 DURING CONSIDERATION OF HOUSE JOINT RESOLUTION 187, "COMPACT OF FREE ASSOCIATION"

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent that House Joint Resolution 355 be considered in lieu of House Joint Resolution 343 under the terms of the rule just adopted.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

COMPACT OF FREE ASSOCIATION

The SPEAKER. Pursuant to House Resolution 235 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the consideration of the joint resolution, House Joint Resolution 187.

□ 1922

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the joint resolution (H.J. Res. 187) to approve the "Compact of Free Association," and for other purposes, with Mr. SABO in the chair.

The Clerk read the title of the joint resolution.

The CHAIRMAN. Pursuant to the rule, the first reading of the joint resolution is dispensed with.

Under the rule, the gentleman from Florida [Mr. FASCELL] will be recognized for 15 minutes, the gentleman from Iowa [Mr. LEACH] will be recognized for 15 minutes, the gentleman from Arizona [Mr. UDALL] will be recognized for 15 minutes, the gentleman from California [Mr. LAGOMARSINO] will be recognized for 15 minutes, the gentleman from California [Mr. DELLUMS] will be recognized for 15 minutes, the gentleman from Colorado [Mr. KRAMER] will be recognized for 15 minutes, the gentleman from Kentucky [Mr. MAZZOLI] will be recognized for 15 minutes, the gentleman from California [Mr. LUNGREN] will be recognized for 15 minutes, the gentleman from North Carolina [Mr. JONES] will be recognized for 15 minutes, the gentleman from New York [Mr. LENT] will be recognized for 15 minutes, the gentleman from Illinois [Mr. ROSTENKOWSKI] will be recognized for 15 minutes, and the gentleman from Tennessee [Mr. DUNCAN] will be recognized for 15 minutes.

The Chair recognizes the gentleman from Arizona [Mr. UDALL].

Mr. UDALL. Mr. Chairman, I yield such time as he may consume to the gentleman from Illinois [Mr. ROSTENKOWSKI].

Mr. ROSTENKOWSKI. Mr. Chairman, for purposes of clarification under the proceedings we are now following, it is my understanding that pursuant to the agreement between the Committee on Ways and Means and the Committee on Interior and Insular Affairs and the Committee on Foreign Affairs that the changes embodied in House Joint Resolution 355 are sufficient to obviate the need for the Interior substitute made in order under the rule. I would further add that changes embodied in House Joint Resolution 355 have been approved by the full Committee on Ways and Means unanimously.

Mr. Chairman, I would ask the gentleman from Arizona [Mr. UDALL] if that is his understanding of the procedure.

Mr. UDALL. The gentleman has stated the matter correctly. We did have some important negotiations today. I am glad to say that I am in agreement and that the mechanical way to handle it best seems to be through the offer of a revised resolution, House Joint Resolution 355.

Mr. ROSTENKOWSKI. I thank the gentleman.

Mr. UDALL. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, the legislation before you today would approve a compact of free association and thereby establish unprecedented relationships for our Nation with two parts of the Trust Territory of the Pacific Islands. Under this legislation the Federated States of Micronesia and the Marshall Islands would both become sovereign states freely associated with the United States.

The United States has administered these islands for the United Nations since 1947. The compact of free association proposed by the President would not grant them most powers of independence, decreasing but guaranteed financial assistance over a 15-year period and economic development incentives.

The Compact would also preserve United States strategic interests over a vast expanse of the central Pacific. The United States would be able to deny other nations strategic access to these areas and would obtain vital military base rights. These base rights are critical to the U.S. Missile Testing Program. Denial of strategic access takes on even greater importance in view of the new Soviet and Soviet bloc activity in some of the island nations near the Federated States of Micronesia and the Marshall Islands.

WHERE IS MICRONESIA?

What is commonly referred to as Micronesia consists of over 2,100 islands in the central and western Pacific 2,000 miles southwest of Hawaii. Altogether, they cover a portion of the globe slightly larger than the continental United States, although their land mass itself is minuscule. There are approximately 111,000 people living in this area.

Held by Japan, these islands were the scene of some of the bloodiest battles of World War Two—Truk, Yap, the Marshall Islands, and the Northern Marianas to name a few. Afterwards, they were assigned to the United States as one of 11 United Nations trusteeships. The only trusteeship still remaining—this trusteeship—was also the only one designated as strategic vesting jurisdiction in the Security Council rather than the General Assembly.

The trusteeship agreement approved by Congress in 1947 committed the United States to help develop Micronesia politically, economically, socially, and educationally toward self-determination. Since that time, the Committee on Interior and Insular Affairs has had sole jurisdiction over all matters regarding the trust territory, paralleling its jurisdiction over matters regarding all U.S. territories.

It is in this area that the U.S. Nuclear Weapons Testing Program has left a sad legacy which the committee that I chair believes must be addressed in this legislation.

In the early 1960's, President Kennedy, who had been shipwrecked in the islands, proposed that the United States live up to its commitment to develop Micronesia.

In preparation for an eventual end to the trusteeship, executive branch officials in 1969 began negotiations with Micronesian representatives on a future political status for the islands.

NORTHERN MARIANAS

Negotiations with one part of the trust territory, the Northern Mariana Islands, led to a covenant to make those islands a U.S. commonwealth which was approved by Congress in 1976.

FSM, MARSHALLS AND PALAU

The Federated States of Micronesia and the Marshall Islands—and a third entity, Palau—decided to become sovereign states on their own but closely associated with the United States through a unique free association relationship provided for by the United Nations.

A compact of free association was drafted during the previous administration and was flushed out with details set forth in subsidiary agreements during the Reagan administration. By large majorities, the Federated States of Micronesia and the Marshall Islands approved the agreement in plebiscites in 1983.

While these votes approved the proposed Compact in the Federated States of Micronesia and the Marshall Islands, a similar vote in Palau failed to obtain the 75 percent majority required by Palau's constitution, so a Compact for Palau was not submitted to Congress.

President Reagan proposed last year that the Congress approve a Compact for the Federated States of Micronesia and the Marshall Islands. Since then, our Public Lands Subcommittee has held an extensive series of 14 subcommittee hearings on the proposal and we held a full committee hearing on the impacts upon the territories, Commonwealths, and States of the United States.

In these hearings, the Committee found that many of the concerns that both Republican and Democratic members of the Committee had expressed over the years regarding the Compact had not been addressed and many deficiencies remained.

First. The compact did not adequately meet and discharge U.S. legal and moral obligations to the peoples of the Federated States of Micronesia and the Marshall Islands; and

Second. The compact was not drafted in such a way as to adequately take into account its potential adverse impacts on U.S. territories, Commonwealths, and States, and on the United States generally.

The U.S. obligations to these areas include providing essential infrastructure and ensuring educational opportunities, a decent place to live, and health care, particularly for individuals whose health has been adversely affected by our nuclear testing.

The legislation had other deficiencies with respect to trade and tax pro-

visions which were of concern to the Interior and Insular Affairs Committee as well as other committees. Additionally—

It would have either implicitly suggested that the U.S. territories could expect similar treatment in the future—at much greater costs—or it would have been fundamentally unfair to them by placing the FAS's in a status which was arguably preferable to territorial status.

It would have made possible a legal means of entry to the United States for citizens of other nations who cannot legally enter now.

It would have given the freely associated states authority and funds to regulate tuna fishing within 200 miles of their shores, authority the United States neither claims for itself, nor recognizes for other nations.

It would have created a potential tax haven where U.S. corporations and residents could get tax breaks that they could not get anywhere else in the world.

It would have offered manufacturers the cost advantages of being outside the United States, but with the trade benefits of being a U.S. territory that could undercut U.S. industries.

These problems have been resolved by our compromise substitute which is now incorporated into the bill which has been agreed to by Mr. UDALL and Mr. ROSTENKOWSKI.

KWAJALEIN

It is the Kwajalein lease which creates much of the pressure for expeditious action on this legislation. The current lease expires at the end of the fiscal year and would be renewed by the compact. It would be exceedingly difficult and costly to replace. Not renewing it would severely undermine our Nation's defense.

For all of these reasons, the Interior and Insular Affairs Committee sought to correct the compact's deficiencies without amending the compact itself. The bill we reported would provide conditional approval, requiring that additional bilateral agreements be negotiated, adding supplemental provisions, and including clarification of Federal policy that would control implementation of the compact.

Last week, members of the Interior and Insular Affairs Committee met with members of the Foreign Affairs Committee, which was the other committee to which the legislation was initially referred, over the course of several days, to attempt to resolve differences in the resolutions as reported by the two committees. These meetings led to the introduction yesterday of House Joint Resolution 344, with the cosponsorship of the chairmen of the Committees on Interior and Insular Affairs, Foreign Affairs, Armed Services, Merchant Marine and Fisheries, and other Members who had been instrumental in the consideration of this legislation, including several ranking Republicans.

The legislation we have before the House tonight is of great importance to this Nation and to the people of the Federated States of Micronesia and the Marshall Islands. The bill is the product of extensive hearings in the Committee on Interior and Insular Affairs and represents a compromise worked out between my committee and the Foreign Affairs Committee. In addition, this compromise includes a key provision from the Merchant Marine Committee and a number of important provisions which we attempted to work out which takes into consideration concerns of the Judiciary Committee.

A key disagreement which was remaining between our compromise substitute and the concerns expressed by the Ways and Means Committee in the bill offered by Mr. ROSTENKOWSKI has been resolved as best we can at this time. Our agreement reached late today regarding tax and trade matters assures that the FAS would receive the following benefits:

First. That U.S. citizens living and working in the FAS would receive the $80,000 exemption on their income that U.S. citizens living in any other foreign nation would receive.

Second. Freely associated state trade treatment would be equal to the general system of preferences [GSP] except that like under the Caribbean Basin Initiative they will be able to include U.S. components as a part of the 35-percent local content required under GSP.

Third. Section 936 of the Internal Revenue Code would be available to the FAS. In addition, if the Congress changes section 936 benefits, the FAS would continue to receive such benefits for 1 year after the effective date of such a change in the law regarding 936 benefits.

During that period of time the Secretary of the Treasury would be directed to negotiate with FAS an agreement which would provide the FAS substantially equivalent benefits to those they would have previously been receiving under section 936. The agreement resulting from such negotiations would be transmitted to the Congress for enactment into law. If the Congress has not enacted such a law by the time that the 936 benefits would cease for the FAS, they would, under appropriate provisions of the compact of free association, have a legitimate remedy of taking the matter to arbitration.

In addition, the chief sponsors of the Interior Committee/Foreign Affairs compromise substitute have agreed that they would yield to the Ways and Means Committee on the remaining tax matters in dispute which would include accepting the Ways and Means passive income provision, the Ways and Means estate and gift tax provision, the Ways and Means generation-skipping transfer tax provision, the Ways and Means information sharing provision, and the required reports provision.

Additionally, we would agree to drop sections 103, 170, 48 of the Internal Revenue Service Code from the compact.

I am one of the overwhelming majority of this House who have the highest regard for the leadership of the chairman of the Committee on Ways and Means on tax and trade matters. I do not differ with him on a solution to tax and trade problems casually.

In fact, the gentleman from Illinois and I agree on the tax and trade problems which the compact of free association—as it was originally proposed by the administration—would create.

The compact, as originally proposed to us, would have created a foolproof, low-rate tax haven for Americans seeking to avoid U.S. income taxation. It would have created the potential of unfair competition for U.S. industries from low-cost, passthrough manufacturers of foreign goods. It would have guaranteed loopholes in the tax laws for U.S. investors that were shut by the tax reforms of recent years.

The chairman of the Ways and Means Committee has been concerned about these problems since March 7. I ask unanimous consent to include in the RECORD at this point an excellent letter to you from him on the compact's tax and trade deficiencies.

COMMITTEE ON WAYS AND MEANS,
U.S. HOUSE OF REPRESENTATIVES,
Washington, DC, March 7, 1985.

Hon. THOMAS P. O'NEILL, Jr.,
The Speaker, U.S. House of Representatives, Capitol Building, Washington, DC.

DEAR MR. SPEAKER: It has come to my attention that House Document 99-29, a Message from the President of the United States transmitting a draft of a joint resolution to approve the Compact of Free Association for the Federated States of Micronesia and Marshall Islands, has been referred to the Committees on Foreign Affairs and Interior and Insular Affairs in the House of Representatives. The Compact of Free Association sets forth the anticipated future political relationship between the United States and the two mentioned political jurisdictions of the Trust Territory of the Pacific Islands.

Among its numerous provisions, the Compact includes major modifications to the Federal income tax laws. Article V of the proposed compact would provide that any individual, including a citizen of the United States, who is physically present in the Marshall Islands or the Federated States of Micronesia for a period of 183 days or more during the taxable year could be relieved of all U.S. tax liability. Such a provision would cause grave concern for potential U.S. tax avoidance. In addition, the Compact would provide that provisions of the Internal Revenue Code which were applicable to possessions of the United States on January 1, 1980, will be treated as applying to the Mar-

shall Islands and the Federated States of Micronesia. Since 1979 the Congress has adopted major amendments to at least one provision, the possessions tax credit, which was being utilized to avoid much U.S. tax and causing a major drain on the Federal revenue. Providing that this and other similar provisions will be reinstated in these territories would be directly opposite to actions taken by the Congress in the last few years. The Compact also provides that if the United States modifies any of the provisions in effect on January 1, 1980, an agreement would be negotiated to provide benefits substantially equivalent for the islands.

Mr. Speaker, I respectfully request sequential referral to the Committee on Ways and Means of any Joint Resolution to approve the Compact of Free Association. The Federal income and transfer tax provisions included in the Compact of Free Association are clearly within the jurisdiction of the tax-writing committees of this Congress.

Thank you for your consideration of this issue.

Sincerely yours,

DAN ROSTENKOWSKI,
Chairman.

Mr. Chairman, after our staffs brought to us draft language which was meant to reflect the agreement reached this afternoon with the Ways and Means Committee.

Unfortunately, there was a misunderstanding between the parties involved which led to the inclusion of a sentence which would effectively amend section 255(c) of the compact. That sentence reads, "Any decision of such Board in the matter when approved by law shall be binding on the United States." Our intention was not to require that decisions of the arbitration board be subject to approval by Congress. It was also our intention that a decision of the board should not be construed as changing the tax laws of this Nation. That obviously is a matter for action only by the Congress. The concept we were attempting to incorporate was that the arbitration provisions of the compact were to be employed if an agreement between the Department of the Treasury and the FAS's could not be reached by the end of 1 year from the effective date of the tax change.

Rather than attempting to correct this misunderstanding in the agreement at this time, I have agreed that it should be accomplished in conference with the Senate.

Another key aspect of the overall approach which we are discussing here today is to keep faith with our U.S. territories and commonwealths with respect to the economic incentives which they need to continue to develop economically. Members of my Committee and I feel very strongly that as deeply as we feel about our obligation to provide economic incentives to the people of the FAS, we also feel that this Nation should treat its own territories essentially as well as it is willing to treat the FAS with respect to taxation.

I certainly am strongly opposed to any abuses under the existing law and would support ways of correcting any abuses. However, I am also fully committed to do everything in my power to assist the territories which are under the jurisdiction of the Committee on Interior and Insular Affairs continue to have equitable treatment in terms of investment incentives under the Tax Code.

In particular, I hope that others of my colleagues will join with me in the future at such a time as the Congress considers any changes to section 936 and other benefits for territories and commonwealths of the Untied States to continuing, if not 936 as it is today, fair and equitable taxation treatment, including investment incentives, of our members of the American political family. I believe that the consideration process should provide our territories and commonwealths with an opportunity to fairly state their case and receive an individual decision on it in this House.

It is my hope that the chairman and members of the Committee on Ways and Means will give careful and sympathetic consideration to the concerns and interests of our U.S. territories and commonwealths to assure that they are treated fairly in relation to these new freely associated states in terms of tax benefits and other economic development incentives. We agreed to compromise our language on this issue only because we felt that the justice of this position would ultimately be realized.

Aside from these few provisions regarding tax and trade matters, the great extent of the bill is a blend of the Interior and Insular Affairs and Foreign Affairs Committees bills and is the basis of what I believe is a fair and equitable resolution of fulfilling our responsibilities to the people of the Federated States and the Marshall Islands and to the citizens fo the United States.

I urge my colleagues to join me in approving the compromise of the Interior and Insular Affairs and Foreign Affairs Committees together with the provisons I outlined which have been worked out this afternoon with the Ways and Means Committee.

U.S. PACIFIC COMMAND,
CAMP H.M. SMITH, HAWAII,
24 July 1985.

Hon. THOMAS P. O'NEIL, Jr.

DEAR MR. SPEAKER: As Commander of U.S. forces in the Pacific and as someone who has been involved for a number of years in the negotiations to terminate the trusteeship over the islands of Micronesia, I have followed with great interest the Congress' consideration of the proposed Compact of Free Association between the United States and the Marshall Islands and Federated States of Micronesia. I was concerned to learn recently that the Compact Legislation which is expected to be brought to the floor of the House of Representatives is likely to include amendments that would largely eliminate the Compact's favorable trade and taxation provisons.

From my point of view, the security aspects of the Compact are of great importance to our posture in the Pacific. The delegation of defense responsibilities and authority to the U.S. together with the provisions that the freely associated states will refrain from any action the U.S. determines to be inconsistent with defense and security requirements, provide the latitude needed to support our security interests. In addition, the Compact forecloses Micronesia to the military forces of third nations, guarantees our military forces unrestricted movement within Micronesia, and ensures continued access to the important missile testing facility at Kwajalein.

In return for these important defense rights, the Compact commits the United States to provide not only significant economic assistance but also favorable trade and tax arrangements. I regard these latter provisions as especially important, as they are designed to assist the Micronesian states to overcome the natural obstacles to development these small islands face and to move towards greater self-sufficiency. For this reason, I believe that they are also of particular importance to the Micronesian leaders. Removal or weakening of those beneficial trade and tax provisions would thus eliminate a key element of our agreement with the Micronesians. I hope that we will not jeopardize the important security benefits of the Compact by taking this step.

I understand that during full House debate, an amendment is likely to be offered that would restore to the Compact Legislation the trade and tax provisions contained in the bill as agreed to by the Interior and Foreign Affairs Committees. In the interests of our security posture in the Pacific, I believe this amendment should receive broad support.

I hope these views can be shared with the members of the House. Please let me know if I can be of assistance to you or other members on this matter.

Warmest regards,

W.J. CROWE, JR.,
Admiral, U.S. Navy.

THE SECRETARY OF STATE,
Washington, DC, July 25, 1985.

Hon. THOMAS P. O'NEILL, JR.,
Speaker, House of Representatives, Washington, DC.

DEAR MR. SPEAKER: The House of Representatives is about to take a historic vote on the Compact of Free Association. We sincerely appreciate your efforts and those of the Chairmen and members of the Committees with primary and sequential jurisdiction in securing a compromise version of the Compact joint resolution and in agreeing to schedule it for early floor action. The painstaking hours spent particularly by the members of the Subcommittees on Asian and Pacific Affairs and Public Lands are a tribute to Congressional commitment to self-determination for the peoples of the Marshall Islands and the Federated States of Micronesia.

The Administration believes that the version of the Compact legislation to be offered as a substitute (H.J. Res. 344) by the Foreign Affairs and Interior Committees is a compromise that preserves the important national security elements of the Compact, and we urge its approval. However, a number of provisions, principally those that would continue or create expensive federal programs, go beyond what was negotiated in

the Compact. Further, the inclusion of reference to the United States territories in the investment incentives section is inconsistent with the President's tax reform proposal.

It would be particularly dangerous and unwise for the House to enact the Ways and Means Committee bill (H.J. Res. 343), which eliminates from the Compact critical and carefully negotiated development incentives designed to encourage U.S. economic activity in these resource-poor areas—favorable tariff treatment for goods imported into the United States and the exclusion of certain amounts of earned income from U.S. tax if earned by a U.S. citizen residing in Micronesia. The Micronesian states have advised us in writing that they cannot accept the Ways and Means version. This in turn would prevent termination of the Trusteeship Agreement and would place at risk our present defense and security operations at the Kwajalein Missile Range and throughout the area.

We look forward to recommending Presidential approval of the Compact of Free Association, as enacted by Congress, at an early date in order to allow for implementation by the beginning of the next fiscal year. The Office of Management and Budget has no objection to this letter and concurs in the views expressed herein.

Sincerely,

GEORGE P. SHULTZ,
Secretary,
CASPAR W. WEINBERGER,
Secretary of Defense,
DONALD PAUL HODEL,
Secretary of the Interior.

THE SECRETARY OF COMMERCE,
Washington, DC, July 25, 1985.

Hon. THOMAS P. O'NEILL,
Speaker, House of Representatives, Washington, DC.

DEAR MR. SPEAKER: Recognizing the long-range national security and fiscal benefits of the Compact of Free Association [H.J. Res. 187] for the United States, the Administration was pleased to learn that an agreement has been reached by the Committee on Interior and Insular Affairs and the Committee on Foreign Affairs with respect to this legislation.

The Committee on Ways and Means has also reported a version of H.J. Res. 187. This version would eliminate the development incentives which were included in the Compact to encourage economic growth in Micronesia and reduce dependence on United States Government spending. These incentives for development constitute an important part of the value of the negotiated package to the Micronesian governments. While recognizing the need to conform these provisions to the President's tax reform proposal, the Administration supports enactment of the Compact with trade and tax incentives consistent with the development goals of the negotiated Compact.

The earliest possible approval and implementation of the Compact in a form which can be implemented promptly is essential in achieving our goal of reducing the cost of government and promoting domestic and international economic growth. Above all, however, the Compact is essential to our national security and foreign policy interests in the Pacific. I hope that H.J. Res. 187 is passed in a form consistent with the concerns I have expressed above.

Sincerely,

MALCOLM BALDRIGE,
Secretary of Commerce.

FEDERATED STATES OF MICRONESIA,
KOLONIA, PONAPE, EASTERN CAROLINE ISLANDS,
July 23, 1985.

Hon. RONALD REAGAN,
The White House,
Washington, DC.

DEAR MR. PRESIDENT: On September 8, 1983, I had the honor and pleasure of advising you that the people and governments of the Federated States of Micronesia had completed the process of approving the Compact of Free Association signed by our respective representatives on October 1, 1982. I was also proud to have informed you that my people, in a United Nations-observed plebiscite, had voiced their overwhelming support for a continued close relationship with the United States after termination of the 1947 Trusteeship Agreement.

Now, almost two years later, the governments and people of the Federated States of Micronesia are in a state of frustration, shock and despair. Last Thursday, the House Ways and Means Committee repudiated a fundamental principle of the Compact by eliminating the agreed tax and tariff incentives needed for development of our nation's economy in cooperation with the United States.

We had relied on a concerted effort by the administration to have the Compact approved expeditiously and to achieve accommodation of congressional concerns within the framework of the negotiated Compact without amending, or effectively amending the document itself. Indeed, we must recognize those members and staff of the Foreign Affairs and Interior & Insular Affairs Committees in the House who have achieved a consensus to present to the Full House. While we have not had an opportunity to review this consensus, we understand that the Committees considered carefully our comments on the prior versions of the amendments, and hope that deleterious amendments have been either eliminated or revised.

It is nothing short of tragic that on the very day this consensus was reached, the House Ways and Means Committee approved a set of amendments which would repeal the tax and trade benefit sections of the Compact.

Incredibly, such actions appear to have been taken with no regard for anything other than the parochial considerations of today's U.S. tax policy. It is bad enough that the Ways and Means Committee gave no weight to the broad policy considerations that guided the Compact negotiations, but it is even worse the Committee's action was openly encouraged by the U.S. Treasury Department, an organ of your administration. We are totally at a loss to understand how this could have been allowed to happen, much less explain it to our people. Questions are now being raised about the good faith of the United States Government, even by some of the most ardent advocates of the Compact during the negotiations and FSM approval process.

The trade and tax benefits package in the Compact is essential if U.S. business is to participate significantly in the FSM's development during the next fifteen years, at costs which maximize the value of Compact dollars. It is just as true today as it was on October 1, 1982 that the future stability of the emerging governments in this region cannot be subordinated to overall tax or territorial policy concerns. Nevertheless, the Ways and Means Committee, in forty-five minutes, destroyed a carefully conceived balance between grants and development incentives which took almost twenty years of planning and negotiations to achieve.

We can only hope that during the final stages of congressional consideration your administration will unite to turn aside the Ways and Means action and resolve any outstanding problems in the House Foreign Affairs/Interior consensus. If that cannot be done, we will be confronted by what had been feared most, fundamental and destructive changes in the Compact as approved by our people. We have come too far to turn back now. We cannot continue to live under the Trusteeship, nor can we accept a free association relationship with the United States, which fully protects United States interests, but denies our people genuine hope for future progress and development. We ask that our administration demonstrate, now before it it too late, your commitment to a continued close relationship with the Federated States of Micronesia.

Sincerely,

TOSIWO NAKAYAMA,
President.

THE MARSHALL ISLANDS,
July 24, 1985.

Hon. RONALD W. REAGAN,
President, United States of America, White House, Washington, DC.

DEAR MR. PRESIDENT: We in the Marshall Islands are pleased that progress is being made by the House Committee on Foreign Affairs and the House Committee on Interior and Insular Affairs in their consideration of the Compact of Free Association. Although we continue to have serious objections to, and reservations concerning, amendments to the Compact which infringe upon our internal affairs, we are encouraged by the progress which is being made.

In view of such progress, we are deeply disappointed by the amendments to the Compact which were adopted last Thursday by the House Committee on Ways and Means. The Ways and Means amendments would, if finally adopted, substantially diminish the value of the economic assistance package provided under the Compact. The amendments eliminate important trade and tax provisions which are needed to encourage United States individuals and companies to invest in the Marshall Islands. Without these provisions, or their equivalent, we will not be able to obtain the economic self-sufficiency we seek. We would become no more than a welfare state, dependent upon the United States for hand-outs. This is not in the best interest of either of our two countries, nor is it acceptable to my people.

We were particularly disappointed to learn that at the Ways and Means hearing, the administration witness from the Department of the Treasury did not support the trade and tax provisions of the Compact. These provisions were carefully negotiated over the course of several years. The failure of the Treasury witness to support the trade and tax provisions of the Compact raises serious doubts in the minds of my people as to the willingness of the United States to honor its Compact commitments.

If we can, we wish to assist you achieve a more efficient tax system and so strengthen the economy of the United States. However, we must also have the benefit of the trade and tax provisions that we negotiated. These benefits are essential to our economic development.

We in the Marshall Islands wish to ally ourselves with the United States. We are

prepared to enter into a long term relationship with your country which accommodates your defense and security needs. This would include your continued use of the Kwajalein Missile Range beyond 30 September of this year. However, my people and my government will not, as some in Washington, D.C., suggest, take whatever we are given by the United States. We must have a relationship which recognizes the sovereignty and integrity of our government and which assists us attain greater economic self-sufficiency.

Sincerely yours,

AMATA KABUA,
President.

Mr. UDALL. Mr. Chairman, I yield 5 minutes to the gentleman from Ohio [Mr. SEIBERLING].

Mr. SEIBERLING. Mr. Chairman, the compact of free association is a legislative proposal of a most unusual nature. This is not an ordinary bill, but rather is a document which establishes the fundamental political relationship between the American people and the people of two areas in Micronesia who have been closely linked to the United States since the end of the Second World War.

The two Micronesian areas involved here are the Federated States of Micronesia and the Marshall Islands. These areas are part of the strategic Trust Territory of the Pacific Islands. The United States administers the trust territory now, and has done so since 1947, under a trusteeship agreement with the United Nations. In fact, this trusteeship is the last one remaining in the world.

The compact of free association before us today is the indispensable prerequisite for moving toward ending the trusteeship. It would put our relationship with these Micronesian areas on an entirely different footing, for it would move them toward full sovereignty and independence, while still assuring them of a continued special relationship with the United States, with whom they have such important links.

Mr. Chairman, other speakers will explain in detail the importance of the compact in terms of the defense and security interests of the United States. The compact does indeed protect those interests. But as proposed by the administration, the compact was deficient in another area which I submit is equally important—that is, the area of responsibilities of the United States toward the people of Micronesia.

It was because of these deficiencies that the Committee on Interior and Insular Affairs—and in particular the Subcommittee on Public Land which I Chair—believed it necessary to supplement the provisions of the compact as proposed to make sure that our responsibilities were as well discharged as our security interests were protected.

Similarly, the Interior Committee recognized that the compact as proposed would have been detrimental to U.S. interests and especially of the territories and commonwealths of the United States, and so we acted to make sure that the United States and its territories and commonwealths would be protected.

I am happy to be able to say, Mr. Chairman, that the essential features of the version of the compact reported by the Committee on Interior and Insular Affairs are in the Udall-Fascell substitute to be offered by the distinguished chairman of our committee, Mr. UDALL, a substitute which I very strongly support and which I urge all our colleagues to support.

However, there are some differences between the provisions of the Udall substitute—House Joint Resolution 344—and the bill as reported by the Committee on Interior and Insular Affairs, and I will now include in my remarks an explanation of some of the parts of the compromise which differ from the reported version.

UJELANG/EJIT

During the U.S. nuclear testing program in the Marshall Islands in the 1940's and 1950's, the people of Enewetak were deported to the small atoll of Ujelang, some 125 miles southwest of Enewetak. They lived there for 33 years. The atoll, which had been abandoned because it was so inhospitable, was vacant at the time the Enewetak people were settled there. The United States, as administering authority for the Trust Territory of the Pacific Islands, granted the people of Ujelang a quitclaim deed to the atoll as a form of partial compensation for the U.S. use of Enewetak. The purpose of section 3(d) of the resolution is to reaffirm the right of the Enewetak people who live on Ujelang to remain there and to impose on the Government of the United States and the Marshall Islands an obligation to make certain that the people involved are permitted to remain on Ujelang or are otherwise adequately cared for.

The same principle applies to the Bikinians who are presently living on Ejit Island. These 100 or so Bikini people are those who were prematurely moved to Bikini Island in the late 1960's after President Johnson announced that Bikini was again safe to inhabit. In 1978, it was discovered that the radiation levels in these Bikinians were above what was considered an acceptable level. They were therefore once again removed from Bikini, and the Trust Territory of the Pacific Islands government—part of the Interior Department—settled these people in Ejit. In the event legal impediments to such continued use arise out of a judicial determination by a Marshallese court of competent jurisdiction, the United States will cooperate with the government of the Marshall Islands in assisting those persons adversely affected to remain on Ejit or to locate suitable and appropriate alternative land elsewhere. Should the latter occur, it is expected that the Marshalls government will both consult with and obtain the approval of the Bikini people.

KWAJALEIN PAYMENTS

The Interior and Insular Affairs Committee has long been deeply concerned about the displaced Kwajalein people living on Ebeye. The United States has removed these people from their islands in Kwajalein Atoll in order to use the land for military purposes. In the compact of free association, the United States has provided funds to pay the Kwajalein people for use of their land and to continue to help improve the conditions on Ebeye.

Subsection 103(d) deals with the payments to be made to the landowners of Kwajalein Atoll. Under this subsection, the United States shall make payments to the government of the Marshall Islands for payment to the Kwajalein landowners, as contemplated by the land use agreement between the government of the Marshall Islands and the Kwajalein Atoll Corp. dated October 19, 1982. The subsection specifies the amounts to be paid annually while the compact and the military use and operating rights agreement [MUORA] are in force.

The subsection provides that if the government of the Marshall Islands fails to make the required payments within 14 days of receipt of funds and the United States determines the failure is not justified, the United States shall deem such failure to make payments a material breach of the U.S. security and defense authority under the compact. While the subsection does not define the circumstances under which failure to pay would be justified, it is implicit that only very extraordinary circumstances, such as a court order requiring the government of the Marshall Islands to withhold payment, would constitute justification for failure to pay.

Under this subsection, a failure to pay dispute shall be resolved pursuant to the provision of section 313 of the compact. If the United States determines that the government of the Marshall Islands has materially breached the compact, the United States shall take all steps necessary, including—but not limited to—withholding funds, to ensure that the government of the Marshall Islands meets its obligation to make payments under this subsection.

The subsection also authorizes the Secretary of the Treasury to make interest free loans secured by future payments—in effect, advances against future payments—to the government of the Marshall Islands only for use by the Kwajalein Atoll Development Authority for the benefit of the Kwajalein landowners. It is implicit in this section that any failure on the part of

the government of the Marshall Islands to make timely request of the Secretary of the Treasury or to make timely payment of loan funds to the Kwajalein Atoll Development Authority will be of grave concern to the Govrenment of the United States, because such a failure would be contrary to the intent of Congress in including the loan authorization provision in this subsection. Accordingly, the Congress certainly expects that the appropriate U.S. officials would act vigorously to prevent or remedy such obstacles to smooth implementation of this subsection, and thus to fulfill their responsibilities under the law.

SECTION 177 AGREEMENT

The compromise version's provisions—in section 103(e)—regarding the mechanism for start-up of the fund established by article I of the subsidiary agreement for implementation of section 177 of the compact differ in a few regards from the similar provisions of the version reported by the Interior Committee. However, the compromise's changes do not reflect any lessening of the intention that the fund be managed only by a competent fund manager meeting the requirements specified in the subsidiary agreement.

AGRICULTURAL AND FOOD PROGRAMS

For the first 5 years after the effective date of the compact, the Secretary of Agriculture shall provide technical and other assistance to: First, continue the planting and agricultural maintenance program on Enewetak; second, continue the food programs of the Bikini and Enewetak people described in section 1(d) of article II of the section 177 subsidiary agreement; and third, provide for continued waterborne transportation of agricultural products to Enewetak including operations and maintenance of the vessel used for such purposes.

The resettlement of Enewetak continues to require on an interim basis, that the United States provide a food supplement program until such time as the food-bearing trees planted after the cleanup begin bearing in sufficient quantity to support the local population. To date, despite the fact that there is an extensive replanting program on Enewetak, the locally produced food is insufficient to feed the Enewetak people. This is why both the USDA food and the fresh food transported to Enewetak by the Enewetak boat are essential to the health and well-being of the Enewetak people. Like the Enjebi Community Trust Fund, continuation of this program is necessary if the United States is to make good on its promises to allow the people displaced by the nuclear testing program to return to a life style as close as possible to the one they had before the nuclear testing.

Similarly, the food program for the Bikini people, some of whom live on Kili and some of whom are located on Ejit, must be continued for the near future. Additionally, for those Bikinians who eventually move back to Bikini, once the cleanup has been completed, a food supplement program may be necessary for many years to come.

For this reason, it is the intent of Congress that before the 5 years provided for in this subsection have ended, the food situation as regards the Bikinians and the Enewetak people must be reexamined to see if the food program, the planting program and the support of the Enewetak boat should be continued and if so, for what period of time.

While the intent of this provision on Rongelap has not changed in the compromise bill before us, it is now the Marshalls government that is responsible for seeing that funds from section 1(e) of article II of the section 177 subsidiary agreement shall be used to determine if Rongelap Island is safe for the Rongelap people to live on. From this section, which provides a total of $1 million annually for each of 3 years, it is expected by the Congress that the Marshalls government shall use such funds as are necessary—not to exceed $500,000—to contract with a qualified U.S. scientist or group of scientists—such as the National Academy of Scientists—to review data collected by the Department of Energy relating to radiation levels and other conditions. The purpose of the review is to determine habitability of Rongelap Island, as set forth in a DOE report cited in House Report 99-188, part 2, are adequate and whether the conclusions are fully supported by them. All of this of course, is to be done in consultation with the people of Rongelap.

Should the review conclude that the DOE data is inadequate to support such conclusions or that such conclusions as to habitability are not fully supported by the data, the Marshalls government shall then contract with an appropriate U.S. scientist or group of scientists, not connected with any government agency, to undertake a complete survey of radiation and other effects of the nuclear testing program relating to the habitability of Rongelap Island. The legislation authorizes such sums as are necessary for such survey and report to be made available to the Marshalls government.

Finally, this subsection (103(i)) expresses the intent of the Congress to take whatever steps are necessary to restore the habitability of Rongelap Island and return the Rongelap people to their homeland.

FOUR ATOLL HEALTH CARE PROGRAM

Section 103(j) of the compromise deals with the four atoll health care program in the Marshall Islands. The subsection provides that money provided to the Marshall Islands under section 1(a), article II, of the subsidiary agreement for implementing section 177 of the compact is to be used only for services provided by the U.S. Public Health Service or any other U.S. agency to the peoples from the four atolls of Bikini, Enewetak, Rongelap, and Utirik and their descendants pursuant to Public Laws 95-134 and 96-205. Only if other individuals are identified through the means contained in those statutes, would they be eligible for this health care program.

In the meantime, the inauguration of the four atoll health care plan under Public Law 96-205 is about to formally begin in the Marshalls. A contract of $3.8 million was awarded by the Interior Department to the firm of John Short & Associates, Inc., earlier this year and a contract between the two parties was signed on March 13, 1985. The program should be in operation shortly and continue for 3 or 4 years until the money runs out.

Operating simultaneously is the Department of Energy program that provides special medical care and logistical support thereto for the Rongelap and Utirik people who suffered the consequences of direct radioactive fallout. Under the subsection 103(h), this program would continue to operate for another 11 years. At the end of the 11 years, funding for its continuation should come from section 1(a), article II, of the subsidiary agreement to implement compact section 177 unless the U.S. Congress extends the Department of Energy program.

At the end of the 15-year period when section 177 of the compact ends, it is expected that both the four atoll health care program, which provides primary, secondary and tertiary care for the peoples from the four atolls as well as their descendants, and the Department of Energy special medical program for the fallout victims from Rongelap and Utirik will continue to be funded indefinitely from the trust fund being built up by the fund manager. That is why it is important that the money provided under the subsidiary agreement be allowed to remain in the trust fund with the fund manager until such time as the John Short program expires. Congress did not intend to have two programs providing the same services to the same people at the same time, and certainly it would be in the interests of the Marshall Islands to instruct the fund manager to avoid such needless expenditures by delaying disbursements for this purpose until the present contract runs its course.

ENJEBI COMMUNITY TRUST FUND

Section 103(k) of the compromise establishes the Enjebi Community Trust Fund, which is to be used to complete the resettlement and rehabilitation of Enewetak Atoll, the site of over 40 nuclear tests in the late 1940's and 1950's. In the late 1970's, the United

States conducted a massive cleanup of Enewetak Atoll and built new homes and community facilities for the Enewetak population on the islands of Enewetak, Medren, and Japtan in the southern part of the atoll. The only major residential island which has not been rebuilt and resettled is Enjebi, ground zero for many of the tests, which is located in the northern part of the atoll. At the time of the cleanup, and at a number of times since, the United States has told the people of Enjebi that they could return to their island once it was safe for them to do so. The question as to whether it is now safe for them to return, and if so, under what circumstances, are matters of ongoing discussion and investigation. Since it appears unlikely that the question of when the people can return will be decided before the compact becomes effective, the sum of $7.5 million has been included in the compact to carry out the often announced intention of the United States to fund the resettlement. This money, together with $2.5 million for the initial installment of the resettlement fund contained in the fiscal 1986 Interior Department appropriations bill, will be adequate, when properly invested, to provide the funds necessary to build the houses and community facilities—a dock, school, dispensary, meeting place and other buildings—essential to community life.

Included in this subsection is a provision authorizing the United States to provide, at the request of the Marshall Islands government, technical assistance to enable the Marshalls government to monitor the radiation and other conditions on Enjebi Island. We would note that there is nothing here that would prevent the Marshalls government from also requesting technical assistance from the United States to help in the construction of the Enjebi community facilities, houses, and whatever else will be needed for the people of the island. We would therefore urge the Marshalls government generally to take advantage of this offer of technical assistance for all phases of work involved in returning the Enjebi people to their homeland.

In addition to the community facilities and the agricultural maintenance program which are explicitly provided for, it is the committee's view that the funds appropriated may be used to provide a food supplement program until such time as the locally produced foods are found to be completely safe for incorporation into the local diet.

Enjebi resettlement, like the Bikini resettlement, is one of two major outstanding items of unfinished U.S. business from the nuclear testing perod. In our view the United States has an obligation to complete the resettlement of these places. With the advent of the compact, and the period of free association, it is necessary that the government of the Marshall Islands take some responsibility for completion of these projects. Nevertheless, it is our intention to monitor these projects and to make sure that our expectations for the resettlement of Enjebi and Bikini are realized. The committee expects the government of the Marshall Islands to work closely with the Enjebi people in bringing about the successful conclusion of this project. With this in mind, we encourage the members of the Enewetak Council and their representatives as well as the Marshalls government to keep us informed as to the progress of the resettlement project.

BIKINI ATOLL CLEANUP

Subsection 103(1) ensures that the legacy of the U.S. nuclear testing program at Bikini—which comprised 23 announced tests, or devices, as they were called—will not be forgotten. First, it reinforces with Federal legislation the terms of a March 13, 1985, settlement agreement terminating the Bikinians' lawsuit against the United States, pursuant to which the United States will provide funds under article VI, section 1 of the section 177 agreement for the radiological cleanup of Bikini Atoll. A plan for the use of the cleanup funds will be developed by the U.S. Government in consultation with the government of the Marshall Islands and, in accordance with its authority under the Marshall Islands Constitution—especially article IX—the Bikini/Kiki/Ejit Local Government Council. The cleanup funds will be technically appropriated to the government of the Marshall Islands, but the clear understanding of Congress, the executive board, the Marshall Islands government and the Bikini/Kiki/Ejit Local Government Council is that these funds will be passed through directly to a trustee, in the form of a U.S. financial institution, which will hold the funds in trust on behalf of the Bikini/Kili/Ejit Local Government Council for the cleanup. This passthrough mechanism will be the subject of an agreement or protocol to be negotiated between the government of the Marshall Islands and the Bikini/Kili/Ejit Local Government Council and will be similar, in an accounting and fiscal sense, to the October 19, 1982, land use agreement between the government of the Marshall Islands and the Kwajalein Atoll Corp.

FISHERIES MANAGEMENT (AND RELATED MATTERS)

The compromise includes the provisions dealing with fisheries management recommended by the Committee on Merchant Marine and Fisheries discussed—under the heading "Section 4"—on pages 12 through 15 of that committee's report—House Report 99-188, part 3. These provisions are very similar to those which had been included as section 4(i) in the version reported by the Committee on Interior and Insular Affairs. The compromise also includes the provisions dealing with the U.S. Fish and Wildlife Service, the U.S. Coast Guard, and user fees recommended by the Committee on Merchant Marine and Fisheries and discussed—under the heading "Section 5"—on pages 15 through 17 of that committee's report. The fisheries management provisions are section 105(f) of the compromise and the Fish and Wildlife, Coast Guard, and user fee provisions are sections 105(x), 105(y), and 105(z) of the compromise, respectively.

RELATIONS WITH THE FEDERATED STATES OF MICRONESIA AND THE MARSHALL ISLANDS

The Interior Committee's reported version assigned the major responsibilities for implementation of the compact and associated legislation to the Secretary of the Interior. The compromise provides that the Secretary of State shall be responsible for the government-to-government relations between the United States and the Mirconesian governments, while the Secretary of the Interior shall be responsible for the program assistance provided to the Micronesian areas.

REGISTRATION OF U.S. CITIZENS WORKING FOR MICRONESIAN GOVERNMENTS

The compromise language reflects changes made to make even clearer the intent of the Interior Committee's version; namely, that U.S. citizens, acting on behalf of the Mirconesian governments in ways that are covered by the Foreign Agents Registration Act, must comply with the requirements of that act to the same extent as U.S. citizens carrying out the same activities on behalf of other foreign governments.

NONCOMPLIANCE AND FULL FAITH AND CREDIT

The compromise does not extend the pledge of full faith and credit of the United States to the additional portions of the compact to which such a pledge would have been extended by the version reported by the Interior Committee. The compromise also does not include an explicit prohibition of lawsuits aimed at blocking or overturning the President's imposition of sanctions after a duly constituted arbitration board has found either or both of the Micronesian governments to be guilty of a material breach of the compact. However, neither this revision nor anything in the compromise is intended to enlarge the scope of judical review currently applicable to any such decision of an arbitration board under existing law or established doctrines, policies, or practices of the U.S. courts.

COLLEGE OF MICRONESIA; EDUCATION PROGRAMS

Subsection 105(j) now provides for specific levels of funding for the 3 years during which U.S. Federal education programs will be extended to the FSM and the Marshalls. For the

fiscal year in which the compact becomes effective, programs totaling $13 million shall be provided; for the next fiscal year a total of $8.7 million will be available; and in the third year $4.3 million is the sum total. After the 3-year period is up, these governments may request that any of these education programs be made available to them, on a reimbursable basis.

The committee encourages the FSM and Marshalls government to use a good percentage of the 3-year funding for postsecondary education needs since there are already plans to use portions of the annual grants for elementary and secondary education.

PRIOR SERVICE BENEFITS PROGRAM

The Prior Service Benefits Program, continuation of which is provided for in section 105(r) of the compromise, was established to provide monthly benefits for services rendered to the U.S. Navy or the Trust Territory of the Pacific Islands government prior to July 1, 1968. The number of beneficiaries in 1983 numbered 661—this is a closed group therefore ever declining—and the average monthly benefit at that time was $32.

Because this was a program created by the U.S. Government for the benefit of people who had worked for the U.S. Government, it was felt by this committee that the U.S. Government should continue to fund the program.

Because the Interior appropriations bill for fiscal 1986 contains $142,000 in funding for the program in that fiscal year, no money under the compact shall be available for it until the following year, fiscal 1987. At that time, the Appropriations Committees, in consultation with the Department of the Interior, shall determine the method by which this program shall continue to be funded by the U.S. Government, whether by annual payments, as have occurred to date, or by establishing a trust fund in the U.S. Treasury.

We are informed by the former Chief Actuary of the U.S. Social Security system that in his opinion the:

Best procedure would be the immediate payment of $15 million into a Prior Service Benefits Funds newly established within the U.S. Treasury and operated in the same manner as the U.S. Social Security trust funds. Because such operation would be within the U.S. Unified Budget, the budgetary effect of such action in. . . (a fiscal) Budget would be increased expenditures of only about $300,000, not $15 million.

However it is done, we are hopeful that some practical plan will be put into effect by fiscal 1987 so that the benefits of this program will flow uninterruptedly to the recipients.

LIMITATIONS—SECTION 107

The compromise alters the "revolving door" provisions of the Interior Committee version by providing that persons who have served as the President's personal representative for Micronesian status negotiations—and the other officials of the Office of Micronesian Status Negotiations—will be subject to the restrictions of existing law, except that the prohibition against certain appearances or actions specified in the Ethics in Government Act (18 U.S.C. 207(b)) will continue for 5—rather than 2—years after the end of the relevant period of employment. Also, OMSN is to be abolished only when the trusteeship is terminated with respect to Palau.

BUILDING OF CAPITOLS

The provision in the bill reported out of the Interior and Insular Affairs Committee to provide money for the building of the capitols in the FSM and the Marshalls has been deleted. This does not in any way indicate a change of mind on the part of this committee. What it does is recognize the fact that the Interior appropriations bills for fiscal year 1986, reported out of the House Appropriations Committee the week of July 15, contains the remainder of the money committed by the U.S. Government for the FSM capitol as well as that owed to the Marshalls for theirs. It is assumed by this committee that this money will remain in the appropriations bill until signed into law and be available to these governments for their use in fiscal 1986, thus eliminating the need for the provision in the compact legislation.

CONSULTATION ON FOREIGN AFFAIRS

Also deleted from the compromise was the provision of the Interior Committee version dealing with the procedures to be followed by the Micronesian governments in complying with the compact's requirement that they consult with the United States in the conduct of their foreign affairs. The deletion was agreed to because of assurances by the executive branch that there were adequate tools available to see to it that the compact requirements would be complied with.

Mr. YOUNG of Alaska. Mr. Chairman, will the gentleman yield?

Mr. SEIBERLING. I yield to the gentleman from Alaska.

Mr. YOUNG of Alaska. Mr. Chairman, I would like to engage the gentleman from Ohio in a colloquy.

Mr. Chairman, we have included in this bill a requirement that construction projects aggregating $1 million or more be awarded only to bona fide U.S. and local Micronesian and Marshalls contractors, provided that the lowest U.S. or local bid is within 20 percent of the Government estimate for the project. Along those lines, we expect the United States to provide to those governments such technical assistance as is necessary to enable them to make accurate estimates of the cost of such projects.

To protect against the undesirable possibility of foreign contractors fronting as U.S. or local firms to secure these construction contracts, we have included definitions of U.S. and local contractors.

□ 1930

For instance, a local contractor's assets must be at least 60 percent owned or controlled in fact by citizens of the Federated States of Micronesia and the Marshalls.

I wonder whether the Chairman could provide a clarification here. I am wondering whether the phrase "owned or controlled in fact" will prevent foreign firms from forming shell corporations by means of two-tiered stock ownership schemes or the liberal citizenship requirements in the Freely Associated States for the purposes of disguising themselves as local companies?

Mr. SEIBERLING. Yes; I believe we have acted to limit foreign firms from qualifying as local companies. Any effort to get around this through creative stock structure or the like would be a clear circumvention of the intent of the legislation. In developing definitions of U.S. and local firms, we borrowed heavily from the policies of the Agency for International Development [AID]. AID defines asset ownership as ownership of each class of stock or partnership interest and that is what we mean here.

Mr. YOUNG of Alaska. I thank the Chairman for that clarification because I don't want any loopholes in the contract preference provision through which a creative foreign company could get these contracts. We have directed the President to issue regulations to implement this preference, and I want to be sure the regulations prevent foreign firms from passing themselves off as Americans or local firms.

PARLIAMENTARY INQUIRY

Mr. MAZZOLI. Mr. Chairman, would it be in order at this point to yield myself 2 minutes of the time which I control in order to engage the gentleman in a colloquy?

The CHAIRMAN. The gentleman from Kentucky is recognized for 2 minutes.

Mr. MAZZOLI. Mr. Chairman, would the gentleman from Ohio engage the gentleman from Kentucky in a brief colloquy?

Mr. SEIBERLING. I would be happy to do that.

Mr. MAZZOLI. As you know, my subcommittee has jurisdiction over immigration-related provisions of the compact. The subcommittee held a hearing July 18, 1985, to explore the various issues relating to Freely Associated States admission to the United States and naturalization requirements in the FAS territories. As a result of these hearings I would like to clarify with the Chairman the intent of Congress as to some of these provisions.

Under section 141, FAS citizens may enter the United States to establish residence and engage in occupations. There has been some concern that groups of individuals might migrate to the islands and then naturalize in order to gain free entry to the United States by virtue of this compact.

The Deputy General Counsel of INS during our hearings states:

It is our view that any use of naturalization provisions in the Federated States of Micronesia or the Marshall Islands for the sole or primary purpose of obtaining immigration privileges * * * would not conform to the compact.

Is it your understanding that obtaining Freely Asociated States citizenship for such purposes would contravene the intent of the compact?

Mr. SEIBERLING. Yes; that is my understanding. Our committee explored that same issue and shared the same concern, and as a result adopted an amendment which we worked out with your subcommittee specifying that such rights of free entry to the United States extends only to bona fide naturalized FAS citizens.

Mr. MAZZOLI. Mr. Chairman, is it your opinion then that the Attorney General under the Immigration and Nationality Act could deny admission to those who naturalize primarily to gain entry to the United States.

Mr. MAZZOLI. Mr. Chairman, under the rule, can I yield myself 2 additional minutes?

The CHAIRMAN. The gentleman is recognized for 2 additional minutes.

Mr. MAZZOLI. I thank the Chair.

Mr. Chairman, in this regard, the aforementioned INS witness, the Deputy General Counsel, stated during our hearing that "It is our position that we could"—the Justice Department, that is—"refuse to recognize a naturalization in such circumstances."

Mr. Chairman, would you agree with that statement?

Mr. SEIBERLING. If the gentleman would yield, yes, I certainly share the view that the Attorney General has authority under the act to exclude such persons on that basis.

Mr. MAZZOLI. Lastly, Mr. Chairman, there are various reporting requirements which you have, in your wisdom, written into the bill, and would take effect upon implementation.

In view of the very unique situation of what we call the Freely Associated States, it seems advisable to the gentleman from Kentucky and to our subcommittee that from an immigration standpoint, we should have detailed information on the admission of FAS citizens who, after all, will be granted free entry into the United States under the terms of the compact.

I would certainly hope that reports on immigration could be submitted yearly and could include such data as how many FAS citizens enter the United States, what status they enter under; whether students, visitors, et cetera; how long they reside here, what employment occupations they enter, and in particular to what states they are destined.

Also, information on any changes in the naturalization laws of the islands and numbers of persons obtaining citizenship in the FAS would assist the Congress, it seems to me, in monitoring the impact of the legislation.

Therefore, Mr. Chairman, would you intend that such information as this would be gathered under the terms of House Joint Resolution 187?

Mr. SEIBERLING. If the gentleman would yield, I believe information on the naturalization laws of the islands and on the characteristics of the population that would be entering the United States would be extremely helpful to the Congress in reviewing the impact of the compact.

Let me say, these citizens are free now to enter the United States, and nevertheless there are 160,000 of them still in Micronesia.

The CHAIRMAN. The time of the gentleman from Kentucky has again expired.

Mr. MAZZOLI. Mr. Chairman, the gentleman wishes, again if it is within the rule and in the order, I would like to yield under time that the gentleman from Kentucky controls 2 minutes to the gentleman from Nebraska [Mr. BEREUTER].

The CHAIRMAN. The gentleman from Kentucky is recognized for an additional 2 minutes.

Mr. MAZZOLI. I yield to the gentleman from Nebraska.

Mr. BEREUTER. I thank the gentleman for yielding, and I ask for this time at this moment since the subject I would like to discuss first is one that has just been covered, and I would like to address my comments to the gentleman from Ohio [Mr. SEIBERLING], perhaps the gentleman from New York, and the gentleman from Kentucky [Mr. MAZZOLI].

In the original Foreign Affairs Committee bill, I believe that the language was much stronger in this area. It expresses the understanding that immigration benefits extended by the U.S. Government to the citizens of the Freely Associated States are contingent upon the maintenance of the Freely Associated States of the citizenship requirements which are currently in effect, and that those requirements shall not be appreciabiy diminished.

Now, there are two points I would like to bring up. In the compromise version between the two committees, it seems to me when the language now reads, "shall not extend any such naturalized citizen with respect to whom circumstances associated with the acquisition of the status of naturalized citizen are such as to allow a reasonable inference on the part of appropriate officials of the United States, and subject to United States procedural requirement that such naturalization status is acquired primarily in order to obtain such rights."

That places a very substantial burden on the United States to make that determination. I understand that in the compact itself there is a 5-year residency requirement, but what can the gentleman from Kentucky [Mr. MAZZOLI] and the gentleman from Ohio [Mr. SEIBERLING] do to assure me that we are not asking for an extraordinary burden of proof which, by the change to this compromise language?

Mr. MAZZOLI. Let me assure my friend under this time that to the extent the gentleman from Kentucky continues to chair the Subcommittee on Immigration or remain in the Congress to be concerned about it, that it would be his definite intention, first of all, to require these various reports which my friend from Ohio had said.

The CHAIRMAN. The gentleman's time has again expired.

Mr. MAZZOLI. Mr. Chairman, the last yield for the moment would be 1 additional minute, if I might.

The CHAIRMAN. The gentleman is recognized for 1 additional minute.

Mr. MAZZOLI. I would just quickly respond to my friend, it would be first my intention to demand these reports and, second, to be alert, very much, to the fact that the Attorney General could deny U.S. citizenship to someone who would mischievously acquire freely associated State citizenship in order to really get into the country.

Mr. BEREUTER. I thank the gentleman.

I would ask the gentleman from Ohio, in your original language you had a reciprocity section, and that was dropped in the deliberations between Interior and the Foreign Affairs Committee. That concerns me a bit, and I would like to have the gentleman's explanation for why you dropped what I though was a good section.

Mr. SEIBERLING. Well, I would suggest that since the initiative to drop it came from the Committee on Foreign Affairs, the subcommittee chairman, that maybe he is in a better position to respond to that.

Let me say I feel that what we finally ended up with here is fair and does protect the United States as well as maintain the residence right of Micronesian citizens.

□ 1940

Mr. LAGOMARSINO. Mr. Chairman, I yield 3 minutes to the gentleman from Nebraska [Mr. BEREUTER].

Mr. BEREUTER. I thank the gentleman for yielding.

Mr. Chairman, I would yield to the gentleman from New York [Mr.

SOLARZ] for a response to why the reciprocity section was eliminated.

Mr. SOLARZ. I thank the gentleman for yielding.

I am sure the gentleman recognizes, first of all, it is in the nature of compromises that concessions are made and that there is a give and take, and some of the provisions contained in the interior bill were altered, some of the provisions contained in the foreign affairs bill were altered, and it was obviously impossible to get two different bills into one bill unless there were compromises made.

In this particular instance, I think the feeling of those who participated in this exercise—this really was an extraordinary effort to resolve some fundamental philosophical differences between the two committees, and for which the gentleman from Ohio [Mr. SEIBERLING] and the gentleman from Arizona [Mr. UDALL], in particular, deserve great credit, as well as the gentleman from California [Mr. LAGOMARSINO].

The feeling was that, while as a general principle the notion of reciprocity made some sense, it was also possible to conceive of circumstances under which the United States, the superpower, with 240 million people, might have justification for somewhat different immigration requirements than Micronesia, an entity of some 200 small islands with only 133,000 people. I think the bottem line here was the feeling that an absolutely worst-case scenario, if all 133,000 of the Micronesian people came to the United States, which nobody expects and which is virtually inconceivable, given their cultural tradition and their attachment to their own land, that would have an infinitesimal impact on the population composition of our country. But if only a relatively small number of Americans decided to go over to Micronesia, it could fundamentally alter the ethnic and population composition of those islands. So one could conceive of a situation where they would be entitled to have somewhat more restrictive immigration requirements than the United States. That is the reason.

Mr. BEREUTER. I understand the basic point the gentleman is making, but I would make two points in response. One, this was not a subject of controversy discussed within the Foreign Affairs Committee, and yet it was stripped from the Interior Committee version, and I do believe I understand the logic of the gentleman's argument, but I would like to say on the record at this point that I have great concerns about the immigration flows from the Federated States of Micronesia and the Marshall Islands to the United States. It has been said, I think accurately, for example, that there are more American Samoans living in California today than there are in American Samoa. And I am quite concerned that we not do something to drain the talent and human resources from these islands to Hawaii and other parts of the United States. I think we are opening the door wide to that possibility.

Mr. SOLARZ. If the gentleman will yield further, I think there are two separate questions here. One is the extent to which people using Micronesia might use their residence there to come here. That is one problem. I think the gentleman from Kentucky [Mr. MAZZOLI] made it clear and the gentleman from Ohio made it clear that there are provisions to deal with that. With respect to the other question of reciprocity, I know of no other government in the world with which we have a requirement for absolutely reciprocal immigration legislation.

Mr. LAGOMARSINO. Mr. Chairman, I yield such time as he may consume to the gentleman from New York [Mr. GILMAN].

Mr. GILMAN. Mr. Chairman, I rise in support of the measure pending before us, and urge our colleagues to pay specific attention to the important provisions contained in House Joint Resolution 187 which relate to law enforcement efforts in the control and prevention of illicit narcotics activities. This compact is presented before us at a time when additional narcotic enforcement efforts in all parts of the globe are greatly needed, and it is heartening to note that much prominence to these efforts has been raised in the drafting of the compact of free association for the Federated States of Micronesia and the Marshall Islands.

Specifically, the legislation notes the requirement for the negotiation of two additional agreements; the first concerns mutual assistance in law enforcement activities, which is expected to encompass investigations of crimes and deterrence of illegal drug-related activity between the two nations at all levels of their interfacing, whether it be through use of lands, waters, or facilities in the cultivation, production, smuggling, trafficking, or abuse of any controlled substance. Furthermore, this agreement provides for mutual cooperation in the areas of prevention and prosecution of violations relating to securities transactions and other uses of illegal moneys by narcotics traffickers. I find it particularly important that this section has focused on the various money-laundering techniques used by narcotics traffickers at a time when the House of Representatives is actively considering legislation dealing with this problem on a domestic scale. I am pleased to see that the many and diverse aspects of illicit narcotics are being responded to in this particular case, which I consider preventive medicine.

Because the Select Committee on Narcotics Abuse and Control, of which I am pleased to serve as the ranking minority member, disclosed last year that an extremely high percentage of mail and parcels being sent from Hawaii to the west coast, and from the Far East to both Hawaii and the west coast contain illicit substances. I am gratified that this compact further notes the need for technical and training assistance to the Federated States of Micronesia for postal inspection of illegal drugs and other contraband. This assistance is financially nonreimbursable, though I am certain that we will be reimbursed a thousandfold through capable interdiction on the part of the governments of the Marshall Islands and Micronesia.

The second agreement concerns the economic development plans required by the compact, whose 5-year plans will no doubt aid, both directly and indirectly, the inherent need to combat drug smugglers and producers on a global scale. Mr. Chairman, I find these sections of the legislation to be comprehensive in nature as they pertain to the situations in these two island groups, and endorse their law enforcement and naroctics approaches.

And, in serious acknowledgement of the continued need for oversight, I am pleased that House Joint Resolution 187 includes the Rangel-Gilman-Hawkins amendments (section 481(e) of the Foreign Assistance Act). This specific requirement of reporting to Congress all relevant information relating to illicit drug production and trafficking in the affected states of this compact will greatly enhance our ability to coordinate an effective narcotics strategy, and the select committee has found these reports to be of great assistance in carrying out its legislative responsibilities.

Mr. Chairman, having reviewed this compact of free association, I find House Joint Resolution 187 to be yet another valuable tool in our war against illicit narcotics producers and traffickers, and accordingly urge my colleagues' support in its adoption.

Mr. LAGOMARSINO. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, as a member of both the Committee on Interior and Insular Affairs and the Committee on Foreign Affairs I have participated in over 20 hearings on the compact of free association. As a result of the conscientious work of the members of both committees, we have achieved bipartisan consensus on legislation approving the compact.

Based on several years of involvement with this issue, I am convinced that this compromise worked out with the Interior/Foreign Affairs Committees and now Ways and Means is the best possible legislative vehicle for going to conference with the Senate and finally enacting legislation which

can be implemented in accordance with our vital national interests in the Pacific.

Several years ago, while the Micronesian status negotiations were still going on, I joined the late Phil Burton and several other colleagues in a bipartisan study and analysis of the compact as it was being developed. We decided to request that the executive branch undertake a review of the compact during the transition after President Reagan's election. The Reagan administration complied with that request and in April 1981 initiated a comprehensive policy review. Former Under Secretary of State James L. Buckley was appointed chairman of a senior interagency group that consulted extensively with concerned Members of the House and Senate.

In that policy review the Reagan administration approved the fundamental concept of free association as it had evolved during three administrations. In concluding negotiations with the Micronesians, President Reagan's chief negotiator, Fred Zeder, achieved final agreement on several key provisions specifically included to satisfy congressional requirements. These include the strategic denial and defense veto provisions, the scaled down but mutually beneficial Federal programs arrangements, sustantial spending reductions, and the establishment of a program to meet the long-term needs of Marshall Islanders affected by nuclear testing.

While the negotiated compact submitted by the President is an excellent document, the Interior and Foreign Affairs compromise substantially revises the agreement to address concerns raised during our comprehensive review of this historic document.

Those revisions included substantial changes to the trade and tax provisions to ensure that the compact's development incentives cannot be abused. To this end we took the following steps:

Possible tax loopholes in the negotiated compact were closed so that U.S. citizens in Micronsesia will be taxed the same as U.S. citizens living in other countries.

Corporate tax incentives were tied to those which Congress has provided for the territories, with specific provisions recognizing that Congress may change those provisions. To accommodate future changes, substitute benefits will be negotiated in light of whatever changes Congress might make.

Trade benefits in the negotiated compact were adjusted to protect the interests of the U.S. territories.

It is important to understand that the tax and trade incentives in the compact are part of the quid pro quo for U.S. defense rights and spending reductions. The Micronesian governments are not entirely happy with the compromise, but we think we have tightened the package up without depriving them of the value of the negotiated deal.

If any of my colleagues doubt that this agreement is important to the United States, I ask them to look closely at what is occurring in the Pacific today. As indicated in the letters we have before us today from Admiral Crowe, who has been serving as Commander in Chief of the Pacific, the compact secures peace and stability for Micronesia at a time when our resolve and ability to influence events in the surrounding region is being challenged. The compact is a good deal for the United States, and it would be a grave mistake to delay approval any longer.

I urge you to vote "yes" on the compact in the name of spending reduction, national security, sound tax policy for the United States, and self-determination for the people of Micronesia.

Mr. Chairman, I reserve the balance of my time.

Mr. UDALL. Mr. Chairman, I yield such time as he may consume to the gentleman from Georgia [Mr. ROWLAND].

● Mr. ROWLAND of Georgia. Mr. Chairman, I rise in support of this bill to approve the compact of free association with Micronesia and the Marshall Islands.

I want to address my remarks specifically to the nuclear claims settlement provisions. Under this measure, a $150 million trust fund will be established to settle all claims against our Government resulting from U.S. nuclear testing in the Marshall Islands. I understand there are about $5 billion in nuclear claims pending at this time, and that the interest accumulated on this trust fund will eventually provide for $270 million over a period of some 15 years.

These claims, Mr. Chairman, are the inevitable result of the tests conducted during the late 1940's. Prior to the takeover of the administration of these islands in 1951 by the Department of the Interior, the Department of the Navy conducted more than 90 atomic and hydrogen bomb tests.

The Bikini Atoll was the first site for operations crossroads where tests Able and Baker were conducted. On the Enewetak Atoll, Bravo was exploded with a force that was 750 times as powerful as the blast at Hiroshima. Many islanders were exposed both during the blasts and from a contaminated food and water chain afterward.

In fact, 75 percent of the exposed Marshalese suffered beta skin burns. Whole body counts were performed and showed that blood platelets fell to about 50 percent after 25 days, while white blood cell counts fell to their lowest point about 50 days after irradiation. More than 90 percent of the people who were under the age of 12 when they were exposed have contracted thyroid disease.

In short, the usual and expected health problems have been evidenced in those islanders exposed to ionizing radiation resulted from nuclear testing in the South Pacific.

However, in the studies conducted on these islanders by the Brookhaven National Laboratories, an interesting phenomenom has been seen. Of the various groups of islanders, those who were exposed to less than one-tenth of the amount of radiation that those receiving the highest external doses were deemed to have experienced, have a much higher incidence of thyroid cancer. This presents a perplexing question about the previously accepted theory of low-level exposure. There seems to be evidence to suggest that in some cases higher levels of radiation may in fact destroy cells instead of altering the cells so that a malignancy is initiated. In fact, there may be groups to postulate that low-level radiation is not necessarily harmeless but is responsible for the long latency periods for manifestation of malignant neoplasms.

In any event, I did what to bring to the attention of my colleagues the serious health problems that have been experienced by the islanders we are addressing in this compact of free association. These health problems are of the same type that many of the veterans who were involved with these same tests are experiencing. These veterans who currently have no access to receiving compensation for their problems as do the Marshalese. These veterans who no longer have access to the judicial system in this country because of a combination of an amendment to last years' DOD authorization bill and the prohibitions of the Feres Doctrine. These veterans who are still waiting after almost 40 years for some acknowledgment of the relationship of their radiogenic disorders to their exposure. These veterans who have patriotically served their country are at least as deserving as the people of the Marshall Islands whose claims we are recognizing by our action tonight.

I urge my colleagues to in the process of remembering those who were unwittingly harmed through our military activities, to not forget those who participated in our military defense—atomic veterans.●

Mr. UDALL. Mr. Chairman, I yield 2 minutes to the gentleman from the Virgin Islands [Mr. DE LUGO].

□ 1950

Mr. DE LUGO. I thank the gentleman for yielding to me.

Mr. Chairman, I rise to engage in a brief colloquy with the distinguished chairman of the Interior Committee. I have in my hands letters from the Commander in Chief, U.S. Pacific

Command, Hawaii, who was in line to be the next Chairman of the Joint Chiefs of Staff, and also letters endorsing the Udall-Fascell substitute from the Secretary of State and Secretary of Interior and also from the Secretary of Commerce and numerous other letter.

My understanding is that the substitute will not be offered today. I understand that certain commitments have been received. As you know, Mr. Chairman, a great number of concerns were raised regarding the impact of this action on the U.S.-flag territories. I am wondering at this time what encouragement is the chairman prepared to give to this member that the concerns of my constituents, the U.S.-flag territories will be protected.

Mr. UDALL. If the gentleman will yield, I would say to him that in order to get the overall benefits of this legislation, this compromise, we felt it necessary not to take care of the territories insofar as we could do it at this time in this event.

I am well aware of the vital importance of this matter to the gentleman's constituents. I want to assure him that when and if changes are considered in the trade and tariff and tax matters that we will do everything we can in our committee to see that his views are represented and that he has a chance to be heard and his peoples' concerns are noted carefully and heeded wherever we can.

I congratulate the gentleman on the virgorous way his has represented the interest of the Virgin Islands and his work on territories generally. He is an extremely valuable member of our committee, and I want to back him up.

Mr. DE LUGO. I thank the chairman.

Mr. LAGOMARSINO. Mr. Chairman, I yield 2 minutes to the gentleman from Alaska [Mr. YOUNG].

Mr. YOUNG of Alaska. I thank the gentleman for yielding.

Mr. Chairman, I would like to take this time to express my appreciation to the chairman of the subcommittee, Mr. SEIBERLING; the chairman of the full committee, Mr. UDALL; STEVE SOLARZ; and Mr. LAGOMARSINO; FOFO SUNIA; RON DE LUGO, and BEN BLAZ. I say this because I was one that did not like this compact as it came down and was negotiated by two administrations. I believe strongly that it was a giveaway of Americans' rights and not really considering the effect upon the American Treasury.

Through these committees, we worked out, I believe, an acceptable solution, an agreeable package, and although I think the tax provision as adopted by the Ways and Means Committee previously by unanimous consent, is one that does not do service to the territories. We hope to address that issue later.

Again, I urge the Members to consider this legislation as proper at this time and it should be passed.

Mr. SEIBERLING. Mr. Chairman, will the gentleman yield?

Mr. YOUNG of Alaska. I yield to the gentleman.

Mr. SEIBERLING. I thank the gentleman.

Mr. Chairman, I want to commend the gentleman as well as Mr. LAGOMARSINO for the exceptional effort that they made to try to work out something that we could all agree on here and it would protect the United States and protect also the rights and interests of the people who have been our wards for 40 years. I think it is an outstanding job, and I think both the gentleman from Alaska and the gentleman from California deserve great credit for the work they have put in on this.

Mr. YOUNG of Alaska. I thank the gentleman.

Mr. UDALL. Mr. Chairman, I reserve the balance of my time.

Mr. LAGOMARSINO. Mr. Chairman, I yield 2 minutes to the gentleman from Nebraska [Mr. BEREUTER].

Mr. BEREUTER. I thank the gentleman for yielding.

Mr. Chairman, I have three other points that I would like to raise this evening for answers during a colloquy. The first is rather simple. If I could address it to the gentleman from Ohio [Mr. SEIBERLING] and the gentleman from New York [Mr. SOLARZ].

On the reports to Congress on the required economic development plans, one of the two versions of the proposed legislation by the Committee on Interior and Insular Affairs or the Committee on Foreign Affairs indicated that these plans would be referred to the House Foreign Affairs Committee and the House Committee on Interior and Insular Affairs. The final compromise version of the legislation now under consideration makes no reference to these two committees. What is the expectation or explanation of either of the two gentlemen with respect to that change?

Mr. SEIBERLING. If the gentleman would yield, the difficulty that we would have was that we cannot bind a future Congress as to how it is to handle its internal affairs, and so we simply provided that they would be referred to the Congress, and then the Congress would have to decide whom the appropriate committee would be.

Mr. BEREUTER. But am I correct in affirming that this change shows no prejudice toward the ultimate disposition of the required plans within the U.S. House of Representatives.

Mr. SEIBERLING. It does not.

Those two committees would then still be logical ones to receive these required plans for review.

Mr. BEREUTER. I thank the gentleman.

Now on the second of my three additional points, I would say that I think that one of the most important sections of this legislation concerns the provision on the nonalienation of land in the Marshall Islands and the Federated States of Micronesia. I was disappointed, frankly, even though I understand that compromises are necessary, that the original version reported by the House Foreign Affairs Committee was not retained.

As you know, nonalienation of land is the case in the Commonwealth of the Northern Marianas, a former trust territory of the United States. The original version in the Foreign Affairs Committee said "the Congress explicitly expresses its understanding that these two Freely Associated States will continue to regulate in accordance with their constitutions and laws the alienation of permanent and long-term interests in real property as to restrict the acquisition of such interests to persons of Marshall Island descent (the) Federated States of Micronesia descent—respectively."

The compromise legislation simply provides a sense-of-Congress provision of a similar nature. I would, therefore, welcome any kind of reassurances from either of the two gentlemen on the importance of our concern that land in these two freely associated states will have a continuing nonalienation status.

I yield to the gentleman from Ohio [Mr. SEIBERLING].

Mr. SEIBERLING. I felt the same way the gentleman did, but it was the sense after we discussed it with Mr. SOLARZ that it would be inconsistent with the sovereignty of these new states if we, in effect, tried to tell them how to handle their internal laws, so that is why we put it in the form of a sense of Congress, but a very strong sense of Congress.

The CHAIRMAN. The time of the gentleman from Nebraska [Mr. BEREUTER] has expired.

Mr. LAGOMARSINO. Mr. Chairman, I yield 1 additional minute to the gentleman from Nebraska.

Mr. BEREUTER. I understand the gentleman's comment. I think that the alienation of land in these two Freely Associated States is extremely important and that questions of sovereignty should not be the controlling factor on this crucial matter. In short, I think that the sovereignty argument should not have prevailed in this instance and that the people in these Freely Associated States in the future would have thanked us if we had held to the original strong language which was in reality a prohibition against change in the nonalienation status of their land resources.

My third point relates to the subject of the lease payment to the current owners of the Kwajalein Atoll. Both

the gentleman from New York, my distinguished colleague on the Subcommittee on Asian and Pacific Affairs, Mr. SOLOMON and I have substantial concerns about the future payment of the Marshalese Government and to the landowners of the U.S. Government lease payment funds destined for these landowners. I am authorized to say for the gentleman of New York, even though he is here that we are concerned that the option of direct payment provisions by the U.S. Government, once found in the bill approved the Foreign Affairs Committee bill are no longer a part of this compromise legislation. Neither are alternative strong language of the Committee on Interior and Insular Affairs the version in this legislation.

The CHAIRMAN. The time of the gentleman from Nebraska [Mr. BEREUTER] has again expired.

Mr. LUNGREN. Mr. Chairman, I yield 3 minutes of my time to the gentleman from Nebraska.

Mr. BEREUTER. I thank the distinguished gentleman from California for yielding this time to me.

Mr. Chairman, the provisions of the bill indicate that we establish a specific period of time in which the U.S. Government can bring action if in fact the U.S. funds meant to pass through to the landowners are not forthcoming. But as I understand it, and I would ask the gentleman from Ohio, there no longer is provision for direct payment by the U.S. Government to the landowners. Is that correct?

I yield to the gentleman for his response.

Mr. SEIBERLING. That is correct in the versions now before us; in all the versions.

Mr. BEREUTER. Does the gentleman feel uncomfortable about that change?

Mr. SEIBERLING. If the gentleman would yield, I certainly do. Personally, I supported having direct payments from the Treasury of the United States to the landowners. I realize that could create complications for the Treasury in determining who had a right to the payment, and so forth. I know the landowners felt very strongly about that, and I feel it was very important to the security of our base at Kwajalein because they are the ones that own that land.

However, the argument prevails that this is going to be a sovereign government; that the agreement was to pay them directly, and they will pay the landowners, and that we have no base anywhere else in the world where we pay directly to the landowners, and therefore, we put the most protective language we could to make it clear that it would be a breach of the compact, a material breach, if they fail to make payment which would give us the right to invoke our protective provisions.

Mr. BEREUTER. I thank the gentleman for his comments. I share, certainly, his concern about our potential loss of use or impeded use of the Kwajalein Atoll for a missile range, and I note the language in the compromise bill that, "The United States shall deem such failure to make a payment a material breach of U.S. security and defense authority under the compact." We have had landowner "sail in" actions in the past to protest the failures of the Marshallese government. Therefore, I hope and strongly urge for this Congress that there is no reluctance whatsoever on the part of the U.S. Government to expeditiously exercise the leverage provisions that are in the bill with respect to the lease payments to the Kwajalein Atoll landowners.

□ 2000

Mr. SEIBERLING. If the gentleman would yield further, if there is any reluctance on the part of the U.S. Government, as long as I am on this subcommittee I would hope that we would have oversight hearings to overcome such reluctance.

Mr. BEREUTER. I thank the gentleman.

Mr. LAGOMARSINO. Mr. Chairman, will the gentleman yield?

Mr. BEREUTER. I would be pleased to yield to the gentleman from California.

Mr. LAGOMARSINO. I thank the gentleman for yielding.

Mr. Chairman, I would just like to say that I think that if the Kwajalein government, if the Marshall government, were to withhold a payment it would be a very silly thing for them to do, because for a very small amount of this payment, and they make it quarterly as I recall, they could have all of their payments withheld under the provisions of the bill.

I would echo what the chairman of the subcommittee just said. I would feel we had been had, also, and would do everything I could in my power, as long as I have anything to do with this issue, to make sure that they are paid.

Mr. BEREUTER. I thank the gentleman from California for yielding me time.

The CHAIRMAN. The gentleman from Arizona has 7 minutes remaining, and the gentleman from California [Mr. LAGOMARSINO] has 2 minutes remaining.

Mr. LAGOMARSINO. Mr. Chairman, I reserve the balance of my time.

Mr. UDALL. Mr. Chairman, I reserve the balance of my time.

The CHAIRMAN. The Chair recognizes the gentleman from Florida [Mr. FASCELL].

Mr. FASCELL. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in support of House Joint Resolution 344, to approve the Compact of Free Association with the Federated States of Micronesia and the Marshall Islands.

House Joint Resolution 344 is the product of countless hours of hard work and negotiations between the Foreign Affairs Committee and the Committee on Interior and Insular Affairs. It also contains amendments supported by the Committee on Merchant Marine and Fisheries, and addresses the concerns of the Armed Services Committee.

This legislation is a very complicated document, covering a broad range of subjects. You may hear a lot of talk about this provision or that provision. But to me, it comes down to this basic issue: Will we approve legislation which will set the Micronesians free, in a manner which is acceptable to them, or will we continue to hold them in a U.N. trusteeship status which is an international embarrassment to us?

This is the last trusteeship in the entire world. It is an anachronism which should have been resolved long ago. Over the last 15 years, we have carefully crafted the basis for a new relationship with the Micronesians. They have freely voted to approve this agreement. They have waited patiently for a chance to enter the international community. It is up to us to ratify this agreement and let them govern themselves.

The only other issue at hand concerns some tax and trade incentives we have agreed to provide to the Freely Associated States. The compromise, addresses the concerns some people had about the possibility of tax avoidance and an adverse impact on the U.S. territories, while still encouraging U.S. investment in the area. These incentives are crucial to attract U.S. business to an underdeveloped area, and to maintain the special relationship we have established with them. With only 100,000 plus people in the Federated States and the Marshall Islands combined, I sincerely doubt that they will pose much of an economic threat to the United States.

A tremendous amount of work has been done. Let me, because of my association on the Committee on Foreign Affairs, extend my congratulations and commendations to the chairman of the subcommittee, the gentleman from New York [Mr. SOLARZ] and his ranking member, the gentleman from Iowa [Mr. LEACH] for the tremendous amount of work they have put in to cooperate with the Committee on Interior and Insular Affairs and the other committees in order to bring this legislation to the floor of the House as promptly as has been done.

In short, I think it is time, Mr. Chairman, that we fulfill our commitment and I urge all of my colleagues to vote "aye" on this legislation.

Mr. Chairman, I yield such time as he may consume to the gentleman from California [Mr. DYMALLY].

Mr. DYMALLY. I thank the gentleman for yielding time to me.

Could I get either the gentleman from Florida [Mr. FASCELL] or the gentleman from New York [Mr. SOLARZ] to respond to a concern of the people of Kwajalein?

What assurances do they have, if the Marshall Islands government does not pay them forthwith, that they will be able to receive their funds?

Mr. SOLARZ. If the gentleman will yield, under the terms of the resolution before us, a failure on the part of the Marshall Islands government to make such payments would trigger the defense authorities of the United States, which are provided in other sections of the compact, and we would deem that to be, on their part, if the payments were withheld for clearly unjustified reasons, to be a material breach of the compact, which would then throw into question their ability to receive the payments we are obligated to give them.

I think the feeling of those of us who have been involved in this is that that provision guarantees that the Kwajalein landowners will be paid in a timely fashion and that moneys will not be withheld from them without justification.

Mr. DYMALLY. I thank the gentleman.

Mr. FASCELL. Mr. Chairman, I yield 5 minutes to the gentleman from New York [Mr. SOLARZ].

Mr. SOLARZ. I thank the gentleman for yielding this time to me.

Mr. Chairman, this is really a historic moment. It is not every day or evening that Members of this House have an opportunity to personally participate in an act of formal decolonization, and that is exactly what we are doing at this time. With the possible exception of Namibia, I know of no other quasi-colonial territory in the world awaiting its independence.

The adoption of this compact will finally provide the people of Micronesia with a new political status, which is the functional equivalence of independence and sovereignty within the framework of the restrictions agreed upon in this compact.

It also represents an extraordinary achievement. It is the culmination of 14 years of intensive negotiations between Micronesia and the United States, which have been conducted and carried forward by four administrations, Democratic and Republican alike. It also represents a remarkable achievement here in the House inasmuch as we have been able to reconcile the conflicting concerns and perspectives of several different committees, each of which had jurisdiction over this measure.

I want to pay particular tribute here to our very able and distinguished chairman of the Committee on Interior and Insular Affairs, the gentleman from Arizona [Mr. UDALL], his equally able and distinguished chairman of the relevant Subcommittee on Interior, the gentleman from Ohio [Mr. SEIBERLING] who bent over backward to try to reconcile their very profound differences with the Committee on Foreign Affairs in the meetings we had on this issue last week.

I know how deeply felt their concerns are, and I think it was a tribute to them that they were willing to invest the degree of effort and energy that they were in this legislation. There was no political mileage in it for them at all. They have no expatriate Micronesians in their districts. They were animated solely by a concern for the national interests of the United States and the welfare and well being of the Micronesian people.

I also want to pay tribute to our very able and distinguished chairman of the Committee on Ways and Means, the gentleman from Illinois [Mr. ROSTENKOWSKI]. I know he felt that, given the rush to judgment on this issue, his committee did not have the time to give it the kind of careful consideration which it ordinarily gives to any tax legislation before the Congress. But in spite of that, he was willing to cooperate in an effort to meet the timetable established by the Speaker. We met with him today and we were able to hammer out an agreement which we believe is fundamentally compatible with the concerns of the Committee on Foreign Affairs and the Committee on Interior and Insular Affairs and, I might say, the administration, which has given its blessing to the compromise. So I want to pay tribute to Mr. ROSTENKOWSKI for a genuine act of parliamentary statesmanship on his part.

Last, let me say to my colleagues in conclusion that this is an agreement which is very much in the interest of the United States. Strategically, this agreement gives us the right of strategic denial, so that we are in a position for the rest of time to prevent any foreign power from establishing a military presence in Micronesia without our consent. That is an extraordinary concession made by the Micronesians and a very real achievement for the United States. It also gives us a 30-year lease agreement at the Kwajelein missile range, which is the single most important missile range we have in the entire world.

Without the compact, both the right of strategic denial and the lease on the Kwajelein missile range would be placed in jeopardy.

It is very much in our economic interest, because this compromise would provide an authorization for $2.4 billion over the next 15 years to the Micronesians, which is $300 million less than we would otherwise be giving to the Micronesians if the present trust territory status was maintained.

Finally, it is in our political interest to liquidate this trusteeship, the last surviving trusteeship in the world, in a way which reflects the will and wishes of the Micronesian people. This compact was submitted to a referendum of the people of the Marshall Islands and the people of the Federated States of Micronesia. By overwhelming margins in both entities, the people voted to approve this new status of free association with the United States in which we have exclusive control over their security but they are exclusively responsible for their domestic affairs, and where they consult with us on foreign policy.

It is a unique arrangement. There is nothing like it anywhere else in the world. But the fundamental fact is that it was acceptable to them and hopefully it will be acceptable to us.

Mr. FASCELL. Mr. Chairman, I yield 3 minutes to the distinguished gentleman from Florida [Mr. SMITH].

Mr. SMITH of Florida. I thank the gentleman for yielding this time to me.

Mr. Chairman, as chairman of the Foreign Affairs Committee's Task Force on International Narcotics Control, I want to call the committee's attention to certain provisions of this resolution that, in my estimation, improve the Compact of Free Association. In its haste to negotiate this compact, the executive branch may have overlooked some important matters, namely crime and narcotics control. This resolution corrects that oversight.

Law enforcement officials with firsthand knowledge have expressed to me their concern about current problems with law enforcement in Micronesia, particularly in the areas of drug production and trafficking, money laundering, and Japanese organized crime. These concerns seem to have been borne out by local press reports.

In a report on the prevention and control of alcohol and drug abuse in the Republic of Palau, a World Health Organization consultant noted that—

[i]t is understandable that Palau is on the way to becoming a centre for illicit traffic in narcotics considering its geographic location and other features, such as clandestine shipping activities.

The report's recommendations included the following:

The law enforcement system as well as training of officers should be strengthened in Palau. The law enforcement sector should increase its efforts to combat international syndicates of narcotic drugs.

I want to emphasize that this is a report on just one part of the territory covered by this compact. The potential

problem may exist—if it does not already exist—elsewhere in Micronesia.

In my estimation, the following items, among others, could create future problems for the United States:

A direct Manila-Palau air route is increasing the potential for the movement of heroin.

The compact neither commits the Freely Associated States to controlling narcotics production and trafficking nor makes clear that they would become signatories to the Single Convention on Narcotics Drugs.

Section 141 of the compact permits Micronesians to enter the United States from as nearby as Guam—as a nonimmigrant without regard to immigration requirements on travel documents and nonimmigrant visas. This could make it difficult to keep track of possible money launderers or smugglers.

The Micronesian police chiefs themselves have concluded that drug production and trafficking and also organized crime are on the increase. Without a commitment from the FAS governments and the United States, local law enforcement officials may not be able to cope with these issues.

The extradition and judicial assistance provisions may not be state-of-the-art. Consequently, the Freely Associated States may not be able to prosecute drug traffickers, and the United States may not be able to obtain extradition of individuals wanted for crimes committed here.

DEA has no offices in Micronesia now. Given the size of Micronisia, handling the issue even from Guam would be unworkable.

Some of these concerns have been allayed in this resolution. In the Foreign Affairs Committee, I offered an amendment expressing the sense of Congress that each Micronesian government shall commit its best efforts to prevent cultivation, production, and trafficking of drugs and shall take legal measures to enforce all laws against those drugs, and to suppress organized crime and to prevent improper financial transactions. The amendment also would require that Micronesia be included in the State Department's narcotics reports.

The Interior Committee directed the President to negotiate agreements on narcotics and law enforcement. The resolution before the committee today contains the best of both versions.

It is unclear, however, whether these provisions will be retained in when this resolution completes its way through the legislative process. I, for one, hope that all parties will recognize the importance of these provisions and accept them.

Another issue seems to rest solely with the Attorney General. As the chief law enforcement officer of the United States and the coordinator of executive branch drug enforcement activities, he is in a position to respond.

I am convinced that the United States must maintain FBI and/or DEA liaison in Micronesia itself. The Trust Territory of the Pacific covers 3 million square miles and contains over 2,000 islands. Coming from south Florida. I know the problems that our drug enforcement officials have in dealing with drug trafficking through the Bahamas, which cover a far smaller area. The drug trafficking potential in Micronesia—unless the United States and the FSM cooperate—is mind boggling. Both societies stand to lose a lot if they do not work together.

We cannot expect adequate drug enforcement intelligence and assistance without an agent assigned to Micronesia. Let's face it—an agent will have to spend enough time in the air just to maintain liaison with the FAS. A liaison office in Micronesia will emphasize our commitment to drug enforcement and should bolster local efforts. I hope the administration will respond appropriately.

Mr. Chairman, the peoples of the United States and Micronesia are being presented with an opportunity to eradicate the scourge of illicit drugs before those drugs become an insurmountable problem. This resolution contains the tools. Let's use them.

□ 2010

Mr. FASCELL. Mr Chairman, I reserve the balance of my time.

The CHAIRMAN. The Chair recognizes the gentleman from Iowa [Mr. LEACH].

Mr. LEACH of Iowa. Mr. Chairman, I yield myself such time as I may consume.

Mr. LEACH of Iowa. Mr. Chairman, as the ranking minority member of the Subcommittee on Asian and Pacific Affairs, I would like to urge the support of my colleagues for the legislation implementing this vital compact.

The legislation before us is unprecedented. Rarely does this body have the opportunity to work on agreements which are treaty-like in nature and which, if amended in substantive ways may spell disaster. All agreements negotiated between Governments involve quid pro quos. This agreement is no different. In this compact, the United States could have offered financial assistance or tax and trade breaks, and it chose to negotiate an agreement which provides for a combination of both in return for certain provisions vital to U.S. security. Should we now decide to renege on the tax and trade benefits, as this compromise legislation partially does, we may well risk breaching the word of the President or spending much more in taxpayers' money in the years to come.

The gentleman from Minnesota [Mr. FRENZEL] mentioned earlier that procedures of the House have been breached in the process of consideration of this measure and that a great deal of uncertainty exists as to the precise content and implications of the current compromise language. Problems are of such proportion that as of 10 minutes ago the White House informed this Member that it could not express a formal position on the measure before us. Informally, members of the Administration have opined that it may be the most effective vehicle to go to conference on a timely basis. On this basis I can support this legislation, but I do believe further changes may be in order in conference to bring the legislation more precisely in line with the compact as negotiated by the administration.

The problem of procedures relates to the time sensitivity of the agreement and the urgency for prompt congressional action. If the compact is not approved by October 1, important U.S. national security interests, including U.S. operation of the Kwajalein Missile Range in the Marshall Islands, could be put at risk. The Interim Land Use Agreement for that facility, which is due to expire on September 30, 1985, will—if the compact has not been enacted by that date—have to be renegotiated, raising a myriad of concerns about our future access to and ability to operate this key missile testing facility. Since the House will be in recess from the end of next week until September, any undue delay in House action could prove detrimental to the interests of this country.

Not only is action on this legislation important to the protection of vital U.S. national security interests in the region, timely action is also incumbent on us as the trustees of this territory. For the last 38 years, the citizens of these Pacific island states have lived under U.S. administration pursuant to a U.N. trusteeship agreement. Today, the Trust Territory of the Pacific Islands, as this region is officially called, is the last remaining U.N. trusteeship. Failure by the United States to provide for a fair and just termination of this trusteeship relationship, in response to the freely expressed will of the people of this area would not only be an international embarrassment to this country but a travesty of our international responsibilities and the very principles upon which this Nation was founded. The peoples of the Federated States of Micronesia and the Marshall Islands approved the Compact of Free Association in 1983 in democratically conducted plebiscites. We must not today—in this body—deny them the fulfillment of their internationally recognized human right of self-determination.

We should also remember that it was 40 years ago that men and women of this Nation shed their blood for just such principles as these in the battles

to control the Pacific. Thus, this region not only has contemporary strategic value to the United States, it represents a region of the world where this Nation has a profound historical investment and commitment.

In a very symbolic way, the negotiation of a compact involving the democratically expressed will of the peoples of the freely associated states underscores a foreign policy tradition that contrasts the commitment of the United States to the rule of law in a world in which other parties too frequently ascribe to the principle of the rule of force.

As we in this Congress freely suggest that self-determination be granted to the peoples of the freely associated states, might we not ask the Soviet Union to apply the same principle to the four northern islands of Japan which have been held since World War II, as well as the States of Eastern Europe and Afghanistan?

Mr. Chairman, I urge adoption of the compact without further substantive revision.

Even if the desirability for modification of one or another parts appears abstractly persuasive to Members, it must not be forgotten that this is a negotiated document and that while it is reasonable, proper, and, indeed, important for Congress to make subtle adjustments where particularly merited, it would be a dagger's blow to the diplomatic process, in instances of this nature, for Congress to make fundamental changes in the basic components of the compact.

It would be more prudent, in my judgment, for Members to express dissent by voting "no" on the compact, if that is indeed their position, than for this body to throw so much pepper into the soup that it becomes unpalatable to all parties. Greater wisdom is to recognize that this agreement is in the interest of both parties and deserves strong support in this, the people's House.

In this context, Mr. Chairman, I yield 5 minutes to our distinguished colleague, the former admiral and Senator-to-be, the gentleman from Arizona [Mr. MCCAIN].

Mr. MCCAIN. Mr. Chairman, I appreciate those kind words from the gentleman from Iowa [Mr. LEACH]. I also would like to echo my appreciation that has been so amply stated here to the gentleman from New York [Mr. SOLARZ], to the gentleman from California [Mr. LAGOMARSINO], to the gentleman from Nebraska [Mr. BEREUTER], and others who have labored literally for years on this issue.

Indeed this agreement is in the best interests of the people of Micronesia. Indeed it will be of great benefit to them. It is also, I would like to point out to my colleagues, particularly on this side of the aisle, a vital and extremely important step forward to ensure the future security of our Nation.

I would like to read very briefly a quote from Admiral Crowe, the Commander in Chief of the U.S. Forces in the Pacific, and who has recently been nominated to be the chairman of the Joint Chiefs of Staff. He states in his letter:

> The missions of the Pacific Command are to deter aggression, to insure access to critical resources, and should deterrence fail, to defend the interests of the United States and its allies and friends. To do this I must have the capability to project military power as far forward as possible and at the same time prevent a potential enemy from seizing areas from which attacks against the United States, its territories and allies and friendly nations could be launched.

What is Admiral Crowe speaking of? He is speaking of an area that is larger than the continental United States. He is speaking of an area which sits, as we can see, strategically in the center of where over 30 percent of the U.S. trade, which is larger than Western Europe, flows. It is sitting in the center of the Straits of Malacca on which our Japanese allies and our Far Eastern allies are so dependent for the flow of oil from the Middle East. It sits not that far from Cam Ranh Bay which, much to our dismay, has been turned into a reconnaissance and naval base of first-class order.

It also sits, of course, near the Philippines, in which we now use bases both at Clark and Subic. All of us here fervently hope that the Philippine Government will remain strong and our bases in the Philippines will remain for the foreseeable future. Unfortunately, all of us know that there is not only a distinct possibility of their not being there very long but, unfortunately, as events unfold which we are unable to affect, it may lead to the dissolution of the government there and the immediate loss of our base capability.

Also I would like to point out to my colleagues that there are two areas down where it says "Soviet inroads." This area is Kiribati, with which the Soviet Union has recently signed a fishing agreement. Those of you who have not seen a Soviet trawler, I would commend it to your attention. It does a lot of things besides fishing.

In the area of Vanuata here, the Soviet Union is seeking further fishing agreements with them. The Soviets are attempting to penetrate this part of the world. They are doing it cleverly. With their change in leadership, they are doing a good job of it. They are showing sophistication from their embassy in Australia, and I believe that we have to be on our guard, particularly in light of the fact that the Soviet fleet is now their largest, containing roughly one-third of all Soviet submarines, one-fourth of all principal service combatants, including two of their aircraft carriers.

This part of the world is strategic. This part of the world is vital. We have an opportunity by the prompt enactment of this compact to secure in virtual perpetuity an area of ocean, as I mentioned, that is large and geographically important.

This compact gives us the right of strategic denial. We have the absolute right to exclude from this area vessels which may be hostile to our interests or to Micronesian security interests. And as has been mentioned, we have a 30-year lease on the Kwajalein Missile Range, which is vital to a number of our strategic programs. I would like to point out that one of the reasons for urgency is that that lease agreement is about to expire.

In closing, I would like to say that we have an opportunity from a strategic viewpoint to be on the brink of accomplishing something which eluded us in Vietnam, which eluded us in Iran, which seems to be eluding us in Nicaragua, and which may well have eluded us in the Philippines. We have a key element, and that is foresight backed up by the necessary action to prevent a crisis situation developing. We have an opportunity to act and not react and secure United States vital national security interests well into the next century.

Mr. Chairman, I strongly urge my colleagues to approve this bill.

The CHAIRMAN. The Chair recognizes the gentleman from Iowa [Mr. LEACH].

Mr. LEACH of Iowa. Mr. Chairman, I will yield 1 minute to the gentleman from Nebraska [Mr. BEREUTER], but before doing that, I would simply like to state that with regard to the whole development of this bill, the bipartisan nature of the Democratic leadership has been impressive from a number of perspectives, both with respect to working with our administration and insuring that the well-being of the people in the freely associated states is maintained.

Mr. Chairman, I yield 1 minute to the gentleman from Nebraska [Mr. BEREUTER].

Mr. BEREUTER. Mr. Speaker, I want to thank the distinguished gentleman from Iowa [Mr. LEACH] the ranking minority member of the Subcommittee on Asian and Pacific Affairs, for his assistance and encouragement during the course of our work on this legislation. I also wish to pay a special commendation to the gentleman from Ohio [Mr. SEIBERLING] for his extraordinary concern and leadership on this subject, the especially knowledgeable gentleman from California [Mr. LAGOMARSINO], the distinguished gentleman from Alaska [Mr. YOUNG] whose counsel and knowledge have been of special benefit to me, and the gentlewoman from California [Mrs. BURTON]. I commend her for her

own concern and effort and for continuing her late husband's long-term interest and leadership in matters relating to the U.S. trust territories. And I would also commend my subcommittee chairman, the gentleman from New York [Mr. SOLARZ], for his very skillful and able work on this legislation and for his demonstrated ready grasp of the salient issues on this broad subject area. It is true that I have disagreed with him in certain respects, but he has accommodated many of my concerns and accepted most of my initiatives. I particularly have disagreed on the emphasis that he and others have placed on the issue of the importance or protecting of Micronesian States' sovereignty, but that is a matter of legitimate debate or disagreement.

I also want to suggest that I am quite willing as one Member of the Congress to assist the Committee on Interior and Insular Affairs in any attempt to address possible adverse impacts upon the territories in the commonwealth by further legislative changes.

With the comments, Mr. Chairman, I announce my support for this legislation and urge my colleagues to vote for it.

□ 2020

Mr. LEACH of Iowa. Mr. Chairman, I reserve the balance of my time.

Mr. DELLUMS. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, the legislation before us this afternoon was also referred to the Armed Services Committee. Due to the brief nature of the time constraints with respect to our capacity to review this legislation, we did not have that opportunity, Mr. Chairman, because we have been locked in significant negotiations with the other body regarding the DOD authorization for fiscal year 1986.

I might just add for my colleagues, the conference just momentarily ended; however, we have attempted to follow the legislation before the body and we would like in that regard to make the following statement:

Mr. Chairman, a concern of the House Armed Services Committee regarding House Joint Resolution 187, as amended, is whether the compact sufficiently provides for the prompt payment to the land owners of Kwajalein for United States access to their property. We on the committee believe that the compromise resolution 355 which will be offered later as a substitute to House Joint Resolution 187 is a workable resolution to this issue. It provides for the following payment procedure:

During the initial 15 years after the effective date of the compact the United States will make annual payments of $9 million, to be adjusted for inflation each year, to the government of the Marshall Islands which is obligated to forward these payments to the land owners of the Kwajalein Atoll.

Should the government of the Marshall Islands fail to forward the U.S. payments to the Kwajalein land owners within 14 days after receiving such funds, the United States may withhold further payment of compact funds to the Marshall Islands until that government meets its obligations in the matter.

After the 15th year of the agreement, the United States may exercise an option to continue use of Kwajalein for another 15 years by making a $2.5 million payment to the Marshall Islands.

During the second 15-year period, annual payments will be adjusted for inflation and the Marshall Islands Government will be obligated to make prompt payments to the Kwajalien land owners under the same terms as in the initial 15-year period.

Also, it should be noted that two other important issues are resolved by the compact. First, it brings to settlement once and for all the outstanding claims resulting from the U.S. nuclear weapon testing program on Bikini and Enewetak Atolls in the Northern Marshall Islands between 1946 and 1958. And second, the United States is forbidden from testing or disposing of any nuclear, toxic chemical or biological weapons in the Marshall Islands or the Federated States of Micronesia. Additionally, the United States may not store in these new States any toxic chemical or nuclear weapons.

Mr. Chairman, this briefly summarizes the interests of the House Armekd Services Committee relative to this historic compact. The concerns we had over some issues in implementing the compact have been resolved in the compromise resolution that we will be voting on shortly. I urge its adoption.

Mr. KRAMER. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I will be extraordinarily brief in the interest of my colleagues.

Let me just say that I believe both the compact and the legislation clearly protects the security interests of the United States and from the point of view of the minority on the Armed Services Committee, we fully support the legislation as it presently stands.

Mr. Chairman, I reserve the balance of my time.

The CHAIRMAN. Does the gentleman from Colorado reserve the balance of his time or does he yield back the balance of his time?

Mr. KRAMER. Well, Mr. Chairman, I just wanted to check to make sure there are not any other quarterbacks here who would like to be heard.

The CHAIRMAN. The gentleman from Colorado reserves the balance of his time.

Mr. DELLUMS. Mr. Chairman, I have no further requests for time and at this point I yield back the balance of my time.

Mr. KRAMER. Mr. Chairman, I yield back the balance of my time.

Mr. UDALL. Mr. Chairman, I yield such time as he may consume to the distinguished Delegate from American Samoa.

Mr. SUNIA. Mr. Chairman, this day belongs to the history books out in Micronesia and the Marshalls, for at the end of these discussions this House will have approved the Compact of Free Association for Micronesia and the Marshalls.

In its 15 years of development, this compact has gone through many different processes and has received the benefit of many great minds reflecting on the important issues that it involves. Like good wine, this aging has improved its taste and increased its value.

I commend the administrations, past and present, for their fine work on this compact, and I congratulate our colleagues in this House who have taken the lead in this undertaking. Mr. Chairman, I believe that we should approve this document with the Udall-Fascell substitute, and I urge that action upon the Members of this body.

I am aware that our friends in Micronesia and in the Marshalls are watching our actions today and evaluating very, very carefully the meaning of every word we are saying. Let me say to you, my friends, that I believe you have a good document, a solid framework for a viable sovereign existence in your part of the Pacific. I know you asked for more, but I urge your acceptance of this amended version and recommend you put faith in the promises of this Nation and this Congress, as contained in the compact, that there will be opportunities in the life of the compact to review and revise as future circumstances may require. If I were opting for sovereignty, as you have, I would certainly be pleased with a document of this nature. Sovereignty, as you will find, is priceless exactly because it is very, very expensive. The compact provides you with a basis to solidify that sovereignty—to enjoy your free association while preserving your self-respect.

Mr. Chairman, this compact was negotiated and written with all that in mind, but equally important, if not more so, the defense and the very security of our country.

Once again my congratulations to the chairmen of the Interior and Foreign Affairs Committees, Mr. UDALL and Mr. FASCELL, and to the subcommittee chairmen who have been point

men on this undertaking, Mr. SEIBERLING and Mr. SOLARZ, as well as the ranking members. We have worked hard, and we have a fine product. I urge its passage with the Udall-Fascell substitute.

Mr. UDALL. Mr. Chairman, I yield 4 minutes to the gentleman from Ohio [Mr. SEIBERLING].

Mr. SEIBERLING. Mr. Chairman, I wonder if the gentleman from New York [Mr. SOLARZ] would join me for a brief colloquy.

First of all, let me commend the gentleman for the tremendous leadership he has shown in working out the solution that is before us today. I think it is safe to say that without the efforts he has made we would not have been able to do it and I want to thank him personally.

The Interior and Insular Affairs Committee believes it is essential that there be full and close consultation between the Marshall Islands government and the various Marshallese population groups who were affected by the U.S. nuclear testing program. Is that also the view of the Foreign Affairs Committee? I yield to the gentleman.

Mr. SOLARZ. Yes, it is.

Mr. SEIBERLING. Would the gentleman agree that the Marshalls government, in implementing any of the provisions affecting the nuclear victims, should take great care to see that these people are actively involved in all decisions that will have an impact on their health, their community, the cleanup of any of their islands, and so forth.

Mr. SOLARZ. I certainly do think that is very important.

Mr. SEIBERLING. Our view was and is that while the already-funded contract is in effect, money that would otherwise be used for the program for caring for the health care of the four atolls that were affected by nuclear fallout should be held and invested by the fund manager, so that later there will be more money to run the four-atoll health care program in the years after the section 177 agreement terminates. Does that seem to be a sound financial approach to the situation?

Mr. SOLARZ. Yes, it does.

Mr. SEIBERLING. So would the gentleman agree with me that Congress hopes that the Marshall Islands will direct the fund manager to act so that duplication of funding and programs for the same people is avoided?

Mr. SOLARZ. Yes, of course.

Mr. SEIBERLING. I thank my colleague, and I ask his indulgence in a further brief colloquy.

My colleague will recall that we spent much time working out the part of the compromise dealing with the way payments will go to the Kwajalein landowners for the vital U.S. missile range there. As part of that compromise, the landowners or their designees can seek loans against their future paymemts. Loans of this sort are very important for the improvement of living conditions in the area, so they can engage in major projects. However, under the compromise, the requests for the loans must be channeled through the Marshall Islands government. Does the gentleman agree with me that the compromise language clearly expresses an intent that such loan requests be forwarded by the Marshall Islands to the U.S. Treasury without delay?

Mr. SOLARZ. Yes, the language is quite clear that the requests will be forwarded within 2 weeks.

Mr. SEIBERLING. And does the gentleman agree that failure of the Marshall Islands to forward the requests in a timely way would be contrary to the applicable provisions, and thus would be a matter the United States would have to regard as less than full compliance with the compact and the implementing legislation?

Mr. SOLARZ. Yes, and the United States would resort to the dispute resolution provisions of the compact under those circumstances.

Mr. UDALL. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

Mr. LAGOMARSINO. Mr. Chairman, I yield back the balance of my time.

Mr. MAZZOLI. Mr. Chairman, I yield 2 minutes to the gentleman from Texas [Mr. BRYANT].

Mr. BRYANT. Mr. Chairman, I thank the gentleman from Kentucky for yielding.

Mr. Chairman, I rise to express my concern about the serious constitutional questions surrounding the claims provisions in section 177 of the Compact of Free Association.

Under section 177 of the compact, the United States accepts responsibility for compensating citizens of the Marshall Islands for losses and damages suffered as the result of U.S. atmospheric testing of nuclear weapons. My particular concern centers on the separate agreement referred to in section 177 which was signed in 1983 and goes into effect upon approval of the compact. Article X of that agreement provides for espousal of all claims of Marshallese citizens against the United States by the government of the Marshall Islands.

Article XII provides that all pending claims are to be terminated and the courts of the United States are not to have jurisdiction of any such claims.

The U.S. Court of Claims has determined that the Marshallese citizens are today entitled to protection under the fifth amendment of the Constitution. In spite of that determination, the Government of the United States in this separate agreement provided that all these claims be settled through this espousal provision and terminated all pending claims. The Marshallese now have claims pending in the U.S. Claims Court for $5 billion.

Mr. Chairman, I question whether the elimination of the rights of these citizens to press their claims is constitutional. I wish the record to reflect that this serious concern about this portion of the compact has been raised.

Mr. Chairman, I insert at this point the Congressional Research Service study on the question of the constitutionality of the taking over of these claims, as follows:

CONGRESSIONAL RESEARCH SERVICE,
THE LIBRARY OF CONGRESS,
Washington DC, April 2, 1985.

From: American Law Division.

Subject: Espousal of Claims Under the Compact for Free Association.

This memorandum is submitted to response to your request for a legal analysis of the espousal of claims provisions in the proposed Compact of Free Association, by which the Marshallese Nuclear Test claims would be settled. In spite of the relatively simple language used in section 177 and its implementing agreement, the procedure set forth is highly complex in its effects from a strict legal perspective. It would seem that many of the legal problems or issues discussed here may eventually have to be resolved by the courts even if the Compact is approved.

The first problem that arises from a purely legal analysis is that while the descriptive term "espousal" is used to describe the mechanism provided for, it is not a true espousal procedure as is generally practiced in international relations and is in fact quite a different procedure with respect to United States participation. From a United States action stance, espousal usually refers to the practice of the United States representing the claims of its nationals against foreign sovereigns. Here, in effect, the nuclear claims are against the United States itself, and they have been brought by individuals who, although not strictly its own nationals in the sense that the United States has complete sovereignty over them, yet who arguably cannot rightfully be classifiable for the purpose of bringing claims against the United States except as quasi-nationals, since the territory that they inhabit is under a strategic trusteeship administered by the United States. Thus, the term "espousal", if it is to be used at all, really refers only to the possible relationship between such individual claimants and the Government of the Marshall Islands when and if it is ever established as a true sovereign in international law. Until such time, there would not seem to be any possibility of an espousal of claims within an international law categorization. It is also possible that a court might hold under proper challenge that the foreign affairs provisions of the Compact prevent such entity from ever becoming a sovereign, particularly in the area of foreign affairs and especially with respect to its relations with the United States. It might be relevant that the foreign affairs authority is the one upon which espousal of claims rests. Thus, it would seem that an analysis of a legal nature would have to approach the issues presented here on two tiers. First, from the issue of whether the Government of the Marshall Islands can in law ever espouse the claims of such claim-

ants. Second, as to whether the United States has the authority to establish and entity of its own creation to settle claims, claims which may be based on violations of constitutional rights.

IS THERE AN ESPOUSAL

An argument could be made that might persuade a court that there cannot be an espousal of claims by the Government of the Marshall Islands in the situation here. Interestingly, this tact would involve looking at two complexities of the same international law doctrine, the so-called "nationality of the claim". Both aspects revolve around the fact that the claimants here were not nationals of the Government of the Marshall Islands because that Government was not in existence at the time that the claims arose.

First, it might be argued that the claimants under the doctrine of "nationality of the claim" were not citizens of that Government. "The variety of situations which may arise in practice makes the interpretation and application of the principle not an easy, mechanical task. . . . (S)pecial situations certainly make the admissibility of the international claim a difficult determination from the standpoint of the nationality requirement. There is, however, a general rule which seems to prevail both in diplomatic practice and in international caselaw. Such rule was formulated by the Preparatory Committee of the Hague Codification Conference (1930) in its Basis of Discussion No. 241, in its first paragraph, 'A state may not claim a pecuniary indemnity in respect of damage suffered by a private person in the territory of a foreign State unless the injured person was the national at the moment when the damage was caused and retains its nationality until the claim is decided.' " F.V. Garcia-Amador, "The Changing Law of International Claim," Vol. II (1984), at 503.

Second, since the Government of the Marshall Islands did not exist as a foreign sovereign at the time the claims arose, it might be asserted that it cannot represent the claimants. A claimant state neither represents the national who has sustained the injury nor gives effects to his "right", but rather the claimant state represents its own right to have its own citizens treated by other states in accordance with international law. Note, "The Nature and Extent of Executive Power to Espouse the International Claims of United States Nationals," 7 VAND. J. TRANSN'L L. 95, 97 (1973). This contention appears to be bolstered by the unique facts in this instance that the claimants were more akin to nationals of the United States at the time of the injury, and that if a change of nationality for the purpose of bringing claims could be effectuated in the manner as attempted here, such would amount to an attempted grant of retroactive sovereignty. Further, considering the confusion and disagreement on where or who presently has sovereign rights in the Trust Territory (see, e.g., *People of Saipan* v. *United States Department of Interior*, 356 F. Supp. 645 (D. Haw. 1973), aff'd as modified on other grounds, 502 F. 2d 90 (9th Cir. 1974), cert den. 420 U.S. 1003 (1975)), it would seem especially difficult for the purposes of nationality of claim requirements to establish that the Marshall Islands is or was foreign territory for the purpose of an international claim and that the Government of the Marshall Islands is the proper successor to sovereign rights for the purpose of asserting such claims. Legal complexity is added by the fact that it is possible for the Compact to become effective prior to the actual termination of the Trust Territory.

CAN THE U.S. CONGRESS CREATE SUCH A SETTLEMENT MECHANISM

While the Congress can settle claims by legislation (a notable example might be legislative enactments settling Indian land claims, see, e.g., 25 U.S.C. Secs. 1701 and 1721), the nature and extent of such legislative prescription is not clearly defined. In fact, a case is now pending decision in the Supreme Court in which the high court is being asked to pass on a legislative scheme which calls for a mandatory arbitration procedure in which there is limited judicial review (see, *Thomas* v. *Union Carbide Agricultural Products*, No. 84-497). Likewise, even the power of the President is not unlimited in this respect. While *Dames & Moore* v. *Reagan*, 453 U.S. 654 (1981) is often cited to represent that contention, the Supreme Court was careful to state therein that it does "not decide that the President possesses plenary power to settle claims, even as against foreign governmental entities. * * * '(t)he sheer magnitude of such a power, considered against the background of the diversity and complexity of modern international trade, cautions against any broader construction than is necessary.' "

Assuming that this settlement procedure is rightfully not classifiable as an espousal commonly practiced under international relations, and is merely an attempt to create a body to determine the validity of claims and the amount of compensation, if any, to be given to an individual claimant, at least two aspects seem troublesome from a constitutional overview. First, unlike some mixed bodies in which the United States had or has representation, such as the Iran-United States International Claims Tribunal, here there is to be established a totally "foreign" Claims Tribunal which presumably will be able to determine any legal issue based on the law of the Marshall Islands, international law, or law of the United States. Not only is this arguably a delegation to settle claims without any standards to be applied but also seems to be a grant of judicial authority by bestowing it upon a private body in violation of separation of powers. Further, it might be considered an overreaching of the foreign affairs power by bestowing such an authority totally on a foreign entity. Second, is the absolute bar to seeking relief in United States courts. The fact that there may be a bar to judicial relief for arbitrary actions of the established Claims Tribunal itself, or the termination of certain suits that are based on violations of constitutional rights, might have problems possibly running afoul of the Constitution. Apparently, a February 1985 Claims Court decision has held that the claimants have a right to seek just compensation under the Fifth Amendment (Los Angeles Daily Journal, March 7, 1985).

□ 2030

Mr. SEIBERLING. Mr. Chairman, will the gentleman yield?

Mr. BRYANT. I yield to the gentleman from Ohio.

Mr. SEIBERLING. Let me say to the gentleman if it is unconstitutional, we have protected the rights of all of these people and suspended the statute, and hold the statute of limitations pending any litigation that would result in such a declaration.

Mr. BRYANT. I thank the gentleman and I yield back the balance of my time.

Mr. LUNGREN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, the only subject matter that was before our subcommittee dealt with the question of immigration. I know that has been brought up already, and the gentleman from Nebraska has referred to it, and I would say that my only apprehension about this whole agreement, and one which I believe was shared by the chairmen of both the full Judiciary Committee and the Subcommittee on Immigration and International Law, is that the citizenship in the Freely Associated States not be used at some later time as a shortcut to permanent residence in the United States. I know there are some that wish that it be limited, and the ability under this compact be only to those who were actually born in those areas as opposed to those who were naturalized.

That is not the case, however. I do think we have language in here which will avoid the problem of taking advantage of that situation.

I know, for example, that section 141 of the compact specifically outlines the various means by which citizens of the FAS may enter this country, and I am aware that the Committee on Interior and Insular Affairs, during its deliberations, added an amendment offered by the gentleman from Ohio [Mr. SEIBERLING] which would have limited entry to bona fide citizens of the FAS.

A number of departments, Department of State, Justice, and Interior collectively believe that amendment to be redundant. But if redundancy is necessary in order to make the position of the House clear, then so be it.

I think one thing that ought to be clear to all Members is when we are talking about permanent residence, it is a unique type of residence. It does not grant them permanent residence that leads to citizenship, nor does it grant citizenship. It does allow them the right to come to the United States, and basically to live here permanently, but in a very, very unique way.

So we are not talking about allowing people to come here in a way that would allow them citizenship ultimately.

The point has been made that there is approximately 130,000, 137,000 people, that if all of them came here, as we do not think they will, that that would not terribly inundate the situation in California and other parts of the country. I would just suggest that the concerns raised by the gentleman from Nebraska are serious concerns. Those of us on our subcommittee ex-

pected to have the ability to perhaps have some amendments which would have clarified some of the legitimate concerns that were raised. I would just suggest that we were not party to any agreement, that agreement that was made by the principals involved here. I regret that. I think we could have drafted some language that may have clarified some of the problems that a number of Members have.

Be that as it may, I think that with the colloquy that took place a little bit earlier with the gentleman from Kentucky and the gentleman from Ohio, we have resolved the problem. I would just suggest I normally think it is better to resolve them in legislation rather than colloquy, and I hope we will do that in the future.

With that comment, Mr. Chairman, I would suggest that we would support this compact.

Mr. Chairman, I applaud the successful culmination of negotiations between this country and the Federated States of Micronesia which led to the compact before us today. It is an exceptional example of the kind of relationship which we can have with people and cultures whose future was entrusted to us following World War II. Unlike the Soviet Union, which has never granted a scintilla of independence to the countries over which it exercised influence during the postwar period, this compact is a reflection of our dedication to self-determination. I would hope that this body will wholeheartedly endorse it.

My only apprehension, and it is one which is shared by chairman of both the full Judiciary Committee and the Subcommittee on Immigration and International Law, is that citizenship in the Free Associated States [FAS] not be used at some later time as a shortcut to permanent residence in the United States. I know, for example, that section 141 of the compact specifically outlines the various means by which citizens of the FAS may enter this country, and I am aware that the Interior Committee, during its consideration, added an amendment offered by Mr. Seiberling which would have limited entry to "bona fide" citizens of the FAS. I know, too, that witnesses who appeared before us from the Departments of State, Justice, and Interior collectively believe the Seiberling amendment to be redundant.

If redundancy is necessary in order to make a position of the House clear, then so be it. It is imperative, though, that this new relationship between the United States and the FAS begin without distrust on either side, and that the people of Micronesia retain their strong ties to the people of the United States. The Soviet Union has already begun to stick its omnipresent nose inside the reefs which surround this archipelago of over 2,000 islands, and its presence raises a potential risk to our Pacific security. This compact will help speed the way to independence for these islands, and it will underscore the continuing relationship between this country and the trust territories of the Pacific. I urge the adoption of the bill.

Mr. Chairman, since I have no requests for time, I yield back the balance of my time.

Mr. MAZZOLI. Mr. Chairman, I yield myself 2 minutes.

Mr. Chairman, just briefly, I would tell our colleagues in the House that I share the regret expressed by my colleague from California, the ranking member of the Subcommittee on Immigration, that the committee did not indeed have an opportunity to craft the sorts of amendments that should have been crafted for this kind of legislation. We are creating a brandnew immigration right, the opportunity of a person who is a citizen, or even a naturalized citizen of these Freely Associated States to come into the United States permanently, without having any intention to become a citizen of the United States.

They can come in nowadays, but they have to come in for periods of time. They have to come in as a tourist, or as a student. But they will be able to freely enter in the future, and it is a right which could be abused. That is why I salute the gentleman from Ohio, [Mr. SEIBERLING], my friend, for as chairman of that Interior subcommittee, having put the language in the measure that does guard against most abuse. And I thank him for the colloquy in which we engaged earlier this evening which generally allays the many fears about the misuse of the opportunities of transiting, passing through for a brief period of time the Freely Associated States for the basic purpose of coming into the United States.

I would have preferred that the language of my friend from Nebraska, [Mr. BEREUTER], had been adopted as it was adopted by the Foreign Affairs Committee, and put in the final package which we have before us tonight. However, for reasons that are inexplicable to me, it is not in this version.

But I again pledge to my friend that so long as I am in this particular position, and so long as I have anything to do with immigration, we will carefully monitor and oversee the unreeling of this drama. We will demand the kind of data which will give us some idea of who is using this newly created nonimmigrant right of nonresidency in the United States. And I would certainly hope that we would have advance notice.

Mr. Chairman, having said that, I believe the measure is worth supporting, and I yield back the balance of my time.

Mr. FASCELL. Mr. Chairman, I yield back the balance of my time.

Mr. LEACH of Iowa. Mr. Chairman, I would simply indicate that the White House has just informed us that they can now support the compact as a move to go to conference, and I would yield back the balance of my time.

The CHAIRMAN. The gentleman from Illinois [Mr. ROSTENKOWSKI] is recognized for 15 minutes.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, today this body is faced with a rather complicated procedural situation, which we hope will result in successful completion by the House, of legislation to implement the compact of free association with Micronesia and the Marshall Islands. I am hopeful that the compromise which has been worked out by the committees of relevant jurisdiction will be accepted by our colleagues.

However, I would like to take this opportunity to express some concerns, on behalf of the Committee on Ways and Means, about the process which was utilized to negotiate this compact, and about the expedited congressional review which mandated hasty action by our committee. I would like my colleagues to know that we are hopeful this will not serve as precedent for future legislation. In particular, our committee was not consulted by the State Department during the 14-year period of negotiations on the compact. This was a gross oversight by the administration. Clearly, the Committee on Ways and Means has jurisdiction over tax and tariff laws, which this compact seeks to change. It will not be acceptable in the future for the administration to negotiate on its own without more thorough consultations with the appropriate committees of the Congress on matters that the Constitution entrusts to us.

The committee is also concerned that the expedited schedule for its consideration which gave us limited time to make appropriate changes in this legislation, not become a precedent. The very complex tax provisions in this bill and the sensitive issue of tariff provisions deserve more thorough analysis than the 1 week available to the Committee on Ways and Means, under this procedure.

Having stated my reservations about the procedures by which this bill has come to us today, I believe that we have been able to reach an acceptable compromise which recognizes the desires of the Micronesians for tax and trade related concessions while also recognizing the concerns of the members of the Committee on Ways and Means that we create neither a tax haven in the Pacific nor an open pipeline by which goods can flow through Micronesia to this country duty free.

Section 401 as amended would continue present tariff treatment for the freely associated states, rather than the far more liberal treatment proposed in the compact. The states could continue to be designated by the President as beneficiaries of duty-free preferential tariff treatment under the generalized system of preferences, as proposed by the Committee on Ways and Means. As amended, however, section 401 would increase incentives for economic development in these islands beyond GSP by permitting up to 15 percent of U.S. materials to be counted toward the minimum 35 percent local content required for duty-free treatment. The amendment preserves present requirements for substantial transformation and significant local content to ensure that economic benefits actually accrue to these islands and that U.S. tariff laws are not circumvented.

The compromise treats Micronesia and the Marshall Islands as if they were possessions for purposes of the possessions tax credit of Code section 936. If Congress amends section 936, that amendment will apply in Micronesia and the Marshall Islands 1 year after the enactment of the amendment. The compromise requires the Secretary of the Treasury to negotiate substantially equivalent benefits with Micronesia and the Marshall Islands. The negotiated agreement allowing benefits will not become effective unless and until an act of Congress implements it. To assure an agreement between the United States and the Freely Associated States, the compromise would allow those states to submit the matter to arbitration under the compact if not resolved within 1 year. The decision of the arbitration board would, when approved by law, be binding on the United States. The amendment does not extend to Micronesia and the Marshall Islands any of the other possession tax benefits.

The compromise follows the Ways and Means Committee's reported bill in preventing these islands from becoming tax havens. The compromise allows American individuals working in the Freely Associated States the foreign earned income exclusion of Internal Revenue Code section 911.

Importantly, the compromise does not freeze any of the existing possessions tax benefits, as suggested by the Interior Committee's amendment, leaving this important tax policy issue of possessions tax treatment to be considered in the context of comprehensive tax reform this fall.

Mr. FRENZEL. Mr. Chairman, will the gentleman yield?

Mr. ROSTENKOWSKI. I yield to the gentleman from Minnesota.

Mr. FRENZEL. Mr. Chairman, you directed my attention by your remarks to the section of the bill relating to the arbitration board.

□ 2040

This section allows the Micronesians to come back, should section 936 be deleted from the law, to negotiate with the Secretary of the Treasury for some kind of welfare payment to replace the tax concession.

It seems to me to be clear that whatever the arbitration board decides, that must be approved by law and that would mean an action in both Houses of the Congress.

Is that the chairman's impression?

Mr. ROSTENKOWSKI. My understanding is similar to what the gentleman stated.

Mr. FRENZEL. I thank the chairman.

Mr. DUNCAN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in support of the gentleman from Illinois [Mr. ROSTENKOWSKI]. Chairman ROSTENKOWSKI has accurately described both the tax and trade provisions of the compact as they would exist under the modified Committee on Ways and Means version. I will not describe them again other than to indicate that I believe they represent a fair balance between all the important competing interests which must be taken into consideration in shaping a reasonable package. In particular, it is important that the package not make possible either tax or trade abuses.

It is also important that the package preserve the special status afforded in the trade area to the Caribbean Basin which the Congress worked so hard on 2 years ago. The package described by the chairman achieves these goals in a reasonable manner while providing beneficial trade and tax incentives to Micronesia appropriate to the special relationship which the United States has with that area of the world. Finally, I think the chairman should be commended for the reasonable compromise developed, particularly in light of the unusual 1-week referral period which was shorter than members of the Committee on Ways and Means would have preferred. I urge the Members to support the version of the compact as developed in the Ways and Means Committee and modified by Chairman ROSTENKOWSKI's amendment.

Mr. Chairman, I yield such time as he may consume to the gentleman from Minnesota [Mr. FRENZEL], a valuable member of the committee.

Mr. FRENZEL. Mr. Chairman, I do not disagree with any of the previous speakers about the security needs that have generated this particular compact. I think the gentleman from Arizona [Mr. MCCAIN] has shown us the acute needs and the particular strategic importance of the missile range.

I do, however, object to the procedures, as I indicated in my discussion on the role. We have been dickering for 14 years. We have held this trusteeship for 40 years. Now we suddenly have an emergency which requires that we make certain decisions in less than a week and we do some plain and fancy drafting this evening in less than an hour.

We had plenty of time to negotiate with each and every one of the 130,000, more or less, inhabitants of the area, had we wanted to.

Mr. Chairman, I would like to discuss the trade sections of the bill because the Members of the House have been very nervous about offering trade concessions to anybody.

Micronesia, under this bill, does get the trade concessions of GSP. The GSP bill extends for 8 years and expires.

In addition to that concession they have a 15-percent U.S. component credit which gives them a better deal than other GSP countries, but not excessively better. There is a tuna exemption which does not exist in the GSP law. So to that extent it is slightly stricter.

This area has been given the advantage of section 936, which is a well-known tax preference available within the U.S. possessions.

However, section 936 has been slated for repeal in the President's tax reform message. Under this bill Micronesia gets section 936, 1 year longer in the case of repeal than any of our possessions.

It also gets section 911, as other countries do, for earned income of Americans resident abroad.

With respect to the general tax matters, one of the speakers indicated that these people would be treated like citizens of any other country. That is not quite accurate. If that were true we would not need a tax section.

There are differences. It is hard to compute how the fortunes of Micronesia are going to compare with the fortunes of other American possessions.

One of my real objections to this is we have not had time to have a hearing so we can go through this and make sure of what we were doing.

A really important objection of mine is that taxes and trade are being given up for security needs.

I strongly object to buying security concessions, leases and agreements by giving away tax and trade preferences. If we have geopolitical and security needs, my judgment is that they ought to be bought by the Department of Defense and State Department appropriations.

I do not believe that creating extra tax preferences which most members of the American community feel we have too many of, are a reasonable way to conduct this kind of diplomacy.

I believe that after lolligagging either for 40 or 14 years we have now created a sudden emergency against

which we must act. I have tried to be responsible and not object to any of the procedures that are taking place here, and I shall not.

But I simply call the attention of the members of this Committee and the American people, the American public, that we are doing something very unusual and I have a strong objection to section 936 where, if this area loses a particular tax preference that now attaches only to American possessions, it gets an extra year of that tax preference and then implicit in the bill is granted a special payoff thereafter.

Mr. Chairman, I do not suggest that anyone vote against this bill. I, however, intend to do so.

Mr. DUNCAN. Mr. Chairman, I yield back the balance of my time.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The gentleman from North Carolina [Mr. JONES] and the gentleman from New York [Mr. LENT] yield back the balance of their time.

● Mr. JONES of North Carolina. Mr. Chairman, House Joint Resolution 187, a resolution to approve the Compact of Free Association, was sequentially referred to the Committee on Merchant Marine and Fisheries.

The membership of the Committee on Merchant Marine and Fisheries had several concerns with the resolution as introduced. In particular, the committee was concerned over the provisions relating to international oceans and fishery policy, obligations of the U.S. Coast Guard, and obligations of the U.S. Coast Guard and Merchant Marine Academies that were included within the resolution, as well as the compact, and subsidiary agreements.

The rule under which House Joint Resolution 187 is being considered makes two amendments in order—House Joint Resolutions 343 and 344. Neither of these resolutions were referred to the Committee on Merchant Marine and Fisheries, but they should have been. In particular, it should be noted that language developed in the Committee on Merchant Marine and Fisheries which amended House Joint Resolution 187 can be found in the pertinent sections of both House Joint Resolutions 343 and 344—sections 102 and 103 relating to law enforcement services of the Coast Guard, section 104 relating to various aspects of U.S. fisheries policy, including the Magnuson Fishery Conservation and Management Act and the Fishermen's Protective Act, section 105 relating to the conservation and management of fish and wildlife through the services and advice of the U.S. Fish and Wildlife Service and the National Marine Fisheries Service and to training and assistance services of the U.S. Coast Guard for law enforcement and navigation. Concerns of the Committee on Merchant Marine and Fisheries and that committees actions on House Joint Resolution 187 are spelled out in House Report 99-188, part 3.

House Joint Resolution 187 was introduced at the request of the administration and I believe this bill is important for many reasons. First, it would bring about the self-determination of the Micronesian peoples. Second, it establishes a long-term relationship between the Freely Associated States and the United States. Third, it protects our strategic interests by securing the status of our military installation in the area. And last, it allows the United States to deny the military presence of other countries in the area. Like most members, I am not happy about the pricetag of this measure; however, I understand that it will save several million dollars over what the United States is spending under the current trusteeship arrangement. Therefore, I urge my fellow Members to vote in favor of final passage of House Joint Resolution 187.●

● Mr. BLAZ. Mr. Chairman, about 40 years ago the war in the Pacific was ending after a long hard-fought island campaign that added strange sounding names to our headlines: The Pacific battle fields of Kwajalein, Saipan, Tinian, and Peleliu were etched into the American consciousness.

Today the House acts on an historic and unprecedented agreement that secures the regional stability won by those costly victories on the beaches and ridges of Micronesia.

At the end of World War II, this great Nation assumed a sacred trust for the war-ravaged people on those western Pacific islands. We rejected the notion that these people and their islands were a prize of war. Rather, we pledged to the community of nations to be the guardian and mentor of Micronesia. We vowed to protect, nurture, and guide the 50,000 people of those far-flung islands into nationhood.

Today there are 150,000 Micronesians. We have rebuilt their islands, replenished their lives, and assisted them in establishing their constitutional governments based on the American democratic model. The Micronesians are ready and eager to assume their place in the world.

Their declaration of self-government lies before the U.S. Congress today as the House considers and votes on House Joint Resolution 344, to approve the Compact of Free Association between the United States and the governments of the Federated States of Micronesia [FSM] and the Marshall Islands.

These two entities are currently part of the Trust Territory of the Pacific Islands—usually referred to as Micronesia—which was established in 1947 by the United Nations under a trusteeship agreement administered by the United States.

Micronesia covers an ocean area slightly larger than the continental United States, with more than 2,100 islands, about 100 of which are inhabited.

House Joint Resolution 344, along with the compact and the subsidiary agreements, secures our strategic interests in the region while fulfilling our international obligation to promote the development of the islands toward self-government.

As a Member of Congress who grew up in the Micronesian region, I have developed a special appreciation of the Micronesian people's strong desire for an enduring relationship with the United States.

As I have done in the past, I again urge all my colleagues in this august body to support and approve the Compact of Free Association. The compact is the product of 15 years of serious and complex negotiations carried out by four U.S. administrations and approved by the Micronesians in several plebiscites.

The agreement provides mutual benefits to the Micronesians and the United States. It would significantly benefit our Nation militarily, economically, and politically.

The agreement provides the United States the right to deny access to all other nations to the land, air, and seas of this vast region of the central Pacific indefinitely, thereby protecting the security of our vital sealanes and communications and preventing the establishment of any hostile onshore installations. It also provides the United States access for 30 years to the crucial Kwajalein missile range.

The compact saves the U.S. taxpayers more than $300 million in the cost of administering the territory if we were to continue the trusteeship.

The compact will greatly benefit the people of the Federated States of Micronesia and the Marshall Islands by establishing their sovereignty and autonomy over their domestic and foreign affairs.

The compact provides generous financial assistance and economic development incentives to ensure that these new states can assume an increasing responsibility for funding their government operations and provides a progressive standard of living for their citizens.

This document will stand as an American legacy to a group of people for whom we have accepted a sacred trust. It will show the Pacific community that we will enter the next century in a strong strategic posture, but

also as a nation able to build good will in the region through creative and democratic arrangements oriented toward economic development through private enterprise.

The Micronesians have come of age and are ready to fulfill their destiny. Our approval of the compact today will fulfill that commitment.●

● Mr. LEHMAN of California. Mr. Chairman, I rise to commend the efforts of all of those who have contributed to fashioning this important legislation.

This compact contains a number of important provisions regarding our relationship with the Federated States of Micronesia and the Marshall Islands, including national security, economic development, and resource management.

All of these are important components of the compact and recognize the important historical relationship which the United States has maintained with the inhabitants of the Pacific Trust Territory. Inherent in this historical relationship is the obligation and responsibility of the United States regarding the effects of U.S. post-World War II nuclear bomb testing on Bikini and Enewetak Atolls in the Marshall Islands.

The compact establishes a $150 million trust fund to settle approximately $5 billion in damage claims against the United States as a result of the nuclear testing and has other provisions to address this issue.

While I support the agreement as provided for in the compact, I would like to reiterate the clear moral responsibility that the United States has with regard to providing for a habitable, radiation-free environment for the people of these islands. The compact only begins to make amends for the health and safety compromises which were made to their culture and individual well-being.

Let the compact and its nuclear compensation provisions be a small reminder to this government and the American people of our moral responsibility and obligation to our friends in these Pacific Islands.

Though this compact is not perfect, it does reflect many years of hard work and well thought out compromises and I urge my colleagues to join me in supporting the House Joint Resolution 187.●

● Mr. RICHARDSON. Mr. Chairman, as a cosponsor, I rise in strong support of House Joint Resolution 187 to approve the compact of free association. This well conceived compact balances the economic, social, and defense needs of the United States with those of the Federated States of Micronesia [FSM] and the Marshall Islands. This new relationship between the United States, the FSM, and the Marshall Islands must be one which respects the dignity of all concerned and provides a safe environment in which development is fostered.

The choice of the people of the Federated States of Micronesia and the Marshall Islands for the status of free association was made voluntarily through a national plebiscite; this choice must be honored. The status of freely associated states is unique. It gives the FMS and Marshall islands certain benefits accorded to the commonwealths and territories of the United States as well as those of independent nations. The impact of the compact of free association on our flag territories has not been ignored in our negotiations. The Udall-Fascell substitute offers a compact which is judicious and fair to the development of the United States, its territories, and the FSM and Marshalls.

I believe development will be fostered by a significant increase in the U.S.-funded construction program in the Micronesia area. The American preference provision included in House Joint Resolution. 187 will reinforce this cooperative relationship. U.S. contractors will maintain their Pacific markets against heavily subsidized foreign contractors while the islands will benefit from the hiring and training of local labor. The American preference is regulated not by the AID definition of contractor but also by a limitation on the award of construction projects to U.S. contractors if adequate competition exists. Thus, American contractors will be given preference while the governments of the freely associated states will not suffer undue expense due to projects built by U.S. companies.

I urge my colleagues to support this effort to establish a positive and balanced relationship between the United States, FSM, and the Marshall Islands. The approval of the Udall-Fascell substitute will guarantee that the best interests of all involved are adopted.

We have included in this bill a requirement that construction projects aggregating $1 million or more be awarded only to bona fide United States and local Micronesian and Marshalls contractors, provided that the lowest U.S. or local bid is within 20 percent of the government estimate for the project. Along those lines, we expect the United States to provide to those governments such technical assistance as is necessary to enable them to make accurate estimates of the cost of such projects.

To protect against the undesirable possibility of foreign contractors fronting as U.S. or local firms to secure these construction contracts, we have included definitions of U.S. and local contractors. For instance, a local contractor's assets must be "at least 60 percent owned or controlled in fact by citizens of the FSM and the Marshalls."

It is certainly our intention to prevent foreign firms from qualifying as local companies through creative "class A/class B" stock schemes or by suddenly having 60 percent of their stockholders declared FAS citizens. In developing definitions of U.S. and local firms, we borrowed heavily from the policies of the Agency for International Development [AID]. AID defines asset ownership as ownership of each class of stock or partnership interest and that is what we mean here. Prevent foreign firms from doing that.

I don't want any loopholes in the contract preference provision through which a creative foreign company could get these contracts. We have directed the President to issue regulations to implement this preference, and I want to be sure the regulations prevent foreign firms from passing themselves off as American or local firms.

Once again, I don't want any loopholes in the contract preference provision through which a creative foreign company could get these contracts. We have directed the President to issue regulations to implement this preference, and I want to be sure the regulations prevent foreign firms from passing themselves off as American or local firms.●

The CHAIRMAN. All time has expired.

Pursuant to House Resolution 235, the joint resolution is considered as having been read for amendment under the 5-minute rule.

The text of House Joint Resolution 187 is as follows:

H.J. RES. 187

Whereas the United States is the administering authority of the Trust Territory of the Pacific Islands under the terms of the Trusteeship Agreement for the former Japanese Mandated Islands entered into by the United States with the Security Council of the United Nations on April 2, 1947, and approved by the United States on July 18, 1947; and

Whereas the United States, in accordance with the Trusteeship Agreement, the Charter of the United Nations and the objectives of the international trusteeship system, has promoted the development of the peoples of the Trust Territory toward self-government or independence as appropriate to the particular circumstances of the Trust Territory and its peoples and the freely expressed wishes of the peoples concerned; and

Whereas the United States, in response to the desires of the peoples of the Federated States of Micronesia and the Marshall Islands expressed through their freely-elected representatives and by the official pronouncements and enactments of their lawfully constituted governments, and in consideration of its own obligations under the Trusteeship Agreement to promote self-determination, entered into political status negotiations with representatives of the peoples of the Federated States of Micronesia, and the Marshall Islands; and

Whereas these negotiations resulted in the "Compact of Free Association" which, together with its related agreements, was

signed by the United States and by the Federated States of Micronesia and the Republic of the Marshall Islands on October 1, 1982 and June 25, 1983, respectively; and

Whereas the Compact of Free Association was approved by majorities of the peoples of the Federated States of Micronesia and the Marshall Islands in United Nations-observed plebiscites conducted on June 21, 1983 and September 7, 1983, respectively; and

Whereas the Compact of Free Association has been approved by the Governments of the Federated States of Micronesia and the Marshall Islands in accordance with their respective constitutional processes, thus completing fully for the Federated States of Micronesia and the Marshall Islands their domestic approval processes with respect to the Compact as contemplated in Compact Section 411: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Compact of Free Association, the text of which follows, is hereby approved and the President is authorized to agree to an effective date for and thereafter to implement the Compact of Free Association, having taken into account any procedures with respect to the United Nations for termination of the Trusteeship Agreement:

COMPACT OF FREE ASSOCIATION

PREAMBLE

THE GOVERNMENT OF THE UNITED STATES OF AMERICA AND THE GOVERNMENTS OF THE MARSHALL ISLANDS AND THE FEDERATED STATES OF MICRONESIA

Affirming that their Governments and their relationships as Governments are founded upon respect for human rights and fundamental freedoms for all, and that the peoples of the Trust Territory of the Pacific Islands have the right to enjoy self-government; and

Affirming the common interests of the United States of America and the peoples of the Trust Territory of the Pacific Islands in creating close and mutually beneficial relationships through two free and voluntary associations of their respective Governments; and

Affirming the interest of the Government of the United States in promoting the economic advancement and self-sufficiency of the peoples of the Trust Territory of the Pacific Islands; and

Recognizing that their previous relationship has been based upon the International Trusteeship System of the United Nations Charter, and in particular Article 76 of the Charter; and that pursuant to Article 76 of the Charter, the peoples of the Trust Territory have progressively developed their institutions of self-government, and that in the exercise of their sovereign right to self-determination they have, through their freely-expressed wishes, adopted Constitutions appropriate to their particular circumstances; and

Recognizing their common desire to terminate the Trusteeship and establish two new government-to-government relationships each of which is in accordance with a new political status based on the freely-expressed wishes of peoples of the Trust Territory of the Pacific Islands and appropriate to their particular circumstances; and

Recognizing that the peoples of the Trust Territory of the Pacific Islands have and retain their sovereignty and their sovereign right to self-determination and the inherent right to adopt and amend their own Constitutions and forms of government and that the approval of the entry of their respective Governments into this Compact of Free Association by the peoples of the Trust Territory of the Pacific Islands constitutes an exercise of their sovereign right to self-determination;

NOW, THEREFORE, AGREE to enter into relationships of free association which provide a full measure of self-government for the peoples of the Marshall Islands and the Federated States of Micronesia; and

FURTHER AGREE that the relationships of free association derive from and are as set forth in this Compact; and that, during such relationships of free association, the respective rights and responsibilities of the Government of the United States and the Governments of the freely associated states of the Marshall Islands and the Federated States of Micronesia in regard to these relationships of free association derive from and are as set forth in this Compact.

TITLE ONE

GOVERNMENTAL RELATIONS

Article I

Self-Government

Section 111

The peoples of the Marshall Islands and the Federated States of Micronesia, acting through the Governments established under their respective Constitutions, are self-governing.

Article II

Foreign Affairs

Section 121

(a) The Governments of the Marshall Islands and the Federated States of Micronesia have the capacity to conduct foreign affairs and shall do so in their own name and right, except as otherwise provided in this Compact.

(b) The foreign affairs capacity of the Governments of the Marshall Islands and the Federated States of Micronesia includes:

(1) the conduct of foreign affairs relating to law of the sea and marine resources matters, including the harvesting, conservation, exploration or exploitation of living and non-living resources from the sea, seabed or subsoil to the full extent recognized under international law;

(2) the conduct of their commercial, diplomatic, consular, economic, trade, banking, postal, civil aviation, communications, and cultural relations, including negotiations for the receipt of developmental loans and grants and the conclusion of arrangements with other governments and international and intergovernmental organizations, including any matters specially benefiting their individual citizens.

(c) The Government of the United States recognizes that the Governments of the Marshall Islands and the Federated States of Micronesia have the capacity to enter into, in their own name and right, treaties and other international agreements with governments and regional and international organizations.

(d) In the conduct of their foreign affairs, the Governments of the Marshall Islands and the Federated States of Micronesia confirm that they shall act in accordance with principles of international law and shall settle their international disputes by peaceful means.

Section 122

The Government of the United States shall support applications by the Governments of the Marshall Islands and the Federated States of Micronesia for membership or other participation in regional or international organizations as may be mutually agreed. The Government of the United States agrees to accept for training and instruction at the Foreign Service Institute, established under 22 U.S.C. 4021, citizens of the Marshall Islands and the Federated States of Micronesia. The qualifications of candidates for such training and instruction and all other terms and conditions of participation by citizens of the Marshall Islands and the Federated States of Micronesia in Foreign Service Institute programs shall be as mutually agreed between the Government of the United States and the Governments of the Marshall Islands and the Federated States of Micronesia.

Section 123

(a) In recognition of the authority and responsibility of the Government of the United States under Title Three, the Governments of the Marshall Islands and the Federated States of Micronesia shall consult, in the conduct of their foreign affairs, with the Government of the United States.

(b) In recognition of the respective foreign affairs capacities of the Governments of the Marshall Islands and the Federated States of Micronesia, the Government of the United States, in the conduct of its foreign affairs, shall consult with the Government of the Marshall Islands or the Federated States of Micronesia on matters which the Government of the United States regards as relating to or affecting any such Government.

Section 124

The Government of the United States may assist or act on behalf of the Government of the Marshall Islands or the Federated States of Micronesia in the area of foreign affairs as may be requested and mutually agreed from time to time. The Government of the United States shall not be responsible to third parties for the actions of the Government of the Marshall Islands or the Federated States of Micronesia undertaken with the assistance or through the agency of the Government of the United States pursuant to this Section unless expressly agreed.

Section 125

The Government of the United States shall not be responsible for nor obligated by any actions taken by the Government of the Marshall Islands or the Federated States of Micronesia in the area of foreign affairs, except as may from time to time be expressly agreed.

Section 126

At the request of the Government of the Marshall Islands or the Federated States of Micronesia and subject to the consent of the receiving state, the Government of the United States shall extend consular assistance on the same basis as for citizens of the United States to citizens of the Marshall Islands and the Federated States of Micronesia for travel outside the Marshall Islands and the Federated States of Micronesia, the United States and its territories and possessions.

Section 127

Except as otherwise provided in this Compact or its related agreements, all obligations, responsibilities, rights and benefits of the Government of the United States as Administering Authority which have resulted from the application pursuant to the Trust-

eeship Agreement of any treaty or other international agreement to the Trust Territory of the Pacific Islands on the day preceding the effective date of this Compact are no longer assumed and enjoyed by the Government of the United States.

Article III

Communications

Section 131

(a) The Governments of the Marshall Islands and the Federated States of Micronesia have full authority and responsibility to regulate their respective domestic and foreign communications, and the Government of the United States shall provide communications assistance in accordance with the terms of a separate agreement which shall come into effect simultaneously with this Compact, and such agreement shall remain in effect until such time as any election is made pursuant to Section 131(b) and which shall provide for the following:

(1) the Government of the United States remains the sole administration entitled to make notification to the International Frequency Registration Board of the International Telecommunications Union of frequency assignments to radio communications stations respectively in the Marshall Islands and the Federated States of Micronesia; and to submit to the International Frequency Registration Board seasonal schedules for the broadcasting stations respectively in the Marshall Islands and the Federated States of Micronesia in the bands allocated exclusively to the broadcasting service between 5,950 and 26,100 kHz and in any other additional frequency bands that may be allocated to use by high frequency broadcasting stations; and

(2) the United States Federal Communications Commission has jurisdiction, pursuant to the Communications Act of 1934, 47 U.S.C. 151 *et seq.*, and the Communications Satellite Act of 1962, 47 U.S.C. 721 *et seq.*, over all domestic and foreign communications services furnished by means of satellite earth terminal stations where such stations are owned or operated by United States common carriers and are located in the Marshall Islands or the Federated States of Micronesia.

(b) The Government of the Marshall Islands or the Federated States of Micronesia may elect at any time to undertake the functions enumerated in Section 131(a) and previously performed by the Government of the United States. Upon such election, the Government of the United States shall so notify the International Frequency Registration Board and shall take such other actions as may be necessary to transfer to the electing Government the notification authority referred to in Section 131(a) and all rights deriving from the previous exercise of any such notification authority by the Government of the United States.

Section 132

The Governments of the Marshall Islands and the Federated States of Micronesia shall permit the Government of the United States to operate telecommunications services in the Marshall Islands and the Federated States of Micronesia to the extent necessary to fulfill the obligations of the Government of the United States under this Compact in accordance with the terms of separate agreements which shall come into effect simultaneously with this Compact.

ARTICLE IV

Immigration

Section 141

(a) Any person in the following categories may enter into, lawfully engage in occupations, and establish residence as a nonimmigrant in the United States and its territories and possessions without regard to paragraphs (14), (20), and (26) of section 212(a) of the Immigration and Nationality Act, 8 U.S.C. 1182(a) (14U5), (20), and (26):

(1) a person who, on the day preceding the effective date of this Compact, is a citizen of the Trust Territory of the Pacific Islands, as defined in Title 53 of the Trust Territory Code in force on Janaury 1, 1979, and has become a citizen of the Marshall Islands or the Federated States of Micronesia.

(2) a person who acquires the citizenship of the Marshall Islands or the Federated States of Micronesia at birth, on or after the effective date of the respective Constitution;

(3) a naturalized citizen of the Marshall Islands or the Federated States of Micronesia who has been an actual resident there for not less than five years after attaining such naturalization and who holds a certificate of actual residence; or

(4) a person entitled to citizenship in the Marshall Islands by lineal descent whose name is included in a list to be furnished by the Government of the Marshall Islands to the United States Immigration and Naturalization Service and any descendants of such persons, provided that such person holds a certificate of lineal descent issued by the Government of the Marshall Islands.

Such persons shall be considered to have the permission of the Attorney General of the United States to accept employment in the United States.

(b) The right of such persons to establish habitual residence in a territory or possession of the United States may, however, be subjected to non-discriminatory limitations provided for:

(1) in statutes or regulations of the United States; or

(2) in those statutes or regulations of the territory or possession concerned which are authorized by the laws of the United States.

(c) Section 141(a) does not confer on a citizen of the Marshall Islands or the Federated States of Micronesia the right to establish the residence necessary for naturalization under the Immigration and Nationality Act, or to petition for benefits for alien relatives under that Act. Section 141(a), however, shall not prevent a citizen of the Marshall Islands or the Federated States of Micronesia from otherwise acquiring such rights or lawful permanent resident alien status in the United States.

Section 142

(a) Any citizen or national of the United States may enter into, lawfully engage in occupations, and reside in the Marshall Islands or the Federated States of Micronesia, subject to the rights of those Governments to deny entry to or deport any such citizen or national as an undesirable alien. A citizen or national of the United States may establish habitual residence or domicile in the Marshall Islands or the Federated States of Micronesia only in accordance with the laws of the jurisdiction in which habitual residence or domicile is sought.

(b) With respect to the subject matter of this Section, the Government of the Marshall Islands or the Federated States of Micronesia shall accord to citizens and nationals of the United States treatment no less favorable than that accorded to citizens of other countries; any denial of entry to or deportation of a citizen or national of the United States as an undesirable alien must be pursuant to reasonable statutory grounds.

Section 143

(a) The privileges set forth in Sections 141 and 142 shall not apply to any person who takes an affirmative step to preserve or acquire a citizenship or nationality other than that of the Marshall Islands, the Federated States of Micronesia or the United States.

(b) Every person having the privileges set forth in Sections 141 and 142 who possesses a citizenship or nationality other than that of the Marshall Islands, the Federated States of Micronesia or the United States ceases to have these privileges two years after the effective date of this Compact, or within six months after becoming 21 years of age, whichever comes later, unless such person executes an oath of renunciation of that other citizenship or nationality.

Section 144

(a) A citizen or national of the United States who, after notification to the Government of the United States of an intention to employ such person by the Government of the Marshall Islands or the Federated States of Micronesia, commences employment with such Government shall not be deprived of his United States nationality pursuant to Section 349(a)(2) and (a)(4) of the Immigration and Nationality Act, 8 U.S.C. 1481 (a)(2) and (a)(4).

(b) Upon such notification by the Government of the Marshall Islands or the Federated States of Micronesia, the Government of the United States may consult with or provide information to the notifying Government concerning the prospective employee, subject to the provisions of the Privacy Act, 5 U.S.C. 552a.

(c) The requirement of prior notification shall not apply to those citizens or nationals of the United States who are employed by the Government of the Marshall Islands or the Federated States of Micronesia on the effective date of this Compact with respect to the positions held by them at that time.

Article V

Representation

Section 151

The Government of the United States and the Government of the Marshall Islands or the Federated States of Micronesia may establish and maintain representative offices in the capital of the other for the purpose of maintaining close and regular consultations on matters arising in the course of the relationship of free association and conducting other government business. The Governments may establish and maintain additional offices on terms and in locations as may be mutually agreed.

Section 152

(a) The premises of such representative offices, and their archives wherever located, shall be inviolable. The property and assets of such representative offices shall be immune from search, requisition, attachment and any form of seizure unless such immunity is expressly waived. Official communications in transit shall be inviolable and accorded the freedom and protections accorded by recognized principles of international law to official communications of a diplomatic mission.

(b) persons designated by the sending Government may serve in the capacity of its resident representatives with the consent of the receiving Government. Such designated

persons shall be immune from civil and criminal process relating to words spoken or written and all acts performed by them in their official capacity and falling within their functions as such representatives, except insofar as such immunity may be expressly waived by the sending Government. While serving in a resident representative capacity, such designated persons shall not be liable to arrest or detention pending trial, except in the case of a grave crime and pursuant to a decision by a competent judicial authority, and such persons shall enjoy immunity from seizure of personal property, immigration restrictions, and laws relating to alien registration, fingerprinting, and the registration of foreign agents.

(c) The sending Governments and their respective assets, income and other property shall be exempt from all direct taxes, except those direct taxes representing payment for specific goods and services, and shall be exempt from all customs duties and restrictions on the import or export of articles required for the official functions and personal use of their representatives and representative offices.

(d) Persons designated by the sending Government to serve in the capacity of its resident representatives shall enjoy the same taxation exemptions as are set forth in Article 34 of the Vienna Convention on Diplomatic Relations.

(e) The privileges, exemptions and immunities accorded under this Section are not for the personal benefit of the individuals concerned but are to safeguard the independent exercise of their official functions. Without prejudice to those privileges, exemptions and immunities, it is the duty of all such persons to respect the laws and regulations of the Government to which they are assigned.

Section 153

(a) Any citizen or national of the United States who, after consultation between the designating Government and the Government of the United States, is designated by the Government of the Marshall Islands or the Federated States of Micronesia as its agent, shall enjoy exemption from the requirements of the laws of the United States relating to the registration of foreign agents. The Government of the United States shall promptly comply with a request for consultation made by the prospective designating Government. During the course of the consultation, the Government of the United States may, in its discretion, and subject to the provisions of the Privacy Act, 5 U.S.C. 552a, transmit such information concerning the prospective designee as may be available to it to the prospective designating Government.

(b) Any citizen or national of the United States may be employed by the Government of the Marshall Islands or the Federated States of Micronesia to represent to foreign governments, officers or agents thereof the positions of the Government of the Marshall Islands or the Federated States of Micronesia, without regard to the provisions of 18 U.S.C. 953.

Article VI

Environmental Protection

Section 161

The Governments of the United States, the Marshall Islands and the Federated States of Micronesia declare that it is their policy to promote efforts to prevent or eliminate damage to the environment and biosphere and to enrich understanding of the natural resources of the Marshall Islands and the Federated States of Micronesia. In order to carry out this policy, the Government of the United States and the Governments of the Marshall Islands and the Federated States of Micronesia agree to the following mutual and reciprocal undertakings.

(a) The Government of the United States:

(1) shall continue to apply the environmental controls in effect on the day preceding the effective date of this Compact to those of its continuing activities subject to Section 161(a)(2), unless and until those controls are modified under Sections 161(a)(3) and 161(a)(4);

(2) shall apply the National Environmental Policy Act of 1969, 83 Stat. 852, 42 U.S.C. 4321 *et seq.*, to its activities under the Compact and its related agreements as if the Marshall Islands and the Federated States of Micronesia were the United States;

(3) shall comply also, in the conduct of any activity requiring the preparation of an Environmental Impact Statement under Section 161(a)(2), with standards substantively similar to those required by the following laws of the United States, taking into account the particular environments of the Marshall Islands and the Federated States of Micronesia: the Endangered Species Act of 1973, 87 Stat. 884, 16 U.S.C. 1531 *et seq.*; the Clean Air Act, 77 Stat. 392, 42 U.S.C. Supp. 7401 *et seq.*; the Clean Water Act (Federal Water Pollution Control Act), 86 Stat. 896, 33 U.S.C. 1251 *et seq.*; the Ocean Dumping Act (Title I of the Marine Protection, Research and Sanctuaries Act of 1972), 86 Stat. 1053, 33 U.S.C. 1411 *et seq.*; the Toxic Substances Control Act, 90 Stat. 2003, 15 U.S.C. 2601 *et seq.*; the Resources Conservation and Recovery Act of 1976, 90 Stat. 2796, 42 U.S.C. 6901 *et seq.*; and such other environmental protection laws of the United States as may be mutually agreed from time to time with the Government of the Marshall Islands or the Federated States of Micronesia; and

(4) shall develop, prior to conducting any activity requiring the preparation of an Environmental Impact Statement under Section 161(a)(2), appropriate mechanisms, including regulations or other judicially reviewable standards and procedures, to regulate its activities governed by Section 161(a)(3) in the Marshall Islands and the Federated States of Micronesia in a manner appropriate to the special governmental relationship set forth in this Compact. The agencies of the Government of the United States designated by law to administer the laws set forth in Section 161(a)(3) shall participate as appropriate in the development of any regulation, standard or procedure under this Section, and the Government of the United States shall provide the affected Government of the Marshall Islands or the Federated States of Micronesia with the opportunity to comment during such development.

(b) The Governments of the Marshall Islands and the Federated States of Micronesia shall develop standards and procedures to protect their environments. As a reciprocal obligation to the undertakings of the Government of the United States under this Article, the Governments of the Marshall Islands and the Federated States of Micronesia, taking into account their particular environments, shall develop standards for environmental protection substantively similar to those required of the Government of the United States by Section 161(a)(3) prior to their conducting activities in the Marshall Islands and the Federated States of Micronesia, respectively, substantively equivalent to activities conducted there by the Government of the United States and, as a further reciprocal obligation, shall enforce those standards.

(c) Section 161(a), including any standard or procedure applicable thereunder, and Section 161(b) may be modified or superseded in whole or in part by agreement of the Government of the United States and the Government of the Marshall Islands or the Federated States of Micronesia.

(d) In the event that an Environmental Impact Statement is no longer required under the laws of the United States for major federal actions significantly affecting the quality of the human environment, the regulatory regime established under Sections 161(a)(3) and 161(a)(4) shall continue to apply to such activities of the Government of the United States until amended by mutual agreement.

(e) The President of the United States may exempt any of the activities of the Government of the United States under this Compact and its related agreements from any environmental standard or procedure which may be applicable under Sections 161(a)(3) and 161(a)(4) if the President determines it to be in the paramount interest of the Government of the United States to do so, consistent with Title Three of this Compact and the obligations of the Government of the United States under international law. Prior to any decision pursuant to this subsection, the views of the affected Government of the Marshall Islands or the Federated States of Micronesia shall be sought and considered to the extent practicable. If the President grants such an exemption, to the extent practicable, a report with his reasons for granting such exemption shall be given promptly to the affected Government.

(f) The laws of the United States referred to in Section 161(a)(3) shall apply to the activities of the Government of the United States under this Compact and its related agreements only to the extent provided for in this Section.

Section 162

The Government of the Marshall Islands or the Federated States of Micronesia may bring an action for judicial review of any administrative agency action or any activity of the Government of the United States pursuant to Sections 161(a), 161(d) or 161(e) or for enforcement of the obligations of the Government of the United States arising thereunder. The United States District Court for the District of Hawaii and the United States District Court for the District of Columbia shall have jurisdiction over such action or activity, and over actions brought under Section 172(b) which relate to the activities of the Government of the United States and its officers and employees, governed by Section 161, provided that:

(a) Such actions may only be civil actions for any appropriate civil relief other than punitive damages against the Government of the United States or, where required by law, its officers in their official capacity; no criminal actions may arise under this Section;

(b) Actions brought pursuant to this Section may be initiated only by the Government concerned;

(c) Administrative agency actions arising under Section 161 shall be reviewed pursuant to the standard of judicial review set forth in 5 U.S.C. 706;

(d) The District Court shall have jurisdiction to issue all necessary processes, and the Government of the United States agrees to submit itself to the jurisdiction of the court; decisions of the District Court shall be reviewable in the United States Court of Appeals for the Ninth Circuit or the United States Court of Appeals for the District of Columbia, respectively, or in the United States Supreme Court as provided by the laws of the United States;

(e) The judicial remedy provided for in this Section shall be the exclusive remedy for the judicial review or enforcement of the obligations of the Government of the United States under this Article and actions brought under Section 172(b) which relate to the activities of the Government of the United States and its officers and employees governed by Section 161; and

(f) In actions pursuant to this Section, the Governments of the Marshall Islands and the Federated States of Micronesia shall be treated as if they were United States citizens.

Section 163

(a) For the purpose of gathering data necessary to study the environmental effects of activities of the Government of the United States subject to the requirements of this Article, the Governments of the Marshall Islands and the Federated States of Micronesia shall be granted access to facilities operated by the Government of the United States in the Marshall Islands and the Federated States of Micronesia, to the extent necessary for this purpose, except to the extent such access would unreasonably interfere with the exercise of the authority and responsibility of the Government of the United States under Title Three.

(b) The Government of the United States, in turn, shall be granted access to the Marshall Islands or the Federated States of Micronesia for the purpose of gathering data necessary to discharge its obligations under this Article, except to the extent such access would unreasonably interfere with the exercise of the authority and responsibility of the Government of the Marshall Islands or the Federated States of Micronesia under Title One, and to the extent necessary for this purpose shall be granted access to documents and other information to the same extent similar access is provided those Governments under the Freedom of Information Act, 5 U.S.C. 552.

(c) The Governments of the Marshall Islands and the Federated States of Micronesia shall not impede efforts by the Government of the United States to comply with applicable standards and procedures.

Article VII

General Legal Provisions

Section 171

Except as provided in this Compact or its related agreements, the application of the laws of the United States to the Trust Territory of the Pacific Islands by virtue of the Trusteeship Agreement ceases with respect to the Marshall Islands and the Federated States of Micronesia as of the effective date of this Compact.

Section 172

(a) Every citizen of the Marshall Islands or the Federated States of Micronesia who is not a resident of the United States shall enjoy the rights and remedies under the laws of the United States enjoyed by any non-resident alien.

(b) The Governments of the Marshall Islands and the Federated States of Micronesia and every citizen of the Marshall Islands or the Federated States of Micronesia shall be considered a "person" within the meaning of the Freedom of Information Act, 5 U.S.C. 552, and of the judicial review provisions of the Administrative Procedure Act, 5 U.S.C. 701-706, except that only the Government of the Marshall Islands or the Federated States of Micronesia may seek judicial review under the Administrative Procedure Act or judicial enforcement under the Freedom of Information Act when such judicial review or enforcement relates to the activities of the Government of the United States governed by Sections 161 and 162.

Section 173

The Governments of the United States, the Marshall Islands and the Federated States of Micronesia agree to adopt and enforce such measures, consistent with this Compact and its related agreements, as may be necessary to protect the personnel, property, installations, services, programs and official archives and documents maintained by the Government of the United States in the Marshall Islands and the Federated States of Micronesia pursuant to this Compact and its related agreements and by those Governments in the United States pursuant to this Compact and its related agreements.

Section 174

Except as otherwise provided in this Compact and its related agreements:

(a) The Governments of the Marshall Islands and the Federated States of Micronesia shall be immune from the jurisdiction of the courts of the United States, and the Government of the United States shall be immune from the jurisdiction of the courts of the Marshall Islands and the Federated States of Micronesia.

(b) The Government of the United States accepts responsibility for and shall pay:

(1) any unpaid money judgment rendered by the High Court of the Trust Territory of the Pacific Islands against the Government of the Trust Territory of the Pacific Islands or the Government of the United States with regard to any cause of action arising as a result of acts or omissions of the Government of the Trust Territory of the Pacific Islands or the Government of the United States prior to the effective date of this Compact;

(2) any claim settled by the claimant and the Government of the Trust Territory of the Pacific Islands but not paid as of the effective date of this Compact; and

(3) settlement of any administrative claim or of any action before a court of the Trust Territory of the Pacific Islands, pending as of the effective date of this Compact, against the Government of the Trust Territory of the Pacific Islands or the Government of the United States, arising as a result of acts or omissions of the Government of the Trust Territory of the Pacific Islands or the Government of the United States.

(c) Any claim not referred to in Section 174(b) and arising from an act or omission of the Government of the Trust Territory of the Pacific Islands or the Government of the United States prior to the effective date of this Compact shall be adjudicated in the same manner as a claim adjudicated according to Section 174(d). In any claim against the Government of the Trust Territory of the Pacific Islands, the Government of the United States shall stand in the place of the Government of the Trust Territory of the Pacific Islands. A judgment on any claim referred to in Section 174(b) or this subsection, not otherwise satisfied by the Government of the United States, may be presented for certification to the United States Court of Appeals for the Federal Circuit, or its successor court, which shall have jurisdiction therefor, notwithstanding the provisions of 28 U.S.C. 1502, and which court's decisions shall be reviewable as provided by the laws of the United States. The United States Court of Appeals for the Federal Circuit shall certify such judgment, and order payment thereof, unless it finds, after a hearing, that such judgment is manifestly erroneous as to law or fact, or manifestly excessive. In either of such cases the United States Court of Appeals for the Federal Circuit shall have jurisdiction to modify such judgment.

(d) The Governments of the Marshall Islands and the Federated States of Micronesia shall not be immune from the jurisdiction of the courts of the United States, and the Government of the United States shall not be immune from the jurisdiction of the courts of the Marshall Islands and the Federated States of Micronesia in any case in which the action is based on a commercial activity of the defendant Government where the action is brought, or in a case in which damages are sought for personal injury or death or damage to or loss of property occurring where the action is brought.

Section 175

A separate agreement, which shall come into effect simultaneously with this Compact, shall be concluded between the Government of the United States and the Governments of the Marshall Islands and the Federated States of Micronesia regarding mutual assistance and cooperation in law enforcement matters including the pursuit, capture, imprisonment and extradition of fugitives from justice and the transfer of prisoners. The separate agreement shall have the force of law. In the United States, the laws of the United States governing international extradition, including 18 U.S.C. 3184, 3186 and 3188-3195, shall be applicable to the extradition of fugitives under the separate agreement, and the laws of the United States governing the transfer of prisoners, including 18 U.S.C. 4100-4115, shall be applicable to the transfer of prisoners under the separate agreement.

Section 176

The Governments of the Marshall Islands and the Federated States of Micronesia confirm that final judgments in civil cases rendered by any court of the Trust Territory of the Pacific Islands shall continue in full force and effect, subject to the constitutional power of the courts of the Marshall Islands and the Federated States of Micronesia to grant relief from judgments in appropriate cases.

Section 177

(a) The Government of the United States accepts the responsibility for compensation owing to citizens of the Marshall Islands, or the Federated States of Micronesia (or Palau) for loss or damage to property and person of the citizens of the Marshall Islands, or the Federated States of Micronesia or resulting from the nuclear testing program which the Government of the United States conducted in the Northern Marshall Islands between June 30, 1946, and August 18, 1958.

(b) The Government of the United States and the Government of the Marshall Is-

lands shall set forth in a separate agreement provisions for the just and adequate settlement of all such claims which have arisen in regard to the Marshall Islands and its citizens and which have not as yet been compensated or which in the future may arise, for the continued administration by the Government of the United States of direct radiation related medical surveillance and treatment programs and radiological monitoring activities and for such additional programs and activities as may be mutually agreed, and for the assumption by the Government of the Marshall Islands of responsibility for enforcement of limitations on the utilization of affected areas developed in cooperation with the Government of the United States and for the assistance by the Government of the United States in the exercise of such responsibility as may be mutually agreed. This separate agreement shall come into effect simultaneously with this Compact and shall remain in effect in accordance with its own terms.

(c) The Government of the United States shall provide to the Government of the Marshall Islands, on a grant basis, the amount of $150 million to be paid and distributed in accordance with the separate agreement referred to in this Section, and shall provide the services and programs set forth in this separate agreement, the language of which is incorporated into this Compact.

Section 178

(a) The federal agencies of the Government of the United States which provide the services and related programs in the Marshall Islands or the Federated States of Micronesia pursuant to Articles II and III of Title Two are authorized to settle and pay tort claims arising in the Marshall Islands or the Federated States of Micronesia from the activities of such agencies or from the acts or omissions of the employees of such agencies. Except as provided in Section 178(b), the provisions of 28 U.S.C. 2672 and 31 U.S.C. 1304 shall apply exclusively to such administrative settlements and payments.

(b) Claims under Section 178(a) which cannot be settled under Section 178(a) shall be disposed of exclusively in accordance with Article II of Title Four. Arbitration awards rendered pursuant to this subsection shall be paid out of funds under 31 U.S.C. 1304.

(c) The Government of the United States and the Government of the Marshall Islands or the Federated States of Micronesia shall, in the separate agreements referred to in Section 232, provide for:

(1) the administrative settlement of claims referred to in Section 178(a), including designation of local agents in the Marshall Islands and each State of the Federated States of Micronesia; such agents to be empowered to accept, investigate and settle such claims, in a timely manner, as provided in such separate agreements; and

(2) arbitration, referred to in Section 178(b), in a timely manner, at a site convenient to the claimant, in the event a claim is not otherwise settled pursuant to Section 178(a).

(d) The provisions of Section 174(d) shall not apply to claims covered by this Section.

TITLE TWO

ECONOMIC RELATIONS

Article I

Grant Assistance

Section 211

(a) In order to assist the Governments of the Marshall Islands and the Federated States of Micronesia in their efforts to advance the economic self-sufficiency of their peoples and in recognition of the special relationship that exists between them and the United States, the Government of the United States shall provide on a grant basis the following amounts:

(1) to the Government of the Marshall Islands, $26.1 million annually for five years commencing on the effective date of this Compact, $22.1 million annually for five years commencing on the fifth anniversary of the effective date of this Compact, and $19.1 million annually for five years commencing on the tenth anniversary of this Compact. Over this fifteen-year period, the Government of the Marshall Islands shall dedicate an average of no less than 40 percent of these amounts to the capital account subject to provision for revision of this percentage incorporated into the plan referred to in Section 211(b).

(2) to the Government of the Federated States of Micronesia, $60 million annually for five years commencing on the effective date of this Compact, $51 million annually for five years commencing on the fifth anniversary of the effective date of this Compact, and $40 million annually for five years commencing on the tenth anniversary of the effective date of this Compact. Over this fifteen year period, the Government of the Federated States of Micronesia shall dedicate an average of no less than 40 percent of these amounts annually to the capital account subject to provision for revision of this percentage incorporated into the plan referred to in Section 211(b). To take into account the special nature of the assistance, to be provided under this paragraph and Sections 212(b), 213(c), 214(c), 215(a)(3), 215(b)(3), 216(a), 216(b), 221(a), and 221(b), the division of these amounts among the national and state governments of the Federated States of Micronesia shall be certified to the Government of the United States by the Government of the Federated States of Micronesia.

(b) The annual expenditure of the grant amounts specified for the capital account in Section 211(a) by the Governments of the Marshall Islands and the Federated States of Micronesia shall be in accordance with official overall economic development plans provided by those Governments and concurred in by the Government of the United States prior to the effective date of this Compact. These plans may be amended from time to time by the Government of the Marshall Islands or the Federated States of Micronesia.

(c) The Government of the United States and the Governments of the Marshall Islands and the Federated States of Micronesia recognize that the achievement of the goals of the plans referred to in Section 211(b) depends upon the availability of adequate internal revenue as well as economic assistance from sources outside of the Marshall Islands and the Federated States of Micronesia, including the Government of the United States, and may, in addition, be affected by the impact of exceptional economically adverse circumstances. Each of the Governments of the Marshall Islands and the Federated States of Micronesia shall therefore report annually to the President of the United States and to the Congress of the United States on the implementation of the plans and on their use of the funds specified in this Article. These reports shall outline the achievements of the plans to date and the need, if any, for an additional authorization and appropriation of economic assistance for that year to account for any exceptional, economically adverse circumstances. It is understood that the Government of the United States cannot be committed by this Section to seek or support such additional economic assistance.

Section 212

In recognition of the special development needs of the Federated States of Micronesia, the Government of the United States shall provide to the Government of the Federated States of Micronesia $1 million annually for fourteen years commencing on the first anniversary of the effective date of this Compact. This amount may be used by the Government of the Federated States of Micronesia to defray current account expenditures attendant to the operation of the United States military Civic Action Teams made available in accordance with the separate agreement referred to in Section 227.

Section 213

(a) The Government of the United States shall provide on a grant basis $1.9 million annually to the Government of the Marshall Islands in conjunction with Section 321(a). The Government of the Marshall Islands, in its use of such funds, shall take into account the impact of the activities of the Government of the United States in the Kwajalein Atoll area of the Marshall Islands.

(b) The Government of the United States shall provide on a grant basis to the Government of the Federated States of Micronesia the sum of $160,000 in conjunction with Section 321(a). This sum shall be made available concurrently with the grant assistance provided pursuant to this Article during the first year after the effective date of this Compact. The Government of the Federated States of Micronesia, in its use of such funds, shall take into account the impact of the activities of the Government of the United States in Yap State, Federated States of Micronesia.

Section 214

As a contribution to efforts aimed at achieving increased self-sufficiency in energy production, the Government of the United States shall provide on a current account grant basis for fourteen years commencing on the first anniversary of the effective date of this Compact the following amounts:

(a) To the Government of the Marshall Islands, $2 million annually; and

(b) To the Government of the Federated States of Micronesia, $3 million annually.

Section 215

(a) As a contribution to the current account operations and maintenance of communications systems, the Government of the United States shall provide on a grant basis for fifteen years commencing on the effective date of this Compact the following amounts:

(1) to the Government of the Marshall Islands, $300,000 annually; and

(2) to the Government of the Federated States of Micronesia, $600,000 annually.

(b) For the purpose of acquiring such communications hardware as may be located within the Marshall Islands and the Federated States of Micronesia or for such other current or capital account activity as may be selected, the Government of the United States shall provide, concurrently with the grant assistance provided pursuant

to this Article during the first year after the effective date of this Compact, the sum of $9 million to be allocated as follows:

(1) to the Government of the Marshall Islands, $3 million; and

(2) to the Government of the Federated States of Micronesia, $6 million.

Section 216

(a) The Government of the United States shall provide on a current account basis an annual grant of $5.369 million for fifteen years commencing on the effective date of this Compact for the purposes set forth below:

(1) $890,000 annually for the surveillance and enforcement by the Governments of the Marshall Islands and the Federated States of Micronesia of their respective maritime zones;

(2) $1.791 million annually for health and medical programs, including referrals to hospital and treatment centers; and

(3) $2.687 million annually for a scholarship fund or funds to support the post-secondary education of citizens of the Marshall Islands and the Federated States of Micronesia attending United States accredited, post-secondary institutions in the United States, its territories and possessions, the Marshall Islands or the Federated States of Micronesia. The curricula criteria for the award of scholarships shall be designed to advance the purposes of the plans referred to in Section 211(b).

(b) The Government of the United States shall provide the sum of $1.333 million as a contribution to the commencement of activities pursuant to Section 216(a)(1).

(c) The annual grants referred to in Section 216(a) and the sum referred to in Section 216(b) shall be made available by the Government of the United States promptly after it receives instruction for their distribution agreed upon by the Governments of the Marshall Islands and the Federated States of Micronesia.

Section 217

Except as otherwise provided, the amounts stated in Sections 211, 212, 214, 215 and 231 shall be adjusted for each Fiscal Year by the percent which equals two-thirds of the percentage change in the United States Gross National Product Implicit Price Deflator, or seven percent, whichever is less in any one year, using the beginning of Fiscal Year 1981 as the base.

Section 218

If in any year the funds made available by the Government of the United States for that year pursuant to this Article or Section 231 are not completely obligated by the recipient Government, the unobligated balances shall remain available in addition to the funds to be provided in subsequent years.

Section 219

All funds previously appropriated to the Trust Territory of the Pacific Islands which are unobligated by the Government of the Trust Territory of the Pacific Islands as of the effective date of this Compact shall accrue to the Governments of the Marshall Islands and the Federated States of Micronesia for the purposes for which such funds were originally appropriated as determined by the Government of the United States.

Article II

Program Assistance

Section 221

(a) The Government of the United States shall make available to the Marshall Islands and the Federated States of Micronesia, in accordance with and to the extent provided in the separate agreements referred to in section 232, without compensation and at the levels equivalent to those available to the Trust Territory of the Pacific Islands during the year prior to the effective date of this Compact, the services and related programs:

(1) of the United States Weather Service;

(2) of the United States Federal Emergency Management Agency;

(3) provided pursuant to the Postal Reorganization Act, 39 U.S.C. 101 *et seq.*;

(4) of the United States Federal Aviation Administration; and

(5) of the United States Civil Aeronautics Board or its successor agencies which has the authority to implement the provisions of paragraph 5 of Article IX of such separate agreements, the language of which is incorporated into this Compact.

(b) The Government of the United States, recognizing the special needs of the Marshall Islands and the Federated States of Micronesia particularly in the fields of education and health care, shall make available, as provided by the laws of the United States, the annual amount of $10 million which shall be allocated in accordance with the provisions of the separate agreement referred to in Section 232.

(c) The Government of the United States shall make available to the Marshall Islands and the Federated States of Micronesia such alternate energy development projects, studies and conservation measures as are applicable to the Trust Territory of the Pacific Islands on the day preceding the effective date of this Compact, for the purposes and duration provided in the laws of the United States.

(d) The Government of the United States shall have and exercise such authority as is necessary for the purposes of this Article and as is set forth in the separate agreements referred to in Section 232, which shall also set forth the extent to which services and programs shall be provided to the Marshall Islands and the Federated States of Micronesia.

Section 222

The Government of the United States and the Government of the Marshall Islands or the Federated States of Micronesia shall consult regularly or upon request regarding:

(a) The economic development of the Marshall Islands or the Federated States of Micronesia; or

(b) The services and programs referred to in this Article. These services and programs shall continue to be provided by the Government of the United States unless their modification is provided by mutual agreement or their termination in whole or in part is requested by any recipient Government.

Section 223

The citizens of the Marshall Islands and the Federated States of Micronesia who are receiving post-secondary educational assistance from the Government of the United States on the day preceding the effective date of this Compact shall continue to be eligible, if otherwise qualified, to receive such assistance to complete their academic programs for a maximum of four years after the effective date of this Compact.

Section 224

The Government of the United States and the Government of the Marshall Islands or the Federated States of Micronesia may agree from time to time to the extension of additional United States grant assistance, services and programs as provided by the Laws of the United States, to the Marshall Islands or the Federated States of Micronesia, respectively.

Section 225

The Governments of the Marshall Islands and the Federated States of Micronesia shall make available to the Government of the United States at no cost such land as may be necessary for the operations of the services and programs provided pursuant to this Article, and such facilities as are provided by the Government of the Marshall Islands or the Federated States of Micronesia at no cost to the Government of the United States as of the effective date of this Compact or as may be mutually agreed thereafter.

Section 226

The Governments of the Marshall Islands and the Federated States of Micronesia may request, from time to time, technical assistance from the federal agencies and institutions of the Government of the United States, which are authorized to grant such technical assistance in accordance with its laws and which shall grant such technical assistance in a manner which gives priority consideration to the Marshall Islands and the Federated States of Micronesia over other recipients not a part of the United States, its territories or possessions. The Government of the United States shall coordinate the provision of such technical assistance in consultation with the respective recipient Government.

Section 227

In recognition of the special development needs of the Federated States of Micronesia, the Government of the United States shall make available United States military Civic Action Teams for use in the Federated States of Micronesia under terms and conditions specified in a separate agreement which shall come into effect simultaneously with this Compact.

Article III

Administrative Provisions

Section 231

Upon the thirteenth anniversary of the effective date of this Compact, the Government of the United States and the Governments of the Marshall Islands and the Federated States of Micronesia shall commence negotiations regarding those provisions of this Compact which expire on the fifteenth anniversary of its effective date. If these negotiations are not concluded by the fifteenth anniversary of the effective date of this Compact, the period of negotiations shall extend for not more than two additional years, during which time the provisions of this Compact including Title Three shall remain in full force and effect. During this additional period of negotiations, the Government of the United States shall continue its assistance to the Governments with which it is negotiating pursuant to this Section at a level which is the average of the annual amounts granted pursuant to Sections 211, 212, 213, 214, 215 and 216 during the first fifteen years of this Compact. The average annual amount paid pursuant to Sections 211, 212, 214 and 215 shall be adjusted pursuant to Section 217.

Section 232

The specific nature, extent and contractual arrangements of the services and pro-

grams provided for in Section 221 as well as the legal status of agencies of the Government of the United States, their civilian employees and contractors, and the dependents of such personnel while present in the Marshall Islands or the Federated States of Micronesia, and other arrangements in connection with a service or program furnished by the Government of the United States, are set forth in separate agreements which shall come into effect simultaneously with this Compact.

Section 233

The Government of the United States, in consultation with the Governments of the Marshall Islands and the Federated States of Micronesia, shall determine and implement procedures for the periodic audit of all grants and other assistance made under Article I of this Title and of all funds expended for the services and programs provided under Article II of this Title. Such audits shall be conducted on an annual basis during the first five years following the effective date of this Compact and shall be at no cost to the Government of the Marshall Islands or the Federated States of Micronesia.

Section 234

Title to the property of the Government of the United States situated in the Trust Territory of the Pacific Islands or acquired for or used by the Government of the Trust Territory of the Pacific Islands on or before the day preceding the effective date of this Compact shall, without reimbursement or transfer of funds, vest in the Government of the Marshall Islands and the Federated States of Micronesia as set forth in a separate agreement which shall come into effect simultaneously with this Compact. The provisions of this Section shall not apply to the property of the Government of the United States for which the Government of the United States determines a continuing requirement.

Section 235

(a) Funds held in trust by the High Commissioner of the Trust Territory of the Pacific Islands, in his official capacity, as of the effective date of this Compact shall remain available as trust funds to their designated beneficiaries. The Government of the United States, in consultation with the Government of the Marshall Islands or the Federated States of Micronesia, shall appoint a new trustee who shall exercise the functions formerly exercised by the High Commissioner of the Trust Territory of the Pacific Islands.

(b) To provide for the continuity of administration, and to assure the Governments of the Marshall Islands and the Federated States of Micronesia that the purposes of the laws of the United States are carried out and that the funds of any other trust fund in which the High Commissioner of the Trust Territory of the Pacific Islands has authority of a statutory or customary nature shall remain available as trust funds to their designated beneficiaries, the Government of the United States agrees to assume the authority formerly vested in the High Commissioner of the Trust Territory of the Pacific Islands.

Section 236

Except as otherwise provided, approval of this Compact by the Government of the United States shall constitute a pledge of the full faith and credit of the United States for the full payment of the sums and amounts specified in Articles I and III of this Title. The obligation of the United States under Articles I and III of this Title shall be enforceable in the United States Claims Court, or its successor court, which shall have jurisdiction in cases arising under this Section, notwithstanding the provisions of 28 U.S.C. 1502, and which court's decisions shall be reviewable as provided by the laws of the United States.

Article IV

Trade

Section 241

The Marshall Islands and the Federated States of Micronesia are not included in the customs territory of the United States.

Section 242

For the purpose of assessing duties on their products imported into the customs territory of the United States, the Marshall Islands and the Federated States of Micronesia shall be treated as if they were insular possessions of the United States within the meaning of General Headnote 3(a) of the Tariff Schedules of the United States. The exceptions, valuation procedures and all other provisions of General Headnote 3(a) shall apply to any product deriving from the Marshall Islands or the Federated States of Micronesia.

Section 243

All products of the Marshall Islands or the Federated States of Micronesia imported into the customs territory of the United States which are not accorded the treatment set forth in Section 242 and all products of the United States imported into the Marshall Islands or the Federated States of Micronesia shall receive treatment no less favorable than that accorded like products of any foreign country with respect to customs duties or charges of a similar nature and with respect to laws and regulations relating to importation, exportation, taxation, sale, distribution, storage or use.

Article V

Finance and Taxation

Section 251

The currency of the United States is the official circulating legal tender of the Marshall Islands and the Federated States of Micronesia. Should the Government of the Marshall Islands or the Federated States of Micronesia act to institute another currency, the terms of an appropriate currency transitional period shall be as agreed with the Government of the United States.

Section 252

The Government of the Marshall Islands or the Federated States of Micronesia may, with respect to United States persons, tax income derived from sources within its respective jurisdiction, property situated therein, including transfers of such property by gift or at death, and products consumed therein, in such manner as such Government deems appropriate. The determination of the source of any income, or the situs of any property, shall for purposes of this Compact be made according to the United States Internal Revenue Code.

Section 253

A citizen of the Marshall Islands or the Federated States of Micronesia, domiciled therein, shall be exempt from:

(a) Income taxes imposed by the Government of the United States upon fixed or determinable annual income; and

(b) Estate, gift, and generation-skipping transfer taxes imposed by the Government of the United States.

Section 254

(a) In determining any income tax imposed by the Government of the Marshall Islands or the Federated States of Micronesia, those Governments shall have authority to impose tax upon income derived by a resident of the Marshall Islands or the Federated States of Micronesia from sources without the Marshall Islands and the Federated States of Micronesia, in the same manner and to the same extent as those Governments impose tax upon income derived from within their respective jurisdictions. If the Government of the Marshall Islands or the Federated States of Micronesia exercises such authority as provided in this subsection, any individual resident of the Marshall Islands or the Federated States of Micronesia who is subject to tax by the Government of the United States on income which is also taxed by the Government of the Marshall Islands or the Federated States of Micronesia shall be relieved of liability to the Government of the United States for the tax which, but for this subsection, would otherwise be imposed by the Government of the United States on such income. For purposes of this Section, the term "resident of the Marshall Islands or the Federated States of Micronesia" shall be deemed to include any person who was physically present in the Marshall Islands or the Federated States of Micronesia for a period of 183 or more days during any taxable year; provided, that as between the Government of the Marshall Islands and the Federated States of Micronesia, the authority to tax an individual resident of the Marshall Islands or the Federated States of Micronesia in respect of income from sources without the Marshall Islands and the Federated States of Micronesia as provided in this subsection may be exercised only by the Government in whose jurisdiction such individual was physically present for the greatest number of days during the taxable year.

(b) If the Government of the Marshall Islands or the Federated States of Micronesia subjects income to taxation substantially similar to that imposed by the Trust Territory Code in effect on January 1, 1980, such Government shall be deemed to have exercised the authority described in Section 254(a).

Section 255

Where not otherwise manifestly inconsistent with the intent of this Compact, provisions in the United States Internal Revenue Code that are applicable to possessions of the United States as of January 1, 1980 shall be treated as applying to the Marshall Islands and the Federated States of Micronesia. If such provisions of the Internal Revenue Code are amended, modified or repealed after that date, such provisions shall continue in effect as to the Marshall Islands and the Federated States of Micronesia for a period of two years during which time the Government of the United States and the Governments of the Marshall Islands and the Federated States of Micronesia shall negotiate an agreement which shall provide benefits substantially equivalent to those which obtained under such provisions.

TITLE THREE

SECURITY AND DEFENSE RELATIONS

Article I

Authority and Responsibility

Section 311

(a) The Government of the United States has full authority and responsibility for security and defense matters in or relating to the Marshall Islands and the Federated States of Micronesia.

(b) This authority and responsibility includes:

(1) the obligation to defend the Marshall Islands and the Federated States of Micronesia and their peoples from attack or threats thereof as the United States and its citizens are defended;

(2) the option to foreclose access to or use of the Marshall Islands and the Federated States of Micronesia by military personnel or for the military purposes of any third country; and

(3) the option to establish and use military areas and facilities in the Marshall Islands and the Federated States of Micronesia, subject to the terms of the separate agreements referred to in Sections 321 and 323.

(c) The Government of the United States confirms that it shall act in accordance with the principles of international law and the Charter of the United Nations in the exercise of this authority and responsibility.

Section 312

Subject to the terms of any agreements negotiated in accordance with Sections 321 and 323, the Government of the United States may conduct within the lands, waters and airspace of the Marshall Islands and the Federated States of Micronesia the activities and operations necessary for the exercise of its authority and responsibility under this Title.

Section 313

(a) The Governments of the Marshall Islands and the Federated States of Micronesia shall refrain from actions which the Government of the United States determines, after appropriate consultation with those Governments, to be incompatible with its authority and responsibility for security and defense matters in or relating to the Marshall Islands and the Federated States of Micronesia.

(b) The consultations referred to in this Section shall be conducted expeditiously at senior levels of the Governments concerned, and the subsequent determination by the Government of the United States referred to in this Section shall be made only at senior interagency levels of the Government of the United States.

(c) The Government of the Marshall Islands or the Federated States of Micronesia shall be afforded, on an expeditious basis, an opportunity to raise its concerns with the United States Secretary of State personally and the United States Secretary of Defense personally regarding any determination made in accordance with this Section.

Section 314

(a) Unless otherwise agreed, the Government of the United States shall not, in the Marshall Islands or the Federated States of Micronesia:

(1) test by detonation or dispose of any nuclear weapon, nor test, dispose of, or discharge any toxic chemical or biological weapon; or

(2) test, dispose of, or discharge any other radioactive, toxic chemical or biological materials in an amount or manner which would be hazardous to public health or safety.

(b) Unless otherwise agreed, other than for transit or over flight purposes or during time of a national emergency declared by the President of the United States, a state of war declared by the Congress of the United States or as necessary to defend against an actual or impending armed attack on the United States, the Marshall Islands or the Federated States of Micronesia, the Government of the United States shall not store in the Marshall Islands or the Federated States of Micronesia any toxic chemical weapon, nor any radioactive materials nor any toxic chemical materials intended for weapons use.

(c) Radioactive, toxic chemical, or biological materials not intended for weapons use shall not be affected by Section 314(b).

(d) No material or substance referred to in this Section shall be stored in the Marshall Islands or the Federated States of Micronesia except in an amount and manner which would not be hazardous to public health or safety. In determining what shall be an amount or manner which would be hazardous to public health or safety under this Section, the Government of the United States shall comply with any applicable mutual agreement, international guidelines accepted by the Government of the United States, and the laws of the United States and their implementing regulations.

(e) Any exercise of the exemption authority set forth in Section 161(e) shall have no effect on the obligations of the Government of the United States under this Section or on the application of this subsection.

(f) The provisions of this Section shall apply in the areas in which the Government of the Marshall Islands or the Federated States of Micronesia exercises jurisdiction over the living resources of the seabed, subsoil or water column adjacent to its coasts.

Section 315

The Government of the United States may invite members of the armed forces of other countries to use military areas and facilities in the Marshall Islands or the Federated States of Micronesia, in conjunction with and under the control of United States Armed Forces. Use by units of the armed forces of other countries of such military areas and facilities, other than for transit and overflight purposes, shall be subject to consultation with and, in the case of major units, approval by the Government of the Marshall Islands or the Federated States of Micronesia.

Section 316

The authority and responsibility of the Government of the United States under this Title may not be transferred or otherwise assigned.

Article II

Defense Facilities and Operating Rights

Section 321

(a) Specific arrangements for the establishment and use by the Government of the United States of military areas and facilities in the Marshall Islands or the Federated States of Micronesia are set forth in separate agreements which shall come into effect simultaneously with this Compact.

(b) If, in the exercise of its authority and responsibility under this Title, the Government of the United States requires the use of areas within the Marshall Islands or the Federated States of Micronesia in addition to those for which specific arrangements are concluded pursuant to Section 321(a), it may request the Government concerned to satisfy those requirements through leases or other arrangements. The Government of the Marshall Islands or the Federated States of Micronesia shall sympathetically consider any such request and shall establish suitable procedures to discuss it with and provide a prompt response to the Government of the United States.

(c) The Government of the United States recognizes and respects the scarcity and special importance of land in the Marshall Islands and the Federated States of Micronesia. In making any requests pursuant to Section 321(b), the Government of the United States shall follow the policy of requesting the minimum area necessary to accomplish the required security and defense purpose, of requesting only the minimum interest in real property necessary to support such purpose, and of requesting first to satisfy its requirement through public real property, where available, rather than through private real property.

Section 322

The Government of the United States shall provide and maintain fixed and floating aids to navigation in the Marshall Islands and the Federated States of Micronesia at least to the extent necessary for the exercise of its authority and responsibility under this Title.

Section 323

The military operating rights of the Government of the United States and the legal status and contractual arrangements of the United States Armed Forces, their members, and associated civilians, while present in the Marshall Islands or the Federated States of Micronesia, are set forth in separate agreements which shall come into effect simultaneously with this Compact.

Article III

Defense Treaties and International Security Agreements

Section 331

Subject to the terms of this Compact and its related agreements, the Government of the United States, exclusively, shall assume and enjoy, as to the Marshall Islands and the Federated States of Micronesia, all obligations, responsibilities, rights and benefits of:

(a) Any defense treaty or other international security agreement applied by the Government of the United States as Administering Authority of the Trust Territory of the Pacific Islands as of the day preceding the effective date of this Compact; and

(b) Any defense treaty or other international security agreement to which the Government of the United States is or may become a party which it determines to be applicable in the Marshall Islands and the Federated States of Micronesia. Such a determination by the Government of the United States shall be preceded by appropriate consultation with the Government of the Marshall Islands or the Federated States of Micronesia.

Article IV

Service in Armed Forces of the United States

Section 341

Any person entitled to the privileges set forth in Section 141 shall be eligible to volunteer for service in the Armed Forces of the United States, but shall not be subject to involuntary induction into military service of the United States so long as such

person does not establish habitual residence in the United States, its territories or possessions.

Section 342

The Government of the United States shall have enrolled, at any one time, at least two qualified students, one each from the Marshall Islands and the Federated States of Micronesia, as may be nominated by their respective Governments, in each of:

(a) The United States Coast Guard Academy pursuant to 14 U.S.C. 195; and

(b) The United States Merchant Marine Academy pursuant to 46 U.S.C. 1295b(b)(6), provided that the provisions of 46 U.S.C. 1295b(b)(6)(C) shall not apply to the enrollment of students pursuant to Section 342(b) of this Compact.

Article V

General Provisions

Section 351

(a) The Government of the United States and the Government of the Marshall Islands or the Federated States of Micronesia shall establish two Joint Committees empowered to consider disputes under the implementation of this Title and its related agreements.

(b) The membership of each Joint Committee shall comprise selected senior officials of each of the two participating Governments. The senior United States military commander in the Pacific area shall be the senior United States member of each Joint Committee. For the meetings of each Joint Committee, each of the two participating Governments may designate additional or alternate representatives as appropriate for the subject matter under consideration.

(c) Unless otherwise mutually agreed, each Joint Committee shall meet semi-annually at a time and place to be designated, after appropriate consultation, by the Government of the United States. A Joint Committee also shall meet promptly upon request of either of its members. Upon notification by the Government of the United States, the Joint Committees so notified shall meet promptly in a combined session to consider matters within the jurisdiction of more than one Joint Committee. Each Joint Committee shall follow such procedures, including the establishment of functional subcommittees, as the members may from time to time agree.

(d) Unresolved issues in each Joint Committee shall be referred to the Governments concerned for resolution, and the Government of the Marshall Islands or the Federated States of Micronesia shall be afforded, on an expeditious basis, an opportunity to raise its concerns with the United States Secretary of Defense personally regarding any unresolved issue which threatens its continued association with the Government of the United States.

Section 352

In the exercise of its authority and responsibility under Title Three, the Government of the United States shall accord due respect to the authority and responsibility of the Governments of the Marshall Islands and the Federated States of Micronesia under Titles One, Two and Four and to their responsibility to assure the well-being of their peoples.

Section 353

(a) The Government of the United States shall not include any of the Governments of the Marshall Islands and the Federated States of Micronesia as named parties to a formal declaration of war, without their respective consent.

(b) Absent such consent, this Compact is without prejudice, on the ground of belligerence or the existence of a state of war, to any claims for damages which are advanced by the citizens, nationals or Government of the Marshall Islands or the Federated States of Micronesia, which arise out of armed conflict subsequent to the effective date of this Compact and which are:

(1) petitions to the Government of the United States for redress; or

(2) claims in any manner against the government, citizens, nationals or entities of any third country.

(c) Petitions under Section 353(b)(1) shall be treated as if they were made by citizens of the United States.

Section 354

(a) Notwithstanding any other provision of this Compact, the provisions of this Title are binding from the effective date of this Compact for a period of fifteen years between the Government of the United States and the Governments of the Marshall Islands and the Federated States of Micronesia and thereafter as mutually agreed or in accordance with Section 231, unless earlier terminated by mutual agreement pursuant to Section 441, or amended pursuant to Article III of Title Four.

(b) The Government of the United States recognizes, in view of the special relationship between the Government of the United States and the Governments of the Marshall Islands and the Federated States of Micronesia, and in view of the existence of separate agreements with each of them pursuant to Sections 321 and 323, that, even if this Title should terminate, any attack on the Marshall Islands or the Federated States of Micronesia during the period in which such separate agreements are in effect, would constitute a threat to the peace and security of the entire region and a danger to the United States. In the event of such an attack, the Government of the United States would take action to meet the danger to the United States and to the Marshall Islands and the Federated States of Micronesia in accordance with its constitutional processes.

TITLE FOUR

GENERAL PROVISIONS

Article I

Approval and Effective Date

Section 411

This Compact shall come into effect upon mutual agreement between the Government of the United States, acting in fulfillment of its responsibilities as Administering Authority of the Trust Territory of the Pacific Islands, and the Government of the Marshall Islands or the Federated States of Micronesia and subsequent to completion of the following:

(a) Approval by the Government of the Marshall Islands or the Federated States of Micronesia in accordance with its constitutional processes;

(b) Conduct of the plebiscite referred to in Section 412; and

(c) Approval by the Government of the United States in accordance with its constitutional processes.

Section 412

A plebiscite shall be conducted in each of the Marshall Islands and the Federated States of Micronesia for the free and voluntary choice by the peoples of the Trust Territory of the Pacific Islands of their future political status through informed and democratic processes. The Marshall Islands and the Federated States of Micronesia shall each be considered a voting jurisdiction, and the plebiscite shall be conducted under fair and equitable standards in each voting jurisdiction. The Administering Authority of the Trust Territory of the Pacific Islands, after consultation with the Governments of the Marshall Islands and the Federated States of Micronesia, shall fix the date on which the plebiscite shall be called in each voting jurisdiction. The plebiscite shall be called jointly by the Administering Authority of the Trust Territory of the Pacific Islands and the other Signatory Government concerned. The results of the plebiscite in each voting jurisdiction shall be determined by a majority of the valid ballots cast in that voting jurisdiction.

Article II

Conference and Dispute Resolution

Section 421

The Government of the United States shall confer promptly at the request of the Government of the Marshall Islands or the Federated States of Micronesia and any of those Governments shall confer promptly at the request of the Government of the United States on matters relating to the provisions of this Compact or of its related agreements.

Section 422

In the event the Government of the United States, or the Government of the Marshall Islands or the Federated States of Micronesia, after conferring pursuant to Section 421, determines that there is a dispute and gives written notice thereof, the Governments which are parties to the dispute shall make a good faith effort to resolve the dispute among themselves.

Section 423

If a dispute between the Government of the United States and the Government of the Marshall Islands or the Federated States of Micronesia cannot be resolved within 90 days of written notification in the manner provided in Section 422, either party to the dispute may refer it to arbitration in accordance with Section 424.

Section 424

Should a dispute be referred to arbitration as provided for in Section 423, an Arbitration Board shall be established for the purpose of hearing the dispute and rendering a decision which shall be binding upon the two parties to the dispute unless the two parties mutually agree that the decision shall be advisory. Arbitration shall occur according to the following terms:

(a) An Arbitration Board shall consist of a Chairman and two other members, each of whom shall be a citizen of a party to the dispute. Each of the two Governments which is a party to the dispute shall appoint one member to the Arbitration Board. If either party to the dispute does not fulfill the appointment requirements of this Section within 30 days of referral of the dispute to arbitration pursuant to Section 423, its member on the Arbitration Board shall be selected from its own standing list by the other party to the dispute. Each Government shall maintain a standing list of 10 candidates. The parties to the dispute shall jointly appoint a Chairman within 15 days after selection of the other members of the Arbitration Board. Failing agreement on a

Chairman, the Chairman shall be chosen by lot from the standing lists of the parties to the dispute within 5 days after such failure.

(b) The Arbitration Board shall have jurisdiction to hear and render its final determination on all disputes arising exclusively under Articles I, II, III, IV and V of Title One, Title Two, Title Four and their related agreements.

(c) Each member of the Arbitration Board shall have one vote. Each decision of the Arbitration Board shall be reached by majority vote.

(d) In determining any legal issue, the Arbitration Board may have reference to international law and, in such reference, shall apply as guidelines the provisions set forth in Article 38 of the Statute of the International Court of Justice.

(e) The Arbitration Board shall adopt such rules for its proceedings as it may deem appropriate and necessary, but such rules shall not contravene the provisions of this Compact. Unless the parties provide otherwise by mutual agreement, the Arbitration Board shall endeavor to render its decision within 30 days after the conclusion of arguments. The Arbitration Board shall make findings of fact and conclusions of law and its members may issue dissenting or individual opinions. Except as may be otherwise decided by the Arbitration Board, one-half of all costs of the arbitration shall be borne by the Government of the United States and the remainder shall be borne by the other party to the dispute.

Article III

Amendment

Section 431

The provisions of this Compact may be amended as to the Governments of the Marshall Islands and the Federated States of Micronesia and as to the Government of the United States at any time by mutual agreement.

Section 432

The provisions of this Compact may be amended as to any one of the Governments of the Marshall Islands or the Federated States of Micronesia and as to the Government of the United States at any time by mutual agreement. The effect of any amendment made pursuant to this Section shall be restricted to the relationship between the Governments agreeing to such amendment, but the other Governments signatory to this Compact shall be notified promptly by the Government of the United States of any such amendment.

Article IV

Termination

Section 441

This Compact may be terminated as to any one of the Governments of the Marshall Islands or the Federated States of Micronesia and as to the Government of the United States by mutual agreement and subject to Section 451.

Section 442

This Compact may be terminated by the Goverment of the United States as to the Government of the Marshall Islands or the Federated States of Micronesia subject to Section 452, such termination to be effective on the date specified in the notice of termination by the Government of the United States but not earlier than six months following delivery of such notice. The time specified in the notice of termination may be extended.

Section 443

This Compact shall be terminated, pursuant to their respective constitutional processes, by the Government of the Marshall Islands or the Federated States of Micronesia subject to Section 453 if the people represented by such Government vote in a plebiscite to terminate. Such Government shall notify the Government of the United States of its intention to call such a plebiscite which shall take place not earlier than three months after delivery of such notice. The plebiscite shall be administered by such Government in accordance with its constitutional and legislative processes, but the Government of the United States may send its own observers and invite observers from a mutually agreed party. If a majority of the valid ballots cast in the plebiscite favors termination, such Government shall, upon certification of the results of the plebiscite, give notice of termination to the Government of the United States, such termination to be effective on the date specified in such notice but not earlier than three months following the date of delivery of such notice. The time specified in the notice of termination may be extended.

Article V

Survivability

Section 451

Should termination occur pursuant to Section 441, economic assistance by the Government of the United States shall continue on mutually agreed terms.

Section 452

(a) Should termination occur pursuant to Section 442, the following provisions of this Compact shall remain in full force and effect until the fifteenth anniversary of the effective date of this Compact between the Government of the United States and the Government of the Marshall Islands or the Federated States of Micronesia and thereafter as mutually agreed:

(1) Article VI and Sections 172, 173, 176 and 177 of Title One;

(2) Article I and Section 233 of Title Two;

(3) Title Three; and

(4) Articles II, III, V and VI of Title Four.

(b) The Government of the United States shall also provide the Government as to which termination occurs pursuant to Section 442 with either the programs or services provided pursuant to Article II of Title Two as the time of termination, or their equivalent, as determined by the Government of the United States. Such assistance shall continue until the fifteenth anniversary of the effective date of this Compact, and thereafter as mutually agreed.

Section 453

(a) Should termination occur pursuant to Section 443, the following provisions of this Compact shall remain in full force and effect until the fifteenth anniversary of the effective date of this Compact between the Government of the United States and the Government of the Marshall Islands or the Federated States of Micronesia and thereafter as mutually agreed:

(1) Article VI and Sections 172, 173, 176 and 177 of Title One;

(2) Title Three; and

(3) Articles II, III, V and VI of Title Four.

(b) Upon receipt of notice of termination pursuant to Section 443, the Government of the United States and the Government so terminating shall promptly consult with regard to their future relationship. These consultations shall determine the level of economic assistance which the Government of the United States shall provide to the Government so terminating for the period ending on the fifteenth anniversary of the effective date of this Compact provided that the annual amounts specified in Sections 211, 212, 214, 215 and 216 shall continue without diminution. Such amounts, with the exception of those specified in Section 216, shall be adjusted according to the formula set forth in Section 217.

Section 454

Notwithstanding any other provision of this Compact:

(a) The Government of the United States reaffirms its continuing interest in promoting the long-term economic advancement and self-sufficiency of the peoples of the Marshall Islands and the Federated States of Micronesia; and

(b) The separate agreements referred to in Article II of the Title Three shall remain in effect in accordance with their terms which shall also determine the duration of Section 213.

Article VI

Definition of Terms

Section 461

For the purpose of this Compact only and without prejudice to the views of the Government of the United States or the Government of the Marshall Islands or the Federated States of Micronesia as to the nature and extent of the jurisdiction under international law of any of them, the following terms shall have the following meanings:

(a) "Trust Territory of the Pacific Islands" means the area established in the Trusteeship Agreement consisting of the administrative districts of Kosrae, Yap, Ponape, the Marshall Islands and Truk as described in Title One, Trust Territory Code, Section 1, in force on Jaunary 1, 1979. This term does not include the area of Palau or the Northern Mariana Islands.

(b) "Trusteeship Agreement" means the agreement setting forth the terms of trusteeship for the Trust Territory of the Pacific Islands, approved by the Security Council of the United Nations April 2, 1947, and by the United States July 18, 1947, entered into force July 18, 1947, 61 Stat. 3301, T.I.A.S. 1665, 8 U.N.T.S. 189.

(c) "The Marshall Islands" and "the Federated States of Micronesia" are used in a geographic sense and include the land and water areas to the outer limits of the territorial sea and the air space above such areas as now or hereafter recognized by the Government of the United States.

(d) "Government of the Marshall Islands" means the Government established and organized by the Constitution of the Marshall Islands including all the political subdivisions and entities comprising that Government.

"Government of the Federated States of Micronesia" means the Government established and organized by the Constitution of the Federated States of Micronesia including all the political subdivisions and entities comprising that Government.

(e) The following terms shall be defined consistent with the 1976 Edition of the Radio Regulations of the International Telecommunications Union (ISBN 92-61-0081-5) as follows:

(1) "Radio Communications" means telecommunication by means of radio waves.

(2) "Station" means one or more transmitters or receivers or a combination of transmitters and receivers, including the accessory equipment, necessary at one location for carrying on a radio communication service;

each station shall be classified by the service in which it operates permanently or temporarily.

(3) "Broadcasting Service" means a radio communication service in which the transmissions are intended for direct reception by the general public, and which may include sound transmissions, television transmissions or other types of transmissions.

(4) "Broadcasting Station" means a station in the broadcasting service.

(f) "Frequency Assignment" means the same as 'Frequency Assignment' means in the 1976 Edition of the Radio Regulations of the International Telecommunications Union (ISBN 92-61-0081-5).

(g) "Habitual Residence" means a place of general abode or a principal, actual dwelling place of a continuing or lasting nature; provided, however, that this term shall not apply to the residence of any person who entered the United States for the purpose of full-time studies as long as such person maintains that status, or who has been physically present in the United States, the Marshall Islands, or the Federated States of Micronesia for less than one year, or who is a dependent of a resident representative, as described in Section 152.

(h) For the purposes of Article IV of Title One of this Compact:

(1) "Actual Residence" means physical presence in the Marshall Islands or the Federated States of Micronesia during eighty-five percent of the period of residency required by Section 141(a)(3); and

(2) "Certificate of Actual Residence" means a certificate issued to a naturalized citizen by the Government which has naturalized him stating that the citizen has complied with the actual residence requirement of Section 141(a)(3).

(i) "Military Areas and Facilities" means those areas and facilities in the Marshall Islands or the Federated States of Micronesia reserved or acquired by the Government of the Marshall Islands or the Federated States of Micronesia for use by the Government of the United States, as set forth in the separate agreements referred to in Section 321.

(j) "Capital Account" means, for each year of the Compact, those portions of the total grant assistance provided in Article I of Title Two, adjusted by Section 217, which are to be obligated for:

(1) the construction or major repair of capital infrastructure; or

(2) public and private sector projects identified in the official overall economic development plan.

(k) "Current Account" means, for each year of the Compact, those portions of the total grant assistance provided in Article I of Title Two, adjusted by Section 217, which are to be obligated for recurring operational activities including infrastructure maintenance as identified in the annual budget justifications submitted yearly to the Government of the United States.

(l) "Official Overall Economic Development Plan" means the documented program of annual development which identifies the specific policy and project activities necessary to achieve a specified set of economic goals and objectives during the period of free association, consistent with the economic assistance authority in Title Two. Such a document should include an analysis of population trends, manpower requirements, social needs, gross national product estimates, resource utilization, infrastructure needs and expenditures, and the specific private sector projects required to develop the local economy of the Marshall Islands or the Federated States of Micronesia. Project identification should include initial cost estimates, with project purposes related to specific development goals and objectives.

(m) "Tariff Schedules of the United States" means the Tariff Schedules of the United States as amended from time to time and as promulgated pursuant to United States law and includes the Tariff Schedules of the United States Annotated (TSUSA), as amended.

(n) "Vienna Convention on Diplomatic Relations" means the Vienna Convention on Diplomatic Relations, done April 18, 1961, 23 U.S.T. 3227, T.I.A.S. 7502, 500 U.N.T.S. 95.

Section 462

The Government of the United States and the Government of the Marshall Islands or the Federated States of Micronesia, as appropriate, shall conclude related agreements which shall come into effect and shall survive in accordance with their terms, as follows:

(a) Agreement Regarding the Provision of Telecommunication Services by the Government of the United States to the Marshall Islands and the Federated States of Micronesia Concluded Pursuant to Section 131 of the Compact of Free Association;

(b) Agreement Regarding the Operation of Telecommunication Services of the Government of the United States in the Marshall Islands and the Federated States of Micronesia Concluded Pursuant to Section 132 of the Compact of Free Association;

(c) Agreement on Extradition, Mutual Assistance in Law Enforcement Matters and Penal Sanctions Concluded Pursuant to Section 175 of the Compact of Free Association;

(d) Agreement Between the Government of the United States and the Government of the Marshall Islands for the Implementation of Section 177 of the Compact of Free Association;

(e) Federal Programs and Services Agreement Concluded Pursuant to Article II of Title Two and Section 232 of the Compact of Free Association;

(f) Agreement Concluded Pursuant to Section 234 of the Compact of Free Association;

(g) Agreement Regarding the Military Use and Operating Rights of the Government of the United States in the Marshall Islands Concluded Pursuant to Sections 321 and 323 of the Compact of Free Association;

(h) Agreement Regarding the Military Use and Operating Rights of the Government of the United States in the Federated States of Micronesia Concluded Pursuant to Sections 227, 321 and 323 of the Compact of Free Association;

(i) Status of Forces Agreement Concluded Pursuant to Section 323 of the Compact of Free Association;

(j) Agreement Between the Government of the United States and the Government of the Federated States of Micronesia Regarding Friendship, Cooperation and Mutual Security Concluded Pursuant to Sections 321 and 323 of the Compact of Free Association; and

(k) Agreement Between the Government of the United States and the Government of the Marshall Islands Regarding Mutual Security Concluded Pursuant to Sections 321 and 323 of the Compact of Free Association.

Section 463

(a) Except as set forth in Section 463(b), any reference in this Compact to a provision of the United States Code or the Statutes at Large of the United States constitutes the incorporation of the language of such provision into this Compact, as such provision was in force on January 1, 1980.

(b) Any reference in Article VI of Title One and Sections 131, 174, 175, 178 and 342 to a provision of the United States Code or the Statutes at Large of the United States or to the Privacy Act, the Freedom of Information Act or the Administrative Procedure Act constitutes the incorporation of the language of such provision into this Compact as such provision is in force on the effective date of this Compact or as it may be amended thereafter on a non-discriminatory basis according to the constitutional processes of the United States.

Article VII

Concluding Provisions

Section 471

(a) The Government of the United States and the Governments of the Marshall Islands and the Federated States of Micronesia agree that they have full authority under their respective Constitutions to enter into this Compact and its related agreements and to fulfill all of their respective responsibilities in accordance with the terms of this Compact and its related agreements. The Governments pledge that they are so committed.

(b) Each of the Governments of the United States, the Marshall Islands and the Federated States of Micronesia shall take all necessary steps, of a general or particular character, to ensure, not later than the effective date of this Compact, the conformity of its laws, regulations and administrative procedures with the provisions of this Compact.

(c) Without prejudice to the effects of this Compact under international law, this Compact has the force and effect of a statute under the laws of the United States.

Section 472

This Compact may be accepted, by signature or otherwise, by the Government of the United States, the Government of the Marshall Islands, and the Government of the Federated States of Micronesia. Each Government accepting this Compact shall possess an original English language version.

IN WITNESS WHEREOF, the undersigned, duly authorized, have signed this Compact of Free Association which shall come into effect in accordance with its terms between the Government of the United States and each of the other Governments signatory to this Compact.

DONE AT HONOLULU, HAWAII, THIS 1ST DAY OF OCTOBER, ONE THOUSAND, NINE HUNDRED EIGHTY-TWO

FOR THE GOVERNMENT

OF

THE UNITED STATES OF AMERICA

AMBASSADOR FRED M. ZEDER, II

PRESIDENT'S PERSONAL REPRESENTATIVE FOR MICRONESIAN STATUS NEGOTIATIONS

DONE AT HONOLULU, HAWAII, THIS 1ST DAY OF OCTOBER, ONE THOUSAND, NINE HUNDRED EIGHTY-TWO

FOR THE GOVERNMENT

OF

THE FEDERATED STATES OF MICRONESIA

HONORABLE ANDON L. AMARAICH

CHAIRMAN, COMMISSION ON FUTURE POLITICAL STATUS AND TRANSITION

DONE AT MAJURO, MARSHALL ISLANDS, THIS 25TH DAY
OF JUNE, ONE THOUSAND, NINE HUNDRED, EIGHTY-THREE
FOR THE GOVERNMENT
OF
THE UNITED STATES OF AMERICA
AMBASSADOR FRED M. ZEDER, II
PRESIDENT'S PERSONAL REPRESENTATIVE
FOR MICRONESIAN STATUS NEGOTIATIONS
DONE AT MAJURO, MARSHALL ISLANDS, THIS 25TH DAY
OF JUNE, ONE THOUSAND, NINE HUNDRED EIGHTY-THREE
FOR THE GOVERNMENT
OF
THE MARSHALL ISLANDS
PRESIDENT AMATA KABUA
PRESIDENT OF THE REPUBLIC
OF THE MARSHALL ISLANDS

SEC. 2. (a) With respect to section 321 of the Compact of Free Association and its related agreements, the jurisdictional provisions set forth in subsection (b) of this section shall apply only to the citizens and nationals of the United States and aliens lawfully admitted to the United States for permanent residence who are in the Marshall Islands or the Federated States of Micronesia.

(b)(1) The defense sites of the United States established in the Marshall Islands or the Federated States of Micronesia in accordance with the Compact of Free Association and its related agreements are within the special maritime and territorial jurisdiction of the United States as set forth in section 7, title 18, United States Code.

(2) Any person referred to in subsection (a) of this section who within or upon such defense sites is guilty of any act or omission which, although not made punishable by any enactment of Congress, would be punishable if committed or omitted within the jurisdiction of the State of Hawaii by the laws thereof, in force at the time of such act or omission, shall be guilty of a like offense and subject to a like punishment.

(3) The United States District Court for the District of Hawaii shall have jurisdiction to try all criminal offenses against the United States, including the laws of the State of Hawaii made applicable to the defense sites in the Marshall Islands or the Federated States of Micronesia by virtue of paragraph (2) of this subsection, committed by any person referred to in subsection (a) of this section.

(4) The United States District Court for the District of Hawaii may appoint one or more magistrates for the defense sites in the Marshall Islands. Such Magistrates shall have the power and the status of Magistrates appointed pursuant to chapter 43, title 28, United States Code, provided, however that such Magistrates shall have the power to try persons accused of and sentence persons convicted of petty offenses, as defined in section 1(3), title 18, United States Code, including violations of regulations for the maintenance of peace, order, and health issued by the Commanding Officer on such defense sites, without being subject to the restrictions provided for in section 3401(b), title 18, United States Code.

SEC. 3. Upon the effective date of the Compact of Free Association, the laws of the United States generally applicable to the Trust Territory of the Pacific Islands shall continue to apply to the Republic of Palau and the Republic of Palau shall be eligible for such proportion of Federal assistance as it would otherwise have been eligible to receive under such laws prior to the effective date of the Compact, as determined by the Government of the United States.

The CHAIRMAN. Pursuant to House Resolution 235 and the order of the House of today, no amendments are in order except an amendment in the nature of a substitute consisting of the text after the resolving clause of House Joint Resolution 355, which shall be considered as pending and as having been read, shall be debatable for 30 minutes to be equally divided and controlled by Representative ROSTENKOWSKI or his designee and a Member opposed thereto, shall not be subject to amendment except a substitute consisting of the text after the resolving clause of House Joint Resolution 344, if offered by Representative UDALL, which shall be considered as having been read, shall not be subject to amendment, shall be debatable for 30 minutes to be equally divided and controlled by the proponent of the substitute and a Member opposed thereto.

The Clerk will designate the amendment in the nature of a substitute consisting of the text of House Joint Resolution 355.

The text of the amendment in the nature of a substitute consisting of the text of House Joint Resolution 355 is as follows:

Strike all after the resolving clause and insert:

H.J. RES. 355

TITLE I—APPROVAL OF COMPACT; INTERPRETATION OF, AND U.S. POLICIES REGARDING, COMPACT; SUPPLEMENTAL PROVISIONS

SECTION 101. APPROVAL OF COMPACT OF FREE ASSOCIATION.

(a) FEDERATED STATES OF MICRONESIA.—The Compact of Free Association set forth in title II of this joint resolution between the United States and the Government of the Federated States of Micronesia is hereby approved, and, subject to the provisions of this joint resolution, the President is authorized to agree, in accordance with section 411 of the Compact, to an effective date for and thereafter to implement such Compact, having taken into account any procedures with respect to the United Nations for termination of the Trusteeship Agreement.

(b) MARSHALL ISLANDS.—The Compact of Free Association set forth in title II of this joint resolution between the United States and the Government of the Marshall Islands is hereby approved, and, subject to the provisions of this joint resolution, the President is authorized to agree, in accordance with section 411 of the Compact, to an effective date for and thereafter to implement such Compact, having taken into account any procedures with respect to the United Nations for termination of the Trusteeship Agreement.

(c) REFERENCE TO THE COMPACT.—Any reference in this joint resolution to "the Compact" shall be treated as a reference to the Compact of Free Association set forth in title II of this joint resolution and the subsidiary agreements incorporated into the Compact pursuant to subsection (d) of this section.

(d) INCORPORATION OF SUBSIDIARY AGREEMENTS.—The following subsidiary agreements, or portions thereof, as set forth on pages 115 through 391 of House Document 98-192 of March 30, 1984, are hereby incorporated into the Compact and shall have the force and effect of laws of the United States to the same extent as the Compact:

(1) The agreements referred to in subsections (a), (b), (c), (d), (e), (f), (j), and (k) of section 462 of the Compact;

(2) Articles I, II, III, VII, and X of the agreement referred to in section 462(g) of the Compact;

(3) Articles I, II, III, VI, and VIII of the agreement referred to in section 462(h) of the Compact;

(4) Articles I, III, IV, V, VI, VII, IX, XIV, XV, XVI, XVII, and XIX of the agreement referred to in section 462(i) of the Compact;

(5) The agreement set forth on pages 388 through 391 of House Document 98-192 of March 30, 1984.

(e) SUBSIDIARY AGREEMENTS DEEMED BILATERAL.—For purposes of implementation of the Compact and this joint resolution, each of the subsidiary agreements referred to in subsection (d) (whether or not bilateral in form) shall be deemed to be bilateral agreements between the United States and each other party to such subsidiary agreement. The consent or concurrence of any other party shall not be required for the effectiveness of any actions taken by the United States in conjunction with either the Federated States of Micronesia or the Marshall Islands which are intended to affect the implementation, modification, suspension, or termination of any such subsidiary agreement (or any provision thereof) as regards the mutual responsibilities of the United States and the party in conjunction with whom the actions are taken.

(f) EFFECTIVE DATE.—(1) The President shall not agree to an effective date for the Compact, as authorized by this section, until after certifying to Congress that the agreements described in section 102 and section 103 of this title have been concluded.

(2) Any agreement concluded with the Federated States of Micronesia or the Marshall Islands pursuant to sections 102 and 103 shall be submitted to the Congress. No such agreement shall take effect until after the expiration of 30 days after the date such agreement is so submitted (excluding days on which either House of Congress is not in session).

(3) No agreement described in paragraph (2) shall take effect if a joint resolution of disapproval is enacted during the period specified in paragraph (2). For the purpose of expediting the consideration of such a joint resolution, a motion to proceed to the consideration of any such joint resolution after it has been reported by an appropriate committee shall be treated as highly privileged in the House of Representatives. Any such joint resolution shall be considered in the Senate in accordance with the provisions of section 601(b) of the International Security Assistance and Arms Export Control Act of 1976.

SEC. 102. AGREEMENTS WITH FEDERATED STATES OF MICRONESIA.

(a) LAW ENFORCEMENT AND AUDITS.—(1) The President of the United States shall negotiate with the Government of the Federated States of Micronesia agreements pursuant to section 175 of the Compact which are in addition to the Agreements pursuant to

such section dated October 1, 1982, and transmitted to the Congress by the President on February 20, 1985. Such additional agreements shall provide as follows:

(A) MUTUAL ASSISTANCE IN LAW ENFORCEMENT.—The law enforcement agencies of the United States and the Federated States of Micronesia shall assist one another, as mutually agreed, in the investigation of crimes and the enforcement of the laws of the United States and the Federated States of Micronesia. The United States and the Federated States of Micronesia will authorize mutual assistance with respect to investigations, inquiries, audits and related activities by the law enforcement agencies of both Governments in the United States and the Federated States of Micronesia. In conducting activities authorized in accordance with this section, the United States and the Federated States of Micronesia will act in accordance with the constitution and laws of the jurisdiction in which such activities are conducted.

(B) NARCOTICS AND CONTROL OF ILLEGAL SUBSTANCES.—The United States and the Federated States of Micronesia will take all reasonable and necessary steps, as mutually agreed based upon consultations in which the Attorney General or other designated official of each Government participates, to prevent the use of the lands, waters, and facilities of the United States or the Federated States of Micronesia for the purposes of cultivation of, production of, smuggling of, trafficking in, and abuse of any controlled substance as defined in section 102(6) of the United States Controlled Substances Act and Schedules I through V of Subchapter II of the Controlled Substances Act of the Federated States of Micronesia, or for the distribution of any such substance to or from the Federated States of Micronesia or to or from the United States or any of its territories or commonwealths.

(C) OTHER CRIMINAL LAWS.—The United States and the Federated States of Micronesia shall take all reasonable and necessary steps, as mutually agreed based upon consultations in which the Attorney General or other designated official of each Government participates, to prevent and prosecute violations of the laws of the United States and the laws of the Federated States of Micronesia related to counterfeiting of United States currency, use of the mails, banking, issuance of and transactions in securities, protection of Government officials, espionage, terrorism, embezzlement of Government funds, racketeer influenced and corrupt organizations, and financial transactions which advance the interests of any person engaging in unlawful activities.

(D) AUTHORIZATION FOR INVESTIGATION, ETC.—The Federated States of Micronesia will fully cooperate with law enforcement officials and agencies of the United States, and the United States will fully cooperate with law enforcement officials and agencies of the Federated States of Micronesia to carry out investigations, audits, studies, or inquiries to the extent needed to assure the full implementation of all provisions of the Compact and the agreements specified in this section.

(E) TECHNICAL AND TRAINING ASSISTANCE.—Upon request, the United States shall provide non-reimbursable technical and training assistance as appropriate, including training and equipment for postal inspection of illicit drugs and other contraband, to enable the government of the Federated States of Micronesia to develop and adequately enforce laws of the Federated States of Micronesia and to cooperate with the United States in the enforcement of criminal laws of the United States. Upon request, the Federated States of Micronesia shall provide non-reimbursable technical and training assistance to enable the United States to develop and adequately enforce laws of the United States and to cooperate with the Federated States of Micronesia in the enforcement of criminal laws of the Federated States of Micronesia.

(F) LAW ENFORCEMENT ASSISTANCE.—Upon request, the United States will provide assistance, as appropriate, to the Federated States of Micronesia in investigating and prosecuting violations of the criminal laws of the Federated States of Micronesia. The United States will provide assistance to the Federated States of Micronesia to respond to incidents or threats of riots, insurrections, or civil disorders to such extent as may be requested by the Federated States of Micronesia and specifically agreed to by the Attorney General on behalf of the United States.

(G) GENERAL ACCOUNTING OFFICE.—The Federated States of Micronesia will cooperate fully with the Comptroller General of the United States in the conduct of such audits, studies, investigations, and inquiries as the Comptroller General determines necessary to enable the Comptroller General to fully discharge his responsibilities under this joint resolution and other applicable laws. The Comptroller General shall notify Congress when the agreement implementing this paragraph has been concluded.

(2) CONSULTATION.—Any official, designated by this joint resolution or the President to negotiate any agreement under this section shall consult with affected law enforcement agencies prior to entering into such an agreement on behalf of the United States.

(3) REPORT.—The President shall report annually to Congress on the implementation of this subsection. Such report shall provide statistical and other information about the incidence of crimes in the Federated States of Micronesia which have an impact upon United States jurisdictions, and propose measures which the United States and the Federated States of Micronesia should take in order better to prevent and prosecute violations of the laws of the United States and the Federated States of Micronesia. The reports required under section 481(e) of the Foreign Assistance Act of 1961 shall include relevant information concerning the Federated States of Micronesia.

(b) ECONOMIC DEVELOPMENT PLANS REVIEW PROCESS.—

(1) SUBMISSION OF DEVELOPMENT PLANS.—In order to clarify section 211(b) of the Compact, the President of the United States shall negotiate with the Government of the Federated States of Micronesia an agreement that economic development plans referred to in section 211(b) of the Compact shall be submitted to the Government of the United States for its review at intervals not greater than every 5 years for the duration of the Compact. All plans for a 5-year period beginning after the initial plan shall be submitted not less than 90 days prior to the expiration of the previous 5-year period. Submissions pursuant to this subsection shall be in addition to the annual reports to be submitted pursuant to section 211(c) of the Compact.

(2) UNITED STATES GOVERNMENT REVIEW.—The United States shall not concur in those development plans described in paragraph (1) of this subsection until—

(A) after the President of the United States has conducted a review and reported the findings of the President to the Congress; and

(B) the Congress has had 30 days (excluding days on which both Houses of Congress are not in session) to review the findings of the President.

(3) REPORT.—The President shall complete the review under paragraph (2) and shall report the findings no later than 60 days after the President's receipt of such plans. The report shall include the views of the Secretary of the Interior, the Administrator of the Agency for International Development, and the heads of such other Executive departments as the President may decide to include in the report.

SEC. 103. AGREEMENTS WITH AND OTHER PROVISIONS RELATED TO THE MARSHALL ISLANDS.

(a) LAW ENFORCEMENT AND AUDITS.—(1) The President of the United States shall negotiate with the Government of the Marshall Islands agreements pursuant to section 175 of the Compact which are in addition to the Agreements pursuant to such section dated May 30, 1982, and transmitted to the Congress by the President on February 20, 1985. Such additional agreements shall provide as follows:

(A) MUTUAL ASSISTANCE IN LAW ENFORCEMENT.—The law enforcement agencies of the United States and the Marshall Islands shall assist one another, as mutually agreed, in the investigation of crimes and the enforcement of the laws of the United States and the Marshall Islands. The United States and the Marshall Islands will authorize mutual assistance with respect to investigations, inquiries, audits and related activities by the law enforcement agencies of both Governments in the United States and the Marshall Islands. In conducting activities authorized in accordance with this section, the United States and the Marshall Islands will act in accordance with the constitution and laws of the jurisdiction in which such activities are conducted.

(B) NARCOTICS AND CONTROL OF ILLEGAL SUBSTANCES.—The United States and the Marshall Islands will take all reasonable and necessary steps, as mutually agreed based upon consultations in which the Attorney General or other designated official of each Government participates, to prevent the use of the lands, waters, and facilities of the United States or the Marshall Islands for the purposes of cultivation of, production of, smuggling of, trafficking in, and abuse of any controlled substance as defined in section 102(6) of the United States Controlled Substances Act and Schedules I through V of Subchapter II of the Controlled Substances Act of the Marshall Islands, or for the distribution of any such substance to or from the Marshall Islands or to or from the United States or any of its territories or commonwealths.

(C) OTHER CRIMINAL LAWS.—The United States and the Marshall Islands shall take all reasonable and necessary steps, as mutually agreed based upon consultations in which the Attorney General or other designated official of each Government participates, to prevent and prosecute violations of the laws of the United States and the laws of the Marshall Islands related to counterfeiting of United States currency, use of the mails, banking, issuance of and transactions in securities, protection of Government officials, espionage, terrorism, embezzlement of Government funds, racketeer influenced and corrupt organizations, and financial transactions which advance the interests of any person engaging in unlawful activities.

(D) AUTHORIZATION FOR INVESTIGATION, ETC.—The Marshall Islands will fully cooperate with law enforcement officials and agencies of the United States, and the United States will fully cooperate with law enforcement officials and agencies of the Marshall Islands to carry out investigations, audits, studies, or inquiries to the extent needed to assure the full implementation of all provisions of the Compact and the agreements specified in this section.

(E) TECHNICAL AND TRAINING ASSISTANCE.—Upon request, the United States shall provide non-reimbursable technical and training assistance, as appropriate, including training and equipment for postal inspection of illicit drugs and other contraband, to enable the Government of the Marshall Islands to develop and adequately enforce laws of the Marshall Islands and to cooperate with the United States in the enforcement of criminal laws of the United States. Upon request, the Marshall Islands shall provide non-reimbursable technical and training assistance to enable the United States to develop and adequately enforce laws of the United States and to cooperate with the Marshall Islands in the enforcement of criminal laws of the Marshall Islands.

(F) LAW ENFORCEMENT ASSISTANCE.—Upon request, the United States will provide assistance, as appropriate, to the Marshall Islands in investigating and prosecuting violations of the criminal laws of the Marshall Islands. The United States will provide assistance to the Marshall Islands to respond to incidents or threats of riots, insurrections, or civil disorders to such extent as may be requested by the Marshall Islands and specifically agreed to by the Attorney General on behalf of the United States.

(G) GENERAL ACCOUNTING OFFICE.—The Marshall Islands will cooperate fully with the Comptroller General of the United States in the conduct of such audits, studies, investigations, and inquiries as the Comptroller General determines necessary to enable the Comptroller General to fully discharge his responsibilities under this joint resolution and other applicable laws. The Comptroller General shall notify Congress when the agreement implementing this paragraph has been concluded.

(2) CONSULTATION.—Any official, designated by this joint resolution or the President to negotiate any agreement under this section shall consult with affected law enforcement agencies prior to entering into such an agreement on behalf of the United States.

(3) REPORT.—The President shall report annually to Congress on the implementation of this subsection. Such report shall provide statistical and other information about the incidence of crimes in the Marshall Islands which have an impact upon United States jurisdictions, and propose measures which the United States and the Marshall Islands should take in order better to prevent and prosecute violations of the laws of the United States and the Marshall Islands. The reports required under section 481(e) of the Foreign Assistance Act of 1961 shall include relevant information concerning the Marshall Islands.

(b) ECONOMIC DEVELOPMENT PLANS REVIEW PROCESS.—

(1) SUBMISSION OF DEVELOPMENT PLANS.—In order to clarify section 211(b) of the Compact, the President of the United States shall negotiate with the Government of the Marshall Islands an agreement that economic development plans referred to in section 211(b) of the Compact shall be submitted to the Government of the United States for its review at intervals not greater than every 5 years for the duration of the Compact. All plans for a 5-year period beginning after the initial plan shall be submitted not less than 90 days prior to the expiration of the previous 5-year period. Submissions pursuant to this subsection shall be in addition to the annual reports to be submitted pursuant to section 211(c) of the Compact.

(2) UNITED STATES GOVERNMENT REVIEW.—The United States shall not concur in those development plans described in paragraph (1) of this subsection until—

(A) after the President of the United States has conducted a review and reported the findings of the President to the Congress; and

(B) the Congress has had 30 days (excluding days on which both Houses of Congress are not in session) to review the findings of the President.

(3) REPORT.—The President shall complete the review under paragraph (2) and shall report the findings no later than 60 days after the President's receipt of such plans. The report shall include the views of the Secretary of the Interior, the Administrator of the Agency for International Development, and the heads of such other Executive departments as the President may decide to include in the report.

(c) UJELANG, EJIT.—

(1) The President of the United States shall negotiate with the Government of the Marshall Islands an agreement whereby, without prejudice as to any claims which have been or may be asserted by any party as to rightful title and ownership of any lands on either Ujelang or Ejit, the Government of the Marshall Islands shall assure that lands on Ujelang used as of January 1, 1985, by the people of Enewetak, and that lands on Ejit used as of January 1, 1985, by the people of Bikini, will continue to be available without charge for their use, until such time as Enjebi and Bikini are restored and inhabitable and the continued use of Ujelang and Ejit is no longer necessary, unless a Marshall Islands court of competent jurisdiction finally determines that there are legal impediments to continued use of Ujelang by the people of Enewetak or to continued use of Ejit by the people of Bikini.

(2) If the impediments described in paragraph (1) do arise, the United States will cooperate with the Government of the Marshall Islands in assisting any person adversely affected by such judicial determination to remain on either Ujelang or Ejit, as appropriate, or in locating suitable and acceptable alternative lands for such person's use.

(3) Paragraph (1) shall not be applied in a manner which would prevent the Government of the Marshall Islands from acting in accordance with its constitutional processes to resolve title and ownership claims with respect to such lands or from taking substitute or additional measures to meet the needs of the people of Enewetak and Bikini with their democratically expressed consent and approval.

(d) KWAJALEIN PAYMENTS.—

(1) PAYMENTS.—The United States shall pay the following to the Government of the Marshall Islands for the use of the land on Kwajalein Atoll for military purposes, to be paid to the recipients specified in the land use agreement between the Government of the Marshall Islands and the Kwajalein Atoll Corporation dated October 19, 1982, pursuant to the provisions of such agreement:

(A) INITIAL 15 YEARS.—During the period of 15 years after the effective date of the Compact, annual payments of—

(i) $1,900,000 as specified in section 213(a) of the Compact;

(ii) $7,100,000 to be charged against the total amounts to be paid by the United States specified in section 211(a) of the Compact; and

(iii) such adjustment for inflation as may be made to the amount specified in clause (ii) of this subparagraph, pursuant to section 217 of the Compact.

(B) 15 YEARS.—On the date 15 years after the effective date of the Compact, the sum of $2,500,000, as provided in the United States-Marshall Islands Military Use and Operating Rights Agreement, in consideration of the right of the United States under such agreement to elect whether such agreement is to remain in effect during the period after the date 15 years after the effective date of the Compact.

(2) FAILURE TO MAKE PAYMENTS.—In the event that the Government of the Marshall Islands fails to make payments in accordance with paragraph (1) of this subsection within 14 days of receipt of funds and the United States determines the failure is not justified, the United States shall deem such failure to make payments a material breach of the United States security and defense authority under the Compact.

(3) RESOLUTION OF FAILURE TO PAY DISPUTE.—The United States shall resolve any situation described in paragraph (2) of this subsection and address any concerns of the Government of the Marshall Islands under paragraph (2) pursuant to the provisions of section 313 of the Compact. For purposes of this section, the procedures under section 313 of the Compact shall take no more than 10 days.

(4) UNITED STATES ACTIONS.—In the event that the United States determines, pursuant to this subsection and section 313 of the Compact, that the Government of the Marshall Islands has materially breached the Compact, the United States shall take all steps necessary, which may include (but not be limited to) withholding payment of Compact funds to the Government of the Marshall Islands, to ensure that the Government of the Marshall Islands meets its obligations to make payments pursuant to paragraph (1) of this subsection.

(5) LOANS.—The Secretary of the Treasury is hereby authorized to make loans to the Government of the Marshall Islands only for use by the Kwajalein Atoll Development Authority for the benefit of the Kwajalein landowners of amounts sought by such authority for development purposes, pursuant to a development plan for Kwajalein Atoll which such authority has adopted in accordance with applicable laws of the Marshall Islands. Such loans shall be without interest, shall be secured by the moneys (if any) from the Compact funds remaining payable to such landowners as agree to giving such security at the time of the loan, and shall be subject to such other terms and conditions as the Secretary of the Treasury, in his discretion, may determine appropriate and necessary. The Government of the Marshall Islands shall present all requests by the Kwajalein Atoll Development Authority for loans pursuant to this subsection to the Secretary of the Treasury within 14 days after receipt by such government of such requests.

(e) SECTION 177 AGREEMENT.—(1) In furtherance of the purposes of Article I of the Subsidiary Agreement for Implementation of Section 177 of the Compact, the payment

of the amount specified therein shall be made by the United States under Article I of the Agreement between the Government of the United States and the Government of the Marshall Islands for the Implementation of Section 177 of the Compact (hereafter in this subsection referred to as the "Section 177 Agreement") only after the Government of the Marshall Islands has notified the Secretary of the Treasury as to which investment management firm has been selected by such Government to act as Fund Manager under Article I of the Section 177 Agreement.

(2) In the event that the Secretary of the Treasury determines that an investment management firm selected by the Government of the Marshall Islands does not meet the requirements specified in Article I of the Section 177 Agreement, the United States shall invoke the conference and dispute resolution procedures of Article II of Title Four of the Compact. Pending the resolution of such a dispute and until a qualified Fund Manager has been designated, the Government of the Marshall Islands shall place the funds paid by the United States pursuant to Article I of the Section 177 Agreement into an interest-bearing escrow account. Upon designation of a qualified Fund Manager, all funds in the escrow account shall be transferred to the control of such Fund Manager for management pursuant to the Section 177 Agreement.

(3) If the Government of the Marshall Islands determines that some other investment firm should act as Fund Manager in place of the firm first (or subsequently) selected by such Government, the Government of the Marshall Islands shall so notify the Secretary of the Treasury, identifying the firm selected by such Government to become Fund Manager, and the Secretary of the Treasury shall proceed to evaluate the qualifications of such identified firm.

(4) At the end of 15 years after the effective date of the Compact, the firm then acting as Fund Manager shall transfer to the Government of the Marshall Islands, or to such account as such Government shall so notify the Fund Manager, all remaining funds and assets being managed by the Fund Manager under the Section 177 Agreement.

(5) The Fund Manager shall transmit to the Congress and to the people of Bikini, Enewetak, Rongelap, and Utirik at least annual reports concerning all actions of the Fund Manager pursuant to the Section 177 Agreement and this joint resolution, including such information (whether received from the Fund Manager or any other source) as relates to the disbursements provided for in Article II of the Section 177 Agreement.

(f) NUCLEAR TEST EFFECTS.—In approving the Compact, the Congress understands and intends that the peoples of Bikini, Enewetak, Rongelap, and Utirik, who were affected by the United States nuclear weapons testing program in the Marshall Islands, will receive the amounts of $75,000,000 (Bikini); $48,750,000 (Enewetak), $37,500,000 (Rongelap); and $22,500,000 (Utirik), respectively, which amounts shall be paid out of proceeds from the fund established under Article I, section 1 of the subsidiary agreement for the implementation of section 177 of the Compact. The amounts specified in this subsection shall be in addition to any amounts which may be awarded to claimants pursuant to Article IV of the subsidiary agreement for the implementation of Section 177 of the Compact.

(g) ESPOUSAL PROVISIONS.—(1) It is the intention of the Congress of the United States that the provisions of section 177 of the Compact of Free Association and the Agreement between the Government of the United States and the Government of the Marshall Islands for the Implementation of Section 177 of the Compact (hereafter in this subsection referred to as the "Section 177 Agreement") constitute a full and final settlement of all claims described in Articles X and XI of the Section 177 Agreement, and that any such claims be terminated and barred except insofar as provided for in the Section 177 Agreement.

(2) If, notwithstanding the enactment into law of this joint resolution, a United States court of competent jurisdiction determines that the provisions of Article X of the Agreement between the Government of the United States and the Government of the Marshall Islands for the Implementation of Section 177 of the Compact (hereafter the "Section 177 Agreement") are invalid as a matter of international law or for any other reason, the provisions of Article XII of the Section 177 Agreement shall not, of themselves, prevent any court of the United States otherwise having jurisdiction over claims described in Articles X and XI of the Section 177 Agreement from entertaining such claims; and the time between the effective date of the Compact and any subsequent final judicial determination of invalidity of Article X of the Section 177 Agreement shall not be included in any calculations regarding applicable statutes of limitations or other similar limitations pertaining to the presentation of any such claims to any such court.

(h) DOE RADIOLOGICAL HEALTH CARE PROGRAM; USDA AGRICULTURAL AND FOOD PROGRAMS.—

(1) MARSHALL ISLANDS PROGRAM.—Notwithstanding any other provision of law, the Secretary of Energy shall continue to provide special medical care and logistical support thereto for the remaining 174 members of the population of Rongelap and Utirik who were exposed to radiation resulting from the 1954 United States thermonuclear "Bravo" test, pursuant to Public Laws 95-134 and 96-205. Such medical care and its accompanying logistical support shall total $22,500,000 over the first 11 years of the Compact.

(2) AGRICULTURAL AND FOOD PROGRAMS.—Notwithstanding any other provision of law, for the first five years after the effective date of the Compact, the Secretary of Agriculture shall provide technical and other assistance—

(A) without reimbursement, to continue the planting and agricultural maintenance program on Enewetak;

(B) without reimbursement, to continue the food programs of the Bikini and Enewetak people described in section 1(d) of Article II of the Subsidiary Agreement for the Implementation of Section 177 of the Compact and for continued waterborne transportation of agricultural products to Enewetak including operations and maintenance of the vessel used for such purposes.

(3) PAYMENTS.—Payments under this subsection shall be provided to such extent or in such amounts as are necessary for services and other assistance provided pursuant to this subsection. It is the sense of Congress that after the periods of time specified in paragraphs (1) and (2) of this subsection, consideration will be given to such additional funding for these programs as may be necessary.

(i) RONGELAP.—(1) Because Rongelap was directly affected by fallout from a 1954 United States thermonuclear test and because the Rongelap people remain unconvinced that it is safe to continue to live on Rongelap Island, it is the intent of Congress to take such steps (if any) as may be necessary to overcome the effects of such fallout on the habitability of Rongelap Island, and to restore Rongelap Island, if necessary, so that it can be safely inhabited. Accordingly, it is the expectation of the Congress that the Government of the Marshall Islands shall use such portion of the funds specified in Article III, section 1(e) of the subsidiary agreement for the implementation of section 177 of the Compact as are necessary for the purpose of contracting with a qualified United States scientist or group of scientists, not connected with any government agency, to review the data collected by the Department of Energy relating to radiation levels and other conditions on Rongelap Island resulting from the thermonuclear test. It is the expectation of the Congress that the Government of the Marshall Islands, after consultation with the people of Rongelap, shall select the party to review such data, and shall contract for such review and for submission of a report to the President of the United States and the Congress as to the results thereof.

(2) The purpose of the review referred to in paragraph (1) of this subsection shall be to establish whether the data cited in support of the conclusions as to the habitability of Rongelap Island, as set forth in the Department of Energy report entitled: "The Meaning of Radiation for Those Atolls in the Northern Part of the Marshall Islands That Were Surveyed in 1978," dated November 1982, are adequate and whether such conclusions are fully supported by the data. If the party reviewing the data concludes that such conclusions as to habitability are fully supported by adequate data, the report to the President of the United States and the Congress shall so state. If the party reviewing the data concludes that the data are inadequate to support such conclusions as to habitability or that such conclusions as to habitability are not fully supported by the data, the Government of the Marshall Islands shall contract with an appropriate United States scientist or group of scientists, not connected with any government agency, to undertake a complete survey of radiation and other effects of the nuclear testing program relating to the habitability of Rongelap Island. Such sums as are necessary for such survey and report concerning the results thereof and as to steps needed to restore the habitability of Rongelap Island are authorized to be made available to the Government of the Marshall Islands.

(3) It is the intent of Congress that, should it be reported that such steps are needed, whatever steps are necessary to restore the habitability of Rongelap Island and return the Rongelap people to their homeland will be taken by the United States in consultation with the Government of the Marshall Islands and, in accordance with its authority under the Constitution of the Marshall Islands, the Rongelap local government council.

(j) FOUR ATOLL HEALTH CARE PROGRAM, ETC.—(1) Services provided by the United States Public Health Service or any other United States agency pursuant to section 1(a) of Article II of the Agreement for the Implementation of Section 177 of the Compact (hereafter in this subsection referred to as the "Section 177 Agreement") shall be

only for services to the people of the Atolls of Bikini, Enewetak, Rongelap, and Utirik who were affected by the consequences of the United States nuclear testing program, pursuant to the program described in Public Law 95-134 and Public Law 96-205 and their descendants (and any other persons identified as having been so affected if such identification occurs in the manner described in such public laws).

(2) At the end of the first year after the effective date of the Compact and at the end of each year thereafter, the Government of the Marshall Islands shall return to the Fund Manager any portion of the funds available pursuant to section 1(a) of the Section 177 Agreement for that year which remain unexpended.

(3) The Fund Manager shall retain the funds returned pursuant to paragraph (2) of this subsection, shall invest and manage such funds, and at the end of 15 years after the effective date of the Compact, shall make from the total amount so retained and the proceeds thereof annual disbursements sufficient to continue to make payments for the provision of health services as specified in paragraph (1) of this subsection to such extent as may be provided in contracts between the Government of the Marshall Islands and appropriate United States providers of such health services.

(k) ENJEBI COMMUNITY TRUST FUND.—Notwithstanding any other provision of law, the Secretary of the Treasury shall establish on the books of the Treasury of the United States a fund having the status specified in Article V of the subsidiary agreement for the implementation of Section 177 of the Compact, to be known as the "Enjebi Community Trust Fund" (hereafter in this subsection referred to as the "Fund"), and shall credit to the Fund the amount of $7,500,000. Such amount, which shall be ex gratia, shall be in addition to and not charged against any other funds provided for in the Compact and its subsidiary agreements, this joint resolution, or any other Act. Upon receipt by the President of the United States of the agreement described in this subsection, the Secretary of the Treasury, upon request of the Government of the Marshall Islands, shall transfer the Fund to the Government of the Marshall Islands, provided that the Government of the Marshall Islands agrees as follows:

(1) ENJEBI TRUST AGREEMENT.—The Government of the Marshall Islands will submit an agreement between such government and the people of Enjebi, acting through the appropriate local government council, for the creation of the Enjebi Community Trust Fund and the appointment as trustee and manager thereof of a United States investment manager with substantial experience in the administration of trusts and with funds under management in excess of $250,000,000, to manage the Enjebi Community Trust Fund in accordance with this subsection.

(2) RESETTLEMENT DETERMINATION.—After the date of the enactment of this joint resolution, the Government of the Marshall Islands, in consultation with the United States, shall monitor radiation and other conditions on Enjebi Island. At such time as the Government of the Marshall Islands determines that resettlement of Enjebi Island by the people of Enjebi would not entail unacceptable risks if done in compliance with reasonable precautions which the people of Enjebi have, in writing, agreed to observe, the Government of the Marshall Islands shall so inform the investment firm to whom the Fund established under paragraph (1) of this subsection is entrusted.

(3) EXPENDITURE OF FUNDS.—After the Government of the Marshall Islands has entered into a binding agreement to hold the United States harmless from loss, damage, and liability associated with resettlement of Enjebi by the people of Enjebi, the investment firm shall make available to the people of Enjebi from the Fund such amounts as the people of Enjebi shall determine necessary for the purpose of—

(A) establishing a community on Enjebi Island for use of the people of Enjebi, and

(B) replanting Enjebi with appropriate food-bearing and other vegetation.

(4) TECHNICAL ASSISTANCE.—Upon request of the Government of the Marshall Islands, the United States may provide to such Government technical assistance to enable such Government to carry out the monitoring described in paragraph (2) of this subsection.

(l) BIKINI ATOLL CLEANUP.—

(1) DECLARATION OF POLICY.—The Congress hereby determines and declares that it is the policy of the United States, to be supported by the full faith and credit of the United States, that because the United States, through its nuclear testing and other activities, has rendered Bikini Atoll unsafe for habitation by the people of Bikini, the United States will fulfill its responsibility for restoring Bikini Atoll to habitability, as set forth in paragraphs (2) and (3) of this subsection.

(2) CLEANUP FUNDS.—There are hereby authorized to be appropriated such sums as are necessary for the purposes of Article VI, Section 1 of the Compact Section 177 Agreement, including the restoration to habitability of Bikini Atoll, and including all sums needed to effectuate a radiological cleanup of Bikini Island so that radioactive contamination at Bikini Island, including contamination derived from consumption of locally-grown food products, can be reduced or otherwise controlled to meet whole body Federal radiation protection standards for the general population, including mean annual dose and mean 30-year cumulative dose standards.

(3) CONDITIONS OF FUNDING.—The funds referred to in paragraph (2) shall be made available pursuant to Article VI, Section 1 of the Compact Section 177 Agreement upon completion of the following events:

(A) The submission of a final report to the Congress of the United States by the Bikini Atoll Rehabilitation Committee established pursuant to Public Law 97-257.

(B) The acceptance by the people of Bikini of the final report and conclusions of the Bikini Atoll Rehabilitation Committee.

(C) The development of a plan for the use of the funds by the Government of the United States in consultation with the Government of the Marshall Islands and, in accordance with its authority under the Constitution of the Marshall Islands, the Bikini-Kili-Ejit Local Government Council.

SEC. 104. INTERPRETATION OF AND UNITED STATES POLICY REGARDING COMPACT OF FREE ASSOCIATION.

(a) HUMAN RIGHTS.—

(1) STATEMENT OF UNDERSTANDINGS AND POLICY.—In approving the Compact, the Congress expresses its understanding that the Federated States of Micronesia and the Marshall Islands will continue to have democratic, constitutional forms of government and will continue to respect internationally recognized human rights and fundamental freedoms.

(2) ANNUAL HUMAN RIGHTS REPORTS.—The Secretary of State shall include in the annual reports on the status of internationally recognized human rights in foreign countries, which are submitted to the Congress pursuant to sections 116 and 502B of the Foreign Assistance Act of 1961, a full and complete report regarding the status of internationally recognized human rights in the Federated States of Micronesia and the Marshall Islands.

(b) IMMIGRATION.—In approving the Compact, the Congress understands and intends that the rights of a bona fide naturalized citizen of the Marshall Islands or the Federated States of Micronesia to enter the United States, to lawfully engage therein in occupations, and to establish residence therein as a non-immigrant, pursuant to the provisions of section 141(a)(3) of the Compact, shall not extend to any such naturalized citizen with respect to whom circumstances associated with the acquisition of the status of a naturalized citizen are such as to allow a reasonable inference, on the part of appropriate officials of the United States and subject to United States procedural requirements, that such naturalized status was acquired primarily in order to obtain such rights.

(c) NONALIENATION OF LANDS.—It is the sense of the Congress that the Government of the Federated States of Micronesia and the Government of the Marshall Islands, during the duration of the Compact, should continue to regulate, in accordance with their Constitutions and laws, the alienation of permanent and long-term interests in real property so as to restrict the acquisition of such interests to persons of Federated States of Micronesia citizenship and Marshall Islands citizenship, respectively.

(d) NUCLEAR WASTE DISPOSAL, ETC.—In approving the Compact, the Congress understands that the Government of the Federated States of Micronesia and the Government of the Marshall Islands will not permit any other government or any nongovernmental party to conduct, in the Marshall Islands or in the Federated States of Micronesia, any of the activities specified in subsection (a) of section 314 of the Compact.

(e) IMPACT OF COMPACT ON U.S. AREAS.—

(1) STATEMENT OF CONGRESSIONAL INTENT.—In approving the Compact, it is not the intent of the Congress to cause any adverse consequences for the United States territories and commonwealths or Hawaii.

(2) ANNUAL REPORTS AND RECOMMENDATIONS.—One year after the date of enactment of this joint resolution and at one year intervals thereafter, the President shall report to the Congress with respect to the impact of the Compact on the United States territories and commonwealths and on Hawaii. These reports shall identify any adverse consequences resulting from the Compact and shall make recommendations for corrective action to eliminate those consequences. These reports shall pay particular attention to matters relating to trade, taxation, immigration, labor laws, minimum wages, and environmental regulation. With regard to immigration the reports shall include statistics concerning the number of persons availing themselves of the rights described in section 141(a) of the Compact during the year covered by each report.

(3) VIEWS OF TERRITORIES, COMMONWEALTHS, AND HAWAII ON IMPACT OF THE COMPACT.—The Government of the State of Hawaii, and the governments of each of the United States territories and commonwealths, may submit to the President statements on any adverse consequences result-

ing to their jurisdictions from implementation of the Compact of Free Association. The President shall transmit the full text of any such statement to the Congress as part of the reports required by paragraph (2).

(4) COMMITMENT OF CONGRESS TO REDRESS ADVERSE CONSEQUENCES.—The Congress hereby declares that, if any adverse consequences to United States territories and commonwealths or Hawaii result from implementation of the Compact of Free Association, the Congress will act sympathetically and expeditiously to redress those adverse consequences.

(5) DEFINITION OF U.S. TERRITORIES AND COMMONWEALTHS.—As used in this subsection, the term "United States territories and commonwealths" means the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands, and any other territory or possession of the United States.

(6) IMPACT COSTS.—There are hereby authorized to be appropriated to the Secretary of the Interior for fiscal years beginning after September 30, 1985, such sums as may be necessary to cover the costs incurred by the State of Hawaii, the territories of Guam and American Samoa, and the Commonwealth of the Northern Mariana Islands resulting from any increased demands placed on educational and social services by immigrants from the Marshall Islands and the Federated States of Micronesia.

(f) FISHERIES MANAGEMENT.—In clarification of Title One, Article II, section 121(b)(1) of the Compact:

(1) Nothing in the Compact or this joint resolution shall be interpreted as recognition by the United States of any claim by the Federated States of Micronesia or by the Marshall Islands to jurisdiction or authority over highly migratory species of fish during the time such species of fish are found outside the territorial sea of the Federated States of Micronesia or the Marshall Islands.

(2) The President shall actively seek the cooperation and support of the Governments of the Federated States of Micronesia and the Marshall Islands in the development of international fishery management policy and regional fishery agreements consistent with the United States policy and legitimate interests of the governments concerned. None of the monies made available pursuant to the Compact or this joint resolution may be used by either the Federated States of Micronesia or the Marshall Islands for enforcement actions against any vessel of the United States on the basis of fishing by any such vessel for highly migratory species of fish outside the territorial sea of the Federated States of Micronesia or the Marshall Islands, respectively.

(3) Appropriate United States officials shall apply the policies and provisions of the Magnuson Fishery Conservation and Management Act (16 U.S.C. 1801 et seq.) and the Fishermen's Protective Act of 1967 (22 U.S.C. 1971 et seq.) with regard to any action taken by the Federated States of Micronesia or the Marshall Islands affecting any vessel of the United States engaged in fishing for highly migratory species of fish in waters outside the territorial seas of the Federated States of Micronesia or the Marshall Islands, respectively. For the purpose of applying the provisions of section 5 of the Fishermen's Protective Act of 1967 (22 U.S.C. 1975), monies made available to either the Federated States of Micronesia or the Marshall Islands pursuant to the provisions of the Compact or this joint resolution shall be treated as "assistance to the government of such country under the Foreign Assistance Act of 1961".

(4) For the purpose of paragraphs (1), (2), and (3) of this subsection—

(A) The term "vessel of the United States" has the same meaning as provided in the first section of the Fishermen's Protective Act of 1967 (22 U.S.C. 1971).

(B) The terms "fishing" and "highly migratory species" have the same meanings as provided in paragraphs (10) and (14), respectively, of section 3 of the Magnuson Fishery Conservation and Management Act (16 U.S.C. 1802(10) and (14).

(5)(A) It is the policy of the United States of America—

(i) to negotiate and conclude with the governments of the Central, Western, and South Pacific Ocean, including the Federated States of Micronesia and the Marshall Islands, a regional licensing agreement setting forth agreed terms of access for United States tuna vessels fishing in the region; and

(ii) that such an agreement should overcome existing jurisdictional differences and provide for a mutually beneficial relationship between the United States and the Pacific Island States that will promote the development of the tuna and other latent fisheries resources of the Central, Western, and South Pacific Ocean and the economic development of the region.

(B) At such time as an agreement referred to in subparagraph (A) is submitted to the Senate for advice and consent to ratification, the Secretary of State, after consultation with the Secretary of Commerce and other interested agencies and concerned governments, shall submit to the Congress a proposed long term regional fisheries development program which may include, but not be limited to—

(i) exploration for, and stock assessment of, tuna and other fish;

(ii) improvement of harvesting techniques;

(iii) gear development;

(iv) biological resource monitoring;

(v) education and training in the field of fisheries; and

(vi) regional and direct bilateral assistance in the field of fisheries.

(6) Any reference in paragraphs (1) through (5) to the Federated States of Micronesia or the Marshall Islands shall also be treated as a reference to Palau if a Compact of Free Association is entered into between the Government of the United States and the Government of Palau.

(g) FOREIGN LOANS.—

(1) LIMITATION ON FUNDS.—Funds provided to the Government of the Federated States of Micronesia or the Government of the Marshall Islands pursuant to section 211 of the Compact of Free Association may not be used to pay debts of that Government to a foreign government. This limitation does not apply to payments on loans relating to existing or future development projects which are outlined in the development plans submitted to the Government of the United States by the Government of the Marshall Islands and the Government of the Federated States of Micronesia pursuant to section 211(b) of the Compact.

(2) UNITED STATES POSITION ON FOREIGN LOANS.—The Congress hereby reaffirms the United States position that the United States Government is not responsible for foreign loans or debt obtained by the Governments of the Federated States of Micronesia and the Marshall Islands.

SEC. 105. SUPPLEMENTAL PROVISIONS.

(a) DOMESTIC PROGRAM REQUIREMENTS.—Except as may otherwise be provided in this title, all United States Federal programs and services extended to or operated in the Federated States of Micronesia or the Marshall Islands are and shall remain subject to all applicable criteria, standards, reporting requirements, auditing procedures, and other rules and regulations applicable to such programs when operating in the United States (including its territories and commonwealths).

(b) RELATIONS WITH THE FEDERATED STATES OF MICRONESIA AND THE MARSHALL ISLANDS.—The Secretary of State shall be responsible for the government to government relations between the Government of the United States and the Government of the Federated States of Micronesia and the Government of the Marshall Islands, respectively, except that the Secretary of the Interior shall be responsible for the program assistance provided to the Federated States of Micronesia and the Marshall Islands pursuant to the Compact and this joint resolution. Nothing in this subsection shall be construed to restrict the Secretary of Defense from carrying out the responsibilities of the Secretary of Defense under Title Three of the Compact.

(c) AUDITS.—

(1) GENERAL AUTHORITY OF THE GAO TO AUDIT.—

(A) The Comptroller General of the United States (and his duly authorized representatives) shall have the authority to audit—

(i) all grants, program assistance, and other assistance provided to the Governments of the Federated States of Micronesia and the Marshall Islands under Articles I and II of Title Two of the Compact of Free Association;

(ii) assistance provided under section 177 of the Compact of Free Association between the Government of the United States and Governments of the Marshall Islands and the Federated States of Micronesia; and

(iii) any other assistance provided by the Government of the United States to the Governments of the Federated States of Micronesia and the Marshall Islands.

Such authority shall include authority for the Comptroller General to conduct or cause to be conducted any of the audits provided for in section 233 of the Compact. The authority provided in this paragraph shall continue for at least three years after the last such grant has been made or assistance has been provided.

(B) The Comptroller General (and his duly authorized representatives) shall also have authority to review any audit conducted by or on behalf of the Government of the United States. In this connection, the Comptroller General shall have access to such personnel and to such records, documents, working papers, automated data and files, and other information relevant to such review, as the Comptroller General determines necessary.

(2) GAO ACCESS TO RECORDS.—

(A) In carrying out paragraph (1)(A), the Comptroller General (and his duly authorized representatives) shall have such access to the personnel and (without cost) to records, documents, working papers, automated data and files, and other information relevant to such audits, as the Comptroller General determines necessary. The Comptroller General may duplicate any such records, documents, working papers, auto-

mated data and files, or other information relevant to such audits.

(B) Such records, documents, working papers, automated data and files, and other information regarding each such grant or other assistance shall be maintained—

(i) for at least three years after the date such grant or assistance was provided; and

(ii) in a manner that permits such grants, assistance, and payments to be accounted for apart from any other funds of the Governments of the Federated States of Micronesia and the Marshall Islands or any other recipient of such grants, assistance, or payments.

(3) REPRESENTATIVE STATUS FOR GAO REPRESENTATIVES.—The Comptroller General and his duly authorized representatives shall be accorded the status set forth in Article V of Title One of the Compact of Free Association.

(4) ANNUAL FINANCIAL STATEMENTS.—As part of the annual report submitted by the Governments of the Federated States of Micronesia and the Marshall Islands under section 211 of the Compact of Free Association, each such Government shall include annual financial statements which account for the use of all of the funds provided by the Government of the United States to that Government under the Compact of Free Association or otherwise. Such financial statements shall be prepared in accordance with title 2 of the Policy and Procedures Manual for Guidance of Federal Agencies of the General Accounting Office. Each such statement shall be submitted to the Secretary of State not later than 120 days after the end of the United States fiscal year with respect to which such funds were provided, and the Secretary shall promptly transmit a copy of each such statement to the Congress.

(5) ANNUAL AUDITS BY THE PRESIDENT.—

(A) The President shall cause an annual audit to be conducted of the annual financial statements described in paragraph (4). Such audit shall be conducted in accordance with the Generally Accepted Government Auditing Standards promulgated by the Comptroller General of the United States. Such audit shall be submitted to the Congress not later than 120 days after the end of the United States fiscal year.

(B) The President shall develop and implement procedures to carry out such audits. Such procedures shall include the matters described in paragraph (2).

(6) DEFINITION OF AUDITS.—As used in this subsection, the term "audits" includes financial, program, and management audits, including determining—

(A) whether the Governments of the Federated States of Micronesia and the Marshall Islands have met the requirements set forth in the Compact of Free Association, or any related agreement entered into under the Compact, regarding the purposes for which such grants and other assistance are to be used; and

(B) the propriety of the financial transactions of the Governments of the Federated States of Micronesia and the Marshall Islands pursuant to such grants or assistance.

(d) CONTINUING TRUST TERRITORY AUTHORIZATION.—The authorization provided by the Act of June 30, 1954, as amended (68 Stat. 330) shall remain available after the effective date of the Compact with respect to the Federated States of Micronesia and the Marshall Islands for the following purposes:

(1) Prior to October 1, 1986, for any purpose authorized by the Compact or this joint resolution.

(2) Transition purposes, including but not limited to, completion of projects and fulfillment of commitments or obligations; termination of the Trust Territory Government and the operation of the High Court; health and education as a result of exceptional circumstances; ex gratia contributions to or for the populations of Bikini, Enewetak, Rongelap, and Utirik; and technical assistance and training in financial management, program administration, maintenance of infrastructure, and any other purposes authorized by law.

(e) MEDICAL REFERRAL DEBTS.—

(1) FEDERATED STATES OF MICRONESIA.—In addition to the funds provided in Title Two, Article II, section 221(b) of the Compact, following approval of the Compact with respect to the Federated States of Micronesia, the United States shall make available to the Government of the Federated States of Micronesia such sums as may be necessary for the payment of the obligations incurred for the use of medical facilities in the United States, its territories and commonwealths by citizens of the Federated States of Micronesia before June 1, 1985.

(2) MARSHALL ISLANDS—In addition to the funds provided in Title Two, Article II, section 221(b) of the Compact, following approval of the Compact with respect to the Marshall Islands, the United States shall make available to the Government of the Marshall Islands such sums as may be necessary for the payment of the obligations incurred for the use of medical facilities in the United States, its territories and commonwealths by citizens of the Marshall Islands before June 1, 1985.

(3) USE OF FUNDS.—In making funds available pursuant to this subsection, the Secretary of the Interior shall take such actions as he deems necessary to assure that the funds are used only for the payment of the medical expenses described in paragraph (1) or (2) of this subsection, as the case may be.

(f) SURVIVABILITY.—In furtherance of the provisions of Title Four, Article V, sections 452 and 453 of the Compact, any provisions of the Compact which remain effective after the termination of the Compact by the act of any party thereto and which are affected in any manner by provisions of this title shall remain subject to such provisions.

(g) REGISTRATION FOR AGENTS OF MICRONESIAN GOVERNMENTS.—Notwithstanding the provisions of Title One, Article V, section 153 of the Compact, after approval of the Compact any citizen of the United States who, without authority of the United States, acts as the agent of the Government of the Marshall Islands or the Federated States of Micronesia with regard to matters specified in the provisions of the Foreign Agents Registration Act of 1938, as amended (22 U.S.C. 611 et seq.) that apply with respect to an agent of a foreign principal shall be subject to the requirements of such Act. Failure to comply with such requirements shall subject such citizen to the same penalties and provisions of law as apply in the case of the failure of such an agent of a foreign principal to comply with such requirements. For purposes of the Foreign Agents Registration Act of 1938, the Federated States of Micronesia and the Marshall Islands shall be considered to be foreign countries.

(h) NONCOMPLIANCE SANCTIONS.—The following provisions are enacted in clarification and extension of Title Two, Article III, section 236 of the Compact:

(1) NONCOMPLIANCE.—If the President of the United States determines that there is reason to believe that either the Government of the Federated States of Micronesia or the Government of the Marshall Islands is not acting in compliance with one or more substantive provisions of the Compact (other than the provisions of Title Three thereof) or this joint resolution or any agreement entered into pursuant to provisions of the Compact (other than those in Title Three) or pursuant to this joint resolution, he shall confer with the appropriate Government, pursuant to Title Four, Article II, section 421 of the Compact. If after such conference, the President determines that there is a dispute as to whether the appropriate Government is complying with any or all such substantive provisions (other than those in Title Three), he shall provide such written notice and take such other steps to submit the matter to arbitration as are provided for by Title Four, Article II, sections 422, 423, and 424 of the Compact.

(2) SUSPENSION OF ASSISTANCE.—If, after submission of a dispute to arbitration pursuant to Title Four, Article II of the Compact and paragraph (2) of this subsection, a duly constituted Arbitration Board determines—

(A) that either the Government of the Federated States of Micronesia or the Government of the Marshall Islands is not in compliance with one or more substantive provisions of the Compact (other than Title Three thereof) or any agreement entered into with the United States pursuant to such Compact (other than Title Three thereof) or pursuant to this title, and

(B) that such noncompliance constitutes a material breach of such Compact or such agreement or agreements,

then the President of the United States, notwithstanding any provision of the Compact or of this title, may suspend the payment of any or all funds or the provision of other assistance to the appropriate government until such time as such government complies with such provisions. In exercising authority under this paragraph, the President shall have no authority to suspend payments or assistance with respect to—

(i) section 177, 213(a), 216(a)(2), 216(a)(3), 221(b), or 223 of the Compact, or

(ii) any agreements made pursuant to such sections of the Compact, or

(iii) any provisions of this title relating to such sections of the Compact, or

(iv) sections 103(d), 103(h), 103(i), 103(j), 103(k), 103(l), 105(e), 105(i), 105(j)(2), 105(q), 105(r), 105(t), of this title.

The President shall notify the Congress of any such suspensions of assistance.

(3) SECURITY AND DEFENSE DISPUTES.—Disputes involving security and defense matters shall be determined as follows:

(A) Disputes arising from a determination by the United States pursuant to section 313 of Title Three of the Compact of Free Association that an act or omission of the Federated States of Micronesia or the Marshall Islands would be incompatible with United States authority for security and defense shall be resolved in accordance with the procedures set forth in section 313 of the Compact, and shall not be subject to arbitration pursuant to Article II of Title Four of the Compact.

(B) All other disputes involving United States authority and responsibility for security and defense matters under Title Three of the Compact or its related agreements shall be finally determined in accordance with section 351 of the Compact, and shall not be subject to arbitration pursuant to Article II of Title Four of the Compact.

(4) ACTIONS INCOMPATIBLE WITH UNITED STATES AUTHORITY.—The Congress expresses its understanding that the Governments of the Federated States of Micronesia and the Marshall Islands will not act in a manner incompatible with the authority and responsibility of the United States for security and defense matters in or related to the Federated States of Micronesia or the Marshall Islands pursuant to the Compact. The Congress further expresses its intention that any such act on the part of either such Government will be viewed by the United States as a material breach of the Compact. The Government of the United States reserves the right in the event of such a material breach of the Compact by the Government of the Federated States of Micronesia or the Government of the Marshall Islands to take action, including (but not limited to) the suspension in whole or in part of the obligations of the Government of the United States to that Government.

(i) CONTINUING PROGRAMS AND LAWS.—

(1) FEDERATED STATES OF MICRONESIA AND MARSHALL ISLANDS.—In addition to the programs and services set forth in section 221 of the Compact, and pursuant to section 224 of the Compact, the programs and services of the following agencies shall be made available to the Federated States of Micronesia and to the Marshall Islands, to the same extent that such programs and services were made available as of January 1, 1985:

(A) the Legal Services Corporation; and

(B) the Public Health Service.

(2) PALAU.—Upon the effective date of the Compact of Free Association, the laws of the United States generally applicable to the Trust Territory of the Pacific Islands shall continue to apply to Palau and Palau shall be eligible for such proportion of Federal assistance as it would otherwise have been eligible to receive under such laws prior to the effective date of the Compact, as determined in appropriate Acts of Congress.

(j) COLLEGE OF MICRONESIA; EDUCATION PROGRAMS.—

(1) COLLEGE OF MICRONESIA.—Notwithstanding any other provision of law, all funds which as of the date of the enactment of this joint resolution were appropriated for the use of the College of Micronesia System shall remain available for use by such college until expended. Until otherwise provided by Act of Congress, such college shall retain its status as a land-grant institution and its eligibility for all benefits and programs available to such land-grant institutions.

(2) FEDERAL EDUCATION PROGRAMS.—Notwithstanding any other provision of law, upon the request of the affected Government, all Federal programs providing financial assistance for education which, as of January 1, 1985, were providing financial assistance for education to the Federated States of Micronesia or the Marshall Islands or to any institution, agency, organization, or permanent resident thereof, including the College of Micronesia System, shall continue to provide such assistance to such institutions, agencies, organizations, and residents as follows:

(A) For the fiscal year in which the Compact becomes effective, $13,000,000;

(B) For the fiscal year beginning after the end of the fiscal year in which the Compact becomes effective, $8,700,000; and

(C) For the fiscal year immediately following the fiscal year described in subparagraph (B), $4,300,000.

Any or all such programs may thereafter be made available by the President of the United States to the Federated States of Micronesia or the Marshall Islands upon request of the Government of the Federated States of Micronesia or the Government of the Marshall Islands, on a reimbursable basis. For purposes of this subsection, there are hereby authorized to be appropriated such sums as are necessary for such purposes.

(k) TRUST TERRITORY DEBTS TO U.S. FEDERAL AGENCIES.—Neither the Government of the Federated States of Micronesia nor the Government of the Marshall Islands shall be required to pay to any department, agency, independent agency, office, or instrumentality of the United States any amounts owed to such department, agency, independent agency, office, or instrumentality by the Government of the Trust Territory of the Pacific Islands as of the effective date of the Compact.

(m) FOREST SERVICE, ETC.—After approval of the Compact, at the request of the Government of the Federated States of Micronesia or the Government of the Marshall Islands, the President, for the duration of the Compact, shall extend to the Federated States of Micronesia or to the Marshall Islands, as requested, programs or services of technical advice and assistance by the United States Forest Service, the United States Soil Conservation Service, or other related programs or services of the United States Department of Agriculture, without any requirement for reimbursement; and during such period shall make available additional services of such agencies, as requested, subject to reimbursement by the requesting government.

(n) HISTORIC PRESERVATION.—After approval of the Compact, at the request of the Government of the Federated States of Micronesia or the Government of the Marshall Islands, the President, for the duration of the Compact, shall extend to the Federated States of Micronesia or to the Marshall Islands, as requested, programs or services of technical advice and assistance by the Advisory Council on Historic Preservation, the Department of the Interior, or any other department or agency of the United States, with respect to historic preservation, without any requirement for reimbursement; and during such period shall make available additional services of such agencies, as requested, subject to reimbursement by the requesting government. During the period the Compact is in effect, the grant programs under the National Historic Preservation Act shall continue to apply to the Federated States of Micronesia and the Marshall Islands in the same manner and to the same extent as prior to the approval of the Compact.

(o) USE OF DOD MEDICAL FACILITIES.—Following approval of the Compact, the Secretary of Defense shall make available the medical facilities of the Department of Defense heretofore available for use by citizens of the Federated States of Micronesia and the Marshall Islands who are properly referred to such facilities by competent authorities or organizations responsible for provision of medical services in the Federated States of Micronesia and the Marshall Islands. The Secretary of Defense is hereby authorized to cooperate with such authorities or organizations in order to permit use of such medical facilities for persons properly referred by such authorities or organizations. The Secretary of Health and Human Services is hereby authorized and directed to continue to make the services of the National Health Service Corps available to the residents of the Federated States of Micronesia and the Marshall Islands to the same extent and for so long as such services are authorized to be provided to persons residing in any other areas within or outside the United States.

(p) TECHNICAL ASSISTANCE.—Notwithstanding any other provision of law, following approval of the Compact, nonreimbursable technical assistance to either the Government of the Federated States of Micronesia or to the Government of the Marshall Islands which was being provided on January 1, 1985, or which began to be provided between such date and the effective date of the Compact, shall continue to be provided to either or both such Governments upon request, unless and until Congress terminates funding for such assistance, subject to appropriation.

(q) MICRONESIAN WAR CLAIMS.—The Congress hereby finds and declares that the conditions of the first proviso (relating to contributions from the Government of Japan) of P.L. 95-134 have been met. Accordingly, the Secretary of the Treasury is hereby authorized and directed promptly to pay in full all adjudicated claims and final awards made by the Micronesian Claims Commission pursuant to the Micronesian Claims Act of 1971.

(r) PRIOR SERVICE BENEFITS PROGRAM.—Notwithstanding any other provision of law, persons who on January 1, 1985, were eligible to receive payment under the Prior Service Benefits Program established within the Social Security System of the Trust Territory of the Pacific Islands because of their services performed for the United States Navy or the Government of the Trust Territory of the Pacific Islands prior to July 1, 1968, shall continue to receive such payments on and after the effective date of the Compact.

(s) INDEFINITE LAND USE PAYMENTS.—In addition to the other sums specified in the Compact and in this joint resolution, following approval of the Compact such sums as may be necessary, but not to exceed $2,000,000, shall be available to the Secretary of the Interior, who shall employ such sums to complete repayment by the United States of debts owed for the governmental use by the United States of various lands in the Federated States of Micronesia and the Marshall Islands prior to January 1, 1985.

(t) COMMUNICABLE DISEASE CONTROL PROGRAM.—In addition to the other sums specified in the Compact and in this joint resolution, there shall be made available to the Government of the Federated States of Micronesia the sum of $2,000,000 for purposes of establishing or continuing programs for the control and prevention of communicable diseases, including but not limited to cholera and Hansen's Disease. The Secretary of the Interior shall assist the Government of the Federated States of Micronesia in designing and implementing such a program.

(u) TRUST FUNDS.—The responsibilities of the United States with regard to implementation of section 235 of the Compact shall be discharged by the Secretary of the Interior, who shall consult with the designated beneficiaries of the funds held in trust by the High Commissioner of the Trust Territory of the Pacific Islands as well as with the Government of the Marshall Islands.

(v) CONGRESSIONAL INVOLVEMENT IN COMPACT CHANGES, ETC.—

(1) UNITED STATES PROCEDURES.—Mutual agreement by the Government of the

United States as provided in the Compact which results in amendment, change, or termination of all or any part thereof, shall be effected only by Act of Congress and no unilateral action by the Government of the United States provided for in the Compact, and having such result, may be effected other than pursuant to the provisions of this joint resolution or by separate Act of Congress.

(2) SECTION 219 DETERMINATION.—The determination by the Government of the United States under section 219 of the Compact shall be as provided in applicable appropriation Acts.

(3) SUBMISSION TO CONGRESS.—Any agreement provided for in the Compact, this joint resolution, or otherwise related to the Compact or the subsidiary agreements, or amendment to such agreement, shall be submitted to the Congress and may not take effect until 30 days after the date such agreement or amendment is so submitted (excluding days on which either House of Congress is not in session).

(4) No agreement described in paragraph (3) shall take effect if a joint resolution of disapproval is enacted during the period specified in paragraph (3). For the purpose of expediting the consideration of such a joint resolution, a motion to proceed to the consideration of any such joint resolution after it has been reported by an appropriate committee shall be treated as highly privileged in the House of Representatives. Any such joint resolution shall be considered in the Senate in accordance with the provisions of section 601(b) of the International Security Assistance and Arms Export Control Act of 1976.

(w) ANNUAL REPORTS ON DETERMINATIONS UNDER COMPACT SECTION 313.—The President shall report annually to the Congress on determinations made by the United States in the exercise of its authority under section 313 of the Compact. Each such report shall describe the following, on a classified basis if necessary:

(1) The actions that the Government of the Federated States of Micronesia or the Government of the Marshall Islands were required to refrain from pursuant to the determinations of the United States.

(2) The justification for each determination by the United States, and the position of the other Government concerned with respect to such determination.

(3) The effect of the determination on the authority and responsibility of the other government to conduct foreign affairs in accordance with section 121 of the Compact.

(4) Any domestic effect in the Federated States of Micronesia or the Marshall Islands resulting from the determination, including any restriction on the civil and political rights of the citizens thereof.

(x) USER FEES.—Any person in the Federated States of Micronesia or the Marshall Islands shall be liable for a user fee for services provided by the Government of the United States under this joint resolution on the same basis as a person in the United States.

(y) FISH AND WILDLIFE SERVICES.—After approval of the Compact, at the request of the Government of the Federated States of Micronesia or the Government of the Marshall Islands, the President, for the duration of the Compact, may extend to the Federated States of Micronesia or to the Marshall Islands, as requested—

(1) programs or services of technical advice and assistance by the United States Fish and Wildlife Service and the National Marine Fisheries Service with respect to conservation and management of fish and wildlife resources, without any requirement for reimbursement; and

(2) additional services of such agencies, subject to reimbursement by the requesting government.

(z) U.S. COAST GUARD SERVICES.—After approval of the Compact, and as provided in this joint resolution, the President, for the duration of the Compact, may extend to the Federated States of Micronesia or to the Marshall Islands, as requested—

(1) programs or services of technical advice and assistance or training by the Coast Guard with respect to law enforcement; and

(2) additional services (including the provision of aids to navigation beyond the extent necessary for the exercise of the authority and responsibility of the Government of the United States under section 322 of the Compact) by the Coast Guard, subject to reimbursement by the requesting government.

SEC. 106. CONTRACT PREFERENCE.

(a) CONSTRUCTION PROJECTS.—With regard to projects funded under section 211(a) of the Compact involving one or more contracts for construction, alteration, or repair of any building or public work in the Federated States of Micronesia or the Marshall Islands, such contracts shall be awarded to local contractors and to United States contractors on such projects funded under the Compact aggregating in excess of $1,000,000, provided that the lowest local or United States contractor bid is no greater than 20 percent above the estimate for the project made by the Government of the Federated States of Micronesia or the Marshall Islands, as the case may be. The President of the United States shall issue appropriate regulations providing standards and procedures for the implementation of the preference described in this subsection.

(b) DEFINITIONS.—For purposes of this section—

(1) the term "local contractor" means—

(A) a citizen of either the Federated States of Micronesia or the Marshall Islands; or

(B) a company or other entity doing business in either the Federated States of Micronesia or the Marshall Islands, the assets of which are at least 60 percent owned or controlled in fact by citizens of the Federated States of Micronesia and the Marshall Islands; and

(2) the term "United States contractor" shall have the same meaning as "United States firm" under the Nationality Rule for Suppliers of Services of the Agency for International Development.

(c) MATERIALS, ETC.—It is the sense of the Congress that at least 65 percent of the total amount of funds provided by the United States under the provisions of the Compact or this joint resolution during the first period of five years after the effective date of the Compact and each such five-year period thereafter which are expended for materials and supplies used in connection with projects described in subsection (a) should be expended for purchase of materials and supplies mined, produced, or manufactured in the Federated States of Micronesia, the Marshall Islands, Palau, or the United States (including its territories and commonwealths).

(d) SERVICES.—It is the sense of the Congress that at least 65 percent of the total amount of funds provided by the United States under the provisions of the Compact or this joint resolution during the first period of five years after the effective date of the Compact and each such five-year period thereafter which are expended for provision of services should be expended for services provided by qualified citizens or nationals of the United States, or qualified citizens of the Federated States of Micronesia, the Marshall Islands, or Palau, or by corporations incorporated in and doing business in the United States (including its territories and commonwealths).

(e) LOCAL HIRE, TRAINING.—All contracts for the purposes described in subsection (a) shall include requirements that the holders of such contracts shall—

(1) to the maximum extent possible employ citizens of the Federated States of Micronesia and the Marshall Islands; and

(2) to the extent that necessary skills are not possessed by citizens of the Federated States of Microneisa and the Marshall Islands, provide on-the-job training, with particular emphasis on the development of skills relating to operation of machinery and routine and preventative maintenance of machinery and other facilities.

(f) REPORTS.—The Government of the Federated States of Micronesia and the Government of the Marshall Islands will include in each annual report submitted pursuant to section 211(c) of the Compact information concerning the expenditure of funds provided by the United States for the purposes described in subsections (a), (c), and (d), including information as to contracts awarded for such purposes and other information regarding fulfillment of the requirements of this subsection.

(g) ENFORCEMENT.—The United States will regard any noncompliance with the provisions of subsection (a) as a material breach of the Compact and will take appropriate action pursuant to the dispute-resolution provisions of the Compact and the relevant provisions of this joint resolution.

(h) TECHNICAL ASSISTANCE.—Upon request of the Government of the Federated States of Micronesia or of the Marshall Islands, as the case may be, the appropriate agency of the Government of the United States shall make available technical assistance on a nonreimbursable basis for purposes of establishing the government estimate for any projects described in subsection (a).

(i) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated such sums as are necessary to reimburse either the Government of the Federated States of Micronesia or the Government of the Marshall Islands to the extent that an award by either such government of a contract to a United States contractor under subsection (a) of this section results in an expenditure by such awarding government of an amount in excess of such awarding government's estimate for the project for which the contract was awarded.

SEC. 107. LIMITATIONS.

(a) PROHIBITION.—The provisions of Chapter 11 of title 18, United States Code, shall apply in full to any individual who has served as the President's Personal Representative for Micronesian Status Negotiations or who is or was an officer or employee of the Office for Micronesian Status Negotiations or who is or was assigned or detailed to that Office or who served on the Micronesia Interagency Group, except that for the purposes of this section, clauses (i) and (ii) of section 207(b) of such title shall read as follows: "(i) having been so employed, within five years after his employ-

ment has ceased, knowingly acts as agent or attorney for, or otherwise represents, any other person (except the United States), in any formal or informal appearance before, or, with the intent to influence, makes any oral or written communication on behalf of any other person (except the United States) to, or (ii) having been so employed and as specified in subsection (d) of this section, within five years after his employment has ceased, knowingly represents or aids, counsels, advises, consults, or assists in representing any other person (except the United States) by personal presence at any formal or informal appearance before—".

(b) TERMINATION.—Effective upon the date of the termination of the Trust Territory of the Pacific Islands with respect to Palau, the Office for Micronesian Status Negotiations is abolished and no department, agency, or instrumentality of the United States shall thereafter contribute funds for the support of such Office.

SEC. 108. TRANSITIONAL IMMIGRATION RULES.

Effective on the date of the enactment of this joint resolution, and until such time as section 506 of the Convenant To Establish a Commonwealth of the Northern Mariana Islands in Political Union with the United States, as approved by Public Law 94-241, becomes effective pursuant to Section 1003(c) of such Covenant, any person who is a citizen of the Northern Mariana Islands as the term is defined in section 24(b) of the Act of December 8, 1983, P.L. 98-213 (97 Stat. 1465), shall have the same rights to enter into, lawfully engage in occupations in, and establish residence in the United States and its territories and commonwealths as the persons entitled to such rights pursuant to section 141 of the Compact.

SEC. 109. BUDGET ACT COMPLIANCE.

No payment may be made pursuant to the Compact of Free Association nor under any provision of this joint resolution prior to October 1, 1985.

TITLE II—COMPACT OF FREE ASSOCIATION

SEC. 201. COMPACT OF FREE ASSOCIATION.

The Compact of Free Association is as follows:

COMPACT OF FREE ASSOCIATION

PREAMBLE

THE GOVERNMENT OF THE UNITED STATES OF AMERICA AND THE GOVERNMENTS OF THE MARSHALL ISLANDS AND THE FEDERATED STATES OF MICRONESIA

Affirming that their Governments and their relationships as Governments are founded upon respect for human rights and fundamental freedoms for all, and that the peoples of the Trust Territory of the Pacific Islands have the right to enjoy self-government; and

Affirming the common interests of the United States of America and the peoples of the Trust Territory of the Pacific Islands in creating close and mutually beneficial relationships through two free and voluntary associations of their respective Governments; and

Affirming the interest of the Government of the United States in promoting the economic advancement and self-sufficiency of the peoples of the Trust Territory of the Pacific Islands; and

Recognizing that their previous relationship has been based upon the International Trusteeship System of the United Nations Charter, and in particular Article 76 of the Charter; and that pursuant to Article 76 of the Charter, the peoples of the Trust Territory have progressively developed their institutions of self-government, and that in the exercise of their sovereign right to self-determination they have, through their freely-expressed wishes, adopted Constitutions appropriate to their particular circumstances; and

Recognizing their common desire to terminate the Trusteeship and establish two new government-to-government relationships each of which is in accordance with a new political status based on the freely-expressed wishes of peoples of the Trust Territory of the Pacific Islands and appropriate to their particular circumstances; and

Recognizing that the peoples of the Trust Territory of the Pacific Islands have and retain their sovereignty and their sovereign right to self-determination and the inherent right to adopt and amend their own Constitutions and forms of government and that the approval of the entry of their respective Governments into this Compact of Free Association by the peoples of the Trust Territory of the Pacific Islands constitutes an exercise of their sovereign right to self-determination;

NOW, THEREFORE, AGREE to enter into relationships of free association which provide a full measure of self-government for the peoples of the Marshall Islands and the Federated States of Micronesia; and

FURTHER AGREE that the relationships of free association derive from and are as set forth in this Compact; and that, during such relationships of free association, the respective rights and responsibilities of the Government of the United States and the Governments of the freely associated states of the Marshall Islands and the Federated States of Micronesia in regard to these relationships of free association derive from and are as set forth in this Compact.

TITLE ONE
GOVERNMENTAL RELATIONS

Article I
Self-Government

Section 111

The peoples of the Marshall Islands and the Federated States of Micronesia, acting through the Governments established under their respective Constitutions, are self-governing.

Article II
Foreign Affairs

Section 121

(a) The Governments of the Marshall Islands and the Federated States of Micronesia have the capacity to conduct foreign affairs and shall do so in their own name and right, except as otherwise provided in this Compact.

(b) The foreign affairs capacity of the Governments of the Marshall Islands and the Federated States of Micronesia includes:

(1) the conduct of foreign affairs relating to law of the sea and marine resources matters, including the harvesting, conservation, exploration or exploitation of living and non-living resources from the sea, seabed or subsoil to the full extent recognized under international law;

(2) the conduct of their commercial, diplomatic, consular, economic, trade, banking, postal, civil aviation, communications, and cultural relations, including negotiations for the receipt of developmental loans and grants and the conclusion of arrangements with other governments and international and intergovernmental organizations, including any matters specially benefiting their individual citizens.

(c) The Government of the United States recognizes that the Governments of the Marshall Islands and the Federated States of Micronesia have the capacity to enter into, in their own name and right, treaties and other international agreements with governments and regional and international organizations.

(d) In the conduct of their foreign affairs, the Governments of the Marshall Islands and the Federated States of Micronesia confirm that they shall act in accordance with principles of international law and shall settle their international disputes by peaceful means.

Section 122

The Government of the United States shall support applications by the Governments of the Marshall Islands and the Federated States of Micronesia for membership or other participation in regional or international organizations as may be mutually agreed. The Government of the United States agrees to accept for training and instruction at the Foreign Service Institute, established under 22 U.S.C. 4021, citizens of the Marshall Islands and the Federated States of Micronesia. The qualifications of candidates for such training and instruction and all other terms and conditions of participation by citizens of the Marshall Islands and the Federated States of Micronesia in Foreign Service Institute programs shall be as mutually agreed between the Government of the United States and the Governments of the Marshall Islands and the Federated States of Micronesia.

Section 123

(a) In recognition of the authority and responsibility of the Government of the United States under Title Three, the Governments of the Marshall Islands and the Federated States of Micronesia shall consult, in the conduct of their foreign affairs, with the Government of the United States.

(b) In recognition of the respective foreign affairs capacities of the Governments of the Marshall Islands and the Federated States of Micronesia, the Government of the United States, in the conduct of its foreign affairs, shall consult with the Government of the Marshall Islands or the Federated States of Micronesia on matters which the Government of the United States regards as relating to or affecting any such Government.

Section 124

The Government of the United States may assist or act on behalf of the Government of the Marshall Islands or the Federated States of Micronesia in the area of foreign affairs as may be requested and mutually agreed from time to time. The Government of the United States shall not be responsible to third parties for the actions of the Government of the Marshall Islands or the Federated States of Micronesia undertaken with the assistance or through the agency of the Government of the United States pursuant to this Section unless expressly agreed.

Section 125

The Government of the United States shall not be responsible for nor obligated by any actions taken by the Government of the Marshall Islands or the Federated States of Micronesia in the area of foreign affairs, except as may from time to time be expressly agreed.

Section 126

At the request of the Government of the Marshall Islands or the Federated States of Micronesia and subject to the consent of the receiving state, the Government of the

United States shall extend consular assistance on the same basis as for citizens of the United States to citizens of the Marshall Islands and the Federated States of Micronesia for travel outside the Marshall Islands and the Federated States of Micronesia, the United States and its territories and possessions.

Section 127

Except as otherwise provided in this Compact or its related agreements, all obligations, responsibilities, rights and benefits of the Government of the United States as Administering Authority which have resulted from the application pursuant to the Trusteeship Agreement of any treaty or other international agreement to the Trust Territory of the Pacific Islands on the day preceding the effective date of this Compact are no longer assumed and enjoyed by the Government of the United States.

Article III

Communications

Section 131

(a) The Governments of the Marshall Islands and the Federated States of Micronesia have full authority and responsibility to regulate their respective domestic and foreign communications, and the Government of the United States shall provide communications assistance in accordance with the terms of a separate agreement which shall come into effect simultaneously with this Compact, and such agreement shall remain in effect until such time as any election is made pursuant to Section 131(b) and which shall provide for the following:

(1) the Government of the United States remains the sole administration entitled to make notification to the International Frequency Registration Board of the International Telecommunications Union of frequency assignments to radio communications stations respectively in the Marshall Islands and the Federated States of Micronesia; and to submit to the International Frequency Registration Board seasonal schedules for the broadcasting stations respectively in the Marshall Islands and the Federated States of Micronesia in the bands allocated exclusively to the broadcasting service between 5,950 and 26,100 kHz and in any other additional frequency bands that may be allocated to use by high frequency broadcasting stations; and

(2) the United States Federal Communications Commission has jurisdiction, pursuant to the Communications Act of 1934, 47 U.S.C. 151 *et seq.*, and the Communications Satellite Act of 1962, 47 U.S.C. 721 *et seq.*, over all domestic and foreign communications services furnished by means of satellite earth terminal stations where such stations are owned or operated by United States common carriers and are located in the Marshall Islands or the Federated States of Micronesia.

(b) The Government of the Marshall Islands or the Federated States of Micronesia may elect at any time to undertake the functions enumerated in Section 131(a) and previously performed by the Government of the United States. Upon such election, the Government of the United States shall so notify the International Frequency Registration Board and shall take such other actions as may be necessary to transfer to the electing Government the notification authority referred to in Section 131(a) and all rights deriving from the previous exercise of any such notification authority by the Government of the United States.

Section 132

The Governments of the Marshall Islands and the Federated States of Micronesia shall permit the Government of the United States to operate telecommunications services in the Marshall Islands and the Federated States of Micronesia to the extent necessary to fulfill the obligations of the Government of the United States under this Compact in accordance with the terms of separate agreements which shall come into effect simultaneously with this Compact.

ARTICLE IV

Immigration

Section 141

(a) Any person in the following categories may enter into, lawfully engage in occupations, and establish residence as a nonimmigrant in the United States and its territories and possessions without regard to paragraphs (14), (20), and (26) of section 212(a) of the Immigration and Nationality Act, 8 U.S.C. 1182(a) (14), (20), and (26):

(1) a person who, on the day preceding the effective date of this Compact, is a citizen of the Trust Territory of the Pacific Islands, as defined in Title 53 of the Trust Territory Code in force on Janaury 1, 1979, and has become a citizen of the Marshall Islands or the Federated States of Micronesia.

(2) a person who acquires the citizenship of the Marshall Islands or the Federated States of Micronesia at birth, on or after the effective date of the respective Constitution;

(3) a naturalized citizen of the Marshall Islands or the Federated States of Micronesia who has been an actual resident there for not less than five years after attaining such naturalization and who holds a certificate of actual residence; or

(4) a person entitled to citizenship in the Marshall Islands by lineal descent whose name is included in a list to be furnished by the Government of the Marshall Islands to the United States Immigration and Naturalization Service and any descendants of such persons, provided that such person holds a certificate of lineal descent issued by the Government of the Marshall Islands.

Such persons shall be considered to have the permission of the Attorney General of the United States to accept employment in the United States.

(b) The right of such persons to establish habitual residence in a territory or possession of the United States may, however, be subjected to non-discriminatory limitations provided for:

(1) in statutes or regulations of the United States; or

(2) in those statutes or regulations of the territory or possession concerned which are authorized by the laws of the United States.

(c) Section 141(a) does not confer on a citizen of the Marshall Islands or the Federated States of Micronesia the right to establish the residence necessary for naturalization under the Immigration and Nationality Act, or to petition for benefits for alien relatives under that Act. Section 141(a), however, shall not prevent a citizen of the Marshall Islands or the Federated States of Micronesia from otherwise acquiring such rights or lawful permanent resident alien status in the United States.

Section 142

(a) Any citizen or national of the United States may enter into, lawfully engage in occupations, and reside in the Marshall Islands or the Federated States of Micronesia, subject to the rights of those Governments to deny entry to or deport any such citizen or national as an undesirable alien. A citizen or national of the United States may establish habitual residence or domicile in the Marshall Islands or the Federated States of Micronesia only in accordance with the laws of the jurisdiction in which habitual residence or domicile is sought.

(b) With respect to the subject matter of this Section, the Government of the Marshall Islands or the Federated States of Micronesia shall accord to citizens and nationals of the United States treatment no less favorable than that accorded to citizens of other countries; any denial of entry to or deportation of a citizen or national of the United States as an undesirable alien must be pursuant to reasonable statutory grounds.

Section 143

(a) The privileges set forth in Sections 141 and 142 shall not apply to any person who takes an affirmative step to preserve or acquire a citizenship or nationality other than that of the Marshall Islands, the Federated States of Micronesia or the United States.

(b) Every person having the privileges set forth in Sections 141 and 142 who possesses a citizenship or nationality other than that of the Marshall Islands, the Federated States of Micronesia or the United States ceases to have these privileges two years after the effective date of this Compact, or within six months after becoming 21 years of age, whichever comes later, unless such person executes an oath of renunciation of that other citizenship or nationality.

Section 144

(a) A citizen or national of the United States who, after notification to the Government of the United States of an intention to employ such person by the Government of the Marshall Islands or the Federated States of Micronesia, commences employment with such Government shall not be deprived of his United States nationality pursuant to Section 349(a)(2) and (a)(4) of the Immigration and Nationality Act, 8 U.S.C. 1481 (a)(2) and (a)(4).

(b) Upon such notification by the Government of the Marshall Islands or the Federated States of Micronesia, the Government of the United States may consult with or provide information to the notifying Government concerning the prospective employee, subject to the provisions of the Privacy Act, 5 U.S.C. 552a.

(c) The requirement of prior notification shall not apply to those citizens or nationals of the United States who are employed by the Government of the Marshall Islands or the Federated States of Micronesia on the effective date of this Compact with respect to the positions held by them at that time.

Article V

Representation

Section 151

The Government of the United States and the Government of the Marshall Islands or the Federated States of Micronesia may establish and maintain representative offices in the capital of the other for the purpose of maintaining close and regular consultations on matters arising in the course of the relationship of free association and conducting other government business. The Governments may establish and maintain additional offices on terms and in locations as may be mutually agreed.

Section 152

(a) The premises of such representative offices, and their archives wherever located, shall be inviolable. The property and assets of such representative offices shall be immune from search, requisition, attachment and any form of seizure unless such

immunity is expressly waived. Official communications in transit shall be inviolable and accorded the freedom and protections accorded by recognized principles of international law to official communications of a diplomatic mission.

(b) Persons designated by the sending Government may serve in the capacity of its resident representatives with the consent of the receiving Government. Such designated persons shall be immune from civil and criminal process relating to words spoken or written and all acts performed by them in their official capacity and falling within their functions as such representatives, except insofar as such immunity may be expressly waived by the sending Government. While serving in a resident representative capacity, such designated persons shall not be liable to arrest or detention pending trial, except in the case of a grave crime and pursuant to a decision by a competent judicial authority, and such persons shall enjoy immunity from seizure of personal property, immigration restrictions, and laws relating to alien registration, fingerprinting, and the registration of foreign agents.

(c) The sending Governments and their respective assets, income and other property shall be exempt from all direct taxes, except those direct taxes representing payment for specific goods and services, and shall be exempt from all customs duties and restrictions on the import or export of articles required for the official functions and personal use of their representatives and representative offices.

(d) Persons designated by the sending Government to serve in the capacity of its resident representatives shall enjoy the same taxation exemptions as are set forth in Article 34 of the Vienna Convention on Diplomatic Relations.

(e) The privileges, exemptions and immunities accorded under this Section are not for the personal benefit of the individuals concerned but are to safeguard the independent exercise of their official functions. Without prejudice to those privileges, exemptions and immunities, it is the duty of all such persons to respect the laws and regulations of the Government to which they are assigned.

Section 153

(a) Any citizen or national of the United States who, after consultation between the designating Government and the Government of the United States, is designated by the Government of the Marshall Islands or the Federated States of Micronesia as its agent, shall enjoy exemption from the requirements of the laws of the United States relating to the registration of foreign agents. The Government of the United States shall promptly comply with a request for consultation made by the prospective designating Government. During the course of the consultation, the Government of the United States may, in its discretion, and subject to the provisions of the Privacy Act, 5 U.S.C. 552a, transmit such information concerning the prospective designee as may be available to it to the prospective designating Government.

(b) Any citizen or national of the United States may be employed by the Government of the Marshall Islands or the Federated States of Micronesia to represent to foreign governments, officers or agents thereof the positions of the Government of the Marshall Islands or the Federated States of Micronesia, without regard to the provisions of 18 U.S.C. 953.

Article VI

Environmental Protection

Section 161

The Governments of the United States, the Marshall Islands and the Federated States of Micronesia declare that it is their policy to promote efforts to prevent or eliminate damage to the environment and biosphere and to enrich understanding of the natural resources of the Marshall Islands and the Federated States of Micronesia. In order to carry out this policy, the Government of the United States and the Governments of the Marshall Islands and the Federated States of Micronesia agree to the following mutual and reciprocal undertakings.

(a) The Government of the United States:

(1) shall continue to apply the environmental controls in effect on the day preceding the effective date of this Compact to those of its continuing activities subject to Section 161(a)(2), unless and until those controls are modified under Sections 161(a)(3) and 161(a)(4);

(2) shall apply the National Environmental Policy Act of 1969, 83 Stat. 852, 42 U.S.C. 4321 *et seq.*, to its activities under the Compact and its related agreements as if the Marshall Islands and the Federated States of Micronesia were the United States;

(3) shall comply also, in the conduct of any activity requiring the preparation of an Environmental Impact Statement under Section 161(a)(2), with standards substantively similar to those required by the following laws of the United States, taking into account the particular environments of the Marshall Islands and the Federated States of Micronesia: the Endangered Species Act of 1973, 87 Stat. 884, 16 U.S.C. 1531 *et seq.*; the Clean Air Act, 77 Stat. 392, 42 U.S.C. Supp. 7401 *et seq.*; the Clean Water Act (Federal Water Pollution Control Act), 86 Stat. 896, 33 U.S.C. 1251 *et seq.*; the Ocean Dumping Act (Title I of the Marine Protection, Research and Sanctuaries Act of 1972), 86 Stat. 1053, 33 U.S.C. 1411 *et seq.*; the Toxic Substances Control Act, 90 Stat. 2003, 15 U.S.C. 2601 *et seq.*; the Resources Conservation and Recovery Act of 1976, 90 Stat. 2796, 42 U.S.C. 6901 *et seq.*; and such other environmental protection laws of the United States as may be mutually agreed from time to time with the Government of the Marshall Islands or the Federated States of Micronesia; and

(4) shall develop, prior to conducting any activity requiring the preparation of an Environmental Impact Statement under Section 161(a)(2), appropriate mechanisms, including regulations or other judicially reviewable standards and procedures, to regulate its activities governed by Section 161(a)(3) in the Marshall Islands and the Federated States of Micronesia in a manner appropriate to the special governmental relationship set forth in this Compact. The agencies of the Government of the United States designated by law to administer the laws set forth in Section 161(a)(3) shall participate as appropriate in the development of any regulation, standard or procedure under this Section, and the Government of the United States shall provide the affected Government of the Marshall Islands or the Federated States of Micronesia with the opportunity to comment during such development.

(b) The Governments of the Marshall Islands and the Federated States of Micronesia shall develop standards and procedures to protect their environments. As a reciprocal obligation to the undertakings of the Government of the United States under this Article, the Governments of the Marshall Islands and the Federated States of Micronesia, taking into account their particular environments, shall develop standards for environmental protection substantively similar to those required of the Government of the United States by Section 161(a)(3) prior to their conducting activities in the Marshall Islands and the Federated States of Micronesia, respectively, substantively equivalent to activities conducted there by the Government of the United States and, as a further reciprocal obligation, shall enforce those standards.

(c) Section 161(a), including any standard or procedure applicable thereunder, and Section 161(b) may be modified or superseded in whole or in part by agreement of the Government of the United States and the Government of the Marshall Islands or the Federated States of Micronesia.

(d) In the event that an Environmental Impact Statement is no longer required under the laws of the United States for major federal actions significantly affecting the quality of the human environment, the regulatory regime established under Sections 161(a)(3) and 161(a)(4) shall continue to apply to such activities of the Government of the United States until amended by mutual agreement.

(e) The President of the United States may exempt any of the activities of the Government of the United States under this Compact and its related agreements from any environmental standard or procedure which may be applicable under Sections 161(a)(3) and 161(a)(4) if the President determines it to be in the paramount interest of the Government of the United States to do so, consistent with Title Three of this Compact and the obligations of the Government of the United States under international law. Prior to any decision pursuant to this subsection, the views of the affected Government of the Marshall Islands or the Federated States of Micronesia shall be sought and considered to the extent practicable. If the President grants such an exemption, to the extent practicable, a report with his reasons for granting such exemption shall be given promptly to the affected Government.

(f) The laws of the United States referred to in Section 161(a)(3) shall apply to the activities of the Government of the United States under this Compact and its related agreements only to the extent provided for in this Section.

Section 162

The Government of the Marshall Islands or the Federated States of Micronesia may bring an action for judicial review of any administrative agency action or any activity of the Government of the United States pursuant to Sections 161(a), 161(d) or 161(e) or for enforcement of the obligations of the Government of the United States arising thereunder. The United States District Court for the District of Hawaii and the United States District Court for the District of Columbia shall have jurisdiction over such action or activity, and over actions brought under Section 172(b) which relate to the activities of the Government of the United States and its officers and employees, governed by Section 161, provided that:

(a) Such actions may only be civil actions for any appropriate civil relief other than punitive damages against the Government of the United States or, where required by law, its officers in their official capacity; no

criminal actions may arise under this Section;

(b) Actions brought pursuant to this Section may be initiated only by the Government concerned;

(c) Administrative agency actions arising under Section 161 shall be reviewed pursuant to the standard of judicial review set forth in 5 U.S.C. 706;

(d) The District Court shall have jurisdiction to issue all necessary processes, and the Government of the United States agrees to submit itself to the jurisdiction of the court; decisions of the District Court shall be reviewable in the United States Court of Appeals for the Ninth Circuit or the United States Court of Appeals for the District of Columbia, respectively, or in the United States Supreme Court as provided by the laws of the United States;

(e) The judicial remedy provided for in this Section shall be the exclusive remedy for the judicial review or enforcement of the obligations of the Government of the United States under this Article and actions brought under Section 172(b) which relate to the activities of the Government of the United States and its officers and employees governed by Section 161; and

(f) In actions pursuant to this Section, the Governments of the Marshall Islands and the Federated States of Micronesia shall be treated as if they were United States citizens.

Section 163

(a) For the purpose of gathering data necessary to study the environmental effects of activities of the Government of the United States subject to the requirements of this Article, the Governments of the Marshall Islands and the Federated States of Micronesia shall be granted access to facilities operated by the Government of the United States in the Marshall Islands and the Federated States of Micronesia, to the extent necessary for this purpose, except to the extent such access would unreasonably interfere with the exercise of the authority and responsibility of the Government of the United States under Title Three.

(b) The Government of the United States, in turn, shall be granted access to the Marshall Islands or the Federated States of Micronesia for the purpose of gathering data necessary to discharge its obligations under this Article, except to the extent such access would unreasonably interfere with the exercise of the authority and responsibility of the Government of the Marshall Islands or the Federated States of Micronesia under Title One, and to the extent necessary for this purpose shall be granted access to documents and other information to the same extent similar access is provided those Governments under the Freedom of Information Act, 5 U.S.C. 552.

(c) The Governments of the Marshall Islands and the Federated States of Micronesia shall not impede efforts by the Government of the United States to comply with applicable standards and procedures.

Article VII

General Legal Provisions

Section 171

Except as provided in this Compact or its related agreements, the application of the laws of the United States to the Trust Territory of the Pacific Islands by virtue of the Trusteeship Agreement ceases with respect to the Marshall Islands and the Federated States of Micronesia as of the effective date of this Compact.

Section 172

(a) Every citizen of the Marshall Islands or the Federated States of Micronesia who is not a resident of the United States shall enjoy the rights and remedies under the laws of the United States enjoyed by any non-resident alien.

(b) The Governments of the Marshall Islands and the Federated States of Micronesia and every citizen of the Marshall Islands or the Federated States of Micronesia shall be considered a "person" within the meaning of the Freedom of Information Act, 5 U.S.C. 552, and of the judicial review provisions of the Administrative Procedure Act, 5 U.S.C. 701-706, except that only the Government of the Marshall Islands or the Federated States of Micronesia may seek judicial review under the Administrative Procedure Act or judicial enforcement under the Freedom of Information Act when such judicial review or enforcement relates to the activities of the Government of the United States governed by Sections 161 and 162.

Section 173

The Governments of the United States, the Marshall Islands and the Federated States of Micronesia agree to adopt and enforce such measures, consistent with this Compact and its related agreements, as may be necessary to protect the personnel, property, installations, services, programs and official archives and documents maintained by the Government of the United States in the Marshall Islands and the Federated States of Micronesia pursuant to this Compact and its related agreements and by those Governments in the United States pursuant to this Compact and its related agreements.

Section 174

Except as otherwise provided in this Compact and its related agreements:

(a) The Governments of the Marshall Islands and the Federated States of Micronesia shall be immune from the jurisdiction of the courts of the United States, and the Government of the United States shall be immune from the jurisdiction of the courts of the Marshall Islands and the Federated States of Micronesia.

(b) The Government of the United States accepts responsibility for and shall pay:

(1) any unpaid money judgment rendered by the High Court of the Trust Territory of the Pacific Islands against the Government of the Trust Territory of the Pacific Islands or the Government of the United States with regard to any cause of action arising as a result of acts or omissions of the Government of the Trust Territory of the Pacific Islands or the Government of the United States prior to the effective date of this Compact;

(2) any claim settled by the claimant and the Government of the Trust Territory of the Pacific Islands but not paid as of the effective date of this Compact; and

(3) settlement of any administrative claim or of any action before a court of the Trust Territory of the Pacific Islands, pending as of the effective date of this Compact, against the Government of the Trust Territory of the Pacific Islands or the Government of the United States, arising as a result of acts or omissions of the Government of the Trust Territory of the Pacific Islands or the Government of the United States.

(c) Any claim not referred to in Section 174(b) and arising from an act or omission of the Government of the Trust Territory of the Pacific Islands or the Government of the United States prior to the effective date of this Compact shall be adjudicated in the same manner as a claim adjudicated according to Section 174(d). In any claim against the Government of the Trust Territory of the Pacific Islands, the Government of the United States shall stand in the place of the Government of the Trust Territory of the Pacific Islands. A judgment on any claim referred to in Section 174(b) or this subsection, not otherwise satisfied by the Government of the United States, may be presented for certification to the United States Court of Appeals for the Federal Circuit, or its successor court, which shall have jurisdiction therefor, notwithstanding the provisions of 28 U.S.C. 1502, and which court's decisions shall be reviewable as provided by the laws of the United States. The United States Court of Appeals for the Federal Circuit shall certify such judgment, and order payment thereof, unless it finds, after a hearing, that such judgment is manifestly erroneous as to law or fact, or manifestly excessive. In either of such cases the United States Court of Appeals for the Federal Circuit shall have jurisdiction to modify such judgment.

(d) The Governments of the Marshall Islands and the Federated States of Micronesia shall not be immune from the jurisdiction of the courts of the United States, and the Government of the United States shall not be immune from the jurisdiction of the courts of the Marshall Islands and the Federated States of Micronesia in any case in which the action is based on a commercial activity of the defendant Government where the action is brought, or in a case in which damages are sought for personal injury or death or damage to or loss of property occurring where the action is brought.

Section 175

A separate agreement, which shall come into effect simultaneously with this Compact, shall be concluded between the Government of the United States and the Governments of the Marshall Islands and the Federated States of Micronesia regarding mutual assistance and cooperation in law enforcement matters including the pursuit, capture, imprisonment and extradition of fugitives from justice and the transfer of prisoners. The separate agreement shall have the force of law. In the United States, the laws of the United States governing international extradition, including 18 U.S.C. 3184, 3186 and 3188-3195, shall be applicable to the extradition of fugitives under the separate agreement, and the laws of the United States governing the transfer of prisoners, including 18 U.S.C. 4100-4115, shall be applicable to the transfer of prisoners under the separate agreement.

Section 176

The Governments of the Marshall Islands and the Federated States of Micronesia confirm that final judgments in civil cases rendered by any court of the Trust Territory of the Pacific Islands shall continue in full force and effect, subject to the constitutional power of the courts of the Marshall Islands and the Federated States of Micronesia to grant relief from judgments in appropriate cases.

Section 177

(a) The Government of the United States accepts the responsibility for compensation owing to citizens of the Marshall Islands, or the Federated States of Micronesia (or Palau) for loss or damage to property and person of the citizens of the Marshall Islands, or the Federated States of Micronesia, resulting from the nuclear testing program which the Government of the United States conducted in the Northern Marshall

Islands between June 30, 1946, and August 18, 1958.

(b) The Government of the United States and the Government of the Marshall Islands shall set forth in a separate agreement provisions for the just and adequate settlement of all such claims which have arisen in regard to the Marshall Islands and its citizens and which have not as yet been compensated or which in the future may arise, for the continued administration by the Government of the United States of direct radiation related medical surveillance and treatment programs and radiological monitoring activities and for such additional programs and activities as may be mutually agreed, and for the assumption by the Government of the Marshall Islands of responsibility for enforcement of limitations on the utilization of affected areas developed in cooperation with the Government of the United States and for the assistance by the Government of the United States in the exercise of such responsibility as may be mutually agreed. This separate agreement shall come into effect simultaneously with this Compact and shall remain in effect in accordance with its own terms.

(c) The Government of the United States shall provide to the Government of the Marshall Islands, on a grant basis, the amount of $150 million to be paid and distributed in accordance with the separate agreement referred to in this Section, and shall provide the services and programs set forth in this separate agreement, the language of which is incorporated into this Compact.

Section 178

(a) The federal agencies of the Government of the United States which provide the services and related programs in the Marshall Islands or the Federated States of Micronesia pursuant to Articles II and III of Title Two are authorized to settle and pay tort claims arising in the Marshall Islands or the Federated States of Micronesia from the activities of such agencies or from the acts or omissions of the employees of such agencies. Except as provided in Section 178(b), the provisions of 28 U.S.C. 2672 and 31 U.S.C. 1304 shall apply exclusively to such administrative settlements and payments.

(b) Claims under Section 178(a) which cannot be settled under Section 178(a) shall be disposed of exclusively in accordance with Article II of Title Four. Arbitration awards rendered pursuant to this subsection shall be paid out of funds under 31 U.S.C. 1304.

(c) The Government of the United States and the Government of the Marshall Islands or the Federated States of Micronesia shall, in the separate agreements referred to in Section 232, provide for:

(1) the administrative settlement of claims referred to in Section 178(a), including designation of local agents in the Marshall Islands and each State of the Federated States of Micronesia; such agents to be empowered to accept, investigate and settle such claims, in a timely manner, as provided in such separate agreements; and

(2) arbitration, referred to in Section 178(b), in a timely manner, at a site convenient to the claimant, in the event a claim is not otherwise settled pursuant to Section 178(a).

(d) The provisions of Section 174(d) shall not apply to claims covered by this Section.

TITLE TWO

ECONOMIC RELATIONS

Article I

Grant Assistance

Section 211

(a) In order to assist the Governments of the Marshall Islands and the Federated States of Micronesia in their efforts to advance the economic self-sufficiency of their peoples and in recognition of the special relationship that exists between them and the United States, the Government of the United States shall provide on a grant basis the following amounts:

(1) to the Government of the Marshall Islands, $26.1 million annually for five years commencing on the effective date of this Compact, $22.1 million annually for five years commencing on the fifth anniversary of the effective date of this Compact, and $19.1 million annually for five years commencing on the tenth anniversary of this Compact. Over this fifteen-year period, the Government of the Marshall Islands shall dedicate an average of no less than 40 percent of these amounts to the capital account subject to provision for revision of this percentage incorporated into the plan referred to in Section 211(b).

(2) to the Government of the Federated States of Micronesia, $60 million annually for five years commencing on the effective date of this Compact, $51 million annually for five years commencing on the fifth anniversary of the effective date of this Compact, and $40 million annually for five years commencing on the tenth anniversary of the effective date of this Compact. Over this fifteen year period, the Government of the Federated States of Micronesia shall dedicate an average of no less than 40 percent of these amounts annually to the capital account subject to provision for revision of this percentage incorporated into the plan referred to in Section 211(b). To take into account the special nature of the assistance, to be provided under this paragraph and Sections 212(b), 213(c), 214(c), 215(a)(3), 215(b)(3), 216(a), 216(b), 221(a), and 221(b), the division of these amounts among the national and state governments of the Federated States of Micronesia shall be certified to the Government of the United States by the Government of the Federated States of Micronesia.

(b) The annual expenditure of the grant amounts specified for the capital account in Section 211(a) by the Governments of the Marshall Islands and the Federated States of Micronesia shall be in accordance with official overall economic development plans provided by those Governments and concurred in by the Government of the United States prior to the effective date of this Compact. These plans may be amended from time to time by the Government of the Marshall Islands or the Federated States of Micronesia.

(c) The Government of the United States and the Governments of the Marshall Islands and the Federated States of Micronesia recognize that the achievement of the goals of the plans referred to in Section 211(b) depends upon the availability of adequate internal revenue as well as economic assistance from sources outside of the Marshall Islands and the Federated States of Micronesia, including the Government of the United States, and may, in addition, be affected by the impact of exceptional economically adverse circumstances. Each of the Governments of the Marshall Islands and the Federated States of Micronesia shall therefore report annually to the President of the United States and to the Congress of the United States on the implementation of the plans and on their use of the funds specified in this Article. These reports shall outline the achievements of the plans to date and the need, if any, for an additional authorization and appropriation of economic assistance for that year to account for any exceptional, economically adverse circumstances. It is understood that the Government of the United States cannot be committed by this Section to seek or support such additional economic assistance.

Section 212

In recognition of the special development needs of the Federated States of Micronesia, the Government of the United States shall provide to the Government of the Federated States of Micronesia $1 million annually for fourteen years commencing on the first anniversary of the effective date of this Compact. This amount may be used by the Government of the Federated States of Micronesia to defray current account expenditures attendant to the operation of the United States military Civic Action Teams made available in accordance with the separate agreement referred to in Section 227.

Section 213

(a) The Government of the United States shall provide on a grant basis $1.9 million annually to the Government of the Marshall Islands in conjunction with Section 321(a). The Government of the Marshall Islands, in its use of such funds, shall take into account the impact of the activities of the Government of the United States in the Kwajalein Atoll area of the Marshall Islands.

(b) The Government of the United States shall provide on a grant basis to the Government of the Federated States of Micronesia the sum of $160,000 in conjunction with Section 321(a). This sum shall be made available concurrently with the grant assistance provided pursuant to this Article during the first year after the effective date of this Compact. The Government of the Federated States of Micronesia, in its use of such funds, shall take into account the impact of the activities of the Government of the United States in Yap State, Federated States of Micronesia.

Section 214

As a contribution to efforts aimed at achieving increased self-sufficiency in energy production, the Government of the United States shall provide on a current account grant basis for fourteen years commencing on the first anniversary of the effective date of this Compact the following amounts:

(a) To the Government of the Marshall Islands, $2 million annually; and

(b) To the Government of the Federated States of Micronesia, $3 million annually.

Section 215

(a) As a contribution to the current account operations and maintenance of communications systems, the Government of the United States shall provide on a grant basis for fifteen years commencing on the effective date of this Compact the following amounts:

(1) to the Government of the Marshall Islands, $300,000 annually; and

(2) to the Government of the Federated States of Micronesia, $600,000 annually.

(b) For the purpose of acquiring such communications hardware as may be located within the Marshall Islands and the Federated States of Micronesia or for such other current or capital account activity as

may be selected, the Government of the United States shall provide, concurrently with the grant assistance provided pursuant to this Article during the first year after the effective date of this Compact, the sum of $9 million to be allocated as follows:

(1) to the Government of the Marshall Islands, $3 million; and

(2) to the Government of the Federated States of Micronesia, $6 million.

Section 216

(a) The Government of the United States shall provide on a current account basis an annual grant of $5.369 million for fifteen years commencing on the effective date of this Compact for the purposes set forth below:

(1) $890,000 annually for the surveillance and enforcement by the Governments of the Marshall Islands and the Federated States of Micronesia of their respective maritime zones;

(2) $1.791 million annually for health and medical programs, including referrals to hospital and treatment centers; and

(3) $2.687 million annually for a scholarship fund or funds to support the post-secondary education of citizens of the Marshall Islands and the Federated States of Micronesia attending United States accredited, post-secondary institutions in the United States, its territories and possessions, the Marshall Islands or the Federated States of Micronesia. The curricula criteria for the award of scholarships shall be designed to advance the purposes of the plans referred to in Section 211(b).

(b) The Government of the United States shall provide the sum of $1.333 million as a contribution to the commencement of activities pursuant to Section 216(a)(1).

(c) The annual grants referred to in Section 216(a) and the sum referred to in Section 216(b) shall be made available by the Government of the United States promptly after it receives instruction for their distribution agreed upon by the Governments of the Marshall Islands and the Federated States of Micronesia.

Section 217

Except as otherwise provided, the amounts stated in Sections 211, 212, 214, 215 and 231 shall be adjusted for each Fiscal Year by the percent which equals two-thirds of the percentage change in the United States Gross National Product Implicit Price Deflator, or seven percent, whichever is less in any one year, using the beginning of Fiscal Year 1981 as the base.

Section 218

If in any year the funds made available by the Government of the United States for that year pursuant to this Article or Section 231 are not completely obligated by the recipient Government, the unobligated balances shall remain available in addition to the funds to be provided in subsequent years.

Section 219

All funds previously appropriated to the Trust Territory of the Pacific Islands which are unobligated by the Government of the Trust Territory of the Pacific Islands as of the effective date of this Compact shall accrue to the Governments of the Marshall Islands and the Federated States of Micronesia for the purposes for which such funds were originally appropriated as determined by the Government of the United States.

Article II

Program Assistance

Section 221

(a) The Government of the United States shall make available to the Marshall Islands and the Federated States of Micronesia, in accordance with and to the extent provided in the separate agreements referred to in section 232, without compensation and at the levels equivalent to those available to the Trust Territory of the Pacific Islands during the year prior to the effective date of this Compact, the services and related programs:

(1) of the United States Weather Service;

(2) of the United States Federal Emergency Management Agency;

(3) provided pursuant to the Postal Reorganization Act, 39 U.S.C. 101 *et seq.*;

(4) of the United States Federal Aviation Administration; and

(5) of the United States Civil Aeronautics Board or its successor agencies which has the authority to implement the provisions of paragraph 5 of Article IX of such separate agreements, the language of which is incorporated into this Compact.

(b) The Government of the United States, recognizing the special needs of the Marshall Islands and the Federated States of Micronesia particularly in the fields of education and health care, shall make available, as provided by the laws of the United States, the annual amount of $10 million which shall be allocated in accordance with the provisions of the separate agreement referred to in Section 232.

(c) The Government of the United States shall make available to the Marshall Islands and the Federated States of Micronesia such alternate energy development projects, studies and conservation measures as are applicable to the Trust Territory of the Pacific Islands on the day preceding the effective date of this Compact, for the purposes and duration provided in the laws of the United States.

(d) The Government of the United States shall have and exercise such authority as is necessary for the purposes of this Article and as is set forth in the separate agreements referred to in Section 232, which shall also set forth the extent to which services and programs shall be provided to the Marshall Islands and the Federated States of Micronesia.

Section 222

The Government of the United States and the Government of the Marshall Islands or the Federated States of Micronesia shall consult regularly or upon request regarding:

(a) The economic development of the Marshall Islands or the Federated States of Micronesia; or

(b) The services and programs referred to in this Article. These services and programs shall continue to be provided by the Government of the United States unless their modification is provided by mutual agreement or their termination in whole or in part is requested by any recipient Government.

Section 223

The citizens of the Marshall Islands and the Federated States of Micronesia who are receiving post-secondary educational assistance from the Government of the United States on the day preceding the effective date of this Compact shall continue to be eligible, if otherwise qualified, to receive such assistance to complete their academic programs for a maximum of four years after the effective date of this Compact.

Section 224

The Government of the United States and the Government of the Marshall Islands or the Federated States of Micronesia may agree from time to time to the extension of additional United States grant assistance, services and programs as provided by the Laws of the United States, to the Marshall Islands or the Federated States of Micronesia, respectively.

Section 225

The Governments of the Marshall Islands and the Federated States of Micronesia shall make available to the Government of the United States at no cost such land as may be necessary for the operations of the services and programs provided pursuant to this Article, and such facilities as are provided by the Government of the Marshall Islands or the Federated States of Micronesia at no cost to the Government of the United States as of the effective date of this Compact or as may be mutually agreed thereafter.

Section 226

The Governments of the Marshall Islands and the Federated States of Micronesia may request, from time to time, technical assistance from the federal agencies and institutions of the Government of the United States, which are authorized to grant such technical assistance in accordance with its laws and which shall grant such technical assistance in a manner which gives priority consideration to the Marshall Islands and the Federated States of Micronesia over other recipients not a part of the United States, its territories or possessions. The Government of the United States shall coordinate the provision of such technical assistance in consultation with the respective recipient Government.

Section 227

In recognition of the special development needs of the Federated States of Micronesia, the Government of the United States shall make available United States military Civic Action Teams for use in the Federated States of Micronesia under terms and conditions specified in a separate agreement which shall come into effect simultaneously with this Compact.

Article III

Administrative Provisions

Section 231

Upon the thirteenth anniversary of the effective date of this Compact, the Government of the United States and the Governments of the Marshall Islands and the Federated States of Micronesia shall commence negotiations regarding those provisions of this Compact which expire on the fifteenth anniversary of its effective date. If these negotiations are not concluded by the fifteenth anniversary of the effective date of this Compact, the period of negotiations shall extend for not more than two additional years, during which time the provisions of this Compact including Title Three shall remain in full force and effect. During this additional period of negotiations, the Government of the United States shall continue its assistance to the Governments with which it is negotiating pursuant to this Section at a level which is the average of the annual amounts granted pursuant to Sections 211, 212, 213, 214, 215 and 216 during the first fifteen years of this Compact. The average annual amount paid pursuant to Sections 211, 212, 214 and 215 shall be adjusted pursuant to Section 217.

Section 232

The specific nature, extent and contractual arrangements of the services and programs provided for in Section 221 as well as the legal status of agencies of the Government of the United States, their civilian employees and contractors, and the dependents of such personnel while present in the Mar-

shall Islands or the Federated States of Micronesia, and other arrangements in connection with a service or program furnished by the Government of the United States, are set forth in separate agreements which shall come into effect simultaneously with this Compact.

Section 233

The Government of the United States, in consultation with the Governments of the Marshall Islands and the Federated States of Micronesia, shall determine and implement procedures for the periodic audit of all grants and other assistance made under Article I of this Title and of all funds expended for the services and programs provided under Article II of this Title. Such audits shall be conducted on an annual basis during the first five years following the effective date of this Compact and shall be at no cost to the Government of the Marshall Islands or the Federated States of Micronesia.

Section 234

Title to the property of the Government of the United States situated in the Trust Territory of the Pacific Islands or acquired for or used by the Government of the Trust Territory of the Pacific Islands on or before the day preceding the effective date of this Compact shall, without reimbursement or transfer of funds, vest in the Government of the Marshall Islands and the Federated States of Micronesia as set forth in a separate agreement which shall come into effect simultaneously with this Compact. The provisions of this Section shall not apply to the property of the Government of the United States for which the Government of the United States determines a continuing requirement.

Section 235

(a) Funds held in trust by the High Commissioner of the Trust Territory of the Pacific Islands, in his official capacity, as of the effective date of this Compact shall remain available as trust funds to their designated beneficiaries. The Government of the United States, in consultation with the Government of the Marshall Islands or the Federated States of Micronesia, shall appoint a new trustee who shall exercise the functions formerly exercised by the High Commissioner of the Trust Territory of the Pacific Islands.

(b) To provide for the continuity of administration, and to assure the Governments of the Marshall Islands and the Federated States of Micronesia that the purposes of the laws of the United States are carried out and that the funds of any other trust fund in which the High Commissioner of the Trust Territory of the Pacific Islands has authority of a statutory or customary nature shall remain available as trust funds to their designated beneficiaries, the Government of the United States agrees to assume the authority formerly vested in the High Commissioner of the Trust Territory of the Pacific Islands.

Section 236

Except as otherwise provided, approval of this Compact by the Government of the United States shall constitute a pledge of the full faith and credit of the United States for the full payment of the sums and amounts specified in Articles I and III of this Title. The obligation of the United States under Articles I and III of this Title shall be enforceable in the United States Claims Court, or its successor court, which shall have jurisdiction in cases arising under this Section, notwithstanding the provisions of 28 U.S.C. 1502, and which court's decisions shall be reviewable as provided by the laws of the United States.

Article IV

Trade

Section 241

The Marshall Islands and the Federated States of Micronesia are not included in the customs territory of the United States.

Section 242

For the purpose of assessing duties on their products imported into the customs territory of the United States, the Marshall Islands and the Federated States of Micronesia shall be treated as if they were insular possessions of the United States within the meaning of General Headnote 3(a) of the Tariff Schedules of the United States. The exceptions, valuation procedures and all other provisions of General Headnote 3(a) shall apply to any product deriving from the Marshall Islands or the Federated States of Micronesia.

Section 243

All products of the Marshall Islands or the Federated States of Micronesia imported into the customs territory of the United States which are not accorded the treatment set forth in Section 242 and all products of the United States imported into the Marshall Islands or the Federated States of Micronesia shall receive treatment no less favorable than that accorded like products of any foreign country with respect to customs duties or charges of a similar nature and with respect to laws and regulations relating to importation, exportation, taxation, sale, distribution, storage or use.

Article V

Finance and Taxation

Section 251

The currency of the United States is the official circulating legal tender of the Marshall Islands and the Federated States of Micronesia. Should the Government of the Marshall Islands or the Federated States of Micronesia act to institute another currency, the terms of an appropriate currency transitional period shall be as agreed with the Government of the United States.

Section 252

The Government of the Marshall Islands or the Federated States of Micronesia may, with respect to United States persons, tax income derived from sources within its respective jurisdiction, property situated therein, including transfers of such property by gift or at death, and products consumed therein, in such manner as such Government deems appropriate. The determination of the source of any income, or the situs of any property, shall for purposes of this Compact be made according to the United States Internal Revenue Code.

Section 253

A citizen of the Marshall Islands or the Federated States of Micronesia, domiciled therein, shall be exempt from:

(a) Income taxes imposed by the Government of the United States upon fixed or determinable annual income; and

(b) Estate, gift, and generation-skipping transfer taxes imposed by the Government of the United States.

Section 254

(a) In determining any income tax imposed by the Government of the Marshall Islands or the Federated States of Micronesia, those Governments shall have authority to impose tax upon income derived by a resident of the Marshall Islands or the Federated States of Micronesia from sources without the Marshall Islands and the Federated States of Micronesia, in the same manner and to the same extent as those Governments impose tax upon income derived from within their respective jurisdictions. If the Government of the Marshall Islands or the Federated States of Micronesia exercises such authority as provided in this subsection, any individual resident of the Marshall Islands or the Federated States of Micronesia who is subject to tax by the Government of the United States on income which is also taxed by the Government of the Marshall Islands or the Federated States of Micronesia shall be relieved of liability to the Government of the United States for the tax which, but for this subsection, would otherwise be imposed by the Government of the United States on such income. For purposes of this Section, the term "resident of the Marshall Islands or the Federated States of Micronesia" shall be deemed to include any person who was physically present in the Marshall Islands or the Federated States of Micronesia for a period of 183 or more days during any taxable year; provided, that as between the Government of the Marshall Islands and the Federated States of Micronesia, the authority to tax an individual resident of the Marshall Islands or the Federated States of Micronesia in respect of income from sources without the Marshall Islands and the Federated States of Micronesia as provided in this subsection may be exercised only by the Government in whose jurisdiction such individual was physically present for the greatest number of days during the taxable year.

(b) If the Government of the Marshall Islands or the Federated States of Micronesia subjects income to taxation substantially similar to that imposed by the Trust Territory Code in effect on January 1, 1980, such Government shall be deemed to have exercised the authority described in Section 254(a).

Section 255

Where not otherwise manifestly inconsistent with the intent of this Compact, provisions in the United States Internal Revenue Code that are applicable to possessions of the United States as of January 1, 1980 shall be treated as applying to the Marshall Islands and the Federated States of Micronesia. If such provisions of the Internal Revenue Code are amended, modified or repealed after that date, such provisions shall continue in effect as to the Marshall Islands and the Federated States of Micronesia for a period of two years during which time the Government of the United States and the Governments of the Marshall Islands and the Federated States of Micronesia shall negotiate an agreement which shall provide benefits substantially equivalent to those which obtained under such provisions.

TITLE THREE

SECURITY AND DEFENSE RELATIONS

Article I

Authority and Responsibility

Section 311

(a) The Government of the United States has full authority and responsibility for security and defense matters in or relating to the Marshall Islands and the Federated States of Micronesia.

(b) This authority and responsibility includes:

(1) the obligation to defend the Marshall Islands and the Federated States of Micronesia and their peoples from attack or threats thereof as the United States and its citizens are defended;

(2) the option to foreclose access to or use of the Marshall Islands and the Federated States of Micronesia by military personnel or for the military purposes of any third country; and

(3) the option to establish and use military areas and facilities in the Marshall Islands and the Federated States of Micronesia, subject to the terms of the separate agreements referred to in Sections 321 and 323.

(c) The Government of the United States confirms that it shall act in accordance with the principles of international law and the Charter of the United Nations in the exercise of this authority and responsibility.

Section 312

Subject to the terms of any agreements negotiated in accordance with Sections 321 and 323, the Government of the United States may conduct within the lands, waters and airspace of the Marshall Islands and the Federated States of Micronesia the activities and operations necessary for the exercise of its authority and responsibility under this Title.

Section 313

(a) The Governments of the Marshall Islands and the Federated States of Micronesia shall refrain from actions which the Government of the United States determines, after appropriate consultation with those Governments, to be incompatible with its authority and responsibility for security and defense matters in or relating to the Marshall Islands and the Federated States of Micronesia.

(b) The consultations referred to in this Section shall be conducted expeditiously at senior levels of the Governments concerned, and the subsequent determination by the Government of the United States referred to in this Section shall be made only at senior interagency levels of the Government of the United States.

(c) The Government of the Marshall Islands or the Federated States of Micronesia shall be afforded, on an expeditious basis, an opportunity to raise its concerns with the United States Secretary of State personally and the United States Secretary of Defense personally regarding any determination made in accordance with this Section.

Section 314

(a) Unless otherwise agreed, the Government of the United States shall not, in the Marshall Islands or the Federated States of Micronesia:

(1) test by detonation or dispose of any nuclear weapon, nor test, dispose of, or discharge any toxic chemical or biological weapon; or

(2) test, dispose of, or discharge any other radioactive, toxic chemical or biological materials in an amount or manner which would be hazardous to public health or safety.
